Congressional Record

PROCEEDINGS AND DEBATES OF THE 97th CONGRESS, FIRST SESSION

SENATE—*Wednesday, October 21, 1981*

(Legislative day of Wednesday, October 14, 1981)

The Senate met at 9:15 a.m., on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

PRAYER

The Chaplain, the Reverend Richard C. Halverson, LL.D., D.D., offered the following prayer:

Let us unite in silent prayer for the President as he meets in the summit conference in Mexico, for Senator TALMADGE on the loss of his mother, and for the family of Senator CHILES whose grandson was born prematurely at 26 weeks.

Heavenly Father, whose love is unconditional, impartial and everlasting, I pray for the beloved men and women who constitute our large Senate family. May Thy blessing rest upon them and their loved ones. Thou knowest those who are hurting. Where there is estrangement between husband and wife bring reconciliation. Where parents and children are alienated bring forgiveness. Where there is illness bring healing. Help those facing difficulty with finances. Where there is disappointment, discouragement or despair, give hope. Where there is tragedy, comfort. For those who are ready to give up because they see no meaning or purpose bring reassurance. Renew weary minds, hearts, and bodies.

Gracious God, thank Thee for all the faithful people who make the business of the Senate function. Thank Thee for those who work in the Senate offices in this building or on the grounds. Encourage them in the knowledge that each is important to the effective operation of government. Help us to appreciate each other, to serve each other, to love each other. In the name of Him Who lived to serve. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The majority leader is recognized.

Mr. BAKER. Mr. President, I thank the Chair.

THE JOURNAL

Mr. BAKER. Mr. President, I ask unanimous consent that the Journal of the proceedings of the Senate be approved to date.

The PRESIDENT pro tempore. Without objection, it is so ordered.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, after the recognition of the two leaders under the standing order, there are special orders for the recognition of two Senators, Mr. ROBERT C. BYRD of West Virginia and Mr. BENTSEN of Texas, for not to exceed 15 minutes each.

At the conclusion of the time allocated for the recognition of Senators on special orders, there is a unanimous-consent agreement providing for the period for transaction of routine morning business to extend not past the hour of 10 a.m., in which Senators may speak for not more than 5 minutes each.

After that, Mr. President, under the order previously granted, the Senate will resume consideration of S. 1196, with the Glenn amendment No. 560 pending, to be followed by an unprinted Hart amendment.

It is the hope of the leadership that the Senate will conclude its consideration of the Foreign Assistance Act today and obtain final passage.

SIGNIFICANT LEGISLATIVE PROGRESS

Mr. BAKER. Mr. President, when the road to the end of the session looks longer and longer, and becomes increasingly difficult to travel on, progress, however slight, becomes the name of the game. Yesterday, Mr. President, I believe the Senate made significant progress.

Under the able leadership of the chairman of the Foreign Relations Committee, Senator PERCY, and with the able assistance of the distinguished ranking member, Senator PELL, the Senate moved toward final passage of the foreign assistance bill. And it is still my hope that we can conclude that during the day today, perhaps even before the end of the day today, in order to proceed to the consideration of other matters.

In addition, Mr. President, with the assistance of the various committee chairmen, and particularly that of the distinguished chairman of the Appropriations Committee, Senator HATFIELD, it was possible for the leadership to announce a tentative schedule for the appropriations process. It is my hope that that schedule will serve as a blueprint for the efficient management of the appropriation bills in an expeditious manner, and the completion of that process in a minimum amount of time.

I intend to confer with the distinguished Speaker of the House to obtain his views on the time for a sine die adjournment of the Congress. That date will be influenced in large measure by our ability to deal with the appropriation bills. It is necessary to pay special heed to the tentative schedule or blueprint for the management of the appropriation bills as suggested on yesterday.

It is not necessary to say, but the truth of the matter is that we have to do these things if we are going to get out at all.

Mr. President, I have no further requirement for my time. I am prepared to yield the remainder of my time under the standing order.

I see no Senator seeking recognition. I will inquire of the distinguished acting minority leader if he wishes additional time.

Mr. LEAHY. I have no comments, Mr. President, other than to say that I do hope that the distinguished majority leader is able to keep within his schedule. Again, while Washington, D.C., is a beautiful city and we all love it dearly, the hills of Vermont at any time of the year beckon, and around Christmas time they beckon all the more.

I hope that the majority leader will be able to spend his time in the hills of Tennessee and I spend my time in the hills of Vermont during the Christmas period.

ORDER OF BUSINESS

Mr. LEAHY. Mr. President, I understand the distinguished minority leader (Mr. ROBERT C. BYRD) is going to address the Senate. I have no requirement for time.

The distinguished Senator from Wisconsin is here.

Mr. BAKER. Mr. President, may I suggest this, if the Senator will yield: I, too, have been told that the minority leader wishes to keep his time under the standing order. I ask unanimous consent, Mr. President, that the time for the recognition of the minority leader under the standing order be aggregated to the time given him this morning under the special

order so the time then will be a total of 25 minutes instead of 15 minutes.

The PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. BAKER. And that time, of course, will be saved until the minority leader is available to claim that privilege.

Mr. President, if there is no objection from the acting minority leader, what I would propose is that I might reclaim 1 minute of my time under the standing order so I can yield to the distinguished Senator from Wisconsin, without it being charged against the time allocated to the minority leader.

The PRESIDENT pro tempore. Without objection, it is so ordered.

GENOCIDE TREATY DOES NOT ACCEPT POLITICAL MURDERS

Mr. PROXMIRE. Mr. President, today I would like to once again refer to allegations made in the recent "White Paper on the Genocide Convention," a document distributed by the Liberty Lobby. The criticisms which have been leveled at the treaty since 1949, and which appear once again in this document, consistently point to supposed loopholes and shortcomings of the treaty.

It is my belief that those who oppose ratification of the Genocide Convention do not understand either the meaning of the treaty nor its underlying principles.

Under the heading "Political Mass Murder Accepted," the Liberty Lobby's white paper essentially makes the assumption that by the noninclusion of political groups as potential genocide victims within the treaty, this form of mass murder is therefore made acceptable.

The white paper then makes the argument that on the basis of this and similar alleged weaknesses. the Genocide Treaty should not be ratified.

In the first place, to believe that the omission of political groups from the treaty's definition of genocide is equal to the approval of the commission of genocide against such groups is an exercise in misguided logic.

Any international agreement is enormously difficult to negotiate; it is imperative to build a foundation upon which all parties may agree. The definition of a particular crime in a treaty does not perpetually exclude other acts not originally covered.

Later negotiations may well expand the scope of the original treaty. Does the limitation in scope of one aspect of the treaty warrant the denial of protection to the other groups which are protected by the Genocide Convention? Absolutely not.

Second, the implication of the White Paper that the omission of "political groups" permits the Soviet Union or any Communist or non-Communist state to reclassify any group of citizens as a "political group" and then freely commit mass murder is ludicrous.

It is clear that attempts to destroy members of an ethnic, racial, religious or national group, in whole or in part, constitute genocide. The public relations efforts of such murderous henchmen do not excuse or permit such unconscionable acts under the treaty.

Third, a point that friends and foes alike should heed is that this convention would apply to Communist and non-Communist nations alike. And I want to make it absolutely clear that this Senator intends to speak out loud and clear regarding any Communist transgressions of the spirit or letter of this convention.

Mr. President, the Genocide Convention stands as an affirmation of human rights, and a movement toward international protection of human life. Ratification of the treaty would enhance the position of the United States as a leader in the cause of human rights.

Certainly, ratification would aid in the credibility and overall strength of international law.

The treaty is not a plot by Communist sympathizers or bleeding hearts, nor is it an attempt to abridge the constitutional rights of Americans by allowing indiscriminate extraditions and international trials. No treaty—and I mean none—can override any constitutional rights of Americans.

Those who would seek to invalidate the benefits of the treaty by engaging in these ill-conceived exercises in sophistry must not prevent ratification of the Genocide Convention any longer. The United States must ratify the Genocide Convention.

I thank the distinguished majority leader.

Mr. BAKER. Mr. President, I ask unanimous consent that I may suggest the absence of a quorum without the time being charged against either the standing order or the special order.

The PRESIDENT pro tempore. Without objection, it is so ordered. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. JEPSEN). Without objection, it is so ordered.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, I ask unanimous consent that the time under the special order in favor of the Senator from Texas (Mr. BENTSEN) be added to the time allocated previously to the Senator from West Virginia.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. That will mean, then, that the minority leader, in the sequence of arrangements will have 15 minutes plus 15 minutes plus 10 minutes, or a total of 40 minutes. Is that correct?

The PRESIDING OFFICER. That is correct.

Mr. BAKER. I should like to change the order in sequence of this morning's activity, and I make the following request:

I ask unanimous consent that there now be a period for the transaction of routine morning business, to extend not past 10 a.m., on the same terms and conditions as previously ordered.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. I ask unanimous consent that at 10 o'clock, the distinguished minority leader be recognized under the time arrangements heretofore made.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I ask unanimous consent that at the conclusion of the remarks by the Senator from West Virginia, the minority leader, the Senate resume consideration of S. 1196, under the terms and conditions previously described.

The PRESIDING OFFICER. Without objection, it is so ordered.

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. Under the previous order there will now be a period for routine morning business.

U.S. ENERGY DEVELOPMENT

Mr. STEVENS. Mr. President, I am speaking today in support of the philosophy for U.S. energy development recently expressed by Secretary Edwards at the Herald Tribune Conference in London. Mr. Edwards correctly analyzes our energy situation as one of the best served by the free market system. I believe that coal, oil, gas, nuclear, and all of the renewable fuels can all prosper, given the will of our Government to allow the markets freedom to select and allocate appropriate resources under normal economic conditions.

Our Nation is moving away from imported energy through the efforts of all consumers to conserve fuels. Although cheap energy is no longer available, we are doing more with less. I, for one, expect that trend to continue with direct Government aid to only those high potential resources burdened by current need for risk-laden research to bring them to fruition.

Finally, it is the will of this country to take those steps necessary to prepare for the possibility of supply interruption. We are doing so by exploring, discovering, and bringing to market needed energy resources. I commend Secretary Edwards in his efforts to establish an energy policy that seeks to strengthen this Nation's energy security and thereby provide the security of our commitments internationally. I ask unanimous consent that the Secretary's remarks be printed in the RECORD.

There being no objection, the remarks were ordered to be printed in the RECORD, as follows:

SPEECH BY JAMES B. EDWARDS

It's a pleasure to be visiting here with you. I welcome the opportunity of talking with you today about the Reagan Administration's energy policy.

We're proud of the accomplishments we've made as a nation during the first eight months of this Administration. Last week, there were 4,249 drilling rigs at work in the United States, more than at any time since the oil industry began keeping records. And we're optimistic that as we continue dismantling the onerous regulatory edifice that has sapped our nation of its creative energies, and as we cut federal spending, industry will have even more market incentives

to seek out and produce oil, gas, coal and other resources.

Production is one pillar of our energy policy. Conservation is the other. The free market is encouraging Americans to conserve. We're confident that as we reinvigorate the free market we'll witness even greater savings.

Before telling you more about our domestic commitment to ending the siege mentality that we have all lived with since the 1973 oil crisis, I want to talk to you about the overall world energy outlook. Let me assure you at the outset that the United States takes its commitment to the International Energy Agency, to its friends and allies, very seriously. We share the responsibility for reducing worldwide vulnerability and for encouraging exploration.

The outlook for the next ten years indicates that imported oil will provide a declining proportion of American energy requirements. It isn't our policy to make precise—but inherently unrealizable—predictions about import levels. Yet, there is ample evidence that we are making progress. Between 1977 and 1980, our oil imports fell by more than 2.3 million barrels a day. For the first nine months of this year, they are down still further. If the crude oil we are buying for the Strategic Petroleum Reserve is excluded, our imports so far this year are down 21 percent compared to last year.

For the balance of the decade, there may be fluctuations in imports but we are confident that we will never return to the 8.6 million barrel a day level in 1977. The overall trend is definitely downward.

Contrary to the prophecies of the doomsdayers, we believe that there are still enormous quantities of oil and gas waiting to be discovered and added to world reserves. There may be only a few giant oil fields awaiting discovery, but there are unexploited offshore fields as well as hundreds of onshore sites in North and South America, Africa and Asia.

It is not often realized that nearly 90 percent of the world's drilling activity is concentrated in North America; three-quarters of it in the United States alone. If other nations provided as hospitable a climate for business as the United States, we're convinced oil companies would rise to the challenge and find new sources of oil that would help relieve many of the lesser developed countries of the ruinous financial burden they must shoulder in order to pay for imported oil.

Large volumes of hydrocarbons have been discovered since 1973 in Egypt, Tunisia, Australia, Mexico, Venezuela, and the South China Sea. In North America, there are promising areas north of the Arctic Circle. Canada's Hibernia field is one of the largest finds in recent history.

Advances in technology—like a recently dedicated rig that is designed to drill to an unprecedented 50,000 feet—will make it possible to exploit resources that, until now, we have ruled out. A whole new concept of business is emerging as we begin drilling for deeper oil.

As President Reagan said during the election campaign: "Our physical supply of fuels has not run out—only our supply of cheap fuels has." It will cost us more to produce energy, but we are convinced we are not about to run out of natural resources.

We have faith in ourselves and in our friends. Nonetheless, there's a need for continued vigilance to protect the Free World from unanticipated oil supply disruptions. We intend to fill the Strategic Petroleum Reserve at as rapid a rate as possible; this week we expect to add the two hundred millionth barrel of oil. We've added 90 million of those barrels to the Strategic Petroleum Reserve since coming into office in January.

While trying to maximize the production of oil, the Reagan Administration's policy is to encourage the development of all our domestic energy resources. Our National Energy Policy Plan, which we submitted to Congress in July, calls on us to strengthen our security by reducing our vulnerability. Within not too many years we may achieve energy self-sufficiency. Through competitive market pressures and individual choice, we envision oil, gas, coal, nuclear and a whole host of renewable resources competing in the market place, without subsidy and regulatory constrictions. Consumers, not the government, will make the choices about what fuels are most economical and efficient to use.

In short, this Administration has no blueprint to force upon the nation and the world. When the government intervenes the result is gasoline lines, erroneous predictions about shortages of natural gas and economic malaise.

As he promised during the election campaign last year, President Reagan is moving ahead to dismantle the Department of Energy. As he said in his speech to the nation last week, "We do not need an Energy Department to solve our energy problems as long as we let the forces of the marketplace work without undue interference." We believe that, instead of solving problems, the Department of Energy has been complicating them.

Due to the economic situation, the President has asked us to speed up the process of deciding how to keep his promise. Essential national security functions and long-term high-risk research and development will continue. There will always be a focal point in the government for managing emergencies and dealing with international energy matters.

Since January we have been reducing the size of the Department of Energy and eliminating its regulatory functions. We've already decontrolled oil and are taking steps to eliminate government price controls on gas.

With decontrol of oil, prices more accurately reflect the real cost of the resource. As prices rise to market levels, people are looking more closely at how they consume. For the first time in years, service stations are engaged in price wars with each other, a vibrant indication of how competition is advantageous to the consumer.

Spurred on by the new free market in prices and improved fuel economy, U.S. gasoline demand for the first five months of this year was 170,000 barrels a day lower than last year. Overall, U.S. oil consumption averaged 16.1 million barrels a day during the first five months of this year, down from nearly 19 million barrels a day in 1978.

Decontrol of oil has also provided industry with the incentive to explore and develop new resources. In June, more than 6,900 wells were drilled in the United States, a 40 percent increase over last year. More than 575 new rigs began operation during the first five months after decontrol. And the number of seismic crews at work has also increased sharply; in August, we had 735 crews at work, 30% more than a year earlier.

To encourage even more exploration, we've announced a new accelerated 5-year offshore leasing program. To date, only 20 million of the 1.1 billion acres on the Outer Continental Shelf have been leased. Yet, those areas alone supply nearly 10 percent of our domestic oil production and over 20 percent of our gas. We can open these vast offshore areas without undue risk to the environment and with proper consideration for competing social and economic interests.

Onshore too, we've already announced a vastly accelerated exploratory program. In December, the Department of the Interior will open for bids, 1.5 million acres within the National Petroleum Reserve A in Alaska, ending a 15-year moratorium on federal oil and gas leasing in that state. Additional sales will be held next year.

The President has before him a recommendation that he ask Congress to approve an accelerated phased decontrol of natural gas prices. Since 1978, when Congress voted to decontrol the price of deep gas and other types of new gas, industry has had an incentive to increase exploration for them. The sooner we start decontrolling all categories of gas, the sooner we will see our proven reserve levels increase. We won't know how large our gas reserves are until we decontrol.

Decontrol will raise the price of gas, but much less—in the long-run—than if we wait until 1985, as the current law stipulates. Americans have a choice between an interest-free installment plan, or having to assume an intolerable financial burden in 1985.

As you know, we're the world's largest producer of coal. Between 1978 and 1980 our production increased by 24 percent and despite a decline in metallurgical coal exports, the burgeoning increase in steam coal purchases has led to a 125 percent growth in exports in the last three years. That's indicative of our foreign customers' faith in our ability to become a reliable, economical supplier.

We welcome foreign investment in developing new mines, railroads, slurry lines and port facilities.

On July 17, we announced our coal export policy. We are reducing delays caused by needless regulations and permitting procedures. And we now have a coal export task force that's formulating recommendations to convince you that it's to your advantage to sign long-term contracts with our coal companies.

Earlier this year we ended a 10-year moratorium on coal leasing on federal land and we're urging the President to recommend extending the power of eminent domain so we can build a nationwide network of coal slurry lines.

In becoming a reliable supplier of coal, our goal is to help our friends become less dependent on higher priced imported oil.

Eventually, some of our coal will be turned into synthetic gas and oil. And with the development of North America's huge oil shale and tar sand deposits, we will have an abundant new source of energy for turning the wheels of industry. By providing loan guarantees and price supports to three large projects, the Tosco and Union Oil shale projects and the Great Plains coal gasification plant, the Reagan Administration has created the conditions so that the financial community can safely back other projects now on the drawing board or already in test operation.

Nuclear energy is a key element in our energy mix. Today, it provides 11 percent of our electricity. It's a cheap and reliable source of power. It's also a safe technology. The Reagan Administration believes we should do everything in our power to restore public faith in nuclear energy, to help the utilities overcome their financial problems and to open the way for the commercialization of advanced nuclear technologies like the breeder and fusion.

We need the political courage to start managing our radioactive waste. There are no major technical problems to overcome. Reprocessing spent fuel is the best solution. I want you to know that we stand ready to work with other countries to find mutually acceptable ways of sharing the responsibility for reprocessing spent fuel.

The Reagan Administration is intent on reestablishing U.S. credibility as a reliable nuclear supplier, while, of course, maintaining effective safeguards to prevent the spread of nuclear weapons. In July, President Reagan promised to streamline the export and retransfer licensing and permitting procedures that have been a source of frustration

to other countries. Our friends and allies are looking to us for leadership in this area. We will not disappoint them.

Renewable resources are the other major element in our energy mix. By removing federal subsidies for conventional fuels, we have created a more competitive environment for renewable energies. Most of these resources—solar, hydro, geothermal, alcohol, wind and biomass—are commercially viable, even if still expensive. We'll continue to support research on long-term high-risk technologies.

Within a few years, we hope to become far less dependent on imported energy. That does not mean, however, that we intend to forsake our international commitments. A prolonged, large-scale disruption in world oil supplies would be felt by all our citizens.

We can't make energy policy in a vacuum. We're seeking to reinforce the fabric of economic, political and security ties that bind us to friendly nations. The International Energy Agency has been and will continue to be the focus of our international energy efforts. The U.S. helped create the IEA, and we will stand by it.

Regarding major disruptions that trigger the formal oil sharing system we've developed since 1974, we are enabling U.S. companies to participate in the existing IEA emergency sharing system. We strongly endorse close and continued consultation with the oil industry on these issues.

We recognize the role of responsible oil producers in setting reasonable prices and production levels in order to maintain market stability. These same countries deserve praise for providing aid to the lesser developed countries.

The United States strongly supports large strategic reserves as a deterrent to potential supply disruptions. Hence, we encourage all IEA members to increase their stocks. We are increasing our reserve at a rate of as much as 500,000 barrels a day. During the first half of September, 19 tankers discharged oil including the first shipload of oil purchased from Mexico. We're vigorously pressing ahead to add capacity to enable us to achieve our goal of a 750 million barrel stockpile.

The Reagan Administration is aware that the burden of high oil prices tends to fall heavily on the resource-poor developing nations. We're confident that as we reduce our demand for imported oil, the international price of oil will tend to stabilize and the adequacy of supplies will be assured.

Our goal is clear. We must increase production, use energy efficiently, and practice conservation. One hundred and forty years ago, the French observer. Alexis de Tocqueville, wrote: "In the United States, the greatest undertakings and speculations are executed without difficulty, because the whole population is engaged in productive industry, and because the poorest as well as the most opulent members of the commonwealth are ready to combine their efforts." Today, that is still true.

We have an enormous storehouse of raw materials. Our people are creative and hardworking. In cooperation with our friends, we can relegate to the history books the crisis mentality that has weakened our resolve. If we act with strength and confidence, my children and yours will all find the world a more secure and hospitable place in which to live.

MOSHE DAYAN—A MAN OF PEACE

Mr. PERCY. Mr. President, the death last week of Moshe Davan in many ways touched us all. To many Americans he symbolized the versatility, dynamism, and determination which has won international respect for the Israeli people. His life is reflective of and intertwined with the growth and development of the State of Israel. He was born on a kibbutz in Galilee, and during his youth he worked the land and learned to know and respect his Palestinian Arab neighbors as they respected him.

Moshe Dayan above all is remembered for being the courageous soldier who fought for the birth and survival of Israel. More than any other figure Moshe Dayan captured the imagination of friend and foe alike. He was for many the personification of the Israeli spirit.

But let us not forget that this great soldier was also a man of peace. Moshe Dayan understood the ultimate survival of Israel rested on peace with its neighbors. His secret meetings with Egyptian envoy Tukaymi in Morocco were the first steps toward Camp David—a process in which he was an active participant. Without him, some believe, the process may never have borne fruit.

Moshe Dayan, moreover, realized that true and lasting peace demanded much from all parties. For him, the Sinai settlements were part of a vision of a future Israeli state. He spoke of Yamit becoming a city and port of 25,000 Israelis in the Sinai. Nevertheless, at Camp David he could substitute his vision of Yamit for one of lasting peace with Egypt.

Moshe Dayan was truly a man of many talents. Just as he captured our imagination, he himself was a man of insights and imagination. His ability to cut through knotty problems won admiration. We can do no better honor to the man, and to the peace process he promoted, than to renew our own efforts to carry his work forward.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Is there further morning business? If not, morning business is closed.

RECOGNITION OF SENATOR ROBERT C. BYRD

The PRESIDING OFFICER. Under the previous order the Democratic leader is recognized.

(Mr. ARMSTRONG assumed the chair.)

PROPOSED SALE OF AWACS TO SAUDI ARABIA

Mr. ROBERT C. BYRD. Mr. President, in the words of one of my favorite poets, James Russell Lowell:

> Once to every man and nation
> Comes the moment to decide
> In the strife of truth with falsehood
> For the good or evil side.

Today, I am announcing my decision on the administration's proposed sale of AWACS to Saudi Arabia.

This has not been an easy decision for me, as I know it has not been an easy decision for many of my colleagues. For almost every argument I have heard for the sale I can offer an equally persuasive argument against the sale; and, conversely, for every argument against the sale, I can offer an equally convincing argument, at least in my viewpoint, for it.

In other words, the terms of the debate as currently structured leave me unable to make a decision. For example, the argument is made that the Saudis are our friends in the region and we need to make good on a commitment to them. I think it is equally persuasive to argue that our being too close to the Saudis may not in the long run be in their best interests and, therefore, not in our own best interests.

Therefore, I feel it is impossible to try to add up pros, add up the cons, and place them on a balance to see which weighs heavier.

I have met with officials of this administration—Secretary of State, Alexander Haig; National Security Advisor, Richard Allen; and Under Secretary of State, James Buckley. I have talked with President Reagan privately in the Oval Office and by telephone, and I have had a brief discussion by telephone with former President Carter, who has addressed a letter to me on the subject, which I shall later insert in the RECORD. I have discussed the proposed sale with former Secretary of Defense, Harold Brown; former National Security Advisor, Zbigniew Brzezinski; and former Secretary of Defense, James Schlesinger.

I have listened to Senators on both sides of the aisle. I have been willing to listen to any Senator or anyone else who wishes to talk in this ear, any Senator or anyone else who wishes to talk in this other ear, but I have steadfastly refused to be "lobbied" by anybody.

I have talked with numerous West Virginians, and read the letters from my constituents. Three former Presidents have expressed support for the AWACS sale, and certainly this support by three prior Presidents and their advisors must carry important weight for us.

In my view, there is only one issue involved in a matter of this importance, and that is whether or not it will serve the interests of the United States.

The overarching question which should guide our discussion is this: What is the best course for America to steer toward a lasting peace in the Middle East? That must be the top priority; for, without peace, other long-term goals in that region will never be achieved.

It is apparent at the outset that the proposed sale of sophisticated aircraft and the associated equipment and weaponry is but a subsidiary piece of what must be a broader policy determination by this Government. And it is precisely because a coherent policy framework for the United States in the Middle East has not yet been developed by this administration, that the decision on AWACS has been so difficult for me and many of my colleagues. In deciding the merits of this relatively narrow question—the sale some 4 years hence of 5 AWACS aircraft as well as enhancements for fighter planes already agreed to—we have had to extend ourselves into presumptions, hypothetical scenarios, and guesswork about the sale's impact on the deeper

currents running in the politics of the Middle East.

These calculations unfortunately lack the perspective which a larger policy framework would lend to them. The crying need today is for action on the larger issues which are burning for resolution in that tragic region.

From the outset, the issue of AWACS sales to Saudi Arabia unfortunately has been politicized, affording little opportunity to weigh the merits of the case. Issues peripheral to the debate have come to dominate the headlines, obscuring deep concerns that I, and many of my colleagues, have regarding the sale.

For example, some have expressed concern that the AWACS technology could be used to give the Saudis a capability of offensive action against Israel.

However, the administration has addressed this issue in some detail, and I am generally satisfied that the assurances we have received from the Saudis, as well as the continued close cooperation in the use and maintenance of the aircraft and our complete commitment to Israel's security, minimize this danger.

The existence of a Saudi AWACS will not significantly alter the balance of air forces vis-a-vis the Israelis. Even if the Saudis were to attempt to use AWACS in a war against Israel, according to a staff study by the Senate Committee on Foreign Relations, they would probably not succeed, and the costs to the Saudis would be very high. If the Saudis were to attempt such an attack alone, according to the study:

> The effectiveness of such an attack would be limited ... by AWACS equipment limitations, Israeli jammings and E-2C capabilities, terrain masking, AWACS vulnerability, and possible early warning from U.S. maintenance personnel. The costs for Saudi Arabia could be severe in terms of Israeli military retaliation and severed military ties with the United States.

It should also be observed that earlier this year the Saudis used their influence, through quiet diplomacy, to help secure a reduction in tensions in Lebanon. Indeed, our envoy in the Lebanese situation, Mr. Philip Habib, has stated that the Saudi influence in the Lebanese situation was essential to the cease-fire agreement in the country.

Another hypothetical situation put forward by some analysts is a possible Saudi attempt to link up with Syrian and Jordanian command centers in a coordinated attack. The Saudis have agreed, however, according to the administration, that no Saudi AWACS-gathered information will be shared with third countries or parties without prior mutual consent of the United States. If this aspect of the Saudi-American agreement were to be violated, such information sharing would have to be practiced beforehand and be immediately obvious to us. In that case, we are told that we would have advance warning and could act to prevent this development.

I think it is important to underscore, forcefully, the following points. The vote on this issue is not a test of the United States-Saudi relationship, as some would have it, or a test of the United States-Israeli relationship, as others would have it. This is not a test between the Prime Minister of Israel and the President of the United States as to who will call the shots in our foreign policy. These are peripheral issues which obscure and obfuscate the fundamental concerns which Congress must address in arriving at a decision on this matter.

The real issue is that the Congress of the United States is being called upon to acquiesce in a major foreign policy decision impacting upon a vital, but highly volatile, region of the world. We are being called upon to make such a decision in the absence of a clearly defined or workable policy for the Middle East on the part of the administration.

In attempting to arrive at a prudent decision on this matter, all we are given by the administration is some vague notion that it is important for the U.S. to forge a "strategic consensus" in that region. It is upon this fragile reed alone that the administration predicates its foreign policy in the Middle East. Somehow, in the absence of addressing directly the potentially explosive Arab-Israeli issues, the administration hopes to bring the adversaries in the region together in some loose strategic alliance to counter the threat of the Soviet Union and her proxies.

However, the Middle East peace process must be brought back to the forefront of our policy, and significant progress demonstrated for any strategic consensus on the Soviet threat to be viable. At present, in light of the assassination of President Sadat, I do not know where events will lead us in the Middle East, but I am deeply concerned.

Mr. President, I have no idea what the administration is doing relative to the Middle East. In the absence of a coherent policy, the administration has reacted with a series of ad hoc and ill-conceived responses to events rooted primarily in the Arab-Israeli dispute and not the Soviet threat. As a consequence, these responses have been contradictory and have served to undermine our fundamental goal in the region—and that fundamental goal is the promotion of peace and stability.

The administration's actions toward Mr. Begin have, in my judgment, already given him too little incentive to pursue Camp David. To his credit, Mr. Begin has committed his government to complete the total withdrawal of Israeli forces from the Sinai scheduled for next April. But much more is to be expected of Mr. Begin. Mr. Begin has been given a large historic opportunity—it is to replace Mr. Sadat as the key architect of peace at this juncture. Surely no one is more aware of this than Mr. Begin himself. He is capable of exhibiting great political courage in this matter, and the circumstances demand nothing less.

The central issue for American policy in the Middle East is the Arab-Israeli dispute, and not the Soviet threat to the region. This is not to say that there is not a Soviet threat. Soviet influences, direct and indirect, are a primary and destructive force throughout the region.

The Soviets, through their proxies and clients in the Yemens, Ethiopia, Libya, Iraq, Syria, and elsewhere, are promoting instabilities which could be a primary cause of a major war there. The American answer can only partly be the arming of our friends, for this does nothing to resolve the central irritation—which is the Arab-Israel dispute. We must take immediate action to settle the issues in that dispute, including the breathing of new life into the Camp David peace process as well as broadening that process to include a resolution of the Palestinian question. The fundamental questions of the status of the West Bank and Jerusalem, the future of the Palestinians, and the right of Israel to live in recognized, secure borders are the paramount issues, and they will not go away.

The administration has expended most of its time and capital to date in attempting to build an anti-Soviet strategic consensus among our friends—including the Israelis, Egyptians, Saudis, the Gulf States, and Jordan. Yet, such a consensus would only be viable if the Arab-Israeli issues are resolved. In resolving them, a strategic consensus would become viable. If there is no progress in resolving them, it would seem impossible to develop such a regional consensus.

The Egyptians and Israelis took the initiative to reopen the autonomy talks on the West Bank and Gaza which were called for in the Camp David accords. The United States did not throw its prestige and creativity into those talks. It should have done so.

Under the Camp David framework, May 16, 1980, was the target date for elections of the self-governing authorities on the West Bank and Gaza. Israeli military governments were to have been dismantled and Israeli troops withdrawn into special locations after the establishment of administrative councils. That deadline is 18 months overdue.

June 16, 1980, was the deadline for establishment of self-governing authorities in those areas. This was to have been the beginning of a 5-year transitional period of self-rule. That deadline was missed.

Prime Minister Begin visited Washington last month. His visit followed a series of Israeli actions which have not been helpful to the peace process. The use of American-supplied jet aircraft to destroy a nuclear reactor in Iraq was a preemptive strike which reasonable men could hardly be comfortable in defining as "defensive" in nature.

Yet, further deliveries of sophisticated American jet aircraft are going forward, despite the violation of the condition that such transfers be for defensive purposes only.

Further, Mr. Begin has endorsed Israeli legislation annexing all of Jerusalem as Israel's eternal capitol, and

there is a growing perception that Mr. Begin is unwilling to permit any real local control over the West Bank by Arab authorities.

All these signs point in the direction of an Israeli intransigence in the peace process which discourages hope of tangible progress on the difficult questions which must be resolved.

During Prime Minister Begin's visit to Washington last month the issues of the West Bank, Jerusalem, the autonomy talks, and the future of the Palestinians were not raised by our Government in any meaningful fashion. What was announced was the creation of a new "strategic relationship" with Israel, thereby creating new suspicions on the part of moderate Arabs that the Palestinian issue was being forced further into the background by the administration.

Subsequent to the visit of Prime Minister Begin, the administration has pressed forward with the arms sale package to Saudi Arabia, undercutting any leverage we might have with the Israelis in obtaining substantive movement on the Palestinian issue.

In the wake of the assassination of President Sadat, the administration is now emphasizing that the United States would protect Saudi Arabia from any external or internal threat, transferring the mantle of a client state from Egypt to the Royal Kingdom.

I was talking a few days ago with a very high official of this Government and he said that to me.

He said that the United States would protect Saudi Arabia from any external or internal matters. I said, "How can you do it?" It was obvious that he did not anticipate that question. He really had no answer. He spoke of proxies.

Mr. President, it seems to me a very weak ground upon which to make such a bold, broad statement.

All of these pronouncements, or policy initiatives, if they can be characterized as such, were made in the absence of any consultation with the Congress. All are contradictory to achieving our goals in the region. And all commit this Nation to a future course which may intensify rather than alleviate the immediate threats to the region.

On October 15, I addressed the Senate regarding the concerns I had as they related to our policy in the Middle East. Nobody paid any attention to those concerns. I suppose no one will today.

At that time I noted the following:

In an effort to build a strategic consensus that the Soviet Union constitutes the major and most immediate threat to the vital interests in the Persian Gulf, Secretary of State Alexander Haig undertook a mission to the Middle East in April of this year. At that time, he found a Saudi Arabia primarily concerned with the irresolution of the Palestinian question, and he found a Jordan even more so. In Israel, the threat posed by both the Syrian Army and heavily armed PLO units in Lebanon was uppermost in the minds of Prime Minister Begin and his closest advisers.

Subsequent to the Secretary's trip, we have witnessed the Syrian missile crisis in Lebanon, the Israeli destruction of Iraq's nuclear reactor, terrorist attacks on Israel's civilian population, and the Israeli bombing raid on PLO offices in Beirut which killed an estimated 300 civilians.

We have received repeated warnings from Saudi officials that Israel constitutes the only real threat to peace and stability in the Middle East. Now, we are confronted with the latest tragic chapter in the Arab-Israeli dispute—the assassination of President Sadat.

In sum, not one development in the Middle East this year has involved direct Soviet action and there is no evidence to even suggest indirect Soviet involvement. Yet, this administration is attempting to establish a tacit regional consensus on meeting the Soviet threat among actors in the region whose primary focus is on the Arab-Israeli dispute. And it is within this context that the sale of AWACS to Saudi Arabia must be placed.

Mr. President, there are three fundamental principles upon which our policy toward the Middle East should be based.

First, our commitment to the security of Israel is, and always should be, unwavering and uncompromising.

Second, in light of the importance of Persian Gulf oil to the industrial health of the West, and in recognition of the strategic geography of the Persian Gulf, it is important that this region be secured against any threat.

And third, we should immediately begin refocusing on the Arab-Israeli peace process since it is the major obstacle to the administration's ability to forge a strategic consensus in response to the Soviet threat and represents the most immediate threat to stability in the region.

Within this framework, I would like to address three of the principal concerns I have regarding this sale.

First, we are transferring highly sophisticated technology which, if compromised, could be of significant benefit to the Soviet AWACS program. This should be as much an issue of sovereignty for the United States as it is for Saudi Arabia.

Second, we are launching an ever-escalating round of sophisticated weapons transfers to a highly volatile region of the world in which the primary focus of concern for the countries in the region remains the Arab-Israeli conflict, not the Soviet threat.

I shall never forget my visit to the refugee camps in Jericho, Jordan, in 1955, when I traveled there as a member of the House Committee on Foreign Affairs. The bitterness and the indignation that electrified the atmosphere of our discussions have never been forgotten. As we visited those refugee camps, I was impressed by the bitterness, and it lingers—lingers is the wrong word. It remains today. Why is it that we lose sight of that fact as we seek to put second things first rather than the reverse?

And third, we have all but abandoned the Camp David process, leaving the future of the Egypt-Israeli peace treaty uncertain at best.

The technology transfer question deeply concerns me. I opposed the Carter administration's proposed sale of AWACS to Iran for the same reason.

I shall put into the RECORD later at the end of my speech a copy of correspondence that I wrote at the time which lays out my concerns.

On April 8 of this year, I sent a letter to Secretary of State Alexander Haig expressing my concerns over the possible compromise of AWACS technology being proposed for transfer to Saudi Arabia.

I later shall include that letter in the RECORD.

Despite the fact that we are providing Saudi Arabia with stripped-down versions of our own AWACS, I remain concerned that a compromise of the technology we are providing would be an aid to the Soviets. For AWACS to perform the mission of protecting the Persian Gulf oil fields, it must have a capability which the Soviets do not yet possess to deal with a potential cruise missile or deep penetration bomber threat.

These concerns were reinforced when Allan Schell, an Air Force electronics specialist and official of the Rome, New York Air Development Center, admitted that the Soviets could benefit from our AWACS technology.

In a story which appeared in the September 24, 1981 New York Times, Mr. Schell told reporters during a briefing:

In a hypothetical case in which the Soviet Union gained actual physical possession of an AWACS plane, Soviet experts could determine significant features of the system without accomplishing "reverse engineering" of the software, by a procedure that Mr. Schell called "exercising the radar."

Mr. Schell stated the Soviets would fly the AWACS and deploy a wide variety of aerial radar targets in its radius of operation, while analyzing the radar returns and the way the computerized radar processor, or radar data correlator, displayed the data on multipurpose display consoles. He further stated that this would provide valuable information without working the codes or attempting to unravel the mysteries of the program tapes.

In that same story, another civilian defense consultant was quoted as stating that the Soviet Union would most probably give the highest possible priority to reverse engineering of the programing of the radar data correlator and other computerized subsystems on the aircraft.

In an unrelated story appearing in the Washington Post the same day, AWACS was discussed within the context of our overall strategic posture with the Soviet Union. The article noted:

The Pentagon's new strategic blueprint calls for building 12 Airborne Warning and Control Systems (AWACS) sentry aircraft to patrol the borders of North America. This is the same kind of plane that the Saudis want to buy to guard against surprise attack. . . .

In the belief the Soviets are progressing fast on a look-down AWACS of their own, Pentagon leaders shaping the President's military program for the next five years want existing B-52 bombers armed with devices for countering Russia's airborne sentries.

It is clear to me that the Soviets place a high priority on obtaining U.S. AWACS technology. Even if the risk were minimal that the AWACS for Saudi Arabia could be compromised, I do not care to take that risk, particularly since we will have little control over the system.

Much has been said about the sensitivity of the Saudis regarding the sovereignty issue. Yet, I do not believe we should be providilng top-of-the-line military technology to any country in the world, without strict controls maintained by the United States. I believe the United States has a sovereign right to maintain the integrity of all our military technology.

The AWACS we have sold to NATO have such strict controls applied to their use. We shoulder 40 percent of the cost and have 40 percent of the slots allocated to us for operation of the system. In addition, no decision can be made as to when the AWACS will fly or where they will fly in the absence of U.S. participation in that decision. In other words, we have joint command and control of the NATO AWACS and can veto any decision regarding their use.

I am also deeply concerned over the precedent that would be established by the proposed AWACS sale to Saudi Arabia. The assurances provided the Congress by the administration do not address these concerns adequately. We do not have a treaty relationship with Saudi Arabia. We do not have any defense arrangement with Saudi Arabia. Yet, the Saudis have rejected any suggestion that the United States will exercise joint command and control of the AWACS system.

If the Saudis are as concerned as is the United States in maintaining their security against external threats, then I think we have a right to determine what technology, if any, should be sold them and under what conditions that technology is to be transferred. It is a two-way street. The Saudis have an interest in having access to that technology for their own security; we have an interest in maintaining the integrity of our technology against compromise. Yet, the Saudis have dictated the terms of the sale.

Mr. President, there are other—and even greater—concerns relative to the technology involved in this sale. For example, the AIM 9–L, air-to-air Sidewinder missile is a highly advanced weapon that has not yet been developed by the Soviet Union. It gives our pilots a tremendous advantage because it allows them to fire missiles directly at hostile planes rather than requiring them to engage in time-consuming, and difficult, attempts to maneuver behind the enemy. The Sidewinder is a classified weapon. Saudi Arabia has not been given security clearance to receive the missile.

Since the AIM 9–L is a classified technology, its sale should have been approved through the normal procedures established to safeguard its security and protect it from risks of compromise or misuse. Those unused procedures involve securing the approval of the National Disclosure Policy Committee prior to a sale's being finalized. The National Disclosure Policy Committee, a group made up of representatives of the Secretary of Defense and the various military branches, is charged with evaluating the eligibility of various nations to receive classified weapons technology and weighing the risks and rewards associated with the transfer of that technology.

In the case of the proposed sale of the AIM 9–L to Saudi Arabia, however, a deviation from the normal safeguard procedures was made and an exception to the national disclosure policy was granted. The committee was bypassed.

Despite the fact that Saudi Arabia had not been cleared for receipt of sensitive systems like the AIM 9–L, the committee was not consulted about the sale. It apparently was directed to approve it after the fact, rather than being allowed to debate its merits initially.

During Senate Armed Services Committee hearings on the proposed arms sale package for Saudi Arabia, Senator LEVIN questioned Secretary of Defense Weinberger as to why these procedures were not followed. The Secretary was unresponsive. Senator LEVIN then submitted additional questions to the Secretary for the record. He asked if the administration had consulted—as the National Disclosure Policy Committee does—the CIA's Counter-Intelligence Risk Assessment and the Security Survey Report which are prepared after an on-site investigation. To my understanding, Senator LEVIN has not yet received a reply to his questions.

Earlier this year, 12 F–15 Air Force pilots wrote to Representative TOM LANTOS of California to protest this sale. The following is extracted from their letter:

> We do not want the technology of the AIM 9–L to leak to the Soviets through lack of security in Saudi Arabia or through some closed door bargaining session. We at the user level can attest that the AIM 9–L thrusts the American fighter pilot a very large step ahead in air combat over any other military force. The AIM 9–L is superior because it is a point and shoot weapon with excellent probabilities of success. The AIM 9–L is so superior that it gives the American fighter pilot a believable chance of survival when confronted with overwhelming numbers of Soviet aircraft we must face. If we, as a military force, are to maintain a credible deterrent defensive posture with a minimum of dollars, why give our technological edge away? Certainly we as pilots cannot be expected to fight against the overwhelming numbers of Soviet aircraft equipped with a compromised version of our AIM 9–L when we know how effective the missile is. We object to the sale of the AIM 9–L to Saudi Arabia.

These fears are not restricted to users in the Air Force. The Navy, at the highest level, has strongly objected to proposed sales of the AIM 9–L. While much of the material related to those objections is classified, in a memorandum to the Assistant Secretary of Defense for International Security Affairs, dated May 14, 1980, the Chief of Naval Operations wrote that:

> We believe it is imperative to restrict the sale of the AIM 9–L to those countries currently authorized to purchase this missile. Accordingly, the Navy does not concur in the sale of the AIM 9–L to neutral or third world countries, including Sweden, for the foreseeable future.

In a memorandum dated April 23, 1980, the Office of the Chief of Naval Operations reviewed a request for an exception to the national disclosure policy which would have authorized the sale of the AIM 9–L missile to Egypt and concluded that the "Department of the Navy recommends that such request be denied."

In a memorandum to the Secretary of Defense dated September 9, 1981, the Secretary of the Navy again raised questions about the wisdom of transferring the AIM 9–L technology. He wrote then that:

> I strongly recommend that the highest possible level of review be held in the future when the DOD receives a request for the sale of the AIM 9–L or the more advanced AIM 9–M. The technology of the AIM 9–L/9–M series is too advanced to be given to countries who could compromise its effectiveness or endanger U.S. military or allied aircraft with direct use. If the Libyans had had AIM 9–L, the recent incident in the Mediterranean could have had a much different outcome.

Senator LEVIN stated that the Secretary of Defense, in one of the few responses given the Senator, indicated that the President himself decided to grant the exception to the national disclosure policy in the case of the sale of the AIM 9–L. As a result of that decision, the Armed Forces were precluded from raising their concerns in the most appropriate and open forum available to them, the National Disclosure Policy Committee.

I now turn to the concern I have for the escalating arms race in the region.

In the October 18 edition of the New York Times, there appeared an article written by Drew Middleton raising alarming questions regarding the arms race in the Middle East. I quote the following from the article:

> The chronic edginess of the Middle East, sharpened by the assassination of Anwar el-Sadat, has promoted a response that is by now familiar in the region—a rush to weaponry. . .
>
> Transfers of weapons costing billions of dollars to the Middle East have touched off an all-out arms race, increasing the danger of an explosion military analysts warn. After failure in the early 1970's of a United States plan for regional restraints—the Soviet Union and France were not listening—the flow of American weapons rose sharply after Camp David, when Washington promised new hardware to Israel and Egypt to sweeten the deal.
>
> The Soviet Union, meanwhile, was pouring weapons into Libya and Syria, which signed a new defense treaty with Moscow last year; and France, Britain, Sweden, West Germany and even Spain have provided modern weapons to Iraq, Saudi Arabia and Kuwait among others. . . .

I am concerned that in light of the irresolution of the Palestinian issue, we will be precipitating another escalation in the arms race in the Middle East. Will we be faced with annual litmus tests? We hear that the Saudis "consider this as the litmus test." Well, are we going to be faced with annual litmus tests on the part of the Saudis and the Israelis?

What will be the next test? More F–15's and F–16's for Israel to counter the per-

ceived threat posed by the Saudis? In the case of the Saudis, will we be confronted in the coming years with an AWACs enhancement with top-of-the-line equipment available to make jamming impossible—more missiles, planes and other armaments to deal with whom they perceive to be the primary threat in the region—Israel?

As long the Arab-Israeli dispute is pushed into the background, this sale does not make any sense. Rather than contributing to stability in the region, I fear it will only raise the threshold of tension. I am concerned that we are fast approaching the point where we are handing over grenades to potential adversaries in the region with the pins already pulled.

As demonstrated by the raid on the Iraqui nuclear reactor, the Israelis have made it very clear that they will strike any perceived or potential threat to their security. If the level of tension should reach a crisis point, such as direct armed conflict with Syria, I think any strategic planner would have to calculate that the Saudi Air Force and AWACS would be one of the first targets.

In the 1967 Middle East War, the Israelis conducted preemptive strikes on Arab airfields, destroying most of the Arab air forces on the ground. In 1973, they were caught completely by surprise and the cost was enormous. Therefore, preemptive strikes are at the heart of Israeli security policy today, and a Saudi Arabia in possession of AWACS would then be factored in as a threat when it has not been treated so by the Israelis in the past.

I am at a loss to understand how what began as a simple survey of Saudi defense requirements escalated into a major foreign policy issue for the United States, without a great deal of high level attention along the way. We are putting our most sophisticated equipment into a highly volatile region of the world. The fact that we face an adversary of the sophistication and might of the Soviet Union requires that we have for ourselves the best and most sophisticated equipment we can buy. This does not mean that we should transfer this equipment around the world without regard for the instability it can immediately produce, and the pressure for further escalation which almost certainly will result. This is not the only case confronting us.

In an article appearing in the October 19 New York Times, serious questions were raised regarding the foreign policy decisionmaking process in this administration. Written by Leslie Gelb, it pointed out:

Often decisions are made at the top in the White House without proper regard for the consequences on other matters. This was the case in the proposed sale of F-16 fighter-bombers to Pakistan and Venezuela. Little or no consideration was given to the impact of those sales on the desire of the administration to sell new FX aircraft now under development as a less sophisticated substitute for the F-16."

I fear we are faced with the same situation regarding the AWACS sale to Saudi Arabia. What is disturbing is that it appears we were locked into a question of providing AWACS to Saudi Arabia before the foreign policy implications were studied, or a workable Middle East policy formulated. In my estimation, the Pentagon may have overstepped its bounds. It is one thing for our military to concentrate on meeting any threat posed by the Soviet Union, and certainly the potential threat to the Persian Gulf is something for which we should have significant concern.

However, it is quite another to expect our military planners to weight very carefully the present and future foreign policy consequences of such a decision. This is particularly important, since this decision affects a region of the world where traditional adversaries have been Arabs and Israelis, and have not been our primary adversary—the Soviet Union.

A staff report of the Senate Committee on Foreign Relations raises serious questions regarding this problem. The report was submitted to the committee after staff visits to Saudi Arabia and Israel and discussions conducted in Washington and Tinker Air Force Base, Okla. I will cite the relevant portions of the report:

A separate letter was sent on February 18, 1978, from Assistant Secretary Bennett to Congressman Lee Hamilton in which the following statements were made concerning the AIM-9L and AWACS:

"The Saudi Air Force is not scheduled to get the AIM-9L all-aspect Sidewinder missile which will be carried on the United States F-15s.

"An F-15 sale will not lead to the sale of the E-2C or E-3A (AWACS). The F-15 has excellent radar. Were the Saudis to purchase an aircraft with less effective radar than the F-15, they would be more likely to seek an airborne radar system."

Despite the assurances, the Saudis remained interested in upgrading their air defense. During March and April of 1979, two U.S. Air Force AWACS aircraft were deployed to Saudi Arabia in response to Saudi concerns that the North-South Yemen conflict could spill over. The importance of the AWACS as a surveillance platform was not lost upon the many senior Saudis who were afforded an opportunity to take a first-hand look at the AWACS deployed there. Accordingly, in September 1979, the Saudis requested a feasibility study to analyze the worth of an airborne surveillance system for the Kingdom.

Mr. President, what should be pointed out here is that the Saudis did not specifically request the E-3A AWACS when the Yemen conflict broke out. The Air Force took the initiative to send two E-3A AWACS to Saudi Arabia.

Quoting again from the report:

When he visited Saudi Arabia in February 1980, Dr. Brezezinski, President Carter's National Security Advisor, was given a list of equipment desired by the Saudis. That list included both F-15 enhancement equipment and the AWACS. On the interagency level, much of the list was approved. However, the Saudis were told on April 23, 1980, that the request for AWACS presented the United States with significant problems. They were also told that the United States was prepared to conduct an air feasibility study without prejudice to the United States' ultimate position on any sales. Nevertheless, Saudi officials began telling American reporters that they had received a commitment that the United States would sell Saudi Arabia the AWACS.

On June 26, 1980, in Geneva, Secretary Brown said that the United States could not make a commitment on F-15 items at that time and that the nature and timing of sales would be subject to eventual consultations with Congress. The Saudis renewed their request for AWACS at that meeting, and Secretary Brown told them that the air feasibility study would have to occur before any decision could be made. In Geneva, Secretary Brown also told the Saudi Defense Minister, Prince Sultan, that the United States was not prepared to loan AWACS to the Saudis, but that the United States would be willing to deploy AWACS to Saudi Arabia for joint training.

The air feasibility study requested by the Saudis was informally ordered on July 1, 1980, and formally initiated on September 8. The study was completed on December 15, 1980, and provided to the Saudis on March 6, 1981. The study made no recommendations; rather, it detailed the number, cost and personnel needs for equipment required to provide full border coverage of Saudi Arabia under each of three scenarios: (1) ground-based radar only; (2) a combination of ground radars and the E-2C "Hawkeye" airborne radar aircraft; and (3) a combination of ground radars and AWACS. The study found that the Saudi radar requirement could be met, respectively, by (1) 48 ground radars, (2) 34 ground radars with 11-15 "Hawkeyes," or (3) 18 ground radars with 5 AWACS. In case (1), though, the Saudis would lack any low-level radar surveillance much beyond 20-30 miles of their borders.

While the study was progressing, the United States deployed four AWACS, at the request of the Saudi Arabian Government, to Saudi Arabia on October 1, 1980. They were to fly over the Eastern provinces to counter any threats posed by the Iraq-Iran war. Although the level of fighting in the war has wound down in recent months and there is now only occasional air activity at night, the four AWACS in Saudi Arabia are still required to fly constant surveillance missions.

I find two aspects of this progression of events unsettling. First, the feasibility study on Saudi Arabia's air defense requirements was not formally submitted to the Saudi Government until March 6, 1981, this year. Second, when four AWACS were deployed at the request of the Saudi Government with the outbreak of the Iran-Iraq war, I was struck by the following sentence from the committee report.

As a result of the deployments to Saudi Arabia, the VIP tours of the aircraft conducted by such U.S. officials as General David Jones, Chairman of the Joint Chiefs of Staff, and the results of the air feasibility study, Saudi Arabia's interest in the aircraft was reinforced. Thus, their desire to have AWACS and the F-15 enhancement equipment became another test of the U.S.-Saudi relationship.

Thus, the decision to provide the package rested firmly with this administration and not the previous administration.

I would now like to turn to my final area of concern. The administration reasons that once this package is approved, then we can begin focusing our attention on resolving the Arab-Israeli dispute. That is like putting the cart before the horse. As events this year in the Middle East have demonstrated, this is a very risky path down which to proceed. The track record has not been good on such intractable problems as the West Bank or the future status of Jerusalem.

My concern is what happens if the administration is wrong. What if there is no further progress on a comprehensive

peace in the Middle East? Where will that leave Jordan, one of our closest allies in the Arab world for the past 25 years, whose King was given up on any prospects for meaningful negotiations on the West Bank? Will more weapons be the answer as one country continues to play us, the United States, off against another? How will we then extricate ourselves from demands for more and more sophisticated weapons and yet preserve stability in the region? It is time for some creative thinking to take place as to how we get the peace talks back on track.

The assassination of President Sadat, rather than demonstrating a greater need for arms transfers to Saudi Arabia, in my estimation, sends a strong signal that it is a time for caution and reflection. We have to understand the forces with which we are dealing in the region. They are diverse, but deeply rooted in the Arab-Israeli dispute.

That dispute transcends everything—everything.

President Sadat was assassinated by fundamentalist Moslem fanatics. This radicalism is not new. It is spreading throughout the region. It toppled the Shah in Iran; one of its leading spokesmen is Libya's erratic and dangerous strong man; it can be found in Syria, Iraq, and Egypt, and could erupt in Saudi Arabia under the right circumstances. It feeds on the continued irresolution of the Arab-Israeli dispute. It is the festering sore promoting conflict between Arab nations undergoing rapid modernization within traditional societies.

Arms and sweeping new military commitments will not defuse these elements. We are dealing with serious political problems, and if we do not recognize that fact, we open doors of opportunity for the Soviets while risking serious damage to our fundamental interests in the region.

Three years ago last March, three leaders emerged from Camp David with an agreement to launch the peace process. They were President Sadat of Egypt, Prime Minister Begin of Israel, and President Carter of the United States. Today, there is one leader of his country left—Prime Minister Begin. President Sadat was assassinated President Carter was defeated for reelection.

Therefore, it is evident that the key to the peace process now rests on the shoulders of Prime Minister Begin—more so than at any time in the past. I am heartened by Prime Minister Begin's and President Mubarek's mutual commitment to carry forward with the peace process. Despite domestic concerns, Prime Minister Begin has also committed his government to completing the total withdrawal of Israeli forces from the Sinai scheduled for next April. For this, he is to be commended.

Yet, the leaders of the region all have difficult decisions confronting them. The willingness of these leaders to make difficult decisions will determine whether or not the spirit of President Sadat will prevail or whether there will be a return to the unending cycle of war. To be able to make these decisions will require considerable maneuvering room.

Such manuvering room will be lessened for the Saudis because of the political burden of the sale on the Saudis. Approval of the sale will vault Saudi Arabia into the position of being America's chief client state in the Middle East. Transfer of technology, such as AWACS and the Sidewinder missile is a strong signal that will provoke a strong response from radical Arabs. Saudi Arabia could easily become the major target of groups ranging from the Libyan terrorists to Islamic fundamental extremists. These violent groups will perceive the Saudis as having sold out to "the Great Satan,"—America. The attack on the Great Mosque in Mecca at the time of the taking of the hostages in Iran demonstrates that the Islamic fundamentalist movement exists not only in Iran and Egypt, but in Saudi Arabia as well. And the Libyans seem to be willing to go to great lengths to harm the interests of the United States.

All of this reduces the contribution that the Saudis can be expected to make to the peace process in the Middle East. The primary component of the Saudi labor force—the people working in the oilfields—are Palestinians and other non-Saudis. Pressure from the bulk of the population on the Saudi royal family to restrain from a close involvement in the peace process is very likely, in my opinion. Disruption of oil production could be swiftly accomplished by the Saudi work force if it felt that the royal family was becoming an American client. And the sale of the AWACS would create that impression.

This line of argument leads me to the conclusion that the greater threat to the Saudi oilfields is internal, not external at least it is as great. By going to extremes to protect the oilfields from the external threat, which the administration says is the Soviet Union but which the Saudis say is Israel, the United States may help to precipitate internal instability. Egypt and Iran may be valid examples of this point. Iran was fantastically well-armed, but fell from internal strife. Egypt after Sadat may find it impossible to remain as close to the United States as we would like. I believe that the AWACS sale would push the Saudi population toward the radicals.

In my estimation, if the AWACS sale were to proceed at this time, the Saudis would lose, the Israelis would lose, the Egyptians would lose, the Jordanians would lose, and ultimately, the United States would lose.

We have to be realistic. The assassination of President Sadat has seriously weakened the position of Egypt to continue bilateral negotiations with the Israelis in isolation from the rest of the Arab world. This is what we overlook. Therefore, Israel will have to make concessions and take risks that it never felt compelled to do in the past, if the process is to continue. Their willingness to take such risks will be predicated upon their full confidence that the United States will stick by them. Approval of the sale will give Prime Minister Begin no maneuvering room whatsoever to make these decisions.

For the Saudis, the most important thing is a demonstration of resolve to address the Palestinian question. I do not buy the argument that the United States would be damaged seriously in the Arab world should this sale be disapproved. The United States is damaged in the Arab world only because of the continued irresolution of the Palestinian problem and the perceived lack of commitment on our part to address this issue.

Confronted with a choice between AWACS and a resolution of the Arab-Israeli dispute, I am confident that the Saudis would choose the latter. This is more of an immediate threat to the royal family's stability and their oil fields than any potential threat from the Soviet Union or a Soviet client. This is not to downgrade the external threats, I must say.

The administration made a serious mistake in using the assassination of President Sadat as a pretext for pushing the AWACS sale. It symbolically transferred the mantle of a U.S. client state from Egypt to Saudi Arabia, a perception that Saudi Arabia cannot afford within the Arab world. As a consequence, it is my judgment that if the sale were to go through, the Saudis would have to demonstrate that they are not a U.S. client, but a sovereign and independent state which views the Arab-Israeli dispute as the primary threat to stability in the region. Therefore, rather than risk being drawn into a poorly conceived peace process, the royal family will have to distance themselves from the United States or face serious problems internally and throughout the Arab world.

On October 15, I outlined my views on what needs to be done regarding our policy in the Middle East. Therefore, I will not repeat those arguments.

And finally, I would like to address the issue of whether or not the President would be weakened in the conduct of foreign policy if this sale were to be rejected by the Congress. The Congress and the executive branch are coequal partners in the policy formulation of our Government. The framers of our Constitution were very careful in constructing a government of checks and balances among the three branches. Constitutional scholars, including Arthur Bestor, Edward Corwin, Richard Neustadt, Arthur Schlesinger, Jr., and Louis Henkin maintain that under the Constitution the executive and legislative branches have "joint possession" of the power to decide questions of foreign policy. Under section 36(b) of the Arms Export Control Act, signed into law by President Ford, the specific congressional role regarding arms transfers was outlined.

There are some who argue that the conduct of foreign policy is vested entirely in the President and that any matter, treaty, or national commitment should have the acquiescence of the Congress. In other words, Congress should be the rubber stamp and should follow any President blindly, dutifully, unques-

tioningly over a precipice. I would only point out that some who have made this argument opposed the Panama Canal Treaty and the SALT I and the SALT II treaties after they had been negotiated by the executive branch.

These treaties were opposed on merit, however, by those who sincerely believed they did not promote the best interests of the United States.

I find this to be the case regarding the proposed arms sale to Saudi Arabia. I do not believe the sale serves the best interests of the United States. Quite to the contrary, I believe it places the best interests of the United States in jeopardy. Such a sale makes sense only within the context of a realistic Middle East policy which focuses on the fundamental issue separating Arabs and Israelis—the future of the Palestinians. If we do not recognize this, then we are launching on a path of upping the ante for Israel and the Saudis—escalating the arms race.

Mr. President, the arguments to vote for the sale are made all for the wrong reasons. They turn mainly on the sphere of the Saudis' reaction or on the President's prestige.

Mr. President, I have listened to those arguments, I have weighed those arguments myself. There have been times when I felt I would be for the sale; there have been times when I felt I would be against it. As I said in the beginning, I think I could take the case and probably support it either way up to a point. But there comes a point when one has to say "yes" or "no" and not "maybe."

So, having reached that point, and for the reasons I have stated, I feel very comfortable with the decision I have reached.

It is just this simple, really: If one, in consideration of the sale, goes back to square one, here is the question: Was this sale, as it is presently outlined, a prudent decision in the first place? I believe the answer would be a definite "no."

At present we have AWACS in Saudi Arabia patrolling the skies. They are manned by U.S. Air Force personnel. They have been in place for many months. Why not continue that arrangement?

If we should reject the sale, would the Saudis then kick the U.S. AWACS out of their country? If they see an external threat, it certainly would not be in their interest to do so.

Mr. President, I ask unanimous consent that the various pieces of correspondence to which I alluded during my statement be printed in the RECORD immediately following my statement.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
OFFICE OF THE MAJORITY LEADER,
Washington, D.C., July 22, 1977.

The PRESIDENT,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: I urge withdrawal of the notice of the proposed sale of seven E–3 aircraft (Airborne Warning and Control System—AWACS) and related equipment to Iran. As you know, this notification was submitted to the Congress on July 7, pursuant to the Arms Control Export Act. Under such notification, Congress has 30 calendar days during which the sale may be prohibited by means of a concurrent resolution.

I point out the particular circumstances which make it difficult for Congress to act within the statutory 30-day period. The Senate did not return from its non-legislative work period until July 11, and a resolution of disapproval was introduced on July 15. The Senate has been faced with a very demanding legislative schedule for the past two weeks and has only two weeks remaining prior to the statutory August recess. Hearings on the proposed sale have been held this week in both Houses, with further hearings scheduled next week.

In view of the limited time remaining, and the schedule facing the Senate, it will be impossible for the Senate to give the proposal the careful and serious consideration it deserves. During the next two weeks, the Senate is likely to consume a large amount of time in considering the legislation providing for public financing of Congressional elections.

I know you are aware that there is considerable controversy within Congress over the proposed AWACS sale and it would be likely to provoke extensive debate within the Senate. I want to convey to you my own serious reservations about the sale. I am particularly concerned about the security risks involved, and I know this concern is felt by many of my colleagues in the Senate and by the Director of Central Intelligence. I believe we would be taking an unnecessary risk of compromising the highly sophisticated technology which is critical to our own national defense.

One factor that especially troubles me is that if the Soviet Union gained access to the AWACS and its technology (by accident, defection, diversion of technical manuals, or through intelligence activities) it could accelerate Soviet development of defense against low-flying aircraft and missiles. This could cut years off the time the Soviets would need to develop a defense against the cruise missile. In view of your recent action discontinuing production of the B–1 and moving ahead with the cruise missile—an action I strongly support—this takes on added importance.

In the past five years we have sold more than $11 billion worth of arms to Iran, making that country by far the biggest recipient of U.S. arms. Iran already possesses large quantities of some of our most sophisticated military equipment.

I am also concerned that the sale would be contrary to our interest in a stable military balance and in limiting arms proliferation in the area. Although I understand that the AWACS is technically a support system, it would create a new and significantly increased combat capability for advanced weapons systems, such as the F–14, which the Iranian Air Force has. The AWACS capability to greatly multiply the offensive power of these aircraft is likely to cause neighboring nations to seek new weapons in response.

Another factor which concerns me is that this proposal may undercut the credibility of your announced policy on arms sales, which included the pledge that we would not introduce into a region "newly developed, advanced weapons systems which would create a new or significantly higher combat capability."

There are other problems which I find troubling, including the fact that NATO does not yet possess the AWACS. Further, the sale to Iran would require substantial American technical support in Iran, where we already have a large number of American citizens, many of whom are involved in military programs.

All of these problems, coupled with the legislative schedule facing the Senate, point to the need to delay action on this matter. I hope, therefore, that you will request the Secretary of Defense to withdraw the notice of the proposed sale.

Respectfully,

ROBERT C. BYRD,
Majority Leader.

U.S. SENATE,
OFFICE OF THE DEMOCRATIC LEADER,
Washington, D.C., April 9, 1981.

Hon. ALEXANDER M. HAIG, Jr.
Secretary of State, Department of State,
Washington, D.C.

DEAR MR. SECRETARY: Welcome back from your trip to the Middle East, Madrid, and London. I hope you found your discussions most fruitful.

The purpose of this letter is to raise a number of concerns associated with the announcement that four AWACS will be sold to Saudi Arabia as part of an overall package which includes enhancement of the F–15's previously sold to that country and the proposed sale of KC–135 tankers. In raising these concerns, I want to assure you I have a particular appreciation for the legitimate security needs of a country of such critical importance to the United States as Saudi Arabia. However, I raised the same concerns when President Carter proposed the sale of seven AWACS to Iran in 1977, and I feel these are equally applicable in connection with the proposed sale to the Saudis.

As was brought out in the 1977 hearings, the Air Force maintains that "the E–3A is the most revolutionary development in airpower since the invention of radar." Four years later, AWACS remains a highly sophisticated technology which is critical to our own national defense. Since this would be the first potential delivery of AWACS to a non-NATO country, I am most concerned over potential security risks which could compromise a technology the Soviets are years away from perfecting.

In 1977, the Congress finally agreed to the sale of AWACS to Iran, only after a set of assurances were provided by the President. Because the first AWACS were not scheduled to be delivered to Iran until early 1981, the sale was cancelled after the Shah was deposed.

I would be most appreciative if you could provide answers to the following questions regarding the proposed sale to Saudi Arabia.

First, will the following equipment from U.S. AWACS be installed on the Saudi version: U.S. Government encipherment gear (such as the KG–40); joint tactical information and distribution system (JTIDS); expanded command, control and communications; signal intelligence (SIGINT); additional electronic counter-counter measures (ECCM); and secure mode of identification of friend and foe (IFF)?

It is my understanding that the absence of the above listed equipment in the Saudi AWACS would significantly minimize the risk of U.S. Air Force performance degradation that could result from any security compromise.

Second, has the U.S., in cooperation with Saudi Arabia, developed special security arrangements that insure adequate protection of the AWACS aircraft? In the case of Iran, the framework for all security measures—both special and normal—was the U.S.-Iranian Agreement of June 6, 1974, which provided for the safeguarding of classified information. In addition, it provided that stringent security precautions were to be observed by Iran with respect to classified information received from the United States. Such information was specifically defined in its broadest sense to encompass classified equipment transferred to Iran under the Foreign Military Sales program. The agreement provided for periodic visits by U.S. security experts to discuss procedures, equipment, and facilities for the protection of classified information, and to ensure that such information was receiving adequate protection.

Third, did the U.S. Government take into account the AWACS "multiplier effect" when approval was given to the enhancement of the F–15?

Fourth, will the training of Saudi crews for the AWACS take place entirely in the

United States? Will any U.S. citizens participate in routine operational missions of Saudi AWACS in Saudi Arabia? Will any U.S. personnel perform maintenance or training functions on board AWACS operational flights?

Fifth, what is Saudi Arabia's manpower capacity to absorb high technology systems without additional requirements for U.S. technicians? How many U.S. military and civilian personnel are now stationed in Saudi Arabia in connection with previous sales of U.S. military hardware to that country? How many additional U.S. military and civilian personnel will be required to be stationed in Saudi Arabia if this entire package (the AWACS, F-15 enhancement, and KC-135 tankers) is approved?

And finally, what impact would the sale of AWACS to Saudi Arabia have on the military stability in the region? In particular, as a potential adversary of Israel in another Middle East war, what capability would AWACS give Saudi, Syrian and possibly Jordanian air forces? Would this require significant purchases of counter-measures on the part of Israel to neutralize the potential offensive capability associated with AWACS?

These are the major concerns I have relative to the proposed sale of AWACS to Saudi Arabia. In light of the significant controversy surrounding the Carter Administration's original proposal for the sale of AWACS to Iran in 1977, the proposed sale of AWACS to Saudi Arabia is certain to spark even greater controversy in the Senate than in 1977.

In 1977, the Shah was agreeable to accepting important modifications in the AWACS and the other assurances the President gave the Congress. Would the Saudis be amenable to similar modifications and assurances? I am concerned that the intense public debate which will follow the formal submission of this package not be detrimental to our relations with Saudi Arabia. Therefore, I believe it is important that the concerns I have raised in this letter be addressed adequately prior to the formal submission of the arms package to the Congress.

Thank you very much for your prompt attention to this matter.

Sincerely,

ROBERT C. BYRD.

DEPARTMENT OF STATE,
Washington, D.C., April 16, 1981.

Hon. ROBERT C. BYRD,
U.S. Senate.

DEAR SENATOR BYRD: Thank you for your letter of April 9 to the Secretary regarding the proposed sale of enhancement items for Saudi Arabia's F-15 aircraft. Your letter raises several complex questions which we will need to consider very carefully. We hope to have a complete reply to your questions within a short time following our consultations in this Department and with the Department of Defense.

Sincerely,

ALVIN PAUL DRISCHLER,
Acting Assistant Secretary for Congressional Relations.

JIMMY CARTER,
October 11, 1981.

To Senator ROBERT BYRD:

I have discussed with you the forthcoming decision by the United States Senate on sale of the AWACS planes to Saudi Arabia, and would like to give you my assessment of some of the factors involved. I also request that you share my views with other members of the Senate who may find them of interest.

Although many arguments can be put forward on both sides of a complicated matter like this Presidential proposal, there is no doubt that at this time it will be best for our nation to approve the sale.

Throughout my service as President I always found the Saudi Arabian leaders to be staunch friends of our country. They are strong and influential moderates in an area where moderation is vital in circumscribing fanaticism and violence. The rejection of the proposal at this advanced stage would likely damage this very important friendly relationship with us and would certainly strengthen the influence of others in the region who do not share our commitment to peace and stability. In many ways, this has become a litmus test of America's reliability.

It is true that the Saudis and other Arabs have not supported the Camp David peace process as much as we would have liked. It is unfortunate, but this undoubtedly will continue to be their position until there is some assurance that the Palestinian issue will be resolved. We can convince the Arab nations to join this peace effort by helping to carry out the promises which were made at Camp David by Israel and Egypt. In the meantime, a crucial question is whether the United States will be a reliable partner in facing threats during these uncertain and troubled times. The Senate vote this month will provide one vivid answer to this question.

The Saudis are not a warlike people, and greatly desire peace and stability. Also, the planes in question are primarily designed for defensive use. It is obvious that other radar sources in the area would be able to monitor airplane flights to and from Israel, and that the basing of the AWACS would not materially change this circumstance. Also, of course, the surveillance planes are already there, dispatched by me during the Iranian crisis to protect both Saudi Arabia and our own nation's interests. They have not endangered Israel or any other nation in the area.

As much as any thing else in my public life, I have worked for Israeli security and for peace in the Middle East, and these goals are still very important to me. I am convinced that the consummation of this sale will contribute to both of them. The beneficial influence of the moderate Arab nations is a valuable resource which we should nourish whenever it is practical to do so.

I do not know what private assurances have been exchanged between the leaders of our two countries. However, I am certain that these arrangements have been shared with the appropriate Congressional committees during recent hearings.

There are two related factors which should be considered, and they are quite significant. One is that the Senate resolution which has been introduced by Senator Nunn and others provides adequate protection of American interests during the coming years. The universal application of these prescribed restraints to all nations who might acquire the AWACS, including our NATO allies, should make them acceptable to the Saudis. Secondly, in the eyes of most nations a commitment by the President of the United States is considered to be a promise by our country.

A rejection of his commitment, rightly or wrongly, will be considered by our allies and potential adversaries as the breaking of a solemn agreement by the United States. From our own legal point of view this is not a persuasive argument, but if an issue such as this is in doubt, the benefit should certainly go to supporting the commitment of our President.

For the well being of our own country, for the continuing security of Israel, and for peace and stability in the Middle East and Persian Gulf area, I hope that you and other members of the Senate will give him this support.

Sincerely,

JIMMY CARTER.

Mr. CRANSTON. Mr. President, will the Senator yield?

Mr. ROBERT C. BYRD. I yield the floor.

ORDER OF BUSINESS

The PRESIDING OFFICER (Mr. SIMPSON). Under the previous order, the clerk will now report the pending business.

Mr. ROBERT C. BYRD. Mr. President, the majority leader is not on the floor. I hope Mr. PERCY or someone on the other side of the aisle will request a few additional minutes so that colleagues on both sides may comment if they wish.

Mr. PERCY. Yes, of course. Will the Senator yield for just a moment?

Mr. President, I ask unanimous consent for 15 additional minutes so that Senators may be able to reply to the distinguished minority leader's comments.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. PERCY. Mr. President, I shall yield directly to the assistant minority leader.

I know how hard the distinguished minority leader has labored on this particular issue. The number of people, the authorities he has talked to, are impressive. He never takes an issue of this kind, involving the prestige of the United States, lightly.

His speech will be studied by every single Senator. This Senator intends to examine it very, very carefully indeed.

However, I find myself diametrically opposed on this particular issue for a variety of reasons. I have partly enunciated my views during the debate within the Foreign Relations Committee, and I will refrain from making detailed comments at this time, preferring to wait for the AWACS debate so that we can proceed with the foreign assistance bill, which is the pending business on the floor.

However, I do wish to again express my deep affection and very high regard for the minority leader. I can appreciate the difficulty he had in making this decision. He has always tried to stand by his President, be he Republican or Democrat. His decision was made in accordance with his conscience, and that is the highest duty and calling of any U.S. Senator.

I fully respect that, even though we are very much on opposite sides on this issue. We shall do battle down the road.

The honorable Senator from West Virginia has expressed his concerns about the security of the equipment. I believe his fears have been addressed. After extensive consultations between the executive and legislative branches and between our Government and the Government of Saudi Arabia, comprehensive and far-reaching measures have been developed which will protect the security of the U.S. supplied equipment and technology including; U.S. security teams will monitor security procedures on a regular basis; only United States and Saudi personnel will operate and maintain this equipment; special security facilities will be constructed and special identification and control procedures will be established; and a complete security plan will be developed jointly and submitted for U.S. approval 1 year before the first Saudi AWACS is delivered.

While many would have preferred retained U.S. ownership of the aircraft or joint control, these options were neither feasible nor necessary. The measures taken by the administration are fully sufficient to reduce the possibility of a technological compromise to a minimum.

Moreover, in 1975 when Air Force officials first discussed the AWACS with Congress, AWACS were a significant advance in the state of technology. These aircraft will not be delivered to Saudi Arabia until 1985 and American control will be insured until the mid-1990's. By that time, significant advances in technology are probable and the AWACS are unlikely to be as sensitive as they were in 1975 or even as they are today.

Two years ago, in the wake of the Shah of Iran's fall, the Mecca incident and riots in the oil-rich eastern province, concerns were voiced about the stability of the ruling family in Saudi Arabia. It is now evident that the Saudi Government has weathered the shocks of the past 2 years and learned some important lessons. The studied understanding of the overwhelming majority of professional observers of the Middle East who have spent any time in Saudi Arabia is that the Saudi regime at present and in the foreseeable future is stable; opposition groups are small and have little support; and the current regime, while not representative, is responsive to the needs of the population at large.

I find myself most directly in disagreement with the minority leader on the question of the impact of the rejection of the sale on the pursuit of peace in the Middle East. I agree that the foremost concern of the United States is to pursue a policy which promotes peace between the Arabs and Israelis, but disapproval of the sale will make the pursuit of peace much more difficult.

In 1978, if Congress had opposed the sale of F-5's to Egypt, few believe now that Camp David could have occurred without the reassurance of American support that Egypt received as a result of our willingness to make this sale. A defeat would have destroyed U.S. credibility as an unbiased participant in the Camp David process.

The Camp David process has failed to achieve greater success because other Arabs refused to join the process. Their refusal was based primarily on the view the United States would not play the role of impartial broker and, as a consequence, future negotiations would not result in a fair settlement. A failure to approve the arms sale to Saudi Arabia will confirm the perception in many Arab minds that the United States cannot have a balanced Middle East policy. As a consequence, few if any Arabs, will risk supporting U.S. efforts to achieve peace in the Middle East.

Moreover, while emphasizing the importance of achieving peace in the Middle East we cannot deny the necessity to protect the oil flow from a variety of threats. If recent raids on Kuwaiti oil facilities by Iranian aircraft had been directed at a key Saudi facility instead. the consequences for the Western World would have been grave. We must take every step necessary to insure that this does not occur. Our ability to fashion with the moderate Arab States a concerted response to existing and future threats to these vital oil supplies also would be impaired by a disapproval of the sale.

Mr. ROBERT C. BYRD. Mr. President, I thank the distinguished Senator for his comments.

Mr. CRANSTON. Mr. President, I congratulate the Senator from West Virginia for what I deem to be a very, very wise decision and a very sound one. I know that it is buttressed by a very patient, painstaking effort to consider all of the facts, all of the factors, all of the views that have been brought to bear and that play a part in this very, very important issue.

I know the Senator has reached out to many people seeking their advice, and I know he has patiently submitted himself to the advice of those who have come to him unsolicited because of the very important part that he plays in the Senate and is playing now in the decision that we will make in this body next week.

The minority leader's strong stand against the sale of AWACS to the Saudi Arabians greatly increases the prospect that the transaction will be blocked by the U.S. Senate. I believe this is a crucial turning point in the debate. I expect other Senators thus far uncommitted to make it known soon that they share the view of the Senator from West Virginia. I now count on Senator BYRD to assume the leadership of the forces opposed to the sale and we could not have a more skilled, effective and knowledgeable leader.

I agree with the statement of the Senator from West Virginia that this is not a partisan issue, despite the efforts of the President of the United States to make it so behind closed doors in the White House in meetings with the Republicans. It is an international issue, in part relating to foreign policy and to national security and to peace.

It is also, as the minority leader made plain, an institutional issue involving the constitutional role of the Congress in sharing in decisionmaking in foreign policy and in defense matters.

The proposed sale, as the Senator stated, indeed places the national security interests of the United States in jeopardy.

I was particularly impressed by the thoughtful and indeed courageous analysis by the Senator from West Virginia of the Soviet role in the Middle East. And I agree with the analysis, so carefully made, that the Arab-Israeli conflict is very plainly the principal factor threatening peace and stability in the Middle East, not the role of the Soviet Union.

I agree with him that the matter of the security of Israel, our only certain friend and ally in the Middle East, remains a No. 1 factor and must remain that in our decisionmaking in regard to that part of the world; that the security of oil supplies is another factor that we must consider with the utmost care; and I agree with his analysis that oil supply faces primarily an internal, not an external, threat.

The need that he stressed to refocus on the Arab-Israeli peace process, and all the intricate web of factors involved in that, were very carefully analyzed by the Senator, and that is a very important aspect of the matter that is now before us.

The issue of the compromise of secret technology introduced under the proposed sale into a volatile part of the world, without adequate American control, is plainly a major factor that we must consider. And, as the Senator stressed, the whole issue of introducing such sophisticated weapons in ever greater amounts to "both sides" in the conflict in the Middle East does not serve the purpose of stability and plainly does not serve our national interests. All it does is escalate arms throughout that region, as they are escalating in dimensions throughout the world in ways that threaten the security of our country and the future of the entire human race.

The Senator has thought out with the utmost care a profoundly significant issue and I am delighted that he is our leader.

Thank you.

Mr. ROBERT C. BYRD. Mr. President, I thank my distinguished friend and colleague, Mr. CRANSTON.

Mr. GLENN addressed the Chair.

The PRESIDING OFFICER. The Senator from Ohio is recognized.

Mr. GLENN. Mr. President, I would like to join in a very few short remarks complimenting the leader, not necessarily on his decision, even though it happens to come down on the side that I am on, but on the thoroughness in which he has gone into this. I hope that every Senator and every staff member involved in this decision will read and reread his remarks, because I think they put in one document all aspects of this issue better than anything I have seen or heard.

I would go further. The President left within the last couple of hours to go to Cancun for the summit. The reports are that he will meet there with Crown Prince Fahd. I would hope, even at this late date, the President would see fit to bring this up to Crown Prince Fahd and talk about joint crewing, the importance to the area, the importance to us, and the importance to our being able to back up Saudi Arabia in that area.

I am sure the leader takes no joy in making the decision he made today. I have taken no joy in taking the stand I have taken for lo these many months since last spring on this particular issue. It is fraught with such momentous consequences that none of us likes the things we are doing on some of this. Even the proponents of this do not like what they are doing.

So I would hope that even at this late date that we could have some hope raised at Cancun that this area will be discussed again, that the importance of it can be brought up with Crown Prince Fahd, and that all the reasons which the leader has enunciated here today, as well as others, could be brought to bear to try, even at this 11:30 hour in this debate before our vote next week, that we could have perhaps some agreement and work our way out of this.

If there could be some joint manning arrangement, I think that would take

care of 90 percent of the difficulty. I think it would pass on the Senate floor overwhelmingly. It would not be a close vote. It would show our desire to maintain a posture in the Mideast in support of Saudi Arabia and recognizing the importance of that Persian Gulf area.

Let me say that this body passed 88 to 0 before the Ottawa summit a request that the matters of nuclear nonproliferation be made a matter of discussion before the five nations that were nuclear suppliers at Ottawa. Our desires in this were not realized. The President made no issue of this. I think in their final communique there was a small partial sentence mentioned of nuclear nonproliferation. I think it was the 32d or 34th of the items listed in that communique.

So the wishes of the Senate were ignored largely, even though there was an 88 to 0 vote, a unanimous vote of the Senate of the United States.

And even though we have had no vote on Cancun and what the President should do there, I would hope, with all the importance the administration has attached to this and which the Senate attached, that the President could be persuaded to bring this up and talk about it and, hopefully, still work our way out of this. Because, as I say, none of us takes any pleasure in the stance that we are having to take on this particular issue.

I compliment the leader again on his thoroughness and I commend a reading and a rereading of his statement for all who are concerned with this.

Mr. ROBERT C. BYRD. Mr. President, I thank the distinguished Senator from Ohio (Mr. GLENN) for his kind comments.

Mr. RIEGLE addressed the Chair.

The PRESIDING OFFICER. The Senator from Michigan.

Mr. RIEGLE. Mr. President, I should like to add a brief comment, too, if I may. I wish to commend the minority leader for a true act of leadership on this difficult and profound issue. I wish to thank him for that leadership.

I think we have heard this morning a brilliant analysis of this issue, an analysis of this issue, an analysis that has been painstakingly deliberate, balanced, and sound. He has addressed every essential element of this proposal. I wish to associate myself with his remarks and with his judgment on this issue.

Mr. ROBERT C. BYRD. Mr. President. I thank the distinguished Senator from Michigan for his very charitable and gracious remarks.

INTERNATIONAL SECURITY AND DEVELOPMENT ACT OF 1981

The PRESIDING OFFICER. The clerk will report the pending business.

The legislative clerk read as follows:

A bill (S. 1196) to amend the Foreign Assistance Act of 1961 and the Arms Export Control Act to authorize appropriations for development and security assistance programs for the fiscal year 1982, to authorize appropriations for the Peace Corps for the fiscal year 1982, to provide authorities for the Overseas Private Investment Corporation, and for other purposes.

The Senate resumed consideration of the bill.

AMENDMENT NO. 560

(Purpose: To require a prohibition on furnishing assistance to India or Pakistan if such country detonates a nuclear device)

The PRESIDING OFFICER. The pending business is the amendment numbered 560 offered by the Senator from Ohio.

Mr. GLENN addressed the Chair.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. GLENN. Mr. President, I will have remarks to make. I understand the Senator from Missouri (Mr. DANFORTH) wishes to make comments on this. He has another time commitment. I am glad to yield to him for whatever time he needs.

The PRESIDING OFFICER. The Senator from Missouri.

Mr. DANFORTH. Mr. President, I thank the Senator from Ohio for yielding to me.

Mr. President, I support the amendment offered by the Senator from Ohio. The amendment is an eminently reasonable approach to the problems of deterring further Soviet aggression in Asia, while at the same time adhering to our policy of stopping the spread of nuclear weapons into unstable regions of the world.

My predecessor in the Senate, Stuart Symington, recognized, as I do, the terrible dangers posed by the proliferation of nuclear weapons. Every time another nation adds such awesome machines of devastation to its arsenal, the chances of nuclear war increase. The dangers are particularly acute where nations in conflict-ridden parts of the world seek to inject the nuclear element. As we saw in the recent case of the destruction of the Iraqi nuclear power facility, even the possibility that a nation is attempting to obtain a nuclear warfare capability is enough to heighten tensions and encourage a violent response.

Since the first days of the nuclear era, the need to prevent the spread of nuclear weapons has been evident. I need not repeat the history of the nuclear nonproliferation effort because the Senator from Ohio very ably set out the milestones in his statement to this body on July 9, 1981. Suffice it to say that our attempts to shorten the list of nations who are moving toward the development of a nuclear capability have not been altogether successful. Today, a host of nations—in the Middle East, the Far East, South Asia, Africa, and even in South America—are rapidly preparing to join the nuclear club.

If nuclear weapons are introduced into the most volatile trouble spots of the world, the dangers of nuclear war will increase exponentially. We are talking not only about the possibility of unthinkable devastation and suffering in one region, but also, because of the distinct possibility of superpower involvement in any nuclear exchange, we are talking about the potential destruction of human civilization.

The problem is particularly acute in South Asia, where two old adversaries, India and Pakistan, face threats not only from each other but also from the Soviet Union. In meeting the problem, we must take particular care not to lose sight of the goal of dissuading countries from their nuclear ambitions. The President recognized the fundamental nature of this goal when, last July 16, he announced his administration's nonproliferation policy framework. The pillars of American policy were said to include the following:

To "seek to prevent the spread of nuclear explosives to additional countries as a fundamental national security and foreign policy objective;"

To "continue to support adherence to the Treaty on the Non-Proliferation of Nuclear Weapons by countries that have not accepted" it; and

To view any violation of international nonproliferation agreements "as having profound consequences for international order and U.S. bilateral relations and also view any nuclear explosion by a non-nuclear state with grave concern."

There is no doubt that the Government of Pakistan is actively seeking to acquire nuclear weapons. It has refused to sign the Treaty on the Non-Proliferation of Nuclear Weapons. Because of its nuclear efforts, the United States, pursuant to the Symington amendment, cut off aid to the Pakistani Government in 1979.

The Reagan administration now submits that, due to the Soviet invasion of Afghanistan and the continued buildup of Soviet military strength, it is essential that the U.S. resume arms shipments to Pakistan. The administration proposes a 6 year, $3.2 billion economic and military assistance program for Pakistan. The President asks Congress to waive the Symington amendment so that U.S. weaponry can flow into Pakistan again, regardless of Pakistan's nuclear advances. Yet, for the security of Pakistan and the rest of the world, we must draw some lines which cannot be crossed by a nation receiving aid from the United States. The amendment being offered by my colleague from Ohio draws the appropriate lines.

If Pakistan were to explode a nuclear device, the United States would have to discontinue arms shipments immediately or renege on its nonproliferation policy. I will therefore support the amendment which would mandate, rather than merely permit, a cut-off of assistance in such an event.

I applaud my colleague, the Senator from Ohio, and I will vote in favor of his proposed amendment to S. 1196.

Mr. President, I thank the Senator from Ohio for yielding to me.

Mr. GLENN. Mr. President, I thank the distinguished Senator from Missouri very much for his support and for his remarks. They were right to the point.

Mr. President, this amendment is very simple. It changes the word "should" in one subsection of the foreign assistance bill to the word "shall."

But in that simple change there is a mountain of difference.

In 1976 Congress adopted an amendment that I had introduced to the Foreign Assistance Act providing for a cut-off of economic and military assistance to any country that imports or exports reprocessing equipment, materials, or

technology, or in the case of a nonweapon state, detonates a nuclear device.

It does not say "weapons." It says a nuclear device, because there is no line between a nuclear explosion, whether it is applied for peaceful purposes or for weapons purposes. A nation would have either option available.

My 1976 amendment to the Foreign Assistant Act also allows for Presidential waiver of the cutoff provisions if our nonproliferation objectives, or the common defense and security would be best served by continuing assistance.

The present version of the foreign assistance bill says that the President "should not" use the waiver provided in the 1976 Glenn amendment if either Pakistan or India detonates a nuclear device.

Mr. President, I submit that the nuclear records of both Pakistan and India are so replete with a disregard for the strengthening of international nonproliferation efforts that even to contemplate the possibility of a Presidential waiver to allow continued economic aid and military assistance to those countries after they detonate a nuclear device is to do grave damage to our public commitment to the longstanding goal of nonproliferation, a commitment to which we have rededicated ourselves time and time again.

Let me go back just a little bit and review the approach that we have taken.

We all, perhaps, wish we could go back to the days of Lilienthal and Baruch when there were proposals made on the international scene to put things nuclear, explosives as well as peaceful uses, under an international control.

That was debated long and hard in this country at that time, and finally proposals were made to the Soviet Union, which were declined at that time. Now we have gone our way and every nation in the world has taken its own stance with regard to matters nuclear. So we cannot, in effect, unring that bell, the signal that went out at that time that each nation was on its own. In other words, we must play with the hand we are dealt in our time, in 1980 or 1981. It is not a particularly good hand, I might add.

In 1978, we passed the Nuclear Nonproliferation Act. What was that all about? Well, it said basically that while we are trying to get nuclear weapons stockpiles of the world's major powers under control, while we have SALT I, while we are working on SALT II. We hoped those efforts would involve the major weapons nations in discussions which could lead to control of weapons and could eventually reduce existing nuclear weapons stockpiles. At an appropriate point we hoped to bring in other weapons states into the SALT process.

I brought this up in China in discussions with Vice Premier Teng Hsiao-ping 2 years ago. I asked if, at an appropriate time they would be willing to put their nuclear stockpiles under some sort of international control or if they would be willing to diminish them if we could get agreement with the Soviets. His reply was typical: "When you get agreement with the Soviets, come back and I will not rule it out."

That is an understandable attitude on his part.

The point is we tried to get the major nuclear weapons stockpile nations involved in a series of talks that would, somehow, let us eventually have a hope of reducing these weapons stockpiles.

Now, where does NNPA fit into this? We have said to the non-nuclear-weapons states that if they will agree to sign the Nonproliferation Treaty (which, in effect, says they will forgo the weapons option in return for our cooperation in the peaceful uses of nuclear energy), then we shall cooperate with them fully in the area of peaceful uses of nuclear energy.

So we are on a dual track, Mr. President. We are saying on the one hand that we are trying to get control of nuclear weapon stockpiles, that are enormous, and at the same time, we are saying, "Look, other nations of the world, if you will cooperate with us, we will, indeed, cooperate with you."

It has not been ineffective, I would say. One hundred and twelve nonweapons states have signed up to do exactly that. One hundred and twelve nonweapons states have said they will not develop nuclear weapons and that they will work with us in the peaceful uses of nuclear energy. So we have 112 nations that have expressed their confidence in us.

But we have had some nations that have not gone along. India has not gone along. Pakistan has not gone along. They have gone along their individual paths of the development of nuclear weapons—nuclear explosions by any other name.

So, Mr. President, what are we to say now? Last year, we sent the shipment of fuel to India, even though it had violated what was our understanding over materials we had sold her, a matter that was brought out in declassified memos during that debate. They had violated and used some of the material that we had sent for producing at least part of the material necessary for their nuclear explosion. Now we find Pakistan has been embarked on a very long process for development of a nuclear explosive capability.

They have virtually no real nuclear energy needs in the country—a 137-megawatt powerplant, which is fairly small by most standards, and a 5-megawatt research reactor. Yet they have embarked all over the world on a program of buying equipment for reprocessing and buying equipment for uranium enrichment. That can only mean that they are carrying out what they said clear back even before the Indian explosion of 1974, when one of the Pakistani leaders of that time—Prime Minister Bhutto—said that if India exploded a nuclear weapon, Pakistan would set out on a course to get the same capability if they had to "eat grass" to do it.

I yield the floor to the Senator from California for a comment.

Mr. CRANSTON. Mr. President, I thank the Senator very much for yielding. I congratulate him for his steadfast efforts in regard to one of the most serious problems confronting our Nation and, indeed, the human race, the matter of nuclear proliferation.

Mr. President, I had seriously considered calling up an amendment to this bill which would have conditioned any aid to Pakistan upon Presidential certification that International Atomic Energy Agency safeguards are adequate to detect any diversion of spent fuel to the Fakistanis' clandestine nuclear bomb development program. I am somewhat encouraged by the action the Senate has taken on the first two Glenn amendments, so I shall not offer my amendment at this time.

I do want to express again my very deep concern that we are preparing to loosen nonproliferation restrictions on aid if the administration has its way, without giving adequate attention to two new facts. First, it is apparent that IAEA safeguards, by the admission of the Agency's own Director General, are insufficient to detect diversion of spent fuel in Pakistan. Second, it is clear that Pakistan's relentless efforts toward attainment of nuclear weapons capability are continuing. I should like to address a couple of questions on these facts to the committee chairman (Mr. PERCY).

I do not believe it is wise for the Senate to vote first on lifting conditions for this $3.2 billion aid program and get the facts some other time, later on. I am concerned that we have had no hearings on the Pakistani aid proposal and that the full committee membership has not been briefed on the new developments in Pakistan and the IAEA before we shall have to vote on this issue in the Senate.

So, Mr. President, I should like to ask the distinguished chairman if it is his intention to receive such a briefing or to arrange one for the full committee at the earliest possible moment, and if it is also his intention to proceed at the earliest possible date to launch a committee inquiry, including hearings, into the weaknesses of the IAEA safeguard system.

Mr. PERCY. Mr. President, with the concurrence of the ranking minority member, the chairman sees no reason why we should not proceed to accomplish that.

Mr. CRANSTON. I thank the Senator very much. I think it would be very helpful.

Mr. President, I thank the Senator from Ohio again for his vitally important leadership on this vitally important matter, and I thank him again for yielding to me.

Mr. GLENN. I thank the Senator from California for his remarks and for his longstanding support and his initiatives in this area.

Mr. President, when our efforts to control the spread of nuclear weapons to more and more nations came under its first test—that was the fuel shipment to India last year—the Senate voted on a very close vote to let that fuel shipment go. That was followed by India's statement, in turn, that they would do what they saw fit to do. That was not the general tenor of the debate on the floor at that time. It was that we somehow had to influence the Indians to pursue more peaceful paths, and that if we just went along with this sale, that

would be the case. But we lost that vote here, on the Senate floor, after probably the hardest lobbying by the Carter administration on any matter, by a vote of 48 to 46, as many Senators will remember. Now we face the second test, it seems to me, on NNPA and whether we mean what we say.

We have had Pakistan give us no assurances that they will not build nuclear explosives. They say they are going ahead. They make no bones about it. To their credit, they have not beaten around the bush on this. They say they will go ahead with a nuclear explosion if they see it is in their best interest.

This poses a difficult problem for us, because we want relations with them, we want to help them with other arms. But at the same time, are we to see our nuclear nonproliferation efforts basically go for naught?

Another disturbing element, Mr. President, is that there are apparently changes in the wind that the administration may propose with regard to our nuclear nonproliferation policy. This is a policy we have been working under through the Nuclear Nonproliferation Act legislation that the distinguished chairman of the Committee on Foreign Relations (Mr. PERCY) introduced, and on which we both worked so hard and so long. This is being called into question by the new administration, according to an article in the Washington Post of just a few days ago. The Post characterized the proposals under discussion as follows:

> Together with other announced or impending decisions in the nuclear field, acceptance of such proposals would represent a full-scale turnabout in governmental policy. The increased strictness with U.S. nuclear exports that followed the global shock waves of India's 1974 atomic test would give way to a much greater official permissiveness . . . [with reliance instead on American standing as a "reliable supplier" for leverage to discourage the spread of atomic weapons.]

I agree with the Post's characterizations of these proposals. The administration says it is premature to assume that these proposals—the proposals for proliferation, in my view—will end up as the official administration position. But I must say that the transition team report made many of these same proposals, about which there were bitter complaints in Congress, including my own. They were not put into effect immediately, but now we see basically the same set of principles surfacing again, some 6 or 7 months later, under a new guise.

I hope that today we can send another message to the administration, that if these proposals do end up as official administration positions, the administration had better be prepared to do as much lobbying as they have done on AWACS if they want to get them through the Senate committees with jurisdiction and through the Senate as a whole.

In mentioning the distinguished chairman of the Foreign Relations Committee, and I believe he agrees with me on this.

No. 1, the administration would eliminate application of the full-scope safeguards criterion for our existing agreements with nonweapon states, including India, South Africa, and Brazil. I find that unacceptable. I imagine that the distinguished chairman of the Foreign Relations Committee would also say that to eliminate these full-scope safeguards criterion would basically alter the whole relationship we tried to establish in the Nuclear Nonproliferation Act.

Another proposal that is being bandied about, apparently, is that we eliminate all these sanction provisions of NNPA. In other words, we would wind up pretty much with a law that is a toothless tiger, to say the least.

This proposal would eliminate the sanction provisions of the NNPA. The administration is also apparently thinking about eliminating the Symington amendment and the Glenn amendment, sections 669 and 670 of the Foreign Assistance Act.

I believe that those eliminations would pretty much gut that law and I find that unacceptable, also.

Another potential change some in the administration seem to be recommending and that I disagree with is elimination of the truly independent review of executive branch decisions on nuclear exports.

Those are several of the proposals that are being bandied about, and I hope we can send an agreed upon message to the administration that we do not agree with these.

I find it inconceivable—to me, at least—that the chairman of our committee would agree that those are in the best interests of the United States.

I do not know whether the chairman wishes to make any comment in this regard, but I would welcome any comment he might wish to make, because, as I see it, we are at a crucial stage. We sent the fuel to India. We are about to make a big decision on aid to Pakistan, despite the nonproliferation restrictions protections we put into existing law, and at the same time we find the administration—at least in a position paper that is apparently in the last draft—proposing to eliminate application of the full-scope safeguards export criterion, in crucial cases, to eliminate sanction provisions in the Symington amendment and the Glenn amendment, and to eliminate independent review of executive branch nuclear export decisions.

Mr. PERCY. I will be happy to comment to my distinguished colleague—not in any partisan sense, because we never have dealt with this in a partisan way.

Mr. GLENN. To the credit of both of us.

Mr. PERCY. This does happen to be a Republican administration now, and we have worked side-by-side with Democratic administrations in testing this legislation and exercising our oversight authority over this act, and insuring that responsible officials in the State Department, such as Ambassador Pickering, did everything conceivable to implement this legislation.

In connection with the Nuclear Nonproliferation Act—which was coauthored by the distinguished Senator from Ohio and me—we realized at the time that it was a new experiment to see whether or not we could use—as Mayor Daley of Chicago would call it—"our clout" with countries to stop the proliferation of nuclear weapons around the world.

We did have considerable clout. We are major suppliers of enriched uranium. Countries do depend upon us. We want to be a reliable supplier, and we want them to depend upon us; but they should depend upon us based upon a certain set of guidelines and rules which are not just U.S. rules but rules adopted by international bodies to safeguard mankind.

So we are now in the process of having a new administration take a look at this whole matter.

The Foreign Relations Committee questioned strenuously the nominees who assumed responsibility in this area. They were probably as long and exhaustive hearings as we have held, to be certain that we did not have people prejudiced against this philosophy, to be certain we did not allow our desire to be a supplier to get ahead of reason. Economics cannot be the overriding consideration when it comes to whether or not the world is going to be safe and whether we can live in sanity and not have a nuclear holocaust.

Just this weekend, I was at California Institute of Technology, dealing there with scientists who have spent a great part of their lives developing some of this capability and who are now trying to do everything they can to see that we prevent its misuse. They are supportive of the peaceful nuclear usages, but they abhor any possibility that this could be used and released against mankind. We know that we have such force that it could obliterate humanity.

As I said in my speech at Cal Tech this Sunday night, the potential and capability are almost unthinkable; but we must think through this kind of problem. Certainly, the Senator from Ohio has been one of the leaders in this field.

The Senator from Illinois attended the Pugwash Conference at Calgary during the recess. That was the first time since it was started in Pugwash, Canada, 31 years ago, that it was held again in Canada; 800 scientists from 80 countries came together to see what could be done about this particular problem.

The concept that created such a dialog was inspired by Albert Einstein and by Bertrand Russell, both of whom I quoted at that time.

So the administration has to recognize that with respect to its proposals—which Senators read about in the newspaper as making profound changes in law—the case will have to be presented to us in overwhelming terms that the law is not working.

When I have had a role in authoring a piece of legislation, I always try to lean over backward and say, "Look, we did the best we could at the time; but now, in the light of circumstances, what have we learned? How can we improve it, modify it, and change it to strengthen it?"

None of us is going to stand here and change our goal or abandon it. Mankind cannot simply afford giving up in this area. No one is proposing that.

And no one wants to take the teeth out of something until we are absolutely

sure we can replace them with something stronger, or to make it weaker, because it is not working quite as well as we would want.

We have not had hearings on this. We have not had detailed proposals made to us. I do not accept something that I read in the newspaper as official doctrine. I anticipate they probably want to float it and get ideas, and if they have not understood yet that we feel strongly about this issue and mankind feels strongly about this issue, they are mistaken.

The distinguished president of the California Institute of Technology indicated that a group of, I think, a dozen universities, started out to talk among the faculties and students about this future, and there are now 110 universities banded together who are devoting a considerable amount of their time thinking through the very problems that we have been entrusted with the responsibility of executing in legislation and seeing that that legislation is implemented for a nonproliferation policy which will safeguard mankind.

I stand firmly with the distinguished Senator from Ohio in preserving and protecting what we have done, but at the same time recognizing that if some aspect of it is not working, or is working contrary to the intention, we want the facts demonstrated to us. We are going to be pretty hard headed about changing something unless we see the need for that change.

Mr. GLENN. Mr. President, I appreciate the Senator's remarks.

I presume from what he says that we can count on the chairman's support in opposing amendments that will weaken the NNPA.

Is that a fair statement?

Mr. PERCY. It all depends on how we define weakening and strengthening.

The Senator talks about weakening to make it less effective, to make it less a force for impeding proliferation of nuclear weaponry, that is right. We are not going to take any teeth out of it. We are not going to weaken it. I wish to strengthen it if possible in every way because we are not making the kind of progress as we know we envisioned.

Mr. GLENN. Mr. President, I join with our distinguished chairman in wanting to strengthen it.

Will the chairman not agree that eliminating full scope safeguards, eliminating sanctions, and eliminating independent review would that not weaken the NNPA?

Mr. PERCY. Without prejudicing the administration's right to present arguments and facts which no Senator may have available to him, I would not want to definitively answer exactly what I will do at that particular time. But as I hear that language it appears without other evidence to the contrary that it would weaken the position.

Mr. GLENN. I thank the distinguished Senator very much for his comments on that because I know he shares my concerns in this.

We have worked together so long and so hard on these matters, and I appreciate his remarks.

I also wish to state my hopes that if there could be strengthening amendments we can make this act work better than it has in the past. We passed this Nuclear Nonproliferation Act knowing it was an experiment, as the chairman rightly says, and hoping other nations would follow our lead.

We have had some success, perhaps less than we had hoped; maybe we did better in some areas than we hoped at that time.

But as to the administration's consideration to eliminate the full scope safeguards criterion for existing agreements to eliminate sanctions, and to eliminate independent review, I hope that they will have second thoughts about this, even though, as I understand it, those proposals are in final draft form awaiting consideration. I think those would be serious weakening actions to the NNPA and there would have to be overwhelmingly good reasons for making those changes.

Let me remark also on the chairman's comments regarding the nonpartisan nature of our considerations on this. That is absolutely correct.

As many will recall last year, I led the fight against the fuels sale to India. The chairman was on the other side for other reasons. So we wound up with a reversal of roles as far as parties are concerned. This has been an absolute nonpartisan issue as far as we are concerned and all we are trying to do is prevent the spread of nuclear weaponry around the world that may result in a holocaust like nothing ever seen in history. This is basically what we are trying to prevent with the NNPA and what I am trying to prevent with protection for those provisions of NNPA.

Let me get back to the issue at hand here today.

The administration claims that President Zia and Prime Minister Gandhi should be "under no illusion" as to what the response of the United States would be in the event of detonation of a nuclear device. If the Senate will forgive me, I have heard that line before.

The Indians were supposed to be under no illusion that the United States would seriously enforce the full-scope safeguards criterion in determining whether to ship fuel to Tarapur. Well, the last administration, the Carter administration, when the crunch came, decided to overturn the Nuclear Regulatory Commission's decision to not send the fuel, and we had a royal battle here in the Chamber which I unfortunately lost 48 to 46.

Now the Reagan administration, according to the Washington Post, as we have just gone through, is considering the possibility of cutting back the full-scope safeguards criterion in the Nuclear Nonproliferation Act so that we can send fuel, not only to India, but I would add such nuclear materials as they see fit to South Africa, Brazil, Argentina, and perhaps other nations without requiring full-scope safeguards.

We did not come here today to argue that particular case or those other cases. We will do that when the appropriate time comes.

We are not talking about nuclear export criteria today. Specifically, we are talking about nuclear explosions, not just shipment of materials, but nuclear explosions and the possibility thereof and what we will do.

We are talking about whether the United States is prepared to give the impression that we would still provide economic and military assistance to nonweapon states that mount nuclear explosions.

The administration is worried about President Zia's sensitivity on this issue.

I am concerned about sensitivities also. I am concerned about the sensitivities of potential millions of people whose lives will be threatened by the spread of nuclear weapons if we do not persist in our efforts to bring this under control.

I say that our time is short. Time is limited because we see this nuclear technology spreading to more and more nations. We see the flow of reprocessing technology, the flow of enrichment equipment, the flow of yellow cake, the flow of uranium enriched to weapons grade material—all of these flowing to smaller and smaller nations.

The potential for the use of these weapons in border disputes—disputes that we would not even consider important but those nations consider vital—is with us more every day.

A Newsweek article a short time ago listed the potential nuclear weapons states 10 years hence, and it included some additional 8 or 10 nations joining the nuclear weapons club over the next 10 years.

So time is running out on us.

We do not have some of the options available to us we wish we had.

So I am concerned not just about President Zia's sensitivities on this and whether he will get his nose out of joint, but I am also concerned about whether we are going to do our level best to prevent the spread of nuclear weapons to more and more nations. At the same time, I would add we must try to get SALT going again, to get the big weapons stockpiles also under control.

To restate what I said yesterday afternoon in debate here in the Chamber, if we look at the alinement of Pakistan's military forces, they are still overwhelmingly alined along the Indian border, not along the Afghanistan border. There is some movement over the past year or so to the Afghan border but it is fairly small, mainly just around one particular path.

The administration does not want any conditions attached to this economic and military aid package. It wants any restrictions to be implicit in nature rather than explicit. I understand that. But we have a lot of countries whose sensitivities we must also consider, including the 112 nonweapon states that signed the Nonproliferation Treaty. Neither Pakistan nor India has signed the NPT. One hundred and twelve other nations did and said they would renounce nuclear weapons.

Are we going to say to those 112 nations that the United States of America can contemplate the possibility of send-

ing economic and military assistance to Pakistan and India after they have actually exploded a nuclear device, while we still ask these 112 nations to hold off now and forswear nuclear arms? How can we urge this and at the same time we give the ultimate in cooperation to those who violate the spirit and intent of our nonproliferation legislation?

If we can contemplate that, Mr. President, then we might just as well put our nuclear bombs up for sale and say we are going to be the reliable supplier of nuclear weapons. We might as well say that we are going to be a reliable supplier of not only equipment, yellow cake and enriched uranium, but that we will bypass the intermediate steps and be a reliable supplier of nuclear weapons so that any country that wants them does not have to make their own and go through the intermediate steps.

So the issue cannot be drawn in more fundamental terms, it seems to me. If we, Mr. President, are incapable of drawing the line at the detonation of a nuclear device, which is all this amendment proposes—it says the cutoff would occur only after a nuclear explosion, and it does not even mention the fact that they are building an enriching and a reprocessing capacity—then we are incapable of ever drawing the line anywhere, I would submit.

So I urge the Senate to support this amendment, which will simply put the President in the position of having to carry out what the administration has implied would be carried out if the Pakistanis or the Indians detonated a nuclear device.

They have said serious consequences would follow such an act. Well, I, too, want there to be serious consequences if nuclear explosions are set off.

The international nonproliferation regime is best served in this case by an explicit statement by the U.S. Congress rather than by some implicit understandings that may or may not be waived, based upon the past performance of this Government.

Mr. President, there are many people who believe we could have influenced the Indian decision to explode a device in 1974 had we been more forceful in spelling out to the Indians what sanctions would follow a decision to misuse nuclear materials for explosive purposes.

We told them in a secret aide-memoire in 1970 that using our nuclear materials for explosions would be a violation of the terms of our agreement for the sale to the Indians of heavy water for their cirrus reactor. It made this point in no uncertain terms. But after the Indians violated our understanding of that agreement we did nothing, we did absolutely nothing. And last year we approved the sale of additional nuclear fuel for the Indian Tarapur reactor even though they did not satisfy the terms of the NNPA.

So with that history and with the history of the debate over Tarapur last year we are now asked to approve a proposal for economic and military assistance to Pakistan without once again making it crystal clear in advance what our attitude would be if they exploded a nuclear device. Such an act would violate American law—not that our law is binding on Pakistan as such, but certainly the law can be binding on whether we continue our cooperation.

Similarly, we are asked to continue economic assistance to India without making it crystal clear what our attitude would be if they exploded another nuclear device in the future.

Let me comment on that briefly in passing here because I think there was some misunderstanding in some offices from phone calls we have received. Under my amendment, assistance would only be cut off to the country that was the violator. The cutoff would be of assistance to India if it was a violator, and to Pakistan if it was a violator, that is, if it tested a nuclear device. Apparently some have interpreted my amendment as providing that if India tested a device there would be a cutoff to Pakistan. That interpretation is not correct. Only the country that was the offender would be cut off without possibility of any Presidential waiver.

Three months ago, Mr. President, on July 18, 1981, the Senate of the United States agreed to a resolution of mine by a vote of 88 to nothing calling on the President to initiate discussions with nuclear suppliers and recipients alike with a view toward reaching an international agreement to institute, among other things, a system of predetermined sanctions for safeguards violations.

We have seen no action, we have had no response, from the administration in that regard.

The resolution was agreed to by the Senate 88 to 0—unanimously. Are we now, just 3 months later, to take the position that we are unwilling or unable to say whether Pakistan or India should have their assistance halted if they exploded a nuclear device? Are we going to leave the impression, as we did in 1974, after the Indian explosion that we will not necessarily take any action if a country violates a clear understanding and goes ahead with exploding a nuclear device?

Every signal we get suggests that if Pakistan goes ahead with its nuclear weapons development program, we may see a nuclear arms race develop in South Asia. The disputes, the wars, the difficulties between India and Pakistan are well known, and a vote in favor of this amendment is a vote to try to stop a South Asian arms race from developing, an arms race that will reduce and not enhance U.S. national security in that area.

I thank the Chair and I yield the floor.

Mr. PERCY addressed the Chair.

The PRESIDING OFFICER (Mr. COCHRAN). The Senator from Illinois.

Mr. PERCY. Mr. President, what Senator GLENN has been talking about, as he knows, it an argument that has been very delicately balanced and worked out. The committee bill, as it came out, took into account many of the consequences which have been discussed. We have already discussed two previous Glenn amendments which have been worked out, and the 6-year limit on the waiver does coincide with the length of our multiyear commitment to Pakistan. Congress does, of course, retain the authority to approve or disapprove the assistance each year.

Any restriction less than 6 years could undermine our relationship with the Pakistanis who are looking to establish a long-term relationship with us. As a consequence, we have agreed that we would support the 6-year limit as proposed by Senator GLENN because it does allow us to develop a meaningful strategic relationship with Pakistan about forming our nonproliferation policy.

As I have said, I will support, and we have supported and adopted, a provision calling for Senator GLENN's reporting amendment for the same reasons.

On the other hand, Senator GLENN proposed to change section 670 of the act to remove Presidential discretion should a nuclear device be detonated. This amendment appears to be an attempt to legislate piecemeal a nonproliferation policy, and to do so, first, before the administration has fully developed a nonproliferation policy; second, before adequate congressional branch—executive branch and legislative branch consultations have occurred.

Certainly it is not necessary to emphasize how adversely we react, whenever the administration acts without adequate prior consultation with Congress. Now we are legislating on the floor on a matter that was thoroughly debated in the committee, and we are making a dramatic change in course here without the consultations, without the discussions, that we have agreed would be held with the administration and the legislative branch on a general nonproliferation policy.

And we would do so even before Congress has adequately discussed and had adequate hearings on this subject.

I do not deny that after consultation and hearings and the development of a comprehensive nonproliferation policy, we may well determine that his amendment, or a modified form of his amendment, is the course the United States should follow. But I think, at this time, a determination is premature.

Moreover, the administration has gone a considerable way to consult with us. We urged, at the time of our markup, that a comprehensive nonproliferation policy be articulated. On July 16, the President issued such a statement. This statement is the beginning of a dialog on this vital issue. We should not legislatively preempt the administration any more than they should act without consultation with Congress. This was our understanding when the committee rejected this change at the time we marked up the legislation, and circumstances have not changed.

I, therefore, fully support the administration in strongly opposing this amendment.

Mr. President, I suggest the absence of a quorum.

Mr. GLENN. Mr. President, if the Senator will withhold on that for just a moment, I believe the Senator from North Carolina wishes to make a statement.

Mr. PERCY. I withdraw my request.

Mr. HELMS. I thank the able chairman.

The PRESIDING OFFICER. The Senator from North Carolina.

Mr. HELMS. Mr. President, I am going to pose a rhetorical question, or at least it seems to me to be purely rhetorical because the answer ought to be obvious.

Is it not time that the United States put some teeth in its nonproliferation policy? That is a simple question. I think the answer is equally simple.

We have been playing around with this policy since I have been in the Senate. It is essential, it seems to this Senator, it is essential at a minimum that our allies, and especially the recipients of U.S. economic and military assistance, understand that the United States expects reasonable commitments concerning nonproliferation—that recipients of U.S. foreign aid, for example, will not detonate a nuclear device.

The distinguished Senator from Ohio (Mr. GLENN) and I have been on the same side of this issue from the very beginning. We took this position during the previous administration and we take it now. During the previous administration, and again now, we hear the protest that this is not the time. Well Mr. President, if this is not the time, when is the time to exercise just a little bit of sanity in terms of nuclear proliferation?

Mr. President, this Senator submits that it would be useful for any President—any President, whether it be Ronald Reagan or his successor or his predecessor—and the sitting Secretary of State to make clear that Congress is becoming more and more wary of appropriating vast sums of taxpayers' money, especially on foreign aid.

I believe it is demonstrable, Mr. President, that Congress does not want to see valuable resources, including the taxpayers' money, diverted from needed domestic and defense commitments in those recipient countries to unnecessary, dangerous, and extremely costly nuclear weapons development programs.

Now, if that is not commonsense, this Senator is not able to define commonsense.

I am, frankly, surprised that the administration is not leading the advocacy that Congress at this time move to put some muscle into the nonproliferation policy. I felt that way when the distinguished gentleman from Georgia was the President of the United States and I feel that way now that my longtime friend Ronald Reagan is President.

I believe a fair case can be made that I have been a long and faithful supporter of President Reagan and his positions on foreign policy taken through the years since I first met him. My admiration for him is undiminished. But I disagree with his administration on this point and I stand firmly with the able Senator from Ohio.

I am puzzled, as a matter of fact, that there is any opposition to the logical and sensible amendment offered by the distinguished Senator from Ohio (Mr. GLENN). I am happy to support this amendment.

I ask the Senator if he would agree to my asking unanimous consent that I may be added as a cosponsor of his amendment.

Mr. GLENN. Absolutely; I would be honored to have the Senator join the list.

Mr. HELMS. I thank the Senator. I so ask unanimous consent that I be added as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HELMS. I thank the Chair and I thank the distinguished Senator from Ohio.

Having done that, and having said that, Mr. President, let me level with my friends and colleagues. I would like to see the scope of the now Glenn-Helms amendment, if it can be called that, broadened. I would like to see the scope broadened to include all nations which receive any U.S. aid. That is how strongly I feel about this question. Either we put up or shut up, Mr. President, about the proliferation of nuclear devices.

Another rhetorical question, as I conclude, to match my rhetorical question at the outset: Why should this Senate even consider singling out India and Pakistan?

Immediately after the vote on the Glenn amendment, it will be the purpose of the Senator from North Carolina to offer an amendment of his own which applies section 602(e) to all nations receiving U.S. aid.

Again, I commend the distinguished Senator from Ohio for his amendment. I do hope our colleagues will support this amendment. I thank the Senator.

Mr. GLENN. I thank the distinguished Senator very much for his remarks and for his support.

Mr. President, we have other cosponsors that I would like to have included in the RECORD. I ask unanimous consent that Senator DANFORTH, Senator BUMPERS, Senator LEAHY, Senator CRANSTON, Senator METZENBAUM, and Senator KENNEDY be added as cosponsors.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GLENN. Mr. President, I know that Senator PELL has some remarks he wished to make. I do not see him in the Chamber at the moment.

While we are waiting for him to come back to the floor, I ask for the yeas and nays on this amendment at the appropriate time.

The PRESIDING OFFICER. Does the Senator ask for the yeas and nays?

Mr. GLENN. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is not a sufficient second.

Mr. PERCY. Mr. President, reserving my right to object, I want to be certain that I do honor any agreements that have been reached, possibly, including those made by our staffs. I did not make any agreement that I know of not to move to table the amendment. I would intend, at the appropriate time, after there has been full debate on it, to move to table the amendment.

I would like to inquire whether the staffs, at any point, have reached any understandings or agreements with which I am not familiar. We depend upon our staffs to work in comity. I ask that the Senator withhold the request for the yeas and nays on this until that determination is made.

Mr. GLENN. It is the understanding of the people on my staff that we would have an up-or-down vote. Perhaps there is a misunderstanding.

Mr. PERCY. These are my staff comments: To agree or disagree on "should" or "shall." The committee and the Senator will not agree to support the amendment.

I do not see any place where necessarily there would be an up-or-down vote.

Mr. GLENN. I have this, as of yesterday, that it was agreed there would be an up-or-down vote on the "should" or "shall" amendment.

Mr. PERCY. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. PERCY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PERCY. Mr. President, based upon the fact that there was not a clear-cut understanding on this on our part, but, clearly, the notes of the distinguished Senator from Ohio and his staff show that the total overall arrangement did embrace an up-or-down vote on "should" or "shall," I withdraw my objection and ask that the yeas and nays be ordered.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

Mr. PELL. Mr. Chairman, I strongly support Senator GLENN's amendment, which would require the President's termination of most military and economic assistance to Pakistan or India if either of those nations detonates a nuclear explosive device.

At present, section 670 of the Foreign Assistance Act of 1961, known as the Glenn amendment, provides for a termination of such assistance to nonnuclear weapons states which detonate a nuclear device. However, that provision also provides for a waiver if the President determines and certifies in writing to Congress that:

> The termination of such assistance would be seriously prejudicial to the achievement of United States nonproliferation objectives or otherwise jeopardize the common defense and security.

The Glenn amendment would prevent the President from exercising that waiver authority in the case of a future nuclear detonation by Pakistan or India.

The executive branch has been adamant in resisting a change which would make it clear that the aid cutoff will not be waived if either India or Pakistan sets off a nuclear blast. They claim they want flexibility. That could mean flexibility to answer a bomb with a slap on the wrist—or even less.

Those of us who have followed nonproliferation over the past several years have become accutely aware of the risks of the further spread of nuclear weapons. There should be no doubt about U.S. resolve to act if India or Pakistan explodes a nuclear device. The last thing the subcontinent needs, given the widespread human suffering and deprivation, is money to be spent on a nuclear arms race.

The essential message of Senator GLENN's amendment to India and Pakistan is this—if you persist in your nuclear programs to the point of detonating a nuclear explosive device, the American taxpayers are simply not going to provide military and economic assistance to you and thus underwrite the diversion of funds to support a nuclear weapons program.

I think that is a very rational approach to take. It sends a very important message to India and Pakistan, as well as to other nations as to U.S. commitment to curb the spread of nuclear weapons.

Mr. President, in conjunction with our consideration of the Pakistani aid package and the nonproliferation issue, I commend to my colleagues a Providence Journal editorial of September 17, 1981. The editorial forcefully makes the point that:

The United States should not be in the position of begging Pakistan to accept military aid.

For $3.2 billion of U.S. taxpayers' money, the United States has a right to lay down certain conditions which are in our interest and, in my view, also in the interest of greater security in the region. One such condition, even if not explicitly stated by Islamabad, is that Pakistan forgo the nuclear weapons option Pakistan should understand that a nuclear arms race in the subcontinent will greatly diminish its own security.

The proposal of Senator GLENN and others to condition U.S. assistance on Pakistan's willingness to forgo the nuclear option is a modest one. Pakistan is, of course, a sovereign state and need not accept U.S. assistance. If it does, however, it should understand a relationship with the United States is a two-way street, not just a case of our giving and their taking.

I ask unanimous consent that the editorial from the Providence Journal entitled, "U.S. Should Not Have to Beg Pakistan to Accept Aid" be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

U.S. SHOULD NOT HAVE TO BEG PAKISTAN TO ACCEPT AID

"Pakistan has finally been brought around to accept U.S. assistance, both military and economic. If the announced package seems inordinately large, the six-year spread will soften the impact of the $3.2 billion total. More important in the immediate future is the U.S. agreement to sell Pakistan 40 F-16 fighter planes, six of them in the next year.

"The over-riding U.S. interest in Pakistani aid is to bolster that country's defenses against overt Russian aggression through Afghanistan or threats of aggression that may be equally unsettling for a country that has severe internal pressures of its own. Nevertheless, the aid program and the separate F-16 sale have ramifications that worry not only the neighboring Indian government but many Americans as well.

"The high priority placed on Pakistan's defenses is indicated by the deal worked out by the U.S. State Department, under which Belgium and The Netherlands will produce F-16s for the U.S. Air Force: similar planes will then be made available to Pakistan's air force. In addition to defense purposes, the sale will help western economies, since Saudi Arabia is expected to help Pakistan on the $1 billion financing.

"India obviously is concerned about the big boost to Pakistani military capability. Pakistani military men still smart over several defeats suffered at Indian hands. India is a far more immediate enemy, than Russia. Still, the very fact of Indian supremacy in every encounter should work against any Pakistani attack with conventional arms. It is in the realm of nuclear arms, however, that Indian fears arise—American fears, too. Pakistan has been driving hard to attain the capability of producing nuclear bombs. Such a capability would certainly upset an already unstable Middle East, in a wider circle than Pakistani-Indian relations. That is why U.S. officials should be insisting on a halt to Pakistani bomb-making technology as a prerequisite to military aid of any kind. Previous legislation requires such a condition. A private pledge by the Pakistani government should be obtained, even if a public one would seem demeaning in Islamabad.

"The United States should be doing everything in its power to prevent the regime of President Zia ul-haq from acquiring a nuclear bomb. The Pakistani leader may think a nuclear weapon is necessary to national prestige. But to outside observers, it would be a step toward nuclear instability for the whole world.

"The United States should not be in the position of begging Pakistan to accept military aid. General Zia is astute enough to know where threats to Pakistani independence come from and to be anxious to counter them. It is one thing for Pakistan to shy away from a formal security alliance with the United States. It is quite another to flout U.S. efforts to halt the proliferation of nuclear weapons. The U.S. government would be foolish to commit itself to rearming Pakistan without getting a reliable commitment against development of a weapon that would change the whole strategic balance in the Middle East and South Asia."

Mr. GLENN. Mr. President, I believe the distinguished Senator from New York (Mr. MOYNIHAN) has some remarks to present.

While waiting for Senator MOYNIHAN, I yield to the Senator from Virginia.

Mr. HARRY F. BYRD, JR. Mr. President, I rise to support the amendment offered by the able Senator from Ohio (Mr. GLENN). I commend the Senator from Ohio for his continued interest in this question of doing what can be done to prevent the spread of nuclear weaponry.

It seems to me the proposal which he offers today is a reasonable and appropriate one. I am glad to support the amendment offered by the distinguished Senator from Ohio.

The PRESIDING OFFICER. The Senator from New York.

Mr. MOYNIHAN. Mr. President, I thank the Chair and I join my colleague from Virginia in stating my support for the amendment which the Senator from Ohio has proposed. I shall take just a moment of the Senate's time to speak to the general situation in South Asia to which the amendment is addressed.

Mr. President, there is a sense in which I could say I was present at the creation here, as I was the U.S. Ambassador in New Delhi when the Indians set off their peaceful nuclear explosion, as they called it. That was in 1974.

I recall then saying to the Government of India in very explicit terms that they had made a profound mistake, that they had been the unchallenged first power of the Indian subcontinent and all the regions about, that there was no second power. There was, in Pakistan, what one might describe as a third-ranking power. Then there were Bangladesh, Nepal, Sri Lanka, and such nations, with no possible way they could attain any combination which would challenge the hegemony, or the paramount power, to use a term from that region, of the State of India. I said also that the explosion by India of a nuclear weapon would lead inevitably to the development by Pakistan of nuclear weapons.

I remember saying very explicitly to the Foreign Secretary that the day would come in 10 years' time "when you will be sitting down here and there will be a mogul general sitting up in Islamabad. And he will phone you one day to say, 'I have four bombs, one for Madras, one for Calcutta, one for Bombay, and one for New Delhi. We would like to have the Punjab and Kashmir by Thursday, or we will set the bombs off, and we will all meet in heaven on Friday.'"

I was told, no, the Pakistanis could not do that, because there was somehow a difference in the way the Pakistanis do physics, as against the way the Indians do physics.

One should remember here that 35 years ago, when the leading physicists from both places were in college, they were all Indians. The notion that there is a difference between what Pakistanis can learn as against what Indians can learn is a notion that only nationalism can bring to you.

I say this for two reasons, Mr. President. One is to say that it is with great regret that I do not know how much influence Senator GLENN's amendment will actually have on the outcome of the Pakistan nuclear program. General Zia, who is indeed their leader now, was not deterred by the Carter administration's holding back aid over a 2-year period. He was prepared to give very little in the way of cooperation to our distinguished former colleague, Under Secretary of State James Buckley, during his visit earlier this year to Islamabad.

The Pakistanis will do what they wish and they will, in particular, make the judgment as to whether, in the long run, it is or is not to their interest to have the first Islamic bomb. It is, however, fundamentally important that the U.S. Senate be on record as saying how unwise this is.

Shall I make the next assumption? If the Punjabis and the Pushtus and the Baluchis of Pakistan think that the Bengalese in what is now Bangladesh are not equally capable of making an A-bomb, they are as wrong as the Indians have been. There shall be no end to this sequence, although when it reaches Mauritius there may be some conclusion of it for the region.

There is also a chain reaction. There is a chain reaction in the development of weapons as there is in the explosion of these weapons. The United States should tell this to the world while it is not yet too late. The United States should tell the world, and Pakistan should know, that if it goes ahead as it appears intent upon doing, it will have made as profound a mistake for itself as India made for itself 9 years ago.

In conclusion, Mr. President, I ask what has the bomb brought India save a dependence on the Soviet Union? What real security has the technology of nuclear weaponry brought to India when the largest popular government in the world can be brought to increasing dependence upon the Soviets? What an ironic outcome of a triumph of Indian physics and engineering, surely never intended by those engineers or those physicists, but implicit in the dynamics; to enter this world and never again know a peaceful moment or an independent day.

Mr. President, I congratulate the Senator from Ohio for his initiative. I hope that he prevails. I would ask that he do me the courtesy of allowing me to be a cosponsor of this amendment.

Mr. GLENN. Mr. President, I shall be honored to have the distinguished Senator from New York as a cosponsor. He brings to this discussion long experience not only as our Ambassador to the United Nations but also as Ambassador to India. He knows that part of the world very well and speaks from the background of that experience when he speaks on the floor here today.

Mr. President, I ask unanimous consent that the Senator from New York be added as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. McCLURE. Mr. President, I rise in opposition to the amendment of my colleague from Ohio to section 714 of the Foreign Assistance Act of 1981, with printed amendment No. 560, which would require the President to institute immediate termination of aid to Pakistan in the event that that country detonates a nuclear device.

Mr. President, I wish to go on record again that I certainly share Senator GLENN's concerns, but I am also convinced that the executive branch would most certainly take the most appropriate action, action which would very likely entail an aid cutoff, should circumstances seem to necessitate it. Furthermore, again as I stated yesterday, the fluidity of the regional relationships in Southwest Asia must be taken into account. It cannot be assumed that just any modification of circumstances would make termination the most suitable reaction. The President in his capacity as chief foreign policymaker, and certainly the constitutional requirement that he is the person who carries on and conducts foreign policy, must be allowed the flexibility to determine the specific action for specific conditions.

Senator GLENN's amendment does not give him that flexibility. It deprives him of that flexibility and gives him a predefined course of action without regard to what the circumstances or other national security requirements might be at that time.

The amendment of the distinguished Senator from Ohio mandates termination of U.S. assistance to the country detonating a device. While I have no doubt that termination of assistance would, and barring unforeseen circumstances should—and I underscore that "should"—be the U.S. response, I must strongly oppose the Senator's amendment which would tie our hands now, and provide no flexibility whatsoever for the President to respond based on an evaluation of all pertinent facts and an assessment of the totality of U.S. interests.

Mr. President, section 714, as reported, would provide Pakistan with the economic, political, and military stability to insure their national security. At the same time, it sends a clear signal to Pakistan of U.S. concern. The language is so worded that it is certain that the President would indeed proceed—given incontrovertible cause—in a manner which would clearly project American sincerity in maintaining its nonproliferation goals.

I would note, Mr. President, that Pakistan has several times in the past, and most recently Sunday, as reported in the New York Times, made public its strong desire for peace in Southwest Asia. Pakistan has proposed a nonaggression pact with India, and has even suggested the imposition of a nuclear-free zone in the region. These initiatives on the part of Pakistan would surely be put forward with greater emphasis, given both assurance of continuing support from the United States and confidence in the durability of its own national security. The renewal of our bond of friendship with Pakistan could only encourage their pursuit of peace.

I noted yesterday that a confrontational approach such as that proposed in this amendment has been tried with Pakistan in the past and has failed. I would hope that the United States will be able to build a new relationship of confidence with Pakistan which we believe would give us a better chance to insure that Pakistan's nuclear program follows a peaceful path. Adoption of this language change would undermine this new relationship.

I would also note, Mr. President, as has been done by several of my distinguished colleagues, that Pakistan is a frontline stage bordering Soviet-occupied Afghanistan along nearly half of its border. Beyond the telling statement of our intentions which renewed ties would give to Pakistan, such a statement would demonstrate in no uncertain terms to the Soviets that we are serious about assuring the security of our friends and allies by providing them with whatever support is necessary.

Mr. President, foreign policy is constitutionally the province of the President. Should Congress involve itself by roping the executive branch into very specific procedural instructions for dealing with the constantly shifting arena of international politics, we may not only be overstepping the bounds of congressional responsibility, but we might be restricting Presidential discretion in a way that could, in some yet unforeseen set of circumstances, be detrimental to the best interests of the United States and of international security.

Mr. President, I believe that the distinguished Undersecretary of State, our former distinguished colleague from New York, Mr. Buckley, has worked tirelessly with the Pakistanis to make progress on these issues. He has reported to the committee and the Congress regarding those continuing discussions with the Pakistanis. It is my strong belief that this President, Secretary Haig, and Undersecretary Buckley should be given every opportunity and the type of discretion in the reported bill to fashion a realistic and viable nonproliferation arrangements with Pakistan which will harmonize all of these national security interests.

In sum, Mr. President, it is the belief of this Senator that the bill as reported, that is, section 714 of the Foreign Assistance Act of 1981, will best serve U.S. interests and concerns for an economically and militarily sound Pakistan. It provides the President with effective authority to waive the Symington amendment in order to permit the President to provide Pakistan with crucially needed assistance.

Mr. President, I do not know how to underscore the absolute necessity, in my view, of giving the President the authority to deal with a changing set of circumstances, circumstances for which we can make no reasonably certain forecast.

It says, in effect, that there is no consideration in this country's view now nor in the next 6 years with respect to Pakistan that is as important as the single objective of avoiding the explosion or detonation of a nuclear device. Every other consideration this country might have is subverted to that one single test.

That is an important objective. As I have said repeatedly on this floor, almost certainly the President of the United States would not waive the Symington amendment under most foreseeable circumstances. But to say now that we know what those circumstances will be, and that there is no conceivable possibility that under any circumstances should the President waive that, seems to me to bind the hands of the President unnecessarily.

We have tried this with Pakistan before, and it does not work. We do not know what the situation will be in the immediate future. We do not know that, and if events of the recent turbulent past in that area are any precursor of the future it proves that fact.

Could you have said 2 months ago that the situation in Egypt would be as radically different as it is today? Could you have said 3½ years ago that the conditions in Iran would be as radically different as they are today? Can you tell me with respect to next year what the conditions in India will be at that time? Can the Senator from Ohio or anyone else tell me what is going to transpire in Afghanistan over the next year?

Could the Senator from Ohio or anyone else tell us that precisely on a given date Kuwait would be attacked by Iranian bombers? Can you tell me on a precise set of circumstances that the Saudi oilfields will not be attacked by someone within the next 6 years?

I am not suggesting that any of these events will take place. But I am saying that if certain events take place the President of the United States might conceivably, under some set of circumstances, desire to invoke the waiver of the Symington amendment. That power to respond to a given set of circumstances would totally deprive the President of the United States, and I think would seriously limit, his ability to deal with some circumstances which might evolve.

I want to state again, as I have stated before, that I do not think there is any doubt that the President would, under almost any conceivable set of circumstances, not choose to invoke the waiver of the Symington amendment. But the fact is we do not know what those circumstances are. It is a blind and, in my view, unreasoning determination in advance that no other consideration of national security could possibly be as important as this single event in one single country. That certainly may be the view of some but it is not the view of the Senator from Idaho.

I thank the Chair.

Mr. GLENN addressed the Chair.

The PRESIDING OFFICER (Mr. SCHMITT). The Senator from Ohio.

Mr. GLENN. Mr. President, the statement of the Senator from Idaho compels me to comment briefly.

As far as tying the hands of the President, as far as reducing his flexibility, what we are really talking about is restricting the flexibility of a nation that obviously has embarked on a course of building nuclear weapons. For what use? For India, next door, and they make no bones about that.

The Senator remarked about the message that the United States is sending to Pakistan regarding our concerns, whether that is sufficient or not. Why not have guts enough to state it?

Why not say what we mean? Why beat around the bush about this? We are talking about the possibility of a nuclear holocaust being visited upon the South Asia continent.

As far as the peaceful desires of Pakistan which, apparently, were described in some papers over the weekend—I believe the New York Times was referred to—if the Pakistanis are of such peaceful intent, why do they not then say they will forgo the nuclear weapons option? We would not need this legislation if they are that peaceful.

And yet we know as I went through yesterday in my statement, where they are getting their sensitive nuclear equipment, where they are getting their reprocessing equipment, where they are getting the enriching equipment.

I do not know why this confrontation approach did not work. What we have said is if we are to cooperate with nations in their concerns, that we want their cooperation in slowing the spread of nuclear weapons.

The weakest link of all is falling back on that old rhubarb that our President has to set foreign policy and that we are questioning the authority of the President to set forth foreign policy.

That is what galls me more in the AWACS debate than anything else, because it is not the Senate of the United States that is questioning the President and his ability to set foreign policy, it is the Constitution of the United States that says that the Senate will have an advise-and-consent role. It does not say this specifically with respect to nuclear arms to Pakistan, it does not say specifically AWACS, but what it does say is the Senate will advise the President.

Pursuant to that, the advise-and-consent part of the Constitution, we have specifically passed certain laws here from the earliest history of this country that perform that function the Constitution assigned particularly to the Senate of the United States and to the Congress overall.

So I question Presidential authority on occasion. I think every Senator here has, on occasion, questioned Presidential authority to set foreign policy alone.

I do not accept that just because he is the President we should abrogate all of our responsibilities under the Constitution and pass no additional laws concerning what the President does in the foreign policy area.

I doubt that anybody in the U.S. Senate would accept that if we brought it to a vote.

So what we are up against is the same old arguments we had during the Indian nuclear fuel sale last year. Somehow, this sale is supposed to influence Pakistan into a more peaceful means of solving their problems. We are supposed to somehow be able, with this sale, to wean them away from nuclear weapons development, even though they have been embarked on this course and it has been their stated policy since 1972. It was well in advance of the Indian nuclear explosion that Pakistan embarked on this path. And we have a record that is complete with all of the different actions that they have taken, one purchase after another, false front corporations, and all of the things that they have been going through to get the necessary equipment.

They acquired 6,500 tubes of special hard-type steel used for gas centrifuges obtained from a firm in Holland; vacuum valves to regulate streams of uranium hexafluoride gas into and out of the centrifuge system from a company in Switzerland; inverters from companies in Great Britain, West Germany, and the United States; electronic equipment used for centrifuges from firms in the United States by way of Canada and Turkey; a gas-feed system for the centrifuge from Kora Engineering of Switzerland; a metal finishing plant from Great Britain; rotors from Holland; rotor parts from West Germany; measuring equipment from Holland; aluminum parts from West Germany; vacuum equipment from West Germany; vessels and tanks for the reprocessing plant from an Italian company; precision equipment for the reprocessing plant from Switzerland; and on and on.

There is no doubt about what Pakistan wants to do. All I am saying is that if we are to have a nuclear nonproliferation policy and if we mean it, now is the time to stand up and be counted. We stood up on the Indian fuel sale last year and ducked. We did not live up to what NNPA said. And yet we continue to say that we have all these concerns about nuclear nonproliferation.

Only 3 months ago we passed a resolution that I put forward here. We passed it 88 to 0 before the President went to Ottawa for the summit meeting. It did not do any good, I might say, because he did not bring up the subject, apparently, up there anyway. But everybody was willing to vote for that one—88 to 0.

But when it comes down to a real cutting vote here, then it seems to me we have to stand up and be counted.

And what kind of message do we now send to the 112 nations that have signed the Nonproliferation Treaty when we say we are prepared to continue assistance to a nation that has absolutely refused to sign the NPT, even if that nation tests a nuclear device?

And Pakistan, to its everlasting credit, has not made any bones about this. They have said what they are doing. They stated way back in Bhutto's days that if India exploded a bomb, they were going to develop a bomb also. And, make no bones about it, that is what they set out to do and that is what they have been doing. So it is up to us.

I would answer the Senator from Idaho, that as far as the specter of the Soviets coming in to Pakistan that he brings up is concerned, he should go and look at the classified maps that show exactly where Pakistan's concerns really are, where their military forces are really alined. And I can tell him without going into specifics that 75 or 80 percent of Pakistan's forces are along the Indian border, not along the Afghan border.

Mr. McCLURE. Will the Senator yield on that point?

Mr. GLENN. Yes.

Mr. McCLURE. I have seen that classified information and certainly I know what the positions of forces of Pakistan are. But that certainly does not detract from the fact that the Soviet Union has moved in Afghanistan. I do not think the Senator from Ohio would mean to imply that the Soviet Union is no threat to the security of Pakistan.

Mr. GLENN. No, I was not implying that at all. What I was doing was replying to these force alinements that I thought the Senator from Idaho was describing as being along the Soviet border, the Afghan border, because that is just not the case.

I hope that they do aline more along the Afghan border and get away from a possible confrontation with India. That is one of the biggest dangers in the sub-Asian continent and has been for a number of years. Indeed, these countries have fought several times already.

So it is not an idle concern that we have regarding whether the next war along that border might be a nuclear

battle and not just a battle with conventional weapons.

So, Mr. President, I have little more to say on this. We have discussed this issue at great length.

Mr. President, I suggest the absence of a quorum.

Mr. McCLURE. Will the Senator withhold for just a moment?

Mr. GLENN. Certainly.

The PRESIDING OFFICER. The Senator from Idaho.

Mr. McCLURE. I thank the Chair and I thank the Senator from Ohio.

I just want to make this point, if I was misunderstood, and I hope I was not. The President of the United States, under the Constitution, has the responsibility for the conduct of foreign policy. The Senate of the United States has the responsibility to advise and consent to that foreign policy. It is a difficult line for us to draw.

Certainly, I want the Senate of the United States to be in a position to discharge its responsibility with respect to the formulation of policy. The line between the formulation of policy and the conduct of policy is a difficult one to define.

I share with the Senator from Ohio the determination that we shall not abrogate our responsibility in the formulation of policy under the advise and consent provision of the Constitution. It is an important provision. I think it sometimes has been ignored in this body, and I think it oftentimes has been ignored at the other end of the street.

But, at the same time, Congress, once getting involved into the formulation of foreign policy, sometimes finds a great deal of difficulty restraining itself from interference in the conduct of that policy.

So, if we look at that distinction, it seems to me we begin to make some definition of policy in terms that give a clear statement of our policy and gives to the President the authority, as well as the direction, to conduct that policy.

There is no doubt that our policy, as enunciated here in this body, and to the extent that they do so—and they do—in the other body, as well as all recent administrations, has to be to express our concern and horror concerning the possibility of a nuclear holocaust.

But having said that, the conduct of policies that reflect that concern are uniquely the responsibility of the President of the United States. We can say, "We are concerned as a Nation. Now, Mr. President, you carry that concern forward."

All I am arguing here today is that in expressing that concern about nuclear holocaust, we also must recognize that there are other foreign policy considerations that, from time to time, are as important as that concern.

What they are saying in the amendment of the Senator from Ohio is that so far as one nation is concerned, there is no other consideration that can possibly be as important as this single one, just by one test; detonation of a nuclear device.

That seems to me to be applying an unreasonable response to the requirement to conduct a foreign policy in a way which would carry forward the policy objectives as enunciated here and down the street.

Just a year ago we were debating the question of renewing shipments to the neighboring state of India. That was a close question. The Senator from Ohio was involved in that debate, as was the Senator from Idaho. In that instance, the Senate, I think in its wisdom, refused to adopt the position of the Senator from Ohio, that there was going to be one test and one test only with respect to our relations with India.

It is interesting to note that in spite of the fact that we refused to adopt an arbitrary and inflexible position with respect to India, the negotiations, as tough as they have been, are continuing, and, in the meantime, India, looking at all of the range of possibilities and relationships with the United States, has continued to refrain from a weapons program.

So the negotiations have produced, and maybe I should not overstate that. In the presence of negotiations our policies have been furthered with respect to the conduct of India, and, favorably, I believe and hope, will be continued; that they will continue to refrain in the presence of negotiations, but not in the presence of an arbitrary standard which would deprive the President of an opportunity to negotiate flexibly with India. It seems to me we ought to continue the same kind of posture with respect to the other nation, which the Senator from Ohio correctly identifies as a matter of major concern, the nation of Pakistan.

So there are some parallelisms which are involved, and if we are going to apply the parallelisms, it certainly indicates to us the desirability of flexibility in the conduct of policy and not some statement about a yellow line down the center of international diplomacy. It is not just who can have the guts to stand up for something but it is how you stand up for something that counts.

I do not believe that we would be served or that the Nation would be served by casting ourselves into inflexible positions, as strongly as we share the conviction that nuclear nonproliferation is an important goal for this country, an important goal for this world, and that we ought to be continuing it and we ought to continue without myopia; we ought to continue it without blind spots and exceptions. We ought to continue that goal without the selective enforcement of that which has so characterized our foreign policy in many other areas.

I would hope that we do not in this instance become so narrowly selective, as the impact of the Glenn amendment would be in this instance.

Thank you, Mr. President.

Mr. GLENN. Mr. President, I think we have debated this for quite a while today. We have spent a number of hours on this. I doubt if we can say many more things in this regard. Before we move on, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. GLENN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GLENN. Mr. President, I ask unanimous consent that the name of Senator TSONGAS be added as a cosponsor of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GLENN. Mr. President, unless there is further debate on this subject, I am prepared to move to a vote on it.

Mr. KENNEDY. Mr. President, will the Senator yield?

Mr. GLENN. I yield.

Mr. KENNEDY. Mr. President, I am pleased to cosponsor the proposed amendments by my friend and colleague, Senator GLENN, which would make it absolutely clear that the United States could not provide any security assistance to Pakistan—or any other nonnuclear weapons state—if it explodes a nuclear device.

We all recognize great changes in Southwest Asia over the past few years: increasing chaos in Iran, a larger Soviet naval presence in the Indian Ocean, and the continued Soviet military occupation of Afghanistan. Such changes not only threaten U.S. and Western interests but are of direct and immediate concern to the Government in Pakistan, and it is appropriate to respond to the economic as well as the legitimate defensive needs of Pakistan in this new environment. Historically, there are strong ties of friendship between Pakistan and the United States. I hope that these present times become opportunities for the peoples of both our countries to build a new and lasting friendship.

As our relationship develops there will be areas of difference as well as agreement. One such area of difference is Pakistan's policy toward nuclear development. I, for one, am strongly opposed to the proliferation of nuclear weapons capabilities. Such proliferation is a threat to the very existence of mankind. It transcends the borders of nations. It goes beyond the geographical limits of continents and seas. The nations of the world must face this issue squarely and countries like Pakistan must become a part of the international effort to prevent nuclear proliferation.

It is with the knowledge that Pakistan faces a new and increased military threat from the Soviet Union, and that it understands that any nuclear test will result in a U.S. aid cutoff, that I reluctantly accept modifications to the legislative prohibition of aid to nations that are developing a nuclear explosive capability. At the same time, I strongly support our clear legislative requirement that a U.S. aid cutoff will indeed occur if there is a nuclear detonation, and our finding that a "detonation by either India or Pakistan would cause grave damage to bilateral relations between the United States and such country."

It is now essential for the United States, and other friends of Pakistan, to do all we can to persuade the Pakistan Government not to pursue a nuclear explosive capability. The security advan-

tage of an increased conventional military capability for Pakistan can be dramatically reduced by regional perceptions that it is pursuing nuclear weapons. On the other hand, assurances from Pakistan that it will not explode a nuclear device—at least as long as India does not conduct a second explosion—would actually enhance its own security and make an important contribution to stability not only in South Asia but throughout the world.

As the United States develops stronger relations with Pakistan, it is important for us to maintain and strengthen our ties with India and other nations in South Asia. Our relations with India and with Bangladesh, Sri Lanka, and Nepal go back to their first days of independence. Each has its concerns and fears. Each has its hopes and aspirations.

Instead of contributing to a new arms race, the United States should be a force for peace and security in South Asia. We should work for democracy, human rights, and social and economic justice. We should pursue closer relations with all the states in South Asia, and those states should find our policy sensitive to their concerns and aspirations.

Mr. GLENN. I thank the distinguished Senator from Massachusetts for his support.

Mr. McCLURE. Mr. President, I am prepared to go to a vote on this amendment, but Members should be aware that Senator HELMS said earlier today that he had another amendment which he would offer later. Members should be aware that they will have a vote on that one, too.

Mr. GLENN. Senator HELMS had indicated earlier that he would not be going for a rollcall vote. He may have changed his mind.

Mr. McCLURE. I do not think he has changed his mind, but I believe other Members of the Senate have some feeling on that.

Mr. LEAHY. Mr. President, I wish to support the amendment offered by the distinguished Senator from Ohio directing the President of the United States that he shall not exercise the waiver now in force under section 670 of the Foreign Assistance Act by which U.S. assistance is automatically terminated to any nation detonating a nuclear device unless the waiver is involved.

I do so persuaded that evidence of Pakistan's intentions to develop a nuclear explosive capability is detrimental to the best interests of Pakistan and its neighbors alike. To allow the waiver to be exercised in this instance would represent one more tragic chapter in the history of tension and war in the recent history of South Asia. The United States has a special responsibility to help break this cycle of violence and suspicion, and above all else to slow the race towards turning it into a potential nuclear holocaust.

In 1947 the post-colonial era was launched by the partition of the British Empire in South Asia and the establishment of India and Pakistan. Millions of people fled in opposite directions to escape communal slaughter perpetrated by Hindu and Moselm extremists alike. Pakistan and India fought the first of four wars against each other over Kashmir. Against tremendous odds posed by poverty and warfare, India emerged as the world's largest democracy and Pakistan established a record of solid economic development.

No region so volatile could escape the attention of the worldwide struggle between Soviet imperialism and the Western democracies. By an irony of history India retained political institutions inherited from Great Britain but increasingly relied on arms supplied by the Soviet Union. Pakistan passed through a succession of military governments but became a front-ranking recipient of American economic and military assistance.

Pakistan's effort to retain equality on the subcontinent was compromised by the loss of Bengal, its smaller and poorer but more popular half. Both India and Pakistan expanded their military appetite for weapons neither could afford, and at length a small but sophisticated modern economic sector in each country focused on the development of a nuclear energy capacity.

India detonated an atomic bomb, and Pakistan vowed not to be denied access to an advantage held by its traditional enemy. The great powers, meanwhile, acerbated the conflict. Soviet fear of China reinforced ties with India, which fought a border war against Peking. The Western powers tried to redress the balance by supplying Pakistan increasingly sophisticated weapons.

Neither the Soviet Union nor the West can take comfort in what has happened in South Asia. Russian armies are pinned down in Afghan towns by nationalists willing to respond to the Soviet Union's brutal tactics by brutal countermoves. The United States fears that Pakistan will follow India's success in breaching the nuclear monopoly of the great powers, and that tension between the two countries will lead to the fifth war between them since 1947.

Such a war would provide the Soviet Union an unparalleled opportunity to exploit religious and separatist forces in Pakistan, and result in the extension of Soviet military and political dominance to the Indian Ocean. Iran, already wracked by a revolution turned sour, might succumb to the Kremlin's pressures. India would face the difficult choice of trying to maintain increasingly dangerous ties with the Soviet Union or devoting even more of its scarce resources to defending the remainder of South Asia from Soviet encroachment.

These are the circumstances which influence the provision in the foreign assistance bill before us today to approve more than $3 billion in economic and military assistance to Pakistan. The resumption of massive aid to Pakistan expresses the Reagan administration's fears that unless we bolster Pakistan's military effectiveness the country will succumb to efforts to divide the country irrevocably along linguistic and ethnic lines.

Perhaps assisted by the Soviet Union, the tribesmen of sparsely populated Baluchistan would carve a separate state out of the western desert, which could result in the emergence of a client Soviet state on the banks of the Arabian Sea. India might prove unable to resist the temptation to annex the portions of Kashmir now under Pakistani control. Stripped of most of its territory and reduced to the overpopulated Indus Valley, Pakistan might cease to exist altogether.

The proposal for a renewal of substantial military assistance to Pakistan is designed to help avert this nightmare and to insure Pakistan's viability. Beyond this, the administration's proposal revives that strategy as a byproduct of American efforts to curb Soviet adventurism in South Asia.

A serious aspect of the American military assistance program for Pakistan is the possible impact on Pakistan's longstanding attempt to develop an independent nuclear power capacity. There is incontrovertible evidence that Pakistan's nuclear program contains a growing capacity to produce nuclear weapons.

Pakistan has refused to allow additional safeguards on its reactor or to allow any safeguards at all in its other nuclear facilities. The President of Pakistan has refused to provide assurance to the United States that Pakistan will refrain from detonating nuclear weapons. Pakistan has reportedly assembled the ingredients of a nuclear bomb by surreptitious acquisition of key technology and the purchase of uranium in a loosely supervised world market. It is uncertain whether Pakistan's nuclear genie can be returned to the bottle.

The United States cannot duck the serious implications posed by section 670 of the Foreign Assistance Act as they relate to Pakistan's efforts to become a nuclear military power. It is not too late to influence in Pakistan's potential for producing nuclear weapons. I cannot see such weapons in Pakistan's arsenal as beneficial to Pakistan or to the United States.

Certainly India, faced by evidence that Pakistan was determined to proceed with such a program, would move quickly to exploit its own already considerable technological advantage in this area. The Soviet Union would cite Pakistan's potential as reason enough to attempt to tighten its hold on Afghanistan and to reinforce its ties with India. If nuclear weapons programs proceed apace, the world might face the horrible prospect of war in South Asia in which even a few rather rudimentary nuclear bombs could wreak unparalleled havoc on densely populated regions on both sides of the Indo-Pakistani border.

Certainly the savagery of communal warfare which attended partition in 1947 and bitter memories stemming from that era serve as a dangerous precedent for a nuclear conflict, which even though limited geographically, could devastate portions of the most densely populated area in the world.

This should not be allowed to happen. The proposed level of assistance to Pakistan affords the United States an opportunity to curb the nuclear arms race in a volatile corner of the world. Stipulating to Pakistan that the large military assistance program to Pakistan will pro-

ceed only on conditions that Pakistan refrains from detonating a nuclear device is a modest enough burden upon Pakistan, but it may effectively serve the cause of peace in South Asia. It will also demonstrate to the world that the United States will not condone the proliferation of dangerous nuclear technology for military purposes in parts of the world which cannot but be seriously injured by their use.

● Mr. MITCHELL. Mr. President, I rise today to express my full support for the package of amendments offered by Senator GLENN which are designed to preserve our nuclear nonproliferation policies. I am doing so because I believe that the committee's amendment concerning assistance to Pakistan, standing alone, constitutes a true step backward in our Government's effort to stem the flow of nuclear weapons materials, technology, and knowledge from the "nuclear states" to those which do not currently possess nuclear capabilities.

I share with all of my colleagues here a strong and continuing concern about the existence of 85,000 Soviet troops in Afghanistan. This situation poses a serious security problem for Pakistan and other independent states in Southwest Asia and indeed endangers our own national security interests in the region.

While I fully appreciate the potential for international conflict which the Soviet occupation of Afghanistan presents, I seriously question if the cause of peace will be advanced, or the long-range interests of the United States will be served, by subordinating our nonproliferation goals as we seek to counter the threat posed by the Soviet Union.

We have every reason to be skeptical of the nuclear intentions of Pakistan which for many years has been concerned about nuclear development in neighboring India. Reports appearing in major international journals over the last 3 years suggest that Pakistan is seeking to develop nuclear weapons components which on relatively short notice could be joined to make a nuclear explosive device.

Unfortunately, a number of private firms in the West have facilitated Pakistan's efforts through their willingness to sell equipment and design knowledge. There also exists a possibility that Pakistan may be seeking a nuclear capability in collaboration with one or more other states.

Pakistan obviously is a sovereign state and is entitled to formulate its national policies and to expend its national resources as its leadership sees fit. However, our Government possesses a similar sovereign right to withhold any U.S. assistance which Pakistan may desire, as long as our Government determines that Pakistan's policies with respect to nuclear weapons development endangers U.S. interests, or the security of the region.

In my judgment, the question involved here is one which Pakistan ultimately must answer. The question is: Does the Soviet occupation of Afghanistan constitute a great enough threat to Pakistan that it is willing to forego its nuclear weapons plans, and thereby receive substantial U.S. economic and military aid necessary for its own security?

Senator GLENN's proposals permit U.S. economic and military assistance to go forward in fiscal year 1982. It will also permit Pakistan to receive aid in the fiscal year 1983 to fiscal year 1987 time period. During this period, however, Congress each year would receive a classified report detailing Pakistan's efforts to develop and construct nuclear arms. If Congress does not like what it learns, it can express its concern during the annual consideration of Foreign Assistance Act authorization legislation. Moreover, under the pending amendment—No. 560—the President shall terminate all aid should either Pakistan or India detonate a nuclear device.

Like Senator GLENN, I would prefer that the Symington language now contained in the Foreign Assistance Act of 1961 be left intact. However, it appears that this body collectively is willing in the case of Pakistan to waive the requirement that U.S. aid be terminated to any state which receives or transfers nuclear enriched material, technology or equipment unless the President certifies that he has received "reliable assurances" that the state will not acquire or develop nuclear weapons.

If this is to be the position of the Senate, then the very least we can do is to insist that aid be cut off if a detonation occurs, and to ask that we be informed on a yearly basis what the receipt of our assistance, Pakistan, is doing in the nuclear field.

I urge all of my colleagues to support Senator GLENN's worthwhile efforts.●

Mr. GLENN. Unless there is further discussion, I am prepared to move to a vote on this amendment.

Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. GLENN. Have the yeas and nays been ordered?

The PRESIDING OFFICER. The yeas and nays have been ordered.

Does the Senator from Ohio yield the floor?

Mr. GLENN. I yield the floor, unless someone else wishes to speak.

Mr. PERCY. Mr. President, we are ready for a vote. We would like to check with the leadership, however, to see if it would be possible—and I will make the unanimous-consent request at the proper time—to vitiate the unanimous-consent agreement to move to the Hart amendment after the vote on the Glenn amendment and, instead, to vote on the Helms amendment, which is on the same subject area. I believe it can be disposed of very quickly, because we have had a good deal of discussion about it, and we can have that as the next order of business. We will discuss that with the leadership.

Mr. GLENN. As I understand it, the floor manager is not proposing that unanimous-consent request at this time.

Mr. PERCY. I am not proposing that unanimous-consent request now. We would like to check with the leadership on both sides, to see if there is any problem with it.

Mr. GLENN. If the Senator should move for that at this time, I would oppose it, until we can get Senator HART to the Chamber.

The PRESIDING OFFICER. The question is on agreeing to the amendment. On this question the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Alabama (Mr. DENTON) is absent due to illness.

Mr. CRANSTON. I announce that the Senator from Missouri (Mr. EAGLETON), the Senator from Hawaii (Mr. INOUYE), and the Senator from Massachusetts (Mr. TSONGAS) are necessarily absent.

The PRESIDING OFFICER (Mr. EAST). Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 51, nays 45, as follows:

[Rollcall Vote No. 317 Leg.]

YEAS—51

Baucus	Durenberger	Matsunaga
Biden	Exon	Melcher
Boren	Ford	Metzenbaum
Boschwitz	Glenn	Mitchell
Bradley	Hart	Moynihan
Bumpers	Hatfield	Nunn
Burdick	Heflin	Pell
Byrd, Harry F., Jr.	Heinz	Proxmire
	Helms	Pryor
Byrd, Robert C.	Huddleston	Randolph
Cannon	Jackson	Riegle
Chafee	Johnston	Sarbanes
Chiles	Kassebaum	Sasser
Cranston	Kennedy	Specter
Danforth	Leahy	Weicker
DeConcini	Levin	Williams
Dixon	Long	
Dodd	Mathias	

NAYS—45

Abdnor	Hatch	Pressler
Andrews	Hawkins	Quayle
Armstrong	Hayakawa	Roth
Baker	Hollings	Rudman
Bentsen	Humphrey	Schmitt
Cochran	Jepsen	Simpson
Cohen	Kasten	Stafford
D'Amato	Laxalt	Stennis
Dole	Lugar	Stevens
Domenici	Mattingly	Symms
East	McClure	Thurmond
Garn	Murkowski	Tower
Goldwater	Nickles	Wallop
Gorton	Packwood	Warner
Grassley	Percy	Zorinsky

NOT VOTING—4

Denton	Inouye	Tsongas
Eagleton		

So Mr. GLENN's amendment (No. 560) was agreed to.

Mr. MATHIAS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. GLENN. I move to lay that motion on the table.

Mr. STEVENS addressed the Chair.

The PRESIDING OFFICER. The Senator from Alaska.

Mr. STEVENS. Mr. President, I think this issue ought to be reexplored, and I hope that my good friends from the Foreign Relations Committee will be willing to do that with some of the Members here who were not here during the debate.

If I understand the issue correctly, it is a precedent of what I would call horrendous proportions in view of the past foreign relations policy of this country with regard to those nations that have, in fact, detonated nuclear devices.

It is not something that should be adopted without further explanation, in my opinion, and I hope the Senator from Illinois, the chairman of the Committee on Foreign Relations, will do that.

Mr. President, those nations in the past which have detonated weapons, I can remember when India and when France did and others, and we did not abandon them. Had we abandoned them, we would be alone in the world today.

I think that to say a nation that pursues its technology and comes up with us that we should divorce from them all further assistance is a mistake, and I do hope the chairman of the committee will explain further to the Senate the impact of this decision if it, in fact, is the decision of the Senate.

Mr. GLENN addressed the Chair.

Mr. PERCY addressed the Chair.

The PRESIDING OFFICER. The Senate will be in order. The Chair recognizes the Senator from Illinois.

Mr. PERCY. Mr. President, there is not any question that the administration feels very strongly on this issue. They have been in delicate, intensive negotiations with Pakistan, formerly a very strong ally of this country, a country that has now begun to reestablish its relationships with us and bears a tremendous burden with the Afghanistan refugees, several million of them there. Recognizing that in India——

The PRESIDING OFFICER. Excuse me. The Senator from Illinois has the floor and deserves the courtesy to be heard. The Senate will be in order. Those having other business to conduct please go to the cloakrooms, the hallways, or elsewhere. The Senator from Illinois is entitled to be heard and will be heard.

The Senator may proceed.

Mr. PERCY. Mr. President, as I have indicated, the country of Pakistan is now working with the administration to reestablish its relationship. It faces threats from many different sides. We do not have to remind the Senate of a threat from Iran that took out in a raid on Kuwait, its oil storage facilities, some of its oil storage facilities. It is faced with hostility because it is now accepting and has accepted several million refugees resulting from the Soviet occupation in Afghanistan, where the people of Afghanistan are simply being brutalized.

Pakistan has legitimate and deep concerns. Those concerns are being somewhat alleviated by a relationship that has been established with the United States now and with the administration for an arms package.

But it is also faced with the fact that there has been a detonation in India. There is a very massive arms agreement between the Soviet Union and India and though, in a bilateral sense, both of those countries are rationally working toward a better understanding, Pakistan does stand in threat of its own security. For that reason, a closer working relationship with the United States is highly desirable.

In this particular amendment, the committee gave very careful consideration to this matter and we determined that we should indicate that the word "should" should be used in the event of a detonation. But we do not know what circumstances would be involved at that time. And to automatically mandate that something be carried forward might be very dangerous.

Senator GLENN has proposed to change section 670 of the act to remove the Presidential discretion should a nuclear device be detonated. This amendment appears to be an attempt to legislate piecemeal a nonproliferation measure.

Senator GLENN and I have worked closely together. I have deep respect for his knowledge in this field and his devotion and dedication to it. But I do not feel it is wise at this time, without full hearings, without the administration presenting their arguments, to just suddenly come in and take an action here that may upset the very delicate relationship that we are developing with Pakistan.

Mr. GLENN. Will the Senator yield?

Mr. PERCY. I will yield in just one moment.

Mr. GLENN. Are we going to go through this whole debate that we have just spent 6½ hours on? Is it our intention to go the rest of the day on the motion to table?

Mr. PERCY. I think not. I think we can come to a decision on this very quickly.

As the Senator knows, we had very few Senators on the floor. The assistant majority leader said that this is an issue of such vital importance that, in casting his vote, he would much prefer to have a debate now that Senators are alerted to the nature of the particular issue that we have at hand.

Mr. GLENN. Will the distinguished Senator yield for just a moment?

Mr. PERCY. Yes.

Mr. GLENN. What kind of procedure would it be if every time we had a debate on the floor of the Senate, Senators that did not attend were permitted to say, "Well, my goodness, we just had 6 or 7 hours of debate but because the vote went the wrong way, we have to repeat that whole debate over again"? That is ridiculous.

Mr. PERCY. It is in accordance with the Senate procedures the Senator has observed for years. We have always had the right to reconsider a vote. That right was exercised by a Senator and that is the process that we are engaged in. I think in just a few moments we can get the arguments out so that we can come back and at least have the vote on a much better informed basis.

Before adequate congressional and executive branch consultations have occurred, we are being asked now to take a position on an issue that may have an absolutely vital effect on a country that is endangered on one side, threatened on the other, and is now attempting to reestablish a relationship with the administration.

It is the administration's viewpoint that tying their hands, putting them in a straitjacket, mandating a policy from which they would have no recourse would be a dangerous policy to follow.

Certainly, I do not have to emphasize how adversely we would react when the administration acts without adequate prior consultation with Congress, even before Congress has adequately discussed and has adequate hearings on this particular subject.

I do not deny that after consultations and hearings and the development of a comprehensive nonproliferation policy, we may well determine that this amendment, or a modified form of this amendment, is the course for the United States to follow.

But I think the course would be premature. It would be a radical move at this particular time and it may not well be in the best interests of the United States, as I see it.

We should not legislatively preempt the administration any more than they should act without consultation with Congress.

This was our understanding when the committee rejected this change at the time we marked up the legislation. And circumstances have not changed.

We debated that issue in committee. We decided at this particular time that it would be best to leave some leeway here and indicate what the administration should do but not absolutely direct it regardless of the circumstances.

For that reason, I think we ought to give the administration the benefit of the doubt and raise the issue but not try to resolve it at this particular time.

Mr. GLENN. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. GLENN. I move to table the motion to reconsider. Is that debatable?

The PRESIDING OFFICER. It is not debatable.

Mr. MATHIAS. Will the Senator withhold his tabling motion so I could just pose a few brief questions to him?

Mr. GLENN. I will.

Mr. MATHIAS. I voted for the amendment of the Senator from Ohio. I also voted in the Foreign Relations Committee for the modification of the Symington amendment, which really gives rise to this whole question that is now before the Senate. In casting both of those votes, I was trying to steer between Scylla and Charybdis, in a very narrow passage which will lead to a sound national policy.

We were concerned that we would be, as the distinguished chairman of the Foreign Relations Committee said, inflexible under the original provisions of the law and we were in danger of rupturing our relations with Pakistan, which certainly no one wishes to do. So we, therefore, did make the Symington amendment more flexible.

What the Senator from Ohio now proposes will not undo that work, am I right?

Mr. GLENN. That is correct.

Mr. MATHIAS. It will not cause the cessation, the termination of any programs now underway with Pakistan.

Mr. GLENN. The Senator is correct.

Mr. MATHIAS. And what the Senator is proposing, as he and I discussed yesterday, is prospective in its impact.

Mr. GLENN. The Senator is correct.

Mr. MATHIAS. And it is only if some

action should occur hereafter, specifically the detonation of a nuclear device by either India or Pakistan, that programs respectively with those countries would be affected.

Mr. GLENN. That is correct.

Mr. MATHIAS. And we are dealing evenhandedly with India and Pakistan.

Mr. GLENN. That is absolutely correct; in both countries.

Mr. MATHIAS. So the effect here is what happens in the future and not the fact that India has already detonated a nuclear device, nor is it a fact that we have some reason to believe that Pakistan has undertaken some research which moves in that direction.

Mr. GLENN. The Senator is absolutely correct. What we are trying to do is carry out the terms of our nuclear nonproliferation policy. It would not go back and repenalize India for their actions in the past.

What my amendment does attempt to do is prevent the spread of nuclear weaponry to another nation, to Pakistan, which has been embarked on this course for some time. I wish to have the arms sent to Pakistan, but I also want to prevent the spread of nuclear weapons. We have worked in this area through the Nuclear Nonproliferation Act for several years. But the first time the Nuclear Nonproliferation Act came to its test was on the Indian fuel sales last year and we did not stand firm; now we find the second test of it here. I think this is really a test this time of whether we have the true nuclear nonproliferation policy or not.

Mr. MATHIAS. I think the Senator puts his finger on one of the real danger points, flashpoints, in the modern world. It is not only if and when a given country gets a nuclear capacity, it is the moving toward that, that creates the conditions of danger, as we observed in the Israeli raid on Iraq.

During a graduation speech at Harvard University this past summer, Tom Watson, former Ambassador to the Soviet Union, pointed out the highly destabilized condition of the world when one nation observes a hostile neighbor approaching, either quantitatively or qualitatively, a degree of nuclear superiority, the possibility of some hostile or some violent act which can plunge the world into war is present, so that the need to contain proliferation is very real.

I wanted to be absolutely certain, and I am sure other Members of the Senate wish to be certain, in the understanding of the author of this amendment as to exactly how it was intended to operate.

Mr. GLENN. The Senator is absolutely correct.

Mr. President, I move to lay on the table the motion to reconsider.

The PRESIDING OFFICER. The question is on agreeing to the motion to lay on the table the motion to reconsider.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. Under the previous order, the Senator from Colorado (Mr. HART) is to be recognized.

Mr. HART. Mr. President, I had thought the committee worked out an agreement which I was agreeable to concerning a limitation of time on the amendment of the Senator from North Carolina. I am waiting for the committee to offer that arrangement.

Mr. HELMS. Mr. President, I will say to the Senator from Colorado, I do not propose to take but a few minutes. It is my understanding that the managers of the bill may accept the amendment. That is the only arrangement I know anything about.

Mr. HART. I think we are having difficulty getting the attention of the managers of the bill right now.

Will the spokesman for the majority or for the minority straighten out the situation regarding the Senator from North Carolina? We are waiting for leadership here.

Mr. PERCY. There was a notification put out that we would ask unanimous consent to take up the Helms amendment at this time and then have it followed by the Hart amendment. Is that agreeable to the Senator from Colorado?

Mr. HART. That is agreeable. I was waiting to have the Senator ask for unanimous consent.

Mr. PERCY. Mr. President, I ask unanimous consent to vitiate the unanimous-consent agreement to move to the Hart amendment after the vote on the Glenn amendment, and that, instead, a Helms amendment related to the Glenn amendment be brought up as the next order of business.

I further ask unanimous consent that there be a time agreement of 20 minutes evenly divided on the Helms amendment, and that the Hart amendment be taken up immediately after the Helms amendment.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. GLENN. A parliamentary inquiry, Mr. President.

The PRESIDING OFFICER. The Senator will state it.

Mr. GLENN. Reserving the right to object, will that modify in any way the Glenn amendment or is it just to come up after the Glenn amendment?

The PRESIDING OFFICER. It has no effect on the Glenn amendment.

Mr. GLENN. I will continue temporarily to reserve the right to object, Mr. President.

Mr. HART addressed the Chair.

The PRESIDING OFFICER. The Senator from North Carolina has the floor.

Mr. HELMS. Without losing my right to the floor, I yield to the Senator from Colorado.

Mr. HART. The unanimous-consent request concerned an amendment by the Senator from North Carolina related to the Glenn amendment. The Senator from Ohio has asked about the connection or relation to his amendment.

Mr. HELMS. Mr. President, the question was, Does it affect the Glenn amendment? It does not affect the Glenn amendment, but it does relate to another portion in that same section, if that is clear.

Mr. GLENN. Mr. President, I continue to object, temporarily.

Mr. President, I withdraw my objection.

Mr. HELMS addressed the Chair.

The PRESIDING OFFICER. The Senator from North Carolina.

Mr. HELMS. Mr. President, I apologize for not having heard the last comment. Where do we stand? What is the pending business?

The PRESIDING OFFICER. The Senator from North Carolina.

Mr. HELMS. Mr. President, I yield myself such time as I may require, which will not be very much.

UP AMENDMENT NO. 492

(Purpose: To require a prohibition on furnishing assistance to any country if such country detonates a nuclear device)

Mr. HELMS. Mr. President, let me read the amendment.

On page 83, line 12, strike "either India or Pakistan" and insert in lieu thereof "any country."

I ask unanimous consent to proceed to the consideration of the amendment.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

The Senator from North Carolina.

Mr. HELMS. Mr. President, I send an unprinted amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from North Carolina (Mr. HELMS) proposes an unprinted amendment numbered 492.

On page 83, line 12, strike "either India or Pakistan" and insert in lieu thereof "any country".

Mr. HELMS. Mr. President, the pending amendment is obviously quite simple. This Senator, as many other Senators, feels that the United States should not single out India and/or Pakistan for special penalty. Therefore, the section should be amended or modified to apply to all countries receiving aid from the United States.

Mr. President, this is the point: Pakistan, Argentina, Iraq, Brazil, India, Taiwan, and South Africa are all rumored or known to have substantial nuclear capability, and are said to possess the ability to produce a nuclear weapon. Therefore, if any nation explodes a nuclear device and if it is receiving any kind of assistance from the United States, that aid should be cut off.

Mr. President, somehow we must stop the proliferation of nuclear weapons. We are talking about the future of this world. Otherwise, we will have to live with the specter of nuclear blackmail by a small nation with one nuclear device.

I ask the Senate, what happens if Qadhafi obtains a nuclear weapon?

We simply must use whatever leverage we have in this world to encourage nations to halt the insanity of the spread of nuclear weapons. Cutting off aid to any nation which detonates a nuclear device will help do just that. For that reason, I urge adoption of the pending amendment.

I reserve the remainder of my time.

Mr. PERCY. Mr. President, I voted against and spoke against the Glenn amendment because it singled out, in a sense, two countries. Though there is con-

cern, certainly, about nuclear proliferation in the Near East, which is a highly volatile area, that is not to say that they are alone. There has been interest shown in Latin America, in the Middle East; certainly in Asia and Africa. This problem is a pervasive problem. The virtue of the Helms amendment is that it is nondiscriminatory. It is just against proliferation. It does not name any particular country, it does not point a particularly accusing finger. It simply says every country shall be treated the same. For that reason, I think there is considerable merit in the amendment. I intend to vote for it.

Mr. HELMS. I thank the Senator.

Mr. McCLURE. Will the Senator yield?

Mr. PERCY. I am happy to yield.

Mr. McCLURE. I thank the Senator for yielding and I shall not belabor the subject.

Certainly, Mr. President, the Helms amendment does have the virtue of being evenhanded. It does not discriminate among countries except in the sense that those who have already developed a nuclear capacity have, therefore, a frozen position that may be different from their immediate or future adversaries. But I shall continue to oppose the amendment as I opposed the Glenn amendment. The Glenn amendment was faulty on two grounds. One is that it was discriminatory. The other one remains and is stated in the Helms amendment in an even broader and, therefore, more dangerous sense in that it ties the hands of the President of the United States in dealing with any of these countries and it says that there is only one policy consideration and that will override every other policy consideration in the event a country detonates a nuclear device.

Mr. President, if that is the position of the Senate, so be it. This Senator cannot see it that way. Can I imagine or can anybody else in this body imagine that, should the Israelis detonate a nuclear device, we would immediately terminate all aid to Israel? Mr. President, I ask all Members of the Senate to ask themselves that question and honestly answer it—honestly answer it.

If they were to ask themselves that question and really honestly answer it, they would have to ask themselves why we have not responded in that way in other regards. It is obvious that there are other policy considerations that come into the discussion, and some of those policy considerations have been sufficient to outweigh others in the past with respect to tensions between countries.

Let us hypothesize for a moment. India has been suggesting that they do not intend and, as a matter of fact, the Senator from Ohio is concerned that the nation of India does not intend to comply with the restrictions that we may place upon shipments of nuclear materials to that country and, as a matter of fact, they may reverse their policy and move further toward a weapons position. We would immediately terminate aid to India under this amendment or under the Glenn amendment. If, as a matter of fact, Israel were to do so, we would immediately terminate aid to Israel.

Now, Mr. President, nobody believes that. I do not believe that. Because there are other security considerations which are of vital concern to us and to others of our friends that do weigh in the scales of decisionmaking, both in this body and in the administration. It is that very flexibility which the Glenn amendment removed with respect to two nations, that the Helms amendment would remove with respect to all nations. As I said, it has the virtue of being evenhanded. It removes one of the impediments of the Glenn amendment but it leaves the other of inflexibility in policy.

I think we are just kidding ourselves, Mr. President, if we think we shall really apply that when it gets right down to it with respect to some circumstances in some situations. So while it has the appearance of evenhandedness, I do not think that, in fact, we can sustain that no matter how we were to attempt to do so in this body.

Mr. MATHIAS. Will the Senator yield for a question?

Mr. McCLURE. I am happy to yield for a question.

Mr. MATHIAS. The Senator said we would not enforce this proscription in a given case.

Mr. McCLURE. Mr. President, I said in the event that Israel were to detonate a device, this Senator does not believe that the United States would immediately cut off all economic and military assistance to the nation of Israel.

Mr. MATHIAS. The Senator believes that?

Mr. McCLURE. I believe that, Mr. President, and I think the record will bear it out. We got very concerned in this body about the misuse, the abuse of the defense-only requirement on military weapons when Turkey and Greece got into a problem in Cyprus, but we have never had the nerve to be evenhanded with respect to that requirement when it came to the use of weapons furnished by this country to the nation of Israel against Iraq, against Lebanon, against any other nation.

Mr. MATHIAS. But what the Senator from North Carolina is raising is the possibility that we might. Is that not true?

Mr. McCLURE. Yes, Mr. President, and what I am trying to say to the Senator from Maryland is that that is an illusion which this Senator does not believe has any more substance than the proscription upon the defensive use of weapons by the nation of Israel.

Mr. MATHIAS. But now, the Senator has carved out here an exception for Israel, which let us lay aside for the moment for the sake of this conversation. Let us say we are looking at all the rest of the world. Would it not be true that, save for Israel, we are at least creating a doubt in the minds of the many other nations who are now toying with the idea of developing a military nuclear capacity that, if they do it, they just might—just might—be cut off from any kind of a program?

Mr. McCLURE. Oh, I say to the Senator from Maryland, Mr. President, that is in the existing law. We do not have to adopt an amendment to have that.

Mr. MATHIAS. And this will reaffirm it.

Mr. McCLURE. No, it is reaffirmed in a rigid fashion in this amendment, not the creation of a doubt. The Senator is suggesting now that we are saying it but we do not mean it.

Mr. MATHIAS. No, I did not suggest that, the Senator suggested that.

Mr. McCLURE. Well, the Senator from Maryland suggested, let us set Israel aside and we shall create doubts everywhere else.

Mr. MATHIAS. The Senator from Idaho suggested that, Mr. President. I am willing to take the law on its face. I am willing to believe that the Senator from North Carolina believes what he says here today.

Mr. McCLURE. Mr. President, let me simply conclude again, as I have tried to state throughout all of this, that we cannot foresee what the circumstances may be between Israel and Iraq or India and Pakistan, or Afghanistan and Iran. We do not know what those circumstances may be. We can make a policy statement as to what we think we ought to do, as we do when we have the Symington amendment, with the waiver as reported by the committee. But when you have a rigid policy that says there is no exception, it must be observed, the President of the United States can apply no discretion, then I think we have gone too far in setting a policy consideration in the kind of inflexible posture that we have not complied with in other events in other statutes. Therefore, I think it is a mistake.

Mr. MATHIAS. But would that not raise a greater question in the mind of the country that was contemplating the development of a nuclear capacity that, in fact, they would pay a heavy price for the detonation of a nuclear device at some time in the future?

Mr. McCLURE. As I tried to indicate earlier in the debate on the Glenn amendment, when the Senator from Maryland was not present, indeed, I believe that if they did detonate a device and the President had the authority to cut off aid, he would be almost certain to do so. But there are those circumstances under which he might not desire to do so and this amendment would require him to do so. So I think even under the provision of the committee bill without the amendment, every nation in the world should have that concern that if indeed, they do move to join the weapons fraternity, if you want to call it that, that group of nations that holds the awful power to destroy as nuclear weapons can, we would in all likelihood move to terminate economic and military assistance.

But, again, while we send them that message, I think we should be very careful that we do not bind the hands of our President.

The PRESIDING OFFICER. The time for the opponents of the amendment has expired.

Mr. HELMS. Mr. President, how much time remains?

The PRESIDING OFFICER. The Sen-

ator from North Carolina has 7 minutes and 22 seconds.

Mr. PELL. Mr. President, will the Senator respond to a question?

Mr. HELMS. I will try.

Mr. PELL. I am sympathetic to the Senator's amendment. As presently written, as I understand it, it would cover any country. Would that include the United Kingdom or France, or does the Senator mean any nonweapons country within the terms of the nonproliferation treaty?

Mr. HELMS. Obviously, it refers to countries receiving aid from the United States.

Mr. PELL. It also includes credits, and I believe France and Britain receive credits. This would deprive us of the ability to give them credits.

That is why I wonder if the Senator would want to modify his amendment to apply exclusively to nonnuclear nations.

Mr. HELMS. The Senator raises a good point.

Mr. President, without the time being charged to either side, I ask unanimous consent that I may suggest the absence of a quorum, so that we can discuss this.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. HELMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HELMS. Mr. President, I send to the desk a modification and ask that it be stated.

The PRESIDING OFFICER. The modification will be stated.

The legislative clerk read as follows:

On page 83, line 12, strike "either India or Pakistan" and insert in lieu thereof "any non-nuclear weapons country".

Mr. HELMS. Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment as modified.

The amendment (UP No. 492), as modified, was agreed to.

Mr. HELMS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. PELL. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Senator from Colorado is recognized.

UP AMENDMENT NO. 493

(Purpose: To prohibit the importation of crude oil extracted in Libya)

Mr. HART. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from Colorado (Mr. HART), for himself and Mr. KENNEDY, Mrs. KASSEBAUM, Mr. MOYNIHAN, Mr. WEICKER, Mr. PROXMIRE, Mr. PRYOR, Mr. LEAHY, Mr. SARBANES, and Mr. MITCHELL proposes an unprinted amendment numbered 493.

Mr. HART. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 84, between lines 2 and 3, insert the following:

PROHIBITION ON THE IMPORTATION OF CRUDE OIL FROM LIBYA

SEC. 716 (a). The Congress finds that it is in the interest of the United States to combat international terrorism, and that the present regime in Libya is aiding and abetting international terrorism.

(b) Notwithstanding any other provision of law, and effective 90 days from the date of enactment of this Act, no person subject to the jurisdiction of the United States may import, directly or indirectly, into the United States or its territories or possessions any crude oil extracted in Libya.

(c) The Congress calls on the President to (1) actively urge all nations, including our European allies and Japan, to strengthen their cooperation against international terrorism and (2) coordinate international measures to establish and maintain a total prohibition of all imports of Libyan oil, in order to bring to the earliest possible end the international terrorist practices of the current Libyan regime.

(d) The Secretary of the Treasury may prescribe regulations to carry out the provisions of subsection (a).

(e) For purposes of subsection (a)—

(1) the term "person" includes any individual, partnership, corporation, or other form of association, or any government or agency; and

(2) the phrase "person subject to the jurisdiction of the United States" includes any foreign subsidiary or affiliate of any corporation if nationals of the United States own, directly or indirectly, more than 5 per centum of the outstanding capital stock or other beneficial interest in such legal entity.

On page 84, line 4, strike out "Sec. 716." and insert in lieu thereof "Sec. 717.".

Mr. HART. Mr. President, on behalf of myself and our disinguished colleague from Massachusetts (Mr. KENNEDY), the distinguished Senator from Kansas (Mrs. KASSEBAUM), the Senator from New York (Mr. MOYNIHAN), and other colleagues, I offer today an amendment to address one of the most serious problems confronting this country and the world—the problem of international terrorism.

We have heard a great deal from the administration and other sources in recent weeks and months about the proliferating problem of terrorism, assassination, and political instability through other than acceptable political means.

We also know, as a matter of fact, that one of the principal sources for that spread of terrorism around the world is the Government of Libya and its leader, Colonel Qadhafi.

Several months ago, the late President of Egypt, President Anwar Sadat, referred to Colonel Qadhafi as a "certified lunatic." We may never know whether that opinion in fact led to President Sadat's death. But there is certainly reason to be suspicious, based on past actions that Colonel Qadhafi and others in his government have participated in—plots to assassinate President Sadat, members of the Government of the United States, other world leaders, and attempts to overthrow the governments in North Africa and the Middle East.

Yet in spite of all this, the United States continues to import oil from Libya. Indeed, the facts indicate that we are the principal importer of Libyan oil.

We are presently importing about 300,000 barrels of oil per day from Libya. We import about 40 percent of all the oil that the Libyans produce. And for that oil, we are paying a premium price—about $40 per barrel.

In round numbers this means we export over $4 billion annually from the United States to Colonel Qadhafi and to the Libyan Government.

There is no question that American dollars are being used to finance international terrorism and assassination.

In fact, recently, one of the leading papers in the country, the Washington Post, noted in an editorial that we are as the largest single purchaser of Libyan oil, and to use the words of the Washington Post, "financially speaking, the United States is the leading sponsor of Libyan adventurism and terror."

Mr. President, pure and simple, this is an intolerable situation. Regardless of whatever profits individual American companies may be making, the fact of the matter is that it is immoral for the United States of America to be financing international terrorism.

American imports of Libyan oil amount to about 2 percent of all the oil we consume. It amounts to about 5 percent of all the oil we import.

In all likelihood, given the continued waste and extravagance in our use of oil, this country can survive, pure and simple, without Libyan oil and survive very well. If need be, there are other sources of oil—even oil of a comparable quality to Libyan oil—including Nigerian oil from exporting countries in the Western Hemisphere, as well as other supplies from the Middle East that we could tap to make up whatever shortfall may exist after the cutoff of Libyan oil.

The amendment which is being proposed here today by myself and the Senator from Massachusetts, and our other cosponsors, would require our Government to terminate imports of Libyan oil within 90 days from the enactment of this law. It further calls upon the President of the United States to seek the cooperation of our other importing allies around the world, in joining us in banning their oil imports from Libya.

Even if the United States, as the principal purchaser and importer of Libyan oil, were to adopt its own import termination, we would still need the cooperation of our allies, to make such an embargo most effective.

Therefore, this amendment calls on the President of the United States to seek the cooperation of our allies, particularly the Germans, the Italians, the Spanish and other countries that are importing Libyan oil, to make this embargo as effective as possible.

In this case, unilateral action will not have the desired effect. But, at the same time, we cannot go to our allies seeking their cooperation unless we are willing to take the first step, and that is what this amendment requires. The United

States, as a good-faith effort to isolate one of the leading ringleaders of international terrorism, one of the most feared and despicable despots on the face of the globe, cannot go to our allies unless we are willing to take the first step and require the kind of international isolation that we should have to bring this individual to bay.

I am hopeful that our colleagues will take this amendment extremely serious, because that is the spirit in which it is being offered by the sponsors.

It seems to me, and I am sure it seems to the American people, an outrageous situation that day after day, week after week, month after month, and, for that matter, year after year, from their stronghold in North Africa, Colonel Qadhafi and his henchmen can launch strikes on our American military forces, launch assassination squads into Egypt, can intimidate governments in North Africa and the Middle East, and do so with American dollars.

There comes a point where some principles and some interests are more important than pure economics and pure profits, and this seems to me to be a clear-cut case of one of those cases. What does this country stand for? Do we stand for profits over morality? Do we stand for supporting terrorism over what is right? Or do we stand for leadership over expediency? Do we stand for something pure and simple? We have a chance here to demonstrate some leadership both to the American people and the people of the free world.

The administration and Members of Congress now have an opportunity through this amendment to take a real step against terrorism.

There has been much talk in these halls about the awful events of recent months and now something must be done. We ask the CIA to look into it, we ask the FBI to look into it, and we ask the President to look into it. We ask the Defense Department what can be done. But we go on sending billions of American dollars to Colonel Qadhafi.

Let us take the first step. Let us take the most immediate and obvious step and cut off a principal source of funds.

One can argue that we have not held hearings on this subject. I wish we had. It has been a situation that has been going on for quite some time. Obviously, the committees of Congress, not just the Foreign Relations Committee, but Armed Services Committee and other committees, have been perfectly free during this period of time to look into this matter and to get testimony.

But since this has not been done, Mr. President, it seems to me that this amendment is a clear-cut, almost black-and-white situation. Will we continue to export American dollars for terrorist oil or will we stop it? Here is a chance today to make a stand, to cast a vote, and to do what is right.

Mr. President, I hope the distinguished managers of this bill will support it. I hope the administration will support it. Former President Nixon, based on his recent travels in that region, called for a total boycott of Libyan oil. Others, of different political persuasions and different backgrounds, have done the same thing.

I think we should have a free and full debate of this issue by the Senate, answer the questions, and then vote this amendment up; send a signal from the Halls of the Senate and of Congress today that we are serious about dealing with this problem of terrorism. It is not an abstract problem. It led to the assassination of one of the most distinguished leaders in the world community in recent years, President Sadat. It has led to assassination attempts on other world leaders and the attempted overthrow of other governments.

Terrorism leads daily, almost hourly, to assassinations in various parts of the world, many of which are supported by Colonel Qadhafi, and financed by our dollars.

Do we want to tolerate that? Do we take the expedient course? Will we procrastinate and delay, saying that we need to hold hearings, we need to look into it, we need to get the administration's point of view, or will we take the stand and vote for this amendment?

Mr. President, I know my colleague from Massachusetts (Mr. KENNEDY) is concerned. He is a strong supporter of this amendment. I want his views to be made known.

I ask unanimous consent that recent articles from August of this year printed in the Los Angeles Times be printed in the RECORD where distinguished writers, who have researched this point, indicate that at one point Qadhafi tried to assassinate the American Ambassador to Cairo, and he had ordered attempts on the life of Sadat.

Qadhafi has supported with cash or arms the Basque and Corsican and other separatist movements throughout Europe.

He has ordered Libyan dissidents residing abroad eliminated, and I would say here, parenthetically, Mr. President, that one of those dissidents resided in my own State of Colorado, as a student at Colorado State University. Responding to a knock on his door several months ago, he opened that door to meet a pistol and be shot several times in the head, and almost lost his life.

Since then the assassin or alleged assassin has been apprehended and now is standing trial in my State for that assassination attempt, and that individual has clear connections to the Government of Libya.

Finally, as this article pointed out, Qadhafi has moved his army into neighboring Chad; and Libyan maps show part of other neighboring countries, such as Algeria, as part of greater Libya.

Mr. President, let us take this step. Let us begin the process of isolating Libya. Let us demonstrate our leadership. Let us send a signal to the people of this country and the free people of the world that the United States is not going to pursue expedient policies but is going to stand for moral principles.

I yield the floor to my distinguished colleague from the State of Massachusetts and others who may wish to be heard in support of the amendment, and I again ask unanimous consent to have these articles printed in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Los Angeles Times, Aug. 23, 1981]

REAGAN AND QADHAFI: HIGH NOON IN THE SKIES: LIBYA'S STRONGMAN MUST BE RESTRAINED

(By Charles William Maynes)

WASHINGTON.—You don't have to agree with the Reagan Administration's overall approach on key issues to admire its tactics. It retreats when the opposition is too threatening. It moves decisively when the target is small, unpopular and manageable. Both the continuing conflict with the air controllers and the new crisis with Libya, different as they are, fit this pattern.

Thus in July when the President faced a strike by 600,000 postal workers, who are barred by law from striking as are the air controllers, the Postal Service quietly capitulated and offered its employees an uncapped cost-of-living adjustment. Then came the challenge from the air controllers. This time the decision was to point out to the American people the no-strike pledge of the air controllers, who number only 12,000, and to hit their much smaller union as hard as possible.

The approach toward international terrorism has been similar. The day after the inauguration, Secretary of State Alexander M. Haig, Jr. announced that the Administration would give priority to the fight against terrorism. He lashed out against the Soviet Union for "training, funding and equipping" international terrorists. The President followed up the next day with a blistering attack on Soviet leaders for the "promotion of world revolution" and for reserving "unto themselves the right to commit any crime; to lie; to cheat, in order to obtain (revolution). . . ."

But as did the postal workers, the Soviet Union benefited from Administration concern that the target sighted was too big. The Administration retreated and repealed the grain embargo. Now smaller Libya is also being shown the eagle's claws.

In the case of Libya, the Administration will probably succeed because it has chosen the right target, even if it may have gone unnecessarily out of its way to court confrontation. Libya's strongman, Moammar Qadhafi, does represent a new problem for the international community, for which a solution must be found. That problem, in brief, is what should be done when a country critical to international stability, in effect, runs amok because of its leader's policies.

The international community has always faced this problem with a few key countries. For two centuries the question of who ruled Germany has been key to the future stability of Europe and world peace. The difference between now and then is that in an interdependent age there are so many more countries that can affect the stability of others. Who rules Iran is almost as important as who rules even major European countries.

In the case of Libya, the dilemmas of interdependence reach the point of absurdity. The vast country of less than 3 million people holds hundreds of millions at bay because the quality of its oil is ideal for gasoline production and because it supplies a critical share of the U.S., Italian and German markets.

The President may order Libyan planes shot down in order to defend the principle of the freedom of the seas but 2,000 U.S. oil workers, although urged by their government to leave, remain in Libya, each one a potential target for revenge.

Some people contend that Qadhafi is crazy. Egypt's President Anwar Sadat maintains the Libya's strongman is "100% sick and possessed of the demon." And Sudanese President Jaafar Numeiri says that he has "a split personality—both evil." What is clear is that he is dangerous.

At one point, Qadhafi appears to have tried to have the American ambassador in Cairo assassinated; he has ordered attempts on the life of Sadat, and he has supported with cash or arms Basque, Corsican and other separatists throughout Europe. He has ordered Libyan dissidents residing abroad eliminated. He has moved his army into neighboring Chad. Libyan maps show parts of other neighboring countries, such as Algeria, as part of greater Libya.

Regrettably, the rule of law plays only a marginal role in international affairs. When a state such as Libya shows no respect for even that margin, there is justification for the resort to force. Consequently, the Administration's show of force on the high seas *off* Libya deserves the benefit of the doubt even from America's detractors. Indeed, one of the key issues facing Northern Africa and the Middle East is who should discipline Qadhafi. The question now facing the United States is. Should it be America?

The Carter Administration was perhaps too quick to say no. It rejected for unclear reasons even such measures as severing diplomatic relations with Libya. This Administration may, by contrast, be a little too anxious to answer yes. Having all but formally severed relations, it may now be looking for more forceful, next steps.

But the politics of the developing countries are not as single-minded as those of this Administration. Despite the incredible record of abuse which Qadhafi's Libya has managed to establish against neighboring states, the Administration, if it moves too precipitously, may find to its astonishment that developing countries will rally to Libya's side, especially if Qadhafi can portray himself as another Third World victim of "Western aggression." And if the Administration "unleashes" Sadat to move against Libya, it may find that it has only weakened the Egyptian leader. After all, in World War II even Rommel was finally defeated because the German logistical lines across the Libyan desert were too difficut to maintain.

If the Administration wants to discipline Qadhafi, the key is not unilateral American action or greater American dependence on Sadat, already bearing a heavy burden for the United States. Rather, America must alter its policy toward two key countries in the region. Algeria and Nigeria. Properly supported and encouraged, they would be in an excellent position to join Egypt in containing Qadhafi's ambition. A watchful Algeria, for example, would not only provide a western buffer against Libyan expansion, but would also make Qadhafi wary of engaging Sadat in the east, lest he end up fighting on two fronts. Similarly, Nigeria would not only be able to check any southward Libyan movement, but also could use its substantial prestige with other black African nations to oppose Libyan meddling. Unfortunately, with both Algeria and Nigeria the Administration has made grave errors, seriously violating an unstated law of international politics: Always remember the question, "What have you done for me lately?"

One of the Administration's first actions in the wake of Algeria's assistance in resolving the Iranian hostage crisis was to make it clear that our principal friend in North Africa is Algeria's neighbor and rival, Morocco. Through arms shipments, constituting a reversal in traditional U.S. policy under both Democratic and Republican Administrations, the new team went out of its way to make clear that it felt no gratitude toward the Algerians. Indeed, it seemed anxious to stress the point.

In the case of Nigeria, the one black African country that can counter Libyan actions in Chad, the President got off on the wrong foot by suggesting during his campaign that of all the African countries, the United States has a special obligation to South Africa—allegedly because of the role it played in World War II. In fact, many of South Africa's more important current or recent leaders were then either in jail or under suspicion as Nazi sympathizers. Moreover, Nigeria may feel that the United States also incurred a special obligation to it in 1973 when Nigeria defied an Arab oil boycott against the United States, and continued to supply America much of its imported oil.

The test for the Reagan Administration now is one of focus. Unlike the crisis in El Salvador, the Administration has not identified the wrong target or uncovered misleading information. Qadhafi does need to be restrained. The debate must now determine how to accomplish this. Is the Administration, through the totality of its policies in the area, particularly toward critical countries like Algeria, making it more difficult to do with others what clearly can be done only with enormous cost alone? The answer to that question will determine whether this latest crisis will be a success or failure for the Reagan Administration.

REAGAN AND QADHAFI: HIGH NOON IN THE SKIES: OIL AND TERROR ARE HIS MAJOR EXPORTS

(By Don Schance)

CAIRO—"We in Libya are terrorized by the presence of the American fleet in the Mediterranean—This is real terrorism," Libya's Moammar Qadhafi told an American interviewer a few weeks ago.

The remark was not particularly prescient on the part of the eccentric leader of the oil-rich desert country, who could not then have foretold Wednesday's clash of American and Libyan fighter planes over the Gulf of Sidra. Countering complaints that Libya supports terrorists by accusing the United States of terrorism, in the Mediterranean and elsewhere, is an old theme with the "brother colonel," as he encourages Libyans to call him.

But it is the theme that goes to the heart of the hostility underlying U.S.-Libya relations. Qadhafi airily dismisses the element of terror implicit in Libya's financial support of "national liberation movements" in 40 or more countries, the fielding of hit squads to assassinate Libyan dissidents abroad and overt attempts to destabilize and overthrow the regimes of neighboring states.

To the quixotic Bedouin whose actions in almost 12 years as undisputed ruler of Libya have ranged bewilderingly from naive to cunning, the international defense obligations of the United States are terrorism on a massive scale, while Libyan activities are nothing less than a moral imperative.

Few countries in the Middle East or elsewhere accept his argument and even those that do, such as Iran, question why Qadhafi does not apply the same yardstick to the Soviet Union, with whom his warm relations include the purchase of $12-billion worth of military equipment. Egyptian President Anwar Sadat's public distaste for Qadhafi is shared, if not uttered aloud, by many others in the region, including Saudi Arabia, which the brother colonel last week pledged to "liberate" from "those who have dollars and live in palaces."

To the Saudi royal family, which still suspects that, Qadhafi had a hand in the seizure of the Grand Mosque at Mecca by Muslim fanatics in 1979, and to other Arab regimes as well, the Libyan leader's penchant for meddling in the affairs of other countries has raised an enduring specter of internal unrest and possible revolt.

But it was Libya's harboring of international terrorists and hijackers and his financing of guerrilla groups as far afield as Northern Ireland and the southern Philippines that soured U.S.-Libya relations almost from the beginning of his regime.

Although commercial relations remained intact and the United States continued, as it does today, to buy about 40% of Libya's annual oil exports, Washington long ago adopted a policy of rejecting Libyan purchases of military goods as a device to pressure the Libyan leader into conforming to international norms.

One of the sorest points in the deteriorating relationship during the 1970s, from Qadhafi's point of view, was American refusal to permit delivery of 12 Lockheed C-130 military cargo planes that Libya had bought and paid for. Washington pointedly told him on a number of occasions that when Libya forswore support of terrorism the aircraft would be released.

As Qadhafi expanded his adventures abroad, political relations with the United States continued in a nose dive that many thought had reached its nadir in 1979, when Libyan mobs stormed and burned the American Embassy—long since reduced to the status of a non-ambassadorial mission—in Tripoli. Washington responded by withdrawing its diplomats. And the nose dive continued.

Last year, Qadhafi demanded the "physical elimination of the enemies of revolution abroad." At least eight and possibly 10 murders of Libyan dissidents followed in London, Rome and Athens and two murders of Libyans in the United States appear to have been Tripoli-ordered as well.

During the same period the Libyan leader sent troops into Chad, which for a time he threatened to annex. The move triggered a state of high anxiety among neighboring African nations, which have taken seriously Qadhafi's expressed hope of overturning their governments and establishing a new revolutionary Sahel nation that would span central and North Africa from Sudan to Mauritania.

In Washington, four Libyan diplomats suspected of planning assassinations were expelled after the FBI and police seige of the Libyan "people's bureau" (embassy) in May, 1980, and the remaining 27 members of the discredited mission were finally told to leave the United States last May as the result of "Libyan provocations and misconduct, including support for international terrorism."

Against that background, the presence of the American 6th Fleet well off-shore in the Gulf of Sidra, while doubtless annoying to Libya, would hardly seem to qualify as the terrorism Qadhafi claims it to be.

The PRESIDING OFFICER (Mr. PRESSLER). The Senator from Massachusetts.

Mr. KENNEDY. Mr. President, I want to commend the Senator from Colorado for introducing this amendment, and I welcome the opportunity to join with him on this important issue.

He has stated very well what I believe is an irrefutable case in support of this amendment. I would like to take just a few moments of the Senate's time this afternoon to speak in support of this amendment. I am extremely hopeful that we can gain a vote on this particular measure, as is Senator HART.

The time has come for the United States to set an example for the world community by taking the urgent action to disassociate ourselves from the terrorist regime in Libya. At this time of tension and tragedy in the Middle East, the United States should not conduct itself in any way that contributes to a regime committed to violence, assassination, and other acts of international terrorism.

Each day, however, the United States pays vast amounts to Libya for oil—over

$7 billion in 1980, over $4 billion through July of 1981. It is unconscionable that dollars from the United States are used to finance the worldwide campaign of terrorism and violence conducted by the Government of Libya.

The amendment that Senator HART and I are offering will prohibit all purchases of oil from Libya by the United States by U.S. firms or by U.S. citizens. It will thereby end all U.S. imports from Libya—over 99 percent of our total imports from that nation. The prohibition in the amendment will take effect 90 days after enactment.

The United States has already pledged military supplies and support to Israel and other nations in the Middle East threatened by Libyan terrorism and subversion. The administration has called upon the 2,000 American civilians and their dependents now in Libya to leave that country as soon as possible. I support these actions. But we must do more. We must put our own house in order, by recognizing that U.S. dollars for oil are being misused to finance the epidemic of Libyan terrorism.

Mr. President, it is immoral and inexcusable for the United States to be the world's largest customer for Libyan oil. Colonel Qadhafi and his lieutenants are working with the PLO and other terrorists to destroy the State of Israel. They are sponsoring and funding assassination attempts in the Middle East and in Europe, and even if the United States.

We mourned when President Sadat was assassinated in Cairo. But the PLO did not mourn. Colonel Qadhafi was the first foreign leader to acclaim this cold-blooded murder. He saluted this cruel act on national television. He promised to welcome and shake hands with the assassins if they came to Tripoli.

Libya today stands condemned by the actions and the words of its own leader. Its government should be an outcast among all the nations of the Earth. It is time for us to sever the oil pipeline that pours billions of American dollars into the Qadhafi arsenal. We know how Colonel Qadhafi uses our oil payments. He is a brutal dictator who spends American money to purchase the Soviet weapons, to assault and plot against America's friends in the Middle East, even to attack American pilots over international waters in the Mediterranean.

We should not pay one cent to Libya for oil until it halts, once and for all, its sponsorship and its financial support for violence around the world. American industry and American homes should not be fueled with oil tainted with the blood of Libyan terror.

It is also time for the administration to demonstrate its opposition to international terrorism by persuading our friends and allies to shun Libya as well. As President Reagan has said, a coordinated international approach is important if we are to succeed in isolating Libya.

But someone must take the first step in establishing a sane policy toward this insane regime. And we can now take that step here in the Senate. We can take the lead in confronting and isolating the terrorist regime in Libya. So long as we continue to buy Libyan oil, we are acquiescing in Libya's acts of violence and contributing our dollars to their treasury of terror.

We must carry out the courageous legacy of President Sadat, who took bold steps toward peace and stability in the Middle East. In this dangerous and unsettled time, we must do more than express our outrage against the outlaws of Libya.

The issue before the Senate is clear. It is time to act, not just talk, against terrorism wherever it exists. We must state the truth that the Government of Libya is in violation of the most basic canons of decency and justice in the world. We must stand up and speak out for peace and humanity. Above all, we must never consort with those who condone violence and murder in international affairs.

Mr. President, I ask unanimous consent that a recent Washington Post article by G. Henry Schuler, which calls for a U.S. oil embargo against the terrorist regime in Libya, be printed at this point in the RECORD.

There being on objection, the article was ordered to be printed in the RECORD, as follows:

AVENGE HIS DEATH BY ISOLATING LIBYA

(By G. Henry M. Schuler)

As barbaric as it may appear on our television news, Col. Muammar Qadhafi has ample cause to gloat these days. The assassination of President Sadat has removed a second target from his publicly proclaimed list of leaders accused of betraying the Arab and Islamic cause by cooperating too closely with the United States. The first was struck from the rolls almost two years ago with the overthrow of the shah of Iran.

Anwar Sadat and Mohammed Reza Pahlavi are gone, but must they be forgotten by the United States after the eulogizing and handwringing are over? Only if we are prepared to accept the demise or capitulation of additional targets on the list.

Can we risk the consequences for our strategic and oil interests of hostile regimes at the entrance to the Mediterranean, on the narrowest choke point at the Straits of Sicily, on the Red Sea across from Jeddah, on the coastal Horn of Africa near the Straits of Hormuz and in the energy heartland itself?

If not, then we would do well to reassess the best way to assist King Hassan of Morocco, Presidents Bourguiba of Tunisia, Numerli of Sudan, and Barre of Somalia and the monarchs of the Arabian Peninsula who are all on Qadhafi's list.

Some will contend that this apocalyptic forecast overstates the importance of Qadhafi, but that has been offered as an excuse for ignoring him for over a decade. It is time to admit the truth which is so unpleasant to a myriad of Western interests. Full details about the assassination will not be available until after Sadat's presumed successor, Hosni Mubarak, has consolidated power. And we may not know the assassins' links with certainty even then. But there can be no doubt that they received some degree of support or encouragement from Libya.

Qadhafi's guilt does not depend upon evidence tying the assassins to renegade Egyptian Gen. Saadeddin Shazli's headquarters in Tripoli or to the numerous cells of youthful Islamic fundamentalists which Libya has trained, armed and funded. Qadhafi is no less culpable if the assassination was executed by Egyptian zealots who had no Libyan contact other than the steady stream of religiously couched anti-Sadat invective from a clandestine radio station established in eastern Libya as long ago as 1973.

To be sure, Western sophistry can be employed to obscure these current facts and ample evidence of prior threats and attempts. But we fool only ourselves, not the countries of the Middle East where perceptions are as important as reality.

Unfortunately, intimidation works except in those exceedingly rare individuals like Anwar Sadat. Therefore, Qadhafi's gloating is more than offensive to our humanitarian instincts . . . it is threatening to our geopolitical interests.

Sadly, we can do nothing to prolong Sadat's life, but we can at least take steps to minimize the threat of intimidation presented by his death.

The Reagan administration made a start some months ago by condemning Libyan subversion, a stand long preached to deaf ears by the late Egyptian president and his colleagues. But condemnation may prove to be the easy part because the opportunities for damage control have been limited by years of drift.

Egypt's tragic experience serves to remind us that the United States can provide little internal security assistance at the muzzle end of the weapon of international subversion. Yes, we can sell massive quantities of sophisticated military equipment to Sudan and other target countries, but this will never stop determined assassins, and may, in fact, encourage unrest by raising the American profile and presence.

Similarly, we can suggest a willingness to intervene with our own forces as President Reagan did last week. But such ill-defined pledges risk further alienation while possessing little credibility in the presence of American oil installations and employes who could be seized as hostages long before American forces could be deployed.

We can also hope that the social, religious and economic problems endemic to the region be resolved. But their solution is way outside American control.

Finally, some argue that we can enhance regional stability by abandoning the policy for which Sadat died, but that only serves to reward the intimidators without satisfying their non-negotiable demand for the abandonment of Israel.

If there is little we can do at the muzzle end of international subversion, then we must turn our attention to the breech end of that weapon. In other words, we must attempt to interdict the funding, arms and propaganda at their Libyan source.

The prospects for a direct Egyptian assault on the Soviet-armed Libyan fortress are not promising. The United States would gain little political mileage—let alone moral stature—by resorting to Qadhafi's own methods of clandestine assassination. But even if we cannot achieve an immediate or decisive interdiction of Libyan subversion by removing Qadhafi, we can at least curtail Western support for his terrorist regime.

This can be accomplished by renouncing business-as-usual, regardless of whether that business is pumping Libya's oil, liquefying her gas, clamoring for her construction contracts, investing her petrodollars, meeting her import and technology requirements, consuming her petroleum or grasping for whatever other piece of that multi-billion-dollar pie we can get our hands on.

Admittedly, that policy will require unusual bureaucratic and corporate courage. But such a collective resolve would hardly rise to the level of Sadat's personal valor in journeying to Jerusalem and accepting the dying shah. If we are to instill courage in the moderates within the new Egyptian government, in other Arab states and even among the Libyan population, the United States and its allies must break the commercial links which finance Qadhafi and create his aura of invincibility.

Much of this disengagement will proceed from events, but the administration can begin by putting some muscle behind its request to American companies to withdraw their several thousand American personnel from Libya.

The companies profess to want an unequivocal order before they risk the shutdown of Libya's petroleum industry, an embargo on its exports to the United States, the nationalization of their remaining assets and the possibility of jeopardizing those personnel.

It is far from certain that they would be happy with such a clarification, but we should recognize that the State Department is equally reluctant to accept responsibility and perhaps government liability. So the companies ignore State's widely publicized request, and Qadhafi and his erstwhile imitators are reinforced in the conviction that the capitalist world is more enticed by Libyan oil and profits than it is repelled by his support for terrorism and subversion.

The administration is far from helpless in this intolerable situation. With no diplomatic representation in Libya and a military encounter only just concluded, State has every justification—even responsibility—to declare American passports invalid for Libya. A similar step was taken during the hostage seizure in Iran, but surely State does not have to wait until hostages have already been seized.

There are, of course, risks. Perhaps a highly visible withdrawal would precipitate the hostage situation which it was designed to avoid. But will waiting make it any less likely, given the confrontation course upon which Qadhafi is embarked?

It is far more probable that such an action would lead to nationalizations, but there are legal remedies—albeit weak ones—and, ultimately, the United States government may have to provide compensation anyway for assets jeopardized for strategic interests.

Although withdrawal of personnel would be designed to protect American citizens and to give the administration greater freedom of action to deal with future provocations, it would also affect Libya's oil industry.

We don't have to attribute indispensability to American technicians in order to recognize that their absence would hurt Libya. Many of the ablest Libyans have fled the repressive regime. It will be difficult to replace either nationality with British, French or Italian technicians, for the oil industry is booming everywhere and Qadhafi's outbursts have not been aimed solely at the United States over the past 18 months. Nor are Soviet technicians a real alternative, for they have their hands full with Russia's oil production problems and are unfamiliar with the American equipment and techniques generally employed in Libya.

Thus, Libya's oil production could wind down, and its extremely complex gas liquefaction would be likely to shut down completely.

But even if Libyan oil sales were not interrupted by production problems, the withdrawal of personnel would likely prompt an embargo of shipments to the United States, which ran at a level of 570,000 barrels per day during the first six months of this year.

But an oil embargo might not be all bad, for our third largest supplier is also our most expensive. At a landed cost of $40.53 per barrel, the United States paid Libya well over $2 billion for a half year's imports . . . enough to purchase a lot of Soviet arms and fund plenty of subversion.

Although it has been argued that we cannot do without Libyan oil, that argument tends to disappear when, as now, the Libyans price it at an unrealistically high level. An embargo would certainly hit different refiners in different ways but that is an argument for arrangements to share sweet crude, not an argument for perpetuating disproportionate dependence on Qadhafi.

There is, however, another view of the oil supply relationship—Libya's. Libya sold 40 percent of its oil to the United States during the first half of 1981. In the currently slack oil market, it is far from certain that Libya could readily find alternative markets for its high priced oil. Libya's crude is better suited to American than to European product slates. Moreover, market considerations which harm Libya might be reinforced by diplomatic representations to allies in the industrialized nations, and the moderate Middle Eastern producers, all of whom have an even greater interest in regional stability than we do.

We must undertake urgent efforts to stop subversion at its Libyan source by abandoning 12 years of a business-as-usual relationship with the Qadhafi regime. No one would argue that those efforts are costless or riskless but the hardships pale by comparison to those incurred by a continued drift which encourages Qadhafi to work his way down a list of target countries. We cannot bring back Anwar Sadat, but neither can we permit him to have died in vain.

Mr. KENNEDY. Mr. President, I believe that the case has been clearly stated by Senator HART and myself, and the references to particular acts of Libyan terrorism are compelling. But these are not only findings of Members of the Senate. The Reagan administration has also come to the very same conclusion in their evaluation of the government of Libya.

This May, the State Department closed the Libyan Mission in Washington. In closing the mission, the State Department cited "a general pattern of unacceptable conduct," and "a wide range of provocations and misconduct, including support for the international terrorism."

Also in May of this year, Secretary of State Haig stated, in a speech in St. Louis, that Libya's oil revenues "are almost exclusively diverted to the purchase of armaments, the training of international terrorists, and the conduct of direct intervention in the neighboring states of Northern Africa."

In briefing the press on the speech, a State Department spokesman called Libya "the patron saint of terrorism."

Mr. President, we will be spending millions of dollars in military aid and assistance to Tunisia, Sudan, and Morocco in order to permit those countries to resist Libyan terrorism.

Mr. President, to sum up, what we are talking about is basically an outlaw regime, headed by an international renegade.

There is a clear inconsistency in U.S. policy. On the one hand, we condemn terrorism as a part of foreign policy; on the other hand, we condone terrorism as a part of our energy policy.

What our amendment is attempting to do is to provide some consistency in condemning terrorism, not only as a matter of foreign policy, but also as a matter of energy policy.

It is immoral and inexcusable for the United States to pay billions of dollars a year for Libyan oil. The fact of the matter is: Our dollars speak much louder than words. Now is the time for us to take this clear and firm action.

Oil from Libya is tainted with the blood of Libyan terror, Libyan murder, and Libyan assassination. Unquestionably, Libya stands in violation of the most fundamental canons of decency and justice in the world.

For these reasons, Mr. President, I am hopeful that the amendments will be accepted.

Mr. PERCY addressed the Chair.

The PRESIDING OFFICER. The Senator from Illinois.

Mr. PERCY. Mr. President, I think the distinguished Senator from Colorado is quite right in saying that hearings have not been held on this issue. And it is an important issue. They have not been held in the Foreign Relations Committee and they have not been held in the Armed Services Committee.

To legislate as drastic an action as this—and I certainly would want to say that I associate myself with my distinguished colleagues in the way that they have expressed their revulsion at international terrorism as perpetrated by Libya. But to take a precipitous action which would, within 90 days, cut off supplies, which would cause the President to encourage other nations to join us without knowing at all what their reactions would be, would leave us possibly in a position where we were forcing ourselves to take an action that could be harmful only to the American public. It may have little or no effect because of the small proportion of oil that we import from Libya. And it might cause no action whatsoever on the part of other countries.

It would seem that the amendment is an important enough suggestion, and I certainly commend my distinguished colleagues for raising it. We should have brought it up before and this is a good way to do it, to orbit and to raise this issue. And I do fully support the goals of Senator HART, Senator KENNEDY, and other Senators who feel that we must as a nation begin to bring pressure to bear on the Libyan Government.

Its action in support of international terrorism, its efforts to obstruct peaceful settlement of problems in the Middle East, and its acts of hostilities against neighboring countries in Africa should all be condemned by the United States and by the international community.

I do not believe, however, that it would be wise for this body to take such a drastic measure as contained in the Hart amendment without careful analysis of its consequences. This would be the hearing process that very wisely Senator HART has said has not been held.

We should take into account what the effect would be. We should consult with other countries. We should work in concert wherever we possibly can, just as we have worked in concert in the event that force was to be used in other areas—not in Afghanistan, because force has been used there—but in Poland, certainly. And by working in unison with other countries we have sent an unmistakable message to the Soviet Union and force has not been used.

Our action and our power and our influence have been wisely used. But it was done with preparation, careful preparation, and in concert and close consulta-

tion with other countries around the world.

And the action of the Soviet Union in Afghanistan, though it was a precipitous one, and though our embargo of grain and our boycott of the Olympics did not have as much effect as we would have liked it to have had and finally had to be taken off because so many countries did not move with us, we do know in the case of Poland, we have enough assurances, and the Soviet Union has enough assurances, that certainly action will not be taken.

Libya produces a very high quality sweet crude. It is much in demand in the world. If we unilaterally embargoed Libyan crude, we might well find that American companies could be evicted from Libya and the price of our crude imports increased, while decreasing to industrial competitors and revenues to Libya remaining unchanged.

I would remind my colleagues that the experience with unilateral embargoes has not been a very happy and successful one. And all of our objectives and goals here should aim at success when we move against a tyrant and a power in the Middle East that has been totally disruptive so far as the peace and well-being and tranquility of that area are concerned.

At this time I yield to my distinguished colleague from Maryland (Senator MATHIAS) and I think I would offer a suggestion.

Mr. MATHIAS. I appreciate the courtesy of the chairman of the Foreign Relations Committee. I had some concerns about this amendment that I would be glad to have the views of the chairman and of the author of the amendment on.

I tend to be very sympathetic with the purposes of the amendment. In fact, I may ultimately agree with the means by which those purposes are to be achieved.

But my mind does go back to the tragic events of a year or so ago in Tehran when we had the officials and employees of the American Embassy in Tehran held hostage for an extended period of time. We are dealing with an emotional part of the world; a part of the world which has been accurately described by the Senator from Massachusetts. And I think that raises some question about the status of 2,000 Americans who are now in Libya.

I am wondering if the author of the bill or the chairman of the committee could advise us exactly what the status of those Americans now is.

Mr. HART. Mr. President, I would be glad to respond. There are approximately 2,000 American citizens in Libya. They are principally employees of the American oil companies operating there and oil equipment contractors.

The State Department informs me that written notices were published and mailed to all Americans in Libya in 1979 and again as recently as May 1981, officially advising those Americans to leave Libya.

Further, as the Senator well knows, in recent weeks, since that second travel advisory warning, which is the standard governmental State Department approach that we follow, Libyan planes have attacked naval forces of the United States of America and have been successfully thwarted. I believe any American now residing there would be unaware of the tension, between our two nations. Any American can choose, if he or she so desires, to subject themselves to that kind of jeopardy. There is very little constitutionally that the Government of the United States can do to force Americans not to work in Libya. Presumably, these Americans, by and large, are there for economic reasons and have chosen to remain there for that same reason.

If, in fact, they continue to remain there, and the Government has warned them not to, it seems to me that we have gone a long way as a country, as a Nation, to discharging our obligations to those Americans.

I would also point out to the Senator from Maryland that he has the right to worry about a repetition of events which occurred in Iran a couple of years ago. But those events have already happened in Libya.

In Tripoli, the American Embassy was sacked and burned, at least with the acquiesence, if not the instigation of the Government of Libya. We have already suffered all the indignities we suffered in Iran. Fortunately, our official representatives to Libya have been removed. That, in and of itself, should be warning enough to other Americans.

Mr. MATHIAS. What the Senator from Colorado is saying to us is that we have 2,000 Americans who are there officially at their own risk. They have been warned by the U.S. Government to leave.

Mr. HART. Twice.

Mr. MATHIAS. But they have not. Does the Senator know how many of those are women and children?

Mr. HART. No, I do not.

Mr. MATHIAS. I do not either. But it seems to me that although these people might be said to know of the full risks of remaining in Libya under the conditions that we all know exist, yet if they end up in some form of confinement we are going to have a very serious problem.

I look up at the bust of Thomas Jefferson, who was faced with a situation in which American citizens were confined in Tripoli. We all know the action that the Jefferson administration felt compelled to undertake in order to put an end to that kind of harassment of American citizens of that generation.

I am not suggesting that that will necessarily happen, but I am wondering if the Senator has any information from either the State Department or other sources in Government as to what the official view would be of the reaction of Libya to the adoption of this amendment.

Mr. HART. The Senator from Colorado has inquired from agencies in the Federal Government and the administration to obtain a response to that question. I have not yet received any official statement of the administration or U.S. Government views on that, certainly none that I am at liberty to disclose in a public session.

I would just point out, however, that I share the concern of my colleague from Maryland, and the implication of that concern before this body it seems to me is as follows: Because Americans are in Libya and because those Americans have chosen not to remove themselves from Libya, for all practical purposes for economic and personal reasons, that places the Congress of the United States and the Government of the United States hostage already to Colonel Qadhafi and the Libyan Government.

What it says is that because Americans are there and have freely chosen to remain there, there is nothing we can do to terminate our financing of Qadhafi's terrorism, and so long as those Americans, or any portion of them, choose to remain there our hands are tied. By that logic, we become as much hostage as any object of that Libyan terrorism.

Obviously, this measure would have to pass the House and would have to be signed by the President before it became the law of the land. The fact that today the Senate of the United States, as one of the two Houses, took this action should further warn the Americans living in Libya of our intention and give them another opportunity to liquidate whatever interest they have there and get out. In the meantime, I do not think we can use the argument that the American voluntary presence in Libya ties our hands and prevents us from extricating ourselves from the intolerable situation of financing the assassination and the bloodshed of officials and innocent civilians of governments and countries around the world.

Mr. MATHIAS. I hear quite clearly what the Senator from Colorado is saying, and I also realize that we are under a kind of imperative here in this particular bill being debated by the Senate this afternoon, and we are at that point in the debate where it would seem appropriate to offer this kind of an amendment if it is to be offered at all. So there is a certain discipline of time which operates for the Senator from Colorado or any other Senator who wants to see some action of this kind taken. At the same time, I do not believe the options of a great nation are as limited as he describes them.

What happened in Tehran—and it is risky to try to analyze that situation knowing as little about it as we still do, with the record still not fully closed—what happened in Tehran as far as the public record indicates was that there was a lack of coordination within the U.S. Government on decisions that were being made that affected Tehran. There was some knowledge within the administration that the admission of the Shah of Iran for hospitalization in the United States would possibly create public disturbances in Iran. That was apparently widely known.

There was a decision made to admit the Shah to the United States for the purpose of receiving that treatment. There was, notwithstanding that knowledge, no notice sent to the Americans then in the Embassy.

So what was lacking was not options, not the ability to carry out a decision that was made by the United States, or

by responsible officials on behalf of the United States, but what was lacking was the coordination of all of our Members of carrying out and executing a policy once decided upon.

Had we made the decision that we did with respect to the Shah, had we consulted the proper officials of the State Department and other agencies of Government as to the steps that we should take and that flowed from that decision, what happened in Tehran might well have been avoided.

I am simply saying that as we approach this, and, as I said earlier, as I approach it with a great deal of common understanding and gratefulness for the Senator from Colorado, I would hope he would consider that we are dealing with a country as fanatical and organized to commit terrorist acts as the Senator from Massachusetts has described so vividly, and that we think a little bit about what happens on the assumption that a majority of the Senate agrees with the Senator from Colorado; that we begin now to coordinate our effort and not repeat the errors of the Tehran fiasco, in which a lack of coordination resulted so tragically in the incarceration of Americans in violation of international law, in violation of centuries of diplomatic usage, in violation of the Islamic code of hospitality, in violation of all the rules of decency and humanity. We have had that experience once. We ought not to risk repeating it.

Mr. HART. Let me briefly respond. I know my colleague from New York wishes to be heard.

No one, it seems to me, is more aware of the type of government and the type of society which Qadhafi represents than the foreign citizens who live there, including the Americans who live in Libya. It seems to me it would be almost impossible to be an American today in Libya and not know the excesses of that government and what those excesses can lead to in terms of the personal safety of Americans in Libya which is under the leadership of Colonel Qadhafi.

Qadhafi is a leader whose long terrorist arm can reach inside the borders of the United States, inside the State of Colorado, into the community of Fort Collins, and to the doorstep of a Libyan dissident student and have him shot. That is the kind of Government we are dealing with. I would be hard pressed to believe that any American in Libya does not understand that.

I also point out, as a practical matter, that the Senator from Colorado introduced this legislation as separate legislation less than 2 weeks ago. There was some press attention about that bill. Forty-eight hours ago, there was also press notification that this amendment would be offered to the foreign assistance bill.

The oil companies doing business there are, some of them, right outside the Chamber of the U.S. Senate, fully aware of this legislation and this amendment and they have had opportunity to notify their employees that it was going to be offered. I am as concerned about the safety and well-being of Americans in that country and other countries as any Senator, including the Senator from Maryland. But, Mr. President, at some point, we must take action in the interest of saving other lives in that part of the world and around the world by cutting off the source of funds by which those lives are being jeopardized.

I must say to my colleague and I say to all of our colleagues that every day we delay and wait to hold hearings and get administration witnesses and complete a record on this, the terrorism is going to continue. It is going to go on financed by American dollars. I think we all have to be aware of that.

I was asked recently, "If you feel this strongly about this, why did you not offer this legislation months or years ago?" I had to say I was wrong in not doing so. If someone wants to ask a question about this legislation, it is not why I act precipitately; it is why I did not do it a year ago or 2 years ago. That is the legitimate question.

I think a heavy burden is going to rest on the Senate of the United States to justify any delay in acting on this matter and I would not want the burden on my hands if we defeat this legislation and, a week from now or a month from now. Another Sadat is killed, another government overthrown or there is another terrorist act like the one at Munich in 1972, financed from Libya by American dollars.

Mr. MATHIAS. Mr. President, I hope that, as the result of the very signals that the Senator from Colorado has sent out, in introducing legislation and announcing that he was going to call up this amendment and in the discussion today, those agencies of Government which are charged with looking after the safety and security of American citizens wherever they may be—that is one of the boasts of this Republic, that we do have a concern for our citizens in every part of the world—those officials of Government charged with that duty will be on notice and whatever plans they have to contribute to the safety and the security and the return of those Americans, they will be prepared to act more expeditiously than they did in the case of Tehran.

Mr. KENNEDY. Will the Senator yield for an additional comment?

Mr. MATHIAS. Certainly.

Mr. PERCY. A parliamentary inquiry, Mr. President.

The PRESIDING OFFICER. The Senator will state it.

Mr. PERCY. Who has the floor?

The PRESIDING OFFICER. The Senator from Illinois has the floor.

Mr. PERCY. I shall be very happy to yield to my distinguished colleague. As I said before we got on this colloquy, we shall have a suggestion to offer. I commend my distinguished colleague from Maryland and will be happy to have any comments my colleague from Massachutts would care to make at this time.

Mr. KENNEDY. Mr. President, in relation to the discussion that has taken place between the Senator from Maryland and the Senator from Colorado, it is my understanding that the great majority of women and children have actually been evacuated from Libya after the warnings that were given by the State Department earlier this year. There are still, as I understand it, approximately 200 women and children, out of 2,000 Americans, who still remain in Libya. This is obviously a matter of concern to us all. I would just like to go back and underline a point that has been made during the course of this discussion. That is that the United States is not helpless in protecting its own citizens. I think there should be no misunderstanding, either by Colonel Qadhafi or by other leaders in that part of the world, that the United States is prepared to take whatever steps are necessary to protect its citizens.

It does seem to me, Mr. President, for that reason and the other reasons that have been offered here in support of this amendment, that it is entirely appropriate that we act on it now.

I thank the Senator.

Mr. MATHIAS. Mr. President, the Senator from Massachusetts gets my drift exactly, that if we are going to take this step for good and sufficient reasons, then those officials of Government who are charged with the responsibility to do what can be done should be doing it, not in the kind of muddle that existed prior to Tehran which resulted so tragically.

Mr. KENNEDY. The point I would like to make in response is that the President did not have any hesitancy about making comments about what the United States may or may not do in Saudi Arabia. I would think the lives and well-being of Americans in Libya would have the highest priority. I do not believe that we are defenseless in that part of the world.

Mr. PERCY. Mr. President, as the distinguished Senator has said, the United States is not without power. But I think in our particular role, we can exercise that power much more effectively if we do not do it precipitously, if we do not do it without consultation with our allies. This is the whole emphasis and the essense of a partnership, that we do not surprise completely as we did with Japan, when we opened relationships with the Peoples Republic of China, but we negotiate and talk with them. Obviously, our allies are on notice through the CONGRESSIONAL RECORD that this debate is being carried on.

It is one thing for a debate to be carried on in the Senate. It is another thing for the executive branch to actually take action. They have taken action in these areas before. But I doubt that they have moved with the kind of dispatch and the kind of high priority that is now being put on it by the Senate, and I join my colleagues in assigning high priority to this matter.

What I believe we should do is make certain, when we move, that we know what the consequences of our move will be, what adverse fallout there may be. But also, when we move, we should move in such a way that what we do is effective, does have power, does have impact, and causes the party against which we take such action to respond.

So I have prepared a substitute amendment which would express the sense of

Congress regarding the outrageous behavior of Libya, requesting the President to prepare a report on means of increasing political and economic pressure on Libya, both unilaterally and in concert with our allies.

Included in such a report would be the concept of restricting imports of Libyan crude.

Before sending it to the desk, I should like to read the substitute; and if there are any modifications or changes that any of my colleagues would suggest, or if anyone would care to join me in it, I certainly would entertain such cosponsorship. The amendment is simply this:

The Congress of the United States condemns the Libyan government for its support of international terrorist movements, its efforts to obstruct positive movement toward the peaceful resolution of problems in the Middle East Region, and its actions to destabilize and control governments of neighboring states in Africa.

The Congress believes that the President should conduct an immediate review of concrete steps the United States could take, individually and in concert with its allies, to bring economic and political pressure on Libya to cease such activities. Such a review should include the possibility of tariffs on or prohibitions against the import of crude oil from Libya.

I believe this can be taken up with considerable dispatch. This is not a new subject. The study would not take a prolonged period of time. It would give us the benefit of working in concert with the executive branch of Government charged with certain responsibilities in the area of foreign policy, and it would impose upon them the obligation to consult closely with their allies, to let them know of our deep concern, our intention to do something, to move forward and, it is hoped, to move forward in concert with them.

It would give us an opportunity to evaluate which methods would be the most effective, how we can assure the effectiveness of those, and work in a multilateral and multinational sense, which always has proved to be the far better way to act.

Again, however, I commend my distinguished colleagues for raising the issue, an issue which we have overlooked for too long. We must move forward on this issue. I commend Senator HART, Senator KENNEDY, and Senator MATHIAS for raising the questions they have raised.

I send the substitute amendment to the desk, and I hope to have the support of my colleagues on it.

Mr. HART. Mr. President, will the Senator withhold the submission of the amendment for a brief colloquy?

Mr. PERCY. Does the Senator want the amendment withheld?

Mr. HART. Will the Senator do that?

Mr. PERCY. I am happy to do so.

Mr. HART. Would the Senator be agreeable to a solution to this matter which would perfect the pending amendment to authorize a further delay of 90 days by the President of the United States of the effective date of the ban that is provided for in the amendment, if he certifies to Congress that such a delay is necessary to protect the lives of the Americans in Libya? That would provide the 90-day delay of the effective date of this cutoff of imports and then authorize the President another 90 days beyond that, if he certifies to Congress that the additional delay was necessary to protect the lives of Americans.

Would that be an approach that appeals to the Senator from Illinois?

Mr. PERCY. I would much prefer the working of the substitute amendment. This not only would take into account protecting the lives, and that would be a major part of the study, but also would give us adequate time to review all consequences of different actions. I hope the study would be done expeditiously.

Certainly the Foreign Relations Committee would see that we would ask for rapid handling of this urgent matter. It would be difficult to put an exact time frame on it, and I do feel that, to be really effective, we will have to be assured that we will not be operating in a vacuum.

I ask this question of my distinguished colleague: What proportion of the crude oil shipments of Libya is now purchased by the United States which would be cut off by this particular amendment that has been offered by the Senator from Colorado?

Mr. HART. At the present time, the United States, according to the Department of Energy, is importing about 40 percent of the oil exported from Libya.

Mr. PERCY. What studies have been made and what evidence could be given that this will be sufficient to cause Libya to change an international policy, or what alternatives are available, for which we have evidence, that they could sell this quantity of oil or a large part of it in world markets and therefore suffer no adverse effects?

If there were any possibility that they could get rid of this oil and move it someplace else and pick up the demand that we have imposed upon them for this oil, there is no question in anyone's mind that they would do that; and they would love the opportunity to simply demonstrate and prove that this unilateral action taken by the United States is not going to cause them to change their objective and would not have the adverse impact upon them that we would want it to have.

Mr. HART. The thought of the authors of this amendment in no way suggests that our refusal to pay Colonel Qadhafi for his oil is going to make a nice, gentle, nonterrorizing man out of him. He is insane. He is a lunatic. He was called a lunatic by the President of Egypt, who may have lost his life for saying that.

Every responsible governor in the region has so described him. President Nimeiri, of the Sudan has said that Colonel Qadhafi has a split personality, and that both personalities are evil.

Everyone who has had anything to do with him thinks he is either evil or crazy or both.

So I do not suggest—and I do not think any of the authors of this amendment suggest—that because the United States of America refuses to buy his oil, it is going to change his personality or his politics, and I would not want the Senator from Illinois or any other Senator to believe that.

Second, the Senator says it is important to be effective when you act in the international arena. I agree. But there is one thing more important than effectiveness, and that is morality. How can we go to the other governments of the world and say, "We would like your cooperation," when the immediate response they are going to give us is, "What are you doing about it?"

My point to the Senator from Illinois is that we will be most effective if we take this step. We can then go to the other major importers of Libyan oil—Spain, West Germany, and Italy—and be more effective in getting them to join us.

By demonstrating our willingness to pass over Libyan oil, I think our bargaining position will be improved with respect to our sister governments, the importing countries.

I agree with the Senator that one must deal effectively and one must deal with one's allies, and that is exactly the thrust of this amendment.

Mr. PERCY. As I interpret the comments of the distinguished Senator it is his hope that we could work some sort of a compromise out. I would certainly be very receptive to that. I would like to feel that whatever compromise is worked out is effective because once we shoot our wad and we say this is what we are going to do it is final. When we embargoed grain to the Soviet Union we very quickly learned that it was difficult to get other nations to follow. Some did and then they did not stay very long with this. It is much easier now dealing with Poland as we have reached agreements with our allies on joint action that we are all going to take. That is the principle that I wish to try to stay with. If it is at all possible to work out a compromise amendment that we can both agree on I would like to do that.

At this time I am particularly pleased to yield.

Mr. KENNEDY. Mr. President, if the Senator will yield for 1 minute. I believe it is also important to note that on the issue of U.S. imports of Libyan oil—of which the United States imports approximately 40 percent of total Libyan oil exports—now is the time to take the action that is suggested in this amendment. Today there is an international oil glut. Libyan oil is some of the highest priced oil in the world. They have difficulty selling it. That is why the amount that is imported from Libya has dropped significantly over the last year.

Second, I would certainly hope that this would be just the first step taken by the United States. The question has been raised about the potential danger to Americans in Libya. I hope that after this first step, that we are going to have action by the United States, throughout the international community, the United Nations and with our allies, to pursue a coordinated approach against Libyan terrorism. If we cannot be effective in an oil embargo against Libya, then the effectiveness of the United States is seri-

ously undermined. I believe that we can be effective. If there has ever been a legitimate reason to pursue such a course, this is it: International terrorism, murder, and assassination. If the United States is not going to stand up on this issue, then I do not see how we can expect to be the true world leader on other important issues, such as promoting racial justice in South Africa, or encouraging respect for fundamental human rights in the Soviet Union.

Mr. PERCY. I agree with my colleague that we can be effective. The question is what procedure should we use to be the most effective.

I tend to think we should begin to work out the beginning of something with a group of nations that tend to support us. Rather than saying "This is the action we unilaterally have taken, now you follow us," we should say: "We have a common problem, a common objective and goal, now what are your ideas? Here are some of the things we are willing to do. What are you willing to do?" I tend to think we will bring them together more quickly and more successfully that way than by our just taking a precipitate action.

Also I think in this regard when we do have an executive branch that would be charged with the responsibility of carrying out all of these negotiations, we are not prepared to suddenly drop all our plans here and rush off. In fact, there is a Smith Act that would prevent our doing that.

I think it would be well to do this in such a way that the administration would have enthusiasm for doing it and really have a feeling it would work. That is why I think it would be well for us to consult just a little bit now to see if we can work out a common compromise on this I am very happy to do so.

Mr. HART. I wish very much to do that.

While the Senator from New York is being heard I wonder if the Senator from Illinois will yield 10 seconds for a unanimous-consent agreement.

Mr. PERCY. I yield, of course.

Mr. HART. Mr. President, I point out to my colleague that this is a bipartisan amendment and I ask unanimous consent that the distinguished Senator from Texas (Mr. TOWER) who as we all know is the chairman of the Armed Services Committee be added as a cosponsor of this amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PERCY. I yield to my distinguished colleague from New York who has been very patient.

Mr. MOYNIHAN. I thank the chairman.

Mr. President, I believe it is the case that in the last generation the United States has been frittering away a rich inheritance of the 18th, 19th, and 20th centuries. I speak of the belief that the relations among States are governed by law, that this law is to be found in texts, and that these texts are relevant to discussions such as ours. Although deliberate and malicious disregard for international law lies at the center of our entire discussion, the subject of law has not been raised so far today.

I refer the Senate to the Charter of the United Nations, which is not only a treaty but a treaty that reflects traditional international law. The third principle of the organization, as expressed in article 2, is that—

> All Members shall settle their international disputes by peaceful means in such a manner that international peace and security, and justice, are not endangered.

The fourth principle holds that—

> All Members shall refrain in their international relations from the threat or use of force against the territorial integrity or political independence of any state, or in any other manner inconsistent with the Purposes of the United Nations.

Among the measures that the Security Council is entitled to take in response to such breaches of the peace is, according to article 41, the "complete or partial interruption of economic relations."

Mr. President, there has not appeared on the world scene in recent years a more flagrantly and assertively illegal regime than that of the present Government of Libya. It openly asserts its use of force against individuals in other states. It has most recently invaded its neighbor Chad and has set up a regime in Ndjamena, the capital there, that represents its interest and not those of the people of Chad.

This whole sequence has been met with a variety of responses by the nations of the world, none that center on the question of whether something illegal is happening here, and to do this is increasingly a normal thing. Members of the Senate will recall that it was a very long while after the seizure of the American Embassy in Iran before it occurred to anyone in the Department of State that this was a clear violation of international law and that the matter ought to be taken to the International Court of Justice. It was finally done and the Court issued a unanimous, resounding, and prompt condemnation of the act.

We do not know what we have lost if we lose the idea that international law is a norm and that individual countries have a responsibility to adhere to those norms and to enforce them by their own actions. In this case we will be taking action to enforce the rule of law in international relations by ceasing to trade with an egregious violator of that law I believe we must. I hope we shall. I urge the adoption of the amendment.

Mr. DECONCINI. Mr. President, I rise in support of the amendment of the Senator from Colorado.

I discussed this with the Senator when he was formulating this suggestion and this idea and I compliment him for taking the lead. It is something which I think is long overdue from the standpoint of where the United States is in not only the international arena but in the specific area of terrorist activities that are recognized throughout the world, and I only wish quite frankly that this effort was far greater than it is and that this amendment went even further.

I have discussed it and made some remarks about a total embargo and realizing the difficulty of that, unless our allies join, I hope that regardless of how this amendment might come out the administration would show some strong leadership in the international area in an attempt to negotiate with our NATO allies and other Western countries to find another source of petroleum, to cease all trade with Libya until we see some positive action by that country that indeed it is willing to live under a civilized society and rule of law which would permit countries to disagree with one another and would permit countries to pursue an effort of peace without the threat of terrorist activities.

This is something that is intolerable in today's world, and I cannot help but think that now is the time, as the Senator from Massachusetts pointed out a few minutes ago, economically it is a good time, from the standpoint of the glut in the world of oil right now. But really it should make no difference. There may be hardships if we were to enact this amendment and if it were to become law. But I think the American people, as they understand the situation, would join in an effort by this country to do something constructive and positive today or within 90 days, as the amendment calls for, from the enactment of the amendment into actual legislation, to cease our purchasing of oil and to move toward an effort that other countries would also do, hopefully soon.

Imagine if we were successful in securing—and if we could take the leadership role or anyone could take the leadership role—the Western World to cease trading with Libya even if only for a short time. It would send a message to any country that would promote the type of terrorism that they flaunt in the world press, in which they take national pride.

Maybe it will be the beginning of the end of this type of activity which, I think, is totally unacceptable to anyone who has any feelings about his fellow human beings, who has a desire to find a solution to problems and has a desire to let people work together in determining their own direction of their government and their societies without these threats of terrorists and the actual implementation of some of the terrorist activities that have gone on.

I ask unanimous consent that I be made a cosponsor of the amendment of the Senator from Colorado.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MITCHELL. Mr. President, I congratulate Senator HART on his amendment. It is high time that we take strong action against the terrorist activities of Libya and its leader, Colonel Qadhafi.

The problem was well stated in a recent Washington Post editorial: "As the single largest purchaser of Libyan oil, the United States is, financially speaking, the leading sponsor of Libyan adventurism and terrorism."

The fact is that the United States buys one-half of Libya's oil. In July of this year, that amounted to 287,000 barrels per day. On an annual basis, this means we are providing Qadhafi with $4 billion to finance his terrorist actions.

That Qadhafi is a destabilizing influence in international affairs is easily documented. He has continually promoted instability in countries friendly to the United States, such as Egypt, Saudi Arabia, and Israel. He ordered an attack on U.S. aircraft even though they were flying over international waters. The most recent example of his threatening role was his tasteless reaction to the assassination of the late Anwar Sadat.

Now is an especially opportune time to send a message to Colonel Qadhafi. The existing glut in the world oil market makes it less likely that Libya can find other customers for its oil exports.

Furthermore, the resulting decline in revenues for Libya could create significant domestic repercussions from which Qadhafi will not be able to isolate himself.

It is time for the United States to assume a leadership role. Under the Hart amendment, we would have 90 days to coordinate actions with other major importers to implement an embargo on Libyan oil. Once we have taken the first step, other nations which desire to curb terrorism should follow suit.

UP AMENDMENT NO. 494

(Purpose: To express sense of Congress concerning Libyan actions by the Libyan Government)

Mr. PERCY. Mr. President, I now send forward my substitute amendment and ask for its immediate consideration.

The PRESIDING OFFICER (Mr. GORTON). The clerk will report.

The legislative clerk read as follows:

The Senator from Illinois (Mr. PERCY) proposes an unprinted amendment numbered 494 to the Hart unprinted amendment numbered 493.

Mr. PERCY. I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

In lieu of the language proposed to be inserted by amendment UP 493, insert the following:

The Congress of the United States condemns the Libyan government for its support of international terrorist movements, its efforts to obstruct positive movement toward the peaceful resolution of problems in the Middle East Region, and its actions to destabilize and control governments of neighboring states in Africa.

The Congress believes that the President should conduct an immediate review of concrete steps the United States could take, individually and in concert with its allies, to bring economic and political pressure on Libya to cease such activities, and submit such a report to the Congress within 180 days of enactment. Such a review should include the possibility of tariffs on or prohibitions against the import of crude oil from Libya.

Mr. PERCY. The amendment has been fully read, it has been fully discussed, and I feel we would be ready for a vote on this amendment now.

If there are any further Senators who would like to comment on it I would be glad to yield to them. If not, I ask for the yeas and nays, Mr. President.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. HART. Mr. President, I ask for the yeas and nays on my amendment, as well.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. PERCY. Is that on the Hart amendment?

Mr. HART. We have not yet ordered the yeas and nays.

Mr. PERCY. The vote would follow the pending amendment, but the pending amendment is the substitute amendment.

The PRESIDING OFFICER. The Senator from Illinois is correct. The pending amendment is the amendment of the Senator from Illinois.

Mr. HART. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. HART. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HART. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. HART. Is it the case that the amendment originally offered by the Senator from Colorado and the Senator from Massachusetts is subject to a perfecting amendment?

The PRESIDING OFFICER. It is.

UP AMENDMENT NO. 495

(Purpose: To prohibit the importation of crude oil extracted in Libya)

Mr. HART. Mr. President, I send a perfecting amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will state the amendment.

The legislative clerk read as follows:

The Senator from Colorado (Mr. HART) proposes a perfecting amendment, unprinted amendment numbered 495, to unprinted amendment numbered 493.

Mr. HART. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the amendment of Mr. HART (UP 493) add the following:

PROHIBITION ON THE IMPORTATION OF CRUDE OIL FROM LIBYA

(a) the Congress finds that it is in the interest of the United States to combat international terrorism, and that the present regime in Libya is aiding and abetting international terrorism.

(b) Notwithstanding any other provision of law, and effective 90 days from the date of enactment of this Act, no person subject to the jurisdiction of the United States may import, directly or indirectly, into the United States or its territories or possessions any crude oil extracted in Libya.

(c) The Congress calls on the President to (1) actively urge all nations, including our European allies and Japan, to strengthen their cooperation against international terrorism and (2) coordinate international measures to establish and maintain a total prohibition of all imports of Libyan oil, in order to bring to the earliest possible end the international terrorist practices of the current Libyan regime.

(d) The Secretary of the Treasury may prescribe regulations to carry out the provisions of subsection (a).

(e) For purposes of subsection (a)—

(1) the term "person" includes any individual, partnership, corporation, or other form of association, or any government or agency; and

(2) the phrase "person subject to the jurisdiction of the United States" includes any foreign subsidiary or affiliate of any corporation if nationals of the United States own, directly or indirectly, more than 8 per centum of the outstanding capital stock or other beneficial interest in such legal entity.

(f) The President has the authority to postpone for 90 days the effective date of the oil import ban provided for in this section if he certifies to Congress that such action is necessary to protect American citizens in Libya.

Mr. HART. Mr. President, on behalf of myself, Senator KENNEDY, and Senator KASSEBAUM, the principal cosponsors of this amendment, the perfecting amendment is the language of the original amendment which we offered; that is to say, a complete elimination of imports of Libyan oil within 90 days of enactment of this bill, with the provisions calling for the President to consult with our importing allies to construct an international boycott of Libyan oil, with the additional feature which was to be proposed by the Senator from Kansas (Mrs. KASSEBAUM) that would provide for an additional 90 days for the President to certify to the Congress that that additional period was necessary to protect the lives of Americans in Libya.

So the perfecting amendment is the original amendment offered by the Senator from Colorado, the Senator from Massachusetts, and other colleagues with the additional provision which was to be proposed by the Senator from Kansas to give the President of the United States an additional 90-day period, if he found it necessary, to protect the lives of Americans.

I hope that the committee could support this modified approach. I urge the support of all of our colleagues.

Mr. MOYNIHAN. Will the Senator yield?

Mr. HART. I yield to the Senator from New York.

Mr. MOYNIHAN. Will the Senator have me listed as a cosponsor?

Mr. HART. Yes. I ask unanimous consent that the Senator from New York (Mr. MOYNIHAN) be added as a cosponsor of this perfecting amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PERCY. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. PERCY. If, when I move to table, as I will, the perfecting amendment, if the tabling amendment is agreed to, is the next pending business the Percy substitute amendment?

The PRESIDING OFFICER. The Senator is correct.

Mr. PERCY. Mr. President, I move to table the Hart perfecting amendment.

Mr. HART. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Illinois (Mr. PERCY) to table the perfecting amendment (UP No. 495) of the Senator from Colorado (Mr. HART). The yeas and nays have been ordered and the clerk will call the roll.

The legislative clerk called the roll.

Mr. MATTINGLY (when his name was called). Present.

Mr. STEVENS. I announce that the Senator from Colorado (Mr. ARMSTRONG), and the Senator from New York (Mr. D'AMATO) are necessarily absent.

I also announce that the Senator from Alabama (Mr. DENTON) is absent due to illness.

I further announce that, if present and voting, the Senator from New York (Mr. D'AMATO) would vote "yea."

Mr. CRANSTON. I announce that the Senator from Missouri (Mr. EAGLETON), the Senator from Nebraska (Mr. EXON), and the Senator from Hawaii (Mr. INOUYE) are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 33, nays 60, as follows:

[Rollcall Vote No. 318 Leg.]

YEAS—33

Abdnor	Grassley	Percy
Andrews	Hatch	Pressler
Baker	Hatfield	Randolph
Cochran	Hayakawa	Rudman
Danforth	Helms	Schmitt
Dole	Humphrey	Stafford

Ford	Moynihan	

ANSWERED "PRESENT"—1

Mattingly

NOT VOTING—6

Armstrong	Denton	Exon
D'Amato	Eagleton	Inouye

So the motion to lay on the table Mr. HART's amendment (UP No. 495) was rejected.

The PRESIDING OFFICER. The question is on agreeing to the perfecting amendment of the Senator from Colorado.

The perfecting amendment (UP No. 495) was agreed to.

Mr. PERCY. Mr. President, prior to that vote, I asked a parliamentary inquiry as to what the next pending business of the Senate would be. As I understood it, the next vote would be on the Percy substitute.

Mr. KENNEDY. Mr. President, may we have order?

The PRESIDING OFFICER. The Senate will be in order, so that the Senator from Illinois can be heard.

Mr. PERCY. Mr. President, prior to the last vote, I made a parliamentary inquiry—no matter what the outcome of this tabling motion would be—as to whether the next pending business was a vote on the Percy substitute. Is that correct? The answer given to me was in the affirmative.

The PRESIDING OFFICER. The Chair answered on the basis of the tabling motion carrying, and it did not carry. The question is now on the Percy substitute.

Mr. PERCY. I think the discussion has been completed on the Percy substitute amendment. We are ready for the vote.

The PRESIDING OFFICER. Does any Senator seek recognition?

Mr. HART. Mr. President, the amendment which was just adopted would prevent the United States from importing oil from Libya after a 90-day period, after the enactment of this into law.

In addition, that amendment was perfected to give the President of the United States an additional 90 days in his discretion, if he certified to Congress that an additional 90-day period were necessary to protect the lives of Americans in Libya. That is the amendment which was just adopted.

The distinguished chairman of the Foreign Relations Committee, the Senator from Illinois, is seeking to enact, as a substitute to that, a proposal that the administration study the question of American imports of oil from Libya and make recommendations as to administrative action to be taken with regard to American policy on the importation of Libyan oil.

I say the issue is a very simple one. Are we now prepared—and I think a majority of the Senate has indicated its commitment—to take steps to begin the process of ending American dependence on Libyan oil? In short, we are importing 300,000 barrels of oil a day from Libya, at a cost of more than $4 billion annually to the American people, and that money is being used as a principal source of financing for international terrorism.

That is why a large majority of the Senate has voted as it has; and we will place the Senate of the United States on record, if we defeat the substitute of the Senator from Illinois, as opposed to the American financing of Qadhafi terrorism. That is the issue.

I hope all our colleagues, on the vote that will now occur on the substitute, will remain consistent and vote against a proposal which would defer American action and Senate action on this issue, which would continue the process of American financing of Libyan terrorism, and would begin the process of cutting off that principal source of financing this very day. That is the issue. The issue is clear cut. Are we going to cut off this American financing of Qadhafi, or are we going to study the issue? That is the choice presently before the Senate.

Mr. PERCY. Mr. President, the issue is a very clear one, and there is no disagreement that we should do whatever we can to discourage in every way we can the hostile actions of Libya for its perpetrating international terrorism and for its efforts to obstruct a peaceful settlement of the problems in the Middle East.

The question simply is: How do we go about doing this? We can unilaterally rush in and cut off all oil in 90 days and then wait to see what the consequences will be.

My question is the same question asked by Senator KASSEBAUM, and that is why her last amendment was helpful, in a sense. The question is, What happens to a couple of hundred Americans who are in Libya? What happens to the oil companies there? Are they precipitately cut back? What happens when we cut off that source of supply? Is it available? Can they use it anyplace else, and do we just hurt ourselves in the meantime?

Should we, in this kind of case, be acting just unilaterally, standing up alone, saying that we are against terrorism and therefore we are going to take this action? Should we give the administration the chance to work with our allies, to work with other countries, to sit down, as my substitute directs them to do, and work with these countries to find out what we should do, what the consequences will be of this unilateral cutting off of oil? What is a better action?

We have learned that by taking unilateral action, we do not necessarily have people follow it. The essence of allies is to have a partnership so that those partners will feel that we are working with them, giving them an opportunity to be a party to this. Then, if we move in unison, as we have agreed to move in unison, I think we have a far better cause on our hands, such as we have in Poland. We have worked with our allies, with our friends, and they now know we are going to take uniform action, and that message has gone across to Moscow.

We should not take unilateral action, without consultation, without knowing what the consequences will be, and acting only on our own in a matter that affects the entire world and revolts the world. We should give them a chance, as my substitute does, directing the administration in 180 days to come back and report to the Senate that these are the consequences, these are the actions, these are our friends, these are our allies, this action unified will really cripple the economy of Libya—I think that is a far sounder and more prudent

and cautious method; and I believe it is more effective in possibly gaining the end result, and we all share the end result.

We want to send a strong message, and that message can be sent by having the administration directed to undertake this study.

As Senator HART has said, no hearings have been held on this issue, no committee has taken this under consideration. Perhaps we have been negligent in that, but just because we have not done something in the past, we should not now move precipitately ahead, not knowing what the consequences would be of this particular action or whether what we do will have any real effect.

The end objective is what we want. That is why I urge voting for the substitute that has been offered that will be greeted by the administration with enthusiasm, allowing them to move forward in parallel with Congress in an action that I think we all hold and the objectives of which we all hold in common. I believe we are ready for the vote.

Mrs. KASSEBAUM. Mr. President, if the chairman will yield for just a second, I wish to say, in response to his saying no hearings had been held, we did have a hearing in the African Affairs Subcommittee on the question of Libya's intentions particularly regarding the Libyan-Chad situation. At that time this issue was raised. I know it has been of concern to the State Department, and my own feelings have been that if we are asking other nations to stop trade with Libya then we must be willing ourselves to recognize the importance of this issue. We did discuss this in a hearing of that subcommittee.

There has been no indepth analysis, but there was certainly agreement that every effort should be made to reduce our imports of Libyan oil. That is the reason that I joined as a cosponsor in this effort because I felt some positive action finally had to be taken and I do think this with the 90 days extension protects the workers who are there and I think that was an important consideration.

Thank you.

Mr. PERCY. I thank my colleague.

Mr. KENNEDY. There are many important issues of American foreign policy that we have to address in this body. We have heard many statements and speeches, both by Members of this body and members of this administration, condemning international terrorism and assassination.

The Senate now has the opportunity to put the United States on a very clear path. The Senate now has the opportunity to state its view that continued international terrorism and assassination will not be funded with the money of American taxpayers.

Mr. President, I would hope that the amendment offered by the Senator from Illinois, which basically calls for a study, would be rejected and that the Senate would then go on record in support of the amendment of the Senator from Colorado.

What we are proposing is to conform our energy policy with our foreign policy. We condemn international terrorism and yet we condone the importation of Libyan oil. Let us have consistency in both. The Hart amendment permits it. We will be able to enact that policy by first rejecting the amendment offered by the Senator from Illinois and then supporting the amendment offered by the Senator from Colorado, which calls for a truly meaningful measure against Libyan terrorism.

SEVERAL SENATORS. Vote!

The PRESIDING OFFICER. The question is on agreeing to the substitute amendment of the Senator from Illinois. On this question the yeas and nays have been ordered and the clerk will call the roll.

The legislative clerk called the roll.

Mr. BAKER. I announce that the Senator from New York (Mr. D'AMATO), the Senator from Georgia (Mr. MATTINGLY), the Senator from Alaska (Mr. STEVENS), and the Senator from Virginia (Mr. WARNER), are necessarily absent.

I also announce that the Senator from Alabama (Mr. DENTON), is absent due to illness.

I further announce that, if present and voting, the Senator from New York (Mr. D'AMATO), would vote "Yea."

Mr. CRANSTON. I announce that the Senator from Missouri (Mr. EAGLETON), the Senator from Nebraska (Mr. EXON), the Senator from Hawaii (Mr. INOUYE), the Senator from Massachusetts (Mr. TSONGAS), are necessarily absent.

The PRESIDING OFFICER (Mr. CHAFEE). Are there other Senators in the Chamber who desire to vote?

The result was announced—yeas 47, nays 44, as follows:

[Rollcall Vote No. 319 Leg.]

YEAS—47

Abdnor	Gorton	Nunn
Andrews	Grassley	Pell
Baker	Hatch	Percy
Bentsen	Hatfield	Pressler
Byrd, Harry F., Jr.	Hawkins	Roth
	Hayakawa	Rudman
Chafee	Helms	Schmitt
Cochran	Humphrey	Simpson
Cohen	Jepsen	Specter
Danforth	Kasten	Stafford
Dixon	Laxalt	Stennis
Dole	Long	Symms

East	Mathias	Tower
Garn	McClure	Wallop
Goldwater	Nickles	Zorinsky

NAYS—44

Armstrong	Ford	Metzenbaum
Baucus	Glenn	Mitchell
Biden	Hart	Moynihan
Boren	Heflin	Murkowski
Boschwitz	Heinz	Packwood
Bradley	Hollings	Proxmire
Bumpers	Huddleston	Pryor
Burdick	Jackson	Quayle
Byrd, Robert C.	Johnston	Randolph
Cannon	Kassebaum	Riegle
Chiles	Kennedy	Sarbanes
Cranston	Leahy	Sasser
DeConcini	Levin	Weicker
Dodd	Matsunaga	Williams
Durenberger	Melcher	

NOT VOTING—9

D'Amato	Exon	Stevens
Denton	Inouye	Tsongas
Eagleton	Mattingly	Warner

So Mr. PERCY's amendment (UP No. 494) was agreed to.

Mr. PERCY. I move to reconsider the vote by which the amendment was agreed to.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. Who seeks the floor?

The question recurs on the amendment of the Senator from Colorado as amended by the substitute of the Senator from Illinois. The yeas and nays have been ordered——

Mr. PERCY addressed the chair.

The PRESIDING OFFICER. The Senator from Illinois.

Mr. PERCY. Mr. President, I ask unanimous consent that the yeas and nays ordered on the Hart amendment be vitiated.

Mr. LONG. I object, Mr. President.

The PRESIDING OFFICER. Objection is heard.

The question is on agreeing to the amendment of the Senator from Colorado (Mr. HART) as amended by the amendment of the Senator from Illinois (Mr. PERCY). The yeas and nays have been ordered and the clerk will call the roll.

The legislative clerk called the roll.

Mr. BAKER. I announce that the Senator from New York (Mr. D'AMATO), the Senator from Georgia (Mr. MATTINGLY), the Senator from Alaska (Mr. STEVENS), the Senator from Virginia (Mr. WARNER), and the Senator from Connecticut (Mr. WEICKER) are necessarily absent.

I also announce that the Senator from Alabama (Mr. DENTON) is absent due to illness.

I further announce that, if present and voting, the Senator from New York (Mr. D'AMATO) would vote "Yea."

Mr. CRANSTON. I announce that the Senator from Missouri (Mr. EAGLETON), the Senator from Nebraska (Mr. EXON), the Senator from Hawaii (Mr. INOUYE), and the Senator from Massachusetts (Mr. TSONGAS) are necessarily absent.

The PRESIDING OFFICER (Mr. MURKOWSKI). Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 87, nays 3, as follows:

[Rollcall Vote No. 320 Leg.]

YEAS—87

Abdnor	Garn	Moynihan
Andrews	Glenn	Murkowski
Armstrong	Goldwater	Nickles
Baker	Gorton	Nunn
Baucus	Grassley	Packwood

NAYS—3

Hart	Kennedy	Mitchell

NOT VOTING—10

D'Amato	Inouye	Warner
Denton	Mattingly	Weicker
Eagleton	Stevens	
Exon	Tsongas	

So Mr. HART's amendment (UP No. 493), as amended, was agreed to.

The PRESIDING OFFICER. The Senator from Virginia is recognized.

Mr. HARRY F. BYRD, JR. Mr. President, I move to reconsider the vote and I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HATCH. Mr. President, I yield to the distinguished Senator from North Carolina for 2 minutes, and then I will yield to the distinguished Senator from Rhode Island.

Mr. HELMS. I thank the Senator from Utah.

THE SITUATION IN NICARAGUA

Mr. President, yesterday the Senate voted to accept an amendment which earmarked $30 million of taxpayers' money in aid involved in this bill for the so-called private sector in Nicaragua. I stated my reasons for opposing this amendment on the floor at that time, and I ask unanimous consent to have printed in the RECORD, at the conclusion of my remarks, my statement of yesterday, found on pages 24491 and 24492

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. HELMS. Mr. President, I have just been informed by an unquestionably credible source that this morning, at 2 o'clock, less than 12 hours after the Senate adopted the aforementioned amendment, the leaders of the five major private sector organizations in Nicaragua were arrested by the Nicaraguan Government. That shows how free and how private the private sector is in Nicaragua.

The family names of these gentlemen are as follows: Enrique Dreyfuss, Chairman of Private Sector Council; Enrique Bolanos, President of Chamber of Industry; Huberto Cuadra, President of Confederation of Professional Organizations; Renaldo Orlandes, President of Chamber of Commerce; and Benjamin Lanza, Chamber of Construction.

I fear for the safety of these men and the safety of their families. The predecessor of Mr. Dreyfuss, Mr. Salazar, the foremost leader of the private sector, was gunned down by government forces in Nicaragua who led him into an ambush.

Mr. President, I am fearful, in any case, that the private sector is dead in Nicaragua; and I call upon the administration to make diligent representations to the Government of Nicaragua and to inquire about the safety and welfare of these gentlemen.

EXHIBIT 1

Mr. HELMS. Mr. President, I ask that I be recorded in the negative on this amendment.

Mr. President, while I applaud the intent of the distinguished Senator from Nebraska in earmarking the entire $30 million of U.S. economic aid for the private sector in that beleaguered country, I cannot support his amendment. In that connection, I would mention two points to illustrate why I deem it impossible to aid the private sector in Nicaragua through these channels without strengthening, even more, the hold of the Sandinistas over that country.

Mr. President, Jerry Wein, the AID mission director for Nicaragua, recently visited with members of the staff of the Senate Committee on Foreign Relations to explain the conduct of the AID programs in Nicaragua. In reviewing the points he made during his discussion with the committee's staff, Mr. Wein made me even more wary of any attempt to direct aid to the private sector in Nicaragua while the Sandinistas are in power.

First of all, I am troubled by the revelation that, in AID's judgment, any enterprise which is owned in part by the Sandinista government still qualifies as a "private sector" entity, even though the Sandinistas may own as much as 49 percent of the stock.

Second, Mr. President, I am troubled that of the $33 million of the aid earmarked for the private sector which was disbursed in June and October of 1980, only slightly more than $13 million can be accounted for to the satisfaction of our AID officials. That means that our AID officials are not satisfied that any of the other $20 million was spent on the private sector—as mandated by the Congress. So, what happened to the other $20 million? Where was it spent?

Mr. President, the truth is, our AID officials cannot insure that U.S. dollars will be spent as mandated by Congress. How can we be sure that the U.S. taxpayers' dollars will be aiding the Nicaraguan private sector throughout the nationalized banks controlled by the Sandinistas? If past performance is any guide, we cannot.

Finally, Mr. President, my good friend and colleague, the distinguished Senator from Nebraska, has assured us that the money which he has asked to be earmarked for aid to the Nicaraguan private sector was in the administration's budget—the figure, he emphasizes, did not originate with him. Mr. President, I am confident the able Senator realizes that, while the Reagan administration budget did contain such a line item, surely the administration had no intention of sending millions of the American taxpayers' dollars to the Sandinistas, with the compliments of the American taxpayer.

To the contrary, it is clear that the administration wanted to have this money available in the event that developments in Nicaragua might find the Sandinistas out of power, or renouncing its aggressive pro-Marxist program—either development being one which I and many other Americans, as well as many members of the Nicaraguan private sector, would welcome. The administration would then be able to proceed with aid to that country in such new circumstances.

Under present circumstances, Mr. President, I am concerned that any money going to Nicaragua, however well intentioned anyone may be in supplying it, will only serve to buy time, if not arms, for the Sandinistas. For that reason I must oppose the Zorinsky amendment, and I ask that the RECORD reflect my opposition to it.

o Mr. ZORINSKY. Mr. President, I have learned today that the Government of Nicaragua arrested five individuals who comprise the leadership of the private sector in Nicaragua. No action could more vividly highlight the urgent need for the amendment, which I sponsored and the Senate accepted yesterday, earmarking 100 percent of U.S. aid funds to the private sector in Nicaragua.

I only regret that the signal, which the Senate sent yesterday by passing my amendment, apparently arrived too late to stave off this reprehensible action by the Nicaraguan Government which occurred only hours after Senate action. During the course of the debate on my amendment yesterday, I noted, "This year, the administration requested that the law be changed, deleting any requirement that aid go to the private sector in Nicaragua. Mr. President, I believe that sends the wrong signal to the Government of Nicaragua."

At this juncture, Mr. President, I can only hope that the message sent by my amendment, restoring and expanding the requirement on aid to the private sector, has been carefully noted by the Nicaraguan leadership. They should now understand the depth of the U.S. commitment to the survival of the private sector in Nicaragua. In response to our concern and that of other democratic nations, and in view of their own best interests, the Nicaraguan leadership should move speedily to end the captivity of these fine business leaders.

Mr. President, Nicaragua is at a crossroads. Confrontation and repression of the sort evidenced today by the Government in Nicaragua is not the path to stability in Nicaragua or to good relations with the democratic nations of the world community.

I would like to reiterate my stand on Nicaragua by inserting my statement of yesterday with regard to the amendment passed by the Senate.

The material follows:

Mr. ZORINSKY. Mr. President, I would like to point out, prior to the voice vote on this amendment, that it is not my proposal to allocate money in the next year's budget for Nicaragua. It is the administration's proposal, lest there be any confusion as to who proposed what for the budget. My amendment to the administration's proposal does not require that the money requested by the administration be spent. It does require that if funds are spent in Nicaragua that those funds be available solely for the private sector.

There are those who question the need for an amendment on Nicaragua because it is assumed that under the current strain in relations the administration is not planning to send any A D funds. I would answer that it is an assumption that should not be made. I am aware of reports in the press that indicate that discussions between the United States and Nicaraguan officials could very well result in resumed assistance to the Nicaraguan Government. My amendment would insure that funds will not go to the Government of Nicaragua unless the President certifies that the Government there is making substantial progress toward free and fair elections.

Furthermore, I realize that there are those who feel that AID has not been very efficient in disbursing funds in Nicaragua and insuring that 60 percent is getting to the private sector. I have taken a back seat to no one regarding this situation and that is one of the principal reasons for my amendment. The amendment would tighten the accountability procedures by requiring the President to report to the Congress every 6 months on just how the funds are used.

My colleagues would be interested to know that for the past 8 months, I have attempted to obtain from A'D an accounting of funds expended thus far in Nicaragua. I wanted to make certain that 60 percent of U.S. aid had gone to the private sector as required by law.

In recent committee hearings, I put the request for an accounting directly to Secretary of State Haig and I now have his commitment for AID to produce such an ac-

counting within a reasonable time. And in a recent meeting with officials from the AID mission in Nicaragua, Senate Foreign Relations Committee staff were assured that figures still being compiled will bring the amount of private sector assistance to the 60-percent level. My amendment will insure tighter control and supervision of any future expenditure of funds, and mandate in the law a full and detailed accounting every 6 months.

Mr. President, 2 years ago I recommended that the Senate adopt a requirement that 60 percent of all aid to Nicaragua go to the private sector. This requirement became the law. This year, the administration requested that the law be changed, deleting any requirement that aid go to the private sector in Nicaragua. Mr. President, I believe that sends the wrong signal to the Government of Nicaragua.

If U.S. aid is a means to an end, that end in Nicaragua ought to be the establishment of democracy. My amendment, by earmarking not 60 percent, but 100 percent of aid to the private sector is an attempt to keep that prospect of democracy alive.●

Mr. HATCH. Mr. President, as I understand it, the distinguished Senator from Rhode Island has a technical amendment to take care of at this time, and when he concludes, I should like to have recognition.

Mr. PELL. I thank the Senator.

AMENDMENT NO. 571 (AS MODIFIED)

Mr. PELL. Mr. President, I send to the desk—and I request unanimous consent—a technical modification of amendment 571, which was agreed to by the Senate.

The amendment is as follows:

On page 89, between lines 2 and 3, insert the following new section 726 and renumber the subsequent section accordingly:

SEC. 726. If the funds authorized to be appropriated to carry out the Foreign Assistance Act of 1961 for the fiscal year 1982, $13,275,000 under part I, and $20,000,000 under chapter 4 of part II of the Foreign Assistance Act of 1961 shall be available only for Nicaragua under the following conditions:

(a) all of the funds made available to Nicaragua shall be furnished solely for assistance to the private sector in Nicaragua;

(b) the provisions of subsection (a) shall not apply when the President determines, and reports to the Speaker of the House of Representatives and the Chairman of the Committee on Foreign Relations of the Senate, that Nicaragua is making substantial progress toward free and fair elections.

(c) for each 6-month period in which any funds are expended under this Act for Nicaragua, the President shall submit to the Speaker of the House of Representatives and the Chairman of the Committee on Foreign Relations of the Senate a report accounting fully and in itemized detail for the amounts obligated and actually expended in Nicaragua.

The PRESIDING OFFICER. Without objection, the amendment is so modified.

AMENDMENT NO. 556

(Purpose: To strike out language providing for the autonomy of the Peace Corps, to ensure maximum efficiency of ACTION and Peace Corps)

Mr. HATCH. Mr. President, I call up my amendment No. 556.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from Utah (Mr. HATCH) proposes an amendment numbered 556.

Mr. HATCH. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Beginning with page 45, line 8, strike out all through page 50, line 9.

On page 50, strike out lines 11 and 12, and insert in lieu thereof the following:

"SEC. 601. Section 3 of the Peace Corps Act is amended—".

On page 50, line 20, strike out "SEC. 612." and insert in lieu thereof "SEC. 602.".

On page 50, line 21, strike out "sections 605 and 611" and insert in lieu thereof "section 601".

On page 51, line 7, strike out "SEC. 613." and insert in lieu thereof "SEC. 603.".

On page 51, line 23, strike out "SEC. 614." and insert in lieu thereof "SEC. 604.".

Mr. HATCH. Mr. President, part A of title VI of S. 1196, the Foreign Assistance Act, would separate the Peace Corps from its current status as an independent agency within ACTION and make it entirely independent—a new agency within the executive branch. I rise in opposition to that provision, and have proposed this amendment to strike that language. There are many valid, and I believe compelling, reasons why I feel it would be unwise to separate the Peace Corps from ACTION.

The Labor and Human Resources Committee has oversight responsibility for the ACTION agency, and we have been very interested in following the progress of both ACTION and the Peace Corps during the new administration. We have been cautious to try to be sure that both these agencies were working well, and able to function in a way that maximized the productivity and promise which both agencies can offer our great Nation.

After careful examination I have been unable to find one good reason to think that either the Peace Corps or ACTION would substantially benefit if the Peace Corps were separated, and operated as an independent agency within the executive branch. I have been able to discover many reasons why they should continue together. We have every reason to believe that the current arrangement of having the Peace Corps operate as an independent agency within ACTION is serving the needs of both agencies very well, while minimizing the bureaucratic costs to the taxpayer.

COST

Mr. President, the major reason I oppose separating the Peace Corps from ACTION is that such a move would cost the taxpayers more money. There is no doubt that the creation of a new independent agency means more spending. If the Peace Corps were totally separate from ACTION it would need additional funds for: administrative services, recruitment, communications, computer services, health services, accounting, payroll and rent for new office space.

Earlier this year OMB estimated that a separate Peace Corps could cost as much as $3 million per year. Hearings have not been held on the current proposal, by the Governmental Affairs Committee—however, in 1979 the Governmental Affairs Committee held extensive hearings on this issue. At that time—and remember we have had 3 years of staggering inflation since then—they estimated that separation would cost $15 million: $5.5 million for recruitment and communications, $7.1 million for administrative services, $2.5 million for planning and evaluation, and $774,000 for miscellaneous startup costs.

Regardless of the exact amount of cost increases which separation would cause, we all know that new agencies always require additional funds. In 1979, the Carter administration and the Governmental Affairs Committee both opposed Peace Corps separation from ACTION. Cost was the major factor in their decision. Mr. President, how much less can we afford further expansion of the already bloated Federal bureaucracy today.

Instead of looking for ways to develop new agencies and expand the Federal bureaucracy, we would do much better to look at the example of the current cooperation of the Peace Corps and ACTION in sharing services, and keeping administrative costs to a minimum. We have already been through a round of difficult budget cuts. I believe the President is exactly correct when he calls for our support in his efforts to balance the Federal budget. I also agree with my distinguished colleague from California, Senator CRANSTON, when he reminds us to be sensitive to the real needs of people. I could not vote to expand Government bureaucracy for two agencies that are getting along well by pooling resources, when I know that further budget cuts will be necessary even this year.

Mr. President in these times of extreme fiscal restraint I can see no good reason to gamble on an additional $3 to $15 million in the costs of running the Peace Corps.

MILITARY INTELLIGENCE—TOM PAUKEN

When the President nominated Tom Pauken to be the Director of ACTION earlier this year we immediately began to hear concerns voiced by some Members of this Chamber that the safety of Peace Corps volunteers would be jeopardized because Mr. Pauken was involved in a very minor way in Army intelligence many years ago. I have spoken on this floor previously expressing my complete support of Tom Pauken. He is a model citizen with a distinguished record of service to his country both in the Army, when he volunteered to serve during the Vietnam war, and in public activity.

Mr. President, I believe there is absolutely no substance to the argument that Mr. Pauken in his position as Director of ACTION adversely affects the safety of Peace Corps volunteers. As I said when Mr. Pauken was confirmed by the Senate, Peace Corps operates as an independent agency within ACTION. There has been a policy within the Peace Corps from its inception that the Peace Corps activities be kept entirely separate from any intelligence operations. Every President from Kennedy to Reagan has supported and perpetuated that policy. Therefore, Mr. President, there can be no credence given to the argument that Mr. Pauken's distinguished service to his

country many years ago will have any effect whatsoever on the perceptions of the Peace Corps at home or abroad.

I have here a copy of a letter by Joseph Blatchford who was a former Director of ACTION and of the Peace Corps which appeared in the Washington Post in May this year. Mr. Blatchford reminds us that enemies of the United States have been trying to paint the Peace Corps as a CIA plot since its inception. He also points out that the people of the Third World have never been impressed with these ridiculous claims, and that they are not going to start believing them now. The help and work of the Peace Corps volunteers is the thing that impresses the leaders of the countries in which our Peace Corps operates. I am convinced that will continue to be the case. Mr. President, I ask unanimous consent that the Blatchford letter be printed in the RECORD at the end of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. HATCH. Since Mr. Pauken was confirmed by the Senate I have learned that the Deputy Director of the Peace Corps itself, Mr. Tom Houser, served in military counter intelligence prior to his service in the Peace Corps. Like Mr. Pauken, Mr. Houser's service in the military was many years before he served in the Peace Corps. Mr. Houser served as Deputy Director of the Peace Corps from 1969 to 1971 during the height of the Vietnam war. Those who have been so adamantly opposed to Mr. Pauken, and have used his nomination as ACTION Director as an excuse to separate the Peace Corps from ACTION, have argued that Mr. Pauken's military background would taint the Peace Corps.

Well, let us look at the record. Was there any objection to the nomination of Mr. Houser to serve as Deputy Director of the Peace Corps by those who are so opposed to Mr. Pauken today? Did anyone think he would taint the Peace Corps? No. Did the Peace Corps suffer "guilt" by association with Mr. Houser? No.

Certainly Mr. Houser was much more involved in the day-to-day operation of the Peace Corps as Deputy Director, than Tom Pauken will ever be as Director of ACTION: Yet there was no one who used Mr. Houser's experience in military intelligence as an excuse for attacking the Peace Corps.

If the enemies of the United States want to attack our country's policies, they do not need excuses. Today, as in the past, the Peace Corps is building good will for America among Third World countries. Mr. Pauken's military service will not affect the Peace Corps adversely, just as Mr. Houser's military service did not affect the Peace Corps adversely—even though Houser was actually involved in day-to-day Peace Corps operations, while Mr. Pauken is not.

So, Mr. President, I believe we have more than ample reason to calm the concern of my colleagues that Peace Corps volunteers will be in danger because of Mr. Pauken. There was no substance to that argument 10 years ago, and there is none today. We want to avoid casting any kind of cloud over our veterans who served honorably and well in Vietnam. Certainly Mr. Pauken's distinguished military service is no reason to separate the Peace Corps from ACTION.

POSITION OF THE REAGAN ADMINISTRATION

Mr. President, not only am I and many of my colleagues opposed to separating Peace Corps from ACTION, President Reagan and members of his administration are strongly opposed to this proposal for separation.

David Stockman in a letter to Senator PERCY and members of the Foreign Relations Committee earlier this year said, separating the two agencies would, "create inefficiencies that would damage both ACTION and Peace Corps." He went on to say:

Our analysis indicates that there are significant functions now jointly serving the Peace Corps and ACTION that would have to be duplicated at substantial cost if Peace Corps were to become an independent agency.

And further he said:

In this time of austerity, separate new Federal agencies should not be created except on a showing of the most urgent need. Where, as in the case of the Peace Corps, no such urgent need exists, formation of a separate new agency is a needless extravagance.

I have a letter from Max Friedersdorf, assistant to President Reagan, in which he reaffirms the administration's opposition to separating Peace Corps and ACTION, specifically citing the provisions of this bill, S. 1196. He explains that separation would create unnecessary duplication and certain inefficiencies. Mr. President, I ask unanimous consent that Mr. Friedersdorf's letter be printed at this point in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

THE WHITE HOUSE,
Washington, June 4, 1981.

Hon. ORRIN HATCH,
Chairman, Committee on Labor and Human Resources, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: I appreciate your interest in the Administration's position on legislation to separate the Peace Corps and ACTION.

The Administration is opposed to S. 1015, the Peace Corps Autonomy Act, which would establish the Peace Corps as an independent agency within the executive branch. In addition, we also oppose Title VI of S. 1196, the International Security and Development Cooperation Act of 1981 which is identical to S. 1015. Both of these measures are currently pending on the Senate calendar.

Our opposition to the separation stems from the belief that this action will require increased federal spending, an unnecessary duplication of existing government services, and certain inefficiencies which would disadvantage both ACTION and the Peace Corps. Furthermore, we have determined that no measurable program improvement would result from separation.

We have made our position known to the Senate Foreign Relations Committee in conjunction with their consideration of these measures. I hope this information will be helpful to you, and if you should have further questions, let me know.

Sincerely,

MAX L. FRIEDERSDORF,
Assistant to the President.

Mr. HATCH. Mr. President, I also have a letter from Loret Ruppe in which she states her complete and continuing support for the administration's position. She also declares that members of the new administration have taken particular care to establish "practical and productive" relationships between ACTION and Peace Corps. So we have every reason to believe that things are operating smoothly and well in their joint relationship. I ask unanimous consent that her letter be printed at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

PEACE CORPS,
Washington, D.C., July 21, 1981.

Hon. ORRIN G. HATCH,
Chairman, Senate Committee on Labor and Human Resources, U.S. Senate, Washing, D.C.

DEAR SENATOR HATCH: This is in response to your letter of July 16 requesting my views on the currently pending legislation which would separate the Peace Corps from ACTION.

I have stated several times in the past and wish to repeat my support for the Administration's position. As you know, under an Executive Order issued in 1979 the Peace Corps is an independent agency within ACTION and we share joint support services for which we, the Peace Corps, pay ACTION a certain percentage of the cost of such services.

Members of this new Administration have worked very carefully to establish practical and productive relationships with respect to these joint services. The Deputy Director-designate of our agency and the Deputy Director-designate of ACTION meet often on issues that come up with respect to the performance of these joint support services.

I appreciate your interest in this matter and your providing me with this opportunity to once again state my views.

Sincerely,

LORET MILLER RUPPE,
Director.

Mr. HATCH. It is clear, Mr. President, that the current administration is firmly opposed to the separation of Peace Corps and ACTION. Like the previous administration they feel that it is in the best interest of the Peace Corps to remain under the ACTION umbrella. We have every indication from the Director of the Peace Corps herself that things are working out smoothly. I can see no reason, therefore, why the Senate should not support the administration in the continuation of this cost-effective approach. Mr. Stockman and Mr. Friedersdorf have come to the same conclusions about increased costs if the agencies were separated. And I agree with Mr. Stockman's assessment that there is certainly no "urgent" need to separate the two agencies.

JURISDICTION—GOVERNMENTAL AFFAIRS

Mr. President, Senate rule XXV states that the Committee on Governmental Affairs shall have jurisdiction over the "organization and reorganization of the executive branch of the Government." The last time that the Governmental Affairs Committee held hearings on the question of separating the Peace Corps from ACTION was in 1979 and as a result of its in-depth look at the question, the committee voted overwhelmingly, 15 to 2, to keep the Peace Corps as an independent agency within ACTION.

The committee report, (No. 96–199, June 4, 1979), stated:

No major reorganizations should be undertaken unless clearly desirable, because it inevitably causes disruptions which reduce program effectiveness for a significant length of time. The committee concludes that, at this time, it appears that there is much to be lost, and little to be gained, by transfering either the Peace Corps or the domestic volunteer program to other agencies.

The report continued:

Even if there were marginal advantages in transfering a single, particular program, such as the Peace Corps. . . . the effect on ACTION as a whole would argue against such a move. The committee believes that the original concept and motivation for establishing ACTION is as valid today as it was in 1971. Nothing has happened . . . to alter the importance of having within the Federal Government a single, small agency whose primary purpose is to encourage volunteer efforts. And in order to preserve that concept all the programs now in ACTION should be kept in place.

Mr. President, that was the collective judgment of the members of the Governmental Affairs Committee, the Senate body which is charged under the rules of the Senate with jurisdiction over executive branch organization questions. I believe it would be bad precedent and bad law to legislate an ACTION agency reorganization in the face of near unanimous opposition from the committee with jurisdiction over the issue.

Mr. President, our former colleague, Senator Javits made what I believe to be an important point during the debate in 1979 when, in referring to the Governmental Affairs Committees' report, said:

That is what we have committees for. They go into these matters in considerable detail, both personally and through their staffs and try to come to a conclusion . . . I think the best thing written on the subject (of separation) comes out of the Governmental Affairs Committee . . .

Mr. President, the Governmental Affairs Committees' report stated very accurately, I believe, the importance of keeping the Peace Corps independent within ACTION when it stated:

The committee believes that the real and symbolic value of the Peace Corps as a humanitarian, people-to-people program is not to be underestimated. The image of American volunteers living under austere conditions among the people of Third World nations, enduring physical hardship and financial sacrifice, remains an important expression of the nation's tradition of humanitarian concern and idealism. ACTION is an appropriate place to place the Peace Corps in order to protect and symbolize the volunteer nature of the program.

Sentiments which are all the more important, Mr. President, when we recall the Presidents comment during his recent televised speech to the Nation:

I believe that the spirit of volunteerism still lives in America.

Under Executive Order No. 12137, issued May 16, 1979, the Peace Corps was established as an autonomous agency within ACTION. According to the June 4th committee report:

The new executive order gives the Peace Corps director broad authority over the budget, policy and management of the international volunteer program. It is designed to strengthen the vitality, visibility, and independence of the Peace Corps while preserving its position as a joint venture with the domestic volunteer service programs within the framework of ACTION.

Thus, the Peace Corps now functions with near total autonomy and in fact, Mr. President, at the time of the issuance of the Executive order in 1979, it was the opinion of the then Director of the Peace Corps, Richard Celeste, as expressed in a letter to our distinguished colleague, Senator GLENN, that under the terms of the order, the Peace Corps would have more independence than at any other time of its existence.

In his letter to Senator GLENN, as printed in the CONGRESSIONAL RECORD on June 20, 1979, Director Celeste quotes from an analysis of the Executive order performed by a former general counsel of the Peace Corps:

While for technical reasons, Executive Order No. 12137 establishes the Peace Corps as an agency within ACTION, actually the Peace Corps and its new director, Richard F. Celeste, have more independence than the Peace Corps had in 1961 . . . Executive Order No. 12137 delegates the principal program and administrative functions conferred on the President by the Peace Corps Act directly to the director of the Peace Corps. In 1961 to 1966, those functions were delegated by the President first to the Secretary of State and then by him to the director of the Peace Corps. Thus, the Peace Corps director, . . . was technically subject to the direct authority of the Secretary of State. Under Executive Order 12137, the Peace Corps director in effect reports directly to the President.

The letter also states that:

The Peace Corps director will deal directly with the Office of Management and Budget and the Treasury Department with respect to the apportionment, obligation and expenditure of Peace Corps funds.

And further, Mr. President,

None of the functions under the Peace Corps Act are delegated to ACTION or its Director. As we have seen, all the principal Peace Corps Act program and administrative functions are delegated directly to the Director of the Peace Corps.

In sum, Mr. President, we have a situation today where the Peace Corps Director reports directly to the President on policy matters, deals directly with the Office of Management and Budget and the Treasury Department on budget matters; and shares with ACTION only a few administrative services for the purpose of reducing the cost of shared services.

GAO REPORT

I have attempted to determine from the Governmental Affairs Committee if there have been more recent hearings on this matter than the hearings to which I have referred which were held in May of 1979. I have been told that there have been no such hearings and am therefore somewhat at a loss to figure out from whence the data have come which indicate the need for an immediate and total separation of Peace Corps from ACTION.

Or, for that matter, whether such data exist.

I realize that the Committee on Foreign Relations took a cursory look at the issue earlier this year during its hearings on the Peace Corps authorization request and during the deliberations on the foreign assistance bill, but I am sure that no one would argue that the issue had been thoroughly explored.

I read with interest a report prepared by the General Accounting Office (GAO) and issued on May 21, 1981. The report examined the methods of preparation and training given Peace Corps volunteers.

While the report made some very interesting points and suggested several ways in which the preparation of volunteers could be improved, nowhere was there any mention of any problems whatsoever being experienced by the Peace Corps as a result of its administrative connection with ACTION.

As a matter of fact, in his response to the GAO report, the then Deputy Director of the Peace Corps, stated that:

The major retarding factor (in solving the problems identified by the GAO) has been a lack of sufficient resources . . . one which will probably be exacerbated as we deal with the budgetary constraints of the '80's.

Well, Mr. President, I have no doubt that the Peace Corps as well as every other Federal department and agency will face "budgetary constraints" as we attempt to put our fiscal house in order, but that is all the more reason not to spin the Peace Corps off unto itself to the tune of at least $15 million of the taxpayers dollars. I can only see such a move adding to the resource problems of the Peace Corps, not obviating them.

Furthermore, Mr. President, the GAO report cited the high attrition rate of Peace Corps volunteers. Regrettably, it was found that there was no way to determine exactly why so many volunteers failed to finish their tour. However, it is interesting to note that among all the possible reasons advanced by the then deputy director as explanation for the high attrition rate, the Peace Corps affiliation with ACTION was not mentioned or suggested as a cause of the problem.

And while the GAO report addressed only the issue of preparation of overseas volunteers, I think it is noteworthy that nowhere in the report was the Peace Corps affiliation with ACTION mentioned by the GAO as even a possible cause for the problems it identified in Peace Corps operations.

In the absence of any other relevant studies, data or, most importantly, hearings, such information is revealing, significant and certainly relevant to the debate today.

RECRUITMENT

Some have argued that the joint Peace Corps-ACTION arrangement has hurt recruitment for the Peace Corps since it was first begun in 1979.

There is no substance to that argument. Let us look at some statistics comparing Peace Corps recruitment successes in 1978, the year before the Executive order establishing the joint ACTION-Peace Corps arrangement, with this year under the Reagan administration.

	(Through 30, Sept.) 1978	1981
Applications	13,661	15,622
WATS line inquiries	37,902	53,917
Nominations for appointment	7,987	8,382

Clearly the recruitment activities of the Peace Corps are progressing better today than they were in 1978. Mr. President, there is absolutely no evidence that Peace Corps recruitment efforts have been harmed during the Peace Corps' relationship with ACTION, in fact the evidence indicates that Peace Corps recruitment has been strengthened since they joined forces on recruitment efforts.

COMMUNICATIONS-ADVERTISING

It has been alleged that the joint ACTION-Peace Corps administration has damaged Peace Corps' image by reducing and limiting the visibility of the Peace Corps in national advertising campaigns. Once again this is completely erroneous.

The Peace Corps budget personnel determine how much to utilize on advertising. The ACTION Office of Recruitment and Communications—a joint support service with Peace Corps—has a client-like relationship with Peace Corps. ORC does what its client—Peace Corps—tells them to do regarding advertising. It is entirely up to the Peace Corps to decide how much, and on what advertising money will be spent.

The Office of Recruitment and Communications field staff make great use of radio in Peace Corps recruitment campaigns. We do not know, however, the actual number of radio spots because to monitor such air play is prohibitively expensive. There is every reason to believe that the actual number of radio spots advertising the Peace Corps is from two to three times greater now than it was in 1978. We do know there are approximately 6,000 radio stations which carry Peace Corps advertising spots.

We have a much better idea how many TV spots are aired each year advertising Peace Corps. In the current calendar year, the advertising council is managing the advertising for the Peace Corps. Of 24 such public service campaigns, the Peace Corps is No. 3 in terms of dollar value in contributed time and space, this is by far the most advertising received by any of the ACTION agencies.

Once again it is instructive to compare the amount of advertising in terms of TV spots which were aired in 1978, before the joint Peace Corps-ACTION administration, with those being shown today.

From January 1, 1978 to December 31, 1978, there were 2,188 TV ads for the Peace Corps.

From January 1, 1981, to August 31, 1981—only two-thirds of a year—there have been 6,552 TV ads for the Peace Corps.

In other words, Mr. President, there have been more than three times the number of TV adds for the Peace Corps this year than there were in 1978. There have already been over 2,000 more TV ads for the Peace Corps this year under the Reagan administration than there were for the entire year last year under the Carter administration. When one considers that the audio portion of these ads is distributed to more than 6,000 radio stations around the country it becomes abundantly clear that instead of losing visibility, the Peace Corps is in the midst of a massive public relations campaign that has not been equaled since its inception 20 years ago.

To argue that it is not getting its fair share, or that its visibility has dropped since it joined with ACTION in sharing some administrative costs, is absolute nonsense. The Peace Corps has autonomy to determine how much money it wants to spend on advertising. Clearly its visibility in terms of number of advertisements shown or heard has never been higher than it has been this year.

BUDGETARY PROBLEMS

The assertion has been made that the Peace Corps must bear a disproportionate burden for the joint support services shared between Peace Corps and ACTION. The facts indicate differently.

The support offices outline what they do for the Peace Corps and what they do for domestic operations. An assessment of the services is provided by each joint support office. The percentage the Peace Corps contributes for its share of the funding for joint support services is as close as possible to overall actual usage based on the assessment made.

In this regard, Mr. President, it is interesting to note that under the Reagan administration Peace Corps has only paid for 48.8 percent of the joint support services budget, while under the Carter administration last year they paid for 53 percent of the joint support services.

BUREAUCRACY AND OVERLAP AUTHORITY—PERSONNEL PROBLEMS

It has also been alleged that the vitality of the Peace Corps is being sapped by unnecessary layers of bureaucracy, and that there are personal problems resulting from the ACTION–Peace Corps relationship. Mr. President once again I can find no evidence that such problems exist to any significant extent.

Instead of bureaucratic overload what we have found is an attempt to share some administrative services, and that this attempt has been very successful. The Peace Corps has more public visibility, more volunteers, and pays less for services than any time in recent history. I have already submitted a letter from Peace Corps Director Loret Ruppe in which she says that careful attention has been given to the joint ACTION–Peace Corps relationship and in her own words she assures me that "members of this new administration have worked very carefully to establish practical and productive relationships with respect to these joint services."

To me, Mr. President, the arguments for separating Peace Corps from ACTION have no substance, and this whole matter is a tempest in a teapot—but a teapot which could cost the taxpayers of America $15 million or more each year if we were to make the separation.

Clearly Mr. President, in the absence of any data to the contrary, the current situation is the best possible arrangement and should not be disturbed. The President, the Director of the Office of Management and Budget, the Director of ACTION and the Director of the Peace Corps all favor keeping the status quo. Surely we should give this new team a chance to operate and report back to the Congress after an appropriate period of time. I have presented evidence here today that gives me every indication that things are going extremely well for the Peace Corps. And given these times of budget cut backs I doubt if separating the Peace Corps from ACTION would do anything but harm to the Peace Corps.

Clearly, Mr. President, the Peace Corps under its current arrangement essentially has the best of two worlds—on the one hand, under the provisions of the Executive order, as we have stated, the Peace Corps has virtually total autonomy with its Director reporting directly to the President, and yet the agency does not incur the costs which would accrue to the taxpayers without its residence under ACTION's administrative umbrella.

I urge my colleagues to vote with me in favor of my amendment which will save taxpayer dollars and preserve the integrity and well-being of the Peace Corps by keeping it in its position within the cooperative relationship it currently enjoys with the ACTION agency.

[Exhibit 1]

[From the Washington Post, May 26, 1981]

THE PEACE CORPS' IMAGE

Because President Reagan's nominee to head ACTION, Tom Pauken, served in military intelligence in Vietnam 12 years ago, Sen. Alan Cranston (D-Calif.) wants to take the Peace Corps out from under ACTION and put it in the State Department. He claims that if Mr. Pauken is anywhere near the Peace Corps his background will scare people in the Third World and perhaps endanger Peace Corps volunteers.

This is the same debate that has been carried on since the Peace Corps' founding, and by now it is one of those arguments that may mean something in Washington, but has no reality beyond the Potomac.

Ever since the Peace Corps began 20 years ago, the Soviets have been trying to convince the Third World that the Peace Corps is a CIA plot, in spite of the fact that six presidents from Kennedy to Reagan have maintained strict adherence to a complete separation of the Peace Corps and the CIA both in fact and in appearance. There is nothing in Peace Corps policy, however, that would prevent someone who has served in military intelligence many years ago from also serving in the Peace Corps as well.

Regardless of Peace Corps policy or how the agency is positioned in the federal bureaucracy, the Soviets will continue to claim that the volunteers are spies. On my first trip to Africa in 1969, Soviet propaganda and Jack Anderson claimed that I was trained and financed by the CIA. Anderson publicly retracted the claim, but the Soviets went further. Since I had played tournament tennis while in college, the Soviets pushed the line that the popular TV series "I Spy," then being syndicated in the Third World, was the story of my life.

The people of the Third World and their leaders weren't impressed by this propaganda many years ago and couldn"t care less today. They have enough problems to cope with in their daily lives to worry about political machinations in Washington or appearances that the backgrounds of ACTION directors may give. Besides, these countries have witnessed and been impressed with the work of thousands of volunteers; and never has there been a single incident of spying or intelligence gathering.

So let's keep the Peace Corps in ACTION

and give President Reagan and Mr. Pauken a chance to spin out some new ideas for involving people and make ACTION fulfill its mission of giving Americans of all ages and backgrounds the opportunity to perform peacetime service to their country at home and abroad.

JOSEPH H. BLATCHFORD,
Washington.

(The writer was director of the Peace Corps and of ACTION in the Nixon administration.)

(At the request of Mr. HATCH, the following statement was ordered to be printed in the RECORD:)

● Mr. DENTON. Mr. President, I rise today in support of keeping the Peace Corps under ACTION. The issues in this case are clear: The Peace Corps has not lost any autonomy by remaining under ACTION. In fact, ACTION has little or no influence on budget decisions made by the Peace Corps and no contact at all with OMB or the President with regard to the Peace Corps. The Peace Corps has effective autonomy under ACTION.

Those who support making the Peace Corps a separate agency in the executive branch have precious few hard facts to justify their demand. Those supporters who cite ACTION Director Thomas Pauken's past military intelligence background should be reminded that this body debated that issue at length before Mr. Pauken was confirmed on May 7. And perhaps they have forgotten that Mr. Tom Houser, a former Deputy Director of the Peace Corps itself, had served in Army intelligence; yet, the issue of his background was not raised during his Senate confirmation hearings. There is no indication that Peace Corps credibility was damaged, nor was any volunteer ever harmed, because Mr. Houser was Deputy Director of the Peace Corps. It is also worthy of note that Mr. Houser was Deputy Director at the height of the Vietanam war, when anti-American sentiment was rampant in the Third World.

Obviously, Mr. Houser, as Deputy Director, had more to do with Peace Corps policy and day-to-day operations than does Mr. Pauken today. In fact, since the Peace Corps is autonomous, the Director of ACTION has virtually no influence on either Peace Corps' policy or daily operations. ACTION provides certain support services to the Peace Corps for cost-effective reasons; for example, computer services. However, Mr. Pauken has designated Deputy Director Winnie Pizzano as ACTION's liaison officer to the Peace Corps for support services, effectively removing Mr. Pauken from this aspect of Peace Corps administration.

Mr. Pauken's actions from his first day in office demonstrate that the fears and concerns of those who think the Peace Corps will be tainted by his association are unfounded.

Mr. President, we have not begun to calculate the real costs involved to separate the two agencies. Obviously, the creation of any new agency is going to cost money, and lots of it. Taxpayers understand this truism, and it is time we did. ACTION supplies many of the support services that the Peace Corps would have to provide for itself, which would cost more if provided independently. There are conflicting reports on the actual costs. The claims range from $3 to $15 million. There is even one report that it will cost nothing. No cost at all in creating a new Federal agency is incredible, and the fact that there is any disparity among the figures supports the need to look more closely at all the facts and argues against this attempt at separating the two agencies. There is a bill presently before the Senate under the general order that also deals with this issue. The consideration of that bill will provide the appropriate forum for discussion of separating the Peace Corps from ACTION.

The administration opposes this amendment because it would create inefficiencies that would work to the disadvantage of both ACTION and the Peace Corps. It would produce a duplication of Federal Government services inconsistent with administration policy. Numerous functions jointly serving ACTION and the Peace Corps would have to be duplicated. Both the cost and the inefficiency created by the duplication of work is fundamentally at odds with the administration's policy of fiscal restraint and streamlined administration. The mandate given to the administration last November is diametrically opposed to the creation of a new Federal agency at a time when all other programs are experiencing cutbacks in funds and employees.

Mr. President, the American public has strongly supported our budget cuts and attempts at reducing Federal spending. This entire country has felt the adverse effect of past extravagant economic policies. Can we now, in good conscience, spend an undetermined amount of money—in fact, even a single dollar—to create a new Federal agency? Can we justify such a decision in the face of current tight money policies and reductions in social programs?

The fact is that we cannot justify such a decision when the real impact is unclear, when we demand sacrifices from the public, and when the grounds for that decision are not based on hard fact.●

Mr. HATCH. Mr. President, I ask for the yeas and nays on my amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. CRANSTON. Mr. President, I rise in strong opposition to the amendment offered by the Senator from Utah to strike the provisions of the committee bill which would provide for the separation of the Peace Corps from the ACTION Agency.

As my colleagues will recall, the Senate voted on this exact issue last June and rejected by a bipartisan vote of 52 to 45 efforts to prevent the inclusion of an identical provision in the Department of State reauthorization bill, S. 1193.

Mr. President, the issues surrounding the necessity for the separation of the Peace Corps from the ACTION Agency were fully debated on the Senate floor last June. The Senate rejected the arguments advanced against separation at that time. It is unfortunate that we are forced to take up the time of the Senate again on an issue that was decided only a few months ago. I do not intend to debate again all of the issues underlying the committee position—a position that was overwhelmingly adopted by the committee with strong bipartisan support. I do want to respond briefly to several points made by the opponents of separation.

First of all, I think we need to dispose once and for all of the cost issue. The Congressional Budget Office says there is no cost impact from this provision. That is CBO's official position. That is their analysis in the committee report. And, as my colleagues know, it is CBO's cost estimates which authoritatively apply to actions under the Budget Act.

The Senator from Utah has tried to argue against separation on the basis of an alleged cost. Let us look at these allegations.

First, it is fairly evident that within the administration there is sharp disagreement as to the budgetary impact of separation. Prior to the establishment this year of an official administration policy on the issue of separation, Peace Corps representatives testified in congressional hearings that there would be no additional cost to the Peace Corps as a result of a separation from the ACTION Agency. This estimate was confirmed by William G. Sykes, at that time the Acting Director of the Peace Corps, at a foreign relations hearing as late as April 29.

It is true that, as I understand it, the ACTION Agency budget office has different projections. That is not surprising. Currently, the Peace Corps pays to the ACTION Agency 60 percent of the cost of joint services, although the Peace Corps does not receive 60 percent of the services. In other words, funds which are appropriated for the operation of the Peace Corps go into the coffers of the ACTION Agency. These funds and the services they buy are then controlled by the ACTION Agency.

This issue of Peace Corps funding of joint services is not a new problem with this administration. This is a longstanding issue of contention between the Peace Corps and the ACTION Agency. It is surely one of the reasons why the ACTION Agency does not want to lose the Peace Corps. What agency would want to give up such a lucrative arrangement?

The Senator from Utah cited an OMB estimate of an additional $3 million in operating costs resulting from separation. A careful review of this estimate, which is included in the appendix to the committee report accompanying S. 1015, indicates this estimate was prepared by the ACTION staff and it specifically states it "should be viewed as an outside estimate and is likely to be too large."

The Senator from Utah has also cited an over 2-year-old, 1979 report from the Governmental Affairs Committee which estimated the cost of separation of the Peace Corps from the ACTION Agency as amounting to up to $15 million. I would simply point out that that estimate was made prior to the issuance of

Executive Order 12137 which gave the Peace Corps additional autonomy within the ACTION Agency. In other words, many of the functions cited in the 1979 report as entailing additional costs have already been separated. For example, following the 1979 Executive order, the Peace Corps established its own planning and evaluation office, personnel office, general counsel office, and a variety of other separate offices. These functions have already been separated.

It is plainly misleading and inaccurate to raise these figures without indicating that the 1979 Executive order substantially changed the factual basis upon which this particular estimate was made.

Moreover, in those areas where joint services continue to be provided, such as recruitment and communications, the 1979 estimates assumed the continuation of VISTA—the one program in the ACTION Agency that actually shared functions with the Peace Corps. VISTA is the only other full-time, stipended volunteer program operated by the ACTION Agency.

Yet, Mr. President, the administration is determined to terminate the VISTA program. The proponent of this amendment serves as the chairman of the Labor and Human Resources Committee and is well aware that his committee has reported legislation to accomplish that precise goal. What economies can possibly arise from sharing services with a program that the administration is terminating?

Mr. President, let me make clear that I strongly support the VISTA program and am strongly opposed to the administration's ill-founded efforts to kill the VISTA program. But, given this administration's proven success in eradicating programs, it is difficult to be optimistic about VISTA's future.

In any event, I find it the height of hypocrisy for the administration on the one hand to be arguing that we ought to keep the Peace Corps in ACTION so that it can share services with VISTA, while it is doing everything within its power to terminate VISTA.

Clearly, the opponents of separation are grasping at any straw to try to justify the no longer justifiable inclusion of the Peace Corps in the ACTION Agency. The alleged cost issue is just that—a straw issue. CBO has determined that there is no cost issue. For the Congress, as I have said, the issue of cost is authoritatively determined by CBO.

INTELLIGENCE ISSUE

Mr. President, I want to speak briefly on the intelligence policy issue relating to the Peace Corps. As my colleagues will recall, much of the impetus this year for the separation of the Peace Corps from the ACTION Agency arose out of the nomination 7 months ago of an individual with a background in overseas military intelligence work to serve as the Director of the ACTION Agency. I strongly felt, as did a number of my colleagues, several former Directors of the Peace Corps from both parties, and many, many former and present Peace Corps volunteers, that this action would seriously undermine the credibility and effectiveness of the Peace Corps in underdeveloped nations throughout the world and would, for the first time, provide a factual nexus upon which to base attacks upon the Peace Corps' integrity and its historic separation from the intelligence activities of this country.

This nomination for ACTION Agency Director presented a break of a tradition of strict separation of the Peace Corps from any connection or appearance of connection with intelligence activities—a tradition which has been adhered to by each successive administration—Republican and Democratic alike—for over 20 years.

However, those opposing confirmation of the nomination for this reason withdrew their opposition to the Senate's consideration of the nomination because we felt that an appropriate approach to dealing with the problem would be through the separation of the Peace Corps from the ACTION Agency.

At that time, the nominee made a commitment to certain members of the Foreign Relations Committee to keep his hands off the Peace Corps. Unfortunately, it now appears that the spirit of that commitment has not been carried out.

Despite the assurances that the ACTION Agency Director would not become involved in the activities of the Peace Corps and despite his statements during the course of his confirmation hearings that he had "no intention at any time in the near future of going overseas," he just last month traveled to Ecuador to represent the United States at an international meeting.

Mr. President, I also noted with interest the remarks of the distinguished Senator from New Mexico (Mr. SCHMITT) in the September 22 CONGRESSIONAL RECORD, at page 21533, in connection with the 20th anniversary of the signing of the Peace Corps Act in which the Senator from New Mexico recounts a recent discussion with the ACTION Agency Director wherein the Director of the ACTION Agency expressed his views as to future directions for the Peace Corps. Yet during his confirmation hearings, the nominee had indicated he would be much too involved with the ACTION Agency's domestic programs to engage in overseas travel or become involved in Peace Corps activities.

Mr. President, I have also been advised that the ACTION Agency just last week terminated 100 employees in the joint services activities for which the Peace Corps provides 60 percent of the funding, including some 70 staff in the volunteer recruitment program, and eliminated entirely the staff providing services to former Peace Corps volunteers. These decisions, I am advised, were made unilaterally by the ACTION Agency without consultation with the Peace Corps.

Mr. President, I cite these recent developments merely to illustrate the need now, even more than 3 months ago, to separate the Peace Corps from the ACTION Agency. How can the Peace Corps effectively recruit new volunteers when the ACTION Agency unilaterally terminates recruiters? How can a program such as the Peace Corps continue to survive in an atmosphere of hostility toward it that is reported to pervade the ACTION Agency? An article describing the tensions that exist between these programs appeared last month in the Washington Post. This article confirms concerns that have also been expressed to my office directly. I ask unanimous consent that the text of the article be printed at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

FACTORS NECESSITATING SEPARATION

Mr. CRANSTON. Mr. President, the committee report on S. 1015 delineates the various areas that have caused considerable concern over the continued relationship of the Peace Corps to the ACTION Agency. I ask unanimous consent that appropriate excerpts from the committee report, with corrections of certain printing errors, be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 2.)

Mr. CRANSTON. Mr. President, these areas of concern that led the Foreign Relations Committee to approve Peace Corps separation have focused upon the unnecessary bureaucracy, decline in recruitment, lowered staff morale, and general subordination of the Peace Corps to the ACTION Agency's domestic programs. Nowhere is the problem more acute than in the area of recruitment and communications. The ACTION agency, not the Peace Corps, is responsible for recruitment activities. Volunteers apply to the ACTION Agency itself, not the Peace Corps. This arrangement substantially dilutes the positive recruitment value that arises from the Peace Corps' strong public image and identity. The decline in the number of Peace Corps volunteers since its merger into the ACTION Agency can be attributed, at least in part, to the Peace Corps' loss of control over—certainly exemplified by the recent unilateral layoffs of recruiters by the ACTION Agency—and its lack of public identification with its own recruitment activities.

The ACTION Agency, not the Peace Corps, controls communication. Hence, various publications, reports, and releases issued by the ACTION Agency continue to portray the Peace Corps as simply one of several volunteer programs operated by the ACTION Agency.

Finally, Mr. President, very real budgetary and personnel problems have plagued the merger of the Peace Corps and the ACTION Agency. As I have pointed out several times, the Peace Corps is forced to pay 60 percent of the cost of joint services, irrespective of the proportion of those services actually provided to the Peace Corps. The separate personnel systems—the Peace Corps with its foreign service-based system and the ACTION Agency with its general schedule-civil service system—have made it difficult for personnel to be transferred between domestic and international volunteer program activities and has been a constant source of internal tension.

When it comes to working out some of these problems, Mr. President, it is the

ACTION Agency, not the Peace Corps, that negotiates with the employee union.

Mr. President, under the current arrangement, the Peace Corps is submerged under unnecessary layers of bureaucracy—a bureaucracy that saps its strength and vitality and has now adopted an adversarial and hostile attitude toward the Peace Corps. The very essence of the Peace Corps and its appeal to Americans lies in its being the antithesis of a government bureaucracy. Yet, buried within the ACTION Agency, the Peace Corps has lost much of the visibility and strength which it enjoyed in its early days.

Mr. President, the separation provision contained in S. 1015 and the pending bill were approved overwhelmingly by both the Senate Foreign Relations Committee and the House Foreign Affairs Committee. They would restore the Peace Corps to the kind of operational independence it enjoyed during its first 10 years—making it an independent Federal agency, free from any entanglements with any other Federal agencies. The committee provision would retain, however, the existing relationship between the Peace Corps and the Secretary of State—a relationship which has existed since the enactment of the Peace Corps Act which provides for the effective integration of the Peace Corps with the overseas programs of other U.S. Government agencies.

Finally, Mr. President, although the nomination as the ACTION Agency Director of a person with an active overseas intelligence background precipitated much of the current support for separation of the Peace Corps from the ACTION Agency, that is not the sole reason, nor, at this point, should it be viewed as the primary reason.

The Peace Corps is being suffocated within the ACTION Agency. Separation will restore the Peace Corps to the autonomy it enjoyed during its first 10 years and permit it to regain the strength and vitality it once enjoyed as a shining example of the willingness of the American people to give of themselves for the betterment of mankind.

The Peace Corps is not a liberal or conservative concept. It is a program that transcends partisan boundaries.

I say, free the Peace Corps from its bondage; let it have a chance once again to prosper and represent the greatness of the American spirit and the generosity and selflessness of the American people. Reject this amendment and make the Peace Corps free to regain its vitality and identity. Now, more than ever, America needs a strong Peace Corps working overseas as a living, daily manifestation of the best that is in us and our way of life.

I ask unanimous consent that a letter circulated by myself, the Senators from Oregon (Mr. HATFIELD), Maryland (Mr. MATHIAS), Massachusetts (Mr. TSONGAS), and Connecticut (Mr. DODD) relating to this issue be reprinted in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 3.)

[From the Washington Post, Sept. 21, 1981]

PEACE CORPS, IN ITS 20TH YEAR, UNDER ATTACK FROM THE FAR RIGHT

(By James Naughtie)

The Peace Corps, in its 20th anniversary year, is at the center of an increasingly bitter administration battle over its independence and its budget, a battle that officials say could damage its work overseas.

The corps is under strong attack from hard-line conservative groups with access to high administration officials, and at the same time is facing budget cuts that could reduce the number of volunteers going abroad.

As a result, according to well-placed sources in the Peace Corps, Director Loret Ruppe is spending valuable time defending the corps' work and countering accusations from the far right that it is "anti-Reagan." The effect, the sources said, has been to reduce morale among full-time officials and to discourage prospective volunteers.

Much of the irritation among Peace Corps workers is directed at staff members of the Action agency, which is linked administratively to the corps. Although an executive order by President Carter in May, 1979, guaranteed autonomy for the Peace Corps, with only some shared support services, the two organizations share the same building and there are close management links.

According to one Peace Corps official, there is constant friction between the staffs, leading to such incidents as the appearance on walls and elevators in the Action offices of copies of an article highly critical of the Peace Corps that appeared in the conservative publication "Human Events."

The article attacked the corps' 20th anniversary celebration in June, which it claimed became a forum for "virtually every anti-Reagan freak around." The Peace Corps was described in the article as "a dangerously anti-Reagan instrument."

The accusations caused considerable distress in the Peace Corps, because they were considered unfounded and because copies were known to have been circulated at the White House. Ruppe, according to officials close to her, was outraged by the article.

She is reportedly convinced of President Reagan's support for the Peace Corps but dismayed by conservative attacks on her, because she believes that the work of the corps in the Third World should be attractive to those who profess to believe in "self-help."

The main focus of the anti-Peace Corps campaign is legislation to separate the corps completely from Action. That move is opposed by the administration, on the grounds that it would cost about $3 million a year more to run separate organizations. The bill, passed by the Senate, faces some House opposition, but a congressional staff source said Friday that the bill is expected to become law.

It was introduced in the Senate earlier this year as part of the campaign by liberals to block the nomination of Thomas Pauken as head of Action. One of the arguments used against Pauken, a Republican congressional candidate in Texas last year, was that his connection with military intelligence in Vietnam would be damaging to the Peace Corps, because it would provide opportunities for the Soviet Union to charge volunteers with intelligence links.

As a result of the controversy surrounding his nomination, and his reputation as a hard-line conservative, Pauken is regarded warily by many Peace Corps officials, and the friction with Action staff has tended to confirm their initial fears, according to sources in the corps, despite an apparently good working relationship between Pauken and Ruppe.

Pauken has made it clear that one of his main aims as Action director is to launch an assault on the VISTA program, established in the 1960s to help depressed areas in the United States by organizing teams of volunteers to advise on various topics.

However, what concerns some Peace Corps staff members is that Pauken, who has publicly expressed support for the corps, is closely associated with some of the far right groups now calling for it to be brought under stricter control.

On June 19, for example, Pauken addressed a meeting of the Kingston Group, a private discussion group set up by several conservative organizations, including the Conservative Caucus and the Committee for the Survival of a Free Congress, which meets regularly in the back room of a private house on Capitol Hill.

During this meeting an 11-page list of VISTA programs was circulated. According to a participant at the meeting, the list was handed out by Pauken, who said the programs were "leftist" and were to be dissolved.

Pauken denied in an interview that he had handed out any list at the meeting, but said his staff might have done so. He said the Action staff was examining individual programs to see if they fulfilled the criteria laid down for the agency.

One of the participants at the Kingston Group meeting, who was invited as part of a Conservative Progress Briefing in Washington, described the session as "a shock" because of the passionate antagonism to federal programs displayed and the intolerance to anyone not associated with the far right.

The open hostility of some Action officials to the Peace Corps is causing fears that this year's budget cuts may be the prelude to a more severe cutback. The 1982 appropriation has dropped to $95 million, from $106 million in fiscal 1981, and activities are expected to be concentrated in fewer countries. By 1983 the number of volunteers is expected to be about 20 percent below the figure planned for 1982 by the Carter administration. There are currently 5,400 volunteers in 60 countries.

Yet Ruppe and her staff are convinced that the Peace Corps delivers a large benefit to the nation, at a relatively small cost. One report from a senior official now circulating in the office describes a lengthy tour to African countries where volunteers are at work and concludes: "The United States does not yet realize the incredible impact that the Peace Corps has on these smaller nations—an incredible impact on their societies, world outlook, identities and conceptualization of the West."

Tuesday is the 20th anniversary of the signing of the Peace Corps Act, and an atmosphere of celebration might be expected. But instead, many officials are frustrated and distressed by the attacks which are forcing them to spend time on defensive bureaucratic maneuvers and which they believe could discourage volunteers. They are also concerned that President Reagan's support for the corps might be undermined by hard-liners who regard it as an unpleasant vestige of Kennedy liberalism.

As a result, Peace Corps officials believe they may even be facing a battle for survival.

EXHIBIT 2

EXCERPTS, WITH TECHNICAL CORRECTIONS, FROM SENATE REPORT NO. 97-84, TO ACCOMPANY S. 1015

* * * * *

Mr. PERCY, from the Committee on Foreign Relations, submitted the following

REPORT

[To accompany S. 1015]

The Committee on Foreign Relations, to which was referred the bill (S. 1015), having considered the same, reports favorably there-

on with an amendment and recommends that the bill as amended do pass.

COMMITTEE ACTION

S. 1015, a bill to separate the Peace Corps from the ACTION Agency, was introduced by Senator Cranston (for himself and Senators Pell, Mathias, Biden, Sarbanes, Tsongas, Baucus and Kennedy) on April 27, 1981, and referred to the Committee on Foreign Relations. Additional co-sponsors are: Senators Dodd, Glenn, Bradley, Boschwitz, Levin and Hart. The Committee received testimony on the proposal to separate the Peace Corps from ACTION during the Committee's hearing on April 29, 1981.

The Committee agreed in an open markup session on May 13, 1981, to report S. 1015, as amended, favorably to the Senate and to report identical provisions as part of the Foreign Assistance Act Amendments of 1981. Senators voting in favor were: Percy, Kassebaum, Boschwitz, Pell, Biden, Glenn, Sarbanes, Tsongas, Cranston and Dodd. Senators voting in the negative were Helms and Lugar.

COMMITTEE COMMENTS

S. 1015 would separate the Peace Corps from the ACTION Agency, thereby restoring it to the full Operational antonomy it enjoyed during its early years. Although the Committee's decision was precipitated to a large extent by the controversy surrounding the appointment of an individual with a military intelligence training and field work background to serve as the Director of the ACTION Agency and the impact that this nomination might have upon the long-standing policy of the Peace Corps to avoid any involvement or appearance of involvement with any intelligence activities, it is the Committee's view that a number of independent programmatic considerations make separation desirable in order to permit the Peace Corps to carry out its mission effectively.

HISTORY OF PEACE CORPS' STATUS

The Peace Corps Act, enacted September 22, 1961, authorized the President of the United States to carry out the programs authorized under the Act and to exercise the functions vested in him by it through such agency or officer of the United States government as he shall direct. Under Executive Order 11041 of August 6, 1962, the President delegated the basic operational authorities under the Act to the Secretary of State. The Secretary, in turn, delegated those authorities to the Director of the Peace Corps in State Department Delegation 35–11A, dated August 29, 1962. The Peace Corps thus was initially operated as an agency technically within the Department of State, but enjoyed very substantial operational autonomy through the delegation of authorities.

In 1971, pursuant to Executive Order 11603 of July 1, 1971, the Peace Corps was transferred to the ACTION Agency, created by Reorganization Plan No. 1 of 1971, and authority to direct the Peace Corps was assigned to the Director of the ACTION Agency. A statutory basis for the ACTION Agency was established in 1973 in title IV of the Domestic Volunteer Service Act of 1973, Public Law 93–113. Between 1971 and 1979, the Peace Corps was administered by the ACTION Agency and its director along with various domestic volunteer programs such as VISTA (Volunteers in Service to America) and the Older American Volunteer programs—R.S.V.P. (Retired Senior Volunteer Program), Senior Companions, and Foster Grandparents.

In May of 1979, President Carter issued Executive Order 12137 which superseded Executive Order 11603. Executive Order 12137 continued the Peace Corps as a program within the ACTION Agency but provided it with certain budgetary and operating autonomy. The memorandum from President Carter accompanying the Executive Order described its effect as follows:

This executive order supersedes Executive Order 11603, issued in 1971. Executive Order 11603 assigned to the ACTION Director the authority to direct the Peace Corps. The attached order delegates that authority to the Peace Corps Director.

The order requires the Peace Corps Director to consult with the Director of ACTION and to coordinate Peace Corps activities with those of ACTION. It provides that the Director of ACTION will be responsible for the general direction of all ACTION functions which jointly serve ACTION's domestic volunteer components and the Peace Corps, and for advising the Peace Corps Director to ensure the carrying out of the functions assigned to the Peace Corps Director.

Under the 1979 Executive Order, the ACTION Agency controls the following services provided to the Peace Corps:

1. recruitment of volunteers and processing of applications;
2. general administration—for example, space management, accounting, data processing, procurement, and contracting;
3. internal auditing and inspections;
4. investigation of equal employment opportunity complaints;
5. limited legal services—for example, monitoring staff compliance with the Ethics in Government Act, Freedom of Information and Privacy Acts, and monitoring legal requirements of contracting procedures;
6. communication services;
7. health services to Peace Corps volunteers;
8. supervision of the Peace Corps partnership program;
9. services for former volunteers; and
10. security investigations for Peace Corps staff and some volunteers.

The ACTION Agency also is responsible for applying the intelligence separation policy to ACTION Agency employees providing services to the Peace Corps.

At the time the Peace Corps was placed in the ACTION Agency, the desirability of effecting certain administrative economies, a closer degree of cooperation between domestic and international volunteer service efforts, and more efficient recruitment of volunteers were cited as justifications for the merger.

For the most part, these expectations have not been fulfilled. Instead, the Peace Corps, as an agency within the ACTION Agency, has been continually plagued by a variety of managerial, personnel, and budgetary problems. In addition, submerged within the ACTION Agency, the Peace Corps lost much of its visibility and acquired an overlay of staff and bureaucracy which did not contribute to its vitality.

These problems led the House of Representatives in April of 1979 to approve—by a margin of 276 to 116—legislation removing the Peace Corps from the ACTION Agency. The House legislation, however, would have placed the Peace Corps within the then newly forming International Development Cooperation Agency—IDCA—a transfer which many members of the Senate opposed on the grounds that placement of the Peace Corps within IDCA might make it appear to be simply another part of our foreign aid program and thus deprive it of its uniqueness as a people-to-people program, outside the mainstream of government programs. Additionally, it was hoped that issuance of the 1979 Executive Order would resolve some of the problems confronting the program within the ACTION Agency. For these reasons, the committee of conference on the International Development Cooperation Act of 1979 agreed to retain the Peace Corps within the ACTION Agency. The conference committee, however, expressed its strong support for maximum autonomy for the Peace Corps under the new executive order and expressly stated that:

"* * * cost savings may be an argument for continuing some shared functions, but concern is expressed that in the long run effectiveness in meeting the needs of Peace Corps, particularly in a vital area such as recruitment, should be the dominant consideration."

(Conference Report No. 96–397, pages 40–41, to accompany H.R. 3324). The conference committee also stated the intention of the authorizing committees to review carefully the details relating to implementation of the new executive order and

"* * * to reconsider the action taken by the House * * * if implementation of the executive order does not provide sufficient autonomy and alleviate the problems which the Peace Corps has been facing in recent years."

It is the view of this Committee that the implementation of Executive Order 12137 has not effectively alleviated the problems which the Peace Corps has been facing since the merger. In the Committee's view, only full autonomy by the establishment of the Peace Corps as an independent agency will restore it to the visibility and vitality that it enjoyed in its early years.

CONTINUING PROBLEMS WITHIN THE ACTION AGENCY

Concern over the viability of the Peace Corps' placement in the ACTION Agency and the effect of that placement on the continued vitality of the Peace Corps' operations has been raised in various studies, including a 1977 report, The Future of the Peace Corps, prepared by former Assistant Secretary of State Harlan Cleveland under a contract between the ACTION Agency and the Aspen Institute for Humanistic Studies; a 1974 report, The Peace Corps: Perspectives for the Future, prepared by the National Academy of Sciences; and a 1977 report, The Ambitious Task. New Approaches to Peace Corps and Private Voluntary Organization Efforts to Promote Third World Development, prepared by Warren Wiggin, former Deputy Director of the Peace Corps, released by the TransCentury Corporation. These reports cited increased bureaucratic entanglements, lowered staff morale, decline in recruitment, and subordination of the Peace Corps to the Agency's domestic programs as some of the adverse consequences of the placement of the Peace Corps in the ACTION Agency.

Some areas where specific problems have existed include recruitment, communications, overlapping areas of authority, budget and cost allocation, and conflicting personnel systems.

Recruitment

Under the 1979 Executive Order, the ACTION Agency maintains responsibility and control over the recruitment of potential volunteers. The ACTION Agency controls both the recruitment resources and the general recruitment effort. Volunteers apply to the ACTION Agency itself, not the Peace Corps. This arrangement substantially dilutes the positive recruitment value that arises from the Peace Corps' strong public image and identity. The decline in the number of Peace Corps volunteers since its merger into the ACTION Agency can be attributed, at least in part to the Peace Corps' loss of control over and public identification with its own recruitment activities.

Communications

One of the most serious problems associated with the present status of the Peace Corps with the ACTION Agency is its loss of visibility. The ACTION Agency, not the Peace Corps, controls communications,

Hence, various publications, reports, and releases issued by the ACTION Agency continue to portray the Peace Corps as simply one of several volunteer programs operated by the ACTION Agency (including, for example, those in connection with the recent nomination of a new Director and Deputy Director of the ACTION Agency). The value of its unique history and mission and its rich heritage—which have distinguished it from simply being a "volunteer" program and from generally operating as another Government bureaucracy—have thus been substantially diminished. The overall focus and image of the ACTION Agency rests upon and derives from its domestic programs; the continued submergence of the Peace Corps within the ACTION Agency does not serve to enhance the Peace Corps' reputation.

Bureaucracy and overlap authority

Under the present structure, the Peace Corps is encumbered by unnecessary layers of bureaucracy and conflicting channels of communication. The Acting Director of the Peace Corps, William Sykes, in his testimony before the Committee on April 29, 1981, called attention to the problems created by the multiple channels of communication which currently exist, as well as the difficulties that arise when the various support units are required to be responsible to two different masters—the Director of the Peace Corps and the Director of the ACTION Agency.

These unnecessary layers of bureaucracy tend to sap the Peace Corps of vitality. Indeed, the very essence of the Peace Corps and its appeal to Americans lies in its being the antithesis of government bureaucracy. A unique program from its inception, the Peace Corps needs to be free to respond creatively to new ideas and the continuously evolving and emerging needs of host countries.

Budgetary problems

The Committee has had a continuing concern about allocation of costs for support services provided by the ACTION Agency to the Peace Corps, and the extent to which the Peace Corps pays a disproportionate share of the joint support services. Currently, the Peace Corps pays 60 percent of the costs of all these services irrespective of the amount or cost of the services actually provided to the Peace Corps. According to the recent testimony presented to the Committee by the Acting Director of the Peace Corps, this allocation may be equitable in some areas and inequitable in others.

Personnel problems

The Peace Corps operates under a unique foreign service personnel system which requires that its staff appointments generally not exceed 5 years. The ACTION Agency, of course, operates under the general civil service system. The separate Peace Corps personnel system has repeatedly been a source of major labor/management controversies and has made it very difficult for personnel to be transferred between domestic and international volunteer program activities. The ACTION Agency has also insisted upon serving as the sole management representative with respect to labor/management relations covering all of the Peace Corps' nonprofessional employees in the United States. As recently as April 23, 1981, the Acting Director of the ACTION Agency reiterated that all negotiations with the employee's union must be handled through the ACTION Agency's Labor Relations officer.

Cost issues

A preliminary analysis of the cost of operating an independent Peace Corps prepared earlier this year by the Peace Corps budget office indicated that separation would not entail additional costs to the Peace Corps. In testimony before the Committee, the Acting Director of the Peace Corps indicated that the ACTION Agency budget office and OMB had reached different conclusions. In an April 2, 1981 letter to Max Friedersdorf, Assistant to the President for Legislative Affairs, the chairman requested the administration to provide the Committee with a report on whether the shared support services provided for by the 1979 Executive Order had resulted in any significant savings for the Peace Corps, including a detailed comparison of any such savings with the probable costs that would have been incurred by the Peace Corps had it been a completely independent agency from ACTION. In a letter dated April 3, Mr. Friedersdorf indicated that the administration had no information available with respect to this question but indicated that a request was being made to OMB to review the question. On April 27, 1981 the Committee received a further response from Mr. Friedersdorf estimating at the "outside" an additional cost of $3 million to operate an independent Peace Corps. The memorandum, which is reprinted as Appendix II, also states that the figure "is likely to be too large."

Based upon the preliminary data available, it is the Committee's view that it is unclear whether cost savings or additional costs would result from separation of the Peace Corps from the ACTION Agency. However, the Committee believes that the need to provide the Peace Corps with full autonomy in order to assure its future strength and vitality outweigh the possible minimal additional budgetary costs projected by OMB.

INTELLIGENCE-SEPARATION POLICY

Since its earliest days, the Peace Corps has had a policy of complete and total separation from intelligence agencies and activities. In order to dispel any false charges of any intelligence connection, a company policy was established barring persons with certain intelligence backgrounds from serving as Peace Corps volunteers or staff. These policies have been strongly supported since 1961 by each successive administration and have been a cornerstone of the Peace Corps' effectiveness.

Although the Committee was sharply divided over whether the nomination of Thomas Pauken (confirmed by the Senate on May 7, 1981) to be Director of the ACTION Agency would compromise the intelligence-separation policies (see Executive Report No. 97-6, (April 7, 1981)), this Committee remains staunchly committed to the continued total separation of the Peace Corps from intelligence activities and to the maintenance and strict application of the intelligence policies as described in the March 18, 1981, letter of the new Peace Corps Director, Loret Ruppe, and former Acting Director Sykes, set forth in the hearing record on this legislation.

In the Committee's view, the Peace Corps' autonomy will contribute to this goal of maintaining that separation and strictly enforcing those policies. The kinds of issues that arose with respect to Mr. Pauken's nomination and might arise with respect to other ACTION Agency employees would henceforth be eliminated. Moreover, only the Director of the Peace Corps as distinguished from the head of any other agency—would have any role in the interpretation, application, and enforcement of these internal policies.

In this regard and in order to contribute to the maximum possible effectiveness of the intelligence-separation policies and the perception of them, the Committee notes with approval the following statements by Committee member Senator Charles Mathias during debate on May 7 on Mr. Pauken's nomination.

"Mr. MATHIAS. Mr. Pauken gave me his assurances that he would 'keep hands off' the Peace Corps if he was confirmed as the Director of the ACTION Agency. I understood those assurances to mean that he would delegate whatever responsibilities he might have with respect to the Peace Corps to his Deputy and that is a major reason why I felt I could vote to confirm his nomination when it was considered in the Foreign Relations Committee. I understand that Mr. Pauken has recently been reported to have stated his intention to delegate his responsibilities with respect to the Peace Corps to the Deputy Director of the ACTION Agency and will not be directly involved in any decisions made in regard to the Peace Corps. I very much hope that he will make such a delegation of authority as soon as he takes office and will publicize it widely." (Congressional Record, May 7, 1981 page 8785)

The Committee very much hopes that Mr. Pauken will act accordingly during the pendency of Congressional consideration of the separation legislation (also approved by the House Foreign Affairs Committee on May 7 as part of its consideration of the proposed International Security and Development Cooperation Act of 1981).

CONTINUING COORDINATION WITH THE DEPARTMENT OF STATE

The Committee's action with respect to the separation of the Peace Corps from the ACTION Agency would not in any way alter the existing relationship between the Peace Corps and the Secretary of State. The Secretary of State would continue to have the responsibilities, which the Secretary has had since the enactment of the Peace Corps Act, under section 4(c)(4) and (d) for assuring that Peace Corps programs are effectively integrated with and are not unduly duplicative of the overseas programs of other U.S. government agencies.

TRANSFER OF PERSONNEL, RECORDS, UNEXPENDED FUNDS AND RELATED ADMINISTRATIVE MATTERS

The Committee bill provides for all personnel, assets, liabilities, contracts, property, records, and unexpended balances of appropriations, authorizations, allocations, and other funds which are employed, held, or used primarily in connection with functions relating to the Peace Corps, as determined by the Director of the Office of Management and Budget (OMB) after consultation with the Comptroller General and the Director of the Peace Corps and the Director of the ACTION Agency, to be transferred from the ACTION Agency to the Peace Corps not later than 30 days after the date of enactment, the Director of OMB is required to submit to the appropriate committees of the Congress (the four authorizing Committees, the Governmental Affairs, and the Government Operations Committee, and the Appropriations Committees) and to the Comptroller General a report on the steps taken to implement the separation. This report must include a description of the manner in which the various administrative matters associated with the separation are disposed of, including matters relating to personnel, assets, liabilities, contracts, property, records, and unexpended funds.

The Comptroller General of the United States is also directed to report to the appropriate Committees within 45 days after enactment, as to whether the division is equitable to the agencies, the employees, and parties involved. In the event it becomes necessary, it is the Committee's expectation that the Director of OMB and the Comptroller General will file supplemental reports to fully inform the appropriate Committees on the matters involved.

The Committee bill also provides specific protections for those employees currently employed by the ACTION Agency who are to be transferred under the Committee bill to the Peace Corps. The bill provides that the transferred employes shall, to the maximum extent feasible, be assigned to related functions and organizational units in the Peace Corps. Thus, a transferred employee would, if

at all possible, be assigned to a position in a unit where his or her duties and the functions of such unit would be comparable to his or her former duties and to the functions of his or her former unit. It also provides that those employees shall not because of such transfer be separated or reduced in rank, class, grade, or compensation, or otherwise suffer a loss of employment benefits for one year after the later of either of the following dates: the date on which the Director of OMB submits the report required with respect to implementation of the separation, or, with respect to any individual employee who has been transferred, the effective date of such individual's transfer. The Committee bill provides that any collective-bargaining agreement covering and regarding employees transferred or those employed by the Peace Corps that is in effect on the date of enactment shall continue to be recognized by the Peace Corps until the termination date of the agreement or until a mutual modification by the parties otherwise specifies. These protections are similar to those which have been provided to employees in other programs when new or independent agencies have been established, such as under section 9(a) of Public Law 93–644 (former section 601(h) of the Economic Opportunity Act) with respect to the Community Services Administration, under section 3(c) of the Legal Services Corporation Act of 1974 (Public Law 93–355) with respect to the Legal Services Corporation, and under section 502(a) of the Department of Education Organization Act (Public Law 96–88) with respect to the Department of Education.

The Committee bill specifically provides for the transferred employees to be appointed as members of the Foreign Service under the authority of section 7(a)(2) of the Peace Corps Act and, with respect to the 5-year limitation on Peace Corps Act appointments, under section 7(a)(2)(A) of that Act, provides certain protections for personnel with General Schedule appointments who are transferred to the Peace Corps. These protections are based upon the provisions in section 5 of Public Law 89–134 which provided "grandfather" protection to employees with General Schedule (GS) appointments in 1965 when the unique, unified Peace Corps personnel system derived from Foreign Service Act authorities and the 5-year employment limitation were established by the Public Law 89–134. Thus, under the Committee bill, persons whose career or career-conditional appointments were above grade 8 of the General Schedule (GS–8) would be entitled to retain their existing GS appointments for three years. After 3 years, if they wished to continue their employment with the Peace Corps, they would be required to convert to a comparable appointment in the Foreign Service under authority of section 7(a)(2) of the Peace Corps Act and become subject to the 5-year employment limitation contained in clause (A) of section 7(a)(2). Transferred employees whose career or career-conditional appointments were at GS–8 or below would receive comparable Foreign Service Unlimited appointments and would thus be permanently exempt from the 5-year service limitation in the same manner as were employees at GS–8 and below by virtue of the 1965 amendments. Enactment of the Committee bill would not in any way affect the status of those employees "grandfathered" under that prior section. These new protections should be implemented in a similar fashion to the provisions of Public Law 89–134.

COST ESTIMATE

In accordance with section 252(a) of the Legislative Reorganization Act of 1979 (Public Law 150, 91st Congress), the committee provides the following estimate of the cost of S. 1015, prepared by the Congressional Budget Office. The Committee concurs with the estimate.

U.S. CONGRESS,
CONGRESSIONAL BUDGET OFFICE,
Washington, D.C., May 15, 1981.

Hon. CHARLES H. PERCY,
Chairman, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to Section 403 of the Congressional Budget Act of 1974, the Congressional Budget Office has reviewed S. 1015, a bill to separate the Peace Corps from the ACTION Agency, as ordered reported by the Senate Committee on May 13, 1981.

This legislation authorizes no additional funds to carry out the separation and is expected to have no budget impact.

Sincerely,

ALICE M. RIVLIN,
Director.

REGULATORY IMPACT STATEMENT

In compliance with paragraph 11(b) of rule XXVI of the Standing Rules of the Senate, the Committee on Foreign Relations has made an evaluation of the regulatory impact which would be incurred in carrying out the Committee bill. The results of that evaluation are described below:

A. Estimates of the numbers of individuals and businesses who would be regulated, and a determination of the groups and classes of such individuals and businesses.—Inasmuch as the bill provides only for separation of the Peace Corps from the ACTION Agency and the establishment of the Peace Corps as an independent agency, its enactment would not result in the regulation of any individuals or businesses.

B. Determination of the economic impact of such regulations on individuals, consumers and businesses affected.—Since, as previously indicated, there would be no such regulation, there would be no such impact.

C. Determination of the impact on the personal privacy of the individual affected.—The enactment of the Committee bill would not have any impact on the personal privacy of any individuals.

D. Determination of the amount of additional paperwork that will result from regulations to be promulgated under the bill.—The only regulations expected to be promulgated directly as a result of the bill would pertain to the transfer of certain personnel, pursuant to the provisions of the bill, from the ACTION Agency to the Peace Corps. Those regulations, however, are not expected to increase substantially the paperwork involved in those transfers.

SECTION-BY-SECTION

Section 1.—Would provide that the measure may be referred to as the "Peace Corps Autonomy Act".

Section 2.—Would provide that, effective on the date of enactment, the Peace Corps shall be an independent agency within the executive branch and shall not be an agency within the ACTION Agency—as it now is under Executive Order 12137, dated May 16, 1979—or within any other department or agency of the United States.

Section 3: Subsection (a) would transfer to the Director of the Peace Corps all functions relating to the Peace Corps which were vested in the Director of the ACTION Agency prior to the date of enactment. This would not, however, in any way limit the President's discretion to withdraw any Peace Corps delegation, under present section 4(b) or other provisions of the Peace Corps Act or under other applicable law, to the Director of the Peace Corps or to any other official.

Paragraph (1) of subsection (b) would provide for the transfer to the Peace Corps of various items, including personnel, assets, liabilities, contracts, property, records, and unexpended balances which are used primarily in connection with functions relating to the Peace Corps, as determined by the Director of the Office of Management and Budget (OMB), after consultation with the Comptroller General and the Director of the Peace Corps and the Director of the ACTION Agency.

Subparagraph (A) of paragraph (2) of subsection (b) would provide that the transfer pursuant to this section of full-time employees (except experts or consultants or other special government employees) and part-time permanent employees shall not cause such employees to be separated or reduced in rank, class, grade or compensation, or otherwise suffer a loss of employment benefits for one year after the later of (1) the date on which the Director of the Office of Management Budget submits the report required under section 6(a) or, (2) effective date of a particular individual transfer.

Subparagraph (B) of paragraph (2) of subsection (b) would provide that employees transferred from the ACTION Agency to the Peace Corps pursuant to this section shall be assigned, to the maximum extent feasible, to such related functions and organizational units in the Peace Corps as such employees were assigned to immediately before the date of enactment of this Act.

Subparagraph (C) of paragraph (2) of subsection (b) would provide that any collective-bargaining agreement in effect on the date of enactment of this Act covering employees transferred pursuant to this section or employed on that date by the Peace Corps shall continue to be recognized by the Peace Corps until the termination date of the agreement, or until a mutual modification by the parties otherwise specifies.

Paragraph (3) of subsection (b) would provide, under such regulations as the President may prescribe, that, with two exceptions, each employee who does not hold an appointment under section 7(a)(2) of the Peace Corps Act and who is determined under paragraph (1) to be employed primarily in connection with any function relating to the Peace Corps shall, upon the effective date of this Act, be appointed a member of the Foreign Service under the authority of section 7(a)(2) of the Peace Corps Act, and be appointed or assigned to an appropriate class thereof. Under the first exception, no transferred employee may be so appointed without his or her consent until three years after that effective date. During this 3-year period, an employee who does not consent to such an appointment may continue to hold his or her career or career-conditional appointment. Under the second exception, each transferred employee holding a career or career-conditional appointment at grade 8 or below of the General Schedule (GS) shall be appointed a member of the Foreign Service for the duration of operations under the Peace Corps Act.

Thus, persons at grade GS–8 or below would not be subject to the five-year appointment limitation contained in section 7(a)(2)(A) of the Peace Corps Act. Persons above grade GS–8 would be permitted to continue their employment under their career or career-conditional appointments for 3 years after their transfer to the Peace Corps. After that time, if they wished to continue their Peace Corps employment, they would be required to accept a Peace Corps Act (Foreign Service) appointment to which the 5-year appointment limitation would apply. The basic rate of compensation for persons appointed under these provisions would not be permitted to be reduced below the rate received by such person immediately prior to the effective date of such person's appointment. This paragraph is derived from section 5 of Public Law 89–134, establishing the unique, unified Peace Corps personnel system, and should be implemented in similar fashion.

Section 4.—Would amend section 4(b) of the Peace Corps Act to limit the President's current authority to exercise the functions vested in him under the Peace Corps Act

through government agencies and officials of the President's choosing by permitting the President to delegate the authority to perform those functions only to the Director of the Peace Corps.

Section 5.—Would repeal no-longer-applicable provisions of section 3(d), (e), and (f) of the Peace Corps Act, which contain references to the Director of the Action Agency, relating to transfers by the Director of ACTION to the Treasury in fiscal year 1976 to rectify certain imbalances in the Peace Corps readjustment allowance account, the waiver of claims for certain erroneous payments of readjustment allowances to Peace Corps volunteers, and the relieving of ACTION and Peace Corps disbursing officers of liability for certain improper or incorrect payments during that period; and would provide that the repeal of these provisions would not affect the validity of any action taken under the repealed provisions prior to their repeal or the liability of those disbursing officers for such payments.

Section 6.—Subsection (a) would require the Director of OMB to submit to the appropriate committees of the Congress (the four authorizing Committees, the Governmental Affairs and Government Operations Committee, and both Appropriations Committees) and to the Comptroller General, within 30 days after the date of enactment, a report on the steps taken to implement the separation of the Peace Corps from the ACTION Agency.

Subsection (b) would require the Comptroller General to submit to those same committees, within 45 days after the date of enactment, a report stating whether, in the Comptroller General's judgment, the determinations by OMB were equitable.

Section 7.—Would provide that references in any statute, reorganization plan, executive order, regulation, or other official document or proceeding to the ACTION Agency or the Director of the ACTION Agency with respect to functions or activities relating to the Peace Corps shall be deemed to refer to the Peace Corps or the Director of the Peace Corps, respectively.

CHANGES IN EXISTING LAW

In accordance with paragraph 12 of rule XXVI of the Standing Rules of the Senate, changes in existing law (Public Law 87-293, as amended) made by S. 1015 as reported are shown as follows (existing law proposed to be omitted is enclosed in black brackets, new matter is printed in italic, existing law in which no change is proposed is shown in roman):

PEACE CORPS ACT, AS AMENDED

Public Law 87-293

87th Congress, H.R. 7500

September 22, 1961

AN ACT To provide for a Peace Corps to help the peoples of interested countries and areas in meeting their needs for skilled manpower

TITLE I—THE PEACE CORPS

* * * * * * *

SEC. 3 * * *

[(d) The Director of ACTION shall transfer to the readjustment allowance, ACTION, account at the Treasury Department, no later than December 31, 1975, not to exceed $315,000 from any sums available to carry out the purposes of this Act in fiscal year 1976 to rectify the imbalance in the Peace Corps readjustment allowance account for the period March 1, 1961, to February 28, 1973.

[(e) The Director of ACTION is authorized to waive claims resulting from erroneous payments of readjustment allowance to Peace Corps Volunteers who terminated their volunteer service between March 1, 1961, and February 28, 1973, notwithstanding the provisions of section 5584 of title 5, United States Code, and notwithstanding the fact that the names of the recipients of such overpayments may be unknown.

[(f) Disbursing and certifying officers of the Peace Corps and ACTION are relieved from liability for improper or incorrect payment of readjustment allowances made to volunteers between March 1, 1961, and February 28, 1973, other than any cases known to have resulted from fraud, notwithstanding the provisions of the first section of the Act entitled "An Act to provide permanent authority for the relief of certain disbursing officers, and for other purposes", approved August 11, 1955 (31 U.S.C. 82a-2), and of section 2 of the Act entitled "An Act to fix the responsibilities of disbursing and certifying officers, and for other purposes", approved December 29, 1941 (31 U.S.C. 82c).]

[(g)] *(d)* In recognition of the fact that women in developing countries play a significant role in economic production, family support, and the overall development process, the Peace Corps shall be administered so as to give particular attention to those programs, projects, and activities which tend to integrate women into the national economics of developing countries, thus improving their status and assisting the total developing effort.

DIRECTOR OF THE PEACE CORPS AND DELEGATION OF FUNCTIONS

SEC. 4. (a) The President may appoint, by and with the advice and consent of the Senate, a Director of the Peace Corps and a Deputy Director of the Peace Corps.

(b) The President may exercise any functions vested in him by this Act through [such agency or officer of the United States Government as he shall direct. The head of any agency or any such officer] the Director of the Peace Corps. The Director of the Peace Corps may promulgate such rules and regulations as he may deem necessary or appropriate to carry out such functions, and may delegate to any of his subordinates authority to perform any of such functions

EXHIBIT 3

COMMITTEE ON FOREIGN RELATIONS,
Washington, D.C., October 15, 1981.

Re S. 1196, Foreign Assistance legislation: Peace Corps Autonomy.

DEAR COLLEAGUE: On June 17, 1981, during the consideration of S. 1193, the Department of State reauthorization legislation, the Senate in a bipartisan vote of 45 to 52 expressed its support for an amendment to separate the Peace Corps from the ACTION Agency. Provisions identical to those contained in that amendment as adopted by the Senate in S. 1193 were included by the Senate Foreign Relations Committee in S. 1196, the proposed "International Security and Development Act of 1981", and in S. 1015, the proposed "Peace Corps Autonomy Act", which is pending on the Senate calendar.

When S. 1196 is again taken up by the Senate, it is likely that an effort will be made by Senator Hatch to delete these provisions from S. 1196.

We believe that the reasons for the removal of the Peace Corps from the ACTION Agency were thoroughly discussed on the Senate floor on June 17 and are set forth in detail in the report accompanying S. 1015 (S. Rept. No. 97-84) which was incorporated by reference in the report accompanying S. 1196 (S. Rept. No. 97-83, page 19).

However, materials recently circulated by Senator Hatch opposing this separation have suggested it would cost between $3 and $15 million. These materials are somewhat misleading, and we would like to take the opportunity to set the record straight.

First, the Congressional Budget Office has determined that there is no budgetary impact arising from the separation of the Peace Corps from the ACTION Agency. Its official estimate that there is no cost issue involved in separation is set forth on page 9 of the report accompanying S. 1015. For the Congress, the issue of cost is authoritatively determined by CBO.

Second, it is clear that within the Administration there is sharp disagreement as to whether any costs would result from separation. Peace Corps representatives testified in House hearings earlier this year that there would be no additional cost to the Peace Corps as a result of a separation from the ACTION Agency. This estimate was confirmed by the Acting Director of the Peace Corps at a Senate Foreign Relations hearing on S. 1015 on April 29.

It is true that ACTION Agency budget analysts have reached different conclusions. That is not surprising. Currently, the Peace Corps pays to the ACTION Agency 60 percent of the cost of joint services although it does not receive 60 percent of the services. Funds for the joint services which are appropriated for the operation of the Peace Corps are thus transferred to the ACTION Agency which controls both these funds and the services provided. It is not surprising that the ACTION Agency is concerned about losing the Peace Corps. What agency would want to give up such a lucrative arrangement?

With regard to OMB projections, the entire OMB memorandum, which is reprinted on page 17 and 18 of the report accompanying S. 1015, speaks for itself. The memorandum states that "the $3 million figure should be viewed as an outside estimate" and "is likely to be too large." (S. Rept. No. 97-84, page 18).

Finally, the opponents of separation have cited a 1979 report of the Governmental Affairs Committee as estimating the cost of separation of the Peace Corps at up to $15 million.

(It should be noted that the 1979 review of the Governmental Affairs Committee was of the viability of continuation of the entire ACTION Agency and not focused simply upon the Peace Corps separation issue.)

However, the 1979 estimate was prepared prior to implementation of the 1979 Executive Order which gave the Peace Corps additional autonomy within the ACTION Agency.

Many of the joint functions cited in the 1979 report have already been separated. For example, following the 1979 Executive Order, the Peace Corps established its own planning and evaluation office, personnel office, general counsel's office, legislative affairs office, and a variety of other separate administrative offices.

It is plainly misleading and inaccurate to cite the 1979 estimates without indicating that the 1979 Executive Order substantially changed the factual basis on which those particular estimates were made.

Moreover, in those areas where joint services continue to be provided, such as recruitment and communications, the 1979 estimates assumed the continuation of VISTA—the only other full-time, stipended volunteer program operated by the ACTION Agency.

Yet, the Administration has proposed to terminate the VISTA program and the Labor and Human Resources Committee has reported legislation (S. 1087) to accomplish just that. What economies can possibly arise from keeping the Peace Corps in the ACTION Agency in order to share services with a program which the Administration is terminating?

If VISTA is terminated, the only other major programs operating in the ACTION Agency will be the Older American Volunteer Programs, and it is doubtful that any serious claim can be made that any joint recruiting efforts will be undertaken between the Peace Corps and the Older American Volunteer Programs.

Clearly, the opponents of separation are grasping at any straw to try to justify the no longer justifiable inclusion of the Peace Corps within the ACTION Agency. The al-

leged cost issue is just that—a straw issue. CBO has determined that there is no cost issue.

We urge your support for the provisions of title VI of S. 1196. There could be no more fitting tribute to the Peace Corps during this, its twentieth year, than to restore its autonomy. America needs a strong and vigrous Peace Corps now, more than ever. Separation can provide it with the opportunity to regain the strength and vision which characterized the Peace Corps during its first decade.

Sincerely,

Charles McC. Mathias, Jr.
Paul E. Tsongas.
Mark O. Hatfield.
Alan Cranston.
Christopher J. Dodd.

Mr. ROBERT C. BYRD. Mr. President, I wish to direct a question to the distinguished majority leader. Will there be any more rollcall votes today?

Mr. BAKER. Mr. President, I thank the minority leader for making the inquiry. I apologize to the Senate for having let that slip my mind. I do not plan to ask the Senate to stay significantly past 6 p.m. Therefore, it is not possible to have any further rollcall votes this evening.

As soon as the distinguished manager of the bill for the majority returns I intend to ask and I will ask now the Senator from Illinois when he wishes to lay this bill aside for the evening. We will have a brief period then for the transaction of morning business and be back on this bill in the morning.

ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that there now be a brief period for the transaction of routine morning business to extend not past the hour of 6:15 p.m. in which Senators may speak.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMISSION ON PROPOSALS FOR THE NATIONAL ACADEMY OF PEACE AND CONFLICT RESOLUTION FILES FINAL REPORT

Mr. MATSUNAGA. Mr. President, yesterday, as Chairman of the U.S. Commission on Proposals for the National Academy of Peace and Conflict Resolution, I was greatly privileged to present to President Reagan, President pro tempore of the Senate STROM THURMOND, and Speaker of the House THOMAS P. O'NEILL copies of the Commission's final report.

Mr. President, the undeniable fact is that America's heritage, power, and prestige make the United States a major force for world peace. In light of the precarious world situation, Congress created through Public Law 95–561—the Education Amendments of 1978—a nine-member Commission on Proposals for the National Academy of Peace and Conflict Resolution. This Federal study commission was mandated to examine the various proposals for a national institution dedicated to peace education, research, and training; to decide whether or not such an institution should be established; and to make recommendations with respect to its size, location, and scope. Based on its findings during its 1-year study, the Commission is recommending the establishment of a U.S. Academy of Peace.

The concept of a Federal institution devoted to peace is as old as our Republic itself. An early forerunner of the Commission's proposal was outlined in a popular almanac just after the end of the Revolutionary War, and the idea of a Federal peace agency was endorsed by the first President of the United States of America, George Washington—but the concept was never implemented. Since we have only recently celebrated the 200th anniversary of the Battle of Yorktown, which marked the end of the Revolutionary War, it is entirely fitting that a new proposal for an academy of peace should once again be placed before the American people.

The U.S. Academy of Peace envisioned by the Commission will be an interdisciplinary institution devoted to international peace. It will serve institutions and individuals in both the public and private sectors through peace research, education, training, and information services. Its work will focus on the elements of peace, the causes of war, and the skills needed to resolve international conflicts without violence. It will inform and respond to concerns and activities of Members of Congress; the executive branch, including the Departments of State and Defense; and persons in private enterprise and voluntary associations. The U.S. Academy of Peace would not be a policymaking institution and it would not intervene in disputes. It would complement, rather than compete with, programs of Government, business, labor, religious groups, international organizations, and educational institutions.

During 12 public hearings in as many American cities from Boston to Honolulu, and numerous informal meetings, the nine commissioners heard from thousands of individuals and organizations and examined the status of international, national, and community-based peace institutions to assess the status of peace learning and its use. The Commission arrived at the conclusion that a focused Federal investment in peace learning is necessary to stimulate a broad range of Government, private and voluntary activities in international peace endeavors. The Commission also concluded that our twin national goals of international peace and national security require the full exercise of peacemaking knowledge and skill to meet international conflict without resort to violence. In short, the Commission found ample evidence that such knowledge and skills do exist, but have not been recognized or effectively utilized by the U.S. Government.

As recommended by the Commission, the U.S. Peace Academy would be a federally-created, nonprofit, independent corporation. Its core budget would come from Federal appropriations, but it would also solicit private support. Its principal facilities would be located in the Washington, D.C., area, and it would develop outreach and extension programs to serve the needs of people throughout the country. The academy would provide graduate and post-graduate educational programs for which students at institutions of higher education could receive credit; it would conduct training, workshops and other continuing education services for public and private sector individuals and organizations aimed at developing and improving conflict resolution skills; and it would conduct research and disseminate information based on its findings.

A center for international peace would be established within the peace academy to which leaders from this Nation and abroad would be appointed to study; and the academy would establish an award of a medal of peace to be presented annually by the President of the United States.

Each Member of the Senate and House of Representatives will be receiving a copy of the report of the Commission on Proposals for the National Academy of Peace and Conflict Resolution in the very near future. I am informed that the report is already very much in demand, and to meet the needs of constituents, additional copies of the Commission's report may be ordered through the Government Printing Office. Individuals and organizations who wish to order the report may do so by writing to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Those placing orders should use stock number 065–000–0LL6–1. The price of the report is $6.50 a copy.

Although the publication of this report marks the end of the Commission on Proposals for the National Academy of Peace and Conflict Resolution, it is not the end of the Commission's recommendations. Legislation to implement the Commission's findings will soon be introduced in both Houses of Congress, and I urge the cosponsorship of my colleagues.

Mr. President, the concept of a national institution devoted to peace has been the dream of Americans since our Nation was founded. Now it is no longer only a dream. It is a plan. If the support which the Commission received during its study is any indication, I am confident that this plan will be implemented and this American dream will become a reality at last.

THE FUTURE OF TAIWAN

Mrs. HAWKINS. Mr. President, the government in Peking recently offered to "reconcile" with the Republic of China on Taiwan. Today, I am placing in the RECORD a speech by the Taiwanese president, Chiang Ching-Kuo on this subject, and I hope my colleagues read his reasons why the offer is unattractive.

I am also including a recent Wall Street Journal article on the subject.

While the Taiwanese are anxious to be reunified with their brothers on the mainland, they do not want reunification at any price. And the price for reunification under the program announced by Peking could be dear. Peking has made magnanimous sounding pronouncements

about Taiwan retaining some of its political autonomy, its own army, its "socioeconomic system" and even "participate in running" the national government after reunification. But how does this benefit Taiwan? They currently have full political autonomy, they currently field an effective army, they currently manage their own socioeconomic system and they currently run their national government. Reunification can only threaten these things.

Of course, it is not out of generosity that the Communists on the mainland might allow the Nationalists to maintain their own army, their own socioeconomic system and some of their own political autonomy, it is out of recognition of the facts. The mainland is in no position to take these things away from the Taiwanese, though they have tried to do so in the past. Therefore, this offer from the mainland costs them nothing. But if the Taiwanese were to take this offer seriously, they would make themselves vulnerable to future betrayal. In effect, the Peking Government is asking for the Nationalists on Taiwan to risk everything and for themselves to risk nothing.

Rather than trying to force the Taiwanese into a shotgun wedding with the mainland, we should hold up their system as a model for other developing nations to emulate. This is all the more timely given the meetings now going on in Cancun, Mexico.

While Taiwanese industrial development is most impressive, their real success has taken place in the agricultural sector. Other developing nations can learn from Taiwan about agricultural reform because the conditions in Taiwan before the reform were like those in much of the underdeveloped world today.

The key to Taiwan's agricultural program was land reform. Before land reform began in 1949, almost 60 percent of all cultivated land was under tenancy, and tenants had to pay rent equal to 50–70 percent of their total crop yield. To obtain a lease, tenants frequently had to deposit 2 years rent, and the lease could be terminated at the whim of the landlord. Under these terms, there was little incentive for the tenants to invest in their lands or to improve their productivity. Agricultural output reflected this lack of incentive, so a supplyside reform program was developed to raise production.

The land reform program implemented by Taiwan consisted of three phases: First, reduction of farm rents; second, sale of public farmlands; and third, implementation of the land-to-the-tiller program. The first phase of the program required that the maximum rent was 37.5 percent of the main crop yield and that no one who had been charging less than this prior to this new law could increase their rents. This left the tenants with more incentive to produce while helping them to save enough to buy their own land.

During the second phase, the majority of government-owned land was sold to tenant farmers. Terms were favorable, set at 2.5 times the annual main crop yield and paid off over 10 years. As a result of this program, 210,000 families were able to own and till their own land.

The final phase of the Taiwanese land reform program was the land-to-tiller program. This was the most important element of the program and entailed the compulsory sale of all farm holdings in excess of three hectares to the government which resold the land to incumbent tenants. Both the purchase and resale prices were fixed at 2.3 times the annual main crop yield. Landlords were paid in commodity bonds and stocks to government enterprises, and the tenant farmers paid for their land in 20 payments over 10 years. By the end of these initial phases of the Taiwanese land reform program, farm ownership had increased to almost 90 percent.

In Caribbean and Central American countries where the issue of land reform is such an important issue, the Taiwanese experience with the land reform can be repeated. I believe that the United States should actively encourage the governments in the Caribbean and Central America to consider following the Taiwanese model for land reform. It offers a peaceful way for laborers to acquire more control over their lives while raising their standard of living through self-help.

Recently, I visited both Taiwan and the Chinese mainland, and I can attest to the striking differences between them. Unlike the mainland, Taiwan has constructed an economic system that is envied by many throughout the world because it has brought bounty to a small island lacking any significant raw material deposits. Even the streets declare the success of the Taiwanese system and the failure of Peking's. The streets of Taipei form a hive of activity, Cars, taxis, and motorcycles are everywhere. But in Peking, bicycles and feet are the chief means of transportation. Economic statistics also bear out the differences. Per capita income on the mainland is only $300 per year, but on Taiwan it is almost 10 times as high.

Mr. President, because of her commitment to economic incentives, Taiwan is a natural model for developing nations trying to raise their agricultural and industrial output. I personally would regret seeing the Taiwanese Government take unnecessary risks with the future of their remarkable country. For not only they, but the developing world and the United States, have much to lose if a reunification gamble is tried and fails.

Mr. President, I ask unanimous consent that the speech of President Chaing Ching-Kuo on this subject be printed in the RECORD at this point.

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

PRESIDENT CHIANG CHING-KUO'S REMARKS TO THE CENTRAL STANDING COMMITTEE OF THE KUOMINTANG OF CHINA IN HIS CAPACITY AS CHAIRMAN OF THE PARTY, OCTOBER 7, 1981

BITTER LESSONS AND A SOLEMN MISSION

Alarmed by our movement of "Unifying China under the Three Principles of the People," the Chinese Communists have recently engaged in one united front propaganda move after another. They have even proposed the so-called talks to be held "on a reciprocal basis" between the Kuomintang and the Chinese Communist Party to "cooperate for the third time." Rather than "cooperating," the Chinese Communists have actually tried to make their way into the ranks of the national revolution in gestures of surrender twice during the last 60 years.

The first occasion was when the Tsungli (Dr. Sun Yat-sen as President of the Kuomintang) sought to guide left-leaning intellectual zealots onto the right track before the launching of the northward expedition. He permitted Communists to apply for Kuomintang membership as individuals but clearly stipulated they could not engage in factional activities to "topple the party." Subsequently, the Communists flew the Kuomintang banner while engaged in proletarian class struggle characterized by killing and arson. Accusations by senior party members led the Tsunktsai (President Chiang Kai-shek as Director General of the Kuomintang) to courageously carry out a party purification.

Although the revolutionary ranks were purified and the northward expedition was successfully completed, the Chinese Communists took advantage of the situation to stage a series of incidents, including the Nanchang, Hunan-Hupeh Autumn Harvest, Haifeng-Lufeng and Canton Uprisings. These set the stage for years of turmoil at home and externally stirred up Japan's aggressive ambitions toward China. Such was the so-called "first cooperation between the Kuomintang and the Chinese Communist Party" so often trumpeted by the Chinese Communists.

The second occasion arose at a time when the Tsungtsai hoped to move the Chinese Communists to take up the righteous responsibility of the people during the war of resistance against Japan. As a result of his great spirit of all-encompassing tolerance, he incorporated the remnant Communist troops into national forces and terminated their notorious Soviet regime even though they were on the verge of being wiped out after their escape to Northern Shansi.

For a time this measure inhibited the wartime open insurgency of the Chinese Communists, but unfortunately it also facilitated their treacherous maneuvers of applying "10 percent of effort to the fight against Japan, 20 percent to temporizing with the National Government and 70 percent to self-strengthening." The Chinese Communists thus had an opportunity to accelerate their own reinforcement, and this plunged all China into a holocaust of Communist destruction. This was how the Communists applied their hearts to the "Second KMT–CCP Cooperation."

These bitter lessons have convinced us that the Communists raise the slogan of "cooperation" as part of their demand to be accepted only when they are weak and need to strengthen themselves by clinging to the Kuomintang. When they have become stronger, they lash out once again. At our party's First National Congress, held at the time the Chinese Communists were admitted to the Kuomintang, Li Ta-chao said: "Our joining the Kuomintang is to accept its platform, not to impose the Communist party's platform on the Kuomintang. As we have joined this party, we shall carry out its platform and abide by its regulations and discipline as long as we remain members."

In a show of repentance and sincerity, the Chinese Communists made four commitments during the war. They said they regarded Dr. Sun Yat-sen's Three Principles of the People as essential to China at that time and they expressed their willingness to work for thoroughgoing implementation. They said they were abrogating the "Red Army," "Soviet" and "line of violence" and "meeting the national crisis together." The Com-

munists always use sweet words to conceal their conspiracies.

The Tsungli accepted the Communists and the Tsungtsai incorporated the Communist troops into the national forces on the basis of choosing the lesser of two evils. The Tsungli and Tsungtsai were motivated by their generosity as gentlemen and their willingness to cooperate with others. But from beginning to end, they found not a single word of the Communists that was not a lie and not a single move that was not political chicanery. Consequently, the nation and people had no way to escape the clutches of agonizing and bloodstained Communist treachery. The untold agony of our compatriots on the mainland and the endless turmoil in Asia today are without exception the continuation of this catastrophe.

The Chinese Communists are now frightened by the proliferating crisis of faith within their party and the military. They are unnerved by our mainland compatriots' repudiation of Communism, the Communist system and Communist rule, and by our compatriots' yearning for the political and economic progress and the prosperity found in our bastion of national recovery. They are panicking under the shock wave generated by our determination to "unify China under the Three Principles of the People." They are therefore falling back on their old trickery and attempting to promote the "third cooperation" between our party and the Communist Party. They try to cause international confusion about our adamancy in sticking to principle. They are resorting to the use of "stirring up" discord in our ranks and isolating us abroad.

In fact, the Chinese Communists have never ceased to manufacture their rumors of "peace talks," but we never paid any attention. At one time they clamored for "washing Taiwan in blood." Then they shifted to the call for "return and indemnification." Now they shout their demands for talks "on a reciprocal basis" and joint "leadership." Tomorrow they will coin another slogan and try to effect another deception.

I therefore must point out:

There is a watershed between benevolent government based on Three Principles of the People and the tyrannical rule of Communism. No confusion can be allowed between these two. The happy and peaceful lives of our compatriots in this bastion of national recovery has for more than 30 years provided a striking contrast to the unparalleled misery of our compatriots on the mainland across the Taiwan Straits. This illumines the basic difference between the two political philosophies, two systems and two ways of life, and shows which is good and which is evil. But the Communists distort this as "partisan intrasigence," "partisan rivalry" and "powers and privileges" to be enjoyed by the Kuomintang and Chinese Communist Party.

To the Communists, peace talks are another form of warfare. Although the two look different, the aim is identical. So I often say: "To talk peace with the Chinese Communists is to invite death." This is an agonizing, bloodstained lesson that we and many Asian countries have learned.

Although the Chinese Communists know that we will not talk peace with them, they still shout their slogan at the top of their lungs. Their strategem is to create in the world the false image that we do not want peace. Anyone who bothers to look into history will find that the Government of the Republic of China has taken up arms only in self-defense and has never been militaristic.

The Chinese Communist regime has been officially branded by the United Nations as an aggressor. It sent troops to help the aggressors in both the Korean and Vietnam Wars. India assisted the Chinese Communist regime and was suddenly stabbed in the back by its supposed friend. The Chinese Communists backed the Vietnamese Communists in seizing South Vietnam but before long turned on those they had helped. They have supported Communist infiltration and subversion in Southeast Asia and Latin America with money, weapons and guerrilla warfare tactics.

Aren't these facts sufficient to make all people aware of the belligerent nature of the Chinese Communists? It is obvious that the "peace talk" advocated by the Chinese Communists does not mean peace but is more political chicanery.

I want to state clearly and resolutely once again: We shall never "negotiate" with the Chinese Communists. In solemnly expressing this view, I want to tell our compatriots on the Chinese mainland that we are resolved to remove the yoke that the Communists have imposed upon them. In their clamor for "peace talks," the Chinese Communists are intending to deceive our compatriots on the mainland by saying: "The Government for which you yearn is about to talk peace with us, so you have lost all hope."

We must tell our mainland compatriots of our confidence and determination to deliver them and assure them that we shall never talk with the Communists they hate so deeply. Our solemn mission is to carry out the Three Principles of the People and unify China. We must courageously carry on the struggle to its victorious end.

From the Tsungli and the Tsungtsai and on down, all dedicated revolutionaries have known only that their responsibility is to wage the revolution for the cause of benevolence." They have never thought of life or death or of such selfish goals as fame, rank or power.

The Three Principles of the People have reached deep into the hearts of the people at home and abroad. The success of benevolent rule based on the Three Principles of the People has created the greatest era in the 70 years of the Republic of China. This success is our best assurance of unifying China under the Three Principles of the People. We have the increasing confidence of victory here in this prospering bastion of national revival. We have the determination to win the struggle against Communism and for national recovery.

Finally, I should like to quote a few passages from the Tsungtsai's diary for our common introspection:

"A devil may suddenly grow 100 feet tall, but before long it will be overwhelmed and obliterated by the spirit of righteousness."

"Persistence leads to victory and endeavor assures success. But the persistence to the last does not mean waiting endlessly, whereas endeavor means the hardening of determination without relaxation."

"This is the darkest period, but I have never wavered at all in confidence the mainland will be recovered. To the contrary, my confidence is always growing. I am sure that the truth is always on my side."

These passages imply the solemn mission in which our comrades and compatriots are engaged. We shall never pause for even an instant until the mission has been completed.

Mrs. HAWKINS. Mr. President, I ask unanimous consent to have printed in the RECORD, an article from the Wall Street Journal.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Wall Street Journal, Oct. 15, 1981]

CHINA

PEKING OFFER TO TAPEI "DOESN'T MAKE SENSE"

"The other day the Communist government at Peking published yet another invitation designed to lure the Nationalists on Taiwan into rejoining the mainland. This caused a bit of excitement because the Communists went so far as to offer formally that Taiwan could retain some political autonomy, its own 'socioeconomic system' and even its own army, while its leaders could 'participate in running' the national government. Taiwan, however, promptly rejected the offer, much to the consternation of one-China optimists who saw it as a generous gesture. The New York Times, for example, held that by failing to discuss the proposal Taipei 'forfeits the propaganda struggle.'

"This would be a small price, if true, considering what Taiwan stands to lose by taking the Peking offer seriously. What you had in China's offer wasn't any waking up to reality of the sort that occurred, say, when Anwar El-Sadat of Egypt finally agreed to talk with the Israelis, who had three times defeated his country at war. What we've just heard from Peking is more analogous to an offer by a large corporation in the midst of bankruptcy proceedings to acquire its most successful competitor and set it up as some kind of subsidiary.

"It's an offer, in short, that doesn't make sense. Consider, for example, that Taiwan's per capita income stands, at nearly $3,000 a year, among the highest in the developing world, while China's, at below $300 a year, ranks among the lowest. The gap between the rich and the poor is narrower in capitalistic Taiwan than in supposedly egalitarian and Communist China. And the two-way external trade carried on by Taiwan's 17 million people rivals that of the mainland, with its population of nearly a billion. China, in short, doesn't have the sort of economy into which Taiwan wants to be absorbed.

"This is particularly true when no one, inside or outside of China, seems to be taking seriously Taiwan's own statements on the subject. It argues that the only way to bring about reunification is for the mainland to 'abandon the Communist system.' This would be, after all, the first prescript of any Taiwanese official asked to give advice on economic development policy. And development policy surely must be a key area in which the mainland's rulers want Taiwan's leaders to 'participate in running' the nation.

"Now it is of course true that Deng Xiaoping and his allies have sharply modified Mao's communism, introducing certain capitalist elements, such as joint ventures with foreign firms. But when they began making their overtures to Taiwan, K.T. Li, for many years Taipei's finance minister and an architect of its 'economic miracle,' pointed out the fundamental contradiction that faces not only Peking but any Communist regime as it contemplates economic reform. 'If it adopts the pragmatic measures that proved so successful in Taiwan,' he argued, 'they will lead to the emergence of certain capitalistic elements that will erode the communist ideology and eventually destabilize the existing political system.'

"If you don't believe Mr. Li, take a trip today to Poland and see what he's talking about. The Chinese Communists have come a long way since the death of Mao and it's comforting to know they're tilting in our direction rather than toward the Soviets. But they haven't yet shown signs that they really understand the economic problem they face. And until they do Taiwan deserves nothing but support in its refusal to get sucked into their schemes."

THE ADMINISTRATION'S STRATEGIC WEAPONS PROGRAM

Mr. PELL. Mr. President, the administration's recent announcement concerning the development of the MX missile, the B–1 bomber and related systems represents a commitment to the largest single strategic weapons program since

the beginning of the nuclear age. I have some deep reservations about the staggering price tag attached to this program and strong doubts about whether the value of the additional security we will supposedly be buying is worth the enormous investment of tax dollars. I am also concerned about the foreign policy and arms control implications of this decision.

At the outset, let me state that there are several aspects of the President's decision which I strongly support. I was especially heartened by the elimination from consideration of the so-called "racetrack" basing mode for the MX missile. This proposal would have had a devastating effect on the environment in large areas of our Western States, in addition to its enormous price tag. The President's decision to drop the racetrack basing mode makes good sense, and I applaud him for that.

I am also encouraged by the President's intention, in his announcement, to seek genuine arms reduction with the Soviet Union. Even as we continue to modernize our own strategic forces, we must actively pursue arms reductions, and I am hopeful that the delay of a final decision on the basing mode for the MX missile will open the door to early and constructive discussions with the Soviets on a verifiable new strategic arms limitation treaty and limits on nuclear weapons in Europe. Arms control is a sine qua non of a sane strategic weapons program, because further spending on strategic forces will buy more security only if coupled with limitations on the deployment of such forces.

Several aspects of the President's program remain very troubling to me. The cost of the planned systems is dangerously high in view of the compelling national interest in bringing down the Federal deficit and eventually balancing the budget. Obviously, at a time when human services programs are being slashed to the marrow, the Congress ought to be skeptical of the need for such an enormous expenditure for new strategic weapons. In this connection, I would like to point out that the announced $180.3 billion price tag for the first 6 years of the program does not take into account the fact that an ultimate decision on the basing of the MX could add substantially to the total figure.

I also understand that the $180.3-billion figure only includes R. & D. and initial production during the 6-year period; it does not include the total cost of producing the proposed systems. At bottom, we must ask ourselves how much additional security we are purchasing for such an astonishing cost. We must also ask what the effect of spending so much on new strategic systems will mean for funding badly needed improvements in our conventional forces and for servicing and maintaining existing equipment.

There is no doubt in my mind that production and modernization of strategic weapons must be part of our national defense effort. I seriously question, however, the wisdom or going ahead with the B–1 bomber, when even the Secretary of Defense has conceded that the B–1 bomber will be able to penetrate Soviet air defenses for only a few years after its deployment in the late eighties.

In view of the cost of this item, is this shot in the arm for the Air Force worth developing when our existing B–52's will be able for many years to serve as cruise missile carriers and when an advanced technology or "Stealth" bomber will be available in the 1990's? The Congress will have to carefully consider whether the B–1 can be justified on any basis, especially in view of the minimal increment of additional security it will afford. At the very least, the Congress needs a better justification for the B–1 than it currently has.

In regard to the MX, the President has essentially deferred a decision on a basing mode since no one expects the missiles which will initially be based in hardened Titan silos, to close the so-called window of vulnerability permanently. The President has mentioned three basing modes which will be examined: the continuous airborne patrol aircraft, a land-based system protected by a ballistic missile defense system, and deep underground basing.

Each of these three options involves substantial costs and problems, and I would hope that the administration would consider a fourth alternative, one which, in my view, would ultimately be much more cost-effective and strategically advantageous: the sea-based Trident II missile. The apparent diversity and flexibility of the nuclear Triad continues to have political and other attractions, but may be on the verge of being outdated and unnecessary in terms of the security it provides at such enormous cost.

A submarine-based ballistic missile system would be far more cost-effective and certainly far less vulnerable to enemy attack than the proposed MX missile in any land-based mode. I would urge the administration to accelerate development of the Trident II missile and seriously consider the sea-based Trident II as an alternative to further development of the MX.

I also urge the administration to be mindful of the arms control implications of its proposal, in particular the decision to deploy large numbers of nuclear sea-launched cruise missiles. Since cruise missiles could be deployed on hundreds, if not thousands, of submarines and surface vessels, there would be an immense verification problem that could jeopardize the possibility of achieving meaningful limitations on these weapons in a new SALT agreement. If the Soviet Union were to respond with a similar program involving the larger number of submarines and surface ships at their disposal, a major new threat to the United States would arise.

Furthermore, a new sea-launched cruise missile program could undermine the present NATO consensus to deploy new land-based theater nuclear weapons in Europe, because the deployment of sea-launched cruise missiles would call into question the need for such land-based weapons.

The prospects for negotiations with the Warsaw Pact for mutual limits on theater nuclear deployments in Europe may also be seriously diminished.

Mr. President, for all of these reasons I believe that the Congress should be very skeptical about going along with the proposed strategic weapons package in its present form. In particular, it makes no sense to proceed without a firm commitment by the administration to utilize arms control negotiations as a complement to weapons programs in enhancing our national security.

These are critical times as we strive to put our economic house in order and preserve the peace. But neither objective will be served if we proceed down the road toward a costly and endless nuclear arms race with the Soviets. Now is the time for the Congress to insist on a rational and cost-effective defense program that emphasizes negotiated restraint as well as new weapons.

SENATOR MATSUNAGA'S ADDRESS AT THE AMERICAN MINING CONGRESS CONFERENCE

Mr. PRESSLER. Mr. President, I chaired a hearing on "Law of the Sea" before the Subcommittee on Arms Control, Oceans, International Operations, and Environment on September 30. I should very much have liked to have my distinguished colleague from Hawaii, Senator MATSUNAGA, present testimony, but that day he was addressing the American Mining Congress Conference in Denver, Colo. His remarks there are important and timely, and I think it highly appropriate that they be made more easily available to the public. Mr. President, I ask unanimous consent that Senator MATSUNAGA's address be printed in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

STATEMENT BY U.S. SENATOR SPARK M. MATSUNAGA AT THE AMERICAN MINING CONGRESS CONFERENCE

Thank you Jim for your kind introduction. Mr. Kronmiller, Mr. Eskin, Mr. Lawless, Mr. Dubs, members and guests of the American Mining Congress: Aloha! It is a great privilege for me to be with you here in Denver and to chair this afternoon's program on Undersea Mineral Resources.

One of my favorite talking pieces which I have accumulated during my 19 years in Congress is a manganese nodule encased in clear plastic. It is conspicuously placed on the coffee table in my Senate suite. Visitors from Hawaii and elsewhere invariably ask me, "What is that black rock? Where did it come from? Why do you have it so prominently displayed?" "That is a manganese nodule," I tell my guests, "and it came from an area of the seabed in water depths of about 15,000 feet located just southeast of Hawaii."

Then, when they ask me what the rock is used for or what it's made of, I begin to feel like an expert, and respond that the nodule is a chemical precipitate several hundred thousand years old, and that it contains nickel, copper, cobalt and manganese, all of which are strategic or critical minerals upon which the U.S. economy is highly dependent. I also tell them—and this is a surprise to many—that if these nodules are harvested in an intelligent manner, for all practical purposes they can constitute a renewable resource, for the rate of mining can be matched by the rate at which additional accretion of these minerals takes place.

I relate further that the sample nodule was recovered by a huge underwater vacuum-cleaner type device suspended from a ship, and that Hawaii is being scrutinized by the world's ocean mining industry as the possible site of the first major deep seabed minerals processing facility. The combination of factors such as proximity to the richest deposits, the availability of competitive renewable energy, and some favorable legislative language in Public Law 96-283 have, in my estimation, thrust Hawaii into a leading position for such a commercial development.

Of course, an ocean minerals processing industry should do wonders for the economy of the 50th State, but more importantly, the success of such a venture would be invaluable for diversifying the minerals base of the Nation. To set the stage, allow me to try to put undersea mineral resources into perspective with minerals generally.

Events of the past few years, particularly the last two, have focused increased, and sorely needed, attention on the critical importance of minerals—all minerals—to the economy and security of our country. In the process, within the U.S. Congress, there has been a growing awareness of the many factors and issues involved in meeting this Nation's minerals needs.

Most of you, I'm sure, are aware of the almost total dependence of the United States on foreign imports for a number of key mineral resources. This situation is made no less discomforting by the many, serious political stresses and uncertainties that abound in various areas of the world supplying our needs, or that affect our relationships with those areas.

Some observers downgrade this dependence—this vulnerability—wrongly, I think, on grounds that the supplier nations are dependent on their mineral exports and therefore would not curtail them. In my view, however, it would ill-serve this Nation and its people to ignore these political realities and practical mining realities, or to rely on such a simplistic interpretation.

It would be the height of imprudence and irresponsibility not to develop alternative means and sources to help meet future needs and contingencies. Of course, no nation can be totally independent of others. Interdependence is not only a condition of the times, but also, in some respects, desirable. However, interdependence is one thing . . . overdependence is quite another. One of the remedies to one kind of overdependence lies in the mining of deep seabed nodules.

Fifteen months ago, the "Deep Seabed Hard Mineral Resources Act of 1980" became law. The Act, Public Law 96-283, states that "the future national interest of the United States requires the availability of hard minerals resources which is independent of the export policies of foreign nations." The Act further recognizes deep seabed nodules as an alternative source of supply significant both to national and to international needs and provides for a system under which U.S. citizens could obtain license to explore and mine the deep seabed.

That Act contains three other important features. First, it provides that if other nations would recognize U.S. license to mine within specified areas, we in turn would do the same. Second, the U.S. Government is authorized to negotiate agreements with other nations with similar legislation in order to provide for reciprocal recognition of licenses and mining areas, and for a system to resolve conflicts between overlapping applications. Third, a very important feature of the Act provides that U.S. companies operating under U.S. legislation should be grandfathered into any future Law of the Sea Treaty to which the U.S. becomes a party.

It is my great privilege to play a leadership role in shepherding the bill which became law through five Senate Committees and the full Senate, four House Committees and the House, and urging the President to sign the measure into law. I have been pleased to note that since then, much progress has been made toward implementation of the law.

Four U.S. ocean mining consortia have pursued their activities, although in a manner which could use some stimulation. The National Oceanic and Atmospheric Administration just last month issued final regulations implementing much of the Act. International negotiations on a reciprocating states regime have proceeded smoothly. Germany and England have passed their legislation and France is well on its way to do likewise. Similar legislation is beginning to move in Belgium, Holland and Italy.

I am hopeful, and I know you are too, that the reciprocating states regime will be in place in time to start processing applications for exploration licenses in January 1982, as contemplated by Congress.

But despite all this progress, I am troubled by the course of the Law of the Sea negotiations. As you know, a list of U.S. reservations and concerns regarding the Draft Convention was conveyed to the Law of the Sea Conference in Geneva last August by Ambassador James L. Malone. Among other things, his listing suggests that the Draft Convention involves a potential loss of sovereignty.

In testimony presented to the Congress earlier this year, the Reagan Administration stressed that the most problematic features of the treaty included:

(1) A burdensome regulatory system adversely affecting non-discriminatory access and security of tenure;

(2) A supranational mining company called the Enterprise;

(3) A burdensome and unrealistic transfer of technology requirements;

(4) An inflationary production control setup;

(5) A Supreme one nation-one vote Assembly;

(6) A 36-member Council on which the Soviets control three seats and the U.S. none;

(7) A review conference after 15 years which can bind the U.S. to treaty amendments even if the U.S. Senate refuses to ratify them;

(8) Troublesome criteria for revenue sharing; and

(9) The total absence of grandfather language in the treaty text to protect the rights of the companies, which in good faith have relied on the freedom of the seas doctrine incorporated in national legislation, and which have continued their efforts to develop seabed mining technology and to explore the seabed.

From the U.S. point of view, those are undeniably severe deficiencies in the Draft Convention. If suitable modifications are not negotiated, I believe the chances for ratification of a Law of the Sea treaty by the United States Senate would be placed seriously in doubt. If you will turn to the record of the Senate floor debate of December 14, 1979, on the Deep Seabed Hard Mineral Resources Act, you will find that all of these same concerns were expressed then, and they remain as serious concerns today.

The intent of the Congress and the actions required under the Deep Seabed Hard Mineral Resources Act must be carried out to the fullest extent possible, including suitable arrangements with reciprocating states. In this regard, both the Administration and the American mining industry have significant and responsible roles to play if these objectives are to be achieved.

Deep seabed mining can contribute substantially to the economy and security needs of the United States and the free world. It is highly essential that we expedite the approval process.

I am anxious to hear what our distinguished panel of speakers have to say about these important issues and the extent to which the objectives of the 1980 Act are being met. We might pursue these matters after the speakers on the panel have made their presentation.

Thank you.

THE GIVEAWAY LOBBY AT CANCUN

Mr. HARRY F. BYRD, JR. Mr. President, tomorrow, President Reagan and the leaders of 21 other developed and underdeveloped nations will meet at Cancun, Mexico, for what is advertised as a "North-South Summit."

The announced purpose is a dialog between rich and poor nations. Given the wide schism between the industrialized world and the undeveloped countries on economic issues and the split within these two camps, it will be remarkable if the Cancun dialog does not descend into acrimony.

In my view, President Reagan seems to be going to this conference in the right frame of mind. He and members of his administration have repeatedly stressed their view that massive transfers of aid to the lesser developed countries often are counterproductive—and that until these nations permit free enterprise to flourish, they will make scant progress.

I like the way President Reagan put it:

> Unless a nation puts its own financial and economic house in order, no amount of aid will produce progress.

The Secretary of the Treasury, Mr. Regan, put it this way:

> The challenge is to create new wealth, rather than to redistribute current wealth.

The President will urge the nondeveloped countries to drop their demand for confrontation in so-called "global negotiations" and agree to work through existing institutions to spur trade and investment.

The Cancun conference comes just 3 weeks after adjournment of a gathering of 143 finance ministers and central bankers in Washington. That conference, dealing with policies of the World Bank and the International Monetary Fund, also focused to a great extent on the issue of aid to underdeveloped nations.

The President spoke at the Washington conference, as did Treasury Secretary Donald Regan and A. W. Clausen, the new President of the World Bank. The three were in essential agreement on the crucial point that the salvation of the Third World lies not in endless streams of aid, but in private investment, economic development and trade.

Media reports indicated that the position of U.S. officials and Mr. Clausen was received with acquiescence, if not enthusiasm. The British were quite receptive, the French and Canadians somewhat less so, and the Third World nations at least restrained in their criticism.

Certainly it is high time for a fundamental change of attitude at the principle multilateral financial institutions—especially at the International Development Association (IDA), the so-called "soft loan window" of the World Bank.

Indeed, I feel the Reagan administration and World Bank President Clausen

have not gone far enough in reducing the seemingly endless flow of billions into IDA. Efforts early this year by Budget Director David Stockman to press for a cut in the sixth huge replenishment of IDA were squelched when the foreign aid lobby—big commercial banks as well as foreign governments—rallied to the giveaway cause.

I say "giveaway" advisedly.

True, the funds passed out by IDA to underdeveloped nations are termed "concessional loans." But look at the terms: A three-quarters of 1 percent service charge, with 10 years of grace in repayment, which is stretched over 40 years—on the optimistic assumption that there will be any repayment at all.

In my book, these are grants, pure and simple.

These disguised grants, over 18 years, have totaled more than $20 billion. Seventy-five nations have been recipients, but a whopping 42 percent of the total has gone to India.

I trust I need not remind the Senate that India has hardly shown herself a friend of the United States and the other industrialized democracies that have so generously financed her long-running ventures in oppression and socialism.

Indeed, it is one of the great ironies of IDA financing that so much of it has served to prop up socialistic regimes, many of them antidemocratic, if not downright totalitarian. World Bank critics have noted this trend and assailed the Bank's former President, Robert S. McNamara, for encouraging it.

The new President, Mr. Clausen, has declared that the Bank should serve as a catalyst for private investment. I find that a refreshing change of attitude.

At the same time, I confess I was disappointed when Mr. Clausen stated at the end of the Washington conference that he would press for a seventh replenishment of IDA, expanded from a proposed $12 billion to $16 billion. I hope that experience in office will persuade him to change that view.

The American share of IDA replenishments has been enormous. Of the total in the past, the United States provided 42 percent ($320 million) when the IDA was formed; 39 percent, $312 million of the funds for the first replenishment in 1965; 40 percent, $480 million, for the second replenishment in 1968; 40 percent, $960 million, for the third replenishment in 1971; 33 percent, $1.5 billion, for the fourth replenishment in 1974; and 31 percent, $2.4 billion, for the fifth replenishment, July 1, 1977 to June 30, 1980.

In the sixth replenishment, now underway and recently approved by the Senate—without my help—the U.S. contribution is to be $3.2 billion, or 27 percent.

I cannot see that the U.S. taxpayers have $3.2 billion to spare.

Moreover, in addition to this funding for IDA, the Senate today seems ready to approve a bill authorizing some $5.8 billion in other foreign aid. This sum represents an increase of nearly 20 percent over last year's level.

Where are our priorities?

At a time when we are cutting the Federal budget by $35 billion and holding total spending growth to 7 percent, the Senate surely should not vote more than $3 billion for disguised grants to foreign countries and a 20-percent increase in other foreign aid.

I leave it to those who support those measures to explain their position to the American people.

Now the global giveaway lobby is assembling at Cancun to sound once again its unending cry for more, more, more.

I urge the President to stand firm against these ceaseless demands.

Over the years since World War II, the United States has furnished more aid to other nations than all other nations combined through all of world history.

I cannot see that this Nation is more secure or has more friends and allies, than it had when it embarked on this unprecedented giveaway in the 1940's. In fact, I suggest that the opposite is the case.

So I believe the President should resist the cries for "more" at Cancun.

And when he returns, I hope that he and members of his administration will undertake a thorough reexamination of all our aid programs, bilateral and multilateral alike. To date I do not believe that foreign aid has undergone the same intense and objective scrutiny as has been given to other programs.

This is a time when many Americans are being called upon to sacrifice to gain control over runaway spending and runaway inflation.

At such a time, we cannot continue runaway foreign aid.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Acting President pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

MESSAGES FROM THE HOUSE

At 11:07 a.m., a message from the House of Representatives, delivered by Mr. Gregory, one of its reading clerks, announced that the House has passed the following bill, without amendment:

S. 1209. An act authorizing appropriations to the Secretary of the Interior for services necessary to the nonperforming arts functions of the John F. Kennedy Center for the Performing Arts, and for other purposes.

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC-2092. A communication from the Acting Comptroller General of the United States transmitting, pursuant to law, a report entitled "The World Wide Military Command and Control Information System—Problems in Information Resource Management"; to the Committee on Armed Services.

EC-2093. A communication from the Acting Comptroller General transmitting, pursuant to law, a report entitled "Two Contracts for Nuclear Attack Submarines Modified Under Authority of PL85-804—Status as of December 20, 1980"; to the Committee on Armed Services.

EC-2094. A communication from the Under Secretary of the Air Force, transmitting, pursuant to law, notice that the Air Force has decided to retain Goodfellow Air Force Base, San Angelo, Texas, as a major installation; to the Committee on Armed Services.

EC-2095. A communication from the Deputy Assistant Secretary of Defense for Facilities, Environment, and Economic Adjustment transmitting, pursuant to law, notice of two construction projects to be undertaken by the Army National Guard; to the Committee on Armed Services.

EC-2096. A communication from the Secretary of the Interstate Commerce Commission transmitting, pursuant to law, notice that the Commission has been unable to render a final decision in the matter of Changes in Routing Provisions-Conrail-July 1981, and seeks an extension of 90 days until March 22, 1982, to reach a decision; to the Committee on Commerce, Science, and Transportation.

EC-2097. A communication from the Office of the Assistant Legal Adviser for Treaty Affairs, Department of State, transmitting pursuant to law, international agreements other than treaties entered into by the United States within the previous sixty days; to the Committee on Foreign Relations.

EC-2098. A communication from the Supervisor of Benefits, Farm Credit Banks of Spokane transmitting, pursuant to law, certain 1980 plan year reports of the Twelfth Farm Credit District; to the Committee on Governmental Affairs.

EC-2099. A communication from the Associate Commissioner for Examinations of the Immigration and Naturalization Service transmitting, pursuant to law, copies of orders entered in 766 cases exercising authority in section 212(d)(3) of the Immigration and Nationality Act; to the Committee on the Judiciary.

EC-2100. A communication from the Acting Secretary of the Air Force transmitting a draft of proposed legislation to increase the limit on payments for damage to or loss of personal property incident to service; to the Committee on the Judiciary.

EC-2101. A communication from the Associate Commissioner of Examinations, Immigration and Naturalization Service, transmitting, pursuant to law, 1,579 reports on visa petitions accorded third and sixth preference status; to the Committee on the Judiciary.

EC-2102. A communication from the Acting Director of the Federal Mediation and Conciliation Service transmitting, pursuant to law, the thirty-third annual report of the Service, fiscal year 1980; to the Committee on Labor and Human Resources.

EC-2103. A communication from the Director-designate of the National Institute of Education transmitting, pursuant to law, the final report on the Institute's comprehensive examination of vocational education programs; to the Committee on Labor and Human Resources.

PETITIONS AND MEMORIALS

The following petitions and memorials were laid before the Senate and were referred or ordered to lie on the table as indicated:

POM-529. A petition from citizens of Florida, relative to licensing of CB radios; to the Committee on Commerce, Science, and Transportation.

POM-530. A resolution adopted by the Village of Spring Valley, New York, relative to the sale of AWACS aircraft to Saudi Arabia; to the Committee on Foreign Relations.

POM-531. A resolution adopted by the Legislature of the Virgin Islands; to the Committee on Veterans' Affairs.

"RESOLUTION NO. 1042

"Whereas during the Viet Nam era many of our young Virgin Islanders joined other Americans from across the nation to protect the interests of the United States abroad; and

"Whereas the members of this Legislature empathize with the suffering and neglect of the Viet Nam veterans; and

"Whereas the public commendation that other veterans have received has been long overdue for the Viet Nam veterans; and

"Whereas the strength and courage of these Americans under the most difficult and stressful circumstances provide an example worthy of respect; and

"Whereas the Legislature regards it as an honor to publicly support and commend the Viet Nam veterans; and

"Whereas during World War II, the Virgin Islands petitioned the Congress to be included in the Draft Laws of the United States; and

"Whereas the Virgin Islands, since World War II, has had the highest per capita participation in the defense forces of the United States; now therefore, be it

"*Resolved* By the Legislature of the Virgin Islands:

"SECTION 1. The Legislature of the Virgin Islands hereby honors and commends all Viet Nam era veterans for their defense of their country's interests.

"SEC. 2. Copies of this Resolution shall be prepared and sent to all Virgin Islands Viet Nam veterans.

"SEC. 3. Upon passage of this Resolution, a copy shall be forwarded to the President of the United States, the President of the U.S. Senate, the Speaker of the House, the Secretary of Defense, and the Chairman of the Armed Services Committees of the Congress."

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. SIMPSON (for Mr. THURMOND), from the Committee on the Judiciary; without amendment:

S. Con. Res. 43. A original concurrent resolution granting the status of permanent residence to certain aliens (Rept. No. 97-241).

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. HATCH, from the Committee on Labor and Human Resources:

Rosemary M. Collyer, of Colorado, to be a Member of the Federal Mine Safety and Health Review Commission for the term of six years expiring August 30, 1986;

Ford Barney Ford, of California, to be Assistant Secretary of Labor for Mine Safety and Health:

(The above nominations were reported by the Committee on Labor and Human Resources with the recommendation that the nominations be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mrs. KASSEBAUM:

S. 1756. A bill for the relief of Belino D. Iway, doctor of medicine, his wife Olivia Nunez, and his children Yvonne Iway, Christine Iway, and Edsel Francis Iway; to the Committee on the Judiciary.

By Mr. STEVENS:

S. 1757. A bill to amend the Internal Revenue Code of 1954 to clarify the tax exempt status of certain amateur sports organizations; to the Committee on Finance.

By Mr. DECONCINI (for himself and Mr. D'AMATO):

S. 1758. A bill to amend title 17 of the United States Code to exempt the private noncommercial recording of copyrighted works on video recorders from copyright infringement; to the Committee on the Judiciary.

By Mr. WALLOP (for himself and Mr. CRANSTON):

S. 1759. A bill to clarify Congressional intent regarding the full application of section 1073 of title 18, United States Code, to State felony parental kidnaping cases; to the Committee on the Judiciary.

By Mr. HATCH:

S. 1760. A bill to provide for civil rights in public schools; to the Committee on the Judiciary.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. STEVENS:

S. 1757. A bill to amend the Internal Revenue Code of 1954 to clarify the tax exempt status of certain amateur sports organizations; to the Committee on Finance.

STATUS OF CERTAIN AMATEUR SPORTS ORGANIZATIONS

Mr. STEVENS. Mr. President, today I am introducing an amendment to section 501 of the Internal Revenue Code concerning amateur sports organizations. This legislation is intended to be a technical clarification of language concerning amateur sports organizations which became law by section 1313 of the Tax Reform Act of 1976.

In 3 short years American athletes will be competing at the summer Olympic games in Los Angeles. This will be the first time in 8 years that our young people will be able to participate fully in this great athletic event.

In 1976, Congress fully recognized that we are one of the few nations in the world which does not directly subsidize an Olympic team. The philosophy then, and the one that still prevails, is that the private sector should be responsible for fielding our Olympic teams.

However, the Congress felt that the Government should in some way help facilitate the Olympic effort through assisting the national, regional, and local sports organizations that provide and train athletes for the Olympics. An amendment was made to section 501 (c)(3) of the Internal Revenue Code which made it easier for these organizations, primarily national governing bodies, to get tax exempt status.

Language was added to the amendment to exclude from tax exempt status those organizations which provided athletic facilities or equipment. This was done to prevent private health and social clubs from obtaining a tax windfall. It was absolutely clear from the congressional intent that this was not meant to apply to amateur sports organizations.

However, the Treasury Department has read the language differently, and now many national governing bodies are in danger of losing their tax exempt status and many have been denied tax exempt status simply because they provide training facilities and equipment. Among these organizations are the U.S. Gymnastics Federation, U.S. Diving, the Track Athletics Congress and the U.S. Volleyball Association.

Without tax exempt status, many of these organization's development drives are at a virtual standstill—severely affecting our Nation's effort to field an effective Olympic team for 1984.

What this amendment does is to restate, clarify and fully implement the intent of Congress that was expressed 5 years ago. I strongly urge all my colleagues on both sides of the aisle to support this measure.

By Mr. DECONCINI (for himself and Mr. D'AMATO):

S. 1758. A bill to amend title 17 of the United States Code to exempt the private noncommercial recording of copyrighted works on video recorders from copyright infringement; to the Committee on the Judiciary.

RECORDING OF COPYRIGHTED WORKS ON VIDEO TAPE

Mr. DECONCINI. Mr. President, together with my colleague from New York (Mr. D'AMATO), I am introducing a bill to amend the copyright law to provide an exemption from that law for certain types of video recording for noncommercial purposes. On October 19, the Ninth Circuit Court of Appeals ruled in Universal City Studios, Inc. against Sony Corp. of America that off-the-air copying of telecasts of copyrighted audiovisual materials by owners of video tape recorders in their own homes for private noncommercial use constitutes an infringement of copyright. This decision finds that Congress, in passing the recent Copyright Act of 1976, did not intend to create a blanket, home-use exception for video tape recorders and that home video recording does not constitute fair use.

When Congress debated the copyright law revisions in 1976, the video recorder industry was at an experimental stage and not much was known about the problems that would arise. In the interval since those debates, 3 million Americans have obtained video recorders. The recent Ninth Circuit Court of Appeals decision would limit the use of these machines to commercially prerecorded tapes and to video tapes created by individuals with camera equipment which they may choose to purchase. Ironically, two of the leaders in the manufacture of prerecorded tapes are the plaintiffs in this lawsuit.

Congress now has enough information available to it to make an informed change in the copyright law to accommodate the new technology. The bill I introduce today will exempt the video recording of copyrighted works for private, noncommercial use from copyright in-

fringement charges. My amendment adds a new section 119 to chapter 1 of title 17 that will allow an individual to record television programs off-the-air for their own use and pleasure. It will not allow these recordings to be used commercially.

The technology involved in the home entertainment field is advancing at a pace that is difficult to keep up with for Congress and the courts. My legislation will assure that individuals who have purchased or wish to purchase video recorders in order to schedule their own television watching will continue to have this flexibility. I urge my colleagues to support this legislation.

By Mr. WALLOP (for himself and Mr. CRANSTON):

S. 1759. A bill to clarify Congressional intent regarding the full application of section 1073 of title 18, United States Code, to State felony parental kidnaping cases; to the Committee on the Judiciary.

PARENTAL KIDNAPING

Mr. WALLOP. Mr. President, today I join with my colleague from California (Mr. CRANSTON) to introduce a bill which clarifies one section of the Parental Kidnaping Act. The act was passed last December, and was to be fully implemented by the 1st of July. However, after carefully monitoring the Justice Department's procedures to carry out their responsibilities under the act, I have concluded that the Department is not properly implementing the program.

The Parental Kidnaping Act has three sections. One section requires all States to adopt the uniform child custody code. Another authorizes the Federal Parent Locator Service to assist States in locating parents who have taken their children in contravention of a child custody decision. The third section authorizes the FBI to assist States and local authorities in locating a parent when a felony warrant has been issued. It is this last provision with which I am concerned today.

The Justice Department issued a memorandum at the beginning of the year which set very restrictive requirements for FBI assistance in parental kidnaping cases. The restrictions have prevented the effective management of this section of the act. The bill I am introducing today would clarify congressional intent regarding FBI assistance to State and local authorities.

Recently, I presented testimony to the House Judiciary Committee on this problem. The testimony is a thorough outline of the problem, and I ask unanimous consent that my comments be printed in the RECORD at this point. I would also request that the text of the bill be printed in the RECORD followed by my statement.

There being no objection, the bill and statement were ordered to be printed in the RECORD, as follows:

S. 1759

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) subsection (a) of section 10 of the Parental Kidnaping Prevention Act of 1980 (Public Law 96-611) is amended by—

(1) inserting "(1)" before "In";

(2) striking out "section 302" and inserting in lieu thereof "section 7";

(3) adding at the end of paragraph (1) (as so redesignated) the following new sentence: "Congress further declares, notwithstanding any other provision of law, that such section 1073 apply to State felony parental kidnaping cases without restriction and in the same manner as to all other State felony cases."; and

(4) adding at the end the following new paragraph:

"(2) Not later than 30 days after the date of enactment of this section, the Attorney General of the United States shall eliminate all guidelines that require information that the child is in physical danger or is being abused or neglected, corroboration, prior approval, or otherwise limit the application of such section 1073 in State felony parental kidnaping cases in a manner which frustrates the intent of Congress that such cases be subject to only the requirements applicable in the case of all State felonies under such section. Not later than 45 days after the date of enactment of this section, the Attorney General shall report to the appropriate Committees of the Congress as to how and when the Department of Justice has complied with the provisions of this section and shall provide such Committees with copies of all memorandum, directives, or other communications issued by the Department of Justice, including the Federal Bureau of Investigation, with respect to implementation of this section.".

(b) subsection (b) of section 10 of such Act is amended by—

(1) inserting a comma and "by State and by type of agency or individual initiating such application," in paragraph (1) after "applications";

(2) inserting a comma and "by State," in paragraph (2) after "complaints"; and

(3) inserting a comma and "including a description of disposition of each application and the reasons therefore," in paragraph (3) after "information".

STATEMENT OF SENATOR MALCOLM WALLOP

My sincere thanks to you, Mr. Chairman, and to your distinguished colleagues for convening this timely and important hearing on the implementation of the Parental Kidnaping Prevention Act of 1980, an act with which I have been associated from its inception. Since the law was passed last December, my staff has been monitoring its implementation by the Department of Health and Human Services and by the Department of Justice, and has been tracking to a more limited extent the private custody litigation pending in state courts involving the new law. As the original sponsor of S. 105, the bill from which sections 6-10 of Public Law 96-611 are substantially derived, I note at the outset my considerable disappointment with the failure of the Justice Department to conform its Fugitive Felon Act policies to the express language and legislative history of section 10 of the new law. If this hearing sparks a correction on the part of the Criminal Division and the F.B.I. with respect to the issuance of Unlawful Flight to Avoid Prosecution ("UFAP") warrants in state felony parental kidnaping cases involving interstate or international flight as the law requires, in my opinion it will prove to have been an extremely constructive proceeding, indeed.

The Parental Kidnaping Prevention Act ("PKPA") was enacted on December 28, 1980, to safeguard countless children from the harmful effects of child snatching, the wrongful removal or restraining of a child by a parent or parent's agent in violation of a custody decree or in violation of the other parent's rights as a joint custodian where a custody determination has not yet been made. The PKPA grew out of S. 105, a bill I introduced on January 23, 1979, which was modeled upon an amendment I had successfully offered to S. 1437, the criminal code reform legislation considered by the Senate in the 95th Congress. By the end of the 96th Congress, a bipartisan group of 25 senators had cosponsored S. 105, and over 60 House members had cosponsored H.R. 1290, a companion measure introduced by Representative Charles Bennett.

In January, 1980, the Senate Judiciary Subcommittee on Criminal Laws held a joint hearing on S. 105 with the Labor and Human Resources Subcommittee on Child and Human Development, which was followed in June by a hearing before the House Judiciary Subcommittee on Crime on related bills. The hearings were instructive in several respects.

First, the concealment of children who have been wrongfully removed or retained by a parent has stunning effects on the left-behind parent, who is typically emotionally and financially drained by the unrelenting search for the missing child, as well as for the victim child, who suffers anger, fear and sometimes irreparable psychological trauma.

Second, various agencies of state and federal government were unresponsive to the plight of the victim child and left-behind parent, either through neglect of their lawful responsibilities or for want of legal authority to provide meaningful assistance in parental kidnapping and restraint cases.

Third, the handful of jurisdictions that had not enacted the Uniform Child Custody Jurisdiction Act ("UCCJA") were serving, however, unintentionally, as havens for child-abducting parents, and even some states that had adopted the UCCJA were loosely interpreting that law, the effect of which was to provide abductor-parents with the means to circumvent the jurisdictional requirements and anti-parental kidnaping spirit of that statute.

The consensus from the hearings was that a federal solution was needed for a problem that was essentially interstate in nature. Shortly after the hearings, I offered S. 105 as an amendment to the domestic violence legislation which was agreed to in the Senate on September 4, 1980. In its consideration of the parental kidnaping amendment, a House-Senate Conference Committee accepted the two chief civil sections of the proposal without amendment, and accepted a modified criminal provision. The conference version of S. 105 was ultimately passed by both houses on December 13, 1980 as part of H.R. 8406, a bill providing for Medicare reimbursement for pneumococcal vaccines.

As enacted, the Parental Kidnaping Prevention Act: (1) requires the appropriate authorities of every state to enforce and refrain from modifying custody and visitation rights ordered by courts which have exercised jurisdiction in compliance with the jurisdictional criteria set forth in the law; (2) authorizes the Federal Parent Locator to act on requests from States to locate children who have been abducted or retained and the parents who have abducted or retained them; and (3) expressly declares, I would emphasize, the intent of Congress that the Fugitive Felon Act applies to state felony parental kidnaping cases involving interstate or international flight. The Conference Report on H.R. 2977, the Domestic Violence Prevention and Services Act, contains a concise description of each of these provisions. The relevant pages of that report are attached as an appendix to my statement.

Before tackling the most serious implementation problem, that is, the Justice De-

partment's unacceptable response to section 10 of the law, I would comment briefly on the implementation of the other parts of the law.

When the PKPA was enacted, only 43 states had adopted the UCCJA. One of the desired effects of the Full Faith and Credit provision, section 8 of Public Law 96–611, was to induce the remaining non-UCCJA states to adopt that uniform state law since universal enactment of the UCCJA is consistent with the policy objective of the PKPA. I am pleased to report that three states—South Carolina, West Virginia and New Mexico—adopted the UCCJA subsequent to the enactment of the PKPA, and UCCJA legislation is pending in the City Council of the District of Columbia and in Massachusetts. With respect to case law, there have been thus far very few state court decisions involving section 8 of the PKPA. While at some future date we may wish to reconsider that provision, it would be prudent to postpone any such consideration until a body of cases have been decided, and the legal and academic communities have had an opportunity to thoroughly scrutinize the effect of the law on child custody legislation.

The Parent Locator Service is not yet available to the States wishing to utilize it to locate abducting-parents and missing children. That the Department of Health and Human Services has reacted slowly to the mandate of section 9 of Public Law 96–611 is disturbing to me since the law required only minor adjustments in existing child support enforcement regulations. The delay is of far more immediate concern to the many parents throughout the country who had expected the service to be available soon after the law was passed. Instead, nearly 10 months has elapsed, and these parents are still without recourse to the FPLS to help find their missing children.

I have written to Secretary Schweiker urging the Department to expedite the promulgation of the regulations and the federal-state agreement required by the law. The agreement must be submitted to the States for approval by the Governor or his or her delegate. It is imperative that this section of the PKPA be fully implemented as soon as possible. Every day of delay is potentially another day of separation between parents and their children.

Last, but certainly not least, I turn to the matter of the implementation of section 10 of Public Law 96–611. As mentioned earlier in this statement, the House-Senate Conference Committee substituted for the section of S. 105 that would have created a new federal misdemeanor offense for child snatching, a provision expressly declaring congressional intent that the Fugitive Felon Act applies to parental kidnapping cases. This modification struck a balance between federal and state law enforcement responsibilities in state felony parental kidnapping cases involving flight. The object was to bring the F.B.I. into investigations of abduction and restraint cases which the state prosecutor was intent on prosecuting upon the extradition of the perpetrator. Although the Fugitive Felon Act, 18 U.S.C. 1073, applies on its face to all state felonies, the Justice Department had carved out an exception for parental kidnappings, apparently based on the statutory exemption of parents from the federal kidnapping law, 18 U.S.C. 1201, from which they inferred that Congress similarly intended to limit the application of the Fugitive Felon Act in cases involving parents.

In enacting section 10 of the PKPA, Congress specifically rejected the Justice Department's restrictive standards for the issuance of fugitive complaints which essentially treated parental kidnapping cases differently than all other felony offenses. The pre-PKPA Justice Department guidelines required as conditions precedent to the issuance of Fugitive Felon warrants, and I quote, "convincing evidence that the child was in danger of serious bodily harm as a result of the mental condition or past behavior patterns of the abducting parents."

On December 31, 1980, three days after the law was passed, the Criminal Division of the Justice Department issued "revised" guidelines which purported to implement the Fugitive Felon section of the PKPA. Unfortunately, the new guidelines were little more than a reformulation of the pre-PKPA policy; under the new policy, the Criminal Division required, quote, "independent credible information establishing that the child is in physical danger or is being seriously abused or seriously neglected."

On March 9, 1981, I initiated a letter joined in by nine other senators and congressman to Attorney General Smith requesting that he undertake a review and revision of the fugitive felon directive in accordance with the new law. The belated reply accompanied the report required to be filed by the Justice Department 120 days after enactment of the law, both of which were submitted to Congress on June 26, 1981. Copies of the letter and report are included as an appendix to my statement.

The contents of the letter and report hardly justified the long delay, for the "revised" policy set forth in these documents represents a barely perceptible improvement over the immediately preceding policy formulation. Of primary concern is the fact that these current guidelines continue to require as a condition precedent of the issuance of Fugitive Felon warrants, quote, "independent credible information that the child is in physical danger or is then in a condition of abuse or neglect." Additionally, prior approval must be obtained from the Justice Department in Washington before a U.S. attorney can issue a fugitive complaint.

Mr. Chairman, the current policy frustrates the express intent of the new law. Congress intended that state felony cases would be treated in the same manner as all other state felony charges, and that no special criteria would be applied to restrict the application of the Fugitive Felon Act in state felony parental kidnapping cases in which the state prosecutor intends to extradite and prosecute the fugitive once he or she is apprehended by the F.B.I. Yet, the Justice Department's requirements remain unique to child snatching cases; no similar criteria attach to the issuance of Fugitive Felon warrants in any other state felony cases.

Moreover, these requirements essentially change the character of the underlying offense for which the warrant is available from parental kidnapping, as the law specifically requires, to child abuse or neglect, a result which clearly contradicts the express language of the law. To add insult to injury, the requirements cannot possibly be satisfied by complainant-parents who do not know the whereabouts of their abducted children and therefore cannot provide the requisite (quote,) "credible information that the child is in physical danger or is then in a condition of abuse or neglect."

On account of the Justice Department policy, the federal-state cooperative relationship which the law was intended to forge has unfortunately not materialized. Instead, meaningful federal investigative assistance in state felony parental cases remains unavailable to prosecutors in all but a few cases. The June 26 report leaves no doubt but that very few warrants have been issued since the passage of the PKPA: of the 24 applications that met the "statutory requirements for assistance," a mere 6 UFAP warrants were issued. As an aside, I wonder whether the 24 applications met the Department's guidelines.

The application of the restrictive criteria is only one reason why the warrants are not being issued as intended by the law. The Department's requirement of prior Criminal Division approval of UFAP complaints has also proved to be a very substantial impediment to the issuance of fugitive warrants. Cases have been brought to my attention wherein the local United States Attorney has decided in favor of issuing a fugitive felon warrant in particular state felony cases, only to have that decision overturned by the Justice Department in Washington. In addition, the philosophy of the Justice Department that felony parental kidnapping cases are domestic, rather than criminal matters, has continued unabated despite the clear expression on the part of Congress to the contrary.

Mr. Chairman, for as long as the Justice Department maintains its present policy, one thing is certain. Very few cases of parental kidnapping will involve the F.B.I., and the F.B.I., Justice Department and Congress will be left with nothing more than sheer conjecture as to the actual number of cases which would fall to the federal government to investigate if the new law was applied without restriction. In the absence of such firm data, Congress has no basis to effectively evaluate its decision to involve the federal government in the investigation of parental kidnapping cases.

Nor I might add, can the Justice Department substantiate its claim that the investigation of parental cases require an undue amount of their time and effort. If we are to assess the effectiveness of the law as a response to the tide of parental kidnappings nationwide, it must be fully enforced to provide meaningful data for our evaluations. This would likewise prove instructive for the Department, itself.

Mr. Chairman, I offer the following recommendations to improve the effectiveness of section 10 of the new law. First, the Department should vigorously enforce the law so that data is available to Congress for an in-depth assessment of the efficacy of applying the Fugitive Felon Act to state felony parental kidnapping cases, which in turn will serve as a clear warning to parents that abductions or retentions of children will not be tolerated. Second, the guidelines which treat child snatching cases differently than all other state felony charges should be eliminated, as should be the requirement of prior approval from Washington. Third, the reports required to be filed pursuant to section 10(a) of the law should indicate who the applicant is, and the state in which the application is made. This will facilitate future oversight of the Justice Department's implementation efforts.

Mr. Chairman, I thank you again for your obvious commitment to the full and effective implementation of the Parental Kidnapping Prevention Act.

Mr. CRANSTON. Mr. President, I am pleased to join with the distinguished Senator from Wyoming (Mr. WALLOP) in introducing this legislation to amend the Parental Kidnaping Prevention Act of 1980, Public Law 96–611 in order to insure its full implementation by the Department of Justice.

Mr. President, it has been my pleasure over the past few years to work with the Senator from Wyoming on the Parental Kidnaping Prevention Act. He has been a persistent and dedicated leader in efforts to deal with the devastating problem of parental kidnaping. The Senate has repeatedly and in a totally bipartisan fashion supported these efforts which culminated last year with the enactment of Public Law 96–611. It was my privi-

lege to chair the conference committee which developed the final format which was the basis for the provisions of Public Law 96–611.

Unfortunately, Mr. President, a substantial amount of what we sought to accomplish by the Parental Kidnaping Prevention Act of 1980 has been undermined by the Department of Justice's persistent refusal to implement section 10 of the act. Section 10, as I will explain in more detail in a moment, expressly states that it is the intent of Congress that the Department of Justice apply the provisions of section 1073 of title 18 of the United States Code—the unlawful flight to avoid prosecution (UFAP) statute—to cases involving interstate or international flight to avoid prosecution under State felony parental kidnaping statutes. Nevertheless, the Department of Justice has refused to comply with this express intent of the Congress; instead, the Department has imposed arbitrary and unjustifiable restrictions on the application of section 1073 to parental kidnaping cases.

Mr. President, the legislation we are introducing today simply and unequivocably states that section 1073 shall apply in State felony parental kidnaping cases in the same manner as it does in all other State felony cases and directs the Attorney General to eliminate all guidelines that impose additional restrictions in parental kidnaping cases or otherwise frustrate the intent of Congress in this matter.

LEGISLATIVE HISTORY

Mr. President, in order that my colleagues may understand the background of this legislation, I would like to describe briefly the development of the Parental Kidnaping Prevention Act of 1980.

Although various measures dealing with the problem of parental kidnaping have been introduced in both the Senate and the House over the past decade, the legislation that formed the basis for the Parental Kidnaping Prevention Act of 1980 grew out of provisions first approved by the Senate in January of 1978 as an amendment offered by Senator WALLOP to S. 1437, the proposed criminal code recodification. The House, however, failed to act upon S. 1437 during the 95th Congress. At the beginning of the 96th Congress, the parental kidnaping provisions were reintroduced by the Senator from Wyoming (Mr. WALLOP) as S. 15. This legislation, of which I was an original cosponsor, enjoyed broad bipartisan support with 24 cosponsors representing a broad range of political philosophies.

In April of 1979, as chairman of the former Subcommittee on Child and Human Development of the Labor and Human Resources Committee, I chaired a hearing in Los Angeles, Calif., on this legislation and the problem of parental kidnaping. Testimony at that hearing from both parents and law enforcement personnel indicated the tremendous problems created by the lack of Federal legislation.

The witnesses described the peculiar interstate nature of the problem of child stealing and how the conflicting State laws and jurisdictional barriers actually encouraged abducting parents to flee from State to State with these children, avoiding both the civil and criminal justice system.

In January of 1980, here in Washington, I chaired, with the distinguished Senator from Maryland (Mr. MATHIAS), a joint hearing of the Child and Human Development Subcommittee and the Criminal Justice Subcommittee of the Judiciary Committee on S. 105. Again, the testimony stressed the need for a Federal response to help stem interstate flight in child stealing cases. State law enforcement officers testified at both hearings on how the lack of Federal involvement undermined the effectiveness of their State statutes.

The Senate Judiciary Committee approved the provisions of S. 105 and incorporated them into S. 1722, the 1980 proposed criminal code recodification measure. However, S. 1722 was never brought to the Senate floor and in August of 1980, Senator WALLOP offered an amendment, which I cosponsored, to add the basic provisions of S. 105 as a separate title to the proposed Domestic Violence Prevention Services Act, H.R. 2977. The Senate unanimously approved this amendment and H.R. 2977 was subsequently passed by the Senate.

The provisions of title IV of H.R. 2977 as passed by the Senate had three basic components.

First, it provided for the application of full faith and credit between the States to custody orders entered into in conformity with the provisions of the act. These provisions were based on the Uniform Child Custody Jurisdiction Act which has now been enacted by almost all of the States. They were intended to discourage interstate "forum-shopping" and to resolve the civil interstate jurisdictional problems that contribute to child stealing.

Second, the amendment authorized States to enter into agreements with the Secretary of HHS for use of the Federal Parent Locator Service (FPLS) to assist in location of missing children. The FPLS was established in 1976 to assist in locating parents who have avoided making child support payments; the amendment simply allowed the extension of the program to the location of parents who abduct children.

Third, and finally, the amendment provided for the establishment of a new Federal offense for interstate child stealing.

The first two provisions of title IV were approved in conference with minor modification. The third, the criminal provision, was modified in conference to provide for the application of section 1073 of title 18 of the United States Code to parental kidnaping, rather than to establish a new Federal crime as had originally been proposed and approved by the Senate.

Mr. President, I would like to describe for a moment the circumstances that lead the conferees to modify the criminal provisions of the Senate-passed amendment. The House conferees expressed reservations about accepting the Senate provision establishing a new Federal offense without first attempting to utilize the existing UFAP statute. The conferees were aware of the policy of the Justice Department of refusing to apply the UFAP statute to parental kidnaping cases unless there was a showing of a "serious threat of physical injury to the child" from the abducting parent by reason of his or her medical condition or acute pattern of behavior, for example, alcoholism, interpersonal violence. The Justice Department, in its testimony before the Congress and in its internal guidelines, has consistently taken the position that the UFAP statute should not be applied to parental kidnaping cases except in extreme cases.

The Justice Department's rationalization for refusing to apply the UFAP statute to parental kidnaping cases was an alleged "congressional intent" arising from the fact that Congress, in enacting in 1932 the Federal kidnaping statute, section 1201 of title 18, had provided for an exception for parental kidnaping. Hence, the Justice Department argued, Congress must have intended to avoid Federal involvement in any way in parental kidnaping cases.

The conferees, in the joint explanatory statement of the conference report accompanying H.R. 2977 emphatically rejected that view and incorporated into section 10 of the Parental Kidnaping Prevention Act a clear and unequivocable statement that it is the intent of Congress that the UFAP statute apply to parenal kidnaping cases in the same manner it applies to other interstate felony cases.

Mr. President, I ask unanimous consent that excerpts from that conference report joint statement be printed in the RECORD at this point.

There being no objection, the excerpts were ordered to be printed in the RECORD, as follows:

EXCERPTS FROM THE CONFERENCE REPORT TO ACCOMPANY H.R. 2977

House Report 96–1401, pgs. 41–43

TITLE IV

Parental kidnaping

Findings and Purposes

The Senate amendment contains a statement of findings relating to the problem of interstate disputes and conflicts in matters relating to child custody and visitation matters and provides that the purpose of this title is to promote cooperation among the States in the enforcement of custody and visitation orders, discourage continuing interstate controversies and conflicts, and deter interstate abductions of children.

The House has no comparable provision.

The House recedes.

Full Faith and Credit Provisions

The Senate amendment provides that the appropriate authorities of every State shall enforce and not modify any child custody determination entered by a court of another State having jurisdiction consistent with the provisions of the title.

The House has no comparable provisions.

The House recedes.

Federal Parent Locator Service

The Senate amendment authorized the Secretary of Health and Human Services to enter into agreements with States for utilization of the Federal Parent Locator Service for the purpose of determining the whereabouts of any absent parent or child when such information is to be used to locate such parent or child for the purpose of enforcing

any State or Federal law with respect to the unlawful taking or restraint of a child or making or enforcing a child custody determination.

The House has no comparable provision.

The House recedes with an amendment clarifying that the information provided under such agreement will be limited to information as to the most recent address and place of employment of any absent parent of the child and making conforming changes in references to State and Federal law relating to child custody.

Criminal Provisions

The Senate amendment contains provisions which would establish a new federal criminal offense relating to parental kidnaping.

The House has no comparable provision.

The House recedes with an amendment deleting the provisions in the Senate amendment establishing a new federal criminal offense and substituting a provision setting forth Congressional intent that section 1073 of title 18, United States Code, is applicable to cases involving parental kidnaping and interstate or international flight to avoid prosecution under applicable State felony statutes and requiring the Attorney General of the United States to submit to the Congress reports with respect to the steps taken to comply with the intent of Congress.

It is the view of the Conferees that authority presently exists under 18 U.S.C. 1073 (the so-called "Fugitive Felon Act") for the exercise of federal jurisdiction in many cases involving parental kidnaping. However, that statute, which proscribes, inter alia, interstate or foreign flight to avoid prosecution under state felony statutes, is rarely used. This is the case because the Department of Justice policy as set forth in the U.S. Attorneys' Manual discourages the use of 18 U.S.C. 1073 as a basis for federal involvement in parental kidnaping cases.

Although section 9-69.410 of the Manual states that the primary purpose of the Act is "to assist in the location and apprehension of fugitives from State justice," section 9-69.421 of the Manual requires the express prior approval of the Criminal Division before a U.S. Attorney may issue a complaint under the Fugitive Felon Act in a parental kidnaping case. Section 9-69.421 states that such approval will occur only in "rare instances", and erroneously cites the "intent of Congress" supposedly implied in the parental exception to the federal kidnaping statute (18 U.S.C. 1201(a)) as a basis for this general policy against using the Fugitive Felon Act in cases involving flight to avoid state prosecution on felony charges growing out of parental kidnaping.

Although the Department of Justice should be permitted to reasonably exercise some prosecutorial discretion under the Fugitive Felon Act as under any other Federal criminal law, the Conferees find the reasoning cited in the U.S. Attorneys' Manual for the heretofore limited use of 18 U.S.C. 1073 in parental kidnaping cases to be illogical and largely irrelevant. The fact that Congress has not made parental kidnaping an offense under 18 U.S.C. 1201 does not in any way constitute "Congressional intent" as to whether or how often 18 U.S.C. 1073 should be employed as a jurisdictional basis for federal intervention in parental kidnaping cases. Section 1073 does not require that some other federal offense be found to form the basis of federal jurisdiction, nor does it anywhere suggest that the existence of an equivalent federal offense should be a factor influencing the Attorney General's use of discretion thereunder. The section itself is the jurisdictional basis.

The Conferees are of the opinion that the Attorney General should review and revise this section of the U.S. Attorneys' Manual to provide more specific guidance to the U.S. Attorneys in order to regularize the procedures to be followed by the Department of Justice and to correctly reflect Congressional intent with respect to the use of the Fugitive Felon Act in parental kidnaping cases as stated in section 405(a) of the bill and this Joint Explanatory Statement. Specifically, the Conferees expressly disapprove of the policy of the Department of Justice as set forth in section 9-69.421 of the United States Attorney's Manual (August 16, 1979) to limit the application of 18 U.S.C. 1073 to those parental kidnaping cases where there is a showing that the "abducting parent, by reason of his or her medical condition or acute pattern of behavior (e.g., alcoholism, interpersonal violence), presents a serious threat of physical injury to the child." It is the Conferees view that section 1073 should be applied to State felony parental kidnaping cases in the same manner as in any other State felony case where the other jurisdictional requirements of section 1073 are satisfied.

Mr. CRANSTON. Mr. President, the compromise reached by the conferees in this matter presented, I believe, a fair and workable solution to the problem of interstate child abduction. First of all, it retained the primary responsibility for these cases within the State law enforcement system. Under the provisions of section 1073, a UFAP warrant is authorized where there is an application by a State law enforcement officer for the assistance in the apprehension of an individual who has fled to avoid State felony prosecution.

The State law enforcement officials determine whether to seek a UFAP warrant. The State law enforcement officers determine whether to file State felony charges and, once the individual is apprehended, prosecution is handled by State law enforcement officers.

Second, the role for the Federal law enforcement officers under the conferee's compromise was an entirely appropriate one within our Federal system. UFAP warrants are applicable only where there is interstate flight to avoid prosecution. This interstate nature makes the involvement of Federal law enforcement officers not only appropriate but necessary, given the limited ability of State law enforcement officers to carry out their duties effectively beyond State boundaries.

The compromise reached by the conferees in H.R. 2977 thus retained an appropriate balance between the respective responsibilities of State and Federal law enforcement officials and provided for Federal involvement as a means of asssitance to State law enforcement activities when interstate flight was involved.

Mr. President, the compromise agreement sought simply to make clear Congress intent that section 1073 apply in parental kidnaping cases in the same manner it is applied to other State felony cases—nothing more or less.

The conference agreement on H.R. 2977 was approved by the House on October 1, 1980; unfortunately, the Senate was unable to complete final action on the conference report. The Senator from Wyoming subsequently, on December 9, 1980, offered the provisions of Title IV of the conference agreement as an amendment to S. 3259, relating to bankruptcy laws.

S. 3259 was unanimously passed by the Senate with the parental kidnaping provisions, but the House failed to act on this legislation, Senator WALLOP then, on December 13, offered the same provisions as an amendment to H.R. 8406, relating to medicare coverage of pneumococcal vaccine. Both the House and the Senate approved this legislation, and it was signed into law on December 28, 1980, as Public Law 96-611.

DEPARTMENT OF JUSTICE RESPONSE

Mr. President, on December 31, 3 days after Public Law 96-611 was signed into law, the Department of Justice prepared a message for transmission to U.S. attorneys purporting to provide for the implementation of the provisions of the new law relating to section 10. In fact, the new guidelines promulgated by the Department of Justice continued, with minor changes, the Department's preexisting policy of refusing to apply section 1073 to parental kidnaping cases. The communication sent to U.S. attorneys stated, in part:

> Congress now has expressly stated that 18 U.S.C. 1073 be applied in parental abduction situations. Certainly, in our view, this expression of congressional intent does not require routine Federal involvement in parental abduction situations and is consistent with the Department's general policy.

The guidelines further stated that the Department would authorize FBI involvement under section 1073 in parental kidnaping cases only where there is "independent credible information establishing that the child is in physical danger or is being seriously neglected or seriously abused." The Department has also required that UFAP warrants in parental kidnaping cases be approved by the Criminal Division in Washington, D.C., rather than allowing such warrants to be issued by the respective U.S. attorneys as in other UFAP cases.

Mr. President, I ask unanimous consent that the text of this transmittal be printed in the RECORD at the conclusion of my remarks.

Mr. President, on March 9, along with nine other House and Senate Members, I wrote to the Justice Department expressing strong opposition to the Department of Justice's new guidelines and its failure to comply with congressional intent. On June 26, the Department responded indicating that it was revising the guidelines to delete the requirement that the child abuse or neglect be serious but otherwise was continuing its policy of restricting the application of section 1073 in parental kidnaping cases.

Mr. President, I ask unanimous consent that the text of the March 9 and June 26 correspondence be printed in the RECORD at the conclusion of my remarks.

CONCLUSION

Mr. President, the Department of Justice has persistently refused to comply with congressional intent that parental kidnaping cases be treated just like any other State felony matter with respect to section 1073. The Department continues to characterize these cases "domestic matters" or "civil matters" irrespective of the fact that the vast majority of States have enacted State felony laws expressly covering parental kidnaping. As of this date, only 10 States do not

have State felony statutes covering parental kidnaping. According to the Congressional Research Service, approximately 85 percent of the population of the United States reside in States which have enacted felony statutes.

Over the past several months, my office and many other congressional offices have been contacted by numerous local district attorneys and State law enforcement officers who have been frustrated in the enforcement of their State criminal statutes by the Justice Department's continuing refusal to implement the new law. Cases have come to my attention, where the criminal division has refused UFAP warrants despite the recommendation of the local U.S. attorney that a UFAP warrant be issued.

Mr. President, the Department of Justice actions in this matter have frustrated and totally undermined Congress efforts to deal with interstate parental kidnaping cases. Efforts to persuade the Justice Department to comply with the new law have been essentially fruitless. Just last month in a hearing before the Subcommittee on Crime of the House Judiciary Committee, the Department reiterated its intent to continue to restrict issuance of UFAP warrants in parental kidnaping cases. Enactment of this measure appears to be the only realistic way to achieve implementation of this provision of the new law.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
COMMITTEE ON FINANCE,
Washington, D.C., March 9, 1981.

Hon. WILLIAM FRENCH SMITH,
U.S. Attorney General, U.S. Department of Justice, Washington, D.C.

DEAR MR. ATTORNEY GENERAL: We are writing to request your review of guidelines issued to United States attorneys by the Criminal Division on December 31, 1980 which purport to implement section 10 of the Parental Kidnapping Prevention Act of 1980, enacted as part of P.L. 96-611 on December 28, 1980. In our opinion, the new directive seriously misconstrues congressional intent with respect to the application of the Fugitive Felon Act to state felony child abduction cases involving interstate flight, and must promptly be amended in order for the new law to achieve its objectives of deterring childsnatching and fostering a cooperative relationship between state and federal law enforcement authorities in interstate childstealing cases.

By way of background, the Parental Kidnapping Prevention Act of 1980 grew out of legislation introduced in January 1979 by Senator Wallop to stem the wave of childsnatching in the United States. S. 105 and companion House measures contained three major provisions, one of which made it a federal misdemeanor to remove or retain a child in violation of an enforceable child custody determination. After hearings in both houses the Senate adopted S. 105 as an amendment to H.R. 2977, domestic violence legislation, which then went to conference.

House-Senate conferees deleted the misdemeanor provision and instead expressly declared that the Fugitive Felon Act, 18 U.S.C. 1073, is applicable to state felony parental kidnapping cases in the same manner as in any other state felony case where the other jurisdictional requirements of section 1073 were satisfied. In the Joint Explanatory Statement accompanying the Conference Report on H.R. 2977 at pages 41-43, the conferees expressly disapproved the policy of the Department of Justice as set forth in the United States Attorney's Manual which limited the application of the Fugitive Felon Act to those parental kidnapping cases where there is a showing that the "abducting parent, by reasons of his or her medical condition or acute pattern of behavior (e.g. alcoholism, interpersonal violence) presents a serious threat of physical injury to the child." It was the H.R. 2977 conference version of the criminal provision which was enacted as part of P.L. 96-611.

The Criminal Division's directive ignores the language, spirit, and legislative history of the new law. In fact, it seems designed to frustrate totally what Congress was attempting to achieve—a change in policy. Instead, what has been done is essentially to issue the old policy in new words. The new guidelines continue to require independent credible evidence establishing physical danger or serious neglect or abuse of a child before a fugitive warrant will be issued. In addition, prior authorization by the Criminal Division is mandated. This completely disregards Congress' clear expression that fugitive felon warrants be issued in state felony childstealing cases on the basis of the same criteria and subject to the same procedures which govern the issuance of warrants for all other state offenses, none of which require such corroboration, prior approval, or other special tests. We are also disturbed by the Criminal Division's continued reference to felony childstealing as a "domestic matter." In clarifying the role for federal criminal authorities in parental kidnapping cases, Congress implicitly rejected the Department's long-standing characterization of these cases as simple domestic disputes.

Mr. Attorney General, the early feedback on the effect of the new guidelines is discouraging; at least one prosecutor has been denied a fugitive warrant notwithstanding a documented intent to extradite and prosecute the state law violation upon the apprehension of the fugitive, and other applications have not been acted upon at all.

We respectfully call upon you to undertake a review and revision of the fugitive felon directive in accordance with Section 10 of P.L. 96-611. We stand ready to assist this Administration in implementing the Parental Kidnapping Prevention Act of 1980 and invite you to consult freely with us toward that end.

Yours sincerely,
Malcolm Wallop, Henry J. Hyde, Dave Durenberger, Don Edwards, Charles E. Bennett, Harold S. Sawyer, Alan Cranston, F. James Sensenbrenner, Jr., William J. Hughes, Charles McC. Mathias, Jr.

U.S. DEPARTMENT OF JUSTICE,
OFFICE OF THE DEPUTY
ATTORNEY GENERAL,
Washington, D.C., June 26, 1981.

Hon. ALAN CRANSTON,
U.S. Senate,
Washington, D.C.

DEAR SENATOR CRANSTON: This is in further response to your letter of March 9, 1981, signed by nine other Senators and Members of Congress, objecting to the Department's policy guidelines limiting FBI involvement under the Fugitive Felon Act in "child snatching" cases, and requesting that these guidelines be revised to conform with the expression of Congressional intent set forth in section 10 of the Parental Kidnaping Prevention Act of 1980 (the Act) (Public Law 96-611).

Because of the concern expressed by you and your colleagues, the Attorney General requested a review of our policy guidelines be undertaken. Based on this review, the Department of Justice is convinced there is a demonstrated need for policy limitations on Federal involvement in "child snatching" cases under the Fugitive Felon Act. However, as a result of that review, the policy limitations have been modified as indicated below.

The Department's experience in these matters indicate that a "child snatcher" is a different kind of offender than the ordinary felon fleeing from state justice. We note that a significant number of states classify parental abduction or custodial interference as a misdemeanor not a felony. Moreover, it appears that state prosecutors often charge an abducting parent with a criminal violation as an accommodation to the victim parent, with no real intention of ultimately prosecuting the criminal charge against the abducting parent. Over the past several years, we have authorized FBI involvement in a significant number of these cases, consistent with existing policy guidelines. We have found that in repeated instances the state felony charges against the abducting parent have been dropped shortly after the complaining parent regained custody of the child. We suggest that the use of the Fugitive Felon Act in situations where state authorities have no actual intention of prosecuting the underlying criminal charges would amount to an abuse of legal process.

In the past four months, a variety of "child snatching" cases have been brought to our attention which, in our view, confirm the need for policy limitations. In two cases, the abducting parents were, in effect, given temporary custody in the asylum state despite outstanding felony "child snatching" warrants in other states. In two other cases, the parents were charged with felonies in spite of the fact they had custody decrees in other states. In at least three cases, the locations of the abducting parent were known, but law enforcement authorities in the asylum states refused to honor the out-of-state warrants, possibly because the asylum states classified child snatching as a misdemeanor. In two other cases, the asylum states refused extradition. In these latter cases, the request for FBI assistance apparently was an effort to avoid the extradition process. The Fugitive Felon Act, of course, is not an alternative to extradition, and individuals arrested on a Federal fugitive warrant should not be removed from the asylum state under Rule 40, Federal Rules of Criminal Procedure, when no Federal prosecution is intended. See *United States v. Love*, 425 F. Supp. 1248 (S.D.N.Y. 1977).

I wish to emphasize that the Department's policy is not intended to frustrate the spirit of section 10 of the Act. To the contrary, our policy is now less restrictive than in the past. Prior to the Act we required "convincing evidence that a child is in danger of serious bodily harm" before involving the FBI in a "child snatching" case. Under new guidelines established after enactment of the Act, we became involved in these matters if there was independent credible information that the child was being "seriously neglected or seriously abused".

As a result of that policy change, we authorized FBI involvement in six "child snatching" cases as of March 31, 1981, the cut-off date used for compiling data for the first report required by section 10(b) of the Act. Since March 31, 1981, we have authorized FBI involvement in at least seven additional cases. Recently, as a result of our policy review, the guidelines have been modified to permit FBI involvement under the Fugitive Felon Act in those instances where there is independent credible information establishing that the child is in physical danger or is then in a condition of abuse or neglect. We believe that this policy modification will result in a significant increase in Federal involvement, when compared with previous years.

Our present policy guidelines are an effort to comply with Congressional intent by ex-

tending Federal involvement to cases involving abuse and neglect. Consistent with our other criminal law enforcement responsibilities, we expect to furnish an increased level of assistance to the states in the legitimate enforcement of their criminal laws. At the same time, we hope to avoid the utilization of FBI investigative resources to enforce civil obligations.

I hope the foregoing information clarifies our position on this matter.

Sincerely,

EDWARD C. SCHMULTS,
Deputy Attorney General.

To: All United States attorneys.
Re: Parental Kidnaping Prevention Act of 1980.

On December 28, 1980, H.R. 8406, the Parental Kidnapping Prevention Act of 1980, was signed into law. Essentially the bill contains three provisions intended to ameliorate the problem of "child snatching."

The full faith and credit provision in the act (section 8), provides that appropriate authorities in every State shall enforce according to its terms, and shall not modify, except in limited circumstances, any child custody determination made consistent with the provisions of section 8 of the Act.

Section 9 of the act expands the use of the Parent Locator Service in the Department of Health and Human Services so that it can be used to locate a parent or child for the purpose of enforcing any State or Federal law with respect to the unlawful taking or restraint of a child, or making or enforcing a child custody determination.

Section 10 of the Act contains an expression of congressional intent that 18 U.S.C. 1073 (interstate flight to avoid prosecution) apply to cases involving parental kidnaping and interstate or international flight to avoid prosecution under applicable State felony statutes. Section 10 further requires that the Attorney General submit periodic reports setting forth steps taken to comply with this expression of congressional intent. Among other things, each report must contain data relating to the number of applications under 18 U.S.C. 1073 involving parental kidnaping and the number of complaints issued.

It has long been Department policy to avoid involvement in situations which are essentially domestic relations controversies. This policy has been based, in part, on the parental abduction exception in the federal kidnaping statute, from which we inferred a congressional intent that Federal law enforcement authorities stay out of such controversies. Consistent with that policy, the Department did not authorize FBI involvement under 18 U.S.C. 1073, for the purpose of apprehending a parent who is charged with a State felony in connection with the abduction of his own minor child, and who has traveled interstate to avoid prosecution. In some instances the Department has made exceptions to this policy where there was convincing evidence that the child was in danger of serious bodily harm as a result of the mental condition or past behavior patterns of the abducting parent. See U.S. Attorneys' Manual § 9-69.421.

Congress now has expressly stated that 18 U.S.C. 1073 be applied in parental abduction situations. Certainly, in our view, this expression of congressional intent does not require routine Federal involvement in parental abduction situations and is consistent with the Department's general policy militating against Federal involvement in domestic matters including abduction situations. Furthermore, the sound exercise of prosecutorial discretion and the need for careful utilization of Department manpower and resources, will require selectivity in seeking Federal fugitive warrants in these situations.

The primary purpose of the Fugitive Felon Act (18 U.S.C. 1073) is to permit the Federal Government to assist in the location and apprehension of fugitives from State justice. In evaluating any request from State or local authorities for assistance under the Fugitive Felon Act, there must be probable cause to believe that a fugitive charged with a State felony has fled interstate and that his flight was for the purpose of avoiding prosecution. Furthermore, it must be clear that State or local authorities are determined to take all necessary steps to secure the return of the fugitive and that it is their intention to bring him to trial on the State charge for which he is sought. It has been our experience that State prosecutors often will charge an abducting parent with a felony as an accommodation to the victim parent, with no real intention of ultimately prosecuting the abducting parent. Therefore, efforts should be made to identify those requests which seek to use the investigative resources of the FBI to compel the discharge of civil obligations, rather than serving a legitimate criminal law enforcement purpose.

In an effort to fulfill congressional intent consistent with its other responsibilities, the Department will authorize FBI involvement under 18 U.S.C. 1073 in parental kidnaping where there is independent credible information establishing that the child is in physical danger or is being seriously neglected or seriously abused. Examples of independent credible information include police investigations or prior domestic complaints to police or welfare agencies.

In view of the reporting requirements of section 10 of the act, it is imperative that the local office of the FBI be telephonically supplied with information regarding each parental kidnaping directly referred to the United States Attorney's Office so that the FBI may gather data for the legislatively required reports.

In order to maintain a uniform national policy, and in view of the Department's general policy against involvement in domestic relations controversies, criminal division authorization still must be obtained before seeking a fugitive felon warrant in parental abduction situations. Attorneys familiar with this policy are available on 724-7526 or 6971.

LAWRENCE LIPPE,
Chief, General Litigation and Legal Advice Section, Criminal Division.

By Mr. HATCH:

S. 1760. A bill to provide for civil rights in public schools; to the Committee on the Judiciary.

PUBLIC SCHOOL CIVIL RIGHTS ACT OF 1981

Mr. HATCH. Mr. President, last month the Senate recorded a historic vote in favor of civil rights in our public schools. By a margin of 60 to 39, the Senate approved the Johnston-Helms amendment which places strict limitations on forced busing to achieve an unspecified notion of racial balance in public schools. During the debate on this amendment, however, Senator JOHNSTON noted in response to my questioning that this amendment is only an interim solution. It is an amendment to the Justice Department authorization bill which will expire in a few years. Due to the vital importance of civil rights for students in our public schools, Mr. President, we cannot consider this issue finally resolved until we enact a lasting solution. Accordingly, at the culmination of hearings in the Judiciary Subcommittee on the Constitution, I am today introducing the Public School Civil Rights Act.

Many Senators may express feelings of regret that we must again soon reconsider this topic. I can understand and empathize with those feelings. After all, this problem, assigning students to public schools on the basis of race, was supposed to be solved in 1954 by the momentous Supreme Court decision of *Brown* v. *Board of Education*, 347 U.S. 483. Again the Senate thought it had prohibited the consideration of race when assigning students to public schools in 1964 when it enacted the Civil Rights Act. Therefore, when we are still striving to convince judicial policymakers decades later that students should be allowed to attend schools without regard for race or color, I can understand why the task would become frustrating. Nonetheless the basic constitutional principle that race should not determine what schools our students may attend must not be abridged.

This principle was clearly enunciated by the venerable Justice John Marshall Harlan in his dissent to the Plessy against Ferguson case. Plessy upheld a Louisiana statute requiring "equal but separate accommodations for the white and colored races" in passenger trains, 163 U.S. 540, 551 (1896). Justice Harlan dissented with the forcible thought that "our Constitution is color-blind," (Id. at 559). These few words captured the essence of our 14th amendment prohibition against deprivation of life, liberty, or property without due process of law and against denial of equal protection of laws.

Harlan's dissent laid the foundation for the Court's ruling in the Brown case 58 years later. In Brown the Court found that—

> The Constitution of the United States, in its present form, forbids, so far as civil and political rights are concerned, discrimination by the General Government or by the States against any citizen because of his race, 347 U.S. at 499.

In other words, race and color were not to play any role whatsoever in decisions relative to school district boundaries and school attendance. Race was not to be used in assessing the rights of "any citizen"; certainly racial assessments were not to benefit one group at the expense of another.

The Brown Court mentioned as a reason for its holding one of the major arguments still used against assignment of students to public schools on the basis of race. During the Constitution Subcommittee's hearings on schoolbusing, several witnesses discussed the stigma associated with students who must be transferred to another school because of their race. The Brown Court mentioned that stigma with the following words:

> To separate/students/from others of similar age and qualifications solely because of their race generates a feeling of inferiority as to their status in the community that may affect their hearts and minds in a way unlikely ever to be undone, 347 U.S. at 494.

I bring up this language because Congress is trying to do today what Brown tried to do in 1954; that is, put an end

to racial discrimination and make race totally irrelevant to sound education decisions. Not only should the Constitution be colorblind, but also the Congress and the courts.

Brown was not the only case that established the principle that the 14th amendment prohibited States from taking cognizance of race. The *Loving* case, 388 U.S. 1 (1967), for instance, struck down a Virginia statute prohibiting interracial marriage. The Court clearly stated that classifying marriage rights on the basis of race was "unsupportable." The *Anderson* case, 375 U.S. 399 (1964), declared unconstitutional any racial designation of candidates on an election ballot. In *Evans*, 396 U.S. 435 (1970), the Court clarified that provisions in a will leaving property to a city for a public park which the will expressly stipulated could never be used by blacks could not be honored. Each of these cases understood and carried out the intent of the Brown case that the 14th amendment forbid consideration of racial classifications of any kind in administering societal programs.

Congress has attempted to statutorily implement the Brown decision. The most notable attempt was, of course, the Civil Rights Act of 1964. Title IV of the act contains several provisions designed to make national education policy colorblind. Section 401(b) defined "desegregation" as:

> The assignment of students to public schools and within such school without regard to their race, color, religion, or national origin, but "desegregation" shall not mean the assignment of students to public schools in order to overcome racial balance.

The second part of this section was authored by Congressman Cramer of Florida. He explained clearly that the provision was necessary to prevent de facto segregation, or chance segregation caused by housing patterns and adherence to the neighborhood school concept, from becoming the object of congressionally approved desegregation schemes. Cramer, and the 88th Congress, equated the terms de facto segregation and the racial imbalance (110 CONGRESSIONAL RECORD 1598).

The Senate version of the Civil Rights Act added two more amendments to insure that congressional policy would not be misconstrued to countenance any assignment of students to schools on the basis of race (section 407 of the act). The section authorizing the Attorney General to bring school desegregation suits, states that—

> Nothing herein shall empower any official or court of the United States to issue any order seeking to achieve a racial balance in any school by requiring the transportation of pupils or students from one school to another in order to achieve such racial balance. 42 U.S.C. 2000c–6(a).

Moreover section 410 clarified that—

> Nothing in this title shall prohibit classification and assignment for reasons other than race, color, religion, or national origin. 42 U.S.C. 2000 c–9.

Both Senate amendments were drafted and approved to prevent de facto segregation, as opposed to de jure or legally enforced segregation, from becoming a justification for the extreme remedy of busing, or assigning students to schools on the basis of race.

Senator Hubert Humphrey of Minnesota, floor manager for the bill in the Senate, explained that these amendments were intended to make doubly clear that title IV did not authorize the Attorney General to correct racial imbalance and in general—

> To soothe fears that title IV might be read to empower the Federal Government to order the busing of children around a city in order to achieve a certain racial balance or mix in schools. 110 Cong. Rec. 12714.

Senator Humphrey stated that he was relying on the recent decision in *Bell* v. *School of Gary*, 324 F. 2d, 209 (1963), in stating that Federal officials were not required to correct segregation unless it had been enforced by past laws.

This provision was included in the Civil Rights Act to expressly note that racial discrimination was not to be identified solely through use of numerical or statistical evidence rather than through some demonstration of wrongful intent by some individual or group of individuals. Unfortunately, the courts have disregarded this express language and instead relied upon evidence of racial imbalances within schools as proof of unlawful discrimination. Rather than placing the burden upon those alleging discrimination to demonstrate some identifiable act of discrimination, the courts have instead allowed discrimination to be adduced by evidence that some ideal racial proportion has not been achieved.

Harmful intent to discriminate was replaced with statistics that showed, for whatever reason, that more of one race than another were in a particular school or classroom. The defendant, therefore, not only had to demonstrate an absence of a corrupt state of mind, but had to show an affirmative commitment to a racially balanced institution. Treating individuals without regard to race was no longer enough, the defendant had to consider race at least to the degree that the court found proper. The problem, of course, is that no defendant could be sure in advance of adjudication if his notion of racial balance would be the same as the court's. Meantime, students had to be classed again according to race.

This is not the intent of the Constitution or Congress. Instead of considering each child in a school district only as a student, Federal courts classify students according to race. When the numerical ratio between the classes is unsatisfactory according to some subjective notion of racial balance, some black students or some white students are legally required to be hauled to a distant school simply because they are black or white. This is precisely the injustice that Brown and the Civil Rights Act intended to terminate. Prior to Brown, some students were legally required to be hauled to a distant school simply because of their race. It is a tradgedy that we are still fighting to secure civil rights for our public school students.

Some commentators on this problem will undoubtedly note that the situation today is different than it was before Brown, that assigning students to schools on the basis of race is necessary to eradicate the vestiges of past legal segregation. To that my response is clear, we are not going to put an end to racial discrimination by perpetuating distinctions based on race. Schoolbusing is nothing more than assigning students to schools on the basis of race. I repeat, Mr. President, we will never end discrimination by discriminating.

The hearings in the Constitution Subcommittee have substantiated the ill effects of a discriminatory schoolbusing policy. The subcommittee's hearings have demonstrated that past unconstitutional segregation—racial segregation enforced by law—is not a significant cause of existing racial imbalances in public schools; that whatever the cause of racial imbalances in public schools, assignment of students to public schools on the basis of race (busing) results in more segregation of the races by inducing large numbers of families to migrate from school systems subject to such assignment or by inducing large numbers of families to seek alternatives to public school education. Since assignment of students to public schools on the basis of race cannot be justified as a means of preventing or undoing racial discrimination by school authorities, such assignment is itself an unjustifiable practice of racial discrimination in violation of the 14th amendment.

Mr. President, I might add that there is a very apparent remedy for the kind of unconstitutional segregation prohibited by Brown. If a school authority has legally enforced a policy of racial segregation through school district reorganization, school closings, or other acts of State government, a court could always issue an injunction suspending all implementation of the segregative law or policy. Where such injunctions are not scrupulously obeyed, a court could institute contempt of court proceedings to secure compliance with its order.

My proposed bill will enforce constitutional guarantees that individual rights shall not be abridged on the basis of race, color, or national origin. The first three sections of the bill declare that forced busing has caused a greater separation of the races. Instead of improving relations between the races, it has caused more friction and, in the long run, cause more disruption in education and community relations than existed before it was instituted. In addition, these sections state the findings of the Constitution Subcommittee that forced busing violates constitutional guarantees against discrimination on the basis of race.

The operative provision of my bill would utilize Congress authority under article III, section 1, to withdraw the jurisdiction of lower Federal courts to issue any order requiring the assignment of students to schools on the basis of race or which has the effect of excluding any student from any public school on the basis of race.

Article III of the Constitution vests the judicial power of the United States in "one Supreme Court, and in such inferior courts as the Congress may from time to time establish." An uninter-

rupted chain of Supreme Court holdings have explained that this provision of the Constitution gives Congress "plenary control over the jurisdiction of the Federal courts." *Bro. of Railroad Trainmen* v. *Toledo, P&W RR. Co.*, 321 U.S. 50, 63 (1944). Just a few examples of Supreme Court explanation of this article will suffice to establish the soundness of this bill's action:

For, the Power which Congress possess to create courts of inferior jurisdiction, necessarily implied the power to limit the jurisdiction of those courts. *U.S.* v. *Hudson*, 7 Cranch 32, 33 (1812).

In the doctrine so often ruled in this court, that the judicial power of the United States, although it has its origin in the Constitution, is (except in enumerated instances and applicable exclusively to this court) dependent for its distribution and organization, and for the modes of its exercise, entirely upon the action of Congress, who possess the sole power of creating tribunals (inferior to the Supreme Court) for the exercise of the judicial power, and of investing them with jurisdiction either limited, concurrent, or exclusive, and of withholding jurisdiction from them in the exact degrees and character which to Congress may seem proper for the public good. *Cary* v. *Curtis*, 3 Howard 236 (1845).

The subordinate judicial tribunals of the United States can exercise only such jurisdiction, civil and criminal, as may be authorized by acts of Congress. *Kentucky* v. *Powers*, 201 U.S. 1, 24 (1905).

The decision with respect to inferior federal court, as well as the task of defining their jurisdiction, was left to the discretion of Congress. That body was not constitutionally required to create inferior Art. III Courts to hear and decide cases within the judicial power of the United States, including those criminal cases arising under the laws of the United States. Nor, if inferior courts were created, was it required to invest them with all the jurisdiction it was authorized to bestow under Article III. . . Congress plainly understood this, for until 1875, Congress refrained from providing the lower federal courts with general federal question jurisdiction. Until that time the State courts provided the only forum for vindicating many important federal claims. *Palmore* v. *U.S.*, 41 U.S. 389 (1973).

This summary of the article III powers of Congress could be expanded to include statements by Chief Justice John Marshall, Chief Justice Stone, or Chief Justice Earl Warren and the message would always be the same. Regardless of whether constitutional issues or property issues or Federal question issues are at stake, there is no constitutional right to have a claim adjudicated in Federal courts. See *Allen* v. *McCurry*, 101 S. Crt. 411 (1981). Instead Congress may decide to grant State courts, bound as they are by the supremacy clause and subject to Supreme Court review, exclusive original jurisdiction to hear and decide certain kinds of cases. In fact, this is precisely the intent of the "may from time to time ordain and establish" language of the Constitution. To give greater insight into this power of Congress, I will include at the close of this statement the testimony given by Harvard Law Prof. Paul Bator at Constitution Subcommittee hearings.

My legislation is also based on section 5 of the 14th amendment. That section specifically grants Congress the power "to enforce, by appropriate legislation, the provisions of" the amendment. By specific language, this constitutional provision grants Congress authority to legislate remedies for violations of equal protection. While I do not believe, Mr. President, that this section grants Congress the power to define the substantive content of the Constitution as the Supreme Court appeared to allow in the case of *Katzenbach* v. *Morgan*, 384 U.S. 641 (1866), it does clearly confer upon Congress authority to decide what remedies are most appropriate for enforcement of those guarantees. If section 5 meant what the Katzenbach court seemed to allow, then the National Legislature could define the meaning of "due process" "privileges and immunities," and countless other constitutional phrases in a manner which would void State legislation on almost any subject and replace it with a Federal statute. For this reason, I do not intend by citing section 5 as authority for this bill to give the mistaken impression that Congress may use section 5 as a rationale for rewriting the Constitution.

The section does, however, place Congress in a leading role in the selection of remedies for violations of the 14th amendment. Therefore, it is entirely proper for Congress to determine that assignment of students to public schools on the basis of race is not an appropriate or effective remedy for unconstitutional segregation. The manner in which Congress would choose under this bill to limit this counterproductive remedy, if indeed this could be called a remedy at all, is to withdraw the jurisdiction of lower Federal courts to issue orders that would assign students to schools on the basis of race.

This bill implements Congress article III authority to withdraw the jurisdiction of lower Federal courts to order busing. Those courts may still entertain lawsuits alleging racial discrimination and may use any remedy, including those mentioned in section 3 of this bill, but they may not employ busing. This bill does not, however, limit or affect in the slightest the power of the State courts or the Supreme Court on appeal to use whatever remedies they may deem appropriate. This provision should insure that the policy enunciated by Brown and incorporated into the Civil Rights Act is implemented in Federal courts, that is, race is not to be a factor in school assignments.

In some instances, the Supreme Court already has found egregious constitutional violations and imposed as "a last resort" an order assigning students to schools on the basis of race. See *Swann* v. *Charlotte*, 402 U.S. 1 (1971). The bill does not automatically vacate existing busing orders. Instead, it authorizes school board authorities or other individuals subject to such orders to reopen these cases and subject them to a new standard. If the court cannot make four conclusive findings based on clear and convincing evidence, that party will be entitled to relief from the order. The four findings will require the court to reconsider its former rulings in light of the policies of this bill as expressed by the findings sections.

Unless the court can make the findings under the difficult evidentiary burden of "clear and convincing evidence," the order will be vacated. The four findings are: First, the act which caused the order to be instituted intentionally caused, and in the absence of continuance of the order, will continue intentionally to cause, students to be excluded from public schools on the basis of race; in making this finding the court must look for evidence of wrongful intent, not merely a showing that some amorphous notion of racial balance was not achieved; second, the totality of circumstances have not changed; in making this finding the court should determine whether the passage of time and the effect of this act have provided relief from intentional segregation; third, no other remedy, including those in this bill, would halt the intentional segregation and make busing unnecessary; and fourth, the economic, social, and educational benefits of the order have clearly outweighed the economic, social, and educational costs of the order.

Mr. President, I would hasten to add that this new standard for reopening cases which have imposed busing would not amount to a balancing of constitutional rights. Constitutional rights, of course, must not be made subject to a balancing test. We are not, however, discussing constitutional violations, but the appropriate remedy for an established violation. Once a violation is found, Congress may provide standards to help the courts find the best remedy. Those standards may include weighing the costs of the remedy against its benefits. A remedy which is no remedy at all but an egregious violation in its own right should not be tolerated. Assigning students to schools on the basis of race is just that—more of a constitutional violation than a constitutional remedy.

One further point, Mr. President, some commentators may ask why the bill needs to reopen busing cases at all. These commentators would observe that the Congress might simply deny lower Federal courts all power to enforce existing orders. Then the orders would remain on the books but would not be enforced. This last part of the comment is where the difficulty arises with that plan. While Congress can deny lower Federal courts the power to use a particular remedy, it cannot exercise similar authority over State courts. State courts would most certainly be asked to enforce the Federal courts' busing orders. State courts might feel compelled to enforce a Federal court order without the benefit of a new standard. Accordingly, this bill takes the precaution of stating explicitly that these existing orders will be reopened and the remedy imposed under that order reexamined under a new standard prescribed by Congress.

This bill, Mr. President, should provide the lasting solution necessary to deliver public schools from the torments of racial discrimination. As long as we attempt to frustrate the clear policy of Brown and the Civil Rights Act by treating individuals under the Constitution with anything other than a colorblind standard, we will continue to experience upheavals such as have rocked many of

our cities and States over the past few years. In conclusion, I would like to include a statement delivered by Prof. Lino Graglia at our hearings on the subject of schoolbusing and the 14th amendment. Professor Graglia provides deep insight into the character of the constitutional turmoil occasioned by misguided rulings that classify students on the basis of race.

Mr. President, I ask unanimous consent that the bill, and the article and statement mentioned be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD as follows;

S. 1760

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Public School Civil Rights Act of 1981".

SEC. 2. The Congress finds that—

(1) the assignment of students to public schools on the basis of race, color, or national origin, or in order to achieve balance or correct imbalance regarding race, color, or national origin in public schools—

(A) violates constitutional and legal guarantees that individuals shall not be denied equal protection of the law;

(B) violates constitutional and legal guarantees that individual rights shall not be abridged on the basis of race, color, or national origin;

(C) has failed to demonstrate educational benefits commensurate with the disruption caused by such assignment;

(D) has failed to demonstrate social benefits commensurate with the disruption caused by such assignment;

(E) has contributed to a significant deterioration of public schools in the districts subject to such orders regarding assignment by inducing large numbers of families to migrate away from such districts;

(F) has contributed to the deterioration of public education by removing the neighborhood school as the focus of such education;

(G) has disrupted the education of countless school children who must endure lengthy transportation to and from school each day, and, as a result, must often forego participation in extracurricular activities occurring after school;

(H) has eroded community commitment to public schools and public education;

(I) interferes with the right of parents to make decisions regarding the education of their children;

(J) disrupts racial harmony by characterizing and classifying students on the basis of race or color and assigning them to schools on such basis;

(K) diverts significant amounts of financial resources away from direct improvement of the quality of education;

(L) usurps the responsibilities and traditional functions of State and local authorities to provide an educational system meeting the distinct needs of the community; and

(M) undermines public respect for the Government and its system of administering law and justice;

(2) past unconstitutional segregation, such as racial segregation enforced by law, is not a significant cause of existing racial imbalances in public schools,

(3) since assignment of students to public schools on the basis of race cannot be justified as a means of preventing or undoing racial discrimination by school authorities, such assignment is itself an unjustifiable practice of racial discrimination by the Government in violation of the fourteenth amendment, and

(4) whatever the basic cause of racial imbalance in the public schools, assignment of students to public schools on the basis of race, color, or national origin results in more segregation of the races by inducing large numbers of nonminority families to migrate away from school systems subject to such assignment or by inducing large numbers of nonminority families to seek alternatives to public school education.

SEC. 3. (a) The Congress finds the remedies listed in subsection (b) are available for unconstitutional segregation exclusive of court orders which assign students to public schools on the basis of race, color, or national origin, finding that such orders themselves have the effect of excluding students from public schools on the basis of race, color, or national origin.

(b) The remedies which the Congress finds are available are—

(1) legal injunctions suspending all implementation of a segregative law or other racially discriminatory Government action;

(2) contempt of court proceedings where such injunctions are not scrupulously obeyed;

(3) programs without coercion or numerical quotas or specific goals based on racial balance that permit students to voluntarily transfer to other schools within the school district where they reside;

(4) advance planning in construction of new facilities to provide nondiscriminatory education within the students' neighborhood; and

(5) other local initiatives and plans to improve education for all students without regard to race, color, or national origin.

SEC. 4. The Congress, pursuant to its authority and powers granted under article III of the Constitution, and under section 5 of the fourteenth amendment to the Constitution, enacts the provisions of this Act in order to protect public school students against discrimination on the basis of race, color, or national origin.

SEC. 5. Section 1343 of title 28, United States Code, is amended by designating the current language as section (a) and adding at the end thereof the following:

"(b)(1) Not withstanding any other provision of law, no inferior court established by Congress shall have jurisdiction to issue any order requiring the assignment or transportation of students to public elementary or secondary schools on the basis of race, color, or national origin or to issue any order which excludes any student from any public school on the basis of race, color, or national origin.

"(b)(2) In the case of court orders entered prior to the date of this Act that require, directly or indirectly, the assignment or transportation of students to a public elementary or secondary school on the basis of race, color, or national origin or which excludes any student from any school on the basis of race, color, or national origin, any individual or school board or other school authority subject to such an order shall be entitled to seek relief from such order in any court and unless that court can make conclusive findings based on clear and convincing evidence that—

"(1) the acts that gave rise to the existing court order intentionally and specifically caused, and in the absence of the order would continue intentionally and specifically to cause, students to be assigned to or excluded from public schools on the basis or race, color, or national origin; for purposes of this finding, these "acts that gave rise to the existing court order and intentionally and specifically caused, and in the absence of the order would continue intentionally and specifically to cause, students to be assigned to or excluded from public schools on the basis of race, color, or national origin" (including but not limited to school district reorganization, school boundary line changes, school construction, and school closings) shall not include legitimate efforts to employ public education resources to meet public education needs without regard to race, creed, or national origin.

"(2) the totality of circumstances have not changed since issuance of the order to warrant reconsideration of the order,

"(3) no other remedy, including those mentioned herein, would preclude the intentional and specific segregation,

"(4) the economic, social, and educational benefits of the order have outweighed the economic, social, and educational costs of the order,

then such plaintiffs shall be entitled to relief which is consistent with the provisions of this subsection and the Public School Civil Rights Act of 1981 from such order."

THE 74TH AMENDMENT AND SCHOOL BUSING

(By Lino A. Graglia)

In order for Congress to know what it can do about the busing requirement, it must first understand exactly what the busing requirement is. That, unfortunately, is not a simple matter. This is an area in which what the courts say they are doing and what they do in fact are often two quite different things. It is an area in which words are often used to mean the opposite of what they are ordinarily understood to mean; for example, a constitutional prohibition of the assignment of children to school on the basis of race can turn out to be a constitutional requirement that children be assigned to school on the basis of race.

The most important thing to know about the constitutional law of this area is that, in theory at least, there is no constitutional requirement of school racial integration or "balance." All that the courts require, they tell us, is compliance with Brown's prohibition of de jure segregation, segregation compelled by law or by other racially discriminatory government action. The basic requirement, supposedly, is that children be assigned to school without regard to their race, free of all racial discrimination. In theory, the Constitution, since Brown, prohibits segregation, but does not require integration; the existence of racially imbalanced or even one-race schools is not, the Supreme Court has many times stated, a constitutional violation.

But why then do the courts require busing? Is it not obviously a requirement of school racial integration, and does it not necessarily require the assignment of children to school on the basis of race? No, the courts tell us, they do not require integration as such, but only "desegregation," something very different and that is, in fact, simply the requirement, of Brown. Busing for "desegregation" may look a lot like busing to compel integration to those untutored in constitutional law, but they are nonetheless, for those learned in constitutional law, crucially different.

The basic differences are that, first, a requirement of integration would apply wherever school racial separation or imbalance exists, but a requirement of desegregation applies only where unconstitutional segregation exists—that is, there must be, not mere racial separation, which is not unconstitutional, but racial separation required by law or by the racially discriminatory action of government officials, which is a constitutional violation. Second, a requirement of integration would require school authorities to take whatever steps might be necessary to achieve complete school racial integration or balance, but a requirement of desegregation requires school authorities only to "remedy" the constitutional violation found, to undo the unconstitutional segregation—the requirement is, not to make the school system as racially balanced as possible, but only to make it as racially inte-

grated as it would be except for the constitutional violation found.

The courts' supposed requirement of desegregation looks so similar to a simple requirement of racial balance to most observers because in practice they are the same. The problem, in a word, is that the courts do not do in fact what they claim to do. As Justice Powell pointed in the Keyes case eight years ago, what the courts require and justify as "desegregation" is in fact simply compulsory racial balance; it is not the remedying of unconstitutional segregation, as the courts claim, but the undoing of racial imbalance, whatever its cause.

First, courts that order busing do not in fact require an actual showing that the racial imbalance existing in a school system is the result of racial discrimination by school authorities, i.e., unconstitutional segregation. In all or nearly all cases, it quite plainly is not; it is simply the result of the existence of areas of residential racial concentration, of the fact that people of the same race or ethnic group tend to reside in the same neighborhoods. Second, the courts do not in fact limit the busing they order to that necessary to "remedy" the constitutional violation (unconstitutional segregation) that they have supposedly found; they simply order that the schools be racially balanced, as if no school racial separation or imbalance would exist in the absence of racial discrimination by school authorities.

We must assume that the courts do not do in fact what they say they are doing only because they have been unable to make correct and accurate factual determinations as to the actual cause or causes of school racial imbalance. Congress, with its much greater resources for factual investigation, should itself determine the actual cause or causes of existing racial imbalance in our nation's public schools. This is a question subject to empiric investigation, and there are scholars professionally concerned with answering it. If Congress should find that, as would appear to be the case, racial discrimination by school authorities is not a significant cause of existing school racial imbalance, Congress should enact appropriate legislation, pursuant to its power to enforce the Fourteenth Amendment, to prohibit or limit busing.

If busing cannot be justified as a means of preventing or undoing racial discrimination by school authorities—i.e., as a means of enforcing Brown's prohibition of racial discrimination by government, as the courts claim—it becomes itself simply an unjustified practice of racial discrimination by government and, therefore, a clear violation of the Fourteenth Amendment. At a minimum, Congress should provide that all court-ordered busing cease unless it is actually shown in each case that existing school racial imbalance is the result of racial discrimination by school authorities, and Congress should further provide that if such a showing is made, any busing ordered should be specifically limited to that necessary to prevent or correct such racial discrimination.

The courts have apparently also been unable to determine accurately the effects of compulsory busing, particularly the longer-range effects, on school racial integration, educational effectiveness, equality of educational opportunity, and race relations. Again, these are matters subject to empiric investigation, and Congress should itself investigate and determine the facts as to these matters. If Congress should determine that, as would appear to be the case, court-ordered busing typically tends to produce more—rather than less, as the courts apparently believe—racial separation in the nation's public schools and to have an adverse impact on the educational effectiveness of the schools, on the provision of equal educational opportunity, and on race relations, Congress would have a further basis for enacting appropriate legislation, pursuant to its Fourteenth Amendment power, prohibiting or limiting court-ordered busing.

A further step Congress can take regarding the busing issue is to repeal Title IV of the 1964 Civil Rights Act which authorizes the Attorney General to bring suits to require "desegregation." This would be of very limited effectiveness as it would prevent the filing of suits only by the government and would not affect existing busing. It is, nonetheless, a step to be recommended. The 1964 Act explicitly defines "desegregation" as meaning "the assignment of students to public schools and within such schools without regard to their race" and, redundantly, as not meaning "the assignment of students to public schools in order to overcome racial imbalance." The Act, however, has been applied to exactly the opposite effect, to require the assignment of students to schools on the basis of race in order to overcome racial imbalance. If the Act were faithfully applied according to its terms, it could not be a basis for court-ordered busing. It would then also be unnecessary, however, because the assignment of children to public schools on the basis of race—except pursuant to court order—no longer takes place. Making the purpose of the Act more clear by amendment would not seem possible, and in any event, use of the Act according to its actual purpose would, as just noted, make it unnecessary. Simple repeal would remove all basis for argument as to the government's authority and would prevent further misuse of the Act.

In my opinion, Congress should also investigate the possibility of alternative means of ensuring equality of educational opportunity to all persons. It would seem desirable, for example, that in general students or their parents be given freedom of choice as to the school the student will attend in the school district or perhaps even in other districts, with transportation provided at public expense. Unfortunately, it does not appear that problems of educational underachievement can be solved primarily with money, but money should be made available and used in any ways that seem to hold promise. There is no question, of course, that predominantly minority schools must be funded, equipped, and staffed at least as well as predominantly white schools; in fact, it would seem clear that greater educational resources should be devoted to schools where there is greater educational need. In short, once it has determined that court-ordered is not the answer to our educational and racial problems, Congress should attempt to determine what might be at least part of the answer.

PREPARED STATEMENT

(By Paul M. Bator)

Mr. Chairman and Members of the Committee: My name is Paul M. Bator. I am Professor of Law at the Harvard Law School. I teach courses in Federal Courts and Federal Jurisdiction. I am coauthor of a leading text in the field of Federal Courts, Hart & Wechsler's The Federal Courts and the Federal System, Second Edition, and of other writings in that field.

I have been asked to testify about Congress' power to regulate and control the jurisdiction of the federal courts. I will divide my statement into two parts: the first deals with the jurisdiction of the inferior federal courts; the second with the jurisdiction of the United States Supreme Court.

CONGRESS' POWER OVER THE JURISDICTION OF THE INFERIOR FEDERAL COURTS

A

The Constitution contains many things which are not at all clear. It does contain a few that are clear. One of the clearest is the power of Congress to regulate the jurisdiction of federal "Tribunals inferior to the Supreme Court."

Article III of the Constitution provides that the "judicial Power of the United States shall be vested in one Supreme Court, and in such inferior Courts as the Congress may from time to time ordain and establish." This text, we know from the records of the Constitutional Convention, was the product of a compromise between those who thought that the Constitution itself should establish a full set of federal courts, and those who thought that the Constitution should authorize no federal courts inferior to the Supreme Court whatever. The purpose of the compromise was to leave it to legislative judgment, to be made from time to time, whether and to what extent lower federal courts are needed to assure the effectiveness and supremacy of federal law.

The Constitutional text itself makes clear that Congress is free to decide that there should be no lower federal courts at all. This would leave all questions of federal law (including the enforcement of federal rights) wholly to the state courts in the first instance, subject to review in the United States Supreme Court.

But the purpose of the compromise imbedded in Article III goes further than giving the Congress the all-or-nothing power to decide whether lower federal courts should exist. It leaves it to Congress to decide, having created lower federal courts, what their jurisdiction should be—that is, to decide which of the cases to which the federal judicial power extends should be litigated in the lower federal courts.

The position that Congress has this additional power to "pick and choose," to create lower federal courts and give them less than the entire federal judicial power, is not based primarily on the mechanical argument that the greater power (not to create such courts at all) must include the lesser (to create them but limit their jurisdiction). It is based on the fact that this reading is the only one consistent with the understanding which animated the compromise adopted by the Framers. The essence of that compromise was an agreement that the question of access to the lower federal courts as a way of assuring the effectiveness of federal law should not be constituted a matter of constitutional principle, but rather, should be left a matter of political and legislative judgment, to be made from time to time in the light of particular circumstances. It would make nonsense of that notion to hold that the only power to be exercised is the all-or-nothing power to decide whether none or all of the cases to which the federal judicial power extends need the haven of a lower federal court. The whole point of the compromise was the insight that the question whether a given "federal" case should initiate in a state court (subject to Supreme Court review), or in a lower federal court, is not an appropriate question for decision at the constitutional level, that Congress is the body best suited to make this institutional judgment on the basis of changing circumstances.

B

The position that the Constitution obligates Congress to create lower federal courts, or (having created them) to vest them with some or all of the jurisdiction authorized by Article III, has been repudiated by an unbroken line of authoritative judicial and legislative precedent.

From the very first Congress has acted on the premise that it is for it to decide which if any of the cases and controversies to which the federal judicial power extends should be litigated in the first instance in lower federal courts. The First Judiciary Act, passed by a Congress whose membership included many of the Framers, created lower federal courts but gave them only a small

portion of the federal judicial power. Cases arising under federal law could not generally be brought in the lower federal courts until 1875; and even thereafter, a jurisdictional amount limit put many such cases in the exclusive original jurisdiction of the state courts.

Nor has this exercise of Congressional power been a one-way ratchet. Congress has consistently felt free to restrict lower court jurisdiction even after it has been given. It has on numerous occasions raised the jurisdictional amount. It has both expanded and restricted the diversity and removal jurisdictions. It has excluded from the jurisdiction of the lower federal courts special categories of cases—most significantly in measures such as the Norris LaGuardia Act, the Johnson Act of 1934, and Tax Injunction Act of 1937.

Further—and notwithstanding contrary dicta by Justice Story in Martin v. Hunter's Lessee—the Supreme Court has upheld Congress' exercise of this power in an unbroken line of authoritative precedent. Indeed, the dramatic fact is that not a single Supreme Court case can be cited which casts the slightest doubt whatever on the validity of the hundreds of statutes which have been premised on the notion that it is for Congress to decide which if any of the cases to which the federal judicial power extends should be litigated in the first instance in the lower federal courts.

The most recent authoritative statement of the meaning of the Constitution in this respect is the opinion of the Supreme Court in Palmore v. United States, 411 U.S. 398 (1973). Here is the relevant passage:

"Article III describes the judicial power as extending to all cases, among others, arising under the laws of the United States; but, aside from this Court, the power is vested 'in such inferior Courts as the Congress may from time to time ordain and establish.' The decision with respect to inferior federal courts, as well as the task of defining their jurisdiction, was left to the discretion of Congress. That body was not constitutionally required to create inferior Art. III courts to hear and decide cases within the judicial power of the United States, including those criminal cases arising under the laws of the United States. Nor, if inferior federal courts were created, was it required to invest them with all the jurisdiction it was authorized to bestow under Art. III. '[T]he judicial power of the United States . . . is (except in enumerated instances, applicable exclusively to this court) dependent for its distribution and organization, and for the modes of its exercise, entirely upon the action of Congress, who possess the sole power of creating the tribunals (inferior to the Supreme Court) . . . and of investing them with jurisdiction either limited, concurrent, or exclusive, and of withholding jurisdiction from them in the exact degrees and character which to Congress may seem proper for the public good.' Cary v. Curtis, 3 How. 236, 245 (1845).[1] Congress plainly understood this, for until 1875 Congress refrained from providing the lower federal courts with general federal-question jurisdiction. Until that time, the state courts provided the only forum for vindicating many important federal claims. Even then, with exceptions, the state courts remained the sole forum for the trial of federal cases not involving the required jurisdictional amount, and for the most part retained concurrent jurisdiction of federal claims properly within the jurisdiction of the lower federal courts."

In light of this clear—and consistent—line of authority in the Supreme Court, occasional lower-court dicta which espouse the opposite view do not have authoritative weight.

C

You will have noticed, I hope, that I am not arguing that Congress has plenary power to determine what if any rights shall be enforceable in court. I believe that the Constitution does guarantee that, under certain circumstances, there shall be access to courts, that due process does in some cases mean judicial process. (It is, consequently, my opinion that Congress is not free to control the jurisdiction of the state courts so as to foreclose the vindication of the constitutional right to judicial review.) But the Constitution is indifferent whether that access is to a federal or a state court. If the Congress decides that a certain category of case arising under federal law should be litigated in a state court, subject to Supreme Court review, neither the letter nor the spirit of the Constitution has been violated. What has happened is that Congress has taken up one of the precise options which the Constitutional Framers specifically envisaged. From the viewpoint of the Constitution, nothing has gone awry.

D

It is commonplace that the Congress' power to regulate the jurisdiction of the lower federal courts cannot be exercised in a manner which violates some other Constitutional rule. In that sense—and in that sense only—it can be said that Congress' power is not plenary. Thus if Congress provides that only Catholics may bring suits in the lower federal courts, this would be invalid—not because non-Catholics have a constitutional right of access to lower federal courts, but because the Constitution prohibits any Congressional action which discriminates among religious denominations.

Similarly, a statute which said that Whites only may resort to the district courts would be invalid. The reason, again, is that, in the absence of some compelling and valid purpose, Congress is not free to make distinctions among the races for any purpose whatever.

Furthermore, I would concede that a Congressional statute which regulated the lower courts' jurisdiction in a wholly arbitrary manner ("only plaintiffs who are more than six feet tall may sue in the district courts") would violate the Due Process Clause.

It is, however, a fundamental and egregious mistake to broaden this argument into an assertion that Congress is not free to differentiate among different subject matters, and to specify categories of cases arising under federal law which may or may not be brought to the lower federal courts. Unlike legislation which makes distinctions on the basis of race or religion, there is no independent constitutional rule which says, absolutely or presumptively, that various categories of federal question litigation must somehow be treated jurisdictionally alike. There is no independent constitutional value which says that it is absolutely or presumptively illegitimate or undesirable or suspect to decide that one category of federal right shall be enforced originally exclusively in the state courts, whereas another may be litigated in the lower federal courts. Indeed, it was the very purpose of the Article III compromise to give Congress the power to make precisely these distinctions.

I therefore have no doubt whatever that a statute which provided that cases challenging the validity of state legislative apportionments, or cases challenging the validity of state statutes regulating abortions, may not be brought in the lower federal courts (but must be litigated initially in the state courts, subject always to Supreme Court review), would, if technically correctly drafted, be invulnerable to constitutional challenge. (I stress that there are difficult technical problems in drafting such statutes so as to survive challenge. Congress is free to decide that a lower federal court may not hear a given category of cases or controversy at all. But it cannot allow such a court to take jurisdiction and then command it to decide the case in an unconstitutional manner.

Intricate problems of draftsmanship, therefore, arise when statutes seek to remove federal court jurisdiction over certain types of questions. Such a statute would, if correctly drafted, be valid because it would exemplify the very power which the Framers sought to give Congress; the power to decide that federal interests are best maintained by requiring certain cases to which the federal judicial power extended to be initiated in the state—rather than the lower federal—courts.

E

I have heard various arguments contrary to this position, but find none of them impressive.

(a) The argument advanced by Justice Story, that Article III requires the Congress to vest the entire quantum of federal judicial power in federal courts, has been rejected by an unbroken line of Congressional and Supreme Court precedents, running from the time of the first Congress to the present. It not longer deserves to be taken seriously.

(b) It is sometimes argued that, notwithstanding the clearly expressed plan of the Framers, changing circumstances show that lower federal courts are an absolute necessity and that we should therefore override the original understanding and restrict Congress' power. The argument seems to me to be wholly illegitimate and without authority. Indeed the argument refutes itself: the fact that circumstances are, today, different than they were in 1789 with respect to the need for and role of lower federal courts, supports the wisdom of the Framers' compromise rather than furnishing an excuse for its abandonment.

(c) It is sometimes asserted that Congress does not have the authority to carve out special categories of cases arising under federal law and remit those to the exclusive original jurisdiction of the state courts.

It is unclear just why this is asserted to be so. If it is asserted that this "discriminates" against a certain category of federal right, the answer must be that such discriminations—that is, the power to pick and choose among different categories and subject matters of federal cases—is precisely the power that Article III sought to grant. Ultimately the assertion must rest on the notion that there is a constitutional right as such to litigate certain categories of cases in the lower federal courts—a notion which seems to me to be plainly erroneous.

(d) A somewhat narrower argument is that if it is shown that Congress' motive in requiring a certain category of case to be brought in the exclusive original jurisdiction of the state courts is "hostility" to the substantive constitutional right in question, it can be struck down. But I do not understand how such a rule could be administered. What would be an adequate indication of hostility? The New Deal Congress, in 1934 and again in 1937, moved by serious reservations about the constitutional doctrines which restricted the states' regulatory and taxing authority under the Due Process Clause, provided that constitutional suits to restrain the enforce-

[1] This was the view of the Court prior to Martin v. Hunter's Lessee, 1 Wheat. 304 (1816). Turner v. Bank of North America, 4 Dall. 8 (1799); United States v. Hudson, 7 Cranch 32 (1812). And the contrary statements in Hunter's Lessee, supra, at 327–339, did not survive later cases. See for example, in addition to Cary v. Curtis, 3 How. 236 (1845), quoted in the text, Rhode Island v. Massachusetts, 12 Pet. 657, 721–722 (1833); Sheldon v. Sill, 8 How. 441 (1850); Case of the Sewing Machine Companies, 18 Wall. 553, 577–578 (1874); Kline v. Burke Construction Co., 260 U.S. 226, 233–234 (1922).

ment of state tax statutes and public utility rate orders must ordinarily be brought in the state courts. Are these statutes invalid? No court or commentator—and certainly no "liberal"—has so suggested in the past 40 years. Why is a statute, providing that suits to restrain the enforcement of a state statutes regulating abortions must be brought in the state courts, different?

The fact is that the notion that it is illegitimate for Congress to express concerns about substantive constitutional matters through the technique of jurisdictional regulation is itself erroneous. That is just what Congress did, as I just said, in the Johnson Act of 1934 and the Tax Injunction Act of 1937. (It acted in an analogous manner in the Norris LaGuardia Act.) Such jurisdictional statutes rest on a rational and legitimate notion: that our federalism benefits if certain types of constitutional issues are subject to the insights of the state (rather than the lower federal) courts before they reach the United States Supreme Court. The state courts, equally with the federal, are charged with the task of enforcing and protecting federal constitutional rights.

To give them the task of doing so—subject to Supreme Court review—may manifest concern with or even disagreement with existing constitutional doctrine, but does not subvert it. Such a decision may quite legitimately rest on two allied notions: that in interpreting the constitutional provisions which restrict state power, it may be wise in the first instance to have access to the insights of the tribunals which are closest to the problem at hand; and, second, that it may be politically healthy to give the state courts the opportunity in the first instance to enforce federal constitutional restrictions on state power.

F

I conclude that a correctly drafted statute which does nothing more than provide that a given category of case or controversy arising under the Federal Constitution or laws shall revert to the exclusive original jurisdiction of the state courts is valid,[2] so long as it does not create discriminations which the Constitution independently prohibits and is not wholly irrational and arbitrary. More particularly, my submission is that it is clearly within Congress' power to determine that certain categories of constitutional litigation must in the first instance be brought in the state courts, subject to Supreme Court review.

G

I should stress that the fact that Congress has power to do something is not an argument that it should exercise that power. Nothing in my testimony should be taken to be an endorsement of any particular proposal with regard to the jurisdiction of the lower federal courts. Indeed, my general view is that Congress should be most cautious in creating special jurisdictional rules for special categories of constitutional litigation. It seems to me that such statutes are dangerous because they seem to be premised on the very argument which animates those who assert that Congress lacks this power—the argument that state courts may be expected to give federal constitutional rights less vigorous enforcement than the lower federal courts.

On the other hand, this kind of jurisdictional regulation is quite legitimate if it is the conscientious judgment of Congress that a given category of federal constitutional litigation may benefit from the special insights which state courts can provide into matters that touch closely the regulatory and political authority of the states. And I stress again the point with which I started. The Constitution has relatively few things in it which are clear; it seems to be most regrettable that law professors should try to muddy even such clear waters. There are many legitimate reasons for not favoring legislation that restricts the power of the lower federal courts to adjudicate abortion cases, or apportionment cases, or some other category of cases. But doubts about Congress' power to enact these statutes is not one of them.

[2] I am assuming that the case is not within the Supreme Court's original jurisdiction.

ADDITIONAL COSPONSORS

S. 569

At the request of Mr. JEPSEN, the Senator from Florida (Mrs. HAWKINS) was added as a cosponsor of S. 569, a bill to amend the Internal Revenue Code of 1954 to provide an investment tax credit for certain soil and water conservation expenditures.

S. 604

At the request of Mr. WEICKER, the Senator from New York (Mr. D'AMATO) was added as a cosponsor of S. 604, a bill to amend the Communications Act of 1934 to provide that telephone receivers may not be sold in interstate commerce unless they are manufactured in a manner which permits their use by persons with hearing impairments.

S. 807

At the request of Mr. ROTH, the Senator from Nevada (Mr. LAXALT) was added as a cosponsor of S. 807, a bill to reform the laws relating to the provision of Federal assistance in order to simplify and coordinate the management of Federal assistance programs and requirements, provide assistance recipients with greater flexibility, and minimize the administrative burden and adverse economic impact of such programs and requirements.

S. 1018

At the request of Mr. CHAFEE, the Senator from New Mexico (Mr. SCHMITT) was added as a cosponsor of S. 1018, a bill to protect and conserve fish and wildlife resources, and for other purposes.

S. 1348

At the request of Mr. SASSER, the Senator from Florida (Mr. CHILES) was added as a cosponsor of S. 1348, a bill to amend the Internal Revenue Code of 1954 to clarify certain requirements which apply to mortgage subsidy bonds.

S. 1451

At the request of Mr. CANNON, the Senator from Virginia (Mr. WARNER) was added as a cosponsor of S. 1451, a bill to amend the Internal Revenue Code of 1954 with respect to the exemption from tax of veterans' organizations.

S. 1479

At the request of Mr. METZENBAUM, the Senator from Florida (Mrs. HAWKINS) was added as a cosponsor of S. 1479, a bill to amend the Internal Revenue Code of 1954 to exclude from the income of an employee certain adoption expenses paid by an employer, to provide a deduction for adoption expenses paid by an individual, and for other purposes.

S. 1498

At the request of Mrs. KASSEBAUM, the Senator from West Virginia (Mr. RANDOLPH), the Senator from Arizona (Mr. DECONCINI), the Senator from Alabama (Mr. DENTON), and the Senator from New Jersey (Mr. WILLIAMS) were added as cosponsors of S. 1498, a bill to establish an office in the National Institutes of Health to assist in the development of drugs for diseases and conditions of low incidence.

S. 1626

At the request of Mr. NICKLES, the Senator from Texas (Mr. BENTSEN), and the Senator from Oklahoma (Mr. BOREN) were added as cosponsors of S. 1626, a bill to amend the Department of Energy Organization Act to clarify the jurisdiction of the Federal Energy Regulatory Commission, to reform and improve the regulation of oil pipelines, and for other purposes.

S. 1635

At the request of Mr. WEICKER, the Senator from Wisconsin (Mr. KASTEN), and the Senator from Pennsylvania (Mr. SPECTER) were added as cosponsors of S. 1635, a bill to delay the application of Revenue Ruling 81–216 until January 1, 1983.

S. 1752

At the request of Mr. HEINZ, the Senator from Washington (Mr. GORTON) was added as a cosponsor of S. 1752, a bill to amend the Home Owners' Loan Act to increase the lending, investment, and operating authority of Federal mutual savings banks.

AMENDMENT NO. 560

At the request of Mr. GLENN, the Senator from Massachusetts (Mr. TSONGAS) was added as a cosponsor of amendment No. 560 proposed to S. 1196, an original bill to amend the Foreign Assistance Act of 1961 and the Arms Export Control Act to authorize appropriations for development and security assistance programs for fiscal year 1982, to authorize appropriations for the Peace Corps for the fiscal year 1982, to provide authorities for the Overseas Private Investment Corporation, and for other purposes.

SENATE CONCURRENT RESOLUTION 43—CONCURRENT RESOLUTION GRANTING THE STATUS OF PERMANENT RESIDENCE TO CERTAIN ALIENS

Mr. SIMPSON (for Mr. THURMOND), from the Committee on the Judiciary, reported the following original concurrent resolution; which was placed on the Calendar:

S. CON. RES. 43

Resolved by the Senate (the House of Representatives concurring), That the Congress favors the suspension of deportation in the case of each alien hereinafter named, in which the Attorney General has suspended deportation pursuant to the provisions of section 244(a)(2) of the Immigration and Nationality Act (8 U.S.C. 1254):

A5–961–562, Bluestein, Nathan;
A7–899–438, Cemlier, Ivan;
A12–613–969, Lew, Don Hing;
A7–398–356, Woo, Yung Ming;

NOTICES OF HEARINGS

SUBCOMMITTEE ON CRIMINAL LAW

Mr. MATHIAS. Mr. President, the Subcommittee on Criminal Law of the Judiciary Committee will hold a hearing at 10

a.m. on Friday, October 23, on the final report of the Attorney General's Task Force on Violent Crime. The session will take place in room 2228 of the Dirksen Building. The Attorney General will be our sole witness. For further information about the hearing, please call Mike Klipper at 224–5618.

SUBCOMMITTEE ON LABOR

Mr. NICKLES. Mr. President, the Labor Subcommittee of the Labor and Human Resources Committee will hold 3 days of hearings on S. 1541, the Retirement Income Incentives and Administrative Simplification Act of 1981, on November 4, 9, and 12 in room 4232 of the Dirksen Senate Office Building. The hearing on November 4 will begin at 9 a.m.—hearings on the 9th and 12th will begin at 9:30. Members of the public wishing to testify should submit a written request as soon as possible. Please note the change in date from November 5 to November 9.

AUTHORITY FOR COMMITTEES TO MEET

SUBCOMMITTEE ON ENERGY, NUCLEAR PROLIFERATION, AND GOVERNMENT PROCESSES

Mr. BAKER. Mr. President, I ask unanimous consent that the Subcommittee on Energy, Nuclear Proliferation and Government Processes of the Committee on Governmental Affairs be authorized to meet during the session of the Senate on Thursday, October 22, to hold a hearing on reclamation of surface mine prime farmlands.

SELECT COMMITTEE ON INTELLIGENCE

Mr. BAKER. Mr. President, I ask unanimous consent that the Select Committee on Intelligence be authorized to meet during the session of the Senate on Thursday, October 22, at 9:30 a.m., to hold a business meeting.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

THE FAMILY PROTECTION ACT

● Mr. GARN. Mr. President, as many of my colleagues have, I have been surprised at the reaction to the introduction by Senator JEPSEN of the Family Protection Act. I know that things are not always exactly what they seem, but this is ridiculous. One would think Senator JEPSEN had introduced the Family Destruction Act.

Mr. President, I was a cosponsor of the Family Protection Act introduced by Senator LAXALT in the last Congress. I have also cosponsored the bill this year, and I want to assure the Senate that I am not trying to destroy the family.

Actually, the response to the Family Protection Act has not been all bad, just mostly bad. Those who have actually taken the time to sit down and read the bill, or to talk with its sponsor, have come to the appropriate conclusion that this is a bill designed to relieve some of the pressures on families that governmental action has imposed in recent years.

Some of the provisions of the Family Protection Act have already been adopted into law, and I have not noticed the foundations of the Republic crumbling. My guess is that the rest of it could be adopted without any harmful effects, either.

Mr. President, I would like to insert into the RECORD an editorial from the Des Moines Register, making the same point I have just made: That those who read the bill discover that it is not the plague many editorial writers assume it is. I think my colleagues will profit from this column written by Ian Binnie, a member of the Des Moines School Board.

The editorial follows:

KIND WORDS FOR FAMILY PROTECTION ACT

(By Ian Binnie)

Senator Roger Jepsen's Family Protection Act has received a universally bad press, but, considering the media's love affair with the now-discredited liberal intelligentsia, this is hardly surprising.

Having had an opportunity to read the act and to discuss it with the senator, I wonder how many of its critics have bothered to do likewise. The ones who claim to have read it, finding little in it that any normal person would object to, are reduced to cautioning us to read between the lines (and no doubt look under the bed) to find the wild-eyed right-wingers lurking there.

The average American will have no problem defining the family or identifying with it; it consists of parents, children and sundry other individuals related by blood, marriage or adoption. It does not include loose and temporary associations whose only bond is the economic advantage of sharing food stamps, pad and pot.

The very word "family," of course, sets up a kneejerk disapproval reaction in the radical homosexual-feminist coalition; the former with their sterile dead-end relationships regard the family with a mixture of envy and hatred, and the latter regard it as a form of slavery for women.

The act doesn't force anything on anyone; much of it simply gets the federal government out of areas that properly belong to the states. The argument that the federal government must act whenever the states won't is the argument that the Tenth Amendment to the Constitution was designed to guard against.

Requiring that the parents of a 14-year-old girl be consulted before she is given counseling in contraceptive techniques or abortion doesn't seem unreasonable to those who believe that parents should have at least some say in their children's upbringing. Allowing a tax break for those who keep their elderly parents at home instead of shunting them off to the present-day equivalent of the county poor farm makes both economic and humanitarian sense.

The extra tax break for those who would now like to, but cannot afford to, adopt a handicapped, older or bi-racial child could mean a good life for some children who might otherwise never have a decent chance. Allowing parents to set up a limited tax-free savings fund for their children's education merely extends the freedom of educational choice now available only to the rich.

The right of parents to have some say in what textbooks their children use cannot logically be criticized by those who have demanded and received the right to censor textbooks that minorities and feminists find offensive to them. And surely no liberal who regards a career as the right of every woman can object to allowing a company to write off the cost of operating a day-care center that makes that career possible.

The move to get tax-supported legal-services attorneys back to their proper jobs and out of the advocacy business is timely. Outgoing president John Adams tried to perpetuate his philosophy of government and thwart the will of the people by using the courts, which he had stacked in his favor, to oppose the programs of incoming president Thomas Jefferson. Our outgoing liberals, with the courts and the bureaucracies stacked in their favor, are trying similar tactics to thwart the program that Ronald Reagan campaigned and won on.

The problem of prayer in schools, which wasn't a problem until the Supreme Court made it one with its rather bizarre interpretation of the First Amendment, is a problem that simply has to be faced, and the act chooses to face it now. In any event, the Supreme Court will have to recognize sooner or later that the First Amendment not only forbids the establishment of religion but protects the free exercise of it as well.

The act does not attack homosexuals, but merely requires that any proselytizing they do be done at their own expense, not at the expense of the federal taxpayer. The $371,000 spent recently to relocate Cuban and Haitian homosexuals was a favor granted to no other special-interest group.

The traditional role of women has been denigrated by the radical feminist movement; these strident viragos have trumpeted their opinion in tax-supported forums that raising children is degrading and that only a "career" will properly "fulfill" a woman.

That it is always a "career" and not just a job is an indication of the upper-middle-class elitism of this well-dressed movement. In this scenario, women are to trade the living room for the operating room or the courtroom, not the factory floor or other less desirable tasks that most women will have to accept, as do most men. We need take this group seriously only when Aigner and Pappagallo start making steel-toed safety shoes.

What are the chances of the Family Protection Act's passage? Given the climate of the times, they have to be rated good to excellent. Senator Paul Laxalt (Rep., Nev.) is the co-sponsor, which usually indicates White House approval, and anyone who underrates that fact simply hasn't been paying attention.

But the question may be moot; much of what is in the act probably will be passed in other acts before the Family Protection Act itself comes up. However, the act is valuable as a statement of principle for America's new beginning.●

ACTION NEEDED ON ACID RAIN

● Mr. DODD. Mr. President, the Clean Air Act of 1970 and subsequent revisions were designed to protect the American people from air pollution that jeopardizes their health and welfare. A recent article published in Chemical and Engineering News provides perhaps the most balanced assessment to date of one of the most serious emerging threats to that objective—acid rain.

The evidence is rapidly mounting that acid rain presents a very real and present danger. Some of the documented effects are the destruction of lakes and streams together with the wildlife associated with these natural resources. Even more alarming is the fact that acid rain may pose direct human health hazards by leaching toxic metals into drinking water supplies.

Studies of the causes of acid rain, make it increasingly apparent that man-made sources of sulfur dioxide and nitrogen oxides are the chief causes of the increasing acidity of precipitation. This

is particularly true in the Eastern United States and Canada.

Last week I joined Senator MITCHELL, and others of our colleagues in introducing S. 1706, the Acid Deposition Control Act, to address this problem. This legislation is essential if we are to avoid increasing economic losses and irreversible environmental degradation already being experienced in parts of the United States and Canada and even more severely in Germany and Scandinavia.

Ms. Lois R. Ember's Chemical and Engineering News article provides a comprehensive and balanced overview of the issues and controversies surrounding the acid rain phenomenon. I strongly urge my colleagues to read her article as they consider S. 1706 and ask that the article be printed in the RECORD.

The article follows:

ACID POLLUTANTS: HITCHHIKERS RIDE THE WIND

(By Lois R. Ember)

In Canada it has been called an "ecological holocaust." In the U.S., Office of Management & Budget director David Stockman has denied its existence. Canadians are concerned that their major industries—fisheries and lumber—may be devastated by the acid onslaught. Midwestern coal miners fear the loss of their jobs. Acid rain may not be the most important environmental issue of the decade—global carbon dioxide buildup may be a more intractable problem—but it undoubtedly qualifies as the most emotional.

Canada is bearing down on the U.S. to regulate those pollutants that cross the border with the winds and rain down on the provinces as acids without linking the problem to other issues such as energy exports. The U.S. is trying to appease the Canadians short of legislating, buying time to understand the problem before it regulates.

At stake in this high-rolling political game are the economies and social well-being of both nations. The chips are lakes and aquatic life, forests, agricultural lands, monuments, buildings, cars, and perhaps even health. In the balance is the risk of ecological damage or economic disaster—or both. And while the dice are rolling, acid rain's bitter potion of scientific conundrums and political quandaries has the corrosive potential to rent the federation—pitting state against state or region against region—and to sever the long-standing alliance between the U.S. and Canada.

In short, acid rain may well be the catchy shorthand term for the environmental paradigm of our times. It is the result of a technological fix: Tall stacks, built to eject pollutants high into the atmosphere where they could hitch rides on prevailing winds, solved local air pollution problems but failed to repeal one of Newton's laws—what goes up must come down. Local air pollution problems became regional ones. So for all our technological cleverness, we may be becoming servants rather than masters of technology, warns San Diego University biologist Mary E. Clark.

Servant or master aside, acid rain also spotlights two other modern dilemmas. One—the basic conflict between the need to respond quickly to ameliorate a problem and the need to gather enough scientific information to respond responsibly. The other—that pollution is often the by-product of some action beneficial to society and the cost of pollution must compete with the cost of controlling it.

Like its brethren issues, global carbon dioxide buildup and stratospheric ozone loss, acid rain recognizes no state or national boundaries. As such, it becomes a unifying principle that defines the global village. Canada's Governor General Edward Schreyer reminded President Ronald Reagan of this on Reagan's visit to Canada in March. "If this is the era of the global village," Schreyer said, "then welcome to the house next door."

He might also have pointed out that the shared airshed between Canada and the U.S. is a village commons that can't be "overgrazed" lest, in biologist Garret Hardin's words, "the tragedy of the commons" besets both nations.

In this instance, the commons is being overburdened with the byproducts of industrial activity, electric power generation, and transportation. Sulfur dioxide and nitrogen oxides spewed from these sources are further oxidized in the atmosphere. If they fall back to Earth near the source as dry gases or particles, a small percentage will later combine with precipitation to form acids. But, if they are sent aloft through tall stacks they can travel the prevailing westerly winds for hundreds of miles over a period of several days. During this travel they can be transformed chemically into sulfuric and nitric acids that are scavenged by precipitation and fall on leaves, soils, lakes, and man-made objects as rain, snow, sleet, and fog. Both dry and wet deposition are colloquially lumped together as "acid rain."

How the acid precursors are chemically "processed" is poorly understood. But the classical photo-chemical gas-phase reaction between sulfur dioxide or nitrogen oxides and the hydroxyl radical is now believed to play a less dominant role. More important, some scientists believe, is the processing factory residing in the clouds; tantalizing hints from field experiments point to hydrogen peroxide or another oxidant as the processor that manages the rate of conversion of precursor to acid.

Whatever the transformation mechanisms may be, acid rain with a pH of 3 to 4 is falling over the eastern U.S. and southeastern Canada. Florida and the Carolinas report acid rain. The sensitive Boundary Waters Wilderness Area of Minnesota is receiving an acid onslaught from both the U.S. and Ontario. Isolated spots in Oregon, Washington, and British Columbia are measuring precipitation at pH levels below 5.6, the conventional cutoff between acid and alkaline precipitation (pH 5.6 is the value of atmospheric carbon dioxide dissolved in water). And in 1980, scientists from the University of Colorado reported "unexpectedly low pH values" of precipitation collected in the Como Creek watershed, high in the Rocky Mountains, 4 miles east of the Continental Divide. More recently, acid fog with a pH of 3 has been recorded in Los Angeles.

In contrast to the composition of acid rain falling in the eastern U.S. and Canada, the precipitation falling at Como Creek appears to be dominated by nitric acid. In the East, sulfuric acid, by a factor of two, appears to be the main component of acid rain.

Although there are natural sources of acid—lightning, volcanic eruptions, anaerobic decomposition of organic matter, airborne sea salt sprays—most scientists would agree that the acid rain falling on Scandinavia, the U.S., Canada, and possibly Japan and China traces its origin to the combustion of fossil fuels.

In North America, a whopping 80% of sulfur pollution is generated east of the Mississippi River, mainly in pockets concentrated around Sudbury Ont., smelting facilities, and in the Ohio River Valley—Illinois, Indiana, Ohio, Pennsylvania, West Virginia, and Kentucky—where high-sulfur coal is burned largely unchecked in large power plants. Two thirds of the sulfur dioxide generated in the U.S. comes from thermal power generation, but industrial sources contribute a hefty share. In Canada, smelters are responsible for 40% of the sulfur dioxide produced. Transportation is the main source of man-made nitrogen oxides in both countries.

The airshed shared by the U.S. and Canada is a two-way corridor carrying pollutants in both directions, but not equally. In a point research effort, U.S. and Canadian scientists have determined that the net flux of sulfur compounds, the precursors to the dominant component of "eastern" acid rain, is from south to north. In fact, Canada claims that 50% of its acid rain originates in the Ohio River Valley, and that it sends back only 10 to 15% of the sulfur compounds contributing to acidity in the U.S.

No matter the extent of contribution, the prevailing winds carry the acid pollutants to areas in both countries least able to buffer them. The soils in the Adirondacks, Nova Scotia, Quebec, and Ontario are thin and low in alkalinity. The acidity that would be removed in well-buffered soils is, in these thin soils, allowed to percolate down to groundwater or to run off directly into lakes and streams essentially unneutralized. As a result, the chemistry and biology of the affected soils, vegetation, and waters are altered considerably.

The Scandinavians were the first to make the connection between fossil fuel combustion and atmospheric acidity. In the mid-1950's they set up a monitoring network across northern Europe. After 15 years of measuring for sulfates and nitrates they noticed a "dramatic change" in the composition of precipitation, explains Henning Rodhe of the University of Stockholm.

Winds sweeping over the industrialized areas of England and the Ruhr Valley of West Germany picked up and processed the acid precursors, only to dump them unceremoniously on vulnerable mountain lakes and and streams in southern Norway and Sweden. "Sulfate levels were going up and acidity was increasing," Rodhe says. At the same time, fish populations in those affected waters were declining. In 1959 Norwegian fisheries inspector A. Dannevig linked the two phenomena. Ten years later, Swedish scientist Svante Oden charted the spread of acidity in northern Europe.

Taking their cue from the Scandinavians, American scientists Gene Likens, F. H. Borman, and C. V. Cogbill, over a period of several years in the early 1970's, legitimized acid rain as an issue worthy of study in the U.S. Using the meager data available for the periods 1954–55 and 1972–73, they mapped what they believed to be increasing and spreading acidity. From a central core encompassing the Northeast and parts of the Ohio River Valley they mapped the spread of acidity south toward Florida, west toward Illinois, and north into Canada.

However, the marked increase in acidity (from pH 5.6 to about 4.5) from 1955 to 1973 noted by Likens and associates may be more apparent than real, claim scientists from the coal and utility industries. They cite the work of Richard Semonion of the Illinois State Water Survey.

Semonion contends that the higher pH values recorded or calculated for the mid-1950's were due to alkaline agents and calcium and magnesium kicked up by the dust storms of the drought-ravaged Northeast Midwest. When Semonin substituted more "normal" alkaline levels for the 1955–56 data, he found hot spots of pH levels ranging from 4.3 to 5.0 all across the U.S.

More recent precipitation data coming from two national networks (the National Atmospheric Deposition Program—NADP—and the Multistate Atmospheric Power Production Pollution Study—MAP3S—and the Canadian Network for Sampling Precipitation confirm Likens and his colleagues' finding of expanding areas of high acidity (pH 4.5 or lower), if not a trend for increasing acidity. Says Likens: "People are quibbling about this and that, but the fact is acid

rain is falling and at very high concentrations in the eastern U.S. and Canada. That area has increased in size rather dramatically since 1955; and we have confirmation that about 1930, the rain was not acid in the U.S." Nor was precipitation acid before the industrial revolution. Arctic snows that fell around 1800 and were preserved as ice in glaciers are generally above pH 5.6. The pH of ice cores from Greenland range even higher, from pH 6 to 7.6.

Yet there are disturbing, unresolved problems that make it difficult even to know what the true pH of "pure" rain ought to be, although some scientists believe it to be far below 5.6. Why, for example, are National Oceanographic & Atmospheric Administration scientists finding acidic precipitation (pH 4.7) in remote oceanic areas of the world? Are the sources natural emissions of reduced sulfur compounds from the ocean? Or are the sulfates imported over long distances from industrialized centers of the world?

Why is there no strong trend in acidity evident even at the longest (17 years) continuously operating monitoring station in the U.S. at Hubbard Brook Experimental Forest in the White Mountains of Vermont? "This is bothersome," says atmospheric chemist Ralph Cicerone of the National Center for Atmospheric Research, "because emissions of gaseous pollutants in the area to the west and south of Hubbard Brook, pollutants that feed the precipitation at Hubbard Brook, have increased, though not drastically." Yet this increase is not reflected in increased acidity as monitored at that site.

Other questions also go unanswered. Why is there a shift in dominance of acidity from sulfuric acid to nitric acid? Is it the result of changing source-emission patterns or source controls? Or is it, asks Cicerone, the result of some complicated, poorly understood, nonlinear chemical reactions? More sulfuric acid forms in summer than in winter, yet sulfur dioxide emissions remain fairly constant throughout the year. Can this fluctuation be explained by the same nonlinear reactions? Probably, but nobody knows for certain.

If there are so many unanswered scientific questions, why is there a clamor for regulating the sources of acid precursors? Quite simply, damage reports on fragile ecosystems in the Adirondacks, in southern Ontario, in Nova Scotia, and along the Minnesota-Ontario border in the Boundary Waters Wilderness Area are mounting.

Every environmental hazard has its own biological monitor. Canaries carried into mines warned miners of the presence of deadly but odorless methane gas. Dead fish may be the biological monitors for acid rain.

In 1975, Cornell University scientists surveyed 214 high-altitude Adirondack lakes. Eighty-two of these were devoid of fish; 51% had a pH of 5 or less, a value critical to the survival of fish. In contrast, in the 1930's only 4% of the lakes supposedly had a pH below 5.

According to aquatic biologist Martin Pfeiffer, there are some 2877 lakes and ponds in Adirondack Park. Since 1975, he and his coworkers at the N.Y. Department of Environmental Conservation (DEC) have surveyed 849 lakes. They found that 25% were "critically acidified below pH 5." More precisely, 264 lakes and ponds, totaling some 11,000 acres, have a pH of less than 5 and are incapable of supporting any viable sport fish. An additional 256 lakes and ponds, totaling some 63,000 acres, "are in danger of reaching a critical level of acidity" for fish, says Robert F. Cross, press aide to DEC commissioner Robert F. Flacke.

New York has been adding calcium compounds to lakes—a short-lived corrective measure—since 1959. Because of cost, the program has shrunk over the years. Today, Pfeiffer says, only six or seven lakes—about 200 acres—are limed to protect important native strains of brook trout or to provide fishing at campsites frequented by tourists. Pfeiffer is now determining the effectiveness of the liming treatment. This July his group collected water samples from previously limed waters. In general, their preliminary findings show liming to be effective, that is, able to maintain the pH at a level viable for fish for two to three years.

Like New York's DEC, Canada's Department of the Environment and the Ontario Ministry of Environment also have kept a fish death watch. They report that more than 140 lakes are so acidified that no fish swim in them. A staggering 48,500 additional lakes are threatened and could be fishless in a decade if no action is taken to reduce emissions soon. To the east, nine rivers in Nova Scotia, once teeming with salmon, now have a pH below 4.7 and are barren. Eleven more rivers are threatened.

Lakes in Minnesota also are being ravaged by acid. The Minnesota Pollution Control Agency has just completed a two-year survey of 170 lakes. It reports that the lakes show a decrease in alkalinity that correlates with the history of acid precipitation in the state. The agency expects the most sensitive lakes to go acid within this decade. Alan Watson, chairman of the environmental group, Friends of the Boundary Waters Wilderness, says 87 of those 175 lakes surveyed are in the 1 million acre Boundary Waters Canoe Area, and "83 percent of these lakes are classified as susceptible. Their buffering capacity is close to being overwhelmed." This confirms the 1979 findings of Environmental Protection Agency scientist Gary E. Glass.

Though widely dispersed, the sensitive lake regions in the U.S. and Canada share a common geological history. In the last Ice Age, 250 million years ago, the continent was glaciated. As the glaciers moved southward they scraped away the surface, hollowing out basins and pushing around soils. In the end, a random, thin mixture of soils with different buffering capacities was laid down. Today, adjacent watersheds may possess different abilities to buffer acidity, although Ontario Ministry of Environment limnologist Tom Brydges says "only a little bit of alkalinity in the watershed is needed to neutralize the small amount of acid falling in precipitation."

It is the soils in the watershed that neutralize more than 90 percent of the acid in precipitation. Only a small amount of acid ever gets to the surface waters directly, and that usually occurs during the spring when the accumulated snow melts, flushes rapidly into lakes and streams, and temporarily overcomes the buffering capacity of these waters.

The acid in rain is neutralized by dissolving and mobilizing metals from the soil. Among the metals mobilized is aluminum, which, in combination with high acidity, is toxic to fish. During snow melt, the mobilized aluminum is carried with the runoff to the surface water.

Carl L. Schofield of Cornell University, who along with colleagues climbed the Adirondacks in 1975 to test the waters of the lakes nestled in the high peaks, was one of the first to note the one-two punch packed by acidified (<pH 5) freshwaters containing high concentrations of aluminum. He also found that aluminum leached by organic acids—those found in naturally occurring acid bog lakes—is complexed in a form that is not toxic to fish. Since his finding, Canadians have documented the lethality of the combination to several species of invertebrates, zooplankton, and aquatic insects. Liken's group at Hubbard Brook is finding similar effects on aquatic invertebrates.

While acid rain is mobilizing from the soil aluminum, which now also can be taken up by plant roots, it is also stripping the soil of the valuable nutrients calcium, magnesium, sodium, and potassium. Nitrogen-fixing bacteria, which live in harmony with certain legumes, are slain by increasing acidity. Other microorganisms that thrive on organic litter and humus also are killed by high acidity; with their deaths, the soil is deprived of an important source of nitrogenous nutrients. Some of this loss, however, can be made up by the sulfates, nitrates, and ammonia in acid rain itself, which are required nutrients.

Because of the fertilizing benefits of the acids, some crops actually thrive in a rain bath of acid, and the harmful long-term effects that acid rain may have on forests now may be masked by this short-term shot of nutrients. The few simulated studies on crops that have been carried out by EPA under unnaturally high doses of acidity are inconclusive, and little field work exists. Under these artificial conditions yields of radish, beet, carrot, and broccoli were reduced. Acid loving plants like tomatoes thrived. Foliage of spinach and lettuce was damaged and therefore unmarketable, although the yield was unaffected.

Spruce, pine, aspen, and birch are particularly sensitive to enhanced acidity. The protective waxy surfaces of leaves can be stripped, leaving the tree vulnerable to drought and disease; root systems of toxic metals such as aluminum and perhaps manganese; and transpiration, photosynthesis and seed germination can be inhibited.

Acid rain, however, is just one of a variety of stresses affecting forest ecosystems. Ozone, sulfur dioxide, nutrient availability, drought and heavy metals also "impinge simultaneously on the system," Likens explains. "For whatever reason," Likens says, "the forests in New England appear to be rather unhealthy today."

Canadians are especially concerned about their forests—their number one industry. In eastern Canada alone where the soil is acid, thin, and highly susceptible to acid deposition, the forest industry is worth $4 billion annually and employs thousands of people. In all of Canada, the forest industry employs about 300,000 people, and product exports amounted to $11.5 billion in 1980

Domtar Inc., the largest forest products firm in Canada, sent George H. Tomlinson to West Germany to review the work of Bernard Ulrich and coworkers. For the past 15 years, Ulrich's group has been studying beech and spruce forests on Solling Plateau, downwind of West Germany's steel and industrial heartland. The West German group has noted serious changes in soil chemistry believed to be triggered by acid rain. These changes are reflected in the serious degradation of the beech and spruce forests. The condition of the beech forest is so serious that no palliative measure, including liming, is expected to save it.

Tomlinson reports that the West German group found that forests act as acid concentrators: Acid reaching the forest floor annually is two (beech) to four (spruce) times the acid in the rain entering the forest canopy. This is so because foliage and bark capture and oxidize sulfur dioxide present in the atmosphere in very low concentrations (dry deposition). The resulting acid is then added to the acid aerosols (very small acid particles) already deposited in the canopy from the air. When it rains both these acid sources are cleansed from the trees and fall to the forest floor.

The increased acid input has slowed the breakdown of humus, and carbon and nitrogen stores in the soil are increasing. The increased nitrogen in the soil undergoes additional reactions that generate more acid, further stressing the trees, mainly by

releasing inorganic aluminum into the so-called soil solution. This aluminum is toxic to the fine roots in the soil's mineral layer and they are damaged. The trees survive though they are severely stressed because the fine rootlets in the humus layer above are less affected by the organically complexed aluminum at that soil level. Although the trees' ultimate survival is in doubt, the West German group recommends liming as a remedial measure to rectify damage done by the altered soil chemistries.

The Scandinavians, who have been monitoring the effects of acid rain longer than anyone else, have yet to discern a decrease in productivity of their forests. Arne Tollan of the Norwegian Institute for Water Research, and one of the authors of a final report of an eight-year-long government-sponsored study of acid rain's effect on forest and fish, says, "There appears to be no serious decrease in forest growth because of the increase in nitrogen deposition accompanying acid precipitation. We are finding an increased leaching of calcium and magnesium in the soils, but at present the fertilizing effects of acid rain are dominant."

Folke Andersson, coordinator of Sweden's research on acid rain's effects on soils, forests, and water, explains that "75 percent of nitrogen needed by forests comes from the work of soil organisms." Laboratory studies show that increased acidity kills these microorganisms. "Over the long term we ought to see a decrease in forest productivity due to the decrease in organisms releasing nitrogen to the soil. We can't see this yet," Andersson says.

The Norwegian report makes clear beyond a doubt that precipitation in southern Scandinavia has become more acidic as a result of long-range transport of pollutants, and nitrogen oxides are contributing an ever increasing portion to this acidity. Because precipitation forms when air masses rise and cool, the mountainous area of southern Norway has been particularly affected. Here, all lakes in an area of 13,000 sq km are fishless, and an additional 20,000-sq-km area has severely depressed fish populations, Tollan says. The mobilization of aluminum from soils by acid water is cited as a major factor in the reduced fish populations. How altered land-use patterns may contribute to increased acidification and reduced fish stocks is not clarified in the Norwegian study. Nor are any health effects directly attributed to acid waters, although the fear is that acidified drinking water could leach the toxic metal copper from pipes delivering the water to homes. Andersson reports that children in towns along the southwest coast of Sweden, which receive the highest input of acid pollution, have contracted diarrhea from high copper levels in the drinking water. He also reports that fish in some lakes in this area have been declared unfit for human consumption because of high mercury content. There also is speculation that certain concentrations of aluminum and other metals in drinking water may be related to incidences of mental disorders, and that breathing acid sulfate aerosols may result in respiratory and cardiac problems.

U.S. and Canadian scientists came late to the problem—the first recognition that acid rain was falling on the U.S. was by Likens and colleagues in 1970—but they are making up for lost time. Acid rain is a growth industry: Every year there are more funds, more research, more scientific reports and more articles in magazines and newspapers. One Canadian scientist facetiously suggests that forests may be stressed more by the demand for paper for reports and articles than by acid from the sky.

Research activities abound in all sectors—federal, state, and provincial governments, universities, and private industries. With the signing of the Memorandum of Intent on Transboundary Air Pollution last August—the first step in negotiating an air quality treaty—five joint U.S.-Canadian research groups are now assessing the current state of knowledge.

Canada will spend $41 million (Canadian) over a four-year period on a coordinated federal effort: Ontario alone spends about $5 million (Canadian) a year on a vast array of atmospheric chemistry and ecological effects studies. President Reagan's budget for fiscal 1982 calls for a 75% increase in funds from $12 million last year to about $20 million in 1982 for the coordinated federal effort mandated under the Acid Precipitation Act of 1980 (Title VII of the Energy Security Act of 1980). Since 1977, the Electric Power Research Institute, the research arm of the electric utility industry, has spent $14.5 million—the single largest research effort on the continent, says EPRI's Ralph Perhac.

EPRI's universe of research includes transport, transformation, and deposition studies, ecological effects efforts, and even projects to develop hardware to collect dry deposited acids, which is a very weak link in understanding the acid rain problem. Perhaps the institute's best-known effort is its three-lake study in the Adirondacks. With EPRI funding ($5.5 million), six universities, Brookhaven National Laboratory, and the U.S. Geological Survey have been conducting "calibrated watershed" studies on three neighboring watersheds, each having its own lake. Similar to the work coordinated by Tom Brydges in Ontario, the EPRI effort is measuring every chemical moiety entering and leaving the watersheds.

Although carved out of the same low-calcium/low-buffering granite bedrock, and receiving the same atmospheric acid onslaught, one lake is very acidic, one is "moderately acidic" (pH 5.5 to 7.0), and the third is not acidic (pH 7). EPRI ask why.

Brydges explains that the glaciers impartially and haphazardly laid down soils, so that although a whole region may be low in alkaline agents, one small area may in fact have a better buffering capacity than another nearby. Also, depth of soil and soil compaction may not be the same from one area to the next. Preliminary data indicate that Brydges is correct.

Indeed, the depth and compaction of the soil around the three lakes differ. EPRI's director of ecological programs Robert W. Brocksen says that the residence time of acids in the soil appears to be an important factor in determining the acidity of the surface waters. Loosely packed soils allow the acid precipitation to percolate slowly, the modifying effect of the soils is enhanced, and less acid eventually reaches the surface waters. He also notes that the increased acidity during snow melt is confined to the top 2 to 3 meters of the lakes.

In an effort to understand how acid rain is formed and what is deposited in lakes, for example, EPA and the Department of Energy sponsored the largest, most comprehensive although inexpensive (about $100,000) set of studies on acid rain. Known as OSCAR (Oxidation & Scavenging Characteristics of April Rain), 100 researchers from six U.S. universities, several national laboratories, Environment Canada, and the Ontario Ministry of Environment converged on the Midwest, downwind of that tight knot of high-polluting coal-burning power plants in the Ohio River Valley, this past April to monitor and collect rain from storm systems.

Stationary samplers were spread throughout 30 states and the province of Ontario to collect deposited rain while an analytical armada of three planes collected samples aloft. Field pH data are now being mapped, but only a fourth of the chemical analyses have been completed because funds have dried up. Still, program director Jeremy (Jake) Hales expects to have most of the results documented by spring 1982 and on computer format by that summer. "Scientists will probably be chewing on this for the next 10 years," Hales says. There are plans to rerun OSCAR in October 1983.

OSCAR was patterned after the Acid Precipitation Experiment (APEX) involving 15 investigators from several universities and atmospheric chemist Al Lazrus of the National Center for Atmospheric Research, who is coordinating the effort. APEX was designed to dissect the chemical sequence of events that create acidity. Lazrus argues that the important but as yet baffling chemistry occurs in the clouds. "Unless one knows what's actually happening in the clouds to produce acids, it is very difficult to regulate. You may regulate something that is very costly and yet will have very little effect on acidity," he says.

From field experiments in which cloud water was collected, APEX data show that "a lot of nitric acid is generated in the cloud, but the mechanism is totally unknown," Lazrus says. Collected samples also show that probably enough hydrogen peroxide vapor is generated in the cloud water itself to act as the rate-limiting oxidant in the transformation of sulfur dioxide to sulfuric acid and possibly nitrogen dioxide to nitric acid.

Hydrogen peroxide precursors—hydrocarbons and ozone—are present in sufficient concentrations in polluted air to generate the oxidant. Lazrus' laboratory work suggests that hydrocarbons are indeed controlling the oxidant level. "We don't know all the processes that give rise to hydrogen peroxide, but we do know that olefins, which are unsaturated hydrocarbons, and ozone are two precursors which are capable of doing this," Lazrus says. He also suspects that there are other mechanisms for generating the acids, but he doesn't know what they are.

Volker Mohnen, director of the Atmospheric Sciences Research Center at the State University of New York, Albany, is a member of the APEX team, and is a coauthor of a National Science Foundation-DOE-sponsored study on "Wet Deposition in the Northeastern U.S.," which is being circulated and quoted widely by the coal and electric utility industries.

His group studied the movement of air masses from Canada and from the Southwest and measured and analyzed precipitation falling at a site in Illinois upwind of the Ohio River Valley, and at White Face Mountain in the Adirondacks downwind of the valley. He says the group found no "significant gradient" in wet deposition between the two sites, and that the factor governing the amount of pollution-related ions deposited in rain is the amount of rain, not the direction that the air mass had taken. The rain, however, was less acid in Illinois because of acid-buffering calcium in the Illinois rain. From his work, Mohnen concludes that "it looks as if the acid rain phenomenon is nonlinear with respect to emissions. More emissions do not necessarily mean more acid rain in a proportional way at a specific site." Then he goes on to describe his regional "superbowl," that area from Illinois east, in which high concentrations of sulfur oxides, nitrogen oxides, ozone, and hydrocarbons are emitted from many sources that "somehow ultimately contribute to the acidity of air masses that deposit rain at a particular site." Because of this superbowl, the link between an emitting source and the ultimate deposition site is lost.

He is saying that the question remains which source or sources in the Ohio River Valley to control and by how much to control them to correct the acidity problem in the Adirondacks, for instance. Time is needed, he says, to unravel the chemistry, and to develop better deposition models. "I'm afraid that we will all give our blessing to a 10% reduction in sulfur dioxide emis-

sions that can be achieved through coal washing, scrubbers, and other strategies, and then in five or 10 years look back at the mess and say that it didn't do a darn bit of good. That's dangerous because it hurts the scientific community, and it hurts the overall environmental cause," Mohnen says.

While the research goes on, he suggests that susceptible regions like the Adirondacks be placed in "a holding pattern" by using waterbombers to lime whole watersheds—not just lakes, but the whole shed including forests. He claims that 100,000 acres in Adirondack Park can be limed for a cost of less than $4 million, which includes the establishment of a monitoring network to assure that the cure is not worse than the illness. He admits that Likens views his suggestion as "combating cancer with an aspirin." A Canadian scientist has quipped that "the only agency able to lime all of Ontario is another Ice Age."

The Canadians offer a different interpretation of Mohnen's findings. Peter Summers, a research scientist with the Federal Atmospheric Environment Service, says that the two sites from which measurements were taken are either in or very near the heavily polluted region from southern Ontario, east of the Mississippi, to the northeastern U.S. Air masses traveling over this region from whatever direction would "reach some sort of saturation," because the pollutants are being deposited out of the atmosphere as fast as they are being accumulated. That's why Mohnen is seeing no gradient, no difference in deposition at the two sites. "There is heavy deposition in the same area having high emission rates. Had he looked outside this region, further west of the Illinois site, for instance, he probably would have seen a gradient," a difference in deposition, Summers believes.

In short, in heavily polluted areas, with many high emissions sources, pollutant deposition is correspondingly high, and independent of wind direction. Outside the polluted area, depostion is highly dependent on wind direction. In relatively remote stations near Kenora, Ont., which is northwest of Lake Superior, "the air is much more polluted when it is coming from the Southeast than when it is coming from the North," Summer says. The Canadians also don't believe that Mohnen has sufficiently considered meteorological conditions that produce rain. How much acid rain is produced depends both on the amount of emissions and on weather conditions, they say.

Gregg Van Volkenburgh, director of the air resources branch of the Ontario Ministry of Environment, agrees with Mohnen that there is not a one-to-one relationship between sulfur dioxide emissions and sulfuric acid formation. He also says that the best strategy over the long term is control of sulfur dioxide, nitrogen oxides, and hydrocarbons. Nevertheless, he says that it is "our feeling that a substantial reduction in sulfur dioxide emissions will lead to a substantial decrease in sulfuric acid in precipitation, and the effect will be seen over a five- to 10-year period." A first step must be taken, and sulfur dioxide reduction is such a step, he contends.

Ontario, he points out, is making its major polluters—Inco with its quarter-mile-high stalk spewing out 1% of the global sulfur budget annually, and Ontario Hydro's four power plants—cut emissions about 50%, "without squandering industry's money." Hiding behind the uncertainties and taking no action is not responsible, Van Volkenburgh says. An accelerated research effort without legislation to begin to deal with the problem would be viewed by Canadians as insufficient. "We are not asking the U.S. to devise a new regulatory stratagem for acid rain; that's premature," says George Rejhon, environment counselor with the Canadian Embassy. But, he continues, "We believe that the U.S. ought now, in the course of reviewing the Clean Air Act, to fashion in the law a tool to deal with acid rain."

Under the present Administration, that seems unlikely. The National Acid Precipitation Plan, which was called for under the 1980 Acid Precipitation Act and which is to be the blueprint for a coordinated federal research effort, is expected to be completed this fall. That also is when the actual 10-year research program is to begin, says Chris Bernabo, executive director of the interagency task force developing the plan.

In a June discussion paper on amendments to the law, EPA Administrator Anne M. Gorsuch wrote: "The most conspicuous transport issue is acid rain. Canada is exerting considerable pressure for preventive action. Environmentalists also seek prompt and stern action to address the problem. The best option appears to be to accelerate EPA's current 10-year research project . . . as much as currently available dollars and sound science will permit, and defer regulation until the sources and extent of the problem can be better identified. Industrial groups would support this . . ."

Economics is driving the politics. And like the warm fronts that move eastward across the U.S. to drop acid showers on the Northeast, the hot language of politics is overriding the cold logic of science. Technological controls on the major emitters of sulfur dioxide and nitrogen oxides will be available over the next five to 10 years. But the cost, especially for retrofitting older facilities, would be high. If substantial—on the order of 50%—reduction in emissions were mandated, the power plants also would have to turn to more expensive low-sulfur western coal, depressing the midwestern coal industry and throwing thousands of miners out of jobs. Consumers of electricity in the Midwest would be slapped with substantial rate hikes.

It would be very difficult for President Reagan, who ran on a platform of economic recovery and regulatory relief to industry, to call for strict controls.

So the well-organized voices of the coal and electric power industries have been heard and heeded. Conoco's William C. Hamilton: "Our argument is that it would be a very chancy thing to come out with regulations aimed at decreasing the acidity of rainfall that were based on the supposition that if you dropped sulfur dioxide emissions 50 percent it would produce a 50 percent reduction in acidity. We don't think that follows at all. Our fear would be that there would be a very large amount of economic disruption, at great cost to the consumer, and quite possibly very little relief from the acidity of rainfall."

Electric Edison Institute's Jack Taylor: "Information doesn't exist on the extent of damage, on the causes, and on the transport/transformation mechanisms that contribute to acid rain. At this time, not enough is known to set prudent public policy. We think an aggressive research program should be undertaken in order to answer these questions."

Kathleen M. Bennett, EPA assistant administrator for air, noise, and radiation: "When the Administrator [Gorsuch] had the press conference which reported the principles agreed to [on the Clean Air Act], there was a principle which said that research on acid deposition should be accelerated. It seems clear to us that there are so many questions of a very basic nature that remain to be answered that it would be inappropriate for us to ask the American public for $20 million for research this year and more in the next five or 10 years but then say, 'By the way, here's a regulatory scheme which purports to know the answers to the questions we are now asking you to fund."

Though that appears to be the Administration's position on acid rain now, it already has considerably moderated its general stance on revisions to the Clean Air Act, and may do so again on this issue. During his campaign, Reagan found the Clean Air Act an onerous law in need of drastic modifications. Then a couple of months ago a Harris Poll was released showing that 86 percent of the public fully supported clean air legislation. Reagan backed away from the fray, and sent the EPA Administrator out to announce not proposals with legislative language but 11 principles on needed revisions. She did so while Congress was in recess, and Congressional staffs were busy drafting clean air bills.

If Canada maintains pressure on the Administration, especially if it comes from Prime Minister Pierre Trudeau, and if Americans across the U.S., not just those in affected states, can be made aware of the issue, will be addressed in a renewed Clean Air Act or through separate legislation. Republican Robert T. Stafford, chairman of the Environment Committee and Senator from the acid-drenched state of Vermont, told C&EN that he would "try to pass legislation affecting the acid rain question in this Congress." But, he added, "I think the Clean Air Act is a ship that is going to be carrying a full load of cargo by itself. I don't intend to stick an acid rain cargo on top of the cargo that is already there and cause the ship to sink. So if it looks as though acid rain legislation would overload the Clean Air Act, it's not going to go on it, as far as I'm concerned. It will have to come up as a separate piece of legislation."

Sen. George Mitchell (D.-Me.), who sits on the Environment Committee, plans to test the stability of the ship. This week he will introduce an amendment to the air law that would provide for an inventory of existing sulfur dioxide emissions in a region from Tennessee north and from Illinois east, prohibit further increases in total levels of emissions, and mandate a reduction in emissions over a 10-year period. The House is further away from writing a bill, but Rep. Henry A. Waxman (D.-Calif.), chairman of the Health & Environment Subcommittee, has called acid rain a threat to the nation's air, waterways, water supplies, and forests that also jeopardizes U.S. relations with Canada. "The time has come to cut back on the air pollutants that cause this destruction," he says.

Canadians understand that increased public awareness and sensitivity to the issue will most likely translate to increased pressure on members of Congress to take some action. To this end, government officials and especially Environment Minister John Roberts speak on the issue at every opportunity. On a less official level, a Canadian coalition of 22 special interest groups whose members number 1.5 million has opened an office in Washington, D.C., to complement its Toronto-based activities. Adele Hurley runs the Washington operation of the Canadian operation of the Canadian Acid Rain Coalition. From this platform she informs "the American public of the grave implications that emissions from the U.S. are having on the Canadian environment."

The political concern in Canada already is at very high official levels. When Prime Minister Trudeau met with President Reagan in Washington on July 10 in preparation for the Ottawa economic summit meeting, "the only bilateral issue they discussed was acid rain," reports deputy assistant minister of the environment Raymond M. Robinson. Still, Robinson says that his government does not intend to pressure the U.S. government into action by linking energy exports to the acid rain issue. Nevertheless, Canadian environmental groups have called for just such a linkage.

The Canadian government, however, is not reluctant to remind the U.S. of the mutual

obligations incurred from the mechanisms that have evolved over the years to resolve problems common to both countries: Principle 21 of the 1972 Stockholm Declaration; the Boundary Waters Treaty of 1909, an arbitrary tribunal ruling in the 1980's against a British Columbian smelter for damages caused in Washington state, and the Great Lakes Water Quality Agreement of 1972.

The situation that resulted in the 1972 water quality treaty is similar to the acid rain problem today. Then there was imperfect understanding of the effects of phosphorus on the Great Lakes. Today it is not possible to relate emissions from a particular plant to dead fish in a particular lake. Nonetheless, Roger Simmons, a member of Parliament, says, "We cannot wait for a perfect understanding of the acid rain phenomenon before moving to control it. If we had waited back in 1972 for a complete understanding of the effects of phosphorus on the Great Lakes before starting our joint cleanup program, we would still be waiting and Lake Erie would be irreversibly dead."

Robinson calls the lack of a precise source-receptor relationship a "dead herring." He says that "if you are going to reduce the total burden to the atmosphere of sulfur dioxide on a cost-effective basis, which means controlling the biggest sources most thoroughly, then you are going to reduce the amount of sulfur available to turn into sulfate. It is as simple as that, and all the rest is just a pile of garbage designed to cloud the issue."

The cost to control sulfur emissions, however, is staggering. According to DOE's Jim Bartis, an internal study estimates that to reduce emissions permanently 3% or 1 million tons per year in the utility sector alone would cost about $2 billion in 1981 dollars. Beyond that incremental reduction, the cost rises rapidly, he says. To reduce emissions a significant amount—5 million to 10 million tons per year—would cost $5 billion to $7 billion.

Earlier, EPA estimated that a 10 to 30% reduction in sulfur dioxide emissions in the utility sector would cost $1 billion, and raise utility customer bills 2 to 3% per year on a national average. Customers in the Ohio River Valley, however, would be socked with rate hikes of 10 to 15% per year. EPA's Lowell Smith has suggested a possible "redistribution of revenues collected from all electricity users in the country for use in areas where emission control and/or acid precipitation is the greatest problem."

On the other hand, a recent National Academy of Sciences report, "Prevention of Significant Deterioration of Air Quality," pegs the damage costs in the eastern third of the U.S. in 1978 at $5 billion. This includes damage to materials, forest ecosystems, agriculture, aquatic ecosystems and health and water supply systems. The New England River Basins Commission estimates current economic losses in the New England/Adirondack region of New York from acidic deposition at $250 million to $500 million per year, exclusive of harm to health. And Frederic Menz, an economist at Clarkson College, says a preliminary estimate of the economic losses from the acidification of Adirondack lakes is "$1.6 million to $6.4 million annually in loss of value to New York anglers, and a regional economic impact resulting in a reduction in expenditures by New York resident anglers of $875,000 to $1.75 million annually." Out-of-state and nonlicensed anglers are excluded from the estimates.

The economic damages may be even greater for Canada, a smaller nation. Gross angler expenditures and investments were just over $1 billion in 1975. This is in jeopardy. In Nova Scotia, 30% of the salmon potential is threatened. High acidity threatens the nation's boreal forests. This resource provides employment for more than 10% of the Canadian labor force.

Canadian Environment Minister Roberts says that "Canada expects the U.S. to recognize that it must internalize the real costs of those activities, especially thermal power generation, which produce acid-causing pollutants, rather than exporting those costs across the border in the form of environmental damage to us. By any reasonable interpretation of existing international legal principles the U.S. cannot continue to derive significant economic benefits by exporting significant 'disbenefits' to Canada, particularly when the technology exists to prevent this from happening."

If the Canadian claims are correct—and a just-released National Academy of Sciences study of the problem says they are—power plants burning coal and oil and emitting sulfur and nitrogen oxides are responsible for acid rain. If the Canadians' timetable is correct, that nation will be experiencing ecological and economic disaster before the turn of the century. In view of the potential cost to Canada, the coal and electric utility industries' apparently successful campaign to thwart legislative efforts to control acid rain may be a Pyrrhic victory.●

CONTINUITY AND FIRMNESS—THE BEST GUARANTOR FOR PEACE IN EUROPE

● Mr. LUGAR. Mr. President, recently Assistant Secretary of State Lawrence Eagleburger made a most interesting speech to our friends in Western Europe. The speech forcefully presents the thesis that continuity and firmness are the best guarantors of peace in Europe. I believe that the speech presents an important statement of American policy in Europe, and I commend it to the attention of my colleagues. I ask that the text of the speech be printed in the RECORD.

The text follows:

PREVENTING WORLD WAR III AND PRESERVING WESTERN INDEPENDENCE—CHANGE VS. CONTINUITY

(By Lawrence S. Eagleburger)

We Americans watch with interest and—let us admit it—some apprehension, as Western Europeans increasingly focus on the complex and emotional issue of nuclear weapons and their deployment in Europe. We watch with a good deal of sympathy, since there can be no question about the profound importance of avoiding nuclear catastrophe. All previous human tragedies would pale by comparison with the total devastation a Third World War would bring. Neither the plagues of the Middle Ages, nor the terrible trench warfare of the First World War, nor even the forty million deaths in World War Two approach the death and destruction which a nuclear holocaust would bring in its wake.

Precisely because the prevention of nuclear war is so terribly important, we are concerned about pressures—some well intentioned, some not so well intentioned—to change a policy which has prevented war for over thirty years. Many of my countrymen wonder whether the debate now taking place here is a fundamental challenge to the principles which have guided us for over 30 years, or a discussion about tactics, accompanied by an acceptance of most of the traditional premises about Western security.

While the debate is, as it should be, fundamentally between and among Europeans, we Americans cannot remain totally aloof from it. America's well-being—as well as Europe's—is at stake. In a most profound sense, you are discussing the security of the United States. Just as Americans were inextricably caught up in the first two world wars on this continent, so, now, the survival and well-being of over two hundred million Americans depend on the conclusions you reach.

It seems to me that, despite the complexity of the issues and the diversity of views, the debate of which I spoke is basically over two fundamentally different paths—paths which could profoundly affect the course of history through the end of this century and beyond.

A number of Europeans are now arguing vigorously for a new approach to security. They do so for a variety of reasons. However, to this observer's eye, at least, those who espouse a new approach seem to agree on certain fundamentals.

I don't want to oversimplify, but the central thrust of the argument seems to be that the West should now stress arms control more than defense programs in the search for security. Many also argue that we should pursue this process through gestures of unilateral goodwill, for example by cancelling such defense programs as deployment of theater nuclear forces. And some go further, to urge that Europe try to find a less dangerous middle ground between the two superpowers.

Others in Europe argue for continuity. They believe that war can best be deterred and independence preserved through adequate defense efforts. They believe arms control can only yield serious results if we proceed from a base of strength and confidence, and if we insist on equality. Finally, they believe Europe and America's fate must be inextricably linked, strategically and politically.

Let me say at once that I understand the concerns of at least some of those who argue for change in the West's approach. For thirty years—until the mid-1970s—most Europeans were convinced that the United States was a world power without peer and that it would, in a crunch, defend Europe because it was in its self interest to do so. U.S. inability to bring the war in Vietnam to a successful conclusion, our internal torment over Watergate and subsequent paralysis in Angola, Ethiopia and Afghanistan, culminating with the year-long agony of the hostage crisis in Iran, have undermined that confidence. Thus some wonder not only about our military power, but also whether, in some profound way, we have lost the will to withstand the Soviet Union even if we have the power to do so.

Now, ironically, from some of the same sources, we see a concern that the U.S. may overdo its efforts to restore its military power and face up to Soviet challenges. These concerns, in combination, have produced a view—popular among some—that the U.S. would be all too ready to get into a war, yet bent on confining it to Europe. The result is a mixture of fear and wishful thinking.

Fear of the Soviet Union as an aggressive, imperialist power intent on imposing its will on Europe. Fear of an erratic, unpredictable United States which might, through accident, weakness, overconfidence, or unnecessary confrontation precipitate a nuclear war in its vacillating and disjointed efforts to halt Soviet expansion. And finally fear that both powers would share an interest in limiting war to Europe, thus further reducing the inhibition on confrontation.

And wishful thinking that somehow through demonstration of goodwill toward the Soviet Union, even if distancing itself from the United States, Europe can create a more secure environment for itself.

The central problem with this approach is that it ignores critical realities about both the Soviet Union and the United States.

With regard to the Soviet Union, let us look at the record compiled during the late 1960s and the 1970s, a period of detente—

a period in which there was supposed to have been mutual restraint:

The United States abolished the draft, reduced the size of its armed forces, and decreased its real military spending. The Soviets increased their military forces by one-third, to 4.8 million men, more than double that of the United States, and expanded their real military spending by more than 50 percent. Are those gestures of goodwill?

The Soviets increased their inventory of tanks to some 50,000, compared to just 11,000 American tanks. They transformed their navy from a coastal defense force to an open ocean fleet, increasing the number of large surface combatants by 40 percent, just as the United States decreased the number of ships in its fleet by 40 percent. Is that reciprocity?

During a period when NATO deployed no new long-range theater nuclear forces, the Soviet Union deployed over 750 warheads on their new SS-20 missiles. And the Soviets increased their strategic nuclear delivery vehicles nearly 600 percent. Is that restraint?

As countries and whole continents were liberated from the yoke of Western colonialism, the Soviet Union and its proxies moved in with new forms of imperialism and intervention—Vietnam into Kampuchea and Laos, the Soviet Union into Afghanistan, Cuba into Africa and Latin America.

While the West has endeavored to meet the real needs of the developing countries through food, loans and other economic assistance, the Soviets have concentrated on exports of weapons and Marxist-Leninist regimes—which in turn have proven disastrous failures in meeting the practical needs of their people. Is this a contribution to development and progress?

As the West is swept by anti-defense and anti-nuclear demonstrations, the Soviet Union exposes its own people to a massive display of military films and propaganda, and represses any public expression of concern about the vast sums devoted to a military buildup. Even as the FRG demonstrates its genuine goodwill and humanitarianism throughout the world; the GDR preaches peace in the West, seeks to reduce inter-German contacts, directs a cascade of shrill propaganda against liberalization in neighboring Poland, and makes its most particular export to the developing countries training in the tactics of the secret police. Is that the spirit of detente?

While the West endeavors to cope with the overwhelming human tragedy of some ten million refugees from oppressive communist regimes in Vietnam, Kampuchea, Laos, Afghanistan, Ethiopia and Cuba, the Soviets and their allies create still more refugees and absolve themselves of any responsibility for their care. Is this concern for humanity?

Not only have the Soviets failed to reciprocate the self-restraint and positive efforts of the West, they have also shown open disregard for solemn international agreements.

They have failed to live up to either the security or human rights pledges of the Helsinki Final Act, even arresting a group trying to monitor Soviet compliance with the Helsinki accords.

They may well have violated the Geneva Protocol and the Biological Weapons Convention.

They and their proxies have used force in blatant contempt of the UN Charter itself.

If an approach based on fear and wishful thinking ignores critical facts about the Soviet Union, is this approach forced on Europe because of a permanent change in the United States? Is Europe condemned to a policy of appeasement because of some new structural fault in American strength and will? I urge you to look across the Atlantic for your answer.

The spirit of the American people has revived. As President Reagan said in his speech at West Point in May, America's era of self-doubt is now behind us. We, too, had hoped that the Soviets were prepared to reciprocate our restraint with restraint of their own. Their proven unwillingness to do so has left us no choice but to increase substantially our defense spending to match the Soviet effort, and to reinvigorate our efforts to resolve critical crises through peaceful means. We have the will and the resources to do so.

Most fundamentally, the United States rejects the idea that there is no alternative between surrender of our independence and nuclear confrontation. We have a clear vision of what the future requires. It proceeds from the principles which have served the Atlantic Alliance so well for over thirty years.

During this period, we witnessed over 150 wars in other parts of the world. This was a time when Europe faced an ever more heavily-armed hostile power in close proximity. We must ask ourselves: how was peace secured? How has it been maintained?

In the middle of the twentieth century the ever quickening pace of conflict in Europe was brought to a halt by an Alliance based on two qualities—shared values and a recognition that our security was inextricably linked. Each quality strengthens the other. Our commitment to one another's security is all the more real and lasting because we stand for—and would fight for—common values. Our values are all the more precious because those who would threaten us display utter contempt for our concept of society and the individual.

Just as Secretary Haig, in his recent Berlin speech, called for rededication to our shared values, we must also return to first principles with regard to our security. Amidst the controversies of the day—TNF, Poland, defense budgets, Southwest Asia—we all tend to lose sight of the foundation of our security. In fact, we cannot hope to overcome today's problems unless our policies are built firmly on that foundation.

THE FOUNDATION OF PEACE

Five principles have guaranteed peace in Europe over the past three decades. If we stand by them, they can continue to do so through the end of this century and beyond.

First, Alliance security is indivisible.

Second, our strategy is to deter war at any level.

Third, the burdens of our Alliance must be shared.

Fourth, we must negotiate from a basis of equality, confidence and strength.

Fifth, our political independence requires that we sustain a military balance.

Let me examine each of these traditional principles in today's context.

Our first principle is the indivisibility of Alliance security. Whoever threatens one of us threatens all. This has been and remains the source of our collective strength.

Can anyone really deny that the strategic arsenal of the United States is the ultimate guarantor of European security? Although trends in strategic capabilities have favored the Soviets in recent years, we now are taking steps to maintain a versatile and viable strategic force that will continue to command Moscow's respect. That is the meaning of the comprehensive program announced by President Reagan earlier this month.

To form a bridge to America's strategic forces, the Alliance must implement the December 1979 decision to modernize its theater nuclear forces. The placement of modernized U.S. nuclear systems in Europe is a response to Allied concerns that the Soviet Union is creating the means to devastate or intimidate Europe with theater nuclear weapons while holding the U.S. at bay with its strategic forces. TNF modernization will end Soviet hopes of regionalizing a nuclear conflict based on an ability to strike the European Allies from a Russian sanctuary.

The essential idea behind TNF modernization—like that behind the maintenance of 300,000 American soldiers in Europe—is to remove any doubt the Soviets might have about the U.S. strategic commitment to NATO. The Soviets have no higher goal than undoing the December 1979 decision, leaving themselves with an undeterred capability to wage or threaten nuclear war in Europe. While we welcome debate about TNF, opponents must face up to the fact that the strategic link that has helped bring peace and stability to Europe would be severely strained if they had their way.

The Soviets neither understand nor accept the indivisibility of our security. They do not see why the United States is unwilling to draw a clear distinction between its security and that of its Allies—the former sacred, the latter expendable.

They are surprised that Americans are no less alarmed than Europeans by the SS-20, a system specifically designed to threaten Europe but not the U.S. Indeed, in recent months senior Soviet officials have said flatly to us that U.S. forces in Europe that could strike the Soviet Union from Europe could not be equated with Soviet forces that can only strike the European Allies. We, in turn, have told them bluntly that the Soviet nuclear threat to America's allies is a threat to America itself.

The second principle which has sustained peace for thirty years is that the aim of our strategy is to deter war. Ours is a strictly defensive Alliance. We have everything to lose and nothing to gain from war. Our strategy is defensive, our equipment is defensive, our forces train solely to defend. In contrast, the Soviets train, plan, and are equipped to thrust into Western Europe. Their 50,000 tanks are hardly necessary to defend against NATO forces whose only mission is to safeguard our own territory.

Throughout the postwar period, NATO has chosen to rely on a strategy of flexible response to deter aggression. Knowing that our conventional forces might be insufficient to withstand an onslaught from larger Soviet forces, we have depended heavily on nuclear deterrence.

We have always known that the best way to avoid nuclear war was to close the gap in conventional forces. Today that gap is still serious. But where is the support for improved conventional forces from those who seem so concerned about nuclear war?

Increasingly one hears criticism in Europe of the so-called warfighting doctrine of the United States. This criticism is more vocal, I might add, than that directed against Soviet warfighting doctrine, the object of which is the very European territory Americans would die to defend. Having forces trained and equipped for combat hardly implies that the horror of war is being ignored.

Having nuclear weapons that are secure, survivable, modern, and capable of destroying targets valued by the adversary hardly suggests that the decision to use such weapons would be any less grave. Indeed, possessing the means to hold Soviet territory at risk is the only way to convince the Soviets that warfighting is fraught with danger for them.

I hear time and again that the U.S. is increasing the stockpile of nuclear weapons in Europe in order to wage nuclear war here, while insulating the United States itself from nuclear holocaust. That disgusting claim ignores the several hundreds and thousands of American troops stationed in Europe who would also be victims of such a conflict. It also ignores some fundamental facts. I can understand concern with the numbers of nuclear weapons on this continent. But I never hear reference to the fact that last year the United States withdrew 1000 nuclear weapons from Europe, without replacement. Moreover, those that we are deploying as a result of the December 1979

TNF decision are not battlefield weapons at all, and in fact will replace weapons now in Europe. The US is thus reducing the number of nuclear weapons in Europe.

Our third principle is that the burdens of our alliance should be shared. This is an inescapable consequence of the first two principles. Just as each ally benefits from the security that results from a collective commitment and from deterrence, so must each uphold its responsibilities to the common defense effort. This is a practical imperative as much as a moral duty. So great is the threat that we cannot safely do without the efforts and resources of any Ally, no matter its size. Nor can we ask some nations to bear disproportionate risks while all expect to share in the benefits of credible deterrence.

Indeed, the thought that any of us, on a national basis, can elude the risks of our dangerous world is an illusion. If deterrence fails, none can hope to be spared, least of all my own country. While policies differ among various Allies on the question of peacetime deployment of nuclear weapons, neither the risks we face nor the shelter of deterrence makes such distinctions.

Those who do not have nuclear deterrent forces on their territory owe their security, in large measure, to those who do. None could escape the devastation of a nuclear war, whether they have nuclear weapons on their soil or not. An Ally can opt out of its deterrent responsibilities only at a cost to the security of its Allies and itself. Sharing risks reduces risks.

At the Rome Ministerial meeting of the North Atlantic Council last May, Alliance members acknowledged the danger we face and committed themselves to make available whatever it takes to restore a military balance.

The burden of defense is heavy on the shoulders of our peoples, especially in these times of economic trouble. No one feels this weight more than my own countrymen—who have consistently devoted a higher share of their gross national product to defense than other NATO countries. In recent years we did more than others, but less than is necessary. President Reagan now has reaffirmed the U.S. commitment to a major increased effort to rebuild our military strength, while cutting painfully into non-defense programs in order to restore national economic health.

We know European leaders are well aware of the gap that must be filled by increased defense spending. We urge our European friends to make even greater efforts to generate the necessary funding. The underlying strength of your economies certainly makes this economically possible if there is sufficient political will.

The serious challenge to Alliance security in Southwest Asia has added another dimension to the principle of shared responsibilities. 51 percent of Europe's oil comes from the Persian Gulf—a region facing internal stresses and a growing Soviet threat. Even though only 12 percent of America's oil comes from the Gulf, the U.S. has accepted a special responsibility to meet this challenge and is strengthening its capabilities to protect vital Western interests in that region.

There is no lack of opportunity for the Allies to join the effort: some can increase their own deployments to the area; some can support the transit of U.S. forces sent to Southwest Asia; and some can increase their assistance for Turkey and others directly menaced by the Soviets.

The fourth principle of our security is our desire for serious arms control negotiations combined with our recognition that results will only come if we negotiate from a basis of equality, strength and confidence. The evidence for this proposition is overwhelming. The Alliance's decision to modernize its theater nuclear forces caused the Soviets to reverse their refusal to negotiate and for the first time to offer limits on their own theater forces. Let me repeat this. The Soviets would not even agree to negotiate until we decided to move ahead with our own deployments. We now face a hard and probably lengthy negotiation. The prospects for success depend, above all, on whether the Soviets believe us when we say that our program can be affected only as a result of an equal and verifiable arms control agreement.

Ironically, the real enemies of arms control are those who often are the loudest in its support. Those who undermine the common commitment to both tracks of TNF in fact are undermining any hope of success in arms control. There is an inescapable logic to this position which no amount of rhetoric can obscure.

My Government is applying to strategic arms limitations the same compelling approach that the Alliance adopted with respect to TNF. We are insuring that our strategic programs give us a solid base from which to negotiate serious reductions. President Reagan is committed to significant strategic arms reductions; we hope to be able to begin negotiations sometime during the first half of next year. We don't want unregulated competition. But the Soviets must be convinced—and I think are being convinced—that Americans have the resolve to reverse the trends that have favored the Soviet Union for more than a decade, and to establish an overall balance.

The principle of negotiation from confidence, unity and strength also has been vividly demonstrated in the Madrid CSCE follow-on meeting. Through cohesion, firmness, patience, and a strong negotiating position, we have brought the Soviets some distance toward our proposals for a meaningful European Disarmament Conference and an equally significant outcome on human rights.

For example they have come closer to agreeing that confidence-building measures should apply to Soviet territory up to the Urals—and thus to all of Europe. This would be a development of historic political importance and substantial benefit to our security. If, in the end, the Soviets refuse, they will in effect be saying that their part of Europe should be exempt from the rules they would apply to the rest of the continent. Since the Soviet Union is the threat to European security, the need for confidence-building measures is nowhere greater than on Soviet territory. The only way to get the Soviets committed to a European Disarmament Conference genuinely aimed at enhancing security is to convince them that we won't agree to a Conference without such a mandate, nor to an outcome in Madrid which slights human rights.

The Harmel Report of 1967 proclaimed that military security is "the necessary condition for effective policies directed towards a greater relaxation of tensions." That observation was made when hopes were highest that the East could be brought to share our commitment to moderation and restraint. By the time of the Rome Ministerial meeting, some fourteen years after the Harmel Report, hope had given way to disappointment and frustration. In the intervening period, growth in Soviet military capabilities was spectacular, while we in the West failed to heed Harmel's wise prescription. We have not abandoned the goal of constructive relations with the East, but we must now realize that we haven't given the Soviets enough incentive to pursue this same goal.

The fifth principle which must continue to guide us is the inextricable linkage between sustaining a military balance and our political independence.

Deterrence has served us well—so well that the threat seems almost unreal: a receding memory for some, a distant abstraction for others. But it's worth noting that just a few months ago 100,000 Soviet troops conducted a military exercise on Poland's borders at the very moment the Polish trade union, Solidarity, was meeting.

The Helsinki Final Act forbids its signatories from threatening the use of force. It is clear that neither time nor the pledge of restraint has reduced the readiness of the Soviet leadership to use military power to influence political decisions. The 25th anniversary of the Hungarian revolution next week and the second anniversary of the Soviet invasion of Afghanistan in December remind us of a single fact—the Soviet Union remains determined to dictate the destinies of other nations.

As critical as the U.S. strategic commitment is for deterrence, it is no less important politically. The Soviet Union has long harbored the hope that the U.S. could be effectively removed from the European scene, leaving Soviet military supremacy as the backdrop of European politics. For European governments to take decisions under the threat of overwhelming Soviet military power would be paralyzing in peacetime, dangerous in a crisis, and fatal in a conflict.

Nations which value their independence must sustain the means to defend it. We cannot expect to maintain our freedom and democratic values through appeals to the goodwill of those who would suppress them.

AGENDA FOR THE FUTURE

As I noted at the outset, we can apply these five principles to the future or we can change course in fundamental ways.

If we decide to stay on course, our agenda for the future will require effort and sacrifice. But it also will be full, rich and promising. Above all it will require that we move from principle to practice, that we take concrete steps to implement our overall approach. Specifically it will mean:

In defense, the United States must sustain the substantial program of conventional and nuclear force improvements we have launched. Our Allies also must increase their defense contribution based on the pressing need to close obvious gaps.

In arms control, we will begin TNF negotiations on November 30, we will resume the CSCE discussions this month, and we expect to start strategic arms reduction talks in the first half of next year. By approaching this agenda from a basis of confidence and strength we can work toward significant limitations and reductions.

In areas of current or potential crisis, we can apply Western strength to building restraint and resolving problems. Here too the agenda is rich: gaining independence for Namibia and security for an Angola free of outside forces, the restoration of independence and non-alignment for Afghanistan and Kampuchea, stability and growth for Central America, a permanent peace in the Middle East. We and other nations have made positive and practical proposals in each area, while the Soviet Union and its allies have encouraged intransigence and tension.

Our overall objective should be a new era in which all nations act with restraint and responsibility, in which change proceeds peacefully, in a framework of internationally recognized norms and without damage to the vital interests of any nation. If we are wise, history is on our side. As the NATO Ministers stated in their communique of May 5th, "The more constructive East-West relationship which the Allies seek requires tangible signs that the Soviet Union is prepared to abandon the disturbing buildup of its military strength, to desist from resorting to force and intimidation and to cease creating or exploiting situations of crisis and instability in the Third World." With our balanced program designed to restore Western strength and to proceed with positive arms control and other diplomatic initiatives, we can hope to bring about this greater Soviet restraint.

But, if we desert the principles that have preserved peace for thirty years, then who can, with confidence, predict the future? The lesson we should have learned from the 1930s is that weakness, vacillation and appeasement start a process which, more often than not, leads to tragedy. The aggressive government keeps pushing until it miscalculates, oversteps, and compels a military response or capitulation.

Those who genuinely wish to avoid nuclear confrontation must see that the only rational course is to act now—as we have so steadily and successfully for almost four decades—to make clear to the Soviet Union that their expansionist policies cannot succeed. The age of empire has passed.

Ladies and gentlemen, forty three years ago this month Neville Chamberlain travelled to this city in search of "peace for our time, peace with honor." Within months Europe was once again at war. A combination of fear, wishful thinking and misguided idealism led to disaster. It must never happen again.●

AN ANSWER TO THE HAITIAN REFUGEE DILEMMA

● Mr. HUDDLESTON. Mr. President, in yesterday's Washington Post, there was an article which outlines the dilemma this country faces in trying to deal with the increasing flow of Haitian migrants. According to the article, a few private lawyers have been able to outmaneuver the Department of Justice and have succeeded in bringing our immigration enforcement efforts to a virtual standstill. However, this is not a new dilemma. This legal twilight zone has existed for several years and the recent legal action is merely a continuation of it.

There can be no respect for our immigration laws until they are enforceable; at the present time, the legal delays have effectively rendered them unenforceable. This problem will not be resolved until Congress firmly establishes that aliens who enter the United States under these circumstances are not entitled to all of the due process rights which citizens are entitled to. The Federal courts have held that Congress has this authority and it is folly for us to assume that the almost 50,000 cases which are now backlogged can be disposed of in any other way.

On March 24, 1981, I introduced S. 776, the Immigration and National Security Act, which would solve this problem without the necessity for conducting dangerous interdiction-at-sea operations which are now underway. My bill would create a system which would require fair hearings, but would severely discourage the lengthy legal delays that we are now experiencing. Once this process is underway and illegal arrivals are actually being deported, the word will quickly spread that our immigration laws are being speedily and effectively enforced. This type of legal deterrent will be far more effective in the long run than the much more dangerous interdiction-at-sea program.

I ask that the article from the Washington Post be printed in the RECORD.

The article referred to is as follows:

HAITIAN REFUGEE DILEMMA—LAWYERS FRUSTRATE U.S. ILLEGAL-IMMIGRATION POLICY

(By Mary Thornton)

MIAMI.—For more than a year now, a ragtag group of young lawyers has held the whole U.S. government at bay, managing in case after case to thwart the Department of Justice.

Their efforts have prompted a Justice Department spokesman to declare: "We have lost control of our borders and our beaches. We have to do something about it and do it fast!"

They have caused President Reagan to deploy U.S. military might in the form of the Hamilton, a fully armed 378-foot Coast Guard cutter into the territorial waters of another country: Haiti.

At issue are the Haitians who by the thousands have been packing themselves into small boats, many of them homemade and only 20 or 30 feet long, and making their way over 800 miles of open water for the shores of Florida.

The Hamilton began patrolling the Windward Channel early last week, looking for boatloads of Haitians with the idea of turning them back. But by week's end it had not stopped a boat, and no one was sure what would happen if it did—or if the boat refused to stop.

The government says the Haitians are illegal aliens coming here to seek their fortunes and escape poverty in their island country. For the first time since Japanese-Americans were put into detention camps during World War II, the Immigration and Naturalization Service last July initiated a policy of putting the illegal aliens into prisons to await deportation hearings.

There are now about 2,700 Haitians in detention in the United States and Puerto Rico, and the government estimates that as many as 1,000 per month may be entering the country. The largest of the camps is the Krome Detention Center here on the edge of the Everglades, where 1,200 Haitians live in a concoction of barbed wire and concrete blocks on an old missile site about 45 minutes outside of downtown Miami.

The lawyers, generally working without pay, have insisted that at least some of the Haitians are political refugees fleeing the repressive regime of Jean Claude (Baby Doc) Duvalier and are entitled to full asylum hearings and full due process of law, complete with several layers of appeals.

So far the federal courts have agreed with them, often criticizing INS at length in the process.

"Fighting immigration is like shooting fish in a barrel. It's like the Selective Service in the '60's. They're portraying us as a group of smart lawyers that got together, but in fact the things they're doing are so blatantly illegal that they make it easy for us," said Ira Kurzban, who is leading the lawyers.

In fact, the government is faced with a near-impossible situation. At a time of limited resources and economic problems, it is clear that the United States can no longer welcome everyone who wants to come into the country. That question is complicated even further when the people pouring across the border are poor, often illiterate and don't speak English—people who would present a further drain on already stretched social services.

Alan C. Nelson, deputy INS commissioner, says the Haitians who are coming have absolutely no legal right to be here, and by letting them in, the United States could be encouraging hundreds of thousands of others to attempt to get here.

But because of the lawyers, the Haitians who are coming illegally are perhaps being accorded more legal rights than those who obey the law.

To force the government to provide due process for the Haitians, the lawyers have raised not only the merits of the individual cases, but also virtually every possible legal issue to trap the government in its own bureaucratic tangle.

For example:

At the Ft. Allen detention camp in Puerto Rico, a group of the lawyers forced the government to go through an environmental impact statement procedure because of the sewage that would be produced by the camp.

Each time the government has made any policy change regarding the Haitians, the lawyers have sued to force the government to comply with its own rule-making procedures, complete with publication in the Federal Register with the required 30 days for public comment.

The lawyers have presented evidence—and convinced a federal judge—that the government translators have been so bad that instead of asking the Haitians if they were seeking political asylum, they were asking them if they wanted to go to the insane asylum.

The lawyers repeatedly have been able to stop deportations, often at the last minute, by persuading a federal judge that the INS has violated the Haitians' rights.

Even the state of Florida has gotten in on the act by filing a suit against the government alleging not only overcrowding but also "neglect and indifference" by federal officials. Florida is asking that Krome be shut down and that no new camps be opened in the state.

Besieged by all the lawsuits, the government has engaged in a kind of guerrilla warfare, going as far as rushing groups of Haitians up back stairways into locked courtrooms to avoid lawyers lurking in the hallways.

The latest INS tactic is to schedule hearings for the Haitians at Miami's Krome Detention Center simultaneously in three courtrooms even though they're all represented by the same lawyer from the Haitian Refugee Center. That forces the lawyer, Steve Forester, to race wildly from courtroom to courtroom, begging for continuances that the government has no intention of granting for his 600 clients.

"They've said it's my own fault for taking too many clients . . . but they know very well that there aren't other lawyers, and if we didn't represent these people, they would simply be deported," Forester said.

Nelson said his agency has decided to go full speed ahead with the hearings because the lawyers "will win if the system is bogged down. They're winning now on the procedural rules, not on the merits.

"They've come in and said they have a monopoly on the Haitians, but then they hold up the flow. It's really an antitrust situation. . . . They should either fish or cut bait," said Nelson, who believes the lawyers are deliberately dragging their feet. Haitians, he said, "don't have the right to free counsel. In most other countries in the world, they would have been herded back into the boats and put out to sea."

Nelson charged that there are a number of Haitians who would rather return home than stay in detention, but the issue is so tied up in litigation that it is impossible for anyone to be moved.

Forester retorts that the INS deliberately created the problem when it moved the hearings from downtown Miami to the detention center. Most lawyers don't want to drive that far, he said, though there are 25 lawyers who would provide free services for the Haitians downtown.

Brian McDonald, the first assistant U.S. attorney in Miami, also contends that the lawyers have resources unavailable to the INS. "Some of them are professors at a law school, and they can get assistance from their students," he said, while the INS is "understaffed, they've gotten conflicting policy guidance, and they're confronted with difficult problems."

The lawyers' efforts have been two-pronged. On one side Kurzban, aided by two University of Miami law professors, their students and an assortment of other lawyers around the country who donate their time, have

worked on their own time on a series of class-action cases to help thousands of Haitians who are here illegally.

The other side of the effort is being carried on by Steve Forester and Vera Weisz, working out of a ramshackle storefront office in Miami's Little Haiti area. They receive nominal salaries from the Haitian Refugee Center, which operates from year to year on a grant from the National Council of Churches.

Among the questions the lawyers are raising in their lawsuits are some that have sticky policy implications for the government.

For instance, Kurzban asks whether the United States should routinely grant asylum to Soviet ballet dancers, who led privileged lives in their own country, while it turns away refugees who happen to be poor and uneducated.

He questions whether the country should have an immigration policy that welcomes people fleeing from communist governments while it turns away those fleeing right-wing dictatorships that happen to be friendly to the United States. In this case the government also has to deal with the uncomfortable fact that it has recently allowed entrance to large numbers of Indochinese and Cuban refugees, many of them coming for economic reasons, and now is in the process of turning away the first large group of refugees who happen to be black.

Finally, even if the Haitians are eventually returned to their home country, Kurzban asks, "Shouldn't they be entitled to a fair hearing on their asylum claims?"

Behind high chain-link fences topped with barbed wire, the 1,200 Haitians being detained at Krome spend their days sprawled on bunks and makeshift cots so close that it is difficult to walk between them. The men are kept on one side of the camp and the women and children on the other, separated by another metal fence.

The camp's single, conventional-sized washer and dryer have been shut off—the area is so swampy that it was impossible to use them. The Haitians use portable toilets lined up against one of the fences. The showers are open for two hours in the morning and two in the afternoon.

Laundry is set out to dry on the scraggly patches of grass and on the metal fences. What possessions the Haitians have are stored in clear plastic bags, one stacked neatly on each bunk.

Virtually none of the Haitians speaks English, and there are only 10 translators at the camp to decipher their Creole dialect.

Early last month there were riots at Krome as the Haitiians chanted "liberty or death" and "Miami is my country." But the instigators have been shipped off to more secure facilities and most of the Haitians spend their days now doing no more than staring vacantly into space.

To help ease crowding in Florida, INS recently moved the majority of the Haitians to facilities in out-of-the-way places like Lake Placid, NY.; Big Springs, Tex., and Ft. Allen, Puerto Rico, far away from any Creole translators and any sort of free legal representation.

At a recent Senate hearing, Doris Meissner, the acting INS commissioner, said that the Haitians are generally considered economic refugees who can be returned safely to their country of origin. As such, she said, they are not eligible for asylum.

In response to pointed questioning from Sen. Charles Grassley (R-Iowa), Meissner said there is "no concrete evidence" that the Haitians would be persecuted if they were returned, and a State Department representative said the Haitian government has promised that there will be no reprisals against those who return.

But U.S. District Court Judge James Lawrence King, in a decision last year in Miami, found major problems of political persecution in Haiti, including persecution of those who have fled and then returned to the country.

"This case involves thousands of black nationals, the brutality of their government, and the prejudice of ours," said King, a Republican appointed by Richard Nixon, noting that the Haitians are "fleeing the most repressive government in the Americas."

King listened to weeks of evidence of beatings, torture and deaths in Haitian prisons and he concluded that "the manner in which INS treated the more than 4,000 Haitian plaintiffs violated the Constitution, the immigration statutes, international agreements, INS regulations and INS operating procedures. It must stop."

It was the first major victory for the small group of lawyers who have taken on the Haitians' cause.

Early last month, the lawyers won another victory when federal Judge Alcee Hastings in Miami issued a temporary restraining order barring deportation hearings for Haitians who are not represented by lawyers.

But that victory was clouded when Hastings later became the target of an FBI bribery investigation, stepped down from the bench temporarily and asked to have his cases reassigned. No one is sure what will happen to the Haitian case that was still pending before him.

Meanwhile, both sides are waiting to see what's going to happen with the Hamilton as it patrols the Haitian waters, and the lawyers are trying to decide whether to file yet another lawsuit to stop what they call "the kanargoo court on the high seas."

No one knows for sure what the Hamilton would do if one of the Haitian boats refused to stop and decided to make a run for it. Would the 378-foot vessel ram it? Open fire with the cannons? Sink it?

There also are questions about what will happen to those Haitians who are educated enough to know they have a right to ask the Coast Guard for political asylum. The United States in bound by a United Nations treaty not to return persons to a country where they will be persecuted. But although there will be translators and immigration officers aboard the Hamilton, no one is sure yet how the Haitians can prove they would be persecuted at home.●

S. 1718—INTERSTATE POLLUTION

● Mr. DODD. Mr. President, on October 7, 1981, Senator DURENBERGER and I introduced S. 1718, a bill to amend the Clean Air Act to provide the States with greater protection against air pollution generated in other States.

That current provisions of the act have proven unworkable is demonstrated by the fact that under these provisions no State has yet been granted relief from out of State emissions in spite of clear evidence that such emissions are crossing State lines in quantities that harm the people and the economies of downwind States.

The inability of one State to control harmful emissions from outside its jurisdiction constitutes the very foundation upon which Federal clean air legislation is based. The Federal Clean Air Act exists because independent action by each State, based on its self-interest interest, simply results in exporting pollution and bidding industry and jobs away from neighboring States. Unless the act effectively prohibits such pollution exporting, one of the central purposes of the act will remain unfulfilled.

Unless the interstate pollution prohibitions in section 110 and the enforcement mechanisms in section 126 of the act are modified along the lines of S. 1718, the States affected by pollutants transported across State lines will continue to have no effective recourse under the law.

I would like to share with my colleagues a letter I recently received from Connecticut Governor Bill O'Neill that clearly and simply makes the case for adopting the provisions of S. 1718. Governor O'Neill points out that due to Connecticut's inability, under the current act, to limit the flow of pollutants into the State from outside sources, "economic development in Connecticut is unfairly restrained and the public health and welfare is jeopardized."

While the interstate pollution problem may not be as pervasive in every State as it is in Connecticut, practically every State faces at least localized problems with pollution generated from sources across State lines. I believe it is in the interest of all Senators and their constituents to support this effort to provide a workable and equitable solution to the interstate pollution problem and ask that a copy of Governor O'Neill's letter be printed in the RECORD.

The letter follows:

STATE OF CONNECTICUT,
Hartford, Conn., October 14, 1981.

Hon. CHRISTOPHER J. DODD,
U.S. Senator,
Washington, D.C.

DEAR CHRIS: I want to extend to you my full support of the legislation you have introduced to address the problem of interstate air pollution.

As you are well aware, this is one of the state's most serious problems as current statutory language prevents the state from restricting the flow of pollutants into the state from outside sources. Because of our obligation to limit total pollution emissions and our inability to control out of state sources, economic development in Connecticut is unfairly restrained and the public health and welfare is jeopardized.

I look forward to working with you toward the enactment of your proposal. The Connecticut Department of Environmental Protection has worked effectively with industry and the public in general to insure the optimum benefit of the Clean Air Act State Implementation Plan. I am certain that our efforts will result in a solid foundation of support from those who would be affected by your proposal.

Sincerely,

WILLIAM A. O'NEILL,
Governor.●

THE COMMERCIALIZATION OF DNA

● Mr. HATCH. Mr. President, the controversy over recombinant DNA technology has peaked and valleyed over the course of the past several Congresses. From its inception, this technological breakthrough in applied genetic science has been depicted as good or evil. In retrospect, most of us have come to know that recombinant DNA represents a means rather than an end. It is a tool of science, the ethical application of which can only be determined by those instructed to use it. Now that the National Institutes of Health are in the process of proposing less restrictive procedures for

its application, we in Congress have a necessary public responsibility to at least be aware of them.

The recombinant DNA technology which is now emerging represents one of the greatest accomplishments of modern day biological research. Today, scientists are incorporating single genes—units of heredity—into microorganisms and thus turning them into biological factories producing human insulin, interferon, and other hormones and antibodies which could not be obtained in quantity prior to this technique. The implications for health in terms of potential therapies is overwhelming and future significant developments are on the horizon.

Molecular biologists are now on the verge of introducing new genes into living animals. In the medical field, cancer genes have recently been discovered which will make normal cells malignant after the gene is incorporated into the cell. These studies will undoubtedly enhance our understanding of the mechanisms of cancer induction and may lead to new and better forms of therapy.

However, the employment of the recombinant DNA technology is not restricted to the health sciences. It is also applicable to the chemical, agricultural and mining industries. According to the Office of Technology Assessment the impact of DNA technology on the chemical industry will cut across the entire spectrum of chemical groups involving plastics and resin materials, flavors and perfumes materials, synthetic rubber and the primary products from petroleum that serve as the raw materials for the synthesis of organic materials.

In the chemical industry alone, the value of industrial organics produced by such biotechnology might reach $522 million per year by 1990 and $7.2 billion per year by 2000 based on 1979 dollars. In agriculture, the DNA technology should provide an additional tool to allow development of new varieties and even species of plants as well as finding applications in food processing. It may seem surprising there is also a use of DNA technology in mineral leaching and recovery, enhanced oil recovery and in pollution control.

The commercialization of this DNA technology raises an important question for the academic domain and that is "What is the proper role of universities in the development of scientific discoveries into commercially useful products and innovations?" The involvement of universities in commercial ventures is not new. These have ranged from cooperative agreements with major industries to the establishment of embryo transfer units.

However the potential magnitude of the recombinant DNA technology presents somewhat different problems. Many universities already on financially shaky grounds are prepared to participate in the commercialization of DNA technology. A number of forces are providing impetus for a move in this direction. The expected decrease in real dollars from Federal grants, competition with small business for research funds and potentially greater involvement with industry are all acting to encourage universities to engage in the technological development of scientific discoveries.

Stanford University has recently entered into an agreement with six concerns to build a $2.5 million Center for Biotechnology Research. This academic center owns 30 percent of a commercial concern know as "Engenics" that will seek to market products based on the center's findings. Donald Kennedy, president of Stanford, referring to the relationship between universities and outside sources, has said, "Everybody's breaking new ground. We're all rewriting the ground rules."

Derek Bok, president of Harvard, has identified four dangers to the quality of academic science as a consequence of such involvement. First, the applied side of science may become the dominating force in university research. Second, manpower may be diverted from research and teaching to other tasks in the process of technological development. Third is the introduction of secrecy and proprietary information into scientific research. And fourth would be a threat to the quality of leadership and the general morale within the scientific enterprise.

These general concerns can translate into such specific problems as patent rights when research funds have been comingled; conflicts of interest for faculty engaged in university independent commercial ventures; faculty status of scientists engaged in technological development; proprietary information in Ph. D. thesis projects.

Needless to say, all of these factors could contribute to the restructuring of university graduate education and research programs. While no one is advocating the dissolution of the traditional roles of the universities, they do have a great deal to offer in the transfer of technology which is sorely needed in our country. And if this is the direction the universities are moving, the corresponding problems should be addressed and resolved. It is in the interest and duty of Congress to be aware of these events and directions since public money, to a large extent sponsors the research projects which may lead to technological innovations.

In 1801, the German poet Goethe characterized science in an epigram "Some men see her as a lofty celestial goddess, others as an industrious cow who supplies them with butter." Perhaps there is some truth to both points of view.

Mr. President, I ask that, as illustration of the university research problem I have been describing, a short but incisive analysis by Dr. Bernard D. Davis, M.D. of Harvard Medical School from the May 1981 issue of the New England Journal of Medicine be included in the RECORD.

The article follows:

SOUNDING BOARD: PROFIT SHARING BETWEEN PROFESSORS AND THE UNIVERSITY?

The intellectual yield from our country's investment in fundamental biologic research has been tremendous. Through the fusion of genetics with biochemistry and through the development of ingenious techniques for exploring the range of dimensions that were formerly hidden between microscopy and chemistry, we have acquired a remarkably coherent picture of the universal features of cell structure and function. Moreover, Darwin's theory can now be considered Darwin's law: We understand how the required genetic variation arises, we understand why information cannot flow back from phenotype to genotype, and we can measure evolutionary distance directly in terms of DNA sequences. Yet, however gratifying these triumphs of human intelligence and imagination may be, interest in science as a cultural enterprise was not the main reason for the generous flow of public funds. Valuable applications were promised and were expected.

Nevertheless, unlike earlier experience with the biochemistry of amino acids, vitamins, hormones, and antibiotics, the practical payoffs from molecular genetics were disappointingly slow. Although medical research made major gains in other ways in recent decades, the intracellular marcromolecules of the molecular biologist could not be translated easily into medical prescriptions. The resulting impatience of some legislators was understandable, but the picture has now changed dramatically. Emerging from the integration of three decades of fundamental and even esoteric research, the recombinant-DNA technology now promises innumerable applications in agriculture and in energy production as well as in medicine. Molecular biology has thus burst into the age of high technology, and the resulting acute speculative fever has perhaps, been exacerbated by the earlier celebrity of recombinant DNA as a presumed menace.

The new commercial possibilities present universities with both opportunities and risks. This situation has been brought into sharp focus by a recent proposal of the Harvard administration, which is discussed in Barbara Culliton's article in this issue of the *Journal*. In my analysis of these problems, I shall proceed on the following assumptions: first of all, that the university community has a social obligation to try to promote technology transfer, but that it should do so in ways that will not jeopardize the search for knowledge for its own sake; secondly, that in this country the options lie within the framework of a system of private enterprise; and thirdly, that because of the changing pattern of government support of scientific research, universities are obligated to try to find additional sources of funds, both to preserve their autonomy and to prevent a waste of trained scientific talent. All these assumptions may be questioned, of course, but such questions are beyond the scope of this discussion.

PATENTS

Patents have long been used to provide income for universities. For example, the royalties of the Wisconsin Alumni Research Foundation since the 1920's have made biochemistry an unusually strong field at that university. In general, however, biologists have been much less interested in patents than chemists or engineers have—perhaps because their work has only rarely lent itself to applications. Moreover, in medicine the earlier tradition of charity to the poor raised additional barriers to commercialization. Accordingly, for many years the Harvard Corporation required that any health-related discoveries in its laboratories be dedicated to the public. Meanwhile, there have been major changes in the economics of medical care and in the attitude of federal agencies toward patents. In addition, it has become clear that the absence of a patent often impairs, rather than promotes, the availability of a useful product to the public. Thus, in 1975, Harvard decided that it would take out patents and would transfer a modest fraction of any royalties to the inventor.

Some object to even this degree of university involvement on the grounds that it may lead to preferential treatment of certain faculty members. However, this problem is not

unique to patents. Grants bring in a large overhead. Moreover, faculty salaries are often derived from grants to individual faculty members, and the influence of external funding on appointments may then be considerable. In contrast, any royalties from patents can be distributed without externally imposed restrictions. It is thus hard to see why patents are likely to bias appointments more than grants and contracts do.

Another criticism of patenting is that it encourages secrecy. However, as is well known, secrecy is widespread in highly competitive fields of even the purest research. To be sure, patentability may provide an additional incentive to secrecy over the short term, but in the long run patents eliminate the need for secrecy, since after the date of filing of a patent application, like the date of submission of a publication, the information is released for free discussion and for noncommercial use by others. Indeed, in industry, unpatentable information is the main body of trade secrets.

The history of antibiotics provides an interesting lesson. When Ernst Chain isolated penicillin, he urged that it be patented for Oxford University, but the British establishment in academic medicine refused. As a result, Oxford received nothing; the British were soon paying royalties to American firms. In contrast, a few years later, the royalties from Waksman's discovery of streptomycin at Rutgers and from Umezawa's discovery of kanamycin in Tokyo were used to found and support excellent research institutes.

PRIVATE CORPORATIONS AND THE SPECIAL PROBLEMS OF BIOLOGY

Another well-established mechanism for the commercial exploitation of science—potentially more profitable for the professor—is the formation of a private corporation. That a number of molecular biologists have initiated such undertakings is not surprising, especially since research in this field has been characterized by unusual boldness in moving to challenging new problems.

Universities have treated such activities much as they treat industrial consulting—a practice that they often encourage because, like part-time practice in medicine, it helps to retain valuable faculty. Consulting time is often limited, either by a formal rule or by an informal agreement, to one day a week. However, the development of a new company is likely to require much more time. Moreover, the impact of such an involvement on academic activities cannot be measured entirely in terms of formal hours of work; a change in what the professor is thinking about when showering or driving may have an even greater effect.

An excessive diversion of time may be only a temporary stage at the start of a new business. Accordingly, in this area universities are justified in continuing their tradition of flexibility and patience in supervising the daily distribution of faculty time. On the other hand, the problem of a substantial diversion for a long period under the umbrella of a full-time university salary cannot be ignored, and I shall return to it.

The collegial academic atmosphere is likely to be even more seriously harmed by competition between faculty colleagues who are associated with different companies, although the tradition of industrial ties in chemistry and in solid-state physics provides a somewhat reassuring model. However, there are important differences, not only in the traditions but also in the content of the fields. Specifically, in recombinant-DNA research the competition may well be much more intense than it is in these other fields, at least for the present, because the range of problems is so much narrower: many groups are inevitably seeking the same product, such as insulin or interferon.

Two other differences between biology and chemistry are also pertinent. In the first place, biology often asks more philosophic questions that are remote from potential applications. Secondly, because of the extraordinary complexity of biologic material, major breakthroughs frequently depend on a happy accident, an unexpected observation, or an unpredictable implication of distant findings. If the search for wealth diverts too many of the best biologists in the next generation from undirected exploration of the nature of life, something precious will be lost.

Clearly, these are serious problems. If research in this new industry becomes more autonomous and developmental, perhaps like research in antibiotics over the past decades, these problems may be only temporary. However, antibiotics arose from an accidental discovery, and their pursuant has remained largely empirical, whereas recombinant DNA has extensive theoretical roots. Hence, its applications are likely to continue to depend heavily on advances in academic laboratories.

THE HARVARD PROPOSAL AND THE FUTURE OF INSTITUTIONAL PROFIT SHARING

A major difference between the two mechanisms of technology exploitation described above is that universities have generally shared in profits from patents on discoveries made in their laboratories but not in those from companies stemming from such discoveries. However, some European laboratories have recently extended profit sharing to the second arrangement. A similar proposal was made at Harvard last October but was soon withdrawn. It elicited a strongly unfavorable response from some of the faculty and from editorial writers in the news media. Now that the tempest has subsided, it may be useful to reexamine the issues.

The proposal arose when Harvard was considering the possibility of patenting a discovery of Prof. Mark Ptashne in recombinant DNA. The Harvard administration suggested the alternative of setting up a company with outside venture capital and with the university given a minority share (which was subsequently said to be 10 percent). The company, in return, would have the rights to any patents on Ptashne's discoveries held by the university. In the memorandum that opened the discussion, the Harvard administration carefully spelled out a number of pitfalls in this kind of venture, and it asked the faculty to consider the abstract policy issues and principles involved. However, it did not specify any details of the proposed arrangement or even mention Ptashne's name; it simply informed the faculty that it would be making a decision on a specific arrangement within three weeks.

With the benefit of hindsight, one can see several aspects of the presentation that promoted resistance. The linkage to a concrete decision foreclosed the leisurely philosophical discussion that was requested, since it gave a sense of urgency to those who were opposed, and the lack of details about the proposal aroused mistrust. Vagueness about the role of the university in the proposed company gave rise to the widespread misapprehension (especially in the news media) that Harvard was actually going to operate it. The memorandum emphasized the advantages of having the university protect the interests of a faculty member; willing acceptance by the faculty would have required a degree of confidence in institutional authority that is not universal today. Concern was also heightened by the earlier, wild public response to the Genentech stock offering, which had capitalized that company—as yet without a salable product—at over $500 million. Many faculty members gagged at the prospect of having the university linked with a similar caricature of the capitalist system.

In addition, many faculty members resent the venality and secrecy that has arisen in some laboratories performing recombinant-DNA research. This resentment clearly intensified the reaction, and it led to the understandable conviction that the university should not appear to condone and perhaps even encourage this pernicious development. However, the hostility may have been misplaced. The problem arises from the lucrative potential of the work, not from the possibility of university ownership of shares.

In the end, two dangers seem to have caused the greatest concern: pressures on faculty in their choice of research and favoritism of the university toward financially productive faculty members. The memorandum unfortunately presented both these problems as though they were novel, instead of comparing them with the similar problems associated with other sources of funds. As a result, the issues were analyzed rather unrealistically, and an idealized conception of the university was defended: the institution was presumed to be entirely free of restrictions on how it distributes its income in supporting the preservation, advancement, and dissemination of pure knowledge. In fact, research grants from government, foundations, and industry—and many endowments in support of professorial chairs or specialized institutes—generally do not provide such freedom.

With respect to the basic issues of favoritism and freedom of research, it is instructive to compare the rejected proposal with the recent 12-year grant of $23 million from Monsanto Chemical Company to Harvard Medical School, as described in Culliton's article. This grant has expanded the facilities that are available to the recipient professors, outside the academic control of any department, and it surely commits the recipients to a given line of research. In contrast, dividends from equity in a company need not have either of these consequences, and such funds could be distributed by the university much more freely. Of course, one could consider the Monsanto grant a poor model to follow. However, it seems unlikely that universities will find better terms in their present search for industrial support. The area of research is appropriate and remains basic, freedom of publication is unencumbered, and the institution gains some permanent resources. The company selects the investigators and their area of work and has favored access to the results before publication and to patents, but it seems unrealistic to expect large-scale industrial support without such an exchange. In addition, to the extent that dwindling federal funds are replaced in this way, the research community as a whole benefits.

Universities have had a long history of negotiations, especially in medical schools, over academic activities and positions linked to private gain. The members of the Harvard Faculty of Arts and Sciences demonstrated little awareness of this history in their recent discussion. The emergence of professors as entrepreneurs raises a wide range of problems, but the only one discussed was the prospect of having the university involved as well. In particular, no questions were raised about existing companies that do not contaminate (or benefit) the university—for example, one in biotechnology that was recently initiated by Prof. Walter Gilbert and one in economic consultation that was founded by Prof. Otto Eckstein and was recently sold for about $100 million.

In the absence of limiting ground rules, it was perfectly proper for enterprising faculty members to have set up such unshared private corporations, but I suggest that the rapid expansion of such activities now demands a broader look. Medical schools have long faced a similar problem with full-time salaried faculty members who collect fees from private patients. Many solutions have been tried, ranging from complete transfer of the money to the institution to no transfer. Unfortunately, this experience does not

offer any ideal, universally accepted model for other faculties beginning to face a similar dilemma. Nevertheless, it has certainly not been obvious that complete retention of the income by the faculty member best serves the university, or that it represents the fairest possible arrangement.

CONCLUSIONS

We may all regret the loss of the more Arcadian atmosphere of the past. However, if universities are to protect their financial base in order to advance their academic goals, nostalgia will be no substitute for imaginative adaptations and a tough-minded attitude. There are surely risks in developing industrial connections, but they must be balanced against the increasing financial insecurity of universities today and against a monolithic dependence on an often unsympathetic government.

There is also a question of simple justice. The facilities, the atmosphere, and the financial support of universities have provided an essential background for many commercial developments, and the continued connection of the entrepreneur with the university, like the connection of a physician with a teaching hospital, often gives the entrepreneur a good deal of prestige. It therefore seems just that the university, which can no longer afford to be in the position of a generous parent, should in return receive a share of the profits. In addition, such profit sharing would respond to a widespread and cogent criticism of the present system: that it unfairly allows professors to become rich through developments stemming from tax-supported research. There is still appeal in the basic concept of dedicating a medical discovery (especially a tax-supported discovery) to the public interest, and distribution of part of the profit to the university surely serves the public interest more directly than does distribution only to the other participants.

One could argue that licensing patents is a less entangling way to reimburse the university than is the sharing of equity. However, the advantage of equity in a corporation is not only the possibility of a larger income to the university; it may be even more important as a means of ensuring continued benefits from future discoveries. Once a professor had begun to direct research in an industry as well as in an academic laboratory, he or she would no doubt be tempted to shift to the latter any branch of the academic work that appeared potentially patentable.

Finally, profit sharing could have certain mutually advantageous byproducts that were not mentioned in connection with the Harvard proposal. For example, if the industrial laboratory was nearby, which would be convenient for all concerned, a financial interest by the university could eliminate the question of recompense for access of company scientists to libraries and seminars. Similarly, the specialized instruments and facilities for large scale preparations in an industrial laboratory could occasionally be useful for university researchers.

I have suggested that various arguments against the proposal of the Harvard administration were not convincing. Nevertheless, the possibility of conflict of interest is real as is the problem of keeping the business connection at arm's length from the academic activities of the university. In addition, there remans a serious moral issue. Given the rules of the game, the scientist-entrepreneur is free, within the restrictions of the Securities and Exchange Commission, to convert paper profits into a fortune by selling stock at an inflated, speculative price. Similarly, it is legitimate for a unversity's investment managers to seek capital gains in the open market from fluctuations in the price of such securities. However, if its connection with a company increases public confidence, a university has an additional responsibility not only to protect its reputation but also to protect the public against the creation of a financial bubble.

If the arguments for profit sharing prevail, universities may have to establish requirements for some such arrangement before allowing a faculty member to hold an important position in a corporation. Indeed, even consulting is not necessarily sacred, any more than are fees from patients; investigators at the National Institutes of Health are not allowed to retain consulting fees or lecture honorariums, and President Hutchins once introduced such regulations at the University of Chicago. Of course, this rule effectively discourages consulting—and hence technology transfer—but an arrangement for sharing might not. As the commercial applications of biology grow, there will be room for imaginative experiments, perhaps with buffering organizations like the Wisconsin Alumni Research Foundation between the university and the corporation.

Whatever the main reason for the negative reaction to the Harvard proposal—whether it was the manner of its presentation or the devotion of some faculty members to an idealized conception of alma mater—this reaction is clearly not the last word on the subject. A new company in France, Transgéne, has distributed equity to the Pasteur Institute in Paris and to the University of Strasbourg, and in England a national biotechnology corporation will be sharing profits (and results of research) with the Medical Research Council Molecular Biology Laboratory at Cambridge. In this country, several universities and research institutes seem to be moving rapidly in the same direction. For better or worse, the objections to such arrangements may fade even more rapidly than did the earlier objections to patenting.●

A BIG STEP FOR DRUG ENFORCEMENT

● Mr. NUNN. Mr. President, by repealing the prohibition on the use of U.S. funds to support the spraying of marihuana with paraquat and other herbicides, the International Security and Development Cooperation Act takes a big step toward effective drug enforcement. I congratulate Senator CHILES, who introduced this amendment, for his exemplary leadership in this area.

There is no better way of stopping the flood of illegal drugs coming into the country than to attack them at the source—which means the marihuana fields in overseas nations, especially in Colombia.

Prior to 1978, the United States experienced as serious epidemic of heroin being produced and smuggled in from Mexico. But when paraquat was sprayed extensively by the Mexican Government, the flow of heroin from that country was reduced by 70 percent.

The same can be said of marihuana being grown and imported from Mexico. With Mexican production greatly reduced, Colombia became the primary source country for marihuana. President Turbay of Colombia has said repeatedly that the use of paraquat would enable his government to reduce the flow of marihuana substantially.

Since 1978, however, the U.S. Government has been prohibited from providing funds to Colombia and other countries for use in paraquat spraying. That prohibition was enacted with little debate in the wake of reports that paraquat posed a health danger if smoked along with marihuana.

The available evidence now suggests that the greatest amount of residue left on marihuana would pose no more serious a health hazard than amounts that remain on domestic farm products.

In proposing the repeal of the prohibition last March, Senator CHILES and I provided in our bill—which eventually became section 403(a) of the foreign assistance bill we are considering today—a requirement that the Secretary of State shall notify the Secretary of Health and Human Services of any plans to use a herbicide on overseas marihuana fields. The Secretary of HHS would monitor for health effects.

In addition, the Foreign Relations Committee has provided that $100,000 shall be available to develop a "marker" which would alert a potential user that the marihuana has been sprayed with paraquat.

These provisions, in my opinion, will adequately safeguard the health of Americans who are foolish enough to smoke marihuana, a substance which in all likelihood is dangerous to their health, anyway.

By repealing this prohibition, we are sending an important signal to countries such as Colombia that the United States is serious about its drug problem and that we intend to back up their own efforts to stop the drug trade.

It is difficult for foreign officials such as President Turbay to believe that we are serious when we deny to their governments the money to use the most effective weapon in the war on drugs.

The trade in illicit narcotics is sapping our domestic economy of more than $100 billion a year. Its effects on the economies of the key import States, such as Florida, Texas, and Georgia, are profound.

The Permanent Subcommittee on Investigations, of which I serve as ranking minority member and on which Senator CHILES plays a leading role, has examined the drug problem in detail. The subcommittee has reported extensively on its findings, which indicate that drugs and crime generally rank behind only the economy as our most serious national domestic problem.

The illegal flow of drugs, especially from Latin America, is overwhelming the interdiction efforts of the Drug Enforcement Administration, the Customs Service, and the Coast Guard. The Senate already has approved a measure introduced by Senator CHILES and me that would allow the armed services to render limited but important assistance to these efforts.

By once again providing assistance to the so-called source countries for paraquat spraying, we are taking another giant step toward effective drug enforcement.●

THE ARMING OF SAUDI ARABIA

● Mr. HART. Mr. President, J. B. Kelly's article in today's Wall Street Journal emphasizes a point too often overlooked as we consider the sale of AWACS to Saudi Arabia. The article points out that far from strengthening the U.S. position

in the Middle East, massive arms sales to the Saudis will actually endanger it. For the AWACS sale will not only fail to purchase the friendship of the Saudis, it may encourage them to pursue economic and political aims contrary to Western interests.

The Saudis have no vital stake in friendship with the United States. Their greatest interest is in their own survival, and clear alliance with the West will not help that cause. And they have a religious duty to oppose American bases in Saudi Arabia that arms sales cannot change, despite administration hints to the contrary.

In addition, the consequences of strengthening Saudi Arabia militarily may be severe. It may encourage the Saudis to renew their historical territorial ambitions in the Middle East. And if oil prices continue to fall, the Saudis, if heavily armed, might be tempted to coerce smaller Gulf States into cutting their oil production—or even attempt military action.

Our goals in the Middle East are not the Saudis. For that reason, we must not only stop the AWACS sale, but begin immediately to pursue a policy of energy independence. Until we do so, our vital interests remain at risk in the Middle East.

Mr. President, J. B. Kelly's article does an excellent job of outlining the underlying facts of this vitally important policy question. I ask that the article be printed in the RECORD, and I urge my colleagues to consider it carefully.

The article follows:

[From the Wall Street Journal, Oct. 21, 1981]

THE ARMING OF SAUDI ARABIA

(By J. B. Kelly)

Behind the current controversy over the proposed sale of Awacs aircraft and supplementary F15 weaponry to Saudi Arabia lies an assumption that has been little challenged publicly: that Saudi Arabia is willing and able to serve as the linchpin of a defensive system for the Persian Gulf. Is the assumption correct, or is Saudi Arabia in reality the principal obstacle to such a system?

The House of Saud, as is only natural, is primarily concerned with its own survival and prosperity. It has no vital interest in the contest between the liberal democracies of the West and the communist dictatorships of the East. Time and again it has voiced its determination to keep aloof from the contest, to eschew formal alliances with one side or the other. "The superpowers have no friends," the Saudi foreign minister, Saud ibn Faisal, told the correspondent of an Arabic newspaper last April. "We would be deceiving ourselves if we thought that our relations with the superpowers are founded on friendship and the principles of friendship."

At the same time, however, the Saudi royal house has displayed a certain ambivalence toward the Soviet Union. While its more prominent members and the government-controlled Saudi media are quite free with their recriminations against the United States for its alleged transgressions (notably but by no means exclusively with respect to American policy toward Israel and the question of Palestinian irredentism), they remain remarkably reticent about the activities of the Soviet Union in the Middle East. They continue to allow Soviet aircraft to fly over Saudi territory en route to Aden and Ethiopia, a courtesy that saves the Russians considerable inconvenience. Also, the Saudis persisted in retaining an embassy in Soviet-occupied Kabul for more than a year after the Russian invasion of Afghanistan, severing diplomatic relations with the puppet government of Babrak Karmal only last April, when Secretary of State Haig visited Riyadh.

"WE COULD REPLACE AMERICANS"

"We do not boycott the Soviet Union," the Saudi foreign minister stated in the interview. "Dialogue between Saudi Arabia and the Soviet Union exists and is continuing. Saudi and Soviet diplomats meet in every part of the world." Fifteen months previously, and a month after the invasion of Afghanistan, Crown Prince Fahd, the Saudi deputy prime minister, declared in an interview published in the Lebanese newspaper Al Hawadith: "There are many states such as the Soviet Union which are only too ready to supply the kingdom with everything it wants. In other words, we could easily replace the Americans."

It is against the background of such statements (of which there have been many in a similar vein) that the visit of the Kuwaiti foreign minister to Moscow last April takes on a particular significance. Kuwait, the only Arab Gulf state having formal diplomatic relations with the Soviet Union, has for decades been submissive to the dictates of Riyadh, and has often been used by the Saudis as a stalking horse in international affairs. At the end of his visit to Moscow, the Kuwaiti foreign minister, Sheikh Sabah ibn Ahmad al-Sabah, stated: "The Soviet Union shares our view that the responsibility for the security of the Gulf lies with its states only. It also shares our view of the need to keep the region free of military bases and naval fleets so that it will remain far away from any struggle between the superpowers."

Saudi Arabia has consistently enunciated this same doctrine for a dozen years, and it has been steadfastly supported in its stand for the same length of time by the Soviet Union. It came therefore as no surprise that when the Saudi-dominated Gulf Cooperation Council (made up of Saudi Arabia, Kuwait, Bahrain, Qatar, the United Arab Emirates and Oman) met at Abu Dhabi in late May, its final communique restated the doctrine in terms almost identical to those uttered in Moscow. No reference whatever was made in the document to the dominant Russian presence in South Yemen or to the naval and air facilities enjoyed by the Russians in Syria and Iraq.

It may be taken as axiomatic that no United States or NATO force could operate in the Gulf region without local bases. It is equally certain that Saudi Arabia will never grant the right to such bases—whatever veiled allusions the administration in Washington may be making to the acquisition of "facilities" in that country. The authority of the Saudi royal house derives from its role as the leader of the Wahhabi sect of Islam. As such, its foremost duty is to uphold the predominance of Islam in the conduct of the kingdom's affairs, to defend the sacred soil of Islam against its foes and to assert the primacy of Islam over all other faiths.

To accord the U.S. the right to bases in Saudi Arabia would be tantamount to alienating a portion of the heartland of Islam to infidels. Such a dereliction of the House of Saud's religious duties would strike a severe, perhaps mortal, blow to the foundations of its authority.

The Saudi regime's almost equally fervent opposition to the stationing of U.S. forces elsewhere in the Arabian peninsula (e.g., in Oman) stems from the calculation that the presence of such forces would be a hindrance to the attainment of its own ambitions in the peninsula. The motive power behind the progress of the House of Saud over the past two centuries has been a sense of religious mission coupled to a drive for territorial conquest. The one, needless to say, has helped fuel the other. Since World War I alone the Saudis have annexed the Hijaz, the AAsir, the emirate of Jabal Shammar (in Qatar, Abu Dhabi and Yemen), and the whole of the Rub al-Khali, the Empty Quarter, to which they had not a scrap of right.

Since World War II they have endeavored, through armed incursions, gun-running, bribery, subversion and attempted assassination to acquire segments of territory, actually or potentially oil-bearing, from Qatar, Abu Dhabi and Oman, territory to which, again, they had not a shred of legitimate title. Toward all these endeavors the State Department habitually manifested an attitude of benign indifference, where it did not actually lend surreptitious encouragement to what it chose to regard as the fulfillment of the House of Saud's "manifest destiny"—to rule all Arabia from sea to sea.

The arming of Saudi Arabia on the current scale, ostensibly to meet the country's legitimate defensive needs, may encourage its present rulers (or, what may be more sinister, a new regime of a very different complexion in Riyadh) to resume the pursuit of their historic ambitions in eastern and southeastern Arabia, i.e., to subvert the independence of Bahrain, the Emirates and Oman.

A further incentive to the Saudis to exploit their military superiority over their smaller neighbors is provided by the current state of the oil market. OPEC production is now down from 31 million barrels per day in 1979 to about 19 m.b.d. today, of which Saudi Arabia accounts for close to half. Should demand fall even further, or should Iranian oil come back on stream or Iraq resume full production, the House of Saud may be hard put to it to sell sufficient quantities of oil to generate the revenues it needs to sustain itself in power. Frightened by the dual nightmare of declining sales and falling prices, Riyadh may resort to the desperate expedient of coercing the lesser Gulf oil states into cutting their production to a minimum.

RECKLESS ACTIONS

It is not beyond possibility that the Saudi regime, confronted with a severe financial crisis at home, might encourage Iraq to resume its conflict with Iran with the object of once again shutting down the Khuzistan oil fields. Or that Saudi Arabia might even join in such an offensive, using its Awacs aircraft to coordinate a joint air attack upon Iran with the Iraqi air force, and directing its own F15s (flown by mercenaries if necessary) to strike at obvious targets like the Iranian oil-loading terminal on Kharg Island. To Western eyes such actions would appear reckless in the extreme, but we are not dealing here with Western modes of thinking. The economic consequences for the West would, of course, be enormous.

The U.S. and its Western allies have two prime strategic objectives in the Gulf: one is to secure the region and access to its oil fields against external and internal dangers; the other is to break the power of the OPEC cartel and so arrest the continued economic hemorrhaging of the industrial nations.

The policy espoused by the Reagan administration, of building up the military strength of Saudi Arabia, positively impedes the attainment of these objectives. It also, for all practical purposes, invests Saudi Arabia with a power of veto over America's own plans for the defense of the Gulf. Even worse, the persistence of the U.S. and its principal NATO allies in a policy of inundating the Gulf with advanced weapons of all kinds will almost inevitably precipitate one or the other of the very catastrophes that the policy is theoretically designed to avert—

either the virtual destruction of the Gulf's oil industry or its seizure by forces hostile to the Western world.●

SMALL BUSINESS BANKRUPTCIES

● Mr. HUDDLESTON. Mr. President, the U.S. economy has been staggering under the heavy burden of excessive interest rates for too long. The result of these high rates is that our economy is now officially in a recession. However, the small business people of this country have known for many weeks that we are in a recession, because they have been the ones who have been hardest hit by the excessively high interest rates.

A recent report by the National Small Business Association dramatized the direct correlation between high interest rates and bankruptcies. This report cites the Dun & Bradstreet figures, which show that business bankruptcies increased 41.8 percent in the first 35 weeks of 1981 over the same period in 1980. However, even more disturbing is that "smaller businesses (defined as those with liabilities of $100,000 or less) comprised 50.53 percent of the 1981 total."

Mr. President, I ask that this report by the National Small Business Association be printed in the RECORD.

The report referred to is as follows:

REPORT ON BUSINESS BANKRUPTCIES

BUSINESS FAILURES: CURRENT STATISTICS

From mid-1980 to mid-1981 court-filed business bankruptcies increased 30.1 percent. This is the second largest year-to-year rise of the past 20 years, below only the 45.2 percent increase occurring between 1974 and 1975.

Even more alarming are more current figures from Dun & Bradstreet for January 1 through September 3, 1981, which reflect that business bankruptcies increased from 7,812 to 11,076, a jump of 41.8 percent compared with the same 35 week period in 1980, according to press reports quoting Rowena Wyant, a D&B Vice President in the New York business economics division ("Business Failures Increase," New York Times, September 13, 1981.)

Smaller businesses (defined as those with liabilities of $100,000 or less) comprised 50.53 percent of the 1981 total.

An industry breakdown of the D&B figures for the 35-week period is as follows:

1981 Compared to 1980

	Percent
Construction	up 48.5
Services	up 47.6
Retailing	up 41.4
Manufacturing	up 36.9
Wholesaling	up 30.1

This information is probably conservative from the small firm standpoint, because D&B figures do not include the finance, insurance, and real estate fields where smaller businesses predominate.

In a recent newspaper column George Will characterized similar figures as "a massacre on Main Street." (The Massacre on Main Street, Washington Post, September 20, 1981, page C8:1)

The court filings are on the basis of the "statistical year" of the U.S. Courts which record the information, which for the past two years has been as follows:

"Statistical year," July 1, 1979–June 30, 1980 equals 36,433.

"Statistical year," July 1, 1980–June 30, 1981 equals 47,414.

NOTES

As a technical matter, it should be noted that courts also accept Joint Petitions. These are additional filings where the husband and wife both participate in the enterprise. These are excluded from the above figures, because a "joint petition" covers persons associated with a business that has already filed. Inclusion of joint petitions would increase the business total for the 1980–81 statistical year to 66,000.

The statistics are also affected by changes in the Bankruptcy laws brought about by the Bankruptcy Reform Act of 1978 (effective October 1, 1979). The new code did not make it easier for corporations to file. The law did establish a series of personal exemptions in Federal law for the first time which, in many instances, were more liberal than state laws. (Bankruptcy Code, Sec. 522). However, there were not and are not any corporate exemptions, and corporations can no longer be discharged of debt as they could under the old law.

HISTORICAL TRENDS

The statistics on bankruptcies since 1950, as collected by both the U.S. Courts and Dun & Bradstreet are set forth in a chronological table attached as Exhibit I.

The data show that business bankruptcies have risen and fallen in cycles. From mid-1961 through mid-1970, court-filed bankruptcies by businesses held almost constant (averaging about 16,200 per year, or 1350 per month). Then from mid-1971 to mid-1976, the figure more than doubled to 35,201 (about 2900 per month). Thereafter, the level declined until the end of 1979, when it stabilized at about 2,500 per month, as shown in the following table:

Court filed bankruptcies mid-1975 to mid-1980

1975–76	35,201
1976–77	32,189
1977–78	30,528
1978–79	29,500

Within a few months after the Federal Reserve action of October 1979 boosted interest rates to then-record levels, business bankruptcies began to climb dramatically. Totals reached an average of about 3,800 per month in the spring of 1980, where they remained until this year (1981) when they hit a new plateau of about 4,000 per month. This can be seen in the following quarterly tabulations:

Statistical years	July–September	October–December	January–March	April–June
1980–81	[1] 11,674	[1] 11,227	[2] 12,101	[2] 12,081
1979–80	[2] 8,457	[3] 7,014	[1] 9,137	[1] 11,473

[1] 1980.
[2] 1981.
[3] 1979.

Thus, the business bankruptcy level increased 63.57 percent from the beginning of October, 1979 to the end of June, 1980.

PARTICULARLY HARD-HIT INDUSTRIES

Some industries are particularly hard hit, such as construction. According to Dun & Bradstreet, bankruptcy rates for building contractors and subcontractors increased 48.5 percent through September 3, 1981 over the same period in 1980 (by which time the casualty figures had already risen substantially from the 1979 lows.)

A break-out of comparable figures for the first three months of this year shows:

FAILURE IN BUILDING AND CONSTRUCTION

	January-February-March 1981	January-February-March 1980	Increase Number	Increase Percent
General building contractors	282	228	54	23.68
Building subcontractors	358	218	140	64.22
Other contractors	45	22	23	104.55
Total	685	468	222	47.95

Source: Dun & Bradstreet, New York.

In automobile distribution, 1650 new car dealers went out of business in 1980, the largest total ever. Another 325 have failed during the first 6 months of 1981, bringing the overall exodus close to 9 percent of all businesses in this field since 1979 (NADA Data for 1981, National Association of Automobile Dealers).

"WALKAWAYS"

There are also innumerable instances when businesses just close their doors and terminate the business. They may now owe creditors nothing. Or, they may have substantial debts which are satisfied through attachments on bank accounts or foreclosing tax liens or mortgages, leaving few assets for general creditors to pursue in any kind of formal proceeding. There is probably no overall source of statistics on these "walkaways," but experts believe the number is substantial.

RELATIONSHIP BETWEEN INDIVIDUAL BANKRUPTCIES AND BUSINESS BANKRUPTCIES

Court-filed bankruptcy rates for individuals have more than doubled since the new bankruptcy code became effective in October 1979:

Non-business bankruptcies

1978–79	196,976
1979–80	314,856
1980–81 (preliminary)	450,000

These personal bankruptcies have direct ramifications for small business.

When an individual declares bankruptcy, the creditors are left "holding the bag," which is almost always empty.

Prominent among these creditors are the retailers, distributors, builders and service enterprises where the bankrupt ran up the bills which caused the problems. Many of these are small business.

For example, the May Company reported 1980 losses increasing 103.3 percent to $3.6 million compared to 1979. For J.C. Penney, losses increased 102 percent to $20.7 million. Montgomery Ward's losses increased 117 percent to $50.6 million, while Sears' losses increased 120.4 percent to $46.2 million for the same period.

Local businesses have the same kind of trouble. In fact some of the regional independent stores, which are members of the National Retail Merchants Association, reported 1980 losses increasing over 200 percent compared to 1979.

RELATIONSHIP BETWEEN INTEREST RATES AND BANKRUPTCIES

These cycles raise the question of how interest rates affect bankruptcies. As can be seen from comparing interest rate movements with the bankruptcy cycles documented by Dun & Bradstreet and the U.S. Courts, bankruptcies have tracked the interest rate very closely in recent years. This is illustrated by the chart attached as Exhibit 2, which was prepared by the Small Business Committee of the U.S. House of Representatives.

In technical terms, the correlation between real interest rates (e.g., the nominal rate

minus the inflation rate [GNP deflator] was 74.5 percent during the 3-year period covered by the chart and 73.47 percent for the 5 years from 1976 to 1981. Economists say that 74 percent constitutes a "direct and significant correlation" between these two factors.

Higher interest rate movements can affect a business directly and indirectly in several ways. They add to the costs of financing the production, distribution, inventorying and sale of merchandise. They are also a factor in willingness of consumers to purchase the product.

Interest rates also impact general economic conditions with multiple affects on small firms.

A statistical "correlation" does not spell out how two factors relate to each other or what other factors may be involved. But a correlation does indicate some kind of a relationship—in lesser or greater degree—and a correlation as high as 74 percent indicates the relationship is close and meaningful.

The plight of industries composed mostly of small firms which are particularly sensitive to interest rates—such as builders and auto dealerships—tend to confirm this relationship.

Thus, as long as interest rates remain at record rates, it can be expected that bankruptcies will also continue to set new records.

EFFECTS ON EMPLOYMENT

The fifteen million small firms in the U.S. which file tax returns account for 55 percent of existing employment (59 percent if farming is included) and approximately 80 percent of all new jobs. Professor David Birch of M.I.T. found that independent enterprises with 20 or fewer employees accounted for 52 percent of new private sector jobs between 1967 and 1976. Thus, as bankruptcies increase among small firms, job generation may be inhibited, existing jobs threatened, and increased unemployment may result.

Since each one percent increase in the unemployment rate (approximately equal to one million persons) deprives the U.S. Treasury of $25 to $29 billion in tax revenues forgone and benefits paid, increased bankruptcies—especially among small businesses—can translate into larger budgetary and economic problems.

THE HUMAN DIMENSIONS OF BANKRUPTCIES

Several years ago, a doctor at Johns Hopkins University researched the social effects of unemployment ("Estimating the Social Costs of National Economic Policy: Complications for Mental and Physical Health" by Professor Harvey Brenner, Joint Economic Committee Print, October 26, 1976).

This study found that during periods of higher unemployment, use of alcohol, hospitalization, suicides, heart attack and kidney disease also showed statistical increases.

Such an analysis could apply not only to employees, but to small business owners. Entrepreneurs would also be subject to great financial and personal stress in attempting to save businesses in which they have invested a significant amount of their savings and their careers, especially if these efforts were unsuccessful.

According to an attorney who has practiced bankruptcy law for 42 years, Samuel Greenbaum of Washington, D.C., many small businesses are under-capitalized to begin with. As a result, such owners are often required to put up personal assets such as their homes as additional security for business loans. If a bankruptcy follows, an owner can also have his family life shattered, exacting a "toll of personal tragedy".

The surge in business failures is therefore of great concern for both economic and social reasons.

According to U.S. Courts:

EXHIBIT 1—*Business failures*

1950	8,352
1951	7,387
1952	6,542
1953	6,772
1954	8,888
1955	9,185
1956	9,478
1957	10,144
1958	11,403
1959	11,729

THE ACID DEPOSITION CONTROL ACT

● Mr. DURENBERGER. Mr. President, I am pleased to cosponsor S. 1706, the Acid Deposition Control Act.

As a Senator from Minnesota, I have a special concern about the dangerous effects on our natural resources from acid deposition, which is fast becoming one of the most significant and dangerous environmental problems, not only in the United States, but throughout much of the industrialized world.

In the United States the impact of acid deposition has received most recognition in the northeastern United States and Canada where hundreds of lakes and streams prized by sports fishermen for trout, bass, and salmon can no longer support fish. In the Adirondack Mountains of New York, 212 lakes and 140 lakes in Canada are without fish; 48,000 Canadian lakes are seriously threatened. Studies in Pennsylvania show acidic increase in 107 rivers. Fifty-eight percent of these show a decline in the number of fish species.

It was these and the following trends and the documented impact of acid deposition that led Senator MITCHELL to introduce S. 1706. In his State of Maine, the acidity of lakes has increased eightfold over the last 40 years. Native brook trout no longer reproduce in small lakes over 2,000 feet in altitude and five Atlantic salmon rivers are sufficiently acid to jeopardize young fish.

Although acid deposition has long been recognized as a serious problem primarily in the northeastern United States and Canada, continuing research has led to the recognition that my State of Minnesota and other Upper Midwestern States are faced with potentially great environmental, economic and health loss as a result of acid deposition.

The acidity of a lake and acid deposition are measured on a pH scale, and 7 on the pH scale is considered neutral—values above are alkaline, values below are acidic. It is important to note that the pH scale is exponential, which means that pH 6 is 10 times more acidic than pH 7 and pH 5 is 100 times more acidic than pH 7. pH of "pure water or rainfall is naturally somewhat more acidic with a value of about 5.6 in Minnesota, the average pH of rain in the more sensitive areas of the State—the northeastern portion of Minnesota—is on the average 10 to 25 times more acidic than normal. Recently, the averaged pH of rain in this area was measured to be 4.2. The lowest recorded value measured in northeastern Minnesota 3.6, was at Hovland, Minn., a town near the Canadian border. This is 100 times more acidic than "normal rain."

Throughout Minnesota the pH of rain is less than 5.6. However, research demonstrates that in the one-third to one-half of the State which is the most sensitive, the pH of rain is considerably more acidic than our environment will be able to tolerate. This is the northeastern region of Minnesota—the location of the magnificent Voyageurs National Park and Superior National Forest which includes the 1-million-acre boundary water canoe area wilderness. Both Voyageurs National Park, and the boundary waters canoe area are networks of over 1,000 lakes linked by streams and portages that served as the transportation route for French, English, Canadian, and American fur traders and explorers. The boundary waters area was formally established in 1902—with the 1-million-acre wilderness area insured under the 1978 Boundary Waters Canoe Area Wilderness Act. It is the most heavily used unit in the national wilderness system.

The lakes of Voyageurs National Park and the boundary waters area are on the southern end of the Canadian shield. This is an area which is particu-

larly vulnerable to the effect of acid deposition because it is underlaid by highly silicious types of bedrock such as granite and quartzite. These rock types are resistant to weathering, and the characteristically soft waters of such areas have a low buffering capacity—a low ability to neutralize additions of acid. This area in northeastern Minnesota is comparable in vulnerability to other systems which have been severely impacted by acid deposition in Europe and in North America. Most of these surface waters have little ability to neutralize acidic impacts. Atmospheric loadings near the boundary water canoe area and Voyageurs National Park are at levels associated with the onset of severe lake acidification in Sweden.

Research conducted by Dr. Gary E. Glass and other EPA scientists indicates that at least 35 percent of the lakes in northeastern Minnesota have reached critical acidity levels, even without the addition of new pollutants.

The diverse and valuable fishery of this area of Minnesota include species which have been greatly reduced or eliminated by acid rain and snow in other parts of the United States and Canada. While damage there has been less than in the Northeast, studies have shown increased levels of mercury in trout, walleye pike, and northern pike which may well have resulted from acid deposition. Fish kills not only result from the direct effects of acidic lake water, but also from the toxic metals—such as aluminum—that are released as acid rain is transported through surrounding soils.

The Minnesota Department of Natural Resources estimated that 1.4 million fishing licenses are sold each year and an additional 600,000 children and senior citizens fish without licenses. Commissioner Joe Alexander states that fishermen spent $260 million in 1975 in Minnesota and economic benefit to the State was over half a billion dollars due to the stimulation of secondary and periphery spending. (Letter dated February 12, 1981 signed by Joseph Alexander, commissioner of the department of natural resources, State of Minnesota.)

The threat to the forests of Minnesota is also of great concern. Acid deposition in northeastern Minnesota's Superior National Forest may affect the growing rates of sensitive pine species and cause detrimental effects on other vegetation.

The impact of acid deposition on the forest of the State is not fully understood, but there are growing indications that the effects may be devastating and irreversible.

A review of the preceding comments indicate clearly that acid deposition is of serious concern to not only the Northeastern States and Canada, but to the Upper Midwest as well.

To summarize the impact in my State of Minnesota:

Currently, the pH of precipitation in Minnesota ranges from about 5.5 to 4.6. The acidity is greatest in extreme northeast Minnesota. Recent data collected by the Minnesota pollution control agency monitoring indicates the average pH of rain on the north shore of Lake Superior for the past few months was about 4.1. The lowest even had a pH of 3.2—more than 250 times more acidic than normal rain as well as evidence that the pH in rain and snow in Minnesota is dangerously high, Minnesota pollution control agency staff calculate that the boundary waters canoe area wilderness is receiving loadings of approximately 20 kilograms per hectare per year—this is an average of the acid loadings in northeast Minnesota calculated to be between 13 and 29 kilograms per hectare per year which is approximately twice the loading shown to have caused acidification of lakes in Scandinavia.

Between 2,500–3,700 lakes in Minnesota are sensitive or potentially sensitive to acid deposition. Of these 500–1,000 are extremely sensitive. The Voyageurs National Park and in particular, the BWCA—major Federal holdings in northeastern Minnesota—are the most sensitive areas in the State.

Despite a concern for air quality in Minnesota demonstrated by the State initially setting stricter air quality standards than required by Federal law, action by the State cannot protect these priceless resources, on which the fisheries, the forests, and the economic health of the State depend. Minnesota pollution control agency staff estimate that only about 30 percent of the acid rain falling in Minnesota is due to emissions in the State. The balance originates elsewhere—in the Ohio River valley, Canada, and to the west of the State. EPA studies by such researchers as Dr. Walt Lyons clearly demonstrate the gigantic swirling weather systems that move huge masses of air pollutants from East to West and South to North up the Mississippi valley.

It is ironic that the tall smokestacks constructed by the electric utilities to deal with air pollution have contributed to the problem by disbursing sulfur and nitrogen high into the atmosphere where it can be carried for days by global winds before falling to Earth as "acid rain."

Acid deposition defies the premises on which our current air pollution policy rests, for it is confined to no single State, and the effects occur great distances from its sources.

The argument that the problem must be studied years before any Government action regarding the issue has been directly refuted by a recent report of the committee on the biological consequences of fossil fuel combustion of the National Academy of Sciences. The study found that acid deposition does come from man-made sources, largely powerplants: That the acidity is causing well-documented "wide spread damage to acquatic ecosystems, increased levels of a number of poisonous metals in groundwater supplies, and the elimination of several important species of fish and invertebrates over substantial part of their natural ranges." Other effects listed are damage to human health, to forest and food crops and over time, leaching vital nutrients from the soil.

The report finds that continued emissions at current rates "in the face of clear evidence of serious hazard to human health and to the biosphere, will be extremely risky from a long-term economic standpoint as well as from the standpoint of biosphere protection." The committee believes the situation "is disturbing enough to merit prompt tightening" of allowed emission standards, particularly for powerplants.

The acid rain phenomenon is real, man-made, and damaging. Reduction of emissions impacting effected areas is indicated. This is not to say that research should not be supported—it must continue with adequate funding. However, we must start to reduce emissions as is directed in S. 1706.

S. 1706 is of particular importance because it takes steps to protect resources whose buffering capacity has been reduced but not exhausted. Acid deposition is the most serious new air pollution problem to emerge since Congress last revised the Clean Air Act and should be dealt with during this reauthorization of the act.

S. 1706 proposes a 10-million-ton reduction of sulfur dioxide emissions in the acid deposition impact region over a 10-year period. This is approximately 40 percent of total sulfur emissions in the region now from all stationary sources.

As Senator MITCHELL points out, "This magnitude of reduction is necessary to protect our resources and avoid the costs incurred from their damage in loss. The extent of the resources at risk both from an inherent value and their economic worth is invaluable. Once lost, our lakes, our forests, our soils cannot be replaced and some of those resources have already been lost."

S. 1706 would establish an acid precipitation impact region consisting of all States east of the Mississippi plus Minnesota, Arkansas, and Louisiana—a total of 31 States.

Each State shall determine within 2 years after enactment how its SO_2 reduction shall be accomplished through emission limits on stationary sources of SO_2. The required SO_2 shall be the percentage of the total reduction which is the ratio of each State's actual emissions to total actual SO_2 emissions in the region. One of the unique provisions is that Governors of two or more States may agree to alter their respective shares of the reduction.

Other provisions include that the EPA administrator shall conduct a study of the impacts of long-range transport of emissions in the Northwest, Great Plains, and Southwest regions of the country and the advisability of including these regions in the coverage provided by this strategy and report back to the Congress.

The cost of the implementation of S. 1706 is significant, as are the costs to the damage of our natural resources, and this damage may prove irreversible.

Details of the bill may require further examination and debate, but the need to proceed with action regarding acid deposition is clear.

I want to commend Senator MITCHELL for introducing S. 1706, the Acid Deposition Control Act and enthusiastically add my support to this important piece of legislation.●

FOREIGN POLICY NEEDS

● Mr. KENNEDY. Mr. President, as the Cancun meeting opens today among leaders of both the industrialized nations and the Third World, I believe it is im-

portant for us to recognize that one of the critical foreign policy issues confronting our Nation is the need to establish viable relationships with the vast majority of mankind—who happen to live in the Third World.

In a timely article in the New York Times, Dr. Jean Mayer, president of Tufts University, notes that we have spent most of our foreign policy energy on establishing a stable East-West policy.

Yet, he correctly notes that "we have no North-South policy, although it is here, in our relationships with the developing nations, that the future of the world may be decided."

Mr. President, as we continue consideration today of the foreign assistance bill, I would like to share with my colleagues the excellent essay by Dr. Mayer. I ask that it be printed at this point in the RECORD.

The article referred to is as follows:

[From the New York Times, Oct. 19, 1981]

FOREIGN POLICY NEEDS

(By Jean Mayer)

MEDFORD, MASS.—A great number of diverse regions and nations now play an important role in international affairs. The cultural universe in which American diplomacy has to operate and which American citizens need to understand is more varied and complex than ever before in our history. We do not move with assurance in that universe.

One of the most serious problems we face in the United States today is the need to maintain a strategic foreign policy that, while flexible, remains fundamentally consistent over time.

We have enunciated a strong (though not necessarily consistent) East-West policy, but the success of such a policy depends to a great extent on the understanding and commitment of our allies, and we have a wavering policy of consultation and joint decision-making with the Western Europeans and the Japanese.

Indeed, conversations with high-ranking members of the foreign ministries of several of our main allies (including one foreign minister) have convinced me that the frequency and substance of consultations have reached a new low.

We have no North-South policy, although it is here, in our relationships with the developing nations, that the future of the world may be decided.

At this point, only 0.26 percent of our gross national product, the lowest percentage of any industrialized country, is going to developing lands, and most of this is dedicated to two political allies, Egypt and Israel.

We have an Administration that is inclined to an apocalyptic vision, seeing all the world's problems as linked entirely to the conflict between the United States and the Soviet Union. Clearly, we need a more sophisticated view of the world and a more comprehensive one. (Indeed, it is useful to remember that many of the points of conflict between us and the Soviet Union are related to third-world countries and their problems.)

Many of the problems we face have a long, convoluted history. This does not mean they cannot be solved but first they must be understood. Some are local, and it is often these that are the priority issues for the peoples of the region. Some are general.

Above all, there is the overwhelming problem of the rich and the poor, which cannot simply be equated with technical competence versus non-competence, industrialized countries versus underdeveloped countries. There are many types of situations. Some developing countries have money but no technical competence. Some have technical competence but very little money. Others have neither. Some are open, historically and culturally, to the Western type of industrial development, others far less so. It is essential that those whom we are training to be diplomats have a better understanding of the economic, ethnic, and particularly historical complexities of the world in which they will operate.

In addition, there is a curious trait in American foreign policy: If we do not like a country's philosophy, we tend to delay recognizing its existence as long as possible. We have done it with the Soviet Union, with China, with Cuba, we are doing it with Vietnam.

In this clash of ideals, we deprive ourselves of the means of action, not only in protecting our short-term interests, but often in advancing our ideals. It is not beyond the judgment of well-intentioned, experienced persons to find compromises between long-term objectives and present realities, but unless we train people to uphold the vision of freedom and equality and to take practical action, we will end up negating our ideals and engaging in counterproductive actions.

The greater part of diplomacy does not take place in a vacuum. In a democracy, it is an expression of the goals that an informed and educated public wants to achieve. The foreign policy of the United States involves many others besides the members of our Foreign Service. It must be understood by midcareer officers in the armed forces and other governmental agencies involved in foreign affairs, by international business leaders, personnel in international agencies, in nongovernmental and public-service organizations, in journalism and communications, and in the academic professions, both teaching and research. These, also, are our ambassadors. Finally, it must be understood by the general public.●

PRESCRIPTION FOR ECONOMIC DISASTER

● Mr. ROTH. Mr. President, we have heard a lot of talk in the past few weeks about delaying the Reagan tax cut. Some people are saying we could balance the budget if we would just scale down or delay the scheduled tax relief for individual taxpayers. What these critics fail to mention is that without the tax cut, taxes on individuals will increase by more than $24 billion in fiscal year 1982 from bracket creep alone. Now is not the time to return to the old policy of balancing the budget on the back of the taxpayer. Now is the time to stick with the Reagan economic recovery program, and give it a chance to work.

My good friend and colleague, BOB KASTEN, made an eloquent case against delaying the tax cut in an article which appeared in Sunday's Washington Post, entitled "Prescription for Economic Disaster." The Senator from Wisconsin has been a strong supporter of the Roth-Kemp tax cut right from the beginning—first as a Member of the House, and then here, in the Senate. BOB KASTEN speaks from experience, as both a member of the Budget Committee and of the Appropriations Committee, when he says that there are other, better ways to balance the budget. I ask that this fine article be placed in the RECORD at this time, and I recommend that all my colleagues in the House and Senate take time to consider his persuasive arguments.

The article follows:

PRESCRIPTION FOR ECONOMIC DISASTER

When Teddy Roosevelt and his Rough Riders charged up San Juan Hill, no one could stop them. Their goal was clear, their strategy was set, they held their ranks and America emerged victorious.

Today we're fighting a much tougher battle—a battle against the inflation that has wracked our economy for the past 10 years. Ronald Reagan is leading the charge with an all-out campaign, and so far Congress has followed right behind. But now that we've reached the top of the hill, Congress has started to flinch. Will Congress falter? Will the House and Senate, in a last-minute panic, throw away our strongest economic weapon and cost us the battle?

The big question in Washington today is: will Congress actually scuttle the Reagan tax cut just when we need it most?

During the past few weeks, support for delaying the personal tax cut has grown. People are pointing to the 1982 budget deficit and they are talking in fearful tones about inflation, high interest rates and the 1982 election.

What Congress as a whole has yet to realize is that without the tax cut, a recession looms large on the horizon. In September, unemployment rose to 7.5 percent, and real gross national product has fallen slightly for two quarters in a row. Until now the slowdown has been concentrated in just a few industries, and general consumer demand has remained strong. It's fair to say that anticipation of the tax cut has kept us out of a real recession so far.

That's the way it was supposed to work. A decade of accelerating inflation has undermined investment, unbalanced the financial system and raised tax rates to the point where they destroyed economic incentives for work, saving and productivity. The Reagan program was designed to stop this economic cancer with a strong dose of monetary and fiscal restraint. But to minimize the effect this tough medicine would have on job creation and economic growth, it was coupled with a new dose of economic incentives—regulatory reform and, most important, a dramatic reduction in the personal tax burden. The idea was to cure a destructive inflation without undergoing an equally painful recession.

"Delay the tax cut and we can balance the budget." That's the new clarion call of the liberals in Congress. Yet if we delay the tax cut, we will only see a deeper recession and more unemployment. According to the Congressional Budget Office, for every 1 percent increase in the jobless rate, the federal deficit grows by $27 billion. When people are out of work, they can't pay taxes, and many have to turn to Washington for financial help.

Delay the tax cut and the deficit gets bigger, not smaller. Delay the tax cut and we will go into the 1982 election with inflation, high interest rates, high unemployment and a bigger deficit. Any way you look at it, the American people lose.

The analysis doesn't change when you couple a three-month tax cut delay with a three-month delay in entitlement cost-of-living increases. The result will still be slower economic growth, fewer taxes paid and more social spending. Yes, we need to take a serious look at reforming the cost-of-living increases for entitlement programs. But are we willing to hold the tax cut hostage on the slim hope that we can force dramatic entitlement reform through the House in the next few months? We could end up worse off than when we started—with a delay in the tax cut, no entitlement reform and a longer, deeper recession.

That's not to say that we shouldn't be worried about the size of the federal deficit. Government borrowing is keeping interest

rates high, and Congress should take decisive action now to get the 1982 budget under control. We should take a careful look at the defense spending increases planned for the next three years. We should consider adjusting the cost-of-living formula for entitlement programs. We should keep the 1982 appropriations bills within budget guidelines. And if we have to increase revenues, we could raise a substantial amount of money through consumption-oriented taxes—increase the excise tax on liquor and cigarettes, put a tax on imported oil or close some of the loopholes in our tax code.

But a delay in the personal tax cut won't solve our deficit problem. It would simply hurt our one chance to win the economic battle. When the administration first set out the economic program, it expected two-thirds of the personal tax cut to be effective by Jan. 1, 1982. As it turned out, tax rates will only be cut 5 percent by then, and that tax relief will soon be wiped out by previously scheduled Social Security taxes and bracket creep. If we delay the tax cut for another three months, we won't have any real cut in personal tax rates until fiscal year 1983. If we delay the tax cut, the true supply-side experiment won't start until Oct. 1, 1982. By then it may be too late.

Ronald Reagan was elected because he offered a hopeful new vision to the American people. He said there was nothing wrong with America that a little less government and a little persistence couldn't solve. He said it was time to unleash the creative and innovative forces of the American people, who had been held down too long by excessive taxation, inflation and government regulation. If we scuttle the tax cut now, this positive new approach to governing will never have a chance to work. We will return to the "root-canal economics" of the past—if it doesn't hurt enough, it can't be good for you. For years we were told that the only way to stop inflation was through a deep and painful recession—that we should balance the budget first and then give the people some tax relief.

Shouldn't we at least attempt a new approach to solving our economic problems?

So the questions remain. Will Congress take after the Rough Riders of old and stick with the Reagan program? Will we hold ranks long enough to win the fight against inflation? The American people could win this battle, too, if we just give the program a chance.●

INTEREST RATES CONTINUE TO BATTER REALTY INDUSTRY

● Mr. SASSER. Mr. President, the interest rate problem continues to devastate the realty and homebuilding industries. In August, existing home sales dropped 10.3 percent below the July level. Reports of housing starts also reflect these problems. Less than half of the number of homes needed to meet the new demand for housing are being built.

On October 19, I chaired a Senate Small Business Committee field hearing in Memphis, Tenn., on the impact of high interest rates. A witness from the homebuilding industry testified that high interest rates were the most serious threat to the continued existence of his business. He added that the price of the typical new home in Memphis had risen 28 percent in the last 3 years while the monthly payment for that same house had risen 116 percent. This means that the person who bought that house 3 years ago would today have to have double the income to be able to afford it.

This is the problem this industry is having and it is one that they can do little about on their own. They have made good faith attempts to adapt to today's changing conditions, but to no avail.

The backlog of homes in the Memphis area stands at 2,400 homes. The interest charges on these homes cost builders over $2.5 million per month. Half of the work force of the industry is either unemployed or has gone elsewhere, and residential construction permits are down 84 percent.

There are not many who can continue if these conditions persist for much longer, Mr. President. They will go under as many others already have. When they do they will take the investment in the future of our growing communities with them.

We cannot stand by and see this happen to an industry that means so much to this country. They deserve better, as do the millions of Americans who desire to own their own home.

I ask to have printed in the RECORD Mr. President, several articles from the Realtor News that I think will interest my colleagues in the Senate. I urge every one of them to read this information carefully and take heed of the implications that a continuation of high interest rates will have for the country.

The articles follow:

INTEREST RATES PUSH HOME SALES TO 6-YEAR LOW

WASHINGTON.—Existing home sales reflecting the depressing effect of record-high mortgage interest rates, which are attributable in large part to the federal government, dropped to their lowest level in six years in August, according to Dr. Jack Carlson, NAR chief economist and executive vice president.

"August home sales were at a seasonally adjusted annual rate of 2,260,000 units," Carlson reported, "off 10.3 percent from the July level of 2,520,000 units and down 43.8 percent from the sales level that was typical before the government policy drove interest rates to record levels starting 18 months ago."

Carlson said the amazing thing is that homes are still being sold in spite of the record interest rates.

MORTGAGE ASSUMPTIONS

"Our latest survey indicates that sales are occurring through the use of mortgage assumptions and sellers utilizing their equity to help in the financing," Carlson said. "These uses of creative financing typically provide for interest rates in the 12–14 percent range rather than the 17–19 percent rates which seem to be prevalent."

Carlson noted that the August decline occurred after seven consecutive months in which sales appeared to have reached a bottom level and were holding within a narrow 2.49 to 2.66 million sales range.

"The unexpected and further decline in sales can be directly attributed to the record mortgage interest rates, which are taking a terrible toll on housing," he added.

The continuing recession completed its 34th month in August, and during this period the slump has been felt in every region of the nation. Since 1978, he said, resale activity has dropped 35 percent in the Northeast, 44 percent in the South, 44 percent in the North Central region and 49 percent in the West.

"In August, the level of sales held steady in the North Central region, but declines were recorded in every other region, especially the South and West," Carlson said.

The South saw sales decline by a full 120,000 units on a seasonably adjusted basis, 11 percent from last month and 29 percent from last year.

The West experienced a decline of 100,000 units, 20 percent below the month before and 33 percent below 12 months ago.

Despite the low level of home sales, Carlson continued, home prices have not fallen under the strain on the market.

MEDIAN HOME PRICES

"Last month the median price of an existing home rose 1.5 percent or $900 to $68,400, making up for the $200 price drop in July. Prices increased in every region except the West, where prices dropped by 4.2 percent or $4,200 to $94,700."

In August, the median sales price was only 5.4 percent above the same month in 1980. "However, home prices in 1981 will almost certainly lag 4 percent behind the expected increases in the Consumer Price Index," he said.

After adjusting for lower interest rates associated with creative financing, the drop in real prices of homes may have been 6 or 7 percent since 12 months ago. Although housing price declines are rare, this drop appears modest when considering the huge increase in mortgage interest rates, Carlson added.

"The slow pace of housing construction and sales is creating a shortage that is likely to be reflected in housing prices in the future. Median home prices can be expected to increase by 10 percent during the next 12 months, illustrating the harmful effects of creating a shortage by high interest rates that can only mean greater inflation in the future," he concluded.

IMPROVEMENT PREDICTED: MORTGAGE DELINQUENCIES REMAIN ABOVE LAST YEAR'S LEVEL

Mortgage delinquency rates continue to remain above year-earlier figures, according to data from the U.S. League of Savings Associations, the Mortgage Bankers Association (MBA) and the National Association of Mutual Savings Banks (NAMSB).

William B. O'Connell, U.S. League executive vice president, said the League's figures are "an indication that household budgets remain under some pressure."

However, the delinquency figures "show no sign of any serious borrower stress," he said. "Despite lingering economic problems, Americans continue to give top priority to protecting their housing investment."

The League considers a loan delinquent if payment is more than 60 days late. The August delinquency ratio was 0.99 percent—the highest ratio in five years, compared with 0.92 percent in July. The year-earlier figures were 0.84 percent for August and 0.80 percent for July.

The MBA, which monitors loans that are 30 days, 60 days and 90 days or more past due, reported that while the percentage of loans 30 days past due fell from 3.80 percent in the first quarter to 3.73 percent in the second quarter, the percentage of loans 60 days past due rose from 0.86 percent to 0.89 percent. Loans 90 days or more past due declined slightly from 0.65 percent to 0.64, while foreclosures begun went from 0.16 percent to 0.17 percent.

"An increase in the 60-days-past-due category is an important indication that the economic difficulties behind the delinquencies are more than transitory," MBA Chief Economist Thomas R. Harter said. "Mortgage servicers move quickly to prevent these loans from falling into the 90-days-or-more category, which often preludes foreclosure."

The National Association of Mutual Savings Banks said that delinquencies among the loans its members hold fell during the

second quarter from 0.72 percent to 0.69 percent, but that foreclosures rose from 0.03 percent to 0.05 percent. During the second quarter of 1980 the delinquency rate was 0.65 percent and the foreclosure rate 0.03 percent.

FHA and VA loans accounted for the second-quarter overall decline in delinquencies since the delinquency ratio for conventional mortgages rose slightly, although it remained below the FHA and VA rates, the NAMSB said.

The NAMSB considers delinquent any loan that is three or more payments overdue or that is in foreclosure.

The MBA's Harter, however, is optimistic about the future.

"Nationally, the pressure on homeowners' budgets appears to be easing as inflation declined and personal income registered gains," he said. "Although the economy as a whole remains sluggish, these two factors should help to ease mortgage delinquencies in the months ahead."

UNLOCK THE DOOR TO HOME SALES!

It began as a joint effort to convince Congress and the president that the interest-sensitive home sales, home construction and automobile sales industries need relief from record interest rates.

We had carried this message to Congress and the White House before and it seemed that it had fallen on deaf ears. In the past 10 days, as if we needed confirmation of the problems, existing-home sales slipped to their lowest level in six years. Candidly stated, we are suffering five times more than at any time since the Great Depression of the 1930s.

New-home sales are off 43 percent from just a year ago, and there is every indication that the President, Congress and the Federal Reserve Board are paying little or no attention to our problem.

The campaign referred to is one being jointly sponsored by the National Association of Realtors, the National Association of Home Builders and the National Automobile Dealers Association, and it asks for people nationwide to send their congressmen a key by Oct. 9 to dramatize the plight of the housing and auto industries.

We think this is a sound idea; in fact, we think it is essential to awaken a dormant Congress administration and Federal Reserve to the depth of the depression in housing. While we are watching continuous declines in activity, declines that are largely the fault of our government's economic policies, we are seeing a return in the nation's capital to business as usual—budget-busting and higher deficits, and siphoning of money from housing and investments to fuel that government deficit.

A piecemeal approach to budget cuts, jawboning that the size of the deficit is not important, the attempt to divert people's attention through calls for a return to the gold standard—all these are a smoke screen that will allow the deficit to climb higher and take more money out of the housing and auto industries.

When we say something must be done to unlock the economy, we strongly recommend these three points:

1. The president and Congress must hold the budget deficit to under $43 billion in fiscal 1982 and achieve a balanced budget by 1984.

2. The Federal Reserve Board must allow the money supply (currency and checking accounts) to increase to the middle of the Fed's own targets.

3. The president should appoint a small-business person from an interest-sensitive industry to fill the next vacancy on the Federal Reserve Board, expected by January.

In addition to full implementation of the All-Savers certificate, we encourage your participation in "Unlock the Economy." Send in a key, and encourage your colleagues and friends to do the same. Insist that your leaders meet with your senators and congressmen by Oct. 9. We are taking a severe beating and must be heard.●

MOSHE DAYAN

● Mrs. HAWKINS. Mr. President, last week the world suffered the loss of a visionary world leader—Moshe Dayan. I am saddened at the loss of this great man. Most Americans remember Moshe Dayan for his brilliant conduct of the June 1967 Arab-Israel war when Israel repulsed a military threat from surrounding Arab States. This lightening victory enhanced the Israeli Army's reputation for prowness, discipline, and effectiveness. But I believe that history will place Moshe Dayan's untiring efforts on behalf of the Camp David accords on an equal plane with his significant military accomplishments.

In the aftermath of the Yom Kippur War of 1973, Moshe Dayan began his peace pursuit. Later, when Dayan became Israel's Foreign Minister in 1977, he identified and knocked down barriers to peace that stood between Egypt and Israel. His efforts were richly rewarded when the Camp David accords were signed. The peace and stability that grew out of the accords have benefited the people of both countries. Although the Camp David accords were the result of many men's efforts, they nevertheless bear the strong imprint of Moshe Dayan. And today, the accords embody the only viable framework for resolving the fundamental differences in the Middle East.

Moshe Dayan cast a long shadow in the Middle East. He was a man of war, a man who loved and defended his country. But he was also a man of peace, a man with a vision that Arabs and Israelis could live side-by-side in peace and prosperity. I mourn the passing of this man of peace. The world has far too few. I hope that his passing will remind us all of what he strove for, and encourage us to continue to press on for a lasting peace in this troubled region of the world.●

S. 1718, TO AMEND THE CLEAN AIR ACT WITH RESPECT TO INTERSTATE POLLUTION ABATEMENT

● Mr. DURENBERGER. Mr. President, I am pleased to join in cosponsoring S. 1718, a bill that amends the Clean Air Act to improve the effectiveness of this country's interstate pollution abatement efforts.

Minnesota has demonstrated its concern over air quality by establishing stricter air quality standards than those required by Federal law. But because air pollutants do not respect State boundaries, action by the State of Minnesota alone cannot protect the priceless resources on which the fisheries, forests, and economic health of the State depend.

Meteorological studies done under the auspices of the EPA by Dr. Walt Lyons and others have clearly documented the existence of gigantic swirling weather systems that move huge masses of air pollutants in all directions from the major source regions of the Ohio River Valley. It is a mistake to rely on simplified textbook notions of the "prevailing westerlies"—moving air only from west to east.

Minnesota Pollution Control Agency staff estimate, for example, that only about 30 percent of "acid rain" falling in Minnesota is due to emissions in the State. The balance originates elsewhere. S. 1718 provides a process which should prove effective in a State's efforts to protect its environment from transboundary transport of pollutants.

S. 1718 would improve the process established in the Clean Air Act to provide States with relief from long-range transport that adversely affects the petitioning State's air quality. Section 110 and section 126, the provisions of the Clean Air Act that deal with this issue, have proved to be unworkable.

In hearings before the Government Affairs Intergovernmental Relations Subcommittee, which I chair, testimony from State and territorial air pollution program administrators recommended that the Federal Clean Air Act be amended, particularly sections 110 and 126, to provide specific authority to deal with all long-range transported air pollution.

As presently worded, section 110 requires each State's implementation plan to include provisions to prohibit "any stationary source" of pollution in the State from producing emissions that will "prevent attainment or maintenance" of air quality standards in another State. Section 126 allows a State or local government to petition the Administrator of the Environmental Protection Agency to require emissions reductions from a source in another State that violates the prohibition in section 110.

The limitation to stationary sources has proven too narrow to address major intertsate pollution problems, the standard of proof required of a State suffering pollution from sources in another State has proven impossible or virtually impossible to meet, and timely action by the EPA on allegations of interstate pollution has proven impossible to obtain.

S. 1718 would:

Expand air emissions to include noncriteria pollutants;

Address the total loading of emissions, not just ambient concentrations;

Address meteorological factors and estimates of sources from outside the State affecting air quality in the petitioning State; and

Provide that the petitioning State does not have to rely solely on modeling to indicate culpability.

In summary, S. 1718 is a more comprehensive approach to dealing with interstate transport than is presently provided under the provisions of the Clean Air Act, and should go far to address the concerns of those engaged in the day-to-day administration of the Clean Air Act.

Anthony Cortese from the Commonwealth of Massachusetts testified before the Intergovernmental Relations Subcommittee and expressed well the issues inherent in our present legal structure:

Perhaps no other problem illustrates the

intergovernmental complexities in the clean air program as well as the interstate pollution problem. The flow of air pollution across State lines creates serious institutional equity and air quality problems for many areas of the country. As the National Commission on Air Quality found, there are significant problems from the long distance transport of a number of air pollutants, particularly those related to automobiles, as well as pollutants from individual sources known in the vernacular as "acid rain." The institutional equity issues are similar for all these pollutants, and involve a significant cost in terms of real and potential damage and reduced opportunity for economic development in areas which receive air pollution from upwind States.

The issue of interstate responsibility is of critical importance and it is a pleasure to cosponsor this bill. Although details of the bill may require further examination and debate, the need to proceed is clear.●

INDUSTRIAL DEVELOPMENT BONDS

● Mr. SASSER. Mr. President, I rise today to call attention to recent actions by the Internal Revenue Service which prohibit States and localities from offering multiple lots of small-issue, tax-free, industrial, and agricultural development bonds.

This action reverses three previous revenue rulings and changes a practice that has been established over a 9-year period. It has the effect of preempting congressional action on this matter and deprives small businesses and farmers of a vital source of development funding at a time when record high interest rates threaten their very existence.

Without reliance on small-issue industrial development bonds, small businesses are forced to borrow funds, often at 2 to 3 points above the prime rate in order to meet their capital needs. All too often, we are finding that small businesses are going under, at record rates I might add, rather than continue to operate under the staggering burden of high interest rates.

Small-issue industrial development bonds have enabled small businesses to obtain working capital at 60 to 80 percent of the prime rate instead of paying their usual 2 points over prime. This has the effect of a dual prime rate policy that can keep small businesses afloat during this period of high interest rates.

In addition to the IRS action, legislation has been introduced in the House to take away the tax-exempt status of the small-issue bonds. Small-issue IDB's have created thousands of jobs and spurred economic growth in Tennessee.

As evidence of this fact I ask that a letter by Mr. C. Tiffany Bingham, Jr., executive vice president of the Memphis area chamber of commerce on the value of industrial revenue bonds to the economic development of the Memphis area be printed in the RECORD.

The statement follows:

MEMPHIS AREA
CHAMBER OF COMMERCE,
October 2, 1981.

Hon. ALFONSE M. D'AMATO,
U.S. Senate,
Washington, D.C.:

As Executive Vice President of the Memphis Area Chamber of Commerce I am extremely pleased to have this opportunity to comment upon current proposals to restrict or eliminate the business finance incentives currently available through use of Industrial Revenue Bonds.

Unlike many communities, Memphis only recently began to take advantage of the Industrial Revenue Bond vehicle. As a community we had had many of the concerns now being expressed on a national basis about possible abuses of such bonds. As a result, when the local Industrial Development Board was formed, strict guidelines were set up to insure that the bonds would only be used for productive capital investment. A copy of the Statement of Intent of our local Industrial Development Board is attached to demonstrate the types of restrictions which were determined to be appropriate on a local basis. Also attached are the separate application procedures of our Center City Industry Development Board, demonstrating use of the bonds in connection with our urban redevelopment activities.

As a result of the responsible position taken by our local Industrial Development Board, Memphis' experience with bond financing has been extremely positive. Through the use of local property tax incentives as well as bond financing, we have been able to spark a resurgence in our formerly deteriorating downtown area, including construction of numerous housing and commercial buildings as well as renovation of the Peabody Hotel which has now been restored to its former position at the heart of our downtown. We have also been able to provide badly needed business capital funds for expanding local industry, creating hundreds of new jobs, many filled by previously underemployed individuals.

As a result, current proposals to restrict or eliminate entirely this form of financial incentive cause a great deal of concern to those of us charged with the job of promoting the development of Memphis. Memphis, unlike certain of the other "sunbelt" cities, continues to rank among the poorest in America. Approximately forty percent (40%) of our population is black, and a large percentage of this group, as well as a large percentage of our white population, suffers from unemployment or underemployment. Social services cutbacks already adopted, as well as those currently being proposed, are likely to make this situation worse, not better.

Accordingly, we in the Memphis community have concluded that the best hope for improving the plight of our economically disadvantaged citizens is to promote an aggressive campaign of economic and urban development. Availability of business capital is a critical factor in this program. While big business generally has no problem with finding capital (although its price may be high), smaller business, such as we depend upon in Memphis, can often find no capital whatsoever. The availability of industrial revenue bond financing is a bright spot in an otherwise bleak picture for many of our local concerns.

We would ask that, in considering amendments or restrictions to reduce the costs to the U.S. Treasury of various forms of industrial revenue bond financing, you not lose sight of those areas where a real public purpose exists for this form of financing: i.e., provision of capital funds for the smaller business and provision of financial incentives for redevolpment of economically disadvantaged urban areas.

One matter of specific concern relates to the "Rangel Bill" (H.R. 4420) now being considered by the House of Representatives. This bill is designed to restrict use of industrial revenue bond financing for "commercial-type property" to economically distressed areas, a concept with which we have no problems in the city of Memphis. However, the specific language of the bill is such that commercial-type property is defined to include standard industrial classification code division F-Wholesale Trade. This includes distribution centers and commercial warehouses, possibly even where attached to manufacturing facilities.

For a city such as Memphis this creates a major problem in that much of our economic base depends upon the wholesale and distribution industries. From matters of physical convenience, such distribution facilities must often be located in the newer areas of our community, nearer the expressways and other transportation facilities. These areas are normally not the "economically distressed areas" of the Memphis community, but the facilities constructed for these industries result in the creation of many jobs for the unemployed and under-employed segments of our community. Thus we ask that in considering any bill to restrict use of industrial revenue bond financing for commercial facilities, you define such facilities in such a way as to exclude the wholesale or industrial distribution activities, which are so important to our local economy.

We would appreciate your giving careful consideration of the concerns of the Memphis community in this area and would be pleased to provide further information to you or your committee as appropriate.

Sincerely yours,

C. TIFFANY BINGHAM, Jr.,
Executive Vice President.●

ORDERS FOR THURSDAY

ORDER FOR RECESS UNTIL 9 A.M.

Mr. BAKER. Mr. President, I ask unanimous consent that when the Senate completes its business today it stand in recess until the hour of 9 a.m. on tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR THE RECOGNITION OF CERTAIN SENATORS

Mr. BAKER. Mr. President, I ask unanimous consent that after the recognition of the two leaders under the standing order there be special orders of not to exceed 15 minutes each in favor of the following Senators in the following order:

The Senator from Mississippi (Mr. COCHRAN), the Senator from New Hampshire (Mr. HUMPHREY), the Senator from Texas (Mr. BENTSEN), and the Senator from New Hampshire (Mr. RUDMAN).

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR PERIOD FOR TRANSACTION OF ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that after the recognition of the Senators just specified on special orders there be a brief period for the transaction of routine morning business to extend not past 10:30 a.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RESUMPTION OF CONSIDERATION OF S. 1196

Mr. BAKER. Mr. President, I ask unanimous consent that at 10:30 a.m. the Senate resume consideration of the pending measure at which time the Hatch amendment will be the pending business.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF BUSINESS

Mr. BAKER. Mr. President, I inquire of the distinguished minority leader if

he might be in a position to clear on his calendar nominations appearing on today's Executive Calendar beginning with nominations on page 1, including all of those on page 2 and all of those on page 3, with the exception of the two nominations appearing under Department of Labor.

Mr. ROBERT C. BYRD. Mr. President, the minority is ready to proceed on the nominations as stated.

Mr. BAKER. I thank the minority leader.

EXECUTIVE SESSION

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate now go into executive session for the purpose of considering the nominations just identified which include the nominations placed on the Secretary's desk in the Department of Health and Human Services.

There being no objection, the Senate proceeded to the consideration of executive business.

The PRESIDING OFFICER. The nominations will be stated.

The legislative clerk proceeded to read nominations on the Executive Calendar.

Mr. BAKER. Mr. President, I ask unanimous consent that the nominations so identified be considered and confirmed en bloc.

The PRESIDING OFFICER. Without objection, the nominations are considered en bloc and confirmed en bloc.

The nominations considered and confirmed en bloc are as follows:

THE JUDICIARY

William L. Garwood, of Texas, to be U.S. circuit judge for the 5th circuit.

Hayden Wilson Head, Jr., of Texas, to be U.S. district judge for the southern district of Texas.

James R. Nowlin, of Texas, to be U.S. district judge for the western district of Texas.

H. Franklin Waters, of Arkansas, to be U.S. district judge for the western district of Arkansas.

DEPARTMENT OF JUSTICE

Joe D. Whitley, of Georgia, to be U.S. attorney for the middle district of Georgia.

Dan K. Webb, of Illinois, to be U.S. attorney for the northern district of Illinois.

Ronald E. Meredith, of Kentucky, to be U.S. attorney for the western district of Kentucky.

P. A. Mangini, of Connecticut, to be U.S. marshal for the southern district of Connecticut.

Robert W. Foster, of Ohio, to be U.S. marshal for the southern district of Ohio.

Ralph L. Boling, of Kentucky, to be U.S. marshal for the western district of Kentucky.

DEPARTMENT OF COMMERCE

Donald James Quigg, of Oklahoma, to be deputy commissioner of patents and trademarks.

NATIONAL CREDIT UNION ADMINISTRATION

Edgar F. Callahan, of Illinois, to be a member of the National Credit Union Administration Board.

DEPARTMENT OF STATE

Thomas R. Pickering, of New Jersey, a Foreign Service officer of the class of career minister, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Federal Republic of Nigeria.

Alan M. Hardy, of Virginia, a Foreign Service officer of class 1, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Equatorial Guinea.

David Charles Miller, Jr., of Maryland, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the United Republic of Tanzania.

NOMINATIONS PLACED ON THE SECRETARY'S DESK IN THE DEPARTMENT OF HEALTH AND HUMAN SERVICES

Public Health Service nominations beginning Kenneth S. Brown, to be Medical Director, and ending Robert P. Nugent, to be Senior Assistant Health Services Officer, which nominations were received by the Senate and appeared in the Congressional Record on January 5, 1981.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the nominations were confirmed.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, I ask unanimous consent that the President be immediately notified of the confirmation of these nominations.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate now return to legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE CALENDAR

Mr. BAKER. Mr. President, there are certain items on my calendar of business, general orders, that are cleared on this side for consideration and passage by unanimous consent.

I will ask the minority leader if he is in position to clear for consideration the passage by unanimous consent of Calendar Orders 297, 298, and 299.

Mr. ROBERT C. BYRD. Mr. President, the calendar orders enumerated by the majority leader have been cleared on this side of the aisle.

Mr. BAKER. I thank the minority leader.

BOUNDARY OF CRATER LAKE NATIONAL PARK

The bill (S. 1119) to correct the boundary of Crater Lake National Park in the State of Oregon, and for other purposes, was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

S. 119

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) the first section of the Act entitled, "An Act reserving from the public lands in the State of Oregon, as a public park for the benefit of the people of the United States, and for the protection and preservation of the game, fish, timber, and all other natural objects therein, a tract of land herein described, and so forth", approved May 22, 1902 (32 Stat. 202), as amended, is further amended by revising the second sentence thereof to read as follows: "The boundary of the park shall encompass the lands, waters, and interests therein within the area generally depicted on the map entitled, 'Crater Lake National Park, Oregon,' numbered 106–80, 001–A, and dated March 1981, which shall be on file and available for public inspection in the office of the National Park Service, Department of the Interior.".

(b) Lands, waters, and interests therein excluded from the boundary of Crater Lake National Park by subsection (a) are hereby made a part of the Rogue River National Forest, and the boundary of such national forest is revised accordingly.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

CONVEYANCE OF CERTAIN LANDS IN THE GALLATIN NATIONAL FOREST

The Senate proceeded to consider the bill (S. 188) to authorize the Secretary of Agriculture to convey certain lands in the Gallatin National Forest, and for other purposes, which had been reported from the Committee on Energy and Natural Resources with an amendment:

On page 2, strike line 4, through and including line 9, and insert the following: thence south 63 degrees 50 minutes west, a distance of 68.1 feet; thence south 54 degrees 5 minutes east, a distance of 448.7 feet; thence north 53 degrees 27 minutes east, a distance of 39.3 feet; thence north 51 degrees 3 minutes 52 seconds west, a distance of 429.3 feet to the point of beginning; containing approximately 0.497 acres.

So as to make the bill read:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of Agriculture be, and he hereby is, authorized and directed to convey by patent to Wayne Fuller, the following described lands in the Gallatin National Forest, to wit: township 6 south, range 9 east, and township 6 south, range 10 east, Principal meridian, Montana, Park County, Montana; beginning at corner numbered 4 of H.E.S. 84, thence south 63 degrees 50 minutes west, a distance of 68.1 feet; thence south 54 degrees 5 minutes east, a distance of 448.7 feet; thence north 53 degrees 27 minutes east, a distance of 39.3 feet; thence north 51 degrees 3 minutes 52 seconds west, a distance of 429.3 feet to the point of beginning; containing approximately 0.497 acres.

SEC. 2. No conveyance shall be made pursuant to this Act until payment has been made for the fair market value of the interest being conveyed.

SEC. 3. The patent issued pursuant to this Act shall contain a reservation to the United States of all gas, oil, coal, and other mineral deposits as may be found in such lands.

The amendment was agreed to.

(By request of Mr. ROBERT C. BYRD, the following statement was ordered to be printed in the RECORD:)

● Mr. MELCHER. Mr. President, I urge support for S. 188 and want to commend the Senate Energy and Natural Resources Committee for the unanimous support.

This bill aims at remedying a long-standing inequity on the Gallatin National Forest in Montana. Mr. Wayne Fuller has been trying to work out this matter for many years now but, when

it comes to the matter of Forest Service land, they have difficulty parting with even the smallest acreage. At first the Forest Service also said the Fullers' water system and canals were in trespass but, when they bothered to do some research of the documents, they found Fuller was right that the water system was a part of the original homestead entry. That was cleared up; then they wanted his barn and sheds moved out of trespass. So here we are. I thought this could have been solved last year with the passage of that bill authorizing sales of these small tracts, but it was vetoed as part of a larger measure to which it was attached.

The Park County Legislative Association contacted me about this matter and pointed out that the problem arose many years ago when the Forest Service was granted an administrative site and road easement from the original homestead entry.

I want to point out that the committee strongly recommends the Forest Service pick up their estimated conveyance cost of $8,000. The fair market value of this 0.497 acres is estimated to be $3,000. The committee has rightly seen these costs as excessive. The Forest Service is, for some reason, treating this narrow question as a full-blown exchange or conveyance. This is wrong.

S. 188, if enacted would convey less than one-half acre of land in the Gallatin National Forest to Wayne Fuller, owner of adjacent lands, to correct a long-standing trespass problem raised by a recent survey. The area described has improvements and is currently under a special use permit allowing the occupancy as an interim measure pending permanent resolution.

Mr. Fuller's residence and his barn are partially located on National Forest system lands. Mr. Fuller prefers to acquire the land rather than move the buildings or to exchange his lands for the lands in question.

I urge the bill be passed to correct a long-standing problem.●

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

PRESERVATION OF HISTORIC CAMDEN IN THE STATE OF SOUTH CAROLINA

The Senate proceeded to consider the bill (S. 146) to authorize the Secretary of the Interior to assist in the preservation of historic Camden in the State of South Carolina, and for other purposes, which had been reported from the Committee on Energy and Natural Resources with an amendment:

On page 2, strike line 13, through and including line 15, and insert the following:

(b) Beginning October 1, 1982, there are hereby authorized to be appropriated such sums as may be necessary to carry out the provisions of this Act, but not to exceed $250,000.

So as to make the bill read:

S. 146

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) in order to assist in the preservation of the nationally significant historic resources associated with the town of Camden, South Carolina, a key location in the development of South Carolina and in military operations in the South during the American Revolution, the Secretary of the Interior is authorized, in accordance with subsection 2(e) of the Act of August 21, 1935 (49 Stat. 666), to enter into a cooperative agreement or agreements with the Camden Historical Commission, the Camden District Heritage Foundation, or other appropriate public, governmental, or private nonprofit entities pursuant to which the Secretary may assist in the protection, restoration, and interpretation of such resources for the benefit of the public.

(b) Beginning October 1, 1982, there are hereby authorized to be appropriated such sums as may be necessary to carry out the provisions of this Act, but not to exceed $250,000.

The amendment was agreed to.

(By request of Mr. BAKER the following statement was ordered to be printed in the RECORD:)

● Mr. THURMOND. Mr. President, I rise in support of Senate bill 146, the historic Camden legislation, which has been introduced by myself and Senator HOLLINGS. This bill would authorize the Secretary of the Interior to assist in the preservation of an important national resource which has come to be known as "Historic Camden," S.C.

As I stated upon introduction of this bill last February, Senator HOLLINGS and I introduced this measure in the 96th Congress; however, because it was attached to other more controversial legislation, it did not achieve final passage. I understand that the legislation we sponsored in the last Congress, which was virtually verbatim the measure presently before the Senate, met with no opposition in and of itself. In fact, both the House and the Senate passed separate measures containing the provision pertaining to historic Camden, but there was insufficient time for a conference to resolve differences in other parts of the legislation.

This bill authorizes the Secretary of Interior to enter into cooperative agreements with the Camden Historical Commission, the Camden District Heritage Foundation or other appropriate organizations, to aid in the protection and restoration of historic areas. Thus, this bill will insure the continued preservation of Camden's historical assets, without the greater expenditures which would have been necessary had Federal acquisition been required.

Mr. President, the need for quick passage of this legislation is manifest, as aid to the various Camden historical societies must be provided soon to prevent deterioration or destruction of many historical areas and artifacts. Therefore, I hope that the Senate will proceed to pass this legislation without delay.

Mr. President, I ask that a copy of the statement by Mrs. Hope Cooper, administrator of the Camden Historical Commission, made before the Senate Energy and Natural Resources Committee, be included in the RECORD at the conclusion of my remarks.

The statement follows:

STATEMENT OF MRS. HOPE COOPER

Mr. Chairman and members of the Committee:

Today the Honorable Mr. Thurmond has presented the legislation for Historic Camden to become an affiliate member of the National Park Service. In his remarks, the national significance and the need for national recognition were well stated.

The members of the Camden Historical Commission, with documented backing from local and state governments, also ask your approval.

This legislation will enable a cooperative agreement to be negotiated annually, and will allow flexibility for private and federal participation in management.

The Camden Historical Commission has invested 1.6 million dollars in development and will continue with vigorous efforts. The affiliation with the National Park Service will allow technical assistance and a proportion of financial support. The recognition received as a result of the affiliation is essential for growth. In return, this growth will substantially contribute to the economic health of the area.

Therefore, we sincerely ask your consideration and approval of this legislation.●

(By request of Mr. ROBERT C. BYRD, the following statement was ordered to be printed in the RECORD:)

● Mr. HOLLINGS. Mr. President, I am pleased to rise in support of S. 146. This legislation would authorize the Secretary of the Interior to take the necessary steps to assist in the preservation of the nationally significant resources associated with the town of Camden, S.C.

The 18th-century town of Camden occupies an important place in the development of South Carolina and the military operations in the South during the American Revolution. Historic Camden's location along major transportation routes and its relation to other settlements made it a trade center of considerable economic and commercial importance in 18th-century southern colonial development. The townsite was laid out by 1774 on a rectangular grid pattern by Joseph Kershaw, the major contributor to the founding and growth of Camden. The settlement consisted of small frame structures, with the notable exception of Kershaw's house, which was apparently patterned after a large Charleston house.

The British occupied Camden in 1780–81 during the Revolution. They constructed five redoubts, fortified the powder magazine and jail, and palisaded the community and the Kershaw house. The most intense military activity included the nearby battles of Camden and Hobkirk's Hill and the related battles at Ninety Six, Cowpens, and Kings Mountain. The colonial Generals Horatio Gates, Nathaniel Greene, Baron Johann DeKalb, and the British Charles Lord Cornwallis are among the primary military leaders associated with the town. The British retreated in May 1781, burning the palisaded town in an effort to minimize the site's strategic value. The fall of Camden as a British stronghold was pivotal to the eventual defeat of the British.

Few vestiges of the once active town remained after the British departure, and the town was rebuilt to the north after the Revolution. Today, the main features of the historic Camden area include the site of the 1780–81 Revolutionary War community and several reconstructions—two redoubts (small earthen forts), a powder magazine, wooden palisades, and the Kershaw house (Cornwallis house). The combination of palisades and redoubts is notable as a unique defense system surrounding the frontier community during the Revolution.

Mr. President, historic Camden was nominated to the National Register of Historic Places in 1969 and listed as nationally significant. S. 146 would authorize the Interior Secretary to enter into cooperative agreements with the Camden Historical Commission and other organizations to aid in the protection and restoration of this historic area. The Senate Committee on Energy and Natural Resources unanimously reported this legislation and I urged its adoption.●

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, I believe this has been cleared with the minority. Let me put the request.

The PRESIDING OFFICER. The majority leader.

INDEPENDENT SAFETY BOARD ACT AMENDMENTS OF 1981

Mr. BAKER. Mr. President, I ask that the Chair lay before the Senate the message from the House of Representatives on S. 1000.

The PRESIDING OFFICER laid before the Senate the following messages from the House of Representatives:

Resolved, That the bill from the Senate (S. 1000) entitled "An Act to amend the Independent Safety Board Act of 1974 to provide authorizations for appropriations, and for other purposes", do pass with the following amendments:

Strike out all after the enacting clause, and insert: That this Act may be cited as the "Independent Safety Board Act Amendments of 1981".

INDEPENDENT SAFETY BOARD AUTHORIZATION OF APPROPRIATIONS

SEC. 2. Section 309 of the Independent Safety Board Act of 1974 (49 U.S.C. 1907) is amended by adding at the end thereof the following new sentence: "There are authorized to be appropriated for the purposes of this Act not to exceed $18,540,000 for the fiscal year ending September 30, 1981, $19,925,000 for the fiscal year ending September 30, 1982, and $22,100,000 for the fiscal year ending September 30, 1983, such sums to remain available until expended.".

PRIORITY OF BOARD INVESTIGATIONS

SEC. 3. Section 304(a)(1) of the Independent Safety Board Act of 1974 (49 U.S.C. 1903 (a)(1)) is amended by inserting before "The Board may request" the following new sentences: "Any investigation of an accident conducted by the Board under this paragraph (other than subparagraph (E)) shall have priority over all other investigations of such accident conducted by other Federal agencies. The Board shall provide for the appropriate participation by other Federal agencies in any such investigation, except that such agencies may not participate in the Board's determination of the probable cause of the accident. Nothing in this section impairs the authority of other Federal agencies to conduct investigations of an accident under applicable provisions of law or to obtain information directly from parties involved in, and witnesses to, the transportation accident. The Board and other Federal agencies shall assure that appropriate information obtained or developed in the course of their investigations is exchanged in a timely manner.".

REPORTING OF AVIATION INCIDENTS

SEC. 4. Section 304(a)(6) of the Independent Safety Board Act of 1974 (49 U.S.C. 1903 (a)(6)) is amended by inserting "and aviation incidents" immediately after "accidents".

EXAMINATION AND TESTING OF PHYSICAL EVIDENCE

SEC. 5. Section 304(b)(2) of the Independent Safety Board Act of 1974 (49 U.S.C. 1903 (b)(2)) is amended—

(1) by inserting immediately before the period at the end of the first sentence the following: ", including examination or testing of any vehicle, rolling stock, track, or pipeline component or any part of any such item when such examinaton or testing is determined to be required for purposes of such investigation. Any examination or testing shall be conducted in such manner so as not to interfere with or obstruct unnecessarily the transportation services provided by the owner or operator of such vehicle, rolling stock, track, or pipeline component, and shall be conducted in such a manner so as to preserve, to the maximum extent feasible, any evidence relating to the transportation accidents, consistent with the needs of the investigation and with the cooperation of such owner or operator"; and

(2) in the last sentence, by inserting ", examination, or test" immediately after "inspection" each place it appears.

RESPONSE TO BOARD RECOMMENDATIONS

SEC. 6. Section 307 of the Independent Safety Board Act of 1974 (49 U.S.C. 1906) is amended by inserting "(a)" immediately after "SEC. 307." and by adding at the end thereof the following new subsection:

"(b) The Secretary shall submit a report to the Congress on January 1 of each year setting forth all the Board's recommendations to the Secretary during the preceding year regarding transportation safety and a copy of the Secretary's response to each such recommendation.".

Amend the title so as to read: "An Act to amend the Independent Safety Board Act of 1974 to authorize appropriations for fiscal years 1981, 1982, and 1983, and for other purposes.".

Mr. BAKER. Mr. President, I move that the Senate concur in the House amendments.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Tennessee.

The motion was agreed to.

PROGRAM

Mr. BAKER. Mr. President, on tomorrow the Senate will convene at 9 a.m. After the recognition of the two leaders under the standing order, four Senators will be recognized on special orders of not to exceed 15 minutes each.

After the time allocated for the recognition of Senators on special orders, there will be a brief period for the transaction of routine morning business to extend not past the hour of 10:30 a.m.

At 10:30 a.m. the Senate will resume consideration of the pending measure, the Foreign Assistance Act, at which time the Hatch amendment will be the pending amendment.

It is anticipated, Mr. President, that tomorrow will be an active day, and, being Thursday, Senators are on notice that it may possibly be a late day.

It is the hope of the leadership that tomorrow final passage can be obtained on the Foreign Assistance Act.

After that, Mr. President, it is the hope of the leadership that we may proceed to the consideration of the Emergency Petroleum Allocation Act, and, the Senate agreeing, it is the intention of the leadership to proceed to the consideration of the Interior appropriations bill sometime during the day on Friday.

Mr. President, there will be other requests made in the course of the transaction of the business of the Senate tomorrow to further arrange the schedule of the Senate, including, perhaps, the small business amendments and other matters that are in the clearance process at this time, which I hope to be able to announce on tomorrow.

RECESS UNTIL 9 A.M. TOMORROW

Mr. BAKER. Mr. President, if there is no further business to come before the Senate, I move, in accordance with the order previously entered, that the Senate stand in recess until 9 a.m.

The motion was agreed to; and at 6:05 p.m. the Senate recessed until Thursday, October 22, 1981, at 9 a.m.

NOMINATIONS

Executive nominations received by the Senate October 21, 1981:

DEPARTMENT OF JUSTICE

Joseph P. Russoniello, of California, to be U.S. attorney for the northern district of California for the term of 4 years vice G. William Hunter, resigning.

James M. Rosenbaum, of Minnesota, to be U.S. attorney for the district of Minnesota for the term of 4 years vice Thomas K. Berg, resigned.

Philip N. Hogen, of South Dakota, to be U.S. attorney for the district of South Dakota for the term of 4 years vice Terry L. Pechota, resigned.

IN THE ARMY

The following-named Judge Advocate General Corps officer for appointment in the Regular Army of the United States, to the grade indicated under the provisions of title 10, United States Code, section 624 and section 601(a), Defense Officer Personnel Management Act.

JUDGE ADVOCATE GENERAL CORPS

To be brigadier general

Col. Donald Wayne Hansen, [redacted], Judge Advocate General Corps, U.S. Army.

IN THE NAVY

The following-named temporary lieutenant commanders of the U.S. Navy for permanent promotion to the grade of lieutenant commander in the Medical Service Corps, pursuant to section 611(a) of the Defense Officer Personnel Management Act (Public Law 96-513) and title 10, United States Code, section 624 as added by the same act, as

applicable, subject to qualifications therefor as provided by law:

Bennett, Alan H.	Garrett, James M.
Berube, Richard P.	Haslam, Garth S.
Brodsky, Stephen M.	Holm, Dale L.
Brown, Harold T., Jr.	Jones, Robert G.
Brown, William E.	Libby, Earle S.
Brunelle, David M.	Miller, Stanley C.
Cruit, Carlton D.	Otlowski, Richard
Cunningham, David W.	Pierce, Charles R.
Diamond, David	Poppell, Gordon H., Jr.
Erichsen, Michael E.	Powell, Cecil D.
Farnham, Willard H.	Rasnick, Lannes B.
Finn, Robert F. M.	Ruby, Perry M., Jr.
Franklin, Kenneth W.	Shannon, Patrick A.

IN THE MARINE CORPS

The following-named temporary disability retired officer for reappointment to the grade of chief warrant officer (W-2) in the U.S. Marine Corps, pursuant to title 10, U.S. Code, section 1211, subject to the qualifications therefor as provided by law:

Rauch, Floyd A., Jr.

CONFIRMATIONS

Executive nominations confirmed by the Senate October 21, 1981:

DEPARTMENT OF STATE

Thomas R. Pickering, of New Jersey, a Foreign Service officer of the class of Career Minister, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Federal Republic of Nigeria.

Alan M. Hardy, of Virginia, a Foreign Service officer of Class 1, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Equatorial Guinea.

David Charles Miller, Jr., of Maryland, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the United Republic of Tanzania.

The above nominations were approved subject to the nominee's commitments to respond to requests to appear and testify before any duly constituted committee of the Senate.

THE JUDICIARY

William L. Garwood, of Texas, to be U.S. circuit judge for the fifth circuit.

Hayden Wilson Head, Jr., of Texas, to be U.S. district judge for the southern district of Texas.

James R. Nowlin, of Texas, to be U.S. district judge for the western district of Texas.

H. Franklin Waters, of Arkansas, to be U.S. district judge for the western district of Arkansas.

DEPARTMENT OF JUSTICE

Joe D. Whitley, of Georgia, to be U.S. attorney for the middle district of Georgia for the term of 4 years.

Dan K. Webb, of Illinois, to be U.S. attorney for the northern district of Illinois for the term of 4 years.

Ronald E. Meredith, of Kentucky, to be U.S. attorney for the western district of Kentucky for the term of 4 years.

P. A. Mangini, of Connecticut, to be U.S. marshal for the district of Connecticut for the term of 4 years.

Robert W. Foster, of Ohio, to be U.S. marshal for the southern district of Ohio for the term of 4 years.

Ralph L. Boling, of Kentucky, to be U.S. marshal for the western district of Kentucky for the term of 4 years.

DEPARTMENT OF COMMERCE

Donald James Quigg, of Oklahoma, to be Deputy Commissioner of Patents and Trademarks.

NATIONAL CREDIT UNION ADMINISTRATION

Edgar F. Callahan, of Illinois, to be a Member of the National Credit Union Administration Board for the term expiring August 2, 1987.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Public Health Service nominations beginning Kenneth S. Brown, to be Medical Director, and ending Robert P. Nugent, to be Senior Assistant Health Services Officer, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD on January 5, 1981.

HOUSE OF REPRESENTATIVES—*Wednesday, October 21, 1981*

The House met at 10 a.m.

Rev. Dr. Mark S. Anschutz, D.D., rector, Christ Church, Alexandria, Va., offered the following prayer:

Almighty God, bless this bright land that Thou hast lifted between the seas: Her lonely wilds, her rich earth beneath our feet, her pulsing rivers, her splendid heights, the teeming cities and quiet villages of her landscape.

Bless Lord God this body of persons assembled. Give them minds and hearts this day and always which will allow them to wisely apply the fairness of the freedom we proclaim in this land. Let the laws they will create this day enshrine and reflect your laws and be a mark of Your love on every citizen of this land. Inspire with vision every Member of this council that in seeking Your truth they may be purified, this Republic may be strengthened and Thy glory done.

Inspire us with respect for the dignity of every citizen of this land and especially those who it would be easy to forget, the poor, the homeless and destitute, the old and the sick, and all who have none to care for them. Set us not on selfish paths Lord God, but on Your high purposes, that we may heal all those who are broken in body or spirit and turn their sorrow into joy.

And finally, Lord God, lest we forget look down and visit the families of those elected to this body—the spouses and children and grandchildren of this assemblage. Be Thou their guide and their strength this day and evermore, for it is into Thy care that we entrust them and we pray that Thy love would encompass them and guide them. All of this and so much more we say in the name of our Creator God. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed without amendment a joint resolution of the House of the following title:

H.J. Res. 268. Joint resolution to designate October 23, 1981, as "Hungarian Freedom Fighters Day."

REV. DR. MARK S. ANSCHUTZ

(Mrs. SCHROEDER asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. SCHROEDER. Mr. Speaker, I am terribly honored today that the gentleman who gave the prayer is the gentleman whose church the Schroeder family attends when we are in Washington on weekends. Obviously, the church is not in Washington; it is in Alexandria, as you heard, and it is a very historic church, George Washington attended it. I am terribly honored to have Reverend Anschutz and his family with us today.

I was trying to think what I could say to introduce him, and I decided to do more of a feminine type of introduction. He has got all of the wonderful credentials that we always cite when we introduce people like him, so I am not going to use my 1 minute to cite them. I am going to say that here is a man who has carried on a very human ministry in a historic church, here is a man who cares very much about his family, and shows it every day in many ways.

He has done some marvelous, marvelous sermons jointly with his father in the pulpit, a very moving intergenerational type thing. He cares about sailing, he cares about the outdoors, he cares about urban ministry and I think he does something that all of us should emulate, and that is he cares much more about substance than he does about form.

He is a very good role model for all of us, and I think it is a great honor to have him here in this historic House as he comes from his historic pulpit with a very, very human, human approach to life and his ministry we can all learn from.

IRA TERROR

(Mr. SHANNON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SHANNON. Mr. Speaker, in the last month, we have heard reports from Britain and from Ireland that the men of the IRA are once again on the march. Every time they wire a family car to explode; every time they rig a nail bomb to go off in front of a neighborhood grocery store, the recruits of the present-day Irish Republican Army boast of belonging to a proud tradition. They dare to compare themselves to the Irish Republicans of the past, to the men of the rising of 1798 and Easter, 1916. They call themselves an army, but the soldiers they fight so bravely are children unlucky enough to be playing on a sidewalk the IRA has claimed as a bombsite. Because these men have taken the name of the Republican heroes of Ireland's past does not make them heroic. Is murder in cold blood heroic? Is terrorism brave?

The IRA boasts about having financial support from U.S. citizens. It may be that Irish Americans contributed money out of sympathy for the families of Maze Prison inmates, but Americans do not support the violence and anarchy that the IRA stands for.

The IRA has stated, again and again, its goal of spreading terror and chaos in Britain and in Northern Ireland, and of overthrowing the democratic government of the Republic of Ireland. The Irish Nationalists of the past fought to establish a democratic Ireland. A terrorist IRA is a blasphemous insult to their memory.

Americans who support the cause of peace and reconciliation in all Ireland must recognize the recruits of today's IRA for what they are—men who are dedicated to destruction, not to peace, not to the old dream of an Irish Republic.

There are men and women in Northern Ireland and in the Republic today who are working constantly to inspire peace, and a final resolution to the long years of destruction. They are the heirs of the Nationalist tradition. The history of Ireland's struggle can never be represented by an army that fights innocent bystanders. The real courage and honor is preparing for justice, and a lasting peace for all Ireland.

IRA TERRORISM AND VIOLENCE

(Mr. FOLEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FOLEY. Mr. Speaker, I join the gentleman from Massachusetts, who just left the well, to condemn unreservedly the new campaign of terrorism and violence conducted by the Irish Republican Army.

As the gentleman from Massachusetts has said, they attempt to link themselves with an earlier tradition of those who fought for Ireland's freedom. They seek to associate themselves with that heritage. But they have no right to such a connection. Those who have committed these

recent acts of violence against the Commandant of the British Royal Marines and against members of the Irish Guards in London, as they have committed acts of violence and murder against members of both communities in Northern Ireland, are criminals and cowards and they should be denounced as such by all right-thinking Americans.

It is time for us as a country to speak up to those who have misguidedly supported this errant so-called cause and reject absolutely the course of the bullet and the bomb.

I repeat: They are criminals. They are not patriots. They are cowards. They are not soldiers. And those whose evil hand again takes the lives of innocent people in Britain or in Ireland or anywhere else need the unreserved condemnation of every American.

PERMISSION FOR COMMITTEE ON HOUSE ADMINISTRATION TO SIT TODAY DURING 5-MINUTE RULE

Mr. HAWKINS. Mr. Speaker, I ask unanimous consent that the Committee on House Administration be allowed to sit today while the House is considering H.R. 3603 under the 5-minute rule.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

PERMISSION FOR COMMITTEE ON SMALL BUSINESS TO SIT TOMORROW AT 12 O'CLOCK DURING 5-MINUTE RULE

Mr. MITCHELL of Maryland. Mr. Speaker, I ask unanimous consent that the Committee on Small Business be allowed to sit tomorrow at 12 o'clock while the House will probably be under the 5-minute rule.

The SPEAKER. Is there objection to the request of the gentleman from Maryland?

There was no objection.

A SHRINKING ICE PACK AND THE IMPORTANCE OF SCIENTIFIC RESEARCH

(Mr. AKAKA asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. AKAKA. Mr. Speaker, if we believe reports in the Washington Post, scientists tell us that the ice pack covering Antarctica is melting at the rate of nearly 1 million square miles every 10 years. This could be the first physical evidence of the global warming trend that scientists have been predicting for years. A shrinking ice pack means that the level of the oceans will rise at a rate of about one-half inch per year. Scientists predict that this could cause flooding of low-lying coastal areas of the world in the years to come.

This warning of long-term impending disaster should cause President Reagan to think about the importance of scientific research. Instead of cutting major research programs across this country, we should fund them at a level commensurate with our need to know about the world in which we live. Although this need is hardly as pressing as the need for national defense, nonetheless, it is a very real need. I urge my colleagues to support our programs of scientific research in this country, so at least we know when we are going to be under water.

ITALY: A COUNTRY SHAPED BY MAN

(Ms. FERRARO asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. FERRARO. Mr. Speaker, last night, I had the distinct honor of presiding at the opening of an art exhibit entitled, "Italy: A Country Shaped by Man." This million-dollar exhibition was made possible by the sponsorship of the Turin-based Giovanni Agnelli Foundation and represents the foundation's ongoing program to promote activities designed to enhance cultural and ancestoral ties of Italian Americans to Italy and to improve American understanding of Italian culture and history.

The exhibition is a splendid display of ancient Italian artifacts, and early and contemporary photographs of Italian life. Some of the artifacts have never before been on public display outside of Italy including the 16th-century "Illuminated Book of Antiquities of the Ancient City of Tivoli." The exhibit is praiseworthy for its use of images and music to convey the values of a country with a long history of creativity and craftmanship in the arts and I am certain that it will be well appreciated by all who share a love of Italy and for the arts.

I highly recommend this beautiful exhibit to my colleagues and would like to express deep appreciation to the Giovanni Agnelli Foundation for making this event possible.

H.R. 4407 DESIGNED TO COUNTERACT CANADIAN PROTECTIONIST POLICIES

(Mr. SCHULZE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SCHULZE. Mr. Speaker, Canada's national energy program is a prime example of the protectionist policies which my bill, H.R. 4407, is designed to counteract.

Under the NEP the Canadian Government intends to increase Canadian ownership in the oil and gas industry, largely at the expense of American companies and investors. Non-Canadian firms will be denied grant incentives for exploration and development at the same time that the Canadian Government eliminates depletion allowances which have benefited all firms equally regardless of nationality.

In addition, the NEP will severely limit the access of non-Canadian firms to the oilfields in the Northwest and Yukon Territories as well as in the offshore areas. These preferences arbitrarily depress the value of the U.S. assets in Canada, thereby allowing the acquisition of those assets by Canadian firms at "fire sale" prices. The injury to literally millions of U.S. stockholders is incalculable.

IS THE TAIL WAGGING THE DOG? WATT'S THE DIFFERENCE

(Mr. DANNEMEYER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DANNEMEYER. Mr. Speaker, earlier this week, petitions were presented to Congress calling for the removal of Interior Secretary James Watt. While a million signatures may seem impressive, we do ourselves a disservice if we read them as representative of the American public.

After reexamining a Gallup poll of June 1981, I wonder whether the tail is wagging the dog. Gallup found that:

By a 48-39 percent margin the public favors easing restrictions on strip mining to provide more coal;

A sizable 75 to 19 percent agree with a policy of increasing oil exploration and other commercial uses of Federal lands, excluding, of course, national parks;

A similar proportion (73-20 percent) favor spending money to improve existing parks before new land acquisitions; and

Fully 70 percent of the public, with only 22 percent dissenting, believe that the area available for offshore oil drilling should be enlarged.

All of these policies are the very practices used by sponsors of the petition drive to attack James Watt. While the tail is indeed attempting to wag the dog, opponents of James Watt and his policies are barking up the wrong tree.

HOMEBUILDERS, INTEREST RATES, AND THE GOLD STANDARD

(Mr. SILJANDER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SILJANDER. Mr. Speaker, last week, the Michigan chapter of the National Association of Homebuilders held a press conference which I attended to focus attention on high interest rates and the policy of the Federal Reserve. Keys were sent by citizens from each corner of the State of Michigan asking that the Federal Reserve "unlock the economy."

The homebuilders' message is all too true. High interest rates have hurt every American, but especially the housing industry and the residents of Michigan, the State with the worst economic climate in the country.

However, the cause of high interest rates is not a tight monetary policy. And the solution is not loose money. The problem is the Federal Reserve itself. As history has painfully shown, it is incapable of producing a consistent monetary policy.

This is the key to the high-interest-rate problem. It is made of gold. Only a return to the gold standard and the discipline it brings will convince Americans that an end to inflation is in sight, and interest rates will finally be lowered, and America can once again prosper.

A VIETNAM VETERANS RECOGNITION DAY

(Mr. BONER of Tennessee asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BONER of Tennessee. Mr. Speaker, recently in my hometown of Nashville, Tenn., the city held a massive rally honoring Vietnam veterans. Fifteen thousand people, including more than 300 Vietnam veterans, were in attendance and two former prisoners of the Vietnam war were honored with medals from the city.

Mr. Speaker, I think that this rally did more to put the horrors of that war behind us for our community than anything else that has been done thus far. The support and the enthusiasm of the citizens for the veterans made it clear to many of the veterans that the Vietnam war is finally over for them.

Many of these veterans explained to me their concerns and their fears that they were perceived by many as outcasts or as victims who served in an immoral war. This rally showed them that this is not true, at least in Nashville. They were honored for their service to their country and were shown by thousands that their service was not forgotten and was appreciated.

Mr. Speaker, I would urge that cities all across the country hold the same kinds of Vietnam veterans recognition days in their communities as we did in Nashville. It would be good for the communities, good for the veterans, and good for the Nation, and I am proud to have been a part of one held in Nashville.

Thank you, Mr. Speaker.

FOOD AND AGRICULTURE ACT OF 1981

Mr. DE LA GARZA. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill (H.R. 3603) to provide price and income protection for farmers, assure consumers an abundance of food and fiber at reasonable prices, continue food assistance to low-income households, and for other purposes.

The SPEAKER. The question is on the motion offered by the gentleman from Texas (Mr. DE LA GARZA).

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. WALKER. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 386, nays 2, not voting 45, as follows:

□ 1030

Mr. KRAMER changed his vote from "nay" to "yea."

So the motion was agreed to.

The result of the vote was announced as above recorded.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill, H.R. 3603, with Mr. McHUGH in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. When the Committee of the Whole rose on Tuesday, October 20, 1981, title X was open to amendment at any point.

Are there any amendments to title X?

AMENDMENT OFFERED BY MR. GLICKMAN

Mr. GLICKMAN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. GLICKMAN: On page 77, insert the following new section after line 2:

"(A) not less than 85 per centum of the estimated amount in the revolving fund for any fiscal year shall be made available for the purposes provided in clause (A) of paragraph (1) of this subsection; and

"(B) not to exceed 25 per centum of the estimated amount in the revolving fund for any fiscal year shall be made available for the financing of credit sales to any one country for the purposes described in paragraph (1) of this subsection.

"(4) There are authorized to be appropriated to the Commodity Credit Corporation Revolving Fund for Export Development and Expansion such sums as Congress shall deem necessary to carry out the provisions of this subsection. All funds received by the Corporation in payment for credit extended by the Corporation using the revolving fund, including interest or other receipts on investments and credit obligations, in financing export sales of the type specified in paragraph (1) of this subsection shall be added to and become a part of such revolving fund.

"(5) The Secretary shall submit an annual report to Congress not later than December 1 of each year with respect to the use of the revolving fund in carrying out export credit sales by the Corporation in the previous fiscal year. Such report shall include the names of the countries extended credit under such programs, the total amount of such credit in the case of each such country in such fiscal year, names of such U.S. organizations whose exports are supported through the use of the fund and the total amount of credits provided to each such organization, and a discussion and evaluation of the market development and expansion activities of the Corporation under this subsection during such fiscal year. The first such report shall be submitted to Congress not later than December 1, 1982.

"(6) The revolving fund created by this subsection is abolished effective October 1, 1985, and all unobligated money in such fund on September 30, 1985, shall be transferred to and become part of the miscellaneous receipts account of the Treasury.

"(7) The authority provided under this subsection shall be in addition to, and not in place of, any authority granted to the Secretary or the Corporation under any other provision of law."

"(8) The authority provided by this subsection to incur obligations to make loans shall be effective only to the extent that such obligations do not exceed annual limitations on new direct loan obligations which shall be provided in annual appropriations Acts.".

SEC. 1012. Section 4 of the Food for Peace Act of 1966 (7 USC 1707a) is amended by adding at the end thereof the following new subsection (d):

"(d)(1) There is hereby established in the Treasury a revolving fund to be known as the Commodity Credit Corporation Revolving Fund for Export Market Development and Expansion, which shall be available without fiscal year limitation for use by the Commodity Credit Corporation (hereinafter referred to in this subsection as the 'Corporation') for financing in accordance with this section and section 5(f) of the Commodity Credit Corporation Charter Act (15 U.S.C. 714c)—

"(A) commercial export sales of United States agricultural commodities out of private stocks or stocks owned or controlled by the Corporation on credit terms of not to exceed three years;

"(B) export sales of United States breeding animals (including, but not limited to, cattle, swine, sheep, and poultry), including the cost of freight from the United States to designated points of entry in other nations; and

(C) the establishment of facilities in importing countries to improve the capacity of such countries for handling, marketing, processing, storing, or distributing fungible agricultural commodities produced in and exported from the United States (through the use of local currency generated from the sale of United States agricultural commodities).

"(2) The Corporation shall use the revolving fund only to extend credit for purposes of market development and expansion and only where there is substantial potential for developing or enhancing regular commercial markets for United States agricultural commodities.

"(3) The Secretary of Agriculture shall ensure that the revolving fund is used in such a manner as to involve equitable use of the funds to finance sales to the greatest feasible number of countries consistent with maximizing market opportunities. In carrying out this objective, the Secretary shall establish procedures under which—

Mr. GLICKMAN (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Kansas?

There was no objection.

Mr. GLICKMAN. Mr. Chairman, I offer this amendment on behalf of the gentleman from Missouri (Mr. SKELTON), the gentleman from Texas (Mr. STENHOLM), the gentleman from Indiana (Mr. FITHIAN), the gentleman from Nebraska (Mr. BEREUTER), the gentleman from New York (Mr. CARMAN), and several other people who have indicated an interest in expanding our agricultural exports.

Mr. Chairman, let me just explain this amendment briefly. This amendment will provide authority for a Commodity Credit Corporation revolving fund for export development and expansion. It authorizes no appropriation, so there is no cost and it sunsets itself at the end of this farm bill, or 3½ years.

The purpose of the amendment is to deal with the issue of maintaining our leadership in farm exports. Current law allows the CCC, the Commodity Credit Corporation, to provide direct export authority to foreign buyers of U.S. agricultural commodities.

During both the Carter and Reagan administrations, however, direct loans have been phased out in favor of privately financed loans backed by CCC loan guarantees. As a result, the overall activity of the CCC loan guarantee was dramatically reduced.

Mr. Chairman, to try to expedite matters, what we are concerned about with here is that other exporting nations have been offering increasingly attractive and preferential financial arrangements for exports. Brazil, one of the chief importers of U.S. wheat, has begun to buy Canadian wheat because of more generous credit terms. The irony is that the Canadian wheat is more expensive and must be shipped a longer distance.

Losses of other exports have developed because of what I call no unified financing tool.

In 1979 the U.S. exports of raw cotton amounted to 98 percent of Korea's cotton purchases. Due to the lack of available credit, the U.S. share of the market dropped to 73 percent by early 1981, for a loss of $150 million in export sales.

We cannot afford to let our export success slide due to credit inadequacy. An ominous trend is developing in agricultural exports. It is true that the last 2 years have been wonderful in increased exports, but the Agriculture Department estimates that little or no growth will occur in fiscal year 1982. There are even more depressing statistics about agricultural export prospects in future years.

In 1979 we had substantial increases in exports. With farm prices weaker than they have been in decades, this decline in growth is serious, indeed.

We have introduced the revolving fund amendment to turn this situation around. It does not provide for a subsidy. The interest rate is competitive with commercial rates, but it does provide a central credit place for market expansion and development for U.S. agricultural commodities of all types, feed stocks, animals, food, fiber, what-

ever, to develop and expand existing export markets.

Mr. SKELTON. Will the gentleman yield?

Mr. GLICKMAN. I would be glad to yield to the gentleman from Missouri.

Mr. SKELTON. Mr. Chairman, I commend the gentleman from Kansas on his work on this amendment of which I am pleased to cosponsor, the Glickman-Skelton-Stenholm amendment to the farm bill. As the gentleman knows, during the last two sessions of Congress, I have introduced legislation which would, like this amendment, establish a revolving fund to finance short-term export credit sales of agricultural commodities. In both years, I have been gratified by the support my bills have received—from my colleagues here in the House and from farmers and farm organizations around the country. The American Soybean Association, the National Association of Wheat Growers, the National Corn Growers Association, the U.S. Feed Grains Council, the U.S. Wheat Associates, the American Farm Bureau Federation, and the National Grange are just a few of the major groups representing farmers which have endorsed an export credit revolving fund. Secretary of Agriculture John Block has also indicated his support of the concept of the revolving fund. He did so in an Associated Press article which followed the introduction of my bill, and he confirmed this view when he appeared with me on a TV interview program.

No one can dispute the fact that the export of agricultural products has been a bright spot in our economy in recent years. But while we are giving ourselves a pat on the back, we should pause to consider the fact that we are in no way reaching our potential in this area. Nor is there any guarantee that we can even maintain our current level of performance. This is a highly competitive area and our competition has adopted aggressive marketing tactics. We must have the tools to meet this competition and to maintain and expand our agricultural export markets.

Our current program of loan guarantees for agricultural export credit works fine for some nations, but many others, for a variety of reasons, prefer direct credit. They must turn elsewhere, to nations which offer more attractive financing terms. These financing terms are often enough to tip the balance in favor of a competitor nation and allow them to capture the export market despite other advantages offered by purchasing from the United States.

The Commodity Credit Corporation revolving fund for export development and expansion, created by the Glickman-Skelton-Stenholm amendment, would give us needed flexibility in the agricultural export area. It would be available for short-term financing of commercial export sales of U.S. agricultural products, export sales of U.S. breeding animals, and the establishment of facilities in importing countries to improve the capacity of such countries for handling, marketing, processing, storing, or distributing U.S. agricultural commodities. Its purpose is to enable our Nation to develop and expand commercial markets for U.S. agricultural commodities. It will help us realize our vast, untapped potential in this area.

Mr. Chairman, farm exports are vital to our entire economy. They are the most important factor on the positive side of our balance of trade, they provide jobs, and they bolster market prices for farmers without adversely impacting food prices or requiring direct Government payments.

Unfortunately, the budget will not allow us to put money in the revolving fund created by this amendment this year. However, I believe it is still vital to get the mechanism on the books. When the budgetary situation does permit us to make it fully operational, I am confident that the CCC revolving fund for export development and expansion will prove to be a sound investment for the Nation and will pay for itself many times over. I strongly urge approval of the Glickman-Skelton-Stenholm amendment.

Mr. GLICKMAN. I thank my colleague. He has played a great leadership role in this area. I appreciate his help.

Mr. Chairman, I yield to my colleague, the gentleman from Missouri (Mr. VOLKMER).

□ 1045

Mr. VOLKMER. I, too, wish to commend the gentleman from Kansas, in the well, for his leadership in making sure we have continued growth in our exports of agricultural commodities, and also the gentleman from Missouri (Mr. SKELTON) for his efforts in the past as a member of the Agriculture Committee, and his continued interest in agriculture in the United States. I just want to recommend that everyone vote "aye" on this amendment.

Mr. GLICKMAN. In conclusion, Mr. Chairman, I just say the following things:

The current method of financing export expansion is not satisfactory. A similar amendment is placed in the Senate bill by Senator HELMS. This amendment is supported by the National Governors Association as well as all major farm groups. We have not appropriated any dollars into the revolving fund because of budgetary problems. That will be up to the Appropriations Committee. And we sunset this fund in September 1985, which means that if there are any moneys left in the fund they will revert to the Treasury. We will see how it works.

Mr. BOWEN. Mr. Chairman, will the gentleman yield?

Mr. GLICKMAN. I yield to the gentleman from Mississippi.

The CHAIRMAN. The time of the gentleman has expired.

(On request of Mr. BOWEN and by unanimous consent, Mr. GLICKMAN was allowed to proceed for 2 additional minutes.)

Mr. BOWEN. Mr. Chairman, I would like to commend the gentleman from Kansas (Mr. GLICKMAN) for offering this amendment. A number of us have cosponsored similar language in other bills. For example, on the cotton and rice legislation which I introduced that we considered before the Committee on Agriculture, we had a revolving export credit fund. We agreed in the committee that rather than having a series of separate approaches, we needed one unified bill that would apply to all the commodities of American agriculture. I am very pleased that the gentleman from Kansas is offering that bill.

We need this competitive tool very badly. It will not cost the American people money. It will pay for itself and be self-renewing. It is the most dynamic instrument that I think we could find at this time to get the prices of American agricultural commodities up by providing the credit that foreign buyers need in order to purchase our agricultural surpluses.

I urge its approval.

I thank my colleague. He has shown great leadership in the area.

Mr. ROBERTS of Kansas. Mr. Chairman, will the gentleman yield?

Mr. GLICKMAN. I yield to my colleague, the gentleman from Kansas.

Mr. ROBERTS of Kansas. Mr. Chairman, I would like to echo the sentiments of my colleagues and also congratulate my friend and colleague from Kansas (Mr. GLICKMAN). I am an early cosponsor of similar legislation.

I want to say something in regard to the gentleman's comment about aggressively seeking these exports and the fact that we are doing better. But if we adjust for inflation, if we simply adjust for inflation in terms of the so-called record exports that we read about in the press, you will find that they really are not what they were back in 1976. This is a valuable tool that we need to increase our exports in real terms.

Yesterday we spent a great deal of time talking about the problem that we are exporting our farm products below the cost of production. I think it was agreed upon by this House it was a good idea but the wrong vehicle. This is a good vehicle. The exportation of agricultural commodities is one of our few economic success stories of the decade of the 1970's. Agricultural

trade continues to be a source of strength to the entire economy of this country and has done more than any other action to prevent our perennial trade deficit from growing larger. In 1979, the U.S. agricultural trade surplus was $15 billion. By 1980, it had increased to $23 billion. This year it is projected to be over $30 billion.

The export credit revolving fund would provide a much-needed source of short-term credit. Currently, financing of export sales is made through the GSM-5 program and the Public Law 480 program. Both have been very successful. There is a need, however, to develop an international credit program to bridge the gap between commercial financing and the GMS-5 program and long-term credit that is available under Public Law 480. The export revolving credit fund would provide for the establishment of a fund for the development of exports to nations which have a need for short-term credit but are unable to obtain credit through normal commercial channels.

This type of legislation is necessary to provide U.S. exports with a competitive edge in the development and opening of new markets in the developing nations of the Third World. The potential market for U.S. farm products in the developing nations is virtually limitless, but only if we provide a source of short-term credit. If commercial sales to our traditional markets dropped by 10 percent, sales to developing nations could help offset this trade loss. The Third World's need for American farmer's grain is nearly limitless. The only hindrance has been the lack of short-term credit.

We have spent many days debating this omnibus farm bill. Much of the debate has centered on the production of reasonably priced food and fiber for the consumer. However, Mr. Chairman, I would maintain that wheat producers in my district do not want to rely on Government loans and programs to make up the difference between market prices and production costs while food shortages continue to force millions of people to remain undernourished. They would rather produce, export, and receive a decent price for their product.

Secretary of Agriculture John Block, when he spoke before our Agriculture Committee in March of this year made the following statement:

> We need to assure that agricultural exports, which have become so vital to this Nation's economy, will continue to be able to expand despite the difficult financial conditions many foreign countries are experiencing today.

The demand for grain exists in the overseas markets: it therefore becomes increasingly important that we make every effort to stimulate an expansion in exports. The export revolving credit fund is an appropriate effort by this Congress and administration to return the farmer to prosperity.

Some of my colleagues may attack this provision as being a subsidy for agriculture and farmers. However, the provision would only put American agriculture on equal footing with governments around the world. The European Common Market subsidizes the wheat it sells for export in the world market. The European Community continues to export subsidized barley that competes directly with U.S. feed grains in Eastern European markets.

The American farmer has just recently paid a terrific price by having 10 years of export development work destroyed by the previous administration's grain embargo. Much work is needed to rebuild the markets, and America's credibility as a reliable source of grain. The inclusion of the export revolving fund in this farm bill will be a major step in the right direction.

Mr. FOLEY. Mr. Chairman, will the gentleman yield?

Mr. GLICKMAN. I yield to my colleague, the gentleman from Washington.

Mr. FOLEY. Mr. Chairman, I want to join the gentleman from Kansas (Mr. ROBERTS) in congratulating the gentleman in the well for offering this amendment.

The budget problems that exist have made it difficult to carry forth the export credit program as far as many of us would like. But I do commend the gentleman for this amendment, which I think is a very positive step forward. I urge my colleagues to support it.

(By unanimous consent, Mr. GLICKMAN was allowed to proceed for 2 additional minutes.)

Mr. BEREUTER. Mr. Chairman, will the gentleman yield?

Mr. GLICKMAN. I yield to my colleague, the gentleman from Nebraska.

Mr. BEREUTER. I thank the gentleman from Kansas for yielding. I think that he and the gentleman from Missouri and the gentleman from Texas and others should be commended for offering this amendment.

Mr. Chairman, I rise in strong support of the Glickman-Skelton-Stenholm amendment to create within the Commodity Credit Corporation a revolving fund to be used for agricultural export market development and expansion. Although current law provides the authority for direct loans by the CCC to foreign purchasers of U.S. agricultural products, that authority has not been fully exercised in recent years as the emphasis has shifted to loan guarantees provided by the CCC, to the severe detriment of our agricultural producers and exporters. I need not remind my colleagues that our agricultural exports are the backbone of the Nation's foreign trade, bringing in over $41 billion last year. Yet we are rapidly falling behind in our ability to compete with other major food-producing nations which offer their producers substantial subsidies and which provide attractive credit terms to their customers. We must be willing to provide credit at reasonable terms and trade assistance to developing world markets if we are to survive in this increasingly competitive environment, and that is precisely what this amendment will do.

I must emphasize the revolving fund nature of this approach. Once appropriated, the fund will be self-sustaining, supporting our agricultural export efforts in the years ahead. The amendment which is before the House represents a sound investment in the strongest sector of our entire export economy.

Mr. Chairman, we frequently hear effusive rhetoric here in the House in great praise and support of agricultural exports. This amendment offers us the opportunity to make good on that rhetoric, with a minimal impact on our efforts to reduce Government spending. The version of the farm bill passed by the other body contains a similar provision authorizing such a revolving fund, and I urge my colleagues to support the Glickman-Skelton-Stenholm amendment.

Mr. WAMPLER. Mr. Chairman, will the gentleman yield?

Mr. GLICKMAN. I yield to my colleague, the gentleman from Virginia (Mr. WAMPLER).

Mr. WAMPLER. Mr. Chairman, I rise in support of this amendment which will establish in the Treasury a revolving fund to be known as the agricultural export credit revolving fund. A similar provision has already been incorporated in S. 884, the farm bill as passed by the Senate.

This fund would finance commercial export credit sales. Since 1956, USDA has used authorities under the Commodity Credit Corporation Charter Act to facilitate expanded markets for U.S. agricultural commodities by offering direct CCC export loans up to 3 years in length to foreign buyers to purchase U.S. commodities. The Agricultural Trade Act of 1978 authorized the Secretary to make intermediate-term loans of between 3 and 10 years in duration to finance the export of breeding livestock, to finance the establishment of reserve stocks, and to finance the construction of infrastructure abroad for expanded usage of U.S. commodities.

Under the Carter administration, the Commodity Credit Corporation's direct export credits program was phased out and supplanted with a loan guarantee program whereby the foreign customer must arrange private financing with our Government guaranteeing such credit in the event of default. Obviously, this step was taken

as a means of making certain that this program did not appear as a budget item with a huge outlay of Federal funds. The Reagan administration has adopted this same viewpoint, as the loan guarantee program is being continued rather than direct export credits.

It is my position that we should proceed with this authorizing legislation so that if, at a later date, our budget problems abate, we can fund and implement this program.

This amendment provides for financing in three modes: First, for commercial export sales of agricultural commodities on credit terms not to exceed 3 years; second, for export sales of breeding stock including cost of freight; and third, for the establishment of facilities in importing countries to improve their capacity to handle, market, process, store, and distribute agricultural commodities.

Additionally, this amendment provides for the equitable use of funds to finance sales to the greatest feasible number of countries. Not less than 85 percent of the funds shall be made available for sale of stocks and not to exceed 25 percent of the estimated amount in the revolving fund shall be made available to any one country. Further, this amendment calls for an annual report and also contains a sunset provision in that the fund is abolished on October 1, 1985. Finally, there is a provision that the fund cannot exceed annual limitations on new direct loan obligations, which shall be provided in annual appropriations acts.

Elimination of the direct loan program really reduces the number of foreign market development tools available, and in today's world we really need to do everything possible to increase our exports. It is our agricultural exports that keep our balance of payments from being a disaster. Approximately one-third of the annual cost of imported petroleum and petroleum products is paid for by our agricultural exports. As is well known, some nations prefer, for a variety of reasons, to borrow directly from CCC rather than dealing with guaranteed loans from private banks.

By the adoption of this amendment, we are signaling to the administration that we are firmly convinced that the export of our farm commodities is all important not only to our farmers but to the Nation, and that as soon as possible this revolving fund should be funded. I know that the majority of agricultural commodity groups favor this amendment and I urge its adoption.

Mr. GLICKMAN. I thank my colleagues. To more completely explain the need for this amendment, I think the following information would be useful:

Recent U.S. policy decisions threaten our ability to maintain our leadership in farm exports. Current law allows the Commodity Credit Corporation to provide direct export credit to foreign buyers of U.S. agricultural commodities. During both the Carter and Reagan administrations, however, direct loans have been phased out in favor of privately financed loans backed by a CCC guarantee. As a result, overall CCC loan activity was dropped dramatically. In 1980, the last year when both CCC direct loans and loan guarantees were in effect, 30 countries requested over $3 billion under the direct loan program. Because of the policy to emphasize loan guarantees over direct loans, the CCC's Office of General Sales Manager tried to persuade the applicants to accept the guarantees. In the end, only seven nations participated in the guarantee program for a total of $700 million out of the $2 billion available. Some 18 nations were still able to receive the direct loans, but only $718 million out of a total of $1.6 billion budgeted was made available.

At the same time, other exporting nations have been offering increasingly attractive financing arrangements. Brazil, one of the chief importers of U.S. wheat, has begun to buy Canadian wheat because of more generous credit terms. The irony is that the Canadian wheat is more expensive and must be shipped a longer distance. The credit terms offered to the Brazilians were simply too attractive to turn down.

Losses of other export sales have occurred as well. In 1979, U.S. exports of raw cotton accounted for 98 percent of Korea's cotton purchases. Due to lack of available credit, the U.S. share of the market dropped to 73 percent by early 1981 for a loss of $150 million in export sales. Losses such as these during times of depressed markets such as now only further reduce the prices farmers can get for their commodity.

We cannot afford to let our export success slide due to credit inadequacy. Agricultural exports make a meaningful contribution to the reduction of our balance of trade deficit. Farm exports for 1981 are projected to reach $44.7 billion this year, according to the Department of Agriculture. But an ominous trend is developing that could dampen our success. The growth in farm exports has stagnated. The Agriculture Department estimates that little or no growth will occur in fiscal year 1982. The most optimistic prediction that can be made is 9 percent. The projection for fiscal year 1981 is nearly as bleak with only a 10-percent increase in export growth, contrasted to that are the stunning increases recorded in prior years. In fiscal year 1980, a whopping 27-percent increase occurred, and a year earlier 19-percent growth was recorded. With farm prices weaker than they have been in decades, this decline in growth is serious indeed.

We have introduced the revolving fund amendment to turn this situation around. The fund would provide short-term credit to facilitate agricultural exports for the purpose of market development and expansion. The credits would be available only where there would be substantial potential for attracting or enhancing regular commercial markets for the United States. Private funding would continue to finance exports to established markets. Principal and interest from repayment of the loans would be returned to the fund for use in making subsequent loans. A one-time appropriation would be required to generate a pool of funds. Thereafter, the fund would be self-sustaining.

This is a straightforward loan program. No subsidy is involved since the loans would be offered at commercial rates.

The credit that would be provided under the revolving fund would be administered much as in the same way as the GSM-5 export credit program did in the past. That direct loan program was phased out in 1980 in favor of loan guarantees. Those direct loans were not subisdized but offered at levels approximately one-half percent below the prime. The interest rate on loan guarantees was and still is slightly higher.

A direct loan program would work very much like any other commercial credit operation. CCC would lend money directly to the exporting entity, a trading firm or a farmer cooperative, which would then export the commodity to the importing nation. The importing nation repays the loan to the CCC.

The GSM-5 direct loan program worked well. No loan forfeitures occurred, although a small number of loans were rescheduled. The direct loans were phased out in favor of loan guarantees since direct loans show up in the budget as outlays while loan guarantees are not scored unless default occurs. As a self-sustaining operation, the revolving fund addresses the budgetary concern without giving up the advantage of a direct loan. As the initial appropriation is depleted, the repayments would make funds available for subsequent loans. The repayments would not be scored under the Budget Act. To insure that Congress is aware of the financial impact of the program, however, the amendment includes a provision that requires an annual level of loanmaking authority to be set.

Congress has further oversight of the fund because of the sunset provision included in the amendment.

The impact of the amendment on the taxpayer is negligible. Since the loans are made at commercial levels, which precludes any subsidy, the fund, in essence, pays for itself. Further, farm exports serve to bolster market prices for farmers without adversely impacting food prices or requiring direct Government payments. With all of the concern that has been expressed over the cost of our farm programs, this approach should be supported as a means of economizing.

Because of this year's budgetary constraints, we have decided not to set a specific funding level in the amendment. The inclusion of the provision in the farm bill is, nonetheless, significant. It indicates to the administration and to purchasing nations our commitment to move ahead aggressively on our export efforts. The Senate shares this sentiment and included a similar provision in its farm bill.

The provision will favorably affect the U.S. position with respect to the upcoming negotiations on export subsidies with other exporting nations. By placing in law an export credit fund that does not involve any subsidy, we are showing good faith to our competitors that exports can be expanded without relying on predatory methods. It also will give our negotiators an upper hand by showing our willingness to utilize this mechanism to encourage this vital export activity. Now that the first phase of the export subsidy reduction talks have been completed, it is that much more important to have the fund in place.

A critical reason exists to include the fund in this bill. A growing number of middle income nations are graduating from the Public Law 480 concessional program and are becoming commercial customers. These include Korea, Taiwan, Brazil, Sierre Leone, and the Sudan. These types of countries preferred the GSM-5, or direct loan program for a number of critical reasons, principally the economies it offered them. While the interest rate on direct loans was nearly the same as for the loan guarantee program, other factors obviously played a key role.

First, with direct loans, the potential buyer is required to approach only one funding source—the U.S. Government. Many times, banks are unwilling to finance the entire sale and the buyer must shop around until adequate credit is found. Further, in times of severe economic conditions in importing countries, banks may be unwilling to provide the necessary financing. That leaves a willing buyer and a willing seller, but no financing to make the sale.

Second, additional cost savings accrue through the reduced paperwork involved with handling the financing throught one source.

Third, the loan guarantees only insure up to an 8-percent interest rate. The remaining amount of the rate is uninsured. With today's high interest rates, that leaves more than half of the interest uninsured which clearly poses problems to nations with budgetary problems of their own.

Fourth, the direct loan is less expensive to the buyer since the guarantee fee is avoided.

While the loan guarantee program operates well for big buyers who can withstand the vagaries of the export market, new, limited income buyers who are just getting their feet wet cannot. They must buy when the price is right and cannot afford to become bogged down in search of a creditor. Any delay could mean a precipitous increase in the price and cause them to become unable to buy. A revolving fund would provide one-stop financing to these middle-income buyers who can logically be expected to become regular customers over time.

The importance of encouraging these middle-income buyers cannot be underestimated. They have shown tremendous economic progress by moving out of concessional financing into commercial financing. To continue their progress toward sales financed solely by private sources, we must insure that effective middle-level credit is available to them. A credit fund as we have envisioned will fulfill this need.

A large number of both farm and nonfarm organizations support this amendment including the National Governor's Association, the American Farm Bureau Federation, the National Cotton Council of America, the National Grain & Feed Association, the National Association of Wheat Growers, the American Soybean Association, the National Grange, the American Agricultural Movement, and the National Corn Growers Association.

If the United States is to maintain its lead in agricultural exports, more credit is required. I urge your support of the amendment to allow adequate, dependable, and cost-effective credit to insure U.S. strength in farm exports.

Mr. FITHIAN. Mr. Chairman, I rise in support of the Glickman amendment to create a Commodity Credit Corporation (CCC) Fund for Export Market Development and Expansion. Of all the ideas we have debated during the 2 weeks in which we have considered the 1981 farm bill, this is surely one whose time has come.

Despite widely divergent economic philosophies, both the current and the previous administration have expressed strong interest in a revolving fund of this type. And the feeling in virtually all of the major farm groups and commodity organization is nothing short of enthusiastic. Their support for this proposal is well justified, as it would prove highly beneficial to the American economy.

It is a well-known fact that agricultural products constitute 20 percent of the total of all our exports; the yield of 1 in 3 acres is sold abroad. In dollar terms, we will export nearly $45 billion worth of farm commodities this year. Despite this cheering picture, the outlook for the American farming community is a gloomy one. Paradoxically, the incredible productivity of our farmers can be their own worst enemy. We are having excellent harvests in corn and wheat this year, but the seasonal nature of this market conspires with the law of supply and demand to depress prices. The farmer, in turn, reaps a proportionally smaller financial reward for what he has sown. In a capital-intensive enterprise such as agriculture, these diminishing returns can prove disastrous. With interest rates hovering near the 20 percent mark, many producers are understandably reluctant to assume a larger debt load.

Increased exports represent perhaps the best way to extricate ourselves from this dilemma. The establishment of a CCC revolving fund should be viewed as an investment in market expansion; it is decidedly not a Government subsidy. An initial appropriation will eventually be required, but as loan repayments, including interest, are made, the fund should gradually become self-sustaining. It is even conceivable that the CCC might be able to reimburse the Treasury with the seed funding.

Credit is a critical element in the overseas marketing of agricultural commodities. For a variety of reasons, many potential foreign buyers either cannot or will not avail themselves of conventional sources of credit. Because we are currently unable to accommodate this preference for government-to-government financing, we lose valuable trade opportunities to other countries. This is something we can ill afford.

Many of us involved in agriculture policy formulation have heard the objections of farm organizations to long-term trade agreements. There is some merit to their argument that this amounts to a straitjacket approach to fluctuating demand. The revolving fund would be a useful tool in the USDA's shop, as it would present an alternative to bilateral agreements. With a reliable source of credit available to trading partners, market forces should operate far more efficiently.

Finally, it has been pointed out that the Soviet grain embargo seriously damaged our credibility as a reliable supplier. The creation of a revolving fund would be a step in the right direction toward restoring confidence in the United States. In addition to assuring predictable, secure export

credit, the fund would allow the chance for long-range promotional planning.

I urge my colleagues, therefore, to join with me in supporting this important amendment.

Mr. FRENZEL. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, I rise with a great deal of ambivalence to express my objection to this amendment. I agree with the gentleman from Kansas (Mr. GLICKMAN) in what he is trying to do.

I believe that we must be competitive in financing of our agricultural exports. I agree with the gentleman that we should be more aggressive in providing the financing for the exports that we are seeking to increase.

My problem with the amendment is not one of philosophy. I would gladly vote for an increased budget for more of this kind of financing, just as I voted to increase the Eximbank budget so that we could increase export financing for other goods. I think export financing is terribly important.

My objection to the amendment is wholly based budgetary considerations. The gentleman has done a pretty good job. In fact, he has done a very good job of trying to answer the responsible objections to this amendment. He has provided that moneys for this revolving credit must be appropriated. On the first pass, it must go through the appropriations process, and that is good.

My objection to it is that it is a revolving credit fund. The moneys that come back in as the loan funds are repaid are never again subject to the appropriations process. The future use of these funds is what is known as backdoor spending. Backdoor spending is simply the use of funds with the control of budget and appropriations processes.

The gentleman has done one other good thing in this amendment. He has provided that it sunsets after 3 years, and that answers the worst of my objections about the continuous nature of the revolving fund. But I feel it is my obligation to remind the Members of this body that for 3 years we will have a backdoor spending item, with no control by Congress of the funds repaid.

My preference for the cleanest kind of amendment would be to appropriate each year the amount necessary to provide competitive credit to finance increased agricultural exports. I salute his motives. I would like to help him with it. And I realize that the amendment is going to pass, and I take some comfort in that. But I feel obliged to call attention to this serious budgetary defect.

I yield back the balance of my time.

Mr. BROWN of California. Mr. Chairman, I move to strike the requisite number of words.

(By unanimous consent, Mr. BROWN of California was allowed to proceed for 3 additional minutes.)

Mr. BROWN of California. Mr. Chairman, I rise to discuss the amendment offered by my colleague (Mr. GLICKMAN). It concerns a subject with which I am deeply concerned, in large part because of facts which came to light during a series of hearings on agricultural trade policy issues held before the Agricultural Subcommittee which I chair. The purpose of this amendment is to authorize the establishment of an export credit revolving fund. This fund would be available to the Commodity Credit Corporation to finance for a period not to exceed 3 years commercial export sales of U.S. agricultural commodities. The fund could also be drawn upon to finance the export of breeding livestock or to assist our trading partners in the construction of commodity handling and storage facilities, facilities which would then presumably be available to receive future commercial exports from the United States.

I must express my reservations on this amendment. I have reservations because I believe that this authority will not be funded, because I am not convinced that this amendment's program will actually increase exports, and because I have strong concerns that we are pushing increased agricultural exports without giving sufficient attention to our resource conservation needs.

The importance of agricultural exports to the farm sector and their positive contribution to our balance of payments is well known to this body and hardly needs repeating. American farmers are completing at this moment a record corn harvest. In fact, the production of nearly all commodities has risen sharply from last year's drought-reduced crop. Stocks of corn, wheat, and other crops are up significantly resulting in unusually strong, although seasonal, downward pressure on market prices. This softness in the market comes at a time when farmers' out-of-pocket cash production costs are steadily escalating, and record high interest rates are imposing an alarming burden on farmers' cash flow. For most types of farming operations, annual interest charge alone exceed 15 percent of gross farm income. For beginning farmers or highly leveraged operations, economic viability is simply unattainable with interest rates pushing 20 percent. Facing this combination of bleak economic realities, farmers understandably question the administration's endorsement of the healthy influence of market forces. How can market forces be used to return the U.S. farm sector to prosperity? One way, of course, is by further expansion of agricultural exports, and an export credit revolving fund could play a role in attaining this objective.

This Congress desperately needs to develop a new generation of farm programs designed to facilitate an efficient response to fluctuating international demand for basic commodities. A policy which is, at the same time equitable to farmers and affordable from society's broader perspective. The cornerstone of future farm programs must be a responsive and balanced agricultural export policy. Although a popular initiative among most agricultural groups, this amendment will result in only minimal progress toward such a balanced policy, mostly because it is highly improbable that Mr. Stockman, or this Congress, will appropriate funds anytime soon to get the fund off the ground. Agricultural exports are literally booming and one can question both the need and wisdom of tinkering with this otherwise healthy sector of international commerce.

An export credit revolving fund is not likely to significantly further enhance the prospects for commercial sales of U.S. farm products abroad for two basic reasons: First, there simply is not a shortage of commercial credit, on whatever terms desired, to creditworthy overseas customers. There clearly is, and always will be, a shortage of subsidized credit and underpriced grain and foodstuffs for aid programs, but these legitimate needs are not those to be served by such an export credit revolving fund. Second, and to me even more disturbing, is the fact that such a fund would constitute yet another indirect subsidy to our commercial trading partners. Let me quote a senior economist who addressed this subject recently at an agricultural trade symposium sponsored by the Federal Reserve Bank of Kansas City:

> The United States, by virtue of its very dominant role as a grain exporter, is the undisputed price leader in the grain world, and will continue to be so in the future. Prices set in Chicago, Minneapolis, and Kansas City or Washington greatly influence the asking prices of all other grain exporting nations.
>
> Since grain prices in most importing nations are well above and fully insulated from United States and other exporters' selling price levels, farmers and governments in exporting countries have in effect been subsidizing buyers in grain importing countries. For exporting countries to compete with each other with even more liberal financing terms than we have right now would just increase this subsidy from exporting to importing nations.
>
> If, for example, the aim of the current congressional proposal to increase CCC export credit terms from 3 years to 10 years is to make the United States more competitive with other exporters, then it probably will be self-defeating. For there is likely no way that other exporters could avoid providing the same terms if they wished to

remain competitive. The net result then would be that neither the United States nor other exporters would gain any competitive advantage: They would merely increase their subsidies to foreign grain buyers.—Harold F. Bjarnason page 129.

Since this quote happens to come from a senior economist with the Canadian Wheat Board—our major competition in the world wheat market—its message is particularly germane and sobering.

Let me briefly raise another set of concerns which this Congress must squarely face in the development of a balanced agricultural export policy. Market cycles have, by their very nature, both up and down sides. The fact that this farm bill debate has occurred during a deep and protracted downward phase for net farm income has obviously played a major role in the tenor and content of the debate. When prices are stronger, when demand rebounds and again exceeds supply, as it surely will, rising prices will restore prosperity to grain and commodity farmers, boost agribusiness profits, and once again stun the livestock industry with excalating feed prices. As these adjustments occur, considerable costs will also be imposed on other segments of our society, on our natural resource base as farmers pump deeper and plow further out onto marginal soils, and on our international trading partners. A balanced agricultural export policy must also have the capability to minimize these costs through a combination of new storage, conservation, and commodity pricing policies.

The remarkable productivity of U.S. agriculture stems directly from this country's unique endowment of land, water, and climate. The growing volume of exports of food to other countries has created an international interdependency on these resources of unprecedented proportion. Our farmers, rural communities, and agribusinesses have, in effect, lost control over their economic fortunes. It is the complex and unpredictable global interplay of economic, political, climatic, and commercial forces which now determines worldwide export demand and prices, and hence the fortune of U.S. farmers. The Congress must act soon and decisively to insulate the farm sector from these export market related uncertainties and economic hardships. If we fail to develop new policies to overcome these recurrent problems, our Nation will fail to capitalize on the full potential of U.S. agriculture.

My colleagues on the Agriculture Committee are well aware of and determined to resolve these problems. Because of the pressing budgetary issues this Congress has been compelled to address, agricultural export policy needs did not receive adequate attention during the development of this farm bill. It would be unfortunate and counterproductive if passage of this amendment leads to a sense of complacency about other pressing export policy needs.

Mr. GLICKMAN. Mr. Chairman, will the gentleman yield?

Mr. BROWN of California. I would be happy to yield to the gentleman from Kansas.

Mr. GLICKMAN. Mr. Chairman, I think my colleague agrees the amendment is not harmful. I view this amendment a little like chicken soup when you are sick. It may not help, but it sure cannot hurt.

The second thing I would say about it is the fact that, in fact, the current program of privately financed loans by CCC loan guarantees to provide export financing, has dropped dramatically during the last year and a half or 2 years. Therefore, we need a new, different effort.

Third, what we are beginning to see, as the gentleman well knows, is extensive competition by foreign countries such as Canada and Argentina, and what we need is some form of responsible, centralized credit availability. I admit to the gentleman that this amendment alone is not going to necessarily dramatically increase exports, but it provides a possible vehicle, sunsetted out in 3 years, and I just think it is worth a try.

Mr. BROWN of California. I thank the gentleman for his comments.

I might say that I think the amendment is something like chicken soup, and I cannot quarrel with chicken soup, very honestly. But what I am trying to get the Members to focus on is too much chicken soup is not good for you, either.

The last point that I wanted to make, and I will make it very briefly, is that we can overdo exports and reduce the long-term viability of our resource base in this country, and by looking at this solely as something which we must continue to increase ad infinitum, we are missing the importance of focusing on providing for the long-term sustainability of our agriculture, which is the only thing that will maintain the health of the American farmer and the American people.

The CHAIRMAN. The time of the gentleman has expired.

(On request of Mr. SKELTON and by unanimous consent, Mr. BROWN of California was allowed to proceed for 3 additional minutes.)

Mr. SKELTON. Mr. Chairman, will the gentleman yield?

Mr. BROWN of California. I yield to the gentleman from Missouri.

Mr. SKELTON. Mr. Chairman, I think essentially there is one situation we must point out, in that there is in some cases a shortage of direct loan possibilities under the law that we now have, and this CCC export amendment will help on that.

I think that we should also, taking some of the gentleman's words, look at the long-range export situation.

□ 1115

We are going to continue to be the bread basket of the world. We are going to be in competition with other countries of the world that produce grain and commodities. We should be in a position where we can compete with them and do a better job and have that market for our farmers. This is going to help us in the long run. It is too bad that we cannot budgetarywise competely fund it because it would not only make money for the country, it would make money for our farmers and have an excellent market for them and help feed this world, which we have been trying to do for so many years.

Mr. BROWN of California. I appreciate the point the gentleman is making. The point I want to reiterate, however, is that as long as we are exporting grain or other foods at below the cost of production and seeking to solve our problems by increasing those exports, we are on a losing track, and we must have a balanced, long-range policy which will correct that. This is not the balanced, long range policy that will provide the answers to that situation.

Mr. EMERSON. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment of the gentleman from Kansas.

Mr. Chairman, I am cosponsor of legislation similar to that of the gentleman from Kansas, and while there are some differences between our two approaches, I am very happy to join in the effort of the gentleman from Kansas. I wish to associate myself with his remarks. One cornerstone of this administration's policies in agriculture is enhanced export realities—not just opportunities—but bringing to fruition real and significant foreign sales. This amendment enhances those prospects.

Mr. ROBERTS of Kansas. Mr. Chairman, will the gentleman yield?

Mr. EMERSON. I yield to the gentleman from Kansas.

Mr. ROBERTS of Kansas. I thank my colleague for yielding. I simply would point out that some of the concern of this body right now is the cost of this program. There was a suggestion some of us had in the Agriculture Committee earlier when the CCC sold some of the embargoed corn in the amount of 199 million bushels back into the market resulting in a budget windfall of an extra estimated $600 million to $800 million. It seems to me that would be a very good source of funding. We have already paid for it once in terms of the embargo, and I do not think the farmers should be asked

to pay for it again. That might be a possible source of funds.

I would like to also reiterate my concern that when we are talking about exports it sounds very good to talk about record exports and that is what we read in the press, but if we adjust for inflation we are not where we were in 1976.

I think this amendment speaks well to the goal of the Reagan farm policy. It is a market oriented farm policy. Right now we do not have a market. It is not a catchall answer by any means, but it is a step toward the right direction.

I, too, am concerned, with my chairman from California, Mr. BROWN in regard to the resource base that we have in this country, but there is another resource I am concerned about. That is the American farmer, and with current prices the way they are we are losing that resource. That is one resource we are going to continue to lose if we do not take some steps like this.

I appreciate the gentleman yielding his time.

Mr. STENHOLM. Mr. Chairman, I move to strike the requisite number of words, and I rise in strong support of this amendment.

I would like to add for the benefit of those listening to this debate today, my colleague from California made an excellent point, but as far as the endless amount of exports that we seem to be trying to sell, I, too, would agree that we need to be careful in that area and look at what it is doing to our soil and water resources of this Nation, to the energy that we do not have. But the point is, we are producing more than we can sell domestically; therefore, we do need to look at providing the tools necessary to make these sales.

Another point I would make is that I can take any 11 of us on the floor right now, take any 11 of us and take on any professional football team this coming Sunday and we can win if you let me draw the rules. What we are talking about in this amendment is allowing the American farmer, competing in the world export market, to have access to fair rules.

Only in the last month we found that rabbit producers in the United States, who are small businessmen and women throughout this country, suddenly lost their domestic rabbit market because of unlimited imports of rabbits from the People's Republic of China. It brings one of these growers to say:

> I just cannot bring myself to go out and hit those does on the head, but I would be better off because 200 does and 20 bucks are eating a ton of feed a week and I have no place to go with my rabbits.

Really, what we are talking about is fairness and equity, and we cannot find this in any of the areas of agricultural marketing today. I personally would prefer for us to quit production rather than to continue to sell below our cost of production, but we have been unsuccessful thus far to do that. Therefore, we must have every avenue available to us within the budget to sell what we have raised.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Kansas (Mr. GLICKMAN).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. SMITH OF IOWA

Mr. SMITH of Iowa. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

> Amendment offered by Mr. SMITH of Iowa: Insert prior to line 3 on page 77: "Notwithstanding any other provision of law, the Secretary shall not require any feed grain producer to participate in a land diversion or set-aside program or to devote acreage to conservation use as a condition of eligibility for participation in a farmer-held feed grain reserve or extended price support loan program established for the purpose of promoting orderly marketing when feed grains are in abundant supply.".

Mr. SMITH of Iowa. Mr. Chairman, this bill as it is presently written, together with the Stenholm amendment as far as feed grains are concerned, is just a hoax upon the feed grain farmer. For 1982 and 1983 crops, the Stenholm amendment, together with other provisions of the bill, require that as a condition precedent to receiving a loan, a purchase agreement, or a reserve agreement—any of the three—that they participate in a set-aside under a formula that almost no producer can participate in. Therefore, as a practical matter there will not be a reserve program, there will not be a loan program, and there will not be any purchase agreements. That is the sum and substance of it, and to claim that we are doing anything for the feed grain producers in this bill is nothing but a hoax.

I think this bill relies entirely too much anyway on set-asides and target prices. Those are old tools that were adequate at a time, but they are not the principal tool we should be using in the 1980's. In today's market, in the 1980's, we ought to be depending primarily upon marketing our grain at a reasonable price. That should be the primary objective.

Now, let us go back to how this came about. Back in 1961—no member of the Agriculture Committee was here at the time—but in 1961 we devised what we called the set-aside. It was the right thing for that time. At that time, we had more acres that could produce grain than we could possibly market in the world. We had no way to market that much, so we had the idea of setting aside a certain number of acres.

Then in 1963 we devised the idea of target prices. Primarily, it was myself and the present Governor of Minnesota, and that was adequate for the 1960's. It was a good thing for the 1960's, but by the late 1960's it was obvious that we needed a different approach. World markets were expanding. What we needed to do was to be sure we had the grain when it was needed, and also to secure a decent price for it.

That is when I introduced the farmer-held reserve. That was about 1969. That bill was promoted around here for 3 or 4 years. Finally, in 1973 we had a big glut of feed grains in the market, and the gentleman from Texas, Mr. Poage, the chairman of the committee at that time, decided that my bill should be passed in 1973. With his support, my bill was reported to the floor, the farmer-held reserve. It was passed in the House of Representatives but it was opposed by the administration and did not pass in the Senate. Within a year's time, there was a Russian grain sales scandal and had a shortage of grain. The administration was not prohibited from dumping grain as it would have been under the reserve program and we should have had the farmer-held reserve.

Then, in 1975 Bob Bergland became the cosponsor of my farmer-held reserve. He supported it in the committee but we were not able to secure its passage. In 1977 he became Secretary of Agriculture, and with his help, it passed on the floor. The committee did not include it in the bill they reported but the amendment was passed on the floor. It was my bill that I wrote word for word. It happens that the gentleman from Oregon was a member of the committee and I was not, so under the rules he secured recognition to offer my amendment.

But, as the farmer-held grain reserve, it has worked. It was first used in 1978. There was a surplus and grain was put into the reserve. Within a year's time we needed the grain to satisfy our customers' needs and it was taken out at a good profit. The farmer-held reserve should be the primary tool we are using under this bill, but under the bill, producers are not going to be able to use it at all in 1982. I just think the least we can do at this point is to say that a producer does not have to participate in a set-aside, under a formula that makes it impossible to participate in, in order to be eligible for the farmer-held grain reserve.

We know that the administration wants to use it. They are using it in this crop year. They are market oriented downtown. They have announced a farmer-held grain reserve for this crop, and we should not deny them this most important tool. I say that without this amendment, this bill as it is presently written as far as feed grains is concerned is nothing but a hoax.

Mr. STENHOLM. Mr. Chairman, will the gentleman yield?

Mr. SMITH of Iowa. I yield to the gentleman from Texas.

Mr. STENHOLM. Mr. Chairman, do I understand the intent of what the gentleman has just said, he believes there is no need for a set-aside?

Mr. SMITH of Iowa. I believe that they should not be required to have a set-aside next year, and that should not be a condition precedent to a reserve program.

Mr. STENHOLM. Does the gentleman believe we need to continue fence row to fence row production that we currently have in this country?

Mr. SMITH of Iowa. I believe that with a properly operated reserve program and loan program that we can facilitate the marketing of the products we have at least for the next 2 years, and that we ought to have those reserve and loan programs.

Mr. STENHOLM. I would suggest to the gentleman in the well that I think we can predict that we will continue the devastating low prices we are finding now with unlimited production, and we will fill the reserve and have every other bin full.

Mr. SMITH of Iowa. We will certainly have low prices if we do not have a reserve available, and the reserve is prohibited under the gentleman's amendment together with the rest of the bill.

Mr. STENHOLM. All a farmer has to do is set aside 15 percent and he is eligible for the loan and the reserve.

Mr. SMITH of Iowa. I ask for adoption of the amendment.

Mr. DE LA GARZA. Mr. Chairman, I rise in opposition to the amendment. I do this with great reluctance because of the admiration and respect I have for the gentleman from Iowa, but in this case the basic tool in the legislation is the availability to the Secretary, if he offers a loan and if we provide for a grain reserve, that he have the availability to him and the discretion to reduce acreage if necessary in order to accomplish the long-term intent of the legislation, which is to stabilize prices.

Mr. SMITH of Iowa. Will the gentleman yield?

Mr. DE LA GARZA. I yield.

Mr. SMITH of Iowa. The feed grain producer would not have flexibility because, under the Stenholm amendment, it says the Secretary "shall" provide for a set-aside. He has no alternative, whenever there is 18 percent of a crop carryover. I know presently that is what is predicted, so he does not have any flexibility at all. He is required to have a set-aside under a formula nobody can comply with.

Mr. DE LA GARZA. I agree with the gentleman to that extent, and I probably misused the word "flexibility", but as part of the tool the Stenholm amendment would take it at a specific point, but nonetheless it still provides the tool that allows the Secretary, even though he is mandated at a certain level, to control the amount of acreage. This would stabilize the price, which is the long-term intent of the legislation. For that reason, I would oppose the amendment, Mr. Chairman.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Iowa (Mr. SMITH).

The question was taken; and on a division (demanded by Mr. SMITH of Iowa) there were—ayes 7; noes 22.

So the amendment was rejected.

□ 1115

AMENDMENT OFFERED BY MR. EVANS OF IOWA

Mr. EVANS of Iowa. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. EVANS of Iowa: Page 69, after line 14, section 1002 is amended by adding a new subsection (i) and redesignating the remaining subsection as (j).

"(i) When a producer samples, turns, moves or replaces grain or any other commodity which is security for a Commodity Credit Corporation producer loan or is held under a reserve program, and does so in violation of law or regulation, the county ASCS committee may forgive some or all of the penalties and requirements that would normally be imposed on the producer by reason of the violation, when in the judgment of the county ASCS committee the violation occurred inadvertantly, by accident, because of lack of knowledge or understanding of the law or regulation, or because the producer or his agent acted to prevent spoilage of the commodity: *Provided*, That in the judgment of the county ASCS committee the violation did not result in harm or damage to the rights or interests of any party, and that this fact is certified to by a majority of the members of the county ASCS committee and a copy of the certificate is filed with the state ASCS committee.".

Mr. EVANS of Iowa (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Iowa?

There was no objection.

Mr. EVANS of Iowa. Mr. Chairman, this is a technical amendment which addresses a problem frequently faced by many county ASCS committees throughout the country.

And it is offered at the request of a number of the ASCS committees in my district.

The problem the amendment addresses arises from the fact that county ASCS committees now have very limited power to forgive minor violations of ASCS regulations relating to commodity loans.

This is the case even when it is clear that forgiveness is in order in view of the circumstances and in view of the extreme penalties that must be imposed if forgiveness is not granted.

For example, if a producer has a commodity loan on grain, and that producer samples, turns, moves, or replaces that grain without getting permission of the county ASCS committee, then that county committee has no alternative but to demand repayment in full of the loan and the accrued interest thereon, pending appeal of the matter.

And on appeal the violation can only be forgiven for "highly meritorious or highly unusual circumstances".

And the Members of the House should understand that periodic sampling, turning, moving, and replacing of grain that is going out of condition is standard practice in farming and is in the best interest of the Commodity Credit Corporation which has a lien on that grain.

And the Members should also understand that an unexpected demand to repay principal and interest on such a loan can be a financially fatal penalty to many producers, particularly if at that moment the market value of the commodity is less than the sum due.

At the moment, county committees usually handle this problem by turning their backs—by pretending not to see.

And they do this repeatedly in clear violation of the law, because they believe that this is the best course to justice.

And those county committees are tired of having to violate the law to dispense justice.

This amendment addresses that problem.

It broadens the power of the county committee to forgive the violation and the penalty in certain instances.

Under the amendment, the committee may forgive in whole or in part when all of the following four conditions are met:

First, the only offense is to have failed to inform the county committee in advance of intention to engage in the standard management practices of sampling, turning, moving, or replacing a commodity to maintain its condition;

Second, this is done inadvertently, by accident, because of lack of knowledge of understanding of the law of regulations, or because the producer or his agent acted to prevent spoilage of the commodity;

Third, the violation did not result in harm or damage to any party, including the Commodity Credit Corporation; and

Fourth, the facts are certified by the county committee and reported to the State committee.

Now, compared to many of the issues in connection with this bill, this amendment is of minor importance.

But it would make the producer loan and reserve programs operate more efficiently.

And the department agrees that a change of this nature is in order.

Mr. DE LA GARZA. Mr. Chairman, will the gentleman yield?

Mr. EVANS of Iowa. I yield to the committee chairman.

Mr. DE LA GARZA. Mr. Chairman, we have examined the gentleman's amendment.

We have had some correspondence from the administration saying that this is the intent of what they do anyway, but that they feel there should be some protection to the CCC through sending the matters up to Washington for review. However, I am personally acquainted with a lot of the problems that affect this area, and even for very minor matters everything must be sent to Washington.

Perhaps with this amendment we would clearly give some discretion, which the Department says it already has.

I would not on this side have any objection to the amendment at this time, subject to perhaps further refinement or clarification as we get into the conference. The intent and the thrust of the amendment would be acceptable at this time.

Mr. EVANS of Iowa. Mr. Chairman, I thank the committee chairman.

Mr. MARLENEE. Mr. Chairman, will the gentleman yield?

Mr. EVANS of Iowa. I yield to the gentleman from Montana.

Mr. MARLENEE. Mr. Chairman, I rise in support of this amendment offered by my colleague, the gentleman from Iowa (Mr. EVANS).

This amendment solves one of the misdirections and inequities of the USDA. The farmer is responsible for the product and liable for the full cost and value of that product. If the grain spoils or is damaged by flood, moisture, or an act of God, the farmer must replace that commodity or pay out the loan.

Assuming the farmer, in order to protect his assets and the USDA collateral, goes out and moves, turns, samples, or in any manner tampers with that grain, the farmer is subject to immediate recall of this loan. This amendment will help solve that problem.

Mr. Chairman, the farmer is already responsible, and I think this is an example where the USDA is still operating under those old regulatory directions it has had in the past. The Department needs some direction from this body, and this is an example of regulatory abuse, as far as I am concerned.

Mr. EMERSON. Mr. Chairman, will the gentleman yield?

Mr. EVANS of Iowa. I yield to the gentleman from Missouri.

Mr. EMERSON. Mr. Chairman, I wish to commend the gentleman from Iowa (Mr. EVANS) on his amendment, and I fully support it.

I know of no group of public servants at the local level in particular who are held in higher regard than our ASCS people, and I think they ought to be given the authority that the gentleman suggests in his amendment. I think this will probably effect considerable cost savings, too, by circumventing some of the regulatory requirements.

Mr. Chairman, I congratulate the gentleman on his leadership.

Mr. FINDLEY. Mr. Chairman, will the gentleman yield?

Mr. EVANS of Iowa. I yield to the gentleman from Illinois.

Mr. FINDLEY. Mr. Chairman, I wish to add my congratulations to the gentleman from Iowa (Mr. EVANS). He has discovered a very important but weak point in our regulations that needs correction, and I salute him.

Mr. WAMPLER. Mr. Chairman, will the gentleman yield?

Mr. EVANS of Iowa. I yield to the gentleman from Virginia.

Mr. WAMPLER. Mr. Chairman, I thank the gentleman for yielding.

Mr. Chairman, we have examined the gentleman's amendment. I think it does address a very serious problem, and I want to associate myself with the remarks of the gentleman from Texas (Mr. DE LA GARZA). We are willing to accept the gentleman's amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Iowa (Mr. EVANS).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. SHAMANSKY

Mr. SHAMANSKY. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. SHAMANSKY: Page 77, after line 2, insert the following new section:

REPEAL OF PROGRAMS CONCERNING PRICE SUPPORT FOR AND THE MARKETING OF TOBACCO

SEC. 1012. (a)(1) Section 101 of the Agricultural Act of 1949 is amended—

(A) in subsection (a) by striking out "tobacco (except as otherwise provided herein), corn," and inserting in lieu thereof "corn"; and

(B) in subsection (d)(3) by striking out ", except tobacco," and all that follows the first semicolon.

(2) Sections 101(c) and 106 of such Act are repealed.

(3) Section 408(c) of such Act is amended by striking out "tobacco,".

(b)(1) Section 301(b) of the Agricultural Adjustment Act of 1938 is amended—

(A) by striking out "tobacco," in paragraph (6))A);

(B) by striking out the following in paragraph (7):

"Tobacco (flue-cured), July 1-June 30;

"Tobacco (other than flue-cured), October 1-September 30;";

(C) by striking out "and tobacco" in paragraph (11)(B); and

(D) by striking out "tobacco," in paragraph (12).

(2) Section 303 of such Act is amended by striking out "rice, or tobacco," and inserting in lieu thereof "or rice,".

(3) Section 361 of such Act is amended by striking out "tobacco,".

(4) The first sentence of subsection (a) and the first sentence of subsection (b) of section 371 of such Act are amended by striking out "peanuts, or tobacco" in each sentence and inserting in lieu thereof "or peanuts".

(5) Section 373 of such Act is amended—

(A) by striking out "peanuts, or tobacco, and" in subsection (a) and inserting in lieu thereof "or peanuts, and";

(B) by striking out "peanuts, or tobacco from" in subsection (a) and inserting in lieu thereof "or peanuts from";

(C) by striking out "all persons engaged in the business of redrying, prizing, or stemming tobacco for producers," in subsection (a);

(D) by striking out "$500;" and all that follows in the last sentence of subsection (a) and inserting in lieu thereof "$500."; and

(E) by striking out "peanuts, or tobacco" in subsection (b) and inserting in lieu thereof "or peanuts".

(6) Section 375(a) of such Act is amended by striking out "peanuts, or tobacco" and inserting in lieu thereof "or peanuts".

(7) The following provisions of such Act are repealed:

(A) Section 301(b)(3)(C);

(B) Section 301(b)(10)(B);

(C) Section 301(b)(14)(B);

(D) Section 301(b)(15);

(E) Section 301(b)(16)(B);

(F) Sections 311 through 314 and 316 through 320; and

(G) Section 378(f)

(8) Section 2 of such Act is amended by striking out "tobacco,".

(c) The following provisions of law are repealed:

(1) the Act entitled "An Act relating to burley tobacco farm acreage allotments under the Agricultural Adjustment Act of 1938, as amended", approved July 12, 1952 (7 U.S.C. 1315);

(2) Section 703 of the Food and Agriculture Act of 1965; and

(3) Section 4 of the Act entitled "An Act to amend the Agricultural Adjustment Act of 1938, as amended, to provide for acreage-poundage marketing quotas for tobacco, to amend the tobacco price support provisions of the Agricultural Act of 1949, as amended, and for other purposes", approved April 16, 1965 (7 U.S.C. 1314c note).

(d) The first sentence of section 402 of the Agricultural Trade Development and Assistance Act of 1954 is amended by striking out "and for the purposes of title II of this Act," and inserting in lieu thereof "or".

(e) Section 5 of the Commodity Credit Corporation Charter Act is amended by adding the following undesignated paragraph at the end thereof:

"Notwithstanding any other provision of law, the Corporation may not exercise any of the powers specified in this section or in any other provision of this Act with respect to tobacco.".

(f) Section 8c of the Agricultural Adjustment Act, as reenacted and amended by the Agricultural Marketing Agreement Act of 1937 is amended—

(1) by striking out "tobacco" in subsection (2)(A);

(2) by inserting "tobacco," after "(except honey," in subsection (2)(B); and

(3) by adding the following new sentence at the end of subsection (2): "Notwithstanding any other provision of law, no order concerning tobacco may be issued or enforced under this Act.".

(g) The amendments made by this section shall apply to the 1982 and subsequent crops of tobbacco.

Mr. SHAMANSKY (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. SHAMANSKY. Mr. Chairman, I have submitted this amendment, which, very succinctly eliminates the tobacco allotment program and price support program.

On Monday I sent a letter to the President in which I brought to his attention and reminded him of the fact that he and I campaigned, as did most Members of Congress, on platforms to reduce Government intervention in the American economy. As a matter of fact, I honestly have great difficulty thinking of any Member of this body who did not campaign on getting the Government out of the market economy.

As a matter of fact, the reason for taking this approach is very succinctly set forth in a speech by Murray Weidenbaum, the Chairman of the President's Council of Economic Advisors. It appears in Transaction Magazine, and it is entitled "Freedom and Enterprise." In that speech Mr. Weidenbaum says this:

The role of government in this context must be carefully defined. Support of free enterprise does not mean being simplemindedly pro-business. The latter advocates a partnership between government and business, subsidies for failing industries, "incomes" policies, government planning, and other interventionist techniques, albeit frequently justified on an "exceptions" basis. In contrast, promoting the concept of free enterprise requires that no favored treatment be given to any specific interest group or industry. It means restraining any tendency to reallocate resources from those who are entitled to them by virtue of their own economic activity to those who receive them by political decision.

Mr. Chairman, there is nothing more classically arrived at by political decision than the allotment program for tobacco. With respect to the sources of my information, I wish to bring to the attention of the House something called "North Carolina Insight," and entitled "Tobacco in Transition," volume 4, No. 2. This publication, which is put out by the North Carolina Center for Public Policy Research, Inc., is in turn funded by the Mary Reynolds Babcock Foundation, the Z. Smith Reynolds Foundation, Levi Strauss Foundation, and the Hillsdale Foundation. I think it certainly cannot be accused of being an antitobacco organization. Here is what the publication says about the tobacco program from the research:

The overall purpose of the program is to stabilize prices by restricting supply.

I cannot think of a more succinct definition of a monopoly, and this, I remind the Members of the House, was a monopoly that was set up back in the New Deal days—back in the early 1930's and through the 1930's.

Let us see what this program actually does and who benefits from it. Quoting from page 12 of the article, it says this:

The tobacco program is geared to benefit not the tobacco farmer but rather those who own farms on which tobacco happened to have been raised in 1933. These beneficiaries may be farmers, but they are also doctors and lawyers, churches and banks, millworkers and truck drivers, and in many cases, widows.

I would like to add also that the program benefits outfits—not people but outfits—such as Duke University, North Carolina National Bank, and, according to Senator HATFIELD's remarks from the Senate debate, a very well-known poor tobacco farmer by the name of Mrs. Jesse Helms, Dorothy Helms, who is a beneficiary of this allotment.

Now, the net effect is to price American tobacco out of the world and domestic markets. Continuing on page 12, the article I am quoting from says this:

The current program, however, benefits very little the tobacco farmer who does not own an allotment.

Taking North Carolina as the instance, there are 30,000 farmers of tobacco in North Carolina but 115,000 allotment holders. There are 85,000 allotment holders who do not farm. What that means is that, at about $1,000 an acre, it is as if the Government gave them a special franchise that permits them to impose a fee on American tobacco which goes to the allotment holders and for which they do absolutely nothing.

The CHAIRMAN. The time of the gentleman from Ohio (Mr. SHAMANSKY) has expired.

(By unanimous consent, Mr. SHAMANSKY was allowed to proceed for 5 additional minutes.)

Mr. SHAMANSKY. Now, the statistics are—and this is provided by Senator HATFIELD—that the effect of this tobacco program is to reduce American exports, from the 1950's, when we had 60 percent of the world tobacco market, to the point where we are now down to 28 percent. Now our tobacco exports are worth only about $2.5 billion. If we could recapture this market, we would have about another $4 billion worth of exports. The net effect—and should be expected of this kind of Government intervention into the market economy—is to price us right out of the market.

Mr. Chairman, the Department of Agriculture last year testified before the International Trade Commission. The reason they testified is that the tobacco lobby tried to put a tariff on importation of foreign tobacco, because obviously the tobacco program is not working. With respect to the American market an American cigarette is now composed of 30 percent foreign tobacco. Thus, this marvelous, successful program has set the price of American tobacco at about $1.50 a pound, twice the price on the world market. The inevitable effect is to kill off the export of American tobacco. I cannot think of a more insane system.

As a matter of fact, I did some original research. The original draft of this program was made by Lewis Carroll as an appendix to "Alice in Wonderland" and "Through the Looking Glass."

Mr. PERKINS. Mr. Chairman, will the gentleman yield to me at this time?

Mr. SHAMANSKY. Mr. Chairman, I have been waiting since Thursday to get this off my chest. I think I have been very patient. A lot of work has been done, and I would think the gentleman would understand if I do not yield.

Mr. Chairman, the thing we have to understand here is that we would not get this kind of political muscle flexing if the poor farmer were the real consideration. We clearly demonstrated without question here this summer that the "poor" anybody does not cut much ice with us. However, if we have outfits like North Carolina National Bank and Duke University involved, then that is when the muscle appears. I do not blame the tobacco farmers—but the allotment holders who are the beneficiaries of this program. The farmers do not benefit. The allotment holders are the ones who get rental fees of $1,000 a year for an acre.

A suitable parallel to this tobacco system would be if my grandmother in the 1930's had been on welfare, then I would continue to have the right to get welfare today even though I am in Congress. If the King of Saudi Arabia bought an acre of this land, he would be entitled to a $1,000-an-acre allotment price. That is what they do it for.

Worse still, the farmers in my District, in Franklin, Del., and Morrow Counties, Ohio, are not permitted by law from planting even one row of tobacco. By contrast the farmers of North Carolina have the right to grow beans or corn or anything else they choose.

So what we see here is a classic case of a very special interest. This kind of political muscle indicates a lot of money. The "poor farmer" is simply a smokescreen, and the effect of the program is a disaster for the tobacco part of American agriculture.

Now, I would like to just briefly touch upon a few other points. I am not going into the whole question of health. We have letters from the American Medical Association, the

American Lung Association, and the American Cancer Society. After all, at least with the peanut program, we subsidized something that can be eaten. All we can say about tobacco is that it is a disease-causing drug.

□ 1130

I am curious as to how those who voted against the peanut allotment program can possibly turn around and vote against this amendment. What we have been seeing here, since last Thursday, is not "democracy in action" but "hypocrisy in action." What we are getting here is the gathering together of very special interests. Nobody comes to me and says, "Bob, gee, I know this is a really good program." They say, "I know it is bad, but the politics of it demands that we go ahead and support it."

I want to remind the House that last fall I defeated a Republican who had been in the House for 22 years, a man who was a self-designated conservative.

There were no unusual circumstances surrounding my race. The last Democrat elected from my county was 44 years ago. So mine is not a safe Democratic seat. I only say that because I do not think I am totally out of touch with the electorate.

I sent a questionnaire out to the people of my district. They were 9 to 1 against the tobacco subsidy.

After the sugar vote and after the peanut vote I respectfully submit that the public is not going to forget this vote. These unreasonable crop subsidies have been going on for decades because the public has not known about them. Because of the national coverage that we have had, the public does know now.

The CHAIRMAN. The time of the gentleman from Ohio has again expired.

(By unanimous consent Mr. SHAMANSKY was allowed to proceed for 3 additional minutes.)

Mr. SHAMANSKY. I have loyally followed and voluntarily followed the leadership of my party. We have great leaders in this House. I had great admiration and respect for them when they candidly admitted publicly that my party had made some mistakes and, therefore, we were paying the price. I again respectfully submit to my fellow Democrats that one of the mistakes we made were programs like this.

When it became fashionable in late July and early August for the political pundits to predict the demise of the Democratic Party, this Democrat already knew exactly where he was going; namely, to make the market system work. In order to do this, this monstrosity which is hurting the American tobacco industry has got to go.

I received a number of telephone calls from tobacco farmers in North Carolina saying, "This is a burden on us; get rid of it." The man in the street in North Carolina is saying this is a bad program. But I admit that the people that go around and see the Congressman from North Carolina socially, are not the poor. They want their special privileges maintained.

This system is self-defeating. It is ruining the American tobacco economy, and I strenuously urge that my amendment be passed.

Mr. PETRI. Mr. Chairman, will the gentleman yield?

Mr. SHAMANSKY. I yield to my colleague from Wisconsin.

Mr. PETRI. Mr. Chairman, I would like to commend the gentleman from Ohio for his leadership in this fight. He is an effective and courageous individual. His statement was most persuasive.

Mr. Chairman, I include the following letter from the Notre Dame Law School supporting efforts to deregulate tobacco:

WHITE CENTER FOR LAW,
GOVERNMENT AND HUMAN RIGHTS,
NOTRE DAME LAW SCHOOL,
Notre Dame, Ind., September 30, 1981.

Hon. THOMAS E. PETRI,
U.S. House of Representatives,
Washington, D.C.

DEAR CONGRESSMAN PETRI: The Task Force for Review of Public Policy and Tobacco at the Notre Dame Law School's White Center is presently engaged in a major study (Project: Rainbow) of the Federal tobacco price support and acreage allotment programs, and government admonitions against tobacco use. While our report is not yet complete for publication, certain facts have surfaced as the foundation of our work: Federal policy in support of tobacco production is morally suspect given the overwhelming evidence that tobacco use is a major health hazard; this policy is inconsistent with the efforts of the Department of Health and Human Services to discourage tobacco use and to present the health risks of its use to the public; in an era of government expenditure reductions, the tobacco support programs present an unnecessary and costly use of Federal funds for a non-food farm product.

A more rational public policy would eliminate the Federal support for tobacco production. Further, it is our belief that the Federal cigarette tax should be increased so as to further discourage use of this tobacco product and to increase the general revenue of the United States. The Tobacco Deregulation Act of 1981 does eliminate the tobacco support and raises, for the first time since 1951, the Federal cigarette tax. This bill begins the process of removing the Federal government from the tobacco business and is a positive statement in favor of protecting the public health. The Task Force offers its wholehearted endorsement of H.R. 3998 and urges all members of the House of Representatives to do the same.

Sincerely,

JOSEPH M. COSGROVE,
Task Force Coordinator.
JAMES CROKE,
Task Force Associate.
SCOTT MEDLOCK,
Task Force Associate.
LISA PAVELOCK,
Task Force Associate.

Mr. EDGAR. Mr. Chairman, will the gentleman yield?

Mr. SHAMANSKY. I yield to the gentleman from Pennsylvania.

Mr. EDGAR. I would like to commend the gentleman on his statement. I think the debate is important today and I hope none of us get stampeded by some of the political arguments that have been made in the last 48 hours about this amendment.

I support the gentleman's amendment and I hope to speak later on the details. I commend the gentleman for his courage at this time.

Mr. SHAMANSKY. I thank the gentleman.

Mr. ROSE. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I think we have heard a very strong statement from our colleague from Ohio (Mr. SHAMANSKY) about his amendment. He has used some very powerful words to describe what to some minds might lead to the conclusion that there is some sort of a coverup under way with the tobacco price support program.

I can assure my colleagues that I am here today supporting a continuation of that program because of the impact it has especially on the moderate- to poor-income farmers across the tobacco-producing belts. This is not a subsidy. This is a loan program.

We have had a difficult time explaining to some from parts of the country that do have target prices and subsidy payments the difference between a dog and a cat, or as somebody said, a rose by any other name would still smell.

This is a loan program. Over the life of the tobacco price support program I submit that this program has had precious little cost to the American taxpayer.

The gentleman from Ohio (Mr. SHAMANSKY) quoted from a document that was prepared by foundations in North Carolina, primarily supported by the tobacco companies. The tobacco companies, I submit, have a slightly different interest in tobacco than do the producers of tobacco for whom the price support program was instituted. Tobacco companies are interested in profits, they are interested in exports.

While we are on the subject of exports, the gentleman from Ohio (Mr. SHAMANSKY) should know, and my colleagues should know, that the net export balance on raw leaf tobacco,

not products, raw leaf tobacco, has gone steadily upward since 1973.

The tobacco price support program limits the production of tobacco, it keeps the price high. I am not sure our tobacco companies are overly excited about the high price they are having to pay right now in the tobacco belt to get tobacco. We have the price up to $1.75 and $1.80 a pound. We like that. A small family farmer in the tobacco-producing area can take an acre of tobacco on a farm or land laying behind their rural home, supplement their income that they get from working in a factory or some other job in the town.

I would ask my colleagues to point me to any other crop in America today that provides that kind of a cash return to the small, rural farmer and his family. It is an economic do-it-yourself survival kit. Joe Califano recognized that not one soul will smoke or not smoke because of the tobacco price support. Tom Wicker, in the New York Times, said essentially the same thing in an editorial about how this program works.

I do not want anybody to be buffaloed about the politics, as has been referred to here this morning. We think that the tobacco price support program is a commodity that is just as worthy of a place in agriculture as is corn, and feed grains, and wheat, and rice, and cotton, and dairy, and oil seeds.

If we look program by program at the deficits that the Government has incurred since 1933, the little, tiny, blue line here in the middle of this chart is tobacco.

There was a time when there were interest subsidies from the Commodity Credit Corporation. At one time the Commodity Credit loaned out money at less than market rates of interest. That is no more.

There was a time when the grading of this tobacco was paid for by the Department of Agriculture. That occurs no more.

There was a time when there were large stocks in stabilization of Fluecured tobacco. I submit that we are down to a 5-year low of some 400 million pounds of tobacco.

The CHAIRMAN. The time of the gentleman from North Carolina (Mr. ROSE) has expired.

(By unanimous request Mr. ROSE was allowed to proceed for 5 additional minutes.)

Mr. ROSE. Fred Bond, the administrator of the stabilization in North Carolina that runs the Flue-cured stabilization program, has stated, and I would point out at this time that the Burley stabilization has almost no tobacco in it, the director of the Fluecured stabilization pointed out to me that in 1979 they loaned out $107 million to tobacco farmers but they took in $203 million from stocks that they had sold.

My colleagues, we are not asking for a subsidy and we submit that there is none. We are asking for you to give us the right to keep supply in line with demand. There is no great hue and cry for more tobacco peanut butter. They do not make it. There is no hue and cry among the antismokers that cigarettes be made cheaper.

If my colleagues kill the tobacco price support program they are going to drive small, rural families into the cities and they are going to make tobacco cheaper. Then only the large units of agriculture such as now are necessary for soybeans and corn will be able to produce tobacco at all, and the price will drop.

Is that the public policy we want? I think, I submit that the tobacco price support program is virtually a social program for people who live and work and want to stay in rural America.

Mr. SHAMANSKY. Mr. Chairman, will the gentleman yield?

Mr. ROSE. I yield briefly to my colleague.

Mr. SHAMANSKY. The Congressional Research Service has determined that if this program is eliminated that the tobacco farm income would rise because the price of tobacco would not drop as much as would the cost of production.

I would like to add also to the gentleman from North Carolina that the social safety net is there for everybody in this country. What is it about a tobacco farmer, and a tobacco farmer in this context is the man who may have 1½ or 2 or 3 acres, and 100 other acres, what is special about that farmer that does not apply to all of the other farmers in this country?

Why can there not be equity in this?

Mr. ROSE. If the gentleman wants to ask a question, I will be happy to answer it, but I want to reclaim my time.

The gentleman's point, I am afraid, is wasted on me because I know from having worked for all of my career in the Congress with the tobacco industry and especially with the companies, that they are prepared now to move out and contract with large tobacco producers.

I would say to the gentleman what is special about that small allotment is it is the difference between survival and failure for the small family that lives in rural America. I submit that it is the economic lifeblood of literally thousands of those families who, without it, would have to leave.

Mr. MARLENEE. Mr. Chairman, will the gentleman yield?

Mr. ROSE. I yield to the gentleman from Montana (Mr. MARLENEE).

Mr. MARLENEE. I thank the gentleman for yielding. The gentleman from Ohio seems to have spoken in a lot of generalities. I would like to ask the chairman of the subcommittee if there have been any hearings in the district or even in the District of Columbia, in Washington, or even out there in the tobacco districts, any hearings on the direction this amendment or the impact on the farmer that this amendment would have? Have there been any hearings out there?

Mr. ROSE. Absolutely not. I thank the gentleman for his question. I would say that you are pulling the very bottom right out from under all of these people and the economic impact in tobacco-producing areas would be devastating. In my State alone this year's tobacco crop sold for $1.2 billion.

Mr. MARLENEE. I would like to ask the gentlemen to yield further and state I wonder if the gentleman from Ohio (Mr. SHAMANSKY) has even visited one of the districts in the South that produce tobacco. I wonder has the gentleman visited even one small group of farmers, poor farmers that he speaks of. It seems to me one of our problems here in Congress is we have people writing legislation on agricultural products that know nothing about the industry.

Mr. ROSE. I thank the gentleman for that statement.

Let me comment briefly about what the gentleman has said. We do not want this program operated at any cost to the American taxpayer.

□ 1145

I think that you are going to find that before today is over, we will have some colloquies and some words to say to accomplish that result, to assure the Members of this body that my subcommittee and the full Committee on Agriculture will take all of the steps that are necessary to prove to the people in this House that this program is run and will be tuned, if it needs it, in such a way that there is no cost to the American taxpayer.

The CHAIRMAN. The time of the gentleman from North Carolina (Mr. ROSE) has expired.

(By unanimous consent, Mr. ROSE was allowed to proceed for 5 additional minutes.)

Mr. HOPKINS. Mr. Chairman, will the gentleman yield?

Mr. ROSE. I yield to the gentleman from Kentucky, the ranking minority member on my subcommittee.

Mr. HOPKINS. I thank the gentleman for yielding.

In response to the gentleman's question about hearings in the district, let me hasten to add that just last year, with the approval of the chairman of the Subcommittee on Tobacco, we had a hearing in Lexington, Ky., to honestly see what we could do to make any improvements in the program. We had literally hundreds of tobacco farmers there. It was attended by the gentle-

man from Virginia (Mr. WAMPLER), the gentleman from North Carolina (Mr. WHITLEY), people who have the honest and sincere best interests of this crop at heart. But nobody is trying to prevent people from coming to town with a better idea. That was the whole purpose of it. The gentleman from North Carolina (Mr. JONES) was there.

So I do not want anybody to leave here thinking that those of us from tobacco-growing country are trying somehow to prevent people with better ideas to make improvements from doing so. We do have those hearings.

Mr. ROSE. I thank the gentleman for his comments.

Mr. MITCHELL of Maryland. Mr. Chairman, will the gentleman yield?

Mr. ROSE. I yield to the gentleman from Maryland.

Mr. MITCHELL of Maryland. I thank the gentleman for yielding.

Mr. Chairman, I, of course, represent an urban area, but I was recently in southern Maryland, in the three southern Maryland counties, that is Calvert, St. Marys, and so forth, and I was struck by the number of small tobacco farmers who were of my own race, black. Then I saw some additional material about the number of tobacco farms operated by minorities. But I asked the gentleman to yield to answer several questions.

Mr. ROSE. I will be happy to.

Mr. MITCHELL of Maryland. When you say "operated by minority farmers," does that mean that these are really tenant farmers working for somebody else?

Mr. ROSE. This means that they are owned. I ask the gentleman to let me make this point: In my district I have a county that is triracial; it is one-third black, one-third white, one-third Indian, and last Saturday night I spoke to several hundred people, and I said, "Will those of you in this audience who own allotments of tobacco, and interest or total ownership, will you raise your hand?" And evenly divided among the whole audience were black and Indian hands that went up.

Mr. MITCHELL of Maryland. If the gentleman will yield further, I have several questions, because I really want to do the right thing on this if I can.

If they are small farms and owned by blacks and other minority poor people, what size farm are we talking about? What does the gentleman designate as a small tobacco farm?

Mr. ROSE. I would say a small tobacco farm would be a half acre to an acre. Half of the allotments in my State are less than 5 acres. If a black family owns an acre of tobacco, they can grow about 2,000 pounds on that acre. They can get about $3,500 right now for that ton of tobacco and clear about $2,500, with family labor.

Mr. MITCHELL of Maryland. The gentleman leads me right into my third question: If these farms are owned and operated, what percent of the family income is derived from the farm itself, the farming of tobacco?

Mr. ROSE. In North Carolina, over 45 percent of the black-owned farms get over 60 percent.

Mr. MITCHELL of Maryland. Sixty percent of the family income?

Mr. ROSE. Over 60 percent of their income from toabcco.

In the gentleman's State of Maryland, 66 percent of the black-owned farms in the gentleman's State receive over 60 percent of their income from tobacco.

Mr. MITCHELL of Maryland. Will the gentleman yield further?

Mr. ROSE. I will be happy to.

Mr. MITCHELL of Maryland. Mr. Chairman, it would be fairly easy for me to take a parochial position on this and say that I have no tobacco in my district and, therefore, I ought to support the Shamansky amendment. But when you look at what we have done to blacks and minorities in this Congress so far, through the budget cuts, when we have savagely sliced programs on which many of my people are dependent, I just cannot bring myself to vote for an amendment which would jeopardize the well-being of some people who are living at a rather meager existence, apparently, but which would apparently drive them really out of business.

I thank the gentleman for yielding to me and responding to my questions. I just cannot in good faith assume a parochial position and say that it is a rural business and I cannot deal with it because it does not affect my district. I think I have got to look at it in the context of what we have done in this Congress, through Gramm-Latta and all of these other savage cuts that we have imposed, and to try to save some people who are still being productive.

The CHAIRMAN. The time of the gentleman from North Carolina (Mr. ROSE) has again expired.

(By unanimous consent, Mr. ROSE was allowed to proceed for 5 additional minutes.)

Mr. ROSE. Mr. Chairman, I just want to react and say to my friend, the gentleman from Maryland, how much I appreciate his understanding of what the black tobacco farmer in my State and in the South generally is faced with. I am proud of what the gentleman said, and I appreciate it.

Mr. HEFNER. Mr. Chairman, will the gentleman yield?

Mr. ROSE. I yield to the gentleman from North Carolina.

Mr. HEFNER. I thank the gentleman for yielding.

Just to comment on what was said by the gentleman from Ohio (Mr. SHAMANSKY), that there is a safety net, I think there is very little use for us to put further strain on this so-called safety net. It is not holding so well in some other areas already. So to do this further damage to it and to put further stress on the safety net, to me, seems to make no particular sense at this time.

I would like to associate myself with the remarks from the gentleman from North Carolina and also the gentleman from Maryland.

Mr. SMITH of Iowa. Mr. Chairman, will the gentleman yield?

Mr. ROSE. I yield to my friend, the gentleman from Iowa.

Mr. SMITH of Iowa. Mr. Chairman, I am opposed to this amendment, but I have a slightly different viewpoint that I think has not been expressed.

There are no tobacco allotments in Iowa whatsoever. I am opposed to smoking tobacco for health reasons. This is a control program. This amendment is an amendment to increase the consumption of tobacco. We should not be doing that in the United States. The tobacco program is a control program that has been upheld by the Supreme Court of the United States. They upheld a program that limited production to those who hold an allotment. If those allotments are ever released, we will never again be able to return to a control program like such as we now have.

If this program is abolished, production will increase. Even though proponents of the amendment concede that by their arguments an increase in production, is sure to result in an increase in consumption. It is inconsistent to spend money to discourage smoking and at the same time pass an amendment which would increase smoking.

In some countries, like Mexico, Thailand, Peru, and other places, we buy out of production those kinds of plants that are harmful to people and otherwise try to reduce availability of harmful substances. The tobacco program is a control program that is not costing us anything, and we should not kill, in my judgment, a production control program by voting for an amendment that increases consumption of tobacco.

Mr. ANTHONY. Mr. Chairman, will the gentleman yield?

Mr. ROSE. I yield to the gentleman from Arkansas.

Mr. ANTHONY. Mr. Chairman, I would like to associate myself with the comments of my colleague, the gentleman from Iowa, because he has expressed my exact sentiments.

I come from south Arkansas. We have no tobacco grown there. I did serve on the Agriculture Committee, and I have participated in the last 2½ years in hearings, in trying to redefine many of our agricultural programs. I also do not smoke. So what the gentleman has said really hit home to me.

I would encourage all of my colleagues who are in a similar situation of having no tobacco grown in their districts, who either smoke or do not smoke, not to undermine the tobacco program that is a working program, but issue a challenge either to the administration or issue a challenge to the chairman of the Tobacco Subcommittee or to the chairman of the full Agriculture Committee to continue to hold hearings and bring back some further solutions to the problem, rather than totally dismantling the program today.

Mr. ROSE. Mr. Chairman, I appreciate the remark of the gentleman, and I will tell the gentleman and my colleagues in the House that if they will join me in voting down this amendment, they will see very shortly, with what will follow on, that we are going to assure all of the Members of this body that the Subcommittee on Tobacco and Peanuts and the full Committee on Agriculture is going to run the tobacco price support program at no cost to the American taxpayer.

I thank the gentleman for his understanding and his comments.

Mr. McEWEN. Mr. Chairman, will the gentleman yield?

Mr. ROSE. I yield to the gentleman from Ohio.

Mr. McEWEN. Mr. Chairman, I would like to associate myself with the comments that were made by the gentleman in the well and the very excellent presentation that he has made.

Mr. ROSE. I thank the gentleman for his comments.

Mr. McEWEN. Mr. Chairman, as part of our consideration of the 1981 Omnibus Farm Bill, we must decide the fate of the Federal tobacco poundage control and price support program. This is a matter of grave concern to small family farmers all across America, including thousands throughout Ohio, many of whom reside in the sixth congressional district.

Why are these farmers concerned? Because attempts are being made here in the House to wipe out this money making, successful farm program at the expense of the 171,000 small family farmers and their families who are engaged in tobacco production. Quite simply, the elimination of this program means that few of these farmers could survive when forced to compete with the unrestricted production capabilities of highly mechanized corporate farms.

Opponents of the tobacco program are trying to convince us that what we are doing by continuing it is offering a subsidy to farmers who grow tobacco. Anyone who understands the program knows that this is simply untrue. The Federal tobacco program is not a subsidy. It is a revolving loan fund for growers—and the growers even pay interest on the loans they receive for tobacco bought by the fund. In fact, the tobacco program is the most successful of all the Federal commodity programs. During the 47-year history of the program, only $56.7 million, or 1 percent of all tobacco loans has not been recovered. In the last fiscal year, the Government lost only $36,000 on tobacco loans. This compares with $670 million lost on feed grains, $283,000 on wheat, and $315 million on dairy products.

Opponents also argue that eliminating this program will save the Government money. Mr. Speaker, I suggest that if this program is eliminated, it is going to cost the Government money. If we vote to wipe out the tobacco program, what is going to happen to the thousands of small family farms that are dependent on tobacco for a large percentage of their income? What is going to happen to the 860,000 workers in my home State of Ohio who owe their paycheck either directly or indirectly to tobacco?

The Federal tobacco program enables a large number of small farms to collectively and equitably stabilize the supply and price of tobacco to prevent a boom and bust economy that few small farmers could survive. It also enables a large number of small farms, utilizing large amounts of labor, to stay in business. Many of the farm operators and most of the family labor would not be able to find any other paid employment if these small farms went out of business.

How much is it going to cost the American taxpayer in welfare and AFDC payments if thousands of small farmers and farm workers are put out of work because we pass an amendment that is supposedly going to save money?

Mr. Chairman, tobacco is a small scale, labor intensive, high value crop. The average tobacco farm consists of 6.6 acres. Each acre of tobacco requires an average of 259 hours of labor compared to 3 hours for food grains and 4 hours for feed grains. The average return on an acre of tobacco is over $700—much higher than other commodities. The soil that tobacco is grown on is not appropriate for many other crops. The small amount of land on which tobacco is grown will not necessarily yield the small farmer sufficient income to replace that which will be lost if the tobacco program is eliminated and he is forced to turn to other crops.

Mr. Chairman, I suggest that my colleagues think twice before they vote to end the tobacco program. It is not a money loser. It is not a subsidy. It is not a boondoggle. On the contrary, it provides the support necessary to assist thousands of small farmers throughout America who are engaged in an industry which contributed an estimated $57.6 billion to the Gross National Product in 1979 and garners over $210 million to our State treasury annually.

I reject these short-sighted attempts to end this worthwhile and successful program.

Mr. JONES of Tennessee. Mr. Chairman, will the gentleman yield?

Mr. ROSE. I yield to the gentleman from Tennessee, a member of the committee.

Mr. JONES of Tennessee. I thank the gentleman for yielding.

Mr. Chairman, I want to associate myself with the remarks that have been made by my colleague, the gentleman from Arkansas (Mr. ANTHONY), and others, who are in opposition to this amendment. I want to say to the chairman, the gentleman in the well, that I think he has done a very fine job in putting this program together.

Mr. Chairman, I rise in opposition to the amendment, and I strongly urge my colleagues to vote against any attempt to dismantle the tobacco program.

I will not try to paint myself as an expert on the tobacco program. I know there are many others in this Chamber who can speak with greater authority on the specific mechanics of the program. What I would like to address, though, is the effects on small family tobacco farmers if this amendment is successful.

Tobacco is an extremely labor-intensive crop, and it is grown primarily by small family farmers on allotments averaging less than 1 acre in size. More often than not, his tobacco crop is the farmer's principal source of income, and in many cases the owners of these small allotments are retired or widowed.

We must not eliminate the tobacco price support program and the stability provided by the allotment system. If this happens, we would surely be laying the groundwork for the devastation of a significant portion of those 22,000 small family farmers who depend on the income from their tobacco crops to support their families.

In my own State of Tennessee, tobacco accounts for approximately 49,000 jobs, and it contributes over $600 million through direct or indirect benefits to the economy of the State. Among the 22 States which produce tobacco, Tennessee ranks No. 3, and as a cash crop in Tennessee, tobacco stands second only after soybeans. Very little tobacco is grown in my own district, but this makes me no less concerned about the economic consequences that would result if this amendment is adopted.

The loss of income, and the inevitable unemployment that would result from this amendment, are especially serious when you consider that the average income in Southern tobacco producing States is far below the official poverty level in the United States.

If you want to contribute further to the level of economic distress already existing in the family farm sector, I suggest you vote for the amendment. But if you are at all concerned about the future of a large segment of the family farm system as we know it today, you will not support this effort to destroy the tobacco program.

Mr. ROSE. I thank my colleague for his comments.

Mr. HOPKINS. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, if I may take, just a moment to recognize some Members of this body who have worked I think very, very hard on this issue—and I know that there are very strong feelings on both sides. Certainly I think we need to compliment the chairman of the subcommittee, the gentleman from North Carolina (Mr. ROSE); and certainly we would not want to leave out Mr. WALTER JONES from North Carolina, who, I would remind my colleagues, came from the hospital to be here today for this very important issue which he has fought so long and so hard for; certainly Mr. WHITLEY, from North Carolina; Mr. WAMPLER, from Virginia, the ranking minority minority member on the Agricultural Committee; and JOHN NAPIER, a new member of the committee, from South Carolina, who has tirelessly worked on our behalf; HAROLD ROGERS, from Kentucky; certainly we have got to remember people like BILL NATCHER and CARL PERKINS, who have been here longer than most of us.

I want to say, in reference to the amendment that has been offered, that I do not question the sincerity of those who have offered the amendment. Certainly the gentleman from Ohio has given to us an educated statement. But I would say that perhaps he might have been educated beyond his intellect in this particular area.

I think it is important that we get to the basics, because I have read so many "Dear Colleague" letters, saying bad things about tobacco, I have read so many letters from some of my colleagues about bad things about tobacco that I have decided to give up reading.

The fact is that today we have got around 545,000 small farmers raising tobacco in this country. It is the fifth largest cash crop in our country, and it is the No. 1 cash crop in Kentucky. In my district, the average size tobacco farm is 2 acres. That is average. That means that there are literally thousands of farmers who have much less than 2 acres of a farm. Many of my colleagues here in Washington live on lots here larger than the whole tobacco farm of thousands of tobacco farmers in the State of Kentucky.

This amendment will not stop smoking. This amendment will not cure cancer. Let me tell the Members what this amendment will do: It will literally shift the production of tobacco from the small tobacco farmer to the larger corporation. Can the Members imagine what it is going to do to the imports of tobacco and to the balance of trade of this country?

Let me take an example, if I may, of a small farmer somewhere in this country, who just wants to do the right thing, who just wants to be honest and work for a living.

□ 1200

He goes to a banker and says, "I would like to borrow some money to buy this couple of acres out here so that I can support my family." And it has a tobacco allotment on it, and the banker loans him that money based on the fact that he knows that he can raise tobacco on that small amount of land and repay his loan and provide for his family.

Now if this amendment passes today, you are going to remove that man's allotment.

You are going to remove that man's collateral and tomorrow you will literally have bankers all over this country knocking on doors saying, "Your collateral has been taken away because Congress took away your tobacco allotment and I am here to foreclose on your loan."

I do not think we want to cause that type of economic chaos all over this country.

I would urge my colleagues to vote against this amendment.

The CHAIRMAN. The time of the gentleman from Kentucky (Mr. HOPKINS) has expired.

(At the request of Mrs. FENWICK and by unanimous consent, Mr. HOPKINS was allowed to proceed for 1 additional minute.)

Mrs. FENWICK. Mr. Chairman, will the gentleman yield?

Mr. HOPKINS. I yield to the gentlewoman from New Jersey.

Mrs. FENWICK. I thank the gentleman for yielding.

I am totally confused. I was planning to vote for this amendment because it seemed to me that it would free a lot of land that might be adaptable for tobacco to somebody who wanted to raise tobacco, who now cannot do it because he cannot get one of these expensive allotments. Am I wrong?

Mr. HOPKINS. I think the gentlewoman is wrong, and I know that the gentlewoman is sincere, and I know based on the gentlewoman's record that she wants generally to do the right thing. I would encourage the gentlewoman to reconsider that position.

Mrs. FENWICK. It is not only a question of wanting to do the right thing. It is a question of getting the right answer.

Mr. HOPKINS. I have just given it to the gentlewoman.

Mrs. FENWICK. I cannot do the right thing without a clear answer.

I would like to ask the gentleman, am I wrong in thinking that with this amendment a man would be able freely to go into a bank and say, "I have got 3 acres. I am now growing corn. I want to grow tobacco, lend me some money." Could he do that?

Mr. HOPKINS. No.

Mrs. FENWICK. Why not?

Mr. HOPKINS. Because he is not going to be guaranteed of a minimum price for tobacco, No. 1.

Mrs. FENWICK. Who guarantees?

Mr. HOPKINS. The CCC.

Mrs. FENWICK. Who guarantees the price now?

Mr. HOPKINS. It is set by the Secretary of Agriculture.

Mrs. FENWICK. What does that mean? Who pays it?

The CHAIRMAN. The time of the gentleman from Kentucky (Mr. HOPKINS) has again expired.

(At the request of Mr. SHAMANSKY and by unanimous consent, Mr. HOPKINS was allowed to proceed for 1 additional minute.)

Mr. WAMPLER. Mr. Chairman, will the gentleman yield?

Mr. HOPKINS. I yield to the gentleman from Virginia.

Mr. WAMPLER. May I say to the gentlewoman from New Jersey (Mrs. FENWICK) that, as the law is presently constituted, the tobacco price support program is financed through loans from the Commodity Credit Corporation.

The record will show that these loans have been repaid with interest so the cost to the taxpayer is minimal or none.

Mrs. FENWICK. If the gentleman will yield, why do we have to have loans then? The taxpayers put up the money for the loans; is that right?

Mr. WAMPLER. Yes.

Mrs. FENWICK. Why do they not borrow from the banks, as our colleague has described?

Mr. WAMPLER. The fact of the matter is that a lot of tobacco growers get private financing in order to put their crop into the ground to harvest it. Then when the crop is marketed or sold, if it does not bring the price support that has been placed upon it by the Government, then it goes into loan, usually through a cooperative. Those loans are ultimately repaid with interest as the crop moves into the normal channels of trade.

Mrs. FENWICK. That is an anticonsumer arrangement. Because when the gentleman is saying the tobacco will not bring the price, the price would otherwise have been lower, would it not?

Mr. WAMPLER. Not necessarily.

Mrs. FENWICK. Why is it not the purpose of the commodity to give a certain price——

Mr. WAMPLER. A certain parity of price, and parity is considered what is a fair price.

Mrs. FENWICK. If the tobacco farmer could sell it in the fair market he would not have to lean on the Government for this.

Mr. WAMPLER. The history, I think, would be that when we did not have the price support program, indeed, the tobacco farmer would not get a fair price for his product.

Mrs. FENWICK. Why could he not simply go out of the tobacco business and into another?

The CHAIRMAN. The time of the gentleman from Kentucky (Mr. HOPKINS) has expired.

Mr. WAMPLER. Mr. Chairman, I move to strike the requisite number of words.

Mr. DUNCAN. Mr. Chairman, will the gentleman yield?

Mr. WAMPLER. I yield to the gentleman from Tennessee.

Mr. DUNCAN. Mr. Chairman, I rise in opposition to the amendment.

Mr. WAMPLER. Mr. Chairman, at the outset may I read a letter from Richard E. Lyng, the Deputy Secretary of the Department of Agriculture, so that we at least can understand where the administration is coming from and that their position is clear on the pending amendment.

This letter was dated the 19th of October, and addressed to me.

It reads as follows:

This is in reply to your recent request concerning the Department's views on possible changes in the tobacco price support program. At this time, we do not support any major changes for several reasons.

As you are aware, the tobacco price support program has permanent authorization under the Agricultural Adjustment Act of 1938, and the Agricultural Act of 1949. The Department did not include any changes in the tobacco program as part of the Administration's Farm Bill because of the many other programs which must be reauthorized. Since there are so many controversial and complex issues surrounding the programs that must be reauthorized for the next four years, the Department believes that major changes in the tobacco price support program would be counterproductive at this time.

In addition, the tobacco support program is an important part of our economy with over 200,000 farms and 545,000 allotment holders. Many are small farms that depend on tobacco for most of their income. While tobacco represents only 0.3 percent of the Nation's cropland, it accounts for about 4 percent, or approximately $3 billion, of total crop sales annually. Over one-third of the tobacco crop is exported, contributing about $2.5 billion to our trade balance.

I am sure you know that there are no direct Government payments to tobacco producers. Rather, loans are made to cooperative associations to pay advances to growers for tobacco that does not sell for at least the price support rate. Loans are repaid with interest. Historically, the cost to the Federal government has been small. Also, a recent change in the law requires tobacco producers to pay the full cost of grading and inspection services that historically have been borne by the Federal government.

Thank you for giving us the opportunity to respond on this important matter.

Again, Mr. Chairman, this was signed by Richard E Lyng, who is Deputy Secretary and was the Acting Secretary of Agriculture at the time this letter was signed.

Mr. SHAMANSKY. Mr. Chairman, will the gentleman yield?

Mr. WAMPLER. I yield to the gentleman from Ohio.

Mr. SHAMANSKY. I thank the gentleman for yielding.

I am asking this because the reference was made to my intellect. I wanted to inform the gentleman that I will give back my Phi Beta Kappa key and my Harvard Law School degree. Obviously I do not have a sufficient intellect to comprehend all of this.

Mr. WAMPLER. I do not think that the gentleman from Virginia has questioned the intellect of the gentleman from Ohio, but he certainly would question the gentleman's judgment.

Mr. SHAMANSKY. That I have no objection to.

Mr. WAMPLER. I think that it is important that we understand what the cost of the tobacco program has been to the taxpayers of this country. On July 15 of this year, the Subcommittee on Tobacco and Peanuts held a hearing on two bills that were directed to a special type of tobacco, Maryland type 32 tobacco.

One of the witnesses in that hearing was Hoke Leggett, who is Associate Administrator of the Agricultural Stabilization and Conservation Service of the U.S. Department of Agriculture. Let me read briefly a colloquy I had with Mr. Leggett and I asked this question:

For the record, will you tell this committee what the cost of the tobacco price support program to the taxpayers is?

Mr. LEGGETT. I believe I go back to the testimony which has been given that since 1938 it is about $57 million.

Mr. WAMPLER. In arriving at that figure, what constitutes that $57 million? Is that administrative costs to the taxpayers for the individuals involved in the price support program?

Mr. LEGGETT. No, sir; these were costs directly to the program. Back, I believe, in the middle 1960's we had 5 cents per pound export subsidy for tobacco and most of it accrued during that time.

Mr. WAMPLER. Would you repeat for the record the figure that you just said, the cost since the inception of the program? Did you say 1938?

Mr. LEGGETT. 1938 through 1979. I guess we do not have the last figures for the 1980 crop in there. It is approximately $57 million.

I want to say to my conservative friends who are concerned about fiscal responsibility, here is a program that has cost the taxpayers very, very little. As a matter of fact, tobacco products produce more than $6 billion in excise taxes at the Federal, State, and local levels.

As I indicated earlier, it provides $2½ billion in export sales, something that contributes very positively to a balance in our trade with other nations.

The CHAIRMAN. The time of the gentleman from Virginia (Mr. WAMPLER) has expired.

(At the request of Mr. FINDLEY and by unanimous consent, Mr. WAMPLER was allowed to proceed for 3 additional minutes.)

Mr. FINDLEY. Mr. Chairman, will the gentleman yield?

Mr. WAMPLER. I yield to the gentleman from Illinois.

Mr. FINDLEY. I thank the gentleman for yielding.

I must say that the Members of this body are confronted with an unusual situation. In my view, the allotment system for tobacco harkens out of the past, a sort of feudal system like the peanut system. Unlike peanuts, tobacco has been determined by the Surgeon General to be a menace to health.

So it seems to me that there is a strong argument against the Shamansky amendment in that it would tend to make it easier for tobacco to be produced freely in this country, reduce the price of it, and make it more plentiful.

If the Surgeon General is correct, broader production and consumption would hardly be in the public interest.

At the same time, I think it is unacceptable for taxpayers to help subsidize the production of this commodity, and, to be sure, the subsidy item is a very small one, but it ought to be eliminated totally.

I would like to give notice to my colleagues that later on in consideration of the bill I will offer an amendment which will require a change in rules and regulations so that there will be no subsidy to the tobacco program whatever. I hope my colleagues will join me.

Mr. WAMPLER. I thank the gentleman and let me say again the growers have taken a reduction in the cost to the taxpayers in that the growers now are paying for the cost of grading and inspection, which was previously borne by the taxpayers of this country.

One can have one view or the other about tobacco. As I view it, it is an important agricultural commodity. It is entitled to be considered on its merits, like any other commodity.

The Committee on Agriculture does not have jurisdiction over health-related issues. That jurisdiction rests with other committees of the Congress.

As long as it is a legal product, and so far as I am aware it has not been declared to be illegal, it is entitled to be considered on its merits. I would ask this committee to permit this program to continue to work.

I would say to my colleague from Ohio that if he succeeds in destroying the tobacco program, it is the best way that I know to increase the public welfare rolls of the country.

In my district, in southwest Virginia, the average allotment of tobacco is less than 1 acre. These are small farmers. They are not large wealthy farmers. This is in many cases the sole source of their cash income. If we take that away from them, then they will be candidates to go on public assistance. Why should we here destroy a program that is working effectively, that is providing a means of livelihood for many of our small farmers and put them on public assistance? It simply does not make sense. This program has worked and we should soundly reject this amendment.

The CHAIRMAN. The time of the gentleman from Virginia (Mr. WAMPLER) has expired.

(At the request of Mr. BROYHILL and by unanimous consent, Mr. WAMPLER was allowed to proceed for 3 additional minutes.)

Mr. BROYHILL. Mr. Chairman, will the gentleman yield?

Mr. WAMPLER. I yield to the gentleman from North Carolina.

Mr. BROYHILL. I thank the gentleman for yielding.

I rise in opposition to this amendment and I appreciate the remarks that the gentleman from Virginia has just made.

The author of the pending amendment, Mr. SHAMANSKY, has said that the tobacco program is not working. I differ with him. The program is working. Thousands of farm families are making their livelihood as a result of this program and there will be a mass exodus from the farms in the Tobacco Belt if this amendment passes.

Now, that was the point the gentleman from Virginia was just making and I wonder if he would reiterate that. But another point that I was concerned about is the cost to the taxpayers of this program.

I had thought that perhaps there should be some expression in the House that this program is going to be operated in a fashion that would not be a cost to the taxpayer.

Is the gentleman planning to offer an amendment to assure Members of that fact?

Mr. WAMPLER. I will respond to my colleague from North Carolina (Mr. BROYHILL) by saying it is my understanding that later in the debate amendments will be offered. The gentleman from Virginia does not expect to offer such an amendment. But I think I could support it.

I think, as the record clearly shows, the cost to the taxpayers has been minimal, and if indeed every commodity program is going to start carrying its own, then naturally I think those in the tobacco industry want to do that, and I hope our friends that represent other commodities are prepared to do the same.

I will just say to the gentleman, I would support any reasonable language to effecutate that end, and I will say to the gentleman also, as the ranking member of the Committee on Agriculture, that I will work with my colleague from North Carolina (Mr. ROSE) or anyone of good will on this question. I am sure that we want to make it self-supporting if in fact it is not. I think it is, but we are prepared to address these amendments as they are presented.

Mr. BROYHILL. I thank the gentleman.

Mr. McEWEN. Mr. Chairman, will the gentleman yield?

Mr. WAMPLER. I yield to the gentleman from Ohio.

Mr. McEWEN. I thank the gentleman for yielding.

I would like to associate myself with the comments that have been very well made here today by the gentleman from Virginia, especially as they refer to the fact that the small farmer will be injured. As the gentleman from western Virginia, the gentleman from Kentucky (Mr. PERKINS), and those of us in southern Ohio are well aware, much of this land is not suitable for virtually any other purpose. It is rocky. It does not possess the necessary nutrients to raise other agricultural products. Yet because of this program the farmer can go out, virtually on his hands and knees, and clear a quarter of an acre, a half an acre tobacco plot in order to bring in what is in many instances 50 to 60 to 70 percent of his annual income. He is often completely dependent upon this sole source of income. It is absolutely vital for us to remind ourselves, prior to taking any precipitous action, from those who represent districts who are fortunate enough to have highly industrialized bases and tourists that can visit here and have substantial incomes, to recognize that we are talking about the area of the country that is virtually tied to the land in this manner. It is an action that we should not take lightly.

□ 1215

Mr. JONES of North Carolina. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I would like to address my remarks perhaps to a question that has been raised on this side of the aisle as to the number of hearings and the research and has gone into the validity of this program.

It seems like we are reacting a drama that appeared here about 4 years ago. On that side of the aisle was one of the best friends I had, Jim Johnson from Colorado. Jim at that point in time had identically the same amendment we have before us today. He was sincere. We were friends. We ate together. We palled together; but out of that friendship and out of a mutual understanding on this House floor, as chairman of the Subcommittee on Tobacco at that time, I made a solemn promise which I kept in good faith that I would take my subcommittee into every area of the tobacco producing States and see if, indeed, there were other commodities, soybeans, corn, wheat, whatever, that could replace the cash income that is derived from tobacco.

Now, bear in mind when we talk about cash income; we are talking about 500,000 people or families who are dependent in part or totally on tobacco for their livelihood.

First we went to Valdosta, Ga., and there we had the opportunity to discuss with the agriculture economists from the University of Georgia their honest opinion as to what could replace tobacco as cash crop to contribute to the farm economy which is so important to this entire Nation.

Bear in mind that the farmer is the Nation's largest customer of all commodities.

Be that as it may, we were told that, "Oh, yes, you can replace tobacco, but to get the same amount of cash flow, the same amount of cash return from 1 acre of tobacco for that given year," I have forgotten what it was, "it would take 14 acres of soybeans, or if you want to replace 1 acre of tobacco with the cash that it would bring in, it would take 15 acres of peanuts."

Well, my friends, may I remind you that there is not that much land available in the Southern States to expand into that type of thing. So what I am trying to reassure the gentleman from Montana and others, hearings have been held. They have been impartial hearings. They have been hearings that were trying to get at: Is there a substitute for the tobacco program? And without exception, the answer comes out no. There is nothing, there is no farm program that has had the success or has produced the results as has the tobacco program since 1933 or 1934, whenever it was enacted.

Money has been mentioned here, about the cost. I believe the gentleman in the well before me mentioned some $56 million for the entire 50-some-odd years this program has been in effect. At the same time, he also mentioned, and I think it is important to know, that of all our agricultural commodities, tobacco is the only one that I know of that produces anywhere near $7 billion a year in taxes to the various levels of government of this United

States. I urge the defeat of this amendment.

Ms. FIEDLER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in support of the amendment.

Several months ago during budget deliberations I had the opportunity to raise a similar amendment. It was the only amendment, I might add, during the course of our deliberations before the committee which was deferred to another day. I found out, as somebody new to Congress, why that deferral took place. By the time the vote actually came down, it was quite close, but I was not successful in gaining passage of my amendment.

Following that debate and discussion, a number of Members who had voted against the amendment came to me and told me that personally they philosphically supported what I was trying to do, but for one reason or another they felt they could not support the amendment at that time.

My argument at the time when I proposed that amendment was that I believed, based upon health conditions in this country and the negative impact of tobacco use on the health of the people of our country, that it was inappropriate for us to consider public policy which supported an approach which was inconsistent on its face with the health of the American people.

As a person who formerly operated a pharmacy, I have had the opportunity to see the deleterious effects on the health of individuals who use tobacco.

I feel that for us to encourage that use by supporting financially in any way, shape, or form, this particular industry, that it is a disservice to the people of this country.

Mr. GLICKMAN. Mr. Chairman, will the gentlewoman yield?

Ms. FIEDLER. Yes, I would be happy to yield.

Mr. GLICKMAN. I respectfully disagree with the gentlewoman on the public policy question. I think the gentlewoman is correct, that tobacco may prove to be a serious health concern, but if we adopt this amendment, we make the ability to grow tobacco in greater quantities and at cheaper prices a very real possibility throughout this land. That will in fact encourage, not discourage, people to smoke.

I think that while the current tobacco program certainly does not fall within what we call classic market economics, it does protect and limit the growth of tobacco in America. I think that has a positive public policy implication, and not a negative one. I urge rejection of the amendment.

Ms. FIEDLER. I appreciate the difference of opinion which we share on this, but it is my personal belief that it would be up to the individuals who might choose to go into that business to finance it on their own without the assistance of the American taxpayer, who is being asked to support this and then on the other hand also being asked to support huge anti-cancer programs through the National Institutes of Health.

I further would like to make one additional point, if I may, and that is a point regarding the economic impact. We have heard numerous comments from numbers of speakers who take about the terrible impact if we do not continue to produce and support tobacco. Well, I think that is using the same kind of argument as one might choose to use to say that to do away with crime would necessitate a loss of jobs on the part of our police force and law enforcement agencies. I do not personally believe that is a legitimate and valid argument.

Mr. SHAMANSKY. Mr. Chairman, would the gentlewoman yield?

Ms. FIEDLER. Yes; I would be happy to yield.

Mr. SHAMANSKY. I thank the gentlewoman.

I would like to point out that a 30-percent drop in the price of tobacco would affect the price of a pack of cigarettes by 1 cent; so the idea that there is a great problem here because it encourages people to smoke is nonsense. Anyone who is concerned about that will have no trouble, and apparently President Reagan will soon ask that excise taxes be raised anyway, so we can make up for that without any problem.

Ms. FIEDLER. I thank the gentleman. I appreciate his comments.

Mr. ASPIN. Mr. Chairman, I move to strike the requisite number of words.

Let me, Mr. Chairman, talk a little bit about the substance rather than the politics of the issue. I come from a State which is a dairy State and essentially I started out very sympathetic to the position of the gentleman from Ohio (Mr. SHAMANSKY), but the more I got involved and interested and began looking at the issue on its merits—never mind the politics of the thing, just the substance, the merits of the issue—I have come to the conclusion that, in fact, the amendment is not a very good idea.

This position hinges on two different points. I would like to enter into a colloquy with anybody on these points because I think they are the central points of the argument. One is the question about whether this is or is not costing the taxpayers any money. If it is not or to the degree it is not costing the taxpayers money, then I think the amendment is not necessary.

The second point is what happens if this amendment is defeated or passed. How does it change the tobacco production process? How does it change the price, and what does that have to do with what is going on in terms of tobacco growing and smoking and other things?

So the first point, as I understand it, the costs to the taxpayers have been to a great extent eliminated. We started out with a program at one point where the loan program was subsidized. They had an interest subsidy. That was eliminated by a directive. The administration eliminated it by direction.

There was a second cost and that was the cost of grading the tobacco, but that was eliminated. It was eliminated by us in the reconciliation bill which passed through the Congress several months ago. Those were the two main costs associated with the tobacco program.

In fact, after you eliminate those costs, there are almost no other costs involved. In fact, even the administrative costs to the Government of operating the quota system, if that entails some kind of cost, there is interest in the Agriculture Committee for doing away with that. The costs to the taxpayers I think have been eliminated.

Mrs. FENWICK. Mr. Chairman, will the gentleman yield?

Mr. ASPIN. I yield to the gentlewoman from New Jersey.

Mrs. FENWICK. Just a little thing about cost, and I am sorry that my education in tobacco is taking place at the cost of so much time to my colleagues.

When the commodity people want to pay the farmer that price which he considers his profit and so on requires, they have to go into the money market to pay it, so that certainly that increases the cost to the taxpayers and forces up the interest rates through the Government agency again going into the credit markets, does it not?

Mr. ASPIN. Oh, yes; for sure there is probably some added cost to interest; but in the light of a $65 billion deficit which we had last year, and not to reopen the old argument that the Reagan program is going to produce in 1982, we are talking about a relatively small amount of addition to what already will take place.

Mrs. FENWICK. Yes; but if the Commodity Corporation did not pay such a high price and did not go into the market for so much money, then we would have a lower priced commodity to export.

Mr. ASPIN. No.

Mrs. FENWICK. We have lost half our export market.

Mr. ASPIN. No; it leads to the second point, which is what happens if this amendment succeeds. I think the first point is that it does not cost the taxpayers money. I think we really can establish that.

But the second point is, if I can explain, the question is if this amendment passes, what will happen is that the quota system will be broken up.

More people at that point can grow tobacco. It will open it up for other people to come in and grow tobacco. We had arguments here about whether those will be small farmers or large farmers, but in any case more people will come in.

When more tobacco is produced of course the price of tobacco as a consumer product will go down. Now, if this were any other product, I think that would be a good thing. From a public policy standpoint, we are lowering the cost to the consumer.

Mrs. FENWICK. Yes; but the peanut people did not agree.

Mr. ASPIN. Let me finish. If this were any other product, that would be a good thing that we are lowering the cost to the consumer; but here we are lowering the cost to the consumer of a product, namely tobacco, which people are smoking and which causes health problems.

So the question is, why are we lowering the cost to the consumer and encouraging people in effect to smoke?

Mrs. FENWICK. Well, we have had debate on the floor here that the difference to the consumer would be 1 cent per package, so it is not much encouragement.

What it would do is to encourage our export trade, because our price here is above the world market.

Look, we dismiss the Commodity Credit action as though it were nothing, but that is Government action.

Mr. ASPIN. Wait a minute, the gentlewoman is covering a whole bunch of different points.

The CHAIRMAN. The time of the gentleman from Wisconsin has expired.

(By unanimous consent, Mr. ASPIN was allowed to proceed for 2 additional minutes.)

Mr. ASPIN. The point is on the export trade, whatever is happening to amount, our export earnings are going up.

Yes, the amount exported is being reduced, but the export earnings are going up.

The really critical thing is that this is a different product. What we are talking about here is a product that we do not want to encourage people to use in smoking.

Why are we doing this? Let me explain. The original bill from the gentleman from Wisconsin (Mr. PETRI) which cannnot be offered here because it is not germane, recognized the fact that by breaking up these allotments, we would be lowering the cost of tobacco. The gentleman had an additional tax in his bill and the additional tax was to offset the drop in price so that we would not have this effect of encouraging tobacco consumption; but the Shamansky amendment without that increase in tax is, in fact, encouraging people to smoke.

Mr. SHAMANSKY. Mr. Chairman, will the gentleman yield?

Mr. ASPIN. I would be happy to yield.

□ 1230

Mr. SHAMANSKY. With respect to the question of income, CRS has determined if the program is eliminated, tobacco farmer income would rise.

It is terribly important to keep in mind that in North Carolina alone there are only 30,000 farmers, but 115 allotment holders. So the farmers have to pay something like $1,000 an acre to these allotment holders who get this Government bonanza. The crocodile tears for the poor farmers—there are allotment holders who control this whole program.

With respect to who gets the difference, what is it about an allotment holder who does not farm that is more worthy of this benefit than is the U.S. public? If you are concerned about the prices and do not want to encourage anyone to smoke, then fine, put in a tax, if you wish, which the President is going to do anyway, and then everybody can benefit from that.

Mr. DAN DANIEL. Mr. Chairman, I ask unanimous consent that the gentleman from Wisconsin (Mr. ASPIN) be allowed to proceed for 2 additional minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Virginia?

Mr. EDGAR. Reserving the right to object, and I will not object, but I reserve the right to object just to point out the fact that there have been two speakers in support of the gentleman's amendment, the gentleman and one other speaker, and there have been several speakers who have taken the floor and asked for additional time to speak against the gentleman's amendment.

I think in fairness to the colloquy, I would hope that there is no action taken on the part of the chairman to limit the debate, because we want to have a full and accurate debate, and there are a number of us who do not serve on the committee who have been unable to be recognized.

Mr. Chairman, I withdraw my reservation of objection.

The CHAIRMAN. Is there objection to the request of the gentleman from Virginia?

There was no objection.

Mr. ASPIN. I thank the gentleman.

If I could just respond to the gentleman from Ohio on his point, I do not know the arguments about whether this is going to hurt the small farmer or help the small farmer, or what it is going to do. All I am saying is, from a public policy standpoint, if this thing costs nothing to the taxpayer, or virtually nothing to the taxpayer, and if by passing the amendment of the gentleman from Ohio we are not saving the taxpayer any money, and we are lowering the price of tobacco and thereby encouraging smoking, I do not understand from a public policy standpoint what the sense of this is.

Mr. SHAMANSKY. Mr. Chairman, will the gentleman yield?

In talking about costing the taxpayer, it costs the American economy, and that affects all taxpayers.

Mr. ASPIN. I do not understand how the——

Mr. SHAMANSKY. Because we have priced ourselves out of the market. And Senator HATFIELD pointed out——

The CHAIRMAN. The gentleman from Wisconsin (Mr. ASPIN) controls the time. The gentleman continues to have time, and he controls it.

Mr. DAN DANIEL. Mr. Chairman, will the gentleman yield?

Mr. ASPIN. I yield to the gentleman from Virginia.

Mr. DAN DANIEL. I thank the gentleman for yielding. I would like to respond to the gentlewoman from New Jersey (Mrs. FENWICK). She asked two questions. I think I can give the gentlewoman a partial answer.

First, why does not the farmer go to the bank and borrow his money? I was a tobacco farmer before the program went into effect. The banks were reluctant to make the loans, because it is such a hazardous operation. Growing tobacco is a risky business. Allotments have increased land values substantially making loans more attractive.

The gentlewoman raised the question about the effect on interest rates. If we had to go into the money market and borrow $80 billion which we would not have except for tobacco taxes, that would have a very adverse impact on interest rates.

Again I thank the gentleman for yielding.

Mr. NEAL. Mr. Chairman, will the gentleman yield?

Mr. ASPIN. I yield to the gentleman from North Carolina.

Mr. NEAL. I thank the gentleman for yielding.

Mr. Chairman, I wanted to respond to a couple of points just made. First, one on the question of exports, as I recall, our favorable balance of trade in tobacco last year was about $2 billion. We exported about $2.4 billion worth of tobacco and imported about $400 million.

The CHAIRMAN. The time of the gentleman from Wisconsin (Mr. ASPIN) has again expired.

(On request of Mr. NEAL and by unanimous consent, Mr. ASPIN was allowed to proceed for 2 additional minutes.)

Mr. NEAL. Mr. Chairman, I also wanted to make a comment about the question of whether or not this program benefits small family farmers. This program is put to a vote of growers and allotment holders periodically. The last time the vote was taken, 97 percent of the people involved in the

program voted for it. Now, these are the people directly involved in the tobacco program, the allotment holders and the farmers, and if they did not think it would benefit them, they certainly would not vote for it.

Mr. SHAMANSKY. If the gentleman will yield, he is confusing allotment holders and the farmer. Any allotment holder who voted against this would be insane. Do not confuse him with the farmer. He does not have standing to vote. I have never heard of anybody who receives an unearned bonanza from the Federal Government who does not want to keep it.

Mr. NEAL. The gentleman is mistaken. Lessees vote also. It is not just the allotment holders who vote. So everyone who is involved in this program, in the growing of tobacco, the small family farmers, vote for it.

One other point, it has been pointed out here several times that this is not a perfect free-market operation, and that is correct. But this is a Government program that has worked for almost 50 years. It works for the benefit of the farmers, the tobacco manufacturers, the American public. It does not cost much money.

Mr. Chairman, I would just remind people that free enterprise has produced the most dynamic, the most productive, the freest economy in the world. But it is not perfect. There are imperfections. For that reason, over time we have tried to make corrections in that system, and this is one of those adjustments that we have made that has worked. It has worked for almost 50 years. There is very little cost. In the words of an old sage, "It ain't broke." I just say, "Since it ain't broke, don't fix it." Now Mr. Chairman, I would like to elaborate further on this very important issue.

Mr. Chairman, we are engaged in debate which will determine, in a very real way, what happens to several hundred thousand small farmers who have earned a living—most of them all of their adult lives—in the cultivation of tobacco.

The vote we are about to take also will determine, in more than a symbolic way, whether the Congress of the United States is sympathetic toward the small, family farmer—or is willing to sacrifice this way of life, as well as this means of earning a livelihood, to the several golden calves that have been paraded before us during these deliberations.

I do not rise to argue the smoking issue, because this vote has absolutely nothing to do with whether people will continue to use tobacco. Should the amendment before us pass, it would not cause one fewer plant of tobacco to be grown, or one less person to smoke.

Nor is my purpose to justify a substantial Federal outlay to support the tobacco program. The truth of that matter is well established. The tobacco program costs the Government practically nothing, and essentially has paid its way throughout its 47-year history.

I plead, instead, for the economic well-being of my district, my State, and the other regions of our Nation which since colonial days have depended on tobacco production and manufacturing as the backbone of their agricultural economy. More especially, I argue for the some 12,000 people in my congressional district and the some 500,000 nationwide who depend in whole or in part on the tobacco program to protect their ability to earn a living.

Mr. Chairman, I cannot escape the feeling that many of my colleagues who support the amendment before us, however well intentioned, simply do not understand what the tobacco program is, and what it means to the people who grow tobacco. I get the uneasy feeling that they envision an antebellum scenario of land barons using underpaid laborers to produce great fields of golden tobacco—which in turn is converted to bales of dollars, with excess production being bought by the Government and stored in great warehouses until it rots.

That is not the way tobacco is grown, nor is it the way the tobacco program works. The typical tobacco farmer does not own a plantation, does not drive a Cadillac, and is not an overseer of an army of field hands. In fact, he owns less than 50 acres of cropland, if any at all, and hires no labor except during the harvest season, and plants from 3 to 6 acres of tobacco.

He may be an industrial worker who continues to live on the farm and use family labor to grow a small crop of tobacco to supplement his wages. He may be a lifelong tobacco farmer who has retired—or a widow living on the small farm she and her husband tilled—and now rents the tobacco allotment to provide a meager supplement to inadequate social security benefits.

Mr. Chairman, we have heard some unfounded arguments here about what a profitable crop tobacco is, and that the small farmer will get along all right if his allotment is taken from him. Comparisons are made between the per-acre income from tobacco and that of small grain or other crops, the clear inference being that owning a tobacco allotment is very much like owning an oil well. You just plant or rent the allotment, then sit back and wait for the profits to roll in. Well, Mr. Chairman, in my section of the flue-cured tobacco belt, 62 percent of the families engaged in tobacco farming have one or more family members working at another job to make ends meet. Forty percent of the operators have a second job, as do 32 percent of the wives in the entire flue-cured area, 27 percent of the operators have less than an eighth grade education; 58 percent, less than a high school diploma. Thirty-seven percent are older than 55 years, and 12 percent older than 65. Eighty-one percent are older than 35, which is a good indication that most are pretty late in life to consider taking up another occupation.

I submit, Mr. Chairman, that is exactly what a great many of my people would have to do if we were to destroy the tobacco program. Without production controls, I am convinced there would be a vast overproduction for the first few years after the controls were removed. Without a floor on prices, the small operators would be forced, through losses, to stop production and to abandon their investment in land and equipment.

Others have pointed out that a tobacco allotment adds to land value, both for tax and sale purposes. If the producer bought the land on which he now grows tobacco, he paid extra for the right to grow tobacco. If he inherited it, his forbears paid for it with the backbreaking toil necessary to grow tobacco. And his family may have been engaged in that occupation since the early days of the Republic.

Moreover, he will have thousands of dollars invested in curing barns and machinery, all of which will be useless to him if he is forced out of production.

It should be noted, also, that not all tobacco growers are landowners. Many are sharecroppers, both white and black, who will stand to lose not only their annual income, but the very roofs over their heads if the tobacco program is abolished.

Mr. Chairman, there is another cause for which I plead, and it has to do with the concern our great Government has had historically for people who, without our concern, are unrepresented in our society.

We have, in our free market and free enterprise system, the greatest economic system the world has ever seen. It works extremely well for the vast majority of all Americans, but not quite so well for a few. I think we have recognized, over the 200-plus years of our history, that special provisions should be made for those who "fall through the cracks" of our economic system. I believe all farmers, including tobacco farmers, fall into this category, and ever since the 1930's, at least, we have been willing to make these provisions for the general welfare of our Nation.

We are now being told by this administration that the free market system is perfect for everyone, and that anything it cannot do is not worth being done. Government, we are being led to believe, is the enemy, not the friend, of the American people—especially when it seeks to provide for

some of the things enumerated in the Preamble to the Constitution.

Mr. Chairman, I think that is a shortsighted view of our own history resulting in bad policy decisions and I think that it portends a meager harvest in the not too distant future. I just do not believe it is right to say to the American farmer, inlcuding the tobacco farmer, that he must farm on a grand scale, or get out of the farming business.

Mr. Chairman, that is what this amendment is saying to the tobacco farmer. It is saying to thousands of small farmers who have taken pride in their labor that they will have to put aside their plows and lean on something else for sustenance and satisfaction. For some it will be the loss of their land, for others the welfare rolls. For some it will be the end of a way of life, the dignity of earning an independent living, the waste of the only talent and expertise they have or will have had.

I submit that that is not the American way. I therefore strong urge defeat of the amendment.

Mr. NATCHER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, tobacco is produced in 118 of the 120 counties in Kentucky. As most of the Members and this committee knows, tobacco is produced on some 550,000 farms by about 700,000 people. Adoption of this amendment by the distinguished gentleman from Ohio would simply mean that tobacco would then be produced in every backyard and on the top of every hillside. There would be no control whatsoever.

This is a controlled program, Mr. Chairman—acreage and poundage control. The farmer votes this program; he votes it on himself. Then the program is controlled by the Department of Agriculture.

You know, Mr. Chairman, this is a right easy amendment for the distinguished gentleman from Ohio to offer. They do not produce a stalk of tobacco in Columbus. They do not produce a stalk of tobacco in Franklin County. I know a little bit about Franklin County. I know in the State of Ohio they produce tobacco in the district of my friend, the gentleman from Ohio, Mr. MCEWEN. In the State of Ohio they produce tobacco in the district of my friend, the gentleman from Ohio, CLARENCE MILLER. Those two gentlemen naturally are very much concerned about this amendment.

This is an awfully easy amendment for the gentleman who sits here on my left to introduce.

Mr. Chairman, one of the major sponsors of this amendment is from the State of Washington, one of the able Members of the House, and a friend of mine.

Mr. Chairman, I remember last year when we had Mount Saint Helens erupting, causing hundreds of millions of dollars of damage to the State of Washington and loss of lives. The gentleman from the State of Washington, together with our other friends on his side and our side, asked us for some help. We had a supplemental appropriation bill pending, Mr. Chairman, at that time. The chairman of our committee, the gentleman from Mississippi, Mr. WHITTEN, held that bill up for several days until we could get the budget estimates for the Mount Saint Helens disaster and include it in that appropriation bill. We held hearings. We put in $784 million to help the great State of Washington. We carried that bill to conference, Mr. Chairman, and in the conference we found we made a mistake in the amount. We increased that amount to $952 million.

Hundreds of millions of dollars in damages in the great State of Washington, and a number of people lost their lives. Not a stalk of tobacco is produced in that State, Mr. Chairman.

Now, what about the State of Wisconsin? One of the major sponsors is from the State of Wisconsin. Not a single stalk of tobacco is produced in that district.

Mr. Chairman, since I have been a Member of Congress, we have had matters pertaining to New York City, pertaining to Chrysler, pertaining to low-income fuel legislation, pertaining to trade adjustment money. The members of our subcommittee, Mr. Chairman will tell you that every time we marched up on the front line to help these people. That is the kind of a country I want to live in, Mr. Chairman.

Certainly we could not let New York City, one of the great cities in the world to go under. Under no circumstances would I cast a vote and say to the Members of this committee, "This does not help my hometown of Bowling Green even if it might save New York City.

Mr. Chairman, we live in that kind of a country. We need help in the States that produce tobacco.

Certainly it is an easy amendment for the three gentleman to offer.

We need help, Mr. Chairman. We ask all of our friends to help us defeat this amendment.

Mr. PHILLIP BURTON. Mr. Chairman, will the gentleman yield?

Mr. NATCHER. I yield to my friend, the gentleman from California (Mr. PHILLIP BURTON).

Mr. PHILLIP BURTON. I thank the gentleman from Kentucky for yielding to me.

Mr. Chairman, I would like to associate myself with the gentleman's remarks, and I rise in opposition to the amendment.

I think it very useful for all of us to be reminded, as our distinguished friend has reminded us, that we are a great and diverse country. We all, on almost any given issue, represent a minority of the national populace.

The CHAIRMAN. The time of the gentleman has expired.

Mr. PHILLIP BURTON. Mr. Chairman, I ask unanimous consent that the gentleman from Kentucky (Mr. NATCHER) be allowed to proceed for 5 additional minutes.

Mr. EDGAR. Mr. Chairman, reserving the right to object, I reserve the right to object because, first of all, the only people being recognized in this debate are those who do not support the gentleman's amendment.

Secondly, I do not think that it helps the arguments of this debate to go on a personal, vindictive attack.

I will not object to the additional 5 minutes, but I would hope that the additional speakers would tone their comments. Each of us, as Members of Congress, has a right and responsibility to offer amendments that offer our best judgment. I, for one, as one Member of the House, resent the personal attacks that were made in the last speaker's comments.

Mr. Chairman, I withdraw my reservation of objection.

The CHAIRMAN. Is there objection to the request of the gentleman from California (Mr. PHILLIP BURTON)?

There was no objection.

Mr. PHILLIP BURTON. If the gentlemen will yield further, this is a great and diverse country. Those of us from the urban and suburban areas must recognize clearly that the rural community is a minority of the national American community. Some 4 percent or so of our people produce the food and fiber that gives us, as a Nation, not only that which we place on our table, but it helps enormously in terms of our balance of trade and balance of payments.

I think it very ill advised that my colleagues from the urban and suburban areas do not recognize the unalterable historical fact that every depression this country has ever had inflicted upon them has started in rural America. This farm program that we have and this tobacco program that we have is good for rural America; it is good for small rural farms. We ought to recognize that reality.

We ought to reject this amendment and get on with the business of the House.

Mr. MITCHELL of Maryland. Mr. Chairman, will the gentleman yield?

Mr. NATCHER. I yield to the gentleman from Maryland.

Mr. MITCHELL of Maryland. I thank the gentleman for yielding.

Mr. Chairman, when this tobacco issue first came to my attention, I will be quite candid with you: My first re-

action was, why in the world should I support that kind of program when there are some who favor the program who voted to slice housing funds, CETA funds, education funds, who gleefully supported the Gramm-Latta proposition, which I think was a disaster.

The gentleman's remarks really mirror the thinking process that I went through, that we simply cannot at this time be vindictive nor parochial in our thinking. I will probably get some flak for voting as I do on this particular issue, but if one comes into Congress, one is going to learn to take some flak.

I commend the gentleman from Kentucky (Mr. NATCHER) for his statement, and the gentleman from California, Mr. PHILLIP BURTON, also.

On some issues we simply cannot be parochial nor vindictive.

Mr. DYMALLY. Mr. Chairman, will the gentleman yield?

Mr. NATCHER. I yield to the gentleman from California.

Mr. DYMALLY. I thank the gentleman for yielding.

Mr. Chairman, if I were in the California Legislature, I would probably vote for a joint resolution supporting the Shamansky amendment. But I am not in the California Legislature. If this amendment had come up the first day of the session, I would probably have voted for it. But 9 months in the Congress have taught me a lot about the economy of different parts of the country.

I share the view of my friend, the gentleman from Maryland (Mr. MITCHELL), that I, too, was unhappy with the Gramm-Latta vote and felt we should vote against all the regional interests in subsequent matters. But when one looks at the economy of a country, one has to develop a different perspective and cannot make one's determination on parochial interests.

So I am supporting the present program and opposing this amendment because I think it would destroy the economy of a very significant part of the country.

□ 1245

Mr. PETRI. Mr. Chairman, will the gentleman yield for a clarification?

Mr. NATCHER. I yield to the gentleman.

Mr. PETRI. Mr. Chairman, I admire the gentleman a great deal, and he is in fact one of my heroes in this body, an iron man of this institution. I rise only to defend the State of Wisconsin. We are one of the major tobacco growing areas in the country, and in fact the fastest growing type of chewing tobacco is produced within the borders of my State.

Mr. NATCHER. I thank the gentleman.

Mr. HAGEDORN. Mr. Chairman, will the gentleman yield?

Mr. NATCHER. I yield to the gentleman from Minnesota.

Mr. HAGEDORN. Mr. Chairman, I share the respect for my distinguished colleague from Kentucky which my other colleague just mentioned. I think the problem that a lot of us have with this, Mr. Chairman, is the fact that it is the principle of this type of a program that allows to pass on from generation to generation the right for a certain few, select families in this country to produce tobacco, to own allotments and quotas, to lease them out, to take in tremendous prices per acre of land based on the allotments that they hold for the use of that land in tobacco production.

I really do not care whether people smoke or not. It is a free country; we do not prohibit it in this country; and they can make that choice, but I do have a lot of problems in seeing where tremendous prices per acre are being paid in the way of leases or rent in order to have that privilege to grow. I think that is what is under attack today.

I will gladly support a loan program for tobacco production based on a world price, in recognition of the cost of production and that sort of thing, in this country, but I do not think we can continue to support a program in Congress after Congress that is far outdated and completely out of sync with the system of agriculture we have in this country. I think that is where we differ on this legislation.

Mrs. ROUKEMA. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

I want to commend Mr. SHAMANSKY, my colleague from Ohio, for his clear and lucid statement at the very beginning of this debate. I would also like to indicate that we have been subjected to an Orwellian type of debate in many respects since then. Some of the arguments absolutely defy the facts and I am astonished to hear them come from the mouths of some of the same people who have been the staunchest free-market proponents in this body. We have, for example, been told that perhaps this tobacco allotment support system is a substitute for a welfare program for poor blacks, and I think anyone that knows anything about the allotment program understands that it has little relationship to poor Southern blacks.

Incredulously, we have also been asked to believe that the higher tobacco prices will somehow reduce smoking and be an endorsement of a better health program for the United States. If there is in fact any correlation, which I seriously doubt, between cost and decreased smoking in this country, then I recommend excise taxes, which are currently under consideration by the administration, and direct those revenues to the Treasury.

But, beyond the issues of the debate which have been raised so far—and they have been diverse—I simply want to point out a couple of facts that I believe are correct, as documented and researched. They are these:

The support system has undermined the ability of domestic producers to compete with cheaper foreign imports, as evidenced by the fact that imports have increased from 11 percent to 30 percent in the last 16 years. A U.S. Department of Agriculture official testified earlier this year before the International Trade Commission and projected a rapid increase in loan losses from this program. The prediction ranged anywhere from $193 to $273 million over the next 4 years. Let me repeat, $193 to $273 million over the next 4 years, compared to the number that has been touted today of $57 million in the last 45 years. This is a program that is too expensive under present economic conditions for the taxpayers to continue to support.

The solution to this problem is not to implement import restriction, as some have suggested, but to eliminate this costly price support system that has outlasted its usefulness.

In addition, I would like to discuss a little bit about the health concerns and the relationship to dollars and cents. The facts are that it will cost the Federal Government $15 million to administer this program in 1981. At the same time, the Government, through the Department of Health and Human Services, in 1981 will spend approximately $40.4 million for research and educational activities related to smoking's impact on health, including an antismoking campaign. It is indeed ironic—it is absolutely dumb—to be spending more money to promote the tobacco industry even while the Government, through other arms, is officially committed to spending millions on an antismoking campaign. It may not bother the people in this body, but I can assure you that it bothers the people in the country at large that we are being asked today to spend money on an antismoking campaign, while continuing to endure large costs to the Government through the allotment program over the years at an increasing rate for a product that is a proven health impediment, while at the same time this body last week voted against a sugar program and a peanut program, and none of these rationalizations were raised against those products at that time.

Mr. HUBBARD. Mr. Chairman, I move to strike the requisite number of words, and I rise to speak in opposition to the amendment.

Mr. Chairman, I would like to comment in reference to what my friend and colleague from Pennsylvania said in reference to the Chair's recognition

of Members seeking to speak on this amendment. I believe all of us in this Chamber today know that the Chairman of our Committee, the Honorable MATTHEW MCHUGH of the State of New York, has been very fair and has recognized as best as he could those who have sought recognition. He, of course, has recognized the gentleman from Wisconsin, the gentleman from Ohio, the gentlelady from New Jersey, the gentleman from Pennsylvania, and others who have spoken in favor of the amendment.

Mr. EDGAR. Mr. Chairman, will the gentleman yield?

Mr. HUBBARD. Certainly.

Mr. EDGAR. Mr. Chairman, I think the gentleman has to be corrected. The gentleman in the chair did not recognize those persons. We have gotten recognition through asking those people in the well to yield. There have only been three speakers who have received a total of about 15 minutes to point their case on this issue. I think the gentleman makes a good point, the gentleman in the chair has conducted himself very well, and he has great respect for the Members of Congress and is selecting people to speak by membership on committee, by seniority, by recognizing a balance between both sides, but I do not think the gentleman can make a clear argument that all the points on the issue in support of the gentleman's amendment have clearly been heard by persons recognized by the gentleman in the chair.

Mr. HUBBARD. I thank the gentleman. I would say also that the Chair has been most fair in recognizing people who have sought to speak in favor of the amendment. There are few of them, and I do remember the gentleman from Columbus, Ohio, spoke for 17 minutes with eloquence in presenting his amendment at the beginning of the alloted time.

Mr. Chairman, since 1933 over $5 billion has been loaned by the Commodity Credit Corporation to tobacco growers. Yet, during that 48-year period, only $56.7 million has been charged off. Furthermore, nearly $7 billion is returned to the Federal, State, and local treasuries each year in the form of tax revenues from tobacco sales.

The price support program for tobacco is of primary importance to the State of Kentucky, as has already been pointed out by the gentleman from Lexington, Mr. HOPKINS, and the gentleman from Bowling Green, Mr. NATCHER. I represent in western Kentucky approximately 48,000 tobacco farmers, with 34,000 burley tobacco producers, 8,750 air-cured tobacco growers, and 6,125 Fire-Cured tobacco growers. The district I represent in Kentucky is the Nation's sixth largest producer of burley tobacco.

Many of these western Kentucky tobacco farmers are already poor and needy. I would say to the gentlewoman from New Jersey (Mrs. ROUKEMA), who was making reference to the gentleman from Maryland (Mr. MITCHELL), that thousands of the tobacco farmers I represent are hard-working black citizens who are anxious about the future of the tobacco program. I would mention that these are Southern blacks.

The loans advanced to the farmers permit them to finance their crop. The principal is paid back with interest. The cost to the Government is minimal, if anything.

Mr. Chairman, consequently the arguments that the program costs the Government too much money are not valid, especially when we consider the tax revenues—$7 billion annually—that tobacco brings in.

Lastly I would say, Mr. Chairman, that there are tens of millions of Americans who actually enjoy smoking. We have heard from Members of Congress who have boasted about the fact that they do not smoke. There are many Members of Congress who enjoy smoking. I think of the gentlewoman from New Jersey, who enjoys her pipe. I think of our Speaker, who enjoys his cigar; and many of us in Congress who enjoy smoking cigarettes.

Mr. BONER of Tennessee. Mr. Chairman, will the gentleman yield?

Mr. HUBBARD. I yield.

Mr. BONER of Tennessee. Mr. Chairman, I rise to support the gentleman's statement and in opposition to this amendment.

Mr. HUBBARD. Mr. Chairman, I close by asking my colleagues to think of the tens of thousands of tobacco farmers who do strongly oppose this amendment by the gentleman from the city of Columbus, Ohio.

Mr. EDGAR. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Chairman, I ask unanimous consent to continue for 5 additional minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Pennsylvania?

Mr. WAMPLER. Mr. Chairman, reserving the right to object, what is the request that the gentleman made?

The CHAIRMAN. The gentleman from Pennsylvania requested unanimous consent to proceed for an additional 5 minutes.

Mr. WAMPLER. Mr. Chairman, I withdraw my reservation of objection.

The CHAIRMAN. Is there objection to the request of the gentleman from Pennsylvania?

Mr. FINDLEY. Mr. Chairman, reserving the right to object, is there any disposition upon the the part of the leadership to limit the debate? Can the Chair inquire as to whether there is any disposition on the part of the leadership to limit debate?

Mr. ROSE. If the gentleman would yield, I have no intention to request to limit debate, but I would urge my colleagues to let us conclude this as quickly as we can and get on with the further business of the Committee.

Mr. FINDLEY. Mr. Chairman, I withdraw my reservation of objection.

The CHAIRMAN. Is there objection to the request of the gentleman from Pennsylvania.

There was no objection.

The CHAIRMAN. The Chair recognizes the gentleman from Pennsylvania (Mr. EDGAR) for 10 minutes.

Mr. EDGAR. Mr. Chairman, this has been an interesting debate. To hear the comments, particularly from those who support the tobacco issue and oppose the gentleman's amendment has been enlightening. Let me first make a point about the personal attacks we have heard today. One of the reasons I took the microphone and objected strenuously to the comments being made by the gentleman from Kentucky is not that I do not respect the gentleman very much. In fact, he is one of my heroes in the House as well. But it reminded me of the time not too long ago when I offered an amendment on some water project issues, and Member after Member stood up and said, "What right do you, a Member from Pennsylvania, have to have any comment, any thoughts, any views about the Tombigbee Waterway, the central Arizona project, the O'Neill project, the Merimac Dam or any other dams or water project."

It is incumbent upon each of us as Members of this body to work and vote our best judgment, and to come to the well of the House with amendments that we have researched and that we understand. I commend the gentleman from Ohio for offering his amendment. I commend him for risking himself, and even if there is not a stalk of tobacco grown in his district, his constituents, like mine, have to pay the cost of any subsidy. His constituents, like mine, have a voice in whether or not a tobacco program is placed within Federal policy.

I would suggest that all 435 Members of the House have a right to offer amendments.

□ 1300

Mr. Chairman, the second point I would like to make is that I would like to see some of the Members of this body, particularly those to my left—those who were very strong in standing up and saying just a few months ago, "Let's get Government off our backs and out of our pocketbooks," those who were very strong in their rhetoric about Government controls, and those who were very strong in their rhetoric about how we should not have Government intervention in so many of the programs and in our

lives—address this issue. Where are those Members today? Were are they in taking the microphone and articulating their position on this issue?

This program has been defended as a control, it has been defended as Government intervention, and it has been developed as a Government subsidy. Many of those issues are issues which many of the Members have objected to.

Mr. HEFNER. Mr. Chairman, will the gentleman yield?

Mr. EDGAR. I will not yield until I have finished with the four points I would like to make.

So the point is: Where are those advocates of balancing the Federal budget today when we have an opportunity, even if it is small, to make an impact on that issue?

Point No. 3: The question has been raised about the poor small farmers. Many of the Members have said that the poor small farmers are going to be put out of work and put out of their farms, and that this highly rich cash crop is no longer going to be available to them.

I wonder where many of the Members were when we were debating issues for the small child who was losing his or her health care program that was critical, or for the mother of a small child who no longer could place that child in a day care center. Where was their compassion when the elderly programs were being laid out for destruction within this body during the budget discussion?

I am concerned about the small farmer, too, and I think all of us throughout the Nation, in urban America, rural America, and suburban America, should be concerned about the small farmer.

Are there any funds in this legislation to provide for that small farmer some research and technology about how he can move from tobacco as a crop to some other commodity? Are there any programs within this bill to provide that small farmer the opportunity to move from the crop of tobacco to some other substance, or will we in fact in the year 2000, after all of the studies and research on tobacco have been completed, still be here with some type of Federal involvement in a program for tobacco?

I think that there are issues relating to small farmers that can be dealth with adequately if we use our creative skills.

But the point I want to make, the bottom line of this discussion, is not the personal attacks, it is not who is for or against the allotment program, and it is not the question of the small farmer. I think the bottom-line question is a symbolic one. It has been said that this program costs us nothing, but over the life of the program over $57 million has been used. It has been suggested that in this bill there is only about $79 million of outlays, all of which will be repaid to the Federal Government.

I ask my colleagues, with an $80 billion deficit, do we borrow that money for this program? I ask my colleagues, even though it may only be a dime, one thin dime of expenditures by the Federal Government, can we in good conscience vote to support a program where one dime is used to support tobacco when there was not a dime of reduction for some of the pork-barrel projects within the new budget?

Can we support a program that spends one dime of taxpayers' dollars when we have reduced the funding for cancer research? Can we in fact spend one dime of the Federal Government's money when we have reduced funds for the school lunch program?

Mr. HEFNER. Mr. Chairman, will the gentleman yield?

Mr. EDGAR. Can we in fact spend one dime of Federal subsidy when we have reduced scholarship and loan programs to educate our young people?

Mr. HEFNER. Mr. Chairman, will the gentleman yield?

Mr. EDGAR. I will yield in a moment.

Can we in fact spend one dime of Federal money when we have reduced nutrition programs for many throughout our Nation? Can we in fact spend one dime when we have reduced assistance to families of low income? Can we afford in this time of austerity to borrow one dime and create additional dollars in the Federal deficit for a program of this nature?

I think this is a symbolic opportunity for us as a Congress to stand up and say, not one dime to the tobacco subsidy, the tobacco loan program, or the administration of such a program.

If we determine as a Congress that a controlled program should be put in place, let us put a dime of tax on the sale of tobacco, and let us use the revenues from that dime to pay fully for this program, if that is in fact the nature of it.

Under the present language of the bill, we are going to spend considerable dimes of taxpayer's money to provide for this program. I think it is wrong, and I am not willing to commit that one dime to it.

Mr. HEFNER. Mr. Chairman, will the gentleman yield?

Mr. EDGAR. I now yield to the gentleman from North Carolina.

Mr. HEFNER. Mr. Chairman, I would just respectfully point out to the gentleman, who was referring to the cost of the programs for the feeding of children and senior citizens and for cancer research, that there were many of us who stood and were counted to keep the money for these programs.

I think the gentleman points with a very wide brush. I am sure that many of us who have asked for support for this program also stood and were counted in support of these programs for handicapped children and senior citizens and of feeding programs, and so forth, and we took a considerable amount of heat for it. So I wish the gentleman would not paint with such a wide brush.

Mr. EDGAR. Mr. Chairman, let me commend the gentleman from North Carolina (Mr. HEFNER) for his votes, and I will admit to the gentleman that my brush was a bit wide. I would like to say to the gentleman that I respect his ability to see the larger picture.

I just wish that some of the gentleman's colleagues who did not support that wider view would in fact have supported him, because then I think I might feel much more comfortable about the symbolic dimes that are going to be spent on this program if others had shown the same courage.

Mr. SHAMANSKY. Mr. Chairman, will the gentleman yield?

Mr. EDGAR. I yield to the gentleman from Ohio (Mr. SHAMANSKY).

Mr. SHAMANSKY. Mr. Chairman, the point was made that not one stalk of tobacco grows in my district, in Franklin, Delaware, and Morrow Counties, and that is absolutely true. One reason for that could be that the law prohibits anybody from growing tobacco there.

Mr. Chairman, I thank the gentleman for yielding.

Mr. EDGAR. Mr. Chairman, I thank the gentleman from Ohio (Mr. SHAMANSKY) for his comments.

Mr. Chairman, as I conclude my comments, let me just summarize quickly. We have heard a lot of arguments on this bill. I think the amendment is far more symbolic than the issue all of us have focused on.

I commend the gentleman from Ohio (Mr. SHAMANSKY) for his ability and for his willingness to risk himself. I think it is important and incumbent upon all of us as Members of Congress to stand up and analyze the issue and vote for the gentleman's amendment and against the tobacco program.

Mr. NAPIER. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, first of all, I want to commend and associate myself with the words of the distinguished subcommittee chairman, the gentleman from North Carolina (Mr. ROSE). He has been one of the most effective spokesmen for tobacco that I have heard, and he has done an outstanding job.

I would say the same for our ranking minority member, the gentleman from Kentucky (Mr. HOPKINS), and I would say the same for our ranking minority member on the committee, the gentleman from Virginia (Mr. WAMPLER), as

well as for the gentleman from North Carolina, (Mr. WHITLEY), the gentleman from North Carolina (Mr. JONES), who serves on the committee, and my friend, the gentleman from Kentucky (Mr. ROGERS).

Mr. Chairman, the elimination of the tobacco price support program would be disastrous for the southeastern United States, and I rise in strong opposition to the pending amendment.

The tobacco program has two parts. First, it is designed to control the supply of tobacco through marketing quotas, and second, to support the price of tobacco through loans to farmers. The marketing quotas are mandatory only after two-thirds approval by tobacco farmers.

If tobacco producers vote to adopt marketing quotas, then the Government is required to provide price support. Conversely, if marketing quotas are not approved then price support is not provided. There are no direct Commodity Credit Corporation payments to growers. Rather, CCC loans are made available through producer associations, also known as cooperatives, that are under contract with CCC to handle all operations connected with making loan advances to producers, arranging for receiving, redrying, packing, storing, and eventually selling the tobacco under loan.

After the tobacco is sold by the producer cooperative or association, proceeds are used to reimburse CCC, with interest, for its loan advances. In this regard, it should be noted that changes in the tobacco program have already been directed this year through the budget resolution with two specific changes.

First, the interest rate paid at the time of reimbursement to CCC is at the cost of money to the Government, not at a subsidized rate. Second, all costs in regard to grading of tobacco will now be paid by producers, and will not be paid for by the Government.

Since 1933, CCC has loaned about $5 billion through producer associations. At the end of fiscal year 1980, outstanding loans total $814.9 million.

The cumulative loss on tobacco loans from 1933 through fiscal year 1980 amounts to $56.719 million. The cumulative financial loss on the tobacco loan program represents 0.3 percent of CCC's total cumulative loss of $19.1 billion on all commodity loan inventory operations. The supply control feature of the tobacco program effectively helps maintain prices above the support level, thus minimizing loan chargeoffs and losses for CCC, and thus, saving the Government money.

During the same period of time, about $130 billion has been collected by Federal and State governments in cigarette excise taxes. In 1979, the Federal Government received more than $2.4 billion in excise taxes in tobacco products, while State treasuries received about $3.7 billion.

The net cost of the tobacco loan program, over the entire history of the program, represents about the same amount of money that the Federal Government spends every 45 minutes.

Tobacco is very important to the Nation's international balance of payments. The value of tobacco and tobacco product exports in 1980 was about $2.4 billion, with a favorable balance of trade of $1.9 billion.

In South Carolina, tobacco provides jobs for over 27,000 people. In my district alone, in addition to the number of farmers who depend on this crop for their livelihood, there are 41 warehouses. It returns over $377 million to the economy of South Carolina.

Elimination of the tobacco program would be disastrous in economic terms. Not only would there be severe disruptions in the banking and commercial systems of the Southeast, but there would also be a very severe probability of a recession in tobacco producing areas of the country. Allotments are used in calculating land values, and there is little doubt that land values would drop severely in rural areas. Defaults on loans would be commonplace. Bankruptcies, which are already threatened because of other depressed prices and severe farm conditions, would be rampant. Heavy demands would be placed on Government welfare programs. The burden on the economy would be tremendous—in the billions of dollars—and the costs to the taxpayers outside the areas would be equally harsh and long term.

Currently, the cost of the program is minimal. In fiscal year 1980, the costs were broken down as follows.

[Dollars in millions]

Activity:	*1980*
Administration of price support program	$13.9
Inspection and grading	[1] 6.2
Market news reporting	0.5
Research and extension	8.1
Miscellaneous	0.6

[1] Now changed and cost incurred by producers.

The program insures incomes to farmers who would otherwise be unable to support their families on the small farms they own. Their land is particularly suited to grow tobacco, not other crops. The program also insures that the supply of tobacco equals the consumption, thereby preventing huge surpluses of the crop.

In fact, it is the small farmer that the program protects, not the large farmer. Large corporate farms would benefit from a loss of the controls debated today.

A vote to eliminate the tobacco price support program is a vote to destroy the family farm system in the Southeast—a vote to place families on the tax-supported welfare system—a vote to deprive people of the lands they own—and a vote against the people who work so hard, so hard, to provide for the needs of the American consumer—the small family farmer.

Mr. RICHMOND. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in support of the committee position on tobacco, and against this amendment.

I do not smoke. I am from Brooklyn, and, we do not grow tobacco there. However, I support the tobacco program now in effect.

I would hope we can bring this debate to a quick close and vote against this amendment.

Mr. JOHNSTON. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I have heard a good deal of comment here today principally involving the macroeconomics of tobacco. I have heard a lot about millions and billions and things like that from people who, I dare say, would not know how to sucker, much less prime, the first stalk of tobacco.

□ 1315

Lacking a Phi Beta Kappa key and a degree from Harvard, according to the gentleman from Ohio, the proud possessions of the sponsor of this amendment, I am going to talk a little bit about the economic realities of what a guarantee of a certain price per pound to the average tobacco farmer means.

Tobacco is a unique crop among the major agricultural commodities of this country because it requires an investment of over 250 hours of time before each one of those acres of tobacco can be brought to market. This is an investment that the average farmer cannot get someone to share with him. He must put out this time whether his crop is destroyed by mold, insects, or hail. He must make this investment, and he must make it far ahead of the time at which he will know what that crop is going to bring him in the nature of dollars. In an acre of wheat there are approximately 26 man-hours of labor.

All we really do in assuring the domestic farmers, the small farmers dependent on the sale of this tobacco for the cash to pay their taxes and to provide things that they cannot provide themselves, is give them a minimum wage because we tell them in advance that when they invest this 250 or 300 hours of time that they are going to get something for that time. I wonder how many people in Columbus, Ohio, would go to work on Monday morning if they did not know at the end of the week how much they were going to be paid. Yet, that is precisely the position of the tobacco farmer. In February when he starts his seed beds, long before he transplants them into the fields, he does not know, absent this program, if he will receive anything

for his labor. All this program does is guarantee that we will buy the tobacco.

So he will receive something for those hours of back-breaking labor.

Mr. SHAMANSKY. Mr. Chairman, will the gentleman yield?

Mr. JOHNSTON. I yield to the gentleman from Ohio.

Mr. SHAMANSKY. The point is that every farmer in Franklin, Delaware, and Morrow Counties, Ohio, does exactly the same thing, but does not enjoy the same privileges.

Mr. JOHNSTON. If I can get my distinguished colleague from Ohio to understand that there are no crops requiring the investment of 250 to 300 man-hours per acre that I am aware of, other than hothouse tomatoes.

Mr. SHAMANSKY. It is the same principle. Our people take the risk and they have many more acres, a lot more money invested. The farmers in my district invest a lot more money than just a couple of hundred hours. They invest thousands upon thousands of dollars.

Mr. JOHNSTON. My colleague from Ohio is right, they invest money. But we do not have guarantees on money in this country. We do have something called a minimum wage that guarantees a certain amount of pay per each hour expended, that is what this program does for tobacco farmers.

In essence, this program guarantees the farmers, the small farmers of the South and the Midwest, a minimum wage for their time. They cannot invest money because tobacco is not a money-intensive crop. Tobacco is a labor-intensive crop requiring the labor and services of the farmers, their wives, and their families. That is all we are attempting to do, to guarantee them a minimum wage. From this guarantee there springs an industry that provides, this country billions in excise taxes and exports, and most importantly gives thousands of farmers a way to earn their way.

Mr. FUQUA. Mr. Chairman, I move to strike the requisite number of words, and rise in opposition to the amendment.

Mr. GORE. Mr. Chairman, will the gentleman yield?

Mr. FUQUA. I am happy to yield to the gentleman from Tennessee.

Mr. GORE. Mr. Chairman, I also rise in opposition to the amendment.

Mr. Chairman, since its inception in the New Deal, the tobacco support system has been notable as one of the most efficient, least costly, and most effective of all Government programs. The program provides a means of sustenance for thousands of small farmers and their families who would otherwise be faced with spending their lives in conditions of abject poverty. Moreover, it more than pays for itself in revenues generated to the Government.

This program is not a handout to farmers. Rather, it protects them from uncontrollable market fluctuations and insures that they will not be at a competitive disadvantage with agribusiness in terms of tobacco production. The income of these farmers is modest and they are not living off the Government. I am proud to say that the tobacco farmers in my district are honest and hardworking people.

To abolish the tobacco program would be to turn our backs on family farmers. In past years we have acted in ways to hurt family farms and the result has been a shrinking farm population and fewer acres in cultivation. We cannot repeat this mistake with tobacco farmers.

I strongly support the tobacco program as one that makes good sense from both a public welfare and budgetary point of view. I urge my colleagues to do the same.

Mrs. SCHNEIDER. Mr. Chairman, I move to strike the requisite number of words and rise in support of the amendment.

Mr. Chairman, we have heard a variety of different points of view being raised today but what I would like to focus on at this moment is a call to reason and a call to commonsense.

We have discussed economics. We have discussed the potential job and employment harm that we may cause as a result of passing this amendment.

But I think it is critically important to ask why do tobacco subsidies continue to enjoy immunity when other Federal programs are being cut. There is no question in the minds of the American people that it is totally and completely inconsistent for one Government agency to support the growth and the manufacture of tobacco while other Government agencies or programs pay for the deleterious health effects sustained by the smoker.

For the record, I would like to have the opportunity to provide a few facts and statistics related to health. In any American poll when people are asked what do they value most, one would think that jobs rises to the top of the list. However, human health is the first and foremost priority of all people.

So let us look at some of the statistics. If one were to recognize that every 2 minutes a death is caused as a result of lung cancer, and that there are an estimated 250,000 deaths yearly as a result of lung cancer, the economic toll for illness and death from tobacco-related causes is estimated at $18 billion yearly. It seems to me if we had access to that $18 billion we would be much closer toward balancing our budget in 1982.

Smoking also makes the chances of lung cancer two and a half to five times more likely and it also makes the chances of heart attack twice as likely. As someone who runs over here periodically to vote, I have great concern for my colleagues who are huffing and puffing as the result of these deleterious health effects.

I think I should also mention that the American Medical Association has taken a very strong position and they urge a halt to the tobacco subsidy program.

Also, there are more taxpayers, and since we seem to focus on the concerns of taxpayers in this fiscally conservative year, there are more taxpayers who are nonsmokers than vice-versa. I believe that they should not be forced to subsidize an industry causing the above problems to the tune of $30 million a year.

Once again, as legislators, I feel it is important for us to remain consistent and not allow one government agency to cause harm and another government agency to attempt to mitigate that harm.

Mr. SHAMANSKY. Mr. Chairman, will the gentlewoman yield?

Mrs. SCHNEIDER. I am happy to yield the remainder of my time to my colleague from Ohio (Mr. SHAMANSKY).

Mr. SHAMANSKY. Mr. Chairman, much has been made of the fact that this program throughout its history has only cost $56 million. That has to be the biggest myth in the world, because if that were true there would have been no necessity for any of the gentlemen from Virginia to point out how the law has been changed to reflect the huge amount of subsidy on the loan program that the Treasury was absorbing. Over the history of this program it has not cost a mere $56 million. But I think one can say and properly so it has cost between $600 and $850 million. Otherwise there was no reason to make that change.

The only reason that law was changed with respect to the subsidy on the interest rate was because no one would admit it was there, and it was exposed. So the Commodity Credit Corporation lends at a lower rate than the Treasury borrows, and that is where we get close to $1 billion over there.

With respect to this business of it is not costing us anything, our economy is losing exports of about $4 billion if we go from 60 percent of the market down to 28 percent overseas. That is a lot of money to this country and we are giving that away.

We have layered in as an unnecessary cost about $1,000 an acre. We cannot get away from the figures that there are only 30,000 farmers of tobacco growers, in North Carolina, but 115,000 allotment holders. They are the ones that get the cream of this, and I can understand why the gentlemen from North Carolina are so anxious. Would that Ohio had such a bonanza unearned.

So what we are doing is a classic case of Government intervention which is losing both our domestic and foreign markets, and also now on which they want tariffs to surround them.

The CHAIRMAN. The time of the gentlewoman from Rhode Island has expired.

(By unanimous consent Mrs. SCHNEIDER was allowed to proceed for 1 additional minute.)

Mr. FOGLIETTA. Mr. Chairman, will the gentlewoman yield?

Mrs. SCHNEIDER. I yield to the gentleman from Pennsylvania.

Mr. FOGLIETTA. Mr. Chairman, I rise in support of the amendment.

The Food and Agriculture Act reveals in microcosm the administration's insensitivity to economically distressed States and the people who live in them. On the one hand, it reduces food stamp benefits by $1 billion. On the other, it continues the loan price support system for tobacco, a product identified by the American Medical Association and the Surgeon General as a threat to the public health.

Mr. Chairman, I urge my colleagues to contrast tobacco subsidies with programs already slashed in the Federal budget. Consider, for example, the urban development action grant program, deeply cut in the Reconciliation Act and proposed for extinction in the President's proposed new round of cuts. In Pennsylvania, we need investment and jobs. That is precisely the objective UDAG has served so well, investing only $1.9 billion to create $11.6 billion in private investment and saving or adding 460,000 jobs. In Pennsylvania alone, $109.5 million in action grants produced five times that much in private investment and created 16,000 permanent, useful jobs in our State's economy. UDAG was a wise and responsible expenditure of the public money. Can an administration proposing the elimination of UDAG justify the continuation of tobacco subsidies?

Mr. Chairman, I believe the people of Pennsylvania have already made sacrifices for the President's economic program, and they are being asked to make more. The new round of budget cuts would slash $440 million from public housing, $475 million from Federal aid to help the elderly and poor pay their winter fuel bills, $548 million from revenue sharing, $475 million from mass transit, $362 million from Amtrak, over $1 billion from education, $343 million from student loans, $364 million from nutritional programs for infants.

These cuts are going to affect every State, Mr. Chairman, but they will do the most damage in regions where high unemployment, abandoned factories and lagging investment have robbed our States of the fiscal capacity to fill the vacuum created by this administration.

I firmly believe that every State should shoulder an equal burden to balance the Federal budget. The people of Pennsylvania have already made sacrifices and they are willing to do so—if they are convinced that every other American is asked to sacrifice along with them. That is why we find the tobacco allotment and loan price support system so objectionable. When infants are losing Federal aid needed to provide an adequate diet, when cities are losing Federal aid to provide decent public transportation, when the elderly are losing Federal aid to keep their homes warm during the winter, what possible justification can remain for tobacco subsidies?

I submit, Mr. Chairman, that there is none, and I urge my colleagues to join me in supporting the Petri amendment.

Mr. WHITLEY. Mr. Chairman, I move to strike the requisite number of words, and rise in opposition to the amendment.

Mr. TRAXLER. Mr. Chairman, will the gentleman yield?

Mr. WHITLEY. I yield to the gentleman from Michigan.

Mr. TRAXLER. I thank the gentleman for yielding. I take this opportunity to rise in opposition to the amendment and would like to adopt as my reasons those which have so eloquently been stated by many of the persons who have been in this well in opposition to the amendment.

I would like to touch on just one other aspect of this matter, and that is as a member of the Northeast-Midwest Congressional Coalition I want to inform the membership that the coalition has no official position or unofficial position in connection with this amendment. Some of my good friends in the coalition utilize the rules of the coalition to advise members of the coalition that they, on stationery of the coalition, that they were in support of this amendment. I want to advise the membership that the rules of the coalition permit that kind of communication. It is not an official position.

□ 1330

There is no official position. And each member of the coalition, of course, will be voting his or her individual conscience. As a member of the coalition, I am very pleased to oppose this amendment and urge its rejection by the House.

I extend my thanks to the gentleman.

Mr. WHITLEY. I thank the gentleman for his contribution.

Mr. FOUNTAIN. Mr. Chairman, will the gentleman yield?

Mr. WHITLEY. I yield to the gentleman from North Carolina.

Mr. FOUNTAIN. Mr. Chairman, the basic economic life of North Carolina and many other States is built upon tobacco, and tobacco production by small farmers will no longer be possible if the tobacco program is gutted today, or if the tobacco program is killed. The results of either would be economic disaster. Since I have been calling and talking to many of you for the past 3 weeks, explaining the tobacco program and expressing the hope that you will oppose this attempted destruction of that program, I hesitate to take the time to add to what has already been said about this amendment, but I come from a heavy fluecured tobacco growing district and I feel that many points need to be made.

Let me therefore summarize what would happen if there were no tobacco program next year. I do this because so many members do not seem to appreciate the consequences of adopting this amendment.

Without the tobacco program, the money tap will be cut off the day the bill becomes a statute.

Immediately there will be no money to pay debts or buy the necessities of farming.

The wheels of commerce will grind to a halt. Businesses will collapse in domino-fashion. The small towns of North Carolina will dry up and become ghost towns.

Tractors made in congressional districts far from tobaccoland will not be bought.

In fact, tractors and other farm machinery and many other things already bought will not be paid for—can never be paid for.

Loans of every kind will receive no more payments from tobaccoland. There will be no more money with which to do so.

Remember, agricultural areas are generally extremely credit worthy, but capital-short. They must import the capital needed to create and operate businesses of every kind, including the business of agriculture.

Money for farm and farm-area lending is raised on the national money market and imported.

Farm/farm-area defaults will hurt the whole U.S. economy—it is inevitable.

So many tobacco farmers will be bankrupt and unable to repay off imported loans that it will be the "Grapes of Wrath" again.

Grass will grow in the streets of Smalltown, Tobaccoland, U.S.A., as it did before the people of the United States got a New Deal in the 1930's—a New Deal which had at its heart the farm programs the Congress enacted into law during the early thirties.

Government deregulation seems to be the label attached to everyone's private cause, public cause, or legislative proposal. If it is labeled deregulation then it is supposed to have sanctity from criticism or even objective examination. Simply label your bill as de-

regulation and everyone in the Congress is expected to be an enthusiastic supporter. The alternative may by political suicide.

The latest on the bandwagon of deregulation is the Tobacco Deregulation Act of 1981. Behind this appealing if not seductive title is a bill which will destroy the livelihood of thousands of small family tobacco farms and ruin many rural communities all across the South.

Under the guise of fostering free enterprise, the so-called Tobacco Deregulation Act would not only bankrupt tens of thousands of small farmers and tens of thousands of small businesses; but it would also decimate thousands of communities throughout the tobacco-growing regions of America. And the ramifications of this disastrous legislation would be felt throughout the Nation as farm equipment would go unbought and much of the tax base would crumble.

Indeed, this legislation fails to take into account the reasons why the tobacco program was created and has been maintained for over 40 years. In fact, this legislation ignores the fundamentals and long history of Government assistance and support to all of agriculture.

Government support of agriculture has been an investment which has paid off handsomely. Commodity programs are essential to agriculture in this country, and they provide stability which is needed to insure plentiful supplies of agriculture products. The success of America's agriculture is the envy of the world—a success which has given America's consumers the greatest variety and lowest food prices of any nation on Earth. In addition, America's agricultural exports exceed those of any other country and provided this Nation with $24 billion in foreign exchange in 1980. Tobacco contributed $1 billion to this agricultural trade surplus.

Eliminating the tobacco program does not mean that tobacco production would stop, or that more people will quit smoking. Not at all. But the market price for tobacco would be unstable. Production and prices would fluctuate widely and, in response to the price fluctuations, resources would be continuously moving into and out of tobacco production. It is this constant shifting of resources which would be costly and wasteful for the Nation.

The free market is a theoretical model which is worthy of practical application because it generally achieves efficiency in the allocation of resources and the distribution of products. Efficiency is desirable, and in a world of scarcity, which seems increasingly to be the case, it becomes essential. So, it is economic efficiency that we are all after. I abhor wasting resources as much as any of the rest of you here debating economic policy. But what is often overlooked by the textbook practitioners of market economics is the fact that the real world does not fit the textbook model.

There are circumstances when the rigid application of the free market is inefficient. There are situations when some degree of Government intervention is beneficial. Tobacco production and marketing is one case in point where a limited Government involvment is necessary for reasons of economic efficiency. The Government is the essential ingredient in creating stability in an otherwise unstable industry.

The tobacco program stabilizes tobacco production and thus tobacco prices by restricting harvested acreage and marketing to a level just sufficient to meet domestic and foreign demand. This is accomplished through a system of allotments and quotas. Allotments and quotas are only implemented if approved on 3-year intervals by the tobacco producers. The Government is not forcing controls on the producers. It is the producers who seek Federal assistance to equitably limit production and thus avoid creating surpluses. They voted the program in and they can vote it out.

The allotments and quotas help to balance the supply of tobacco with market demand. Achieving an equilibrium between supply and demand is exactly what a market economy is all about. What the tobacco program does is stabilize production, at a level consistent with demand. This does not distort the market, it stabilizes the market.

The demand for tobacco is not very responsive to prices. Changes in price have very little effect on consumption. So in years when there is excess of production it takes a drastic price drop to clear the market of the surplus. Conversely, when there is a supply shortage the price shoots up because consumers still want the normal quantity.

Wide price swings are costly to society, particularly on the production side because prices direct the allocation of production resources. When prices drop, land, labor, capital, and management are shifted out of tobacco. When prices rise, land, labor, capital, and management are shifted back into tobacco production. Such resource adjustments are costly. By stabilizing production the costly business of shifting resources in and out of tobacco production can be avoided.

Most other agricultural products are like tobacco, small changes in supply bring about wide swings in price. That is why the Federal Government provides price support for 15 commodities. That is why the Federal Government has authorized marketing orders for fruits and vegetables.

Both producers and consumers benefit from these programs. Producers are provided with some assurance of future market prices that will enable them to pay their bills and continue in production. And consumers benefit from adequate and stable supplies of farm produce.

With the long leadtime between production planning and harvest, a reliance on market signals to allocate resources can leave consumers without sufficient supplies. A supply shortage will in turn lead to higher prices but production may not respond for a year or more.

Agriculture is not like a factory which can be closed down one week and restarted the next week. And this is one of the reasons why we have a long history of Federal commodity programs.

The lessons we learned in the absence of farm programs are the reason for their existence. Is our memory so short that we cannot remember why we created our farm programs? Is it really necessary to experience again the hard lessons of history? Surely, it is not necessary to bring hardship and suffering to thousands of family tobacco farms so that we can relearn a lesson that should never have been forgotten.

The most costly aspects of eliminating the tobacco program are the human adjustments. Tobacco is produced on a large number of very small farms. The family farm ethic has been better preserved on tobacco farms than in any other segment of American agriculture, and the family farm character of tobacco is due to the Federal tobacco program. Discontinuing the tobacco program would be equivalent to abandoning the family tobacco farms, and the opportunity of thousands of families to stay on the farm. We desperately need them now, so that when we even approach a food shortage in the United States they will still be in harness, ready, able, and willing to produce more.

The family farm is an institution which was fundamental to the development of this Nation, and it remains an institution which still embraces the values of hard work, self-respect, and freedom. The Congress has repeatedly endorsed the family farm and will do so again in this year's farm bill, if in fact we have a bill. Is it only empty rhetoric in these congressional pronouncements? It would be tragic to abandon the family farms and turn tobacco production over to the large corporations.

There are some 202,000 farms that produce tobacco in this Nation. For many of these farms tobacco is not the major farm commodity but provides additional, and often critical income. However, there are 145,000 commercial tobacco farms which rely on tobacco

as the major source of farm revenue. These commercial tobacco farms are not large. The farms average only 129 acres in size, too small to survive without tobacco. But with an average 6.6 acres of tobacco, these farms now provide a home and a living which is much better than being unemployed in some city, and starving for lack of a job and food.

This is not to say that life is easy for tobacco farmers. It requires hard, very hard work to produce tobacco. I grew up on a tobacco farm. It was even more difficult then, because we did so much by hand. However, today, it is an extremely tough occupation, requiring expensive trucks and tractors and trailers and land-breaking and crop-harvesting equipment. Tobacco is a labor intensive crop. Indeed, it requires 240 hours of labor to produce an acre of tobacco, compared to 3 hours for an acre of corn or wheat. The farm operator and the family supply most of the labor requirements.

Now let me tell you what would happen without the tobacco program. Tobacco acreage would be consolidated into large, highly mechanized operations. The numerous operators of small tobacco farms would be displaced and the family labor would be unutilized. The displacement of farm operators and farm labor would be more acceptable if there were other jobs to absorb these people; but unemployment is high and likely to get worse.

There is no good reason to throw these people into the unemployment lines and restructure the production of tobacco in the name of deregulation. Abandoning family tobacco farms would do nothing to enhance market competition, since competition would ultimately diminish as production would become concentrated in the hands of a few large corporations.

The price fluctuations and instability which would follow the destruction of the tobacco program would make it impossible for the family farms to survive. But corporate tobacco production would survive because a few large corporations would have the ability to enforce stability. They would create stability through the sheer force of market power, monopoly power. And even then, they will have their problems with unlimited production and much lower prices.

The tobacco program has been successful in stabilizing the market—avoiding the boom-and-bust cycle of farm prices has enabled the small family tobacco farms to stay in business. And the cost to the Government has been almost imperceptible. There is not much opportunity to save money with this program. But its elimination would certainly be costly, to the economy, to the Government, and most of all to the family farmers in the tobacco States.

There is no connection between the tobacco program and people's tobacco consumption patterns. This has been admitted by health officials both within and outside of Government. To the extent there is any relationship at all, the tobacco program reduces consumption. The program prevents excessive supplies and low prices that would accompany an unstable industry.

Tobacco seems to be everyone's favorite whipping boy these days. But let us review the facts. First, a lot of people are employed in tobacco production, and the tobacco program helps maintain these jobs. You tell me, what are the alternatives if you take away these jobs? Second, the tobacco program is probably the most effective, maybe the only program to fulfill the congressional mandate of preserving the family farm.

To discontinue this program would be to abandon the family tobacco farms and leave tobacco production to the huge conglomerate businesses. This would be the antithesis of competition and a free market which the sponsors of the antitobacco program legislation espouse.

Finally, the tobacco program is cheap, dirt cheap. The Federal Government is not going to save any money by eliminating this program. Quite the contrary. When the farmers and laborers who now make a living producing tobacco are displaced, it will be the Government which will be stuck with the food, housing, medical, and education expenses for these people. The costs to society of eliminating the tobacco program will be high and personal suffering will be great. And to what avail? So that tobacco production can be turned over to the large monopolistic corporations.

Commonsense and economic sense are on the side of the tobacco program. Let us not be stampeded by nonfactual and emotional rhetoric into believing otherwise.

Mr. WHITLEY. I thank the gentleman for his contribution.

Mr. DAN DANIEL. Mr. Chairman, will the gentleman yield?

Mr. WHITLEY. I yield to the gentleman from Virginia.

Mr. DAN DANIEL. I thank the gentleman for yielding.

Mr. Chairman, I rise in opposition to the amendment.

First allow me to express on behalf of the tobacco growers of my district sincere appreciation for the leadership exercised by the Tobacco Subcommittee chaired by Mr. ROSE.

It strikes me that we are here discussing an issue in the subjective—not really getting at the heart of why the amendment is being considered at all.

The truth of the matter is that most of those who oppose the tobacco program are not sure why they do so.

Some say they feel the program should be ended because of Government control. Yet, the very restrictions of which they speak have consistently been approved overwhelmingly by the tobacco growers every 3 years in a referendum.

The same restrictions limit the amount of tobacco that can be grown which logic tells us that less tobacco would be available—in response to those who disapprove of its use. It is also clear that ending the tobacco program is not by itself going to stop one person from smoking.

Those who object to its cost usually admit that of all the commodities in which the Government has attempted to involve itself, tobacco has cost least on a percentage basis. During the 40 years it has been in operation, the tobacco program has seen more than 80 billion pounds of tobacco move through the system and 7.7 billion pounds taken under loan. The more than $6 billion in Commodity Credit Corporation loans have been repaid, with less than one-half of 1 percent loss to the Government.

Frankly, I would not be supporting the program if it had been a drain on the Treasury. It simply has not been the case.

Those who protest so hard overlook the fact that these sales have generated in excess of $80 billion in Federal taxes. In addition, sales of American tobacco abroad have netted the United States more than $1 billion annually in recent years. Without this, our balance-of-payments situation would have suffered.

But I am more concerned about the human aspect of what we are discussing. More than 170,000 farm families are involved. Many of them depend totally or to a great degree on receipts from their tobacco crop. The stability of the program has assured them an income. Without it, they do not know what will be their lot.

In addition to throwing their personal economy into a tailspin, many thousands of them would suffer an immediate loss in land values. Not everyone realizes that most of this tobacco land has been enhanced by the allotments which were assigned when the program began. If one owned his farm then, the loss would be less severe than to those who have bought new land with allotments attached. They paid more for the land because of the allotment—and without it, many will have difficulty meeting mortgage payments. Surely, this is a matter of concern to Congress. We cannot lightly treat the results of an action such as this.

This economic effect—which no one seems to be able to calculate—is the principal reason that I feel hasty action should not be taken.

The tobacco program should not be brought down as a vindictive action.

Modification may be in order and if so, they should be approved. But it makes no sense to throw out the baby with the wash water.

Changes in the program, if required, should be considered in an orderly manner, with hearings before the Tobacco Subcommittees of the House and Senate, not in an atmosphere of confusion and controversy.

The tobacco program has evolved in a progression of well-considered steps and it should be continued that way, in the national interest.

In my opinion, if every activity of the Federal Government had been conceived, developed, and administered in the way this program has, we would not be in the sad budgetary situation with which we are confronted today.

If this matter is scrutinized objectively, it should be obvious that the purpose of the tobacco program is to keep a balance between supply and demand; that it has been supported by an overwhelming majority of growers; that they have prudently agreed to adjust allotments, upward or downward, over 40 years to meet the supply requirements of the trade; and that all of this has cost the Government a minimal amount.

The program has achieved its original objectives and survived the test of time. What more can be said.

The program was begun in the 1930's to provide orderly marketing for thousands of tobacco growers who were at that time barely recouping their cost of production. The program sought to assure that supplies did not exceed demand and sought to lift prices under a system of loans guaranteed by the Commodity Credit Corporation. The system worked well for all concerned. Growers were able to stabilize their production and prices, manufacturers were guaranteed a more steady supply, our export trade was enhanced, and the Nation was delivered of one of the major economic problems of the time.

Then, in the confusion following the Supreme Court's invalidation of the original Agricultural Adjustment Act, in 1939 the program was suspended by growers in their referendum. Did the good record of the original program carry over into the non-Government-participation era? It did not. The 1939 crop year was disastrous. Production was out of kilter, prices were unstable, and growers learned a hard lesson. It made sense what the tobacco program was designed to accomplish.

Now, more than 40 years later, the system is still functioning, with some modifications, on the same premise that brought about its creation. It is a remarkable record and has been accomplished because all segments of the industry—growers, warehousemen, buyers, manufacturers, and exporters—have cooperated with the Government in bringing stability. The public also has benefited through the taxes paid, the addition of thousands of jobs and productive utilization of vast areas of land.

Critics of the program are not always clear why they oppose it. Some say the Government should not be in the business of regulating the economy of an industry—that it should keep hands off. This program is self-regulated with the cooperation of the Government.

Some argue that price supports are unnecessary in a time of inflation. The truth is that in most instances prices paid on the market exceed the price support level anyway.

Some question the propriety of the Government having anything to do with tobacco production while simultaneously spending money for medical research to deal with those who fall victim to diseases which have a supposed causal connection with smoking. If this be public policy, why do we make loans to companies which build automobiles that might kill people or permit the manufacture of certain dangerous drugs?

There are those who contend that the Federal Government should not spend money on salaries of personnel who deal with tobacco—in administration, statistics, information, et cetera. Similar outrage is not expressed against the thousands of Department of Agriculture employees who deal with other commodities. Also, the Government is now being relieved of more than $8 million annually for the cost of grading tobacco, as a result of action taken earlier this year in the reconciliation resolution.

It is also argued that the cost of cigarettes and other tobacco products is inflated because of Government participation. The fact is that the amount received by growers for their tobacco is only a small portion of the cost you pay at the cigarette counter.

The fact is that so long as tobacco is grown, there will be a demand for tobacco products. If anything, the system of regulation now in effect limits the amount grown, rather than making tobacco more accessible.

No one has been able to project what would happen if the tobacco program were ended. It seems obvious that mass confusion would be the immediate result. If there were no allotments, more tobacco probably would be grown—both by those who now grow it and others who would see an opportunity for gain. It is likely that many of the 170,000 small farms on which tobacco is now grown would find great competition from large producers who would utilize the benefits of mechanized production.

If production got out of hand, there would be no way to limit it—or—to project what would happen from year to year.

Since tobacco companies obviously must have supplies in the volume required, if better prices and access could be obtained abroad, we might well find more offshore tobacco coming in—with the resultant adverse effect on our balance of payments.

All this is not a desirable goal. Surely, we do not want to create a situation in which the economic well-being of thousands of growers would be placed in jeopardy, the marketing system in disarray and our export trade endangered at a time when so many other ills are befalling us.

Therefore, I urge defeat of the amendment.

(By unanimous consent, Mr. WHITLEY was allowed to proceed for 2 additional minutes.)

Mr. WHITLEY. Mr. Chairman, I shall not belabor the debate. I think the issue has been thoroughly debated on both sides.

There is just one essential point that I think we ought to remember. It has been agreed, I think, by everyone who knows anything about the tobacco program and by anyone who knows anything about the economy of the tobacco-producing areas that to approve this amendment would cause very—and I underscore the word "very"—serious economic disruption in five States and sizable areas in additional States.

Now, if this Congress is going to do that, if we are going to do that, what are we getting in return? Is it worthwhile? Is the taxpayer going to get anything as a result of our taking this action?

Well, there are two arguments that have been advanced. The first is that tobacco is bad, that the smoking of tobacco is a health hazard, and that we ought to oppose it.

Maybe somebody ought to offer a sense of the Congress resolution that smoking cigarettes is hazardous to your health. But adopting this amendment in no way—in no way—addresses the issue of smoking and health. If it passes, there is not one single cigarette that is now being manufactured, sold, and smoked that will still not be manufactured, sold, and smoked. Tobacco will still be available to the tobacco companies, probably at a lower price, so you are not touching the smoking and health issue at all.

The second point is that we would save money for the taxpayers by abolishing this program.

I have carefully researched the cost of this program in every aspect, and all of the figures I have been able to get from the USDA, the Congressional Research Service, or anyone else, adds up to a total cost, including research, including extension, including everything else, of something like $29.3 mil-

lion. That was for 1980. We have already cut $6.2 million, 21 percent of that has already been cut, because we have eliminated the taxpayers payment for the grading and inspection service. That is now being paid by the growers. The only other cost is a possible interest subsidy. That has been eliminated because the interest is now being charged by the Commodity Credit Corporation at the cost of money to the Government. So we are going to stand here today, if we adopt this amendment, and create severe economic disruption and not get a darn thing for it.

Mr. HARTNETT. Mr. Chairman, will the gentleman yield?

Mr. WHITLEY. I yield to the gentleman from South Carolina.

The CHAIRMAN. The time of the gentleman from North Carolina (Mr. WHITLEY) has expired.

(On request of Mr. HARTNETT and by unanimous consent, Mr. WHITLEY was allowed to proceed for 2 additional minutes.)

Mr. HARTNETT. I would like to ask my colleague a question. The statement has been made by the author of the amendment at least twice on this floor that there are 115,000 tobacco allotments in the State of North Carolina and only 30,000 tobacco farmers.

I understand this is very much incorrect, and I just wonder if the gentleman can set the record straight for this committee as to exactly what the figures are on tobacco allotments in North Carolina and the number of tobacco farmers there are in North Carolina.

Mr. WHITLEY. The gentleman's figures, as you have said, are completely in error. I would like to enlighten my colleagues on the subject of the size of the farms and the number of farmers. I think I have some information on that right here. For the 1979-80 flue-cured crop—these are not North Carolina figures, but the flue-cured crop—there was an average of 13.8 acres of tobacco produced on 28,906 management units. An average of 13.8. Now, that is not big farming by anybody's standards. Only 27 percent of those operators own no allotment and rented in all of theirs.

The CHAIRMAN. The time of the gentleman from North Carolina (Mr. WHITLEY) has again expired.

(By unanimous consent, Mr. WHITLEY was allowed to proceed for 2 additional minutes.)

Mr. WHITLEY. Fifty-seven percent used a combination. And get this: 72 percent of all of the producers of flue-cured tobacco were owners of at least some tobacco allotments.

So it is not a matter of just a few people growing great big farms. We are growing an average of 13.8 acres, and the figures on burley are much smaller than that.

Mr. HARTNETT. But what I really need to know, and what I think other Members of this House would like to know, if the gentleman will yield further, are the figures correct of 115,000 allotments in the State of North Carolina versus 30,000 farmers? In fact, the distinguished gentleman from North Carolina (Mr. JOHNSTON) told me there are 100-and-some-odd thousand tobacco farmers in North Carolina.

Mr. WHITLEY. I think we are talking about apples and oranges. There are two types of tobacco. There is flue-cured tobacco and there is burley tobacco. The operating units in flue-cured tobacco are much larger than the operating units in burley tobacco. The operating units in burley tobacco—the gentleman from Virginia (Mr. WAMPLER) I am sure will agree with me—I do not have the exact numbers of those, but they are very small; 2, 3, 4 acres is a normal operating unit in burley. So when you talk about large numbers of allotments, you are including those small burley allotments. But when you are talking about small numbers of operators, you are talking about flue-cured tobacco. So the figures are apples and oranges.

Mr. HARTNETT. I thank the gentleman for his answer.

Mr. ALEXANDER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I represent a district in Arkansas. No one in my State grows tobacco. I do not smoke, nor do I understand why other people do. But I think that people should have the right to use tobacco, in whatever form, if they wish to.

It is my understanding that the amendment that is before us today is represented by some people as necessary to change the law because people do not have the right to grow tobacco if they want to. That is simply not the case. In order to grow tobacco you must have the land, the equipment, the labor, and the knowledge. We cannot grow tobacco in Arkansas because we do not have the knowledge and we do not have the land. If you have those four ingredient and component parts, under the present system you can apply for and receive an allotment to grow tobacco if you have the land, the labor, the equipment, and the knowledge. Growing tobacco is somewhat similar, I am told, to producing wine. You have to have the climate, the land, the knowledge, and all of the ingredients in order to produce this commodity that is produced and sold in this country in such large abundance.

I hope my friends today in this Congress will recognize that the States that have produced tobacco in the past do an excellent job in producing that product and provide a commodity that the people of this country use and prefer.

It is also offered as an export which is sold around the world today. I see no reason whatever to change a successful program that has produced a very bountiful crop, producing revenues for this country, by changing as envisioned by this amendment. I urge my colleagues to vote down the amendment that is presented here today.

Mr. ROGERS. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, I wish to speak in strong opposition to this amendment which would absolutely destroy the livelihood of hundreds of thousands of farmers and especially those in the very poor sections of our country.

At the outset, I would like to commend the leadership on both sides of the aisle. And I would like to especially commend the gentleman from Texas (Mr. DE LA GARZA), the gentleman from Virginia (Mr. WAMPLER), the gentleman from North Carolina (Mr. ROSE) and my distinguished colleague from Kentucky (Mr. HOPKINS). And I would like to add a special thanks to a young freshman Member of this body, who has lent many hours and a great deal of judgment to this cause, and that is my good friend and my distinguished colleague, John NAPIER of South Carolina.

Mr. Chairman, the real question before this body today is not whether or not tobacco is going to be grown. The fact is that as long as there are people who want to smoke, tobacco will be grown. The question is who will grow it? Will it be grown by the 276,000 family farms throughout 20 States in our country, or will it be grown by a few large corporations?

Because, Mr. Chairman, it is clear that without the poundage control and loan program, the large corporate farms will grow more and more tobacco. They can afford to use expensive machinery and can produce tobacco more cheaply than the small farmers. Small growers would never be able to compete with these corporate farms, and they would soon be run straight out of business.

And let there be no mistake about it. Despite all the talk and rhetoric you have heard, we are talking about very small farms. The average size of a burley allotment is only 1.3 acres. There's just no getting around this fact, these are mostly small, family farms.

And I urge my colleagues to consider that these farmers are people who rely on tobacco as their main cash crop. They use their tobacco income to educate their children, buy their groceries and to make their car, tractor, and mortgage payments.

If these folks lose their allotment and if they are run out of business by

the corporate farms, these hard-working men and women will have no other choice but to go onto welfare. Some of my colleagues have argued that these farmers should just grow other crops. But that would not replace their lost tobacco income since there is not much else you can grow on just 1 acre or so that will earn anywhere near as much as tobacco.

And some of my colleagues have argued that even if tobacco farmers cannot grow tobacco, they would be able to get other jobs, off the land. But Mr. Chairman, many wives have already gone to work in factories, and many other family members have tried to help out their families by getting other kinds of jobs. But the fact remains that in these rural communities there generally are not many other jobs available.

So if these farmers lose their tobacco income, they will not be able to replace it. Despite the fact that they want to work and have worked hard on their farms for years and years, they will be forced onto the welfare rolls. And this will cost all taxpayers millions and millions of dollars. In looking over income figures for my own district, I estimate that the increased welfare costs in just 1 year would be more than the entire profit made by the tobacco program over the last 10 years. And if that is the case for just one district, just think of what the welfare costs would be for the entire country.

Mr. Chairman, it is just plain foolish to kill a successful, moneymaking, Federal program and to replace it with a system that will put people out of work and onto the welfare rolls.

I also urge my colleagues to consider what the impact on local economies and communities would be if we were to lose the allotments.

In my own State, 81,000 people count on tobacco for their jobs. And considering the unemployment rates which are already high, these people would have a hard, if not an impossible time, finding other jobs.

Local communities would face severe financial hardship. Let me explain to you how important these allotments are. A tobacco allotment adds about $6,000 to the value of an acre of land. Without an allotment, appraised land values would fall. And Prof. Milton Shuffett, an agricultural economist at the University of Kentucky, tells me that with the fall in land values, Kentucky would lose $1.5 billion in State and local tax revenues. This will mean less money for schools, hospitals, and local and county revenues.

At the same time, with the falling value of land, farmers' loan collateral would fall. This would lead to foreclosures throughout all of the tobacco regions.

Let there be no mistake about it, if this amendment is adopted there will be financial catastrophe for thousands of small farmers and for their local communities.

Mr. Chairman, the question before the Congress today is not whether or not we can afford to keep the tobacco program. The question is whether we can afford to get rid of it. If the Congress adopts this ill-conceived amendment, it will be ruining hundreds of thousands of small farmers. And it will be replacing a highly successful, moneymaking program and replacing it with increased welfare costs. There is no sense to this approach.

Mr. Chairman, we are not dealing with abstract, cold figures. We are talking about individual, hardworking men and women on farms across the country.

Over the past half year, the Congress has passed the President's program for economic recovery. It is time we gave his program a chance to work. And it will not work if the Congress drives farmers off their land. It will not work if the Congress undermines the economies of communities throughout the country.

We need these farmers. They are essential not only to their communities, but to their States and to our entire national economy. And it is high time that the Congress demonstrated its commitment to the family farmers which have already been hurt so badly by the soaring interest and inflation rates. The Congress can show its commitment to the family farms our country so needs by voting against this amendment.

The facts are clear, Mr. Chairman. The tobacco program is highly successful and is absolutely vital to tobacco farmers and communities all across the country.

I urge my colleagues to join with me in defeating this amendment.

□ 1345

Mr. GUNDERSON. Mr. Chairman, will the gentleman yield?

Mr. ROGERS. I yield to the gentleman from Wisconsin.

Mr. GUNDERSON. I thank the gentleman for yielding.

Mr. Chairman, I rise in strong opposition to the amendment that would eliminate the tobacco loan program.

While I am more closely associated with the dairy portion of the farm bill inasmuch as I have the largest dairy district in the country, there has been so much misinformation circulated about the tobacco program that I felt that I had to take the well to clear up many of the mistaken impressions that have been created about the tobacco loan program over the past weeks and months.

I have seen and heard a lot of talk that the tobacco program only aids large, commercial tobacco growers. That simply is not true. Let me tell you about tobacco farmers in Wisconsin—yes, Wisconsin has its share of tobacco growers as well.

First of all, the average tobacco acreage in Wisconsin is 3.8 acres. The average annual income from that acreage is $8,200 per farmer. Wisconsin tobacco farms are almost exclusively family farms.

Second, let us take a look at how the tobacco loan program worked in Wisconsin in 1980. The loan price was 72.9 cents per pound. The average market price was $1.17 per pound. The program was not, in fact, used until the market "dried up" later in the year. And then, when tobacco farmers in my district entered the program, it was the first time since 1972 that tobacco from the Third District in Wisconsin had entered the tobacco loan program.

Finally, the tobacco program is a loan program, not a price support program. Tobacco is placed under loan at a specified rate of interest and the Government holds the tobacco as collateral. In 1980, the interest rate was 11½ percent. In 1980, the net loss of the tobacco program was $36,000.

In fact, the cummulative loss experience by the tobacco program over its 50-year existence through 1980 is just over $56 million. That is just a little over $1 million per year.

Mr. Chairman, the facts are that the tobacco loan program does benefit the small family farmer in Wisconsin and costs the Federal Government relatively little.

I, therefore, urge the Committee to defeat this ill-conceived amendment.

Mr. ROGERS. I thank the gentleman for his comments and I yield back the balance of my time.

Mr. CONYERS. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise to ask the manager of the bill a couple of questions.

The first is, in view of the diminishing nature of the tobacco industry in America, have there been any studies conducted to determine alternatives in this regard? I mean, what happens when we reach the Detroit crisis that we are experiencing with regard to automobiles? We have got to do something else somewhere along the line. We may not always enjoy the tremendous auto production that made Detroit the prosperous area that it once was.

Have there been studies or anything on that?

Mr. DE LA GARZA. Mr. Chairman, will the gentleman yield?

Mr. CONYERS. I yield to the gentleman from Texas.

Mr. DE LA GARZA. I thank the gentleman for yielding.

I would like to tell the gentleman this is a major concern of the Committee on Agriculture and in the 1977 act we added title XIV, which is the research section, and under that title

and other additions since that time, we have been working and cooperating not only with all of the agricultural colleges in the United States, but dealing specifically with the small farmer in the South, tobacco farmers, and some of the areas where we have limited production, several studies have been conducted by members of the committee.

For example, we have an amendment for dairy goat production and for titricale and for fish hatcheries. We have been working with Auburn University, Texas A. & M., Tuskegee Institute, Praire View A. & M. and we have been in the field. We have visited with them. As limited as the funds are, we are trying to gather more funds to continue that reaserach and we have gone to the farmers themselves and asked, "What do you think we can help you with in research for that eventual day."

Mr. ROSE. Mr. Chairman, will the gentleman yield?

Mr. CONYERS. I yield to the gentleman from North Carolina.

Mr. ROSE. I thank the gentleman for yielding.

I would point out to the gentleman that people keep on smoking and they seem to be doing that in increasing numbers.

Mr. CONYERS. Is that good news?

Mr. ROSE. That is not good news to me or bad news to me. That was not the gentleman's question. But my observation is that when we talk about this industry, I ask the gentleman which part of it is the gentleman really concerned about, and I say to the gentleman that the part that I am concerned about is, are the people who grow these tobacco leaves, as long as it is legal, as long as it is not a misdemeanor or a felony to posses or smoke cigarettes, I want my farmers getting the top possible dollar for those leaves.

I understand what the gentleman has been through in his district and when the problems occurred with Chrysler I think the gentleman will find that a majority of the Democrats from my State understood that problem, but we want the gentleman to stay in business and keep on making automobiles, and I think the gentleman has proved with the help of this body that they can do it and do it very well.

Mr. CONYERS. Is the gentleman equating the Chrysler bailout with the tobacco subsidy amendment?

Mr. ROSE. No. The gentleman was asking me are we checking into other things for tobacco farmers because of something that the gentleman said about Chrysler. I thought the gentleman was the one who made the comparison.

Mr. CONYERS. Let me rephrase my inquiry.

Mr. ROSE. I would appreciate that.

Mr. CONYERS. What is the tobacco industry doing to anticipate the potential downturn in tobacco sales, assuming people begin believing what the medical industry suggests?

Mr. ROSE. The tobacco industry?

Mr. CONYERS. If the gentleman posits that there is not a diminution in the industry and that people are smoking more than ever, the question that occurs to me is simply this: Are there alternatives being considered in the gentleman's area of the country, as we must in Michigan? What do we do? Suppose we do not always grow so much tobacco? Suppose somehow miraculously the subsidy fails one unfortunate year, what can the people of those areas of North Carolina, South Carolina, Kentucky, Virginia, anticipate in terms of a full employment program?

The CHAIRMAN. The time of the gentleman from Michigan (Mr. CONYERS) has expired.

(By unanimous consent, Mr. CONYERS was allowed to proceed for 4 additional minutes.)

Mr. ROSE. If the gentleman will continue to yield, here again the gentleman is saying the tobacco industry. What is the tobacco industry doing. Cigarette manufacturers are probably not doing anything in anticipation, but we in the Congress who support job programs and who support the full training of umemployed workers will continue to do that and find more imaginative ways to see if this demand goes down, and the Secretary of Agriculture decreases the allotments along with it, that we will have alternative programs.

Mr. CONYERS. I thank the gentleman.

Mr. DE LA GARZA. Mr. Chairman, will the gentleman yield?

Mr. CONYERS. I yield to the gentleman from Texas.

Mr. DE LA GARZA. I thank the gentleman for yielding.

I think to put it in perspective, there are studies being made as I mentioned. What can one raise on a few acres, rabbits, triticale, a fish. Beyond that, if the gentleman would go like I have gone to where those areas are, it is going to be food stamps and welfare. That is what it is going to be, if they do not have a little allotment or the production on their allotment. That is the only other answer. That is the only other alternative.

Mr. CONYERS. May I suggest to the distinguished chairman of the committee that maybe then this responsibility of creating alternatives might be one that the Members of Congress might want to consider. Maybe the tobacco industry does not give a rat what happens to these farmers who need this continued support.

Mr. EDGAR. Mr. Chairman, will the gentleman yield?

Mr. CONYERS. I yield to the gentleman from Pennsylvania.

Mr. EDGAR. I thank the gentleman for yielding.

I would just like to clarify a point.

The gentleman indicated in his questions that he was concerned about the number of people smoking. I think the accurate answer—I would like some clarification from the committee—I think it is right that there are probably more people who are smoking, but there are also more people and the percentage of the total population in the United States that is in fact smoking has been reduced.

Mr. ROSE. If the gentleman will yield, that is possibly right. I do not argue with that. I am just saying as long as it is legal to smoke cigarettes, I want my farmers to get top dollar. Was the gentleman talking about taxes a minute ago?

Mr. EDGAR. I want to congratulate the gentleman for asking the question about research and technology. I raised that a little bit earlier and I think that is an important issue that has to be raised.

Mr. SHAMANSKY. Mr. Chairman, will the gentleman yield?

Mr. CONYERS. I yield to the gentleman from Ohio.

Mr. SHAMANSKY. I thank the gentleman for yielding.

Mr. Chairman, I would like to quote from Senator HATFIELD, from the CONGRESSIONAL RECORD of September 17, 1981——

The CHAIRMAN. The Chair will advise the gentleman from Ohio (Mr. SHAMANSKY) that it is not in order to quote from the proceedings of the other body.

Mr. ALBOSTA. Mr. Chairman, will the gentleman yield?

Mr. CONYERS. I yield to the gentleman from Michigan.

Mr. ALBOSTA. I thank the gentleman for yielding.

I want to point out something, that I have listened very intensely today to the whole debate about the tobacco program. I have heard very few comments on exactly what this tobacco program is all about.

In my opinion, being a farmer myself, and I have been one all my life, I think I can speak pretty intelligently not about only this program but every program that I can remember since I was a little boy this high, running around with my father in the milk business.

I can tell the gentleman firsthand exactly what this program does. It brings about orderly marketing to a group of farmers in five States and part of many other States that they would otherwise not have.

This Congress is going to have to make a decision as to whether or not it wants to support a program that will bring about orderly marketing for a

group of farmers in five States and those other ones that grow tobacco also. I think that that is the point that we have really missed today.

I appreciate my colleague from Michigan yielding to me because it was also brought up, if I may comment on this, the fact that these farmers hold some monopoly for growing of tobacco.

The CHAIRMAN. The time of the gentleman from Michigan (Mr. CONYERS) has again expired.

(By unanimous consent, Mr. CONYERS was allowed to proceed for 2 additional minutes.)

Mr. ALBOSTA. If the gentleman will continue to yield, these farmers have to go to those people that they buy their supplies from and ask them, "How much do I have to pay for that supply?" They turn around and go to the auction sale and ask them at the auction sale, "How much will you give me?"

Is there any other business in this country or any other country that operates that way?

The answer has to be, "no." And so the point has to be during this whole farm bill as to whether or not we will assist, not have a giveaway program, this is not a giveaway program, this is simply a loan program—whether or not we will assist our farmers in this country to orderly market their commodities.

Mr. CONYERS. I thank the gentleman for his comments.

I close with a final question to the manager of the bill and a dear friend of mine, the gentleman from North Carolina.

I know there is no affirmative action provision in the measure. Does anyone have any idea how many minority tobacco farmers there may be and how many minority allotment holders that there might exist in the Nation?

Mr. ROSE. Yes. I went over those figures with our colleague from Maryland (Mr. MITCHELL) when he spoke against this amendment earlier.

In the State of North Carolina there are 9,300 farms operated by blacks. And 4,100 of those farms have tobacco allotments on them. In the State of Virginia, 1,700 black tobacco farms, out of some 3,000 total black farms. The percentages are very high. And they are not tenants. These are ownership situations, I would say to my colleague.

Mr. CONYERS. I am happy to see an affirmative action program apparently working with or without EEOC. This is an incredible state of affairs in at least five States and I commend my colleague for this valuable information.

Mr. ROBERT W. DANIEL, JR. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, the Federal tobacco price support system has provided a stable income to many owners of small farms for the last 48 years.

This program is extremely complex, and any efforts to change it without a full understanding of the ramifications of such changes could be extremely harmful to many of the families who make up the backbone of America's farm community.

The committee system exists to insure that issues considered by the House receive more thorough study than can be given to them in the short time allowed during floor debate. The Agriculture Committee has spent a great deal of time examining the wide range of issues that are traditionally included in omnibus farm legislation, and has proposed a series of well-thought-out changes to many of our current agricultural programs.

The committee has not considered the tobacco program, since this program is established under legislation separate from omnibus farm legislation. To make sweeping changes on the House floor would deny the American public, the tobacco industry, and farm interests the right to express their views on what changes are necessary and prudent. I ask my colleagues to defeat this amendment, and if we believe changes are necessary, then let us make these changes after thoughtful rather than hasty consideration.

□ 1400

Mr. MICHEL. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in opposition to the amendment.

We have had a rather extensive and lengthy debate on this amendment. I think it is very worthwhile. I had intended to speak earlier on the amendment, because I felt there would be far too many Members who would simply take the position: "Don't confuse me with the facts, my mind is made up."

I say that because in any number of question and answer periods with what I thought were very intelligent people. I found they had no idea how this program actually worked. So I say again, I think the debate we have had has been very enlightening.

I do not know much about tobacco. Shucks, I come from an area where we raise corn and soybeans, feed cattle and raise pigs. That is the farming community out my way.

I know that the grain price support program over a period of time in the past has cost untold billions of dollars.

I also know that it has also served us in a different way than the one the gentleman from Michigan so ably pointed out for tobacco which is an orderly marketing mechanism.

So for that reason I have to rise in opposition to the amendment. The tobacco program was not included in the legislation initially before us because the committee in its wisdom and in my judgment found no need to recommend changes at this particular time. Neither does the administration support any changes in the operation of the program currently.

Why then did the Committee on Agriculture and the administration oppose the amendment? Why do we do that? I think there is good and sufficient reason.

The tobacco support program is an important part of our economy. We have been told any number of times here that more than 200,000 farms in this country produce tobacco and thousands more farm families depend on tobacco for most of their income.

When we talk about preserving the family farm as we have done so many times over a period of time, I will tell you, if you are talking about really small farmers, they do not get any smaller, than these.

I remember in my earlier days in this Congress when I had arguments with Mr. Cooley from North Carolina, the chairman of the Agriculture Committee at that time. I jokingly likened the tobacco allotment of those small farmers to having no bigger plot than square foot dimensions of the ceiling of this Chamber.

We are really talking about very, very small farmers. This type farmer supports his family on an average of four acres and spends 800 hours a year harvesting just one acre of tobacco. This endeavor requires the labor of not only his family members, and during harvest it requires hired help, which reduces the critically high unemployment that exists in many of those rural areas where tobacco is grown.

While utilizing less than one percent of the nation's cropland, tobacco accounts for approximately $3 billion of total crop sales annually.

Something must also be said about tax receipts from the tobacco industry, at a time when people are searching for new and enhanced revenue sources around here. Where are we going to finance the Government? Well, more than $6 billion is collected annually by Federal, State and local governments from the sale of tobacco products alone, not to mention corporate and personal income taxes. Few other commodities can boast such revenue contributions to the Federal Government that are used to provide services vital to our communities.

But the most important thing to keep in mind is the program's cost currently. I hope everyone understands that there are no direct Government payments to tobacco producers, as has been the case even out my way, to pay to not grow a crop over a period of time, a philosophy that is completely alien to this Member.

So I am happy to speak in opposition to the amendment.

The tobacco support program is based on a loan, not a subsidy, and it is repaid with interest at rates comparable to the cost of money paid by the Government.

Admittedly, earlier on that was not the case, but we have corrected it in recent times, so I applaud those corrections that have been made

In fact, the program has one of the best repayment records of all commodity programs. You have heard the figures here of the $5 billion loaned out over the entire length of the program. Cumulative losses, in my judgment, are minuscule compared to those of other crops and commodities, some of which are grown and have been grown historically in my own district.

I think, too, the House should bear in mind that the tobacco program is the least expensive farm program we have now.

In addition, bear in mind that under our reconciliation bill earlier this year, tobacco producers are required to even pay for the full cost of grading and inspection services that traditionally have been borne by the Department of Agriculture. You ask that same question on some of the other commodities and see what kind of an answer you get.

Finally, I would like to remind the House that tobacco is not only a southern crop. It is grown in 22 of our 50 States, as far north as Connecticut and Wisconsin and as far west as Kansas. Elimination of the price support program would have far-reaching ramifications, ramifications that cannot be determined here. The economies of the States where tobacco is a major crop, as has been alluded to here, would be devastated by the sudden disappearance of the program.

The CHAIRMAN. The time of the gentleman from Illinois has expired.

(At the request of Mr. FOLEY and by unanimous consent, Mr. MICHEL was allowed to proceed for 4 additional minutes.)

Mr. MICHEL. Mr. Chairman, I thank the gentleman for this additional time.

May I just simply sum up here that I do not think that there is any good purpose to be served here by attempting to eliminate the program at this juncture. As has been said here earlier we are not going to eliminate the public health hazard by what we do here one way or another today. I do not smoke, and I never have. We have seven children who never got stuck on the weed and I am grateful for that; but this is not the legislation that will in any way alter people's smoking habits. Shucks, you have people who are smoking things a lot stronger than tobacco these days and we have been unable to do anything about that, as injurious as it is. People are going to consume alcoholic beverages and we are not going to stop that. The people are going to continue to do dangerous things to their own lives because that is their personal choice. We are not addressing ourselves to that here.

It is, simply, an orderly marketing program for this very vital commodity. I can rise in good conscience in opposition to the amendment and urge my colleagues to vote it down.

Mr. FOLEY. Mr. Chairman, will the gentleman yield?

Mr. MICHEL. I am happy to yield to my good friend, the gentleman from Washington.

Mr. FOLEY. Mr. Chairman, I want to compliment the gentleman in the well. This is not an issue on which there is a partisan division. The gentleman is a distinguished Republican leader of the House. The leadership on this side is opposing this amendment as well. We feel very strongly for the reason that the gentleman and others have stated that the truth of this program is that it does provide more assistance to small farmers and it does not provide any assistance or inducement to smoking. That health issue is a completely fraudulent issue.

The gentleman has stated it in an articulate and persuasive way that over the years this program has been the least costly of all the agricultural programs we have ever engaged in. It is important to hundreds of thousands of producers. It will not in any way induce or contribute to any health problem in the United States.

I urge on behalf of our side that all Members who can be so persuaded vote against this amendment.

Again I congratulate the gentleman in the well for his statement.

Mr. MICHEL. I thank the gentleman.

Mr. FOUNTAIN. Mr. Chairman, will the gentleman yield?

Mr. MICHEL. I am happy to yield to my friend, the gentleman from North Carolina, who has educated me over a period of years on a variety of subjects, not the least of which is one of his favorites being debated here.

Mr. FOUNTAIN. Mr. Chairman, I thank the gentleman from Illinois for his compliment. I just want to thank the gentleman for his fine contribution and his bipartisan approach. The gentleman was a member of my subcommittee many years ago. My subcommittee seems to have done a lot for Republicans. The distinguished speaker in the well is now the minority leader, and a very capable one. Senator BOB DOLE was on my subcommittee before he went to the Senate. Senator KASTEN, a former member of my subcommittee, is also in the Senate. It seems I have played a part in helping others, but somehow I am still chairman of the Subcommittee on Intergovernmental Relations and Human Resources. However, I like my job.

But I do want to thank the gentleman for his contribution and particularly his opposition to the pending amendment, which bankrupted a large segment of my State, and destroyed the means of livelihood of thousands of my constituents. I do hope that many of his Republican colleagues will follow him. Anyway, as a long time friend, the gentleman with whom I have worked on other matters, I again thank him for his help.

Mr. MICHEL. Well, I thank the gentleman. I hope our Members in sufficient numbers will vote against the amendment.

Mr. PETRI. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I got a call before the debate today from a North Carolina tobacco farmer who had some interesting observations to make about this tobacco program that we have been debating here today. He said it was absolutely wrong for the Government to stop people from going to the marketplace.

He complained that the allotments are not controlled by the tobacco farmers, but by the allotment holders, and there is a distinction there.

He said Congress should do away with the program.

So I rise in support of the amendment and I do so knowing that many of my friends on the other side of this issue have expressed concern to me and to others about protecting the small tobacco farmer.

They would have us believe that eliminating the allotment system will hurt the small farmer. But the tobacco program does not work to benefit the small farmer; rather it works to benefit the tobacco allotment holder, often absentee landlords who years ago were lucky enough to buy or to inherit a tobacco allotment.

If there is one word that can best describe the tobacco program, that word is "feudalism."

Franklin Roosevelt once described those who expected the Government to support their privileges as economic royalists. That phrase is certainly pertinent to today's debate.

It is economic royalists who control the allotments and who reap the benefits of this program.

It is economic royalists who collect the monopoly profits and tell tobacco farmers where and when they can plant tobacco.

Now, the U.S. Government's latest agriculture census has some interesting figures so far as North Carolina and the tobacco growers and allotment holders in that State are concerned. The U.S. Agriculture Department figures, according to the last agriculture census that we could determine, indicate that in North Carolina there are 116,000 tobacco allotment holders. There are approximately 34,000 farmers of tobacco. That means there are

at least 82,000 people who are getting money by renting those allotments who are not doing any of the work.

So if you are looking for a place to invest your money, tobacco allotments offer a high return and numerous tax advantages. That is why most allotment holders would rather sit home and count their profits, rather than sweating it out down on the farm.

My friends who oppose the amendment would have us believe that eliminating the allotment system would destroy the small farmer. On the contrary, it would create more opportunity for the small farmers.

Again, the Agriculture Department in a study that was done just a few years ago indicates that total income for the tobacco farmers of the United States if this Government program were done away with would go up $75 million. Sure, there would be less money for the allotment holders. Their income would go down about roughly we figure about a billion dollars in the United States, but the income for the farmers who grow tobacco across the board would be up about $75 million according to this particular study.

You have only to look as far as Pennsylvania and Maryland where specialized types of tobacco by a vote of the farmers themselves have been completely deregulated. We heard some talk earlier about the problems that people might have in Maryland from a Representative from Maryland. I would submit that his tobacco farmers in that State are not subject to the allotment system that we are dealing with here today.

What will happen to the small farmers under deregulation? First, they will be able to grow tobacco anywhere they want on land rented at competitive rates. The profits for growing tobacco will go to the farmers, not the allotment holders or landlords.

Second, small farmers will be able to rationalize their operations and achieve greater efficiency.

Third, eliminating the monopoly rents will bring production costs down by one-third.

Fourth, the lower prices from reduced production costs will enable tobacco farmers to sell a larger amount on the export market. In fact, if lower domestic prices enabled us to recapture just one-half of the ground we have lost in world tobacco markets, we could increase our total domestic production by 25 percent.

Beyond the indirect subsidy from monopoly rents, there are other subsidies, including subsidies for administrative costs, loan subsidies and potential losses which are quite large on currently stored tobacco.

In a time of severe budget cuts in all areas, we should not let tobacco go untouched.

This feudalistic tobacco subsidy program clearly is not working and it is hurting our country's position on the world export markets, resulting in a huge subsidy not from the taxpayers to the Government and then out to the tobacco growers, but rather a subsidy from the purchasers of tobacco products as the result of Government regulations to the allotment holders, a transfer in our economy in the neighborhood of a billion dollars. If we are going to transfer that kind of money I submit with our budget constraints here in Washington we ought to transfer that through raising the tobacco tax from the consumer to the Federal Treasury where it can do some good for everyone.

□ 1415

Mr. PERKINS. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, we have been growing tobacco in this country since the first settlement at Jamestown, and we are going to continue to grow it maybe for the next several hundred years.

The allotment program has been attacked today on the basis that we have arbitrary allotments. This is not true. Allotments are based on the history of the farm. In the depression days, the allotments were based on the number of acres a farmer grew during that period. I do not think any of us want to deprive a farmer of the little clout in the bargaining place in the market. I do not know of any labor organization that is against collective bargaining. And this in some sense of the word is very similar. The allotment program represents the voluntary and organized action of thousands of small growers.

It has been mentioned that this program, the tobacco price support, gives the farmer a minimum wage. In reality, that is everything and all the price support program does.

Now, in my district I have some 22,000 little farmers who grow less than an acre of tobacco. They have other small incomes along with the tobacco, maybe 12 or 13 cows, raise some pigs, maybe a few sheep. But their chief income is from their tobacco. And if we knock the price support out from under the tobacco, we are going to bankrupt these little farmers that have hundreds of millions of dollars worth of loans from PCA, Farmers Home Administration, the banks, and we are going to drive them into the cities. Unemployment compensation—yes and more

But I do not believe when we think through a sound program, as this program has been for the past 40 years, that we want to destroy it. It has been a good program that has been almost cost-free to our Government. Under all estimates, it has never cost more than $60 million over the entire 40 years of its operation. No other commodity can come within that category anywhere.

The Secretary sets the price support—about 65 percent of parity, maybe on burley this year $1.60 or a little better, maybe on Flue-cured a little more. The associations, the local associations of growers have already contracted with Commodity Credit for loans which if advanced will be repaid with interest. And this is no subsidy program by any means. If anything, we are subsidizing the Government because of the tremendous taxes, $6,000,000,000 a year that are paid by tobacco users. Moreover the cooperatives only have to advance payments to these farmers in the case where the farmer does not receive the support price for his tobacco. In many cases we have some setbacks, the tobacco is not cured in the proper manner or something, and the graders do not grade it up to the support price level.

I think these loans which have stabilized the tobacco program, no one should think about depriving the farmers, the small farmers.

I want to say something about the so-called economic royalists that the gentleman from Wisconsin (Mr. PETRI) referred to. This is a deomcratic program. The farmers vote on it. I do not know of any landlord-tenant relationship where you could describe the situation as economic royalist. I think it is the most democratic program that we have in existence insofar as our farm program is concerned today, costing the Federal Government very little—only a small administrative cost involved.

Anyone who wants to grow tobacco is not foreclosed. Some extra acreage is made by the Department of Agriculture, allocated through the Agricultural Stabilization Committees.

The CHAIRMAN. The time of the gentleman has expired.

(On request of Mr. DAN DANIEL and by unanimous consent, Mr. PERKINS was allowed to proceed for 2 additional minutes.)

Mr. PERKINS. Mr. Chairman, those extra allotments are allocated to new farmers. But I have never heard a complaint from any farmers that wanted to grow tobacco that did not have that opportunity.

The tobacco farmers that we are defending today have a family history of growing tobacco maybe for 100 or 150 years. If other people want to grow tobacco, I am sure that through this program there will be some acreage allotted to them, extra acreage.

So let us vote down the gentleman's amendment as unsound. It would be destructive to our tobacco program and bankrupt hundreds of thousands of little farmers today, something that we just do not want to happen.

I think the price support, a minimum wage for these farmers, is rea-

sonable, and everybody can live with it, and all the money is paid back to the Government. On this point I submit for the RECORD a communication from John M. Berry and a table to which that letter refers:

BERRY & FLOYD,
ATTORNEYS AT LAW,
New Castle, Ky., February 26, 1981.

Hon. CARL PERKINS,
House of Representatives,
Washington, D.C.

DEAR CONGRESSMAN PERKINS: Newspaper reporters, columnist and editors persist in the practice of referring to the tobacco programs as a subsidy. Burley Tobacco Growers Cooperative Association, P.O. Box 860, Lexington, Kentucky, has administered the price support program for forty (40) crops of Burley tobacco in the states of Kentucky, West Virginia, Ohio, Indiana and Missouri. The enclosed statement of its operations for the 1940-1979 crops may be useful to you in refuting the charges.

Excluding the profits on the 1975, 1976, 1977, 1978 and 1979 crops which have been sold but not finally settled for, this Association from its operations has distributed to its members $16,486,000.00. On the 1975 and 1976 crops, the Association will distribute to its members the first week in June, 1981, in excess of $7,000,000.00 and in 1982, it will distribute on the 1977, 1978 and 1979 crops an additional $7,000,000.00. The overall result is that the total gains distributed, and to be distributed, will exceed $26,000,000.00.

When we started this program on January, 1, 1941, income-tax-paying farmers were few, if any at all. Since then (1940), and to the credit of the program, tobacco farmers have paid millions upon millions of dollars in income taxes.

Very truly yours,

JOHN M. BERRY.

Enclosure.

BURLEY TOBACCO GROWERS COOPERATIVE ASSOCIATION LEXINGTON, KY.—STATEMENT OF OPERATIONS COVERING ALL CROPS HANDLED (1940-79) AS OF OCT. 31, 1980

[1] These crops have been completely sold out but the tobacco is still in storage and final billing has not been made. Therefore, to the amount of sales receipts is added the current base sales price of this tobacco. Also on these crops, the profit or loss anticipated is based on these current sales prices. From the 1952 crop one-half of the overplus amounting to $310,219.82 was applied to loss on 1951 crop. From the 1954 crop one-half of the overplus amounting to $620,293.41 was sent to CCC to apply on losses. From the 1963 crop one-half of the overplus amounting to $424,041.60 was sent to CCC to apply on the 1951 crop loss. From the 1964 crop one-half of the overplus amounting to $78,530.10 was sent to CCC to apply on prior crop year losses. From the 1967 crop one-half of the overplus amounting to $154,505.52 was sent to CCC to apply on prior crop year losses. From the 1968 crop one-half of the overplus amounting to $512,045.59 was sent to CCC to apply on prior crop year losses. The application of the overplus has reduced the overall interest loss to $4,150,000.

Mr. PRITCHARD. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, this amendment offered by the gentleman from Ohio (Mr. SHAMANSKY) and I would eliminate our feudalistic tobacco allotment system, which requires producers of tobacco to own or to rent an assigned acreage allotment before planting and raising their crops. In addition, this amendment would remove the Commodity Credit Corporation's participation from the loan program for tobacco.

Even though the tobacco program is not what we would normally classify as a subsidy, I believe that any time a person receives a reduced interest rate or a direct payment to grow any commodity it can, indeed, be classified a subsidy. For example, the tobacco loan program has cost the American taxpayers $57 million in direct losses since its inception, and over $600 million in interest subsidies, not to mention other costs, including research, grading, marketing, and inspection.

The artificial price supports associated with this highly controlled program have made American tobacco less and less competitive in the world market. Tobacco imports into the United States have increased over 300 percent in the last few years, while our share of the world tobacco market has dropped from 60 percent in the late 1950's to 28 percent today. In addition, the American cigarette in 1965 contained 11 percent imported tobacco but by 1981 a full 30 percent of our cigarette blend is now of foreign origin. As you can see, the artificial Government regulations controlling tobacco production are gradually and effectively closing out the world tobacco market to the American producers.

Mr. Chairman, as of August 31 of this year, 567 million pounds of tobacco, with an estimated cash value of $786 million, are in storage in tobacco cooperative warehouses.

Even though this amount of storage is not out of line with historical precedent, it has become a concern of the U.S. Department of Agriculture. Why? Because an increasing amount of this tobacco is of low quality and difficult to sell, here or overseas, by virtue of its high costs. These high costs, which therefore require a high selling price, are created by the artificially high price supports given to tobacco producers, that are guaranteed and of no risk.

Mr. Chairman, the Department of Agriculture recently testified before the International Trade Commission that even if tobacco imports into the United States are restricted, it will still be very difficult to sell the increasing quantity of low-quality tobacco stocks now in storage. They stated in their testimony that they anticipate a loss in 1982 and 1983 of between 93 million and 122 million dollars' worth of tobacco now in storage.

It is difficult to decrease production and warehouse accumulation of lower quality tobacco that may ultimately be lost by spoilage because the prices of low-quality and high-quality tobacco are inseparably linked in this federally mandated, outdated, and archaic price support system.

Mr. Chairman, is it not time that we begin to change a system that provides allotments, nonrecourse loans, and artificially high prices to produce a product that causes 250,000 deaths per year in the United States and causes this country an estimated economic loss each year from illness and death of up to $18 billion?

Mr. Chairman, for these reasons and several others, I believe that it is time to deregulate the tobacco industry. Let us get the Government out of the tobacco business. We can do this by supporting this amendment.

Mr. ANDREWS. Mr. Chairman, will the gentleman yield?

Mr. PRITCHARD. I yield to the gentleman from North Carolina.

Mr. ANDREWS. Mr. Chairman, if the gentleman is conceding that the program might be good for those who farm but not good for those who hold an allotment and do not farm, may I respectfully inquire why the gentleman does not offer an amendment to do away with that, rather than to kill the entire program for all people, those whom it helps as well as those otherwise?

Mr. PRITCHARD. That is an excellent question and I intend to address that very question with the rest of my remarks.

First of all, let us remember where this bill is going to go. It is going to go to conference committee. And the gentleman from North Carolina in the other body is the chairman of the Senate delegation.

The CHAIRMAN. The Chair will advise the gentleman that reference to a particular Member of the other body is not in order.

Mr. PRITCHARD. I did not call him by name.

That is right; there is only one chairman.

Well, you know we are going to conference, and we will be going to conference with the members of the Senate Agriculture Committee and the House members from the Agriculture Committee. Everyone knows if we strike down tobacco today, there is a very small chance that this program will be stricken, because somewhere in the conference committee it is going to arise. Now you know that and I know that.

But the question is: We better take a pretty strong stand here in the House if we are going to make any change in this program; any change at all is going to take a strong stand by the House. And I think that is an absolute fact.

Now, what kind of a change do we want? Well, if we do not take this strong stand, we will not get any change. It is known that people promised, and the gentleman referred to my friend Jim Johnson. There was talk then that the committee would devise and structure some new approaches to this allocation program. But nothing has been done, and in my opinion nothing will be done until this House takes a stand. When we take a stand, then, in the conference committee the members from the tobacco States and the members from the Agriculture Committee will back up and come in with some reasonable program.

I think many of us are not opposed to helping tobacco farmers. But I think we are very tired of having allocation holders receive large amounts of money for land that they could not get if they were selling for any other product, soybeans, corn, you name it. One cannot get the rents that one gets if one is renting for tobacco. It is like owning one of those allocations for a taxi in New York.

So what we are saying today is: This House is going to have to take a strong stand.

Mr. Chairman, I have heard the arguments in the House here, inside the Chamber. I have also heard the arguments outside the Chamber. Our leadership is saying, "For heaven's sake, do not get on that program; it will hurt Republican candidates in the South." And then I hear on the other side of the aisle, "Do not support this program, do not support this amendment, do not do it, because if you support this amendment it is going to hurt candidates on the other side of the aisle."

Mr. ROGERS. Mr. Chairman, will the gentleman yield?

Mr. PRITCHARD. Will you get me more time?

Mr. ROGERS. Yes; I will.

Mr. PRITCHARD. All right. I will yield to the gentleman.

Mr. ROGERS. Mr. Chairman, the gentleman mentioned the taxi permits in New York. Is that not exactly like that situation?

Mr. PRITCHARD. Dead wrong.

Mr. ROGERS. Suppose there were no limits on the taxi permits in New York City and everyone could drive a taxi. What kind of chaos would you have in New York City?

Mr. PRITCHARD. We would be back to the old free enterprise system, and that seems to be fundamental here. What you do is have a limit on the number, and that makes the number very valuable, and that raises the price.

Mr. ROGERS. Mr. Chairman, will the gentleman yield further?

Mr. PRITCHARD. I yield to the gentleman from Kentucky.

Mr. ROGERS. Mr. Chairman, does not one have to pay for a taxi permit in New York City, or are they given to certain people and passed on to relatives generation after generation?

Mrs. FENWICK. Mr. Chairman, will the gentleman yield?

Mr. PRITCHARD. I yield to the gentlewoman from New Jersey.

Mrs. FENWICK. Mr. Chairman, I take taxis in New York. I can tell the gentleman what is going on. One cannot get a taxi because the taxi medallion is now worth $55,000 and they only paid $1.25 for it.

The CHAIRMAN. The time of the gentleman has expired.

(By unanimous consent, Mr. PRITCHARD was allowed to proceed for 3 additional minutes.)

Mr. PRITCHARD. The administration has come in opposing our position, and they came in with a very squishy statement; let us label it exactly what it was. The gentleman from Virginia read it. If it is read carefully, it is mealymouthed, because I do not believe that is where their heart is.

But as the Members know, there are a lot of reasons why this amendment that we are offering should be turned down. Somebody said it has to be done in committee. For heaven's sake, a change will never be made in the tobacco subsidy program and allocation program in the Agriculture Committee until they are faced with the proposition that, with the way it is today, it is going to go down the drain and they have to make a change.

I will yield to the gentleman from Washington if he wants to speak.

Mr. FOLEY. Mr. Chairman, I was not seeking to have the gentleman yield. I just wanted to say later on there will be a taxi allotment offered to the final section of the bill.

Mr. PRITCHARD. Mr. Chairman, I would urge the Members today to take a strong stand. If we knocked out peanuts and we knocked out sugar, how in the world can we justify turning around and continuing the tobacco program?

We have a little bit of an out, because when this goes to conference, they are going to back up a long way. If we do not stand tough today, we will not have any change at all. I urge you to support this amendment.

Mr. GOLDWATER. Mr. Chairman, I intend to vote for this amendment which will eliminate the tobacco allot-

ment and loan programs. These tobacco programs are a classic example of massive Government intrusion into the marketplace. Such interference has created a feudalistic land ownership system, sustains artificially high tobacco prices, has undermined our farmers' ability to compete with foreign producers, and forces the taxpayer to subsidize the tobacco industry. This amendment deregulates the tobacco trade, and returns tobacco to a free market economy. It will prevent the Federal Government from endowing the few at the expense of the many. Tobacco is hardly a poor cash crop; it will flourish in the free market system.

There are two Federal policies designed to maintain artificially high tobacco prices: Price support programs and acreage allotments.

After tobacco is graded for type and quality, which establishes the per pound support price, most of today's tobacco is sold at warehouse auctions. To be eligible for price supports, tobacco growers accept acreage and poundage allotments annually established by the U.S. Department of Agriculture. The tobacco must bring at least 1 cent per pound above the support price, or the grower is eligible for a Government loan equal to the support price. He uses his tobacco as collateral. If the tobacco is sold at a higher price than the loan's cost, the Government loan is paid back, and the grower makes a profit. If however, the selling price is less than the cost of the loan, guess who gets struck with the loan? You and me. By subsidizing the tobacco farmer, we are guaranteeing him a profit. The Government must sell the tobacco crop to recoup our losses. Warehouses are currently storing 630 million pounds of tobacco. Most of this tobacco is of a low-grade quality which will be difficult to sell. The Government, meaning you and I, could wind up losing $123 million.

Twenty of the twenty-four varieties of tobacco qualify for support programs. There have been $5.5 billion in tobacco loans since the Government program began in 1933. From the letters I have received, the taxpayer does not want to pay farmers to grow tobacco. While one Federal agency spends $14 million administering tobacco support programs, another is spending $2.5 million telling us we are crazy to smoke.

Besides getting the Government out of the tobacco business, this amendment will help lower a tobacco farmer's production costs. Since there are limited tobacco allotments, owners can charge as much as $1,000 per acre to leasees. This is quite profitable for those fortunate enough to own acreage allotments. In fact, only about 16 percent of those who farm tobacco own their land. These acreage allotments were determined way back in the early 1930's. If the crop was corn, for example, land rent would be in the neighborhood of $60. Eliminating the monopolistic allotment system will lower land costs and give the farmer a fighting chance to receive a fair return for his investment. Stopping the allotment program will also allow all farmers an equal opportunity to grow tobacco. Currently, only those who have historically received allotments may grow tobacco. Why should anyone be prevented from growing the crop of his choice? Why should a grower in Kentucky be allowed to grow tobacco, but a California farmer cannot?

With the amendment's passage, we will help U.S. tobacco growers become internationally competitive. Artificially high tobacco prices have made American tobacco less competitive with foreign producers. While imports have increased over 300 percent in 15 years, America's share of the international market has decreased from 60 percent in the 1950's to 28 percent today.

Can tobacco growers make it without Government assistance? You bet they can. In Maryland, tobacco has been deregulated for 25 years. Maryland producers are doing quite well. Tobacco is Maryland's third largest crop, grossing over $30 million. During Tobacco Subcommittee hearings earlier this year, the Maryland secretary of agriculture, said:

> The viability of our tobacco production can be clearly documented and, while not exceptionally large when compared with other States, it does provide a fair rate of return for our farmers.

The Maryland State comptroller also testified. He stated:

> Maryland tobacco growers don't want production allotments and price supports. They have consistently rejected them, saving the Federal government time and money.

The Government's tobacco programs determine the price for tobacco, establish which acres will be planted in tobacco, limits the number of farmers who grow tobacco, restricts those who do, and costs the taxpayer too much money.

I urge the passage of this amendment.

● Mr. AuCOIN. Mr. Chairman, I strongly support this amendment to eliminate tobacco subsidies and I urge my colleagues to do the same.

Tobacco subsidies are a giveaway program and in this budget-cutting climate, as all fiscal conservatives in this House know, we cannot have any giveaway programs.

The cost of the tobacco program is tremendous. The figures cited by the administration that the program has cost only $56 million since its beginning is misleading. Studies by the Commodity Credit Corporation indicate that since the mid-1950's the tobacco program has cost taxpayers more than one-half billion dollars when one takes into account the interest the CCC pays to the Treasury for the money it borrows to lend farmers.

Price supports have also created huge surplus stocks. Cost estimates show that the program has been estimated for next year to cost over $100 million. The Government has 630 million pounds of tobacco in storage currently at a value of $1 billion.

The absurd irony is that the Federal Government subsidizes the tobacco industry and at the same time is cutting back on health care programs. The Surgeon's General report in 1979 said that smoking accounts for an estimated $5 to $8 billion in health care expenses, not to mention the cost of loss in productivity, wages, and absenteeism caused by smoking related to illnesses; an annual cost estimated at $12 to $18 billion.,

Mr. Speaker, this is the Reagan era. This is the much ballyhooed era of "getting Government off our backs" and "weaning America away from big spending." In this spirit, so far this year Congress has slashed $36 billion from people programs—in some cases causing real injury. Congress has cut $1 billion from health care, $1.5 billion from child nutrition, $1.2 billion from aid to families with dependent children, and $1.7 billion from food stamps.

During the debate on all these cuts, several Members of Congress bravely mentioned the drastic need to cut the Federal budget. I would like to remind my colleagues of what they said then—inasmuch as they are being asked today to be consistent and apply the same budget-balancing principles to a powerful interest group.

Our gentleman from Missouri (Mr. COLEMAN) boldly noted during the earlier budget debate:

> The old saying "Don't cut you, don't cut me, cut the man behind the tree," is a statement of the past. Americans are willing to make individual sacrifices for the good of the country.

I ask my colleagues today: Why should not tobacco interests join in this spirit of noble sacrifice for the good of the country?

The gentleman from Indiana (Mr. COATS) stated in the debate on the Reagan budget resolution that—

> This Government cannot and should not continue to subsidize the middle class * * * we are simply saying that the Federal Government is broke—that we can no longer afford to pay for every possible program, even some desirable programs like school lunches, to the extent that we have done in the past * * *

I ask my colleagues today: Is tobacco use as desirable as school lunches?

The gentleman from Ohio (Mr. LATTA) said while leading the debate on the Republican budget resolution early this year:

> We are here today to carry out the mandate of the Congress and the will of the

people. We are not going to play any games. The President of the United States is not playing games with the American people.

I ask my colleagues today: Were they playing games with America when they said all spending had to be cut? Are they willing to play games with the health of the American people?

Finally, Mr. Chairman, I remember the words of the gentleman from Alabama (Mr. EDWARDS) when he made a key speech in support of the massive Reagan cuts. He said:

We are about to respond to the needs of the people of this country, crying to give us new directions, and it is going to hurt. We have heard horror stories all day * * * but we are at that point now where we somehow have got to get the narcotic needle out of the arm. You know that is painful. We know that we are going to have to struggle with it, and yet we know that it has got to be done.

Mr. Chairman, it is time to put up or shut up. It is easy to cut funds for the poor, the sick, and the aged. Now it is time for tobacco interest to "pull the needle out" of their arm. Now it is time to see if my fiscally conservative colleagues meant what they said about cutting spending—or whether those earlier votes mean that they simply do not like the poor, the sick, and the aged.●

● Mrs. SCHROEDER. Mr. Chairman, last week I was faced with a difficult vote. There are many sugar beet farmers in Colorado. The corporate headquarters for the Great Western Sugar Co. are located in Denver. By all rights I should have voted against the elimination of the sugar loan program. But I did not.

I voted for the Peyser-Heckler amendment because I could not justify asking the sugar consumers to transfer over $300 million from their pockets to 22 producer and processor firms in order to insure that each company realize over $13.6 million per year.

Nor could I support a program that would require the Federal Government to place greater pressures on the credit markets and interest rates by issuing $1 billion in additional debt.

Likewise, there are many reasons for supporting the elimination of the tobacco program. But I am not about to list them all. Instead I will ask three questions.

How can those in Congress who are truly committed to trimming Federal outlays, and have already acted to cut Federal aid to the most poorly fed, the most unsuitably housed, and the most lacking in hope, vote for continuing to support the growing of tobacco with Federal funds?

How can anyone with a sense of fairness vote for the Federal support of a feudalistic system that restricts tobacco-growing rights to a handful of allotment holders who take an average of a $1,000 cut off the top of the $3,000 that a tobacco farmer grosses from each acre of tobacco?

How can the Reagan administration, which has proposed the elimination of numerous Federal programs for the most disadvantaged in our society, preside over the Federal support for tobacco?

The choice is clear. Vote for bringing an end to an increasingly costly, inherently unfair, obviously inconsistent Federal program.●

● Mr. GREEN. Mr. Chairman, as a cosponsor of a bill to eliminate the Federal Government's subsidizing the tobacco industry, I rise in favor of the amendment offered by the gentleman from Ohio and commend his offering it. At a time when we are seeking cutbacks in so many areas, it would be inappropriate and unfair to overlook the agricultural industry as a possible source of savings. Certainly, tobacco production is one activity from which we can withdraw our support and reduce Federal expenditures substantially.

It is my feeling that our support of tobacco production—and of other crops as well—has been unjustified and unnecessary. The Government's regulating the amount of acreage which may be planted, and purchasing any surplus crop after commercial buyers have bought the amount they desire, is clearly an intrusion in the marketplace. Not only does such a policy unfairly increase profits for the producer, but it also does so at the expense of consumers with the use of their tax dollars to finance the program and through the inflated prices which are a result of the controlled supply of the product.

In addition, the tobacco subsidy is a subsidy of a product which poses a severe public health threat. No one can deny the inconsistency of the Government's support of a product the use of which it is trying to discourage through campaigns aimed at discouraging smoking and increasing the awareness of the importance of good health. I am pleased to support the gentleman's amendment and encourage my colleagues to do the same.●

Mr. DE LA GARZA. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I do so only hopefully to close debate. I think everyone has had an opportunity to present his case, and I think we are ready to vote.

I just want to clear up some factors. I have heard the word "feudalism" so much this afternoon; Members are associating it solely with the farm sector, but remember, there are bank charters where about eight people get a charter to operate that First National Bank on Main Street, USA. That is a charter for a lifetime for that family and their children. There are television station charters, radio station charters, for themselves or their families, that sell for millions and millions of dollars from one owner to a prospective owner. The Government tells people where they can build or not build a port, where people can build or not build an airport.

So talking about feudalism and this program is completely extraneous to the subject, because there are more valuable enterprises the Government controls in the sector outside of agriculture.

Second, the average Flue-cured farm, for example, is 13½ acres. When you speak about all this bounty to people who sell or lease the allotment, we are talking of people who own a half acre, 1 acre, and this is the only income they have.

□ 1430

The large farmer of over 20 acres farms his own and the minority element in the South—and I have been there—they are small, black, and they may sell the allotment or farm it themselves.

Finally, I went to an auction. The Federal Government sends an inspector who grades the tobacco. The Federal Government grades the tobacco. That tells you almost how much you are going to get. Then, there is an auction and the price at the time that they bid it down, that is how much he is going to get for his crop on that day.

Now, whether one smokes or does not smoke, that is an individual prerogative in this country. The public policy has not been delineated. An individual in this country under our Constitution has the right to do or not to do; as a creature of God has the right to go to hell if he wants to—that is his choice.

So, I say vote no on the amendment, and Members will be helping all the people that need our help.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Ohio (Mr. SHAMANSKY).

The question was taken; and the Chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. SHAMANSKY. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 184, noes 231, answered "present" 2, not voting 16, as follows:

[Roll No. 271]

□ 1445

The Clerk announced the following pairs:

On this vote:

Mr. Hughes for, with Mr. Pepper against.

Mr. Williams of Ohio for, with Mr. Rudd against.

Ms. MIKULSKI and Messrs. DAVIS, CRAIG, MARRIOTT, and LENT changed their votes from "no" to "aye."

Mr. HUGHES, Mr. Chairman, I have a live pair with the gentleman from Florida (Mr. PEPPER). If he were present, he would have voted "no." I voted "aye." I withdraw my vote and vote "present."

Mr. HUGHES changed his vote from "aye" to "present."

So the amendment was rejected.

The result of the vote was announced as above recorded.

AMENDMENT OFFERED BY MRS. HOLT

Mrs. HOLT. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mrs. HOLT: Page 77, immediately after line 2, insert the following new section:

NONQUOTA CROP SUBJECT TO QUOTA

SEC. 1011. Section 320 of the Agricultural Adjustment Act of 1938 is amended by inserting in the first sentence after the words "nonquota tobacco" the following: "except Maryland Tobacco (type 32) when it is a nonquota tobacco,".

Mrs. HOLT. Mr. Chairman, the gentleman from Maryland (Mr. DYSON) and I are offering an amendment that assures tobacco farmers of a fair solution to a nagging conflict between the producers of nonquota Maryland tobacco and those from other States who participate in the price support program.

This amendment that the gentleman from Maryland (Mr. DYSON) and I are offering makes provision for any Maryland type tobacco grown in an area under price support. It has no effect on other traditional types of tobacco in those areas. It does not bring in more farmers under the program, and it does not cost the Government any money. It does not prohibit anyone from growing Maryland type tobacco.

Mr. WAMPLER. Mr. Chairman, will the gentlewoman yield?

Mrs. HOLT. I am happy to yield to the gentleman from Virginia.

Mr. WAMPLER. Mr. Chairman, we have examined the gentlewoman's amendment, and I might say that earlier this year the Subcommittee on Tobacco and Peanuts held hearings on the subject matter of this amendment. We heard testimony from the gentlewoman from Maryland (Mrs. HOLT) and the gentleman from Maryland (Mr. DYSON), and others and I am happy to say that the Department of Agriculture has no objection to this amendment. As a matter of fact, the Department tried to cure the problem administratively but was unable to do so.

Mr. Chairman, I urge the adoption of the amendment.

Mrs. HOLT. Mr. Chairman, I thank the gentleman from Virginia (Mr. WAMPLER).

Mr. ROSE. Mr. Chairman, will the gentlewoman yield?

Mrs. HOLT. I yield to the gentleman from North Carolina.

Mr. ROSE. Mr. Chairman, I would like to echo the comments that the ranking minority member just stated. I have no objection to the amendment, and I would suggest that the gentlewoman yield to the chairman of the committee for his comments.

Mr. DE LA GARZA. Mr. Chairman, will the gentlewoman yield?

Mrs. HOLT. I am happy to yield to the committee chairman.

Mr. DE LA GARZA. Mr. Chairman, on behalf of the committee, I would also like to associate myself with the remarks of the gentleman from Virginia (Mr. WAMPLER) and the gentleman from North Carolina (Mr. ROSE) and say that on our side we would accept the amendment.

The gentleman from Maryland (Mr. DYSON) has worked diligently on this, and he had a similar amendment, if not an identical amendment, which we had offered to support, the same as we are supporting the amendment offered by the gentlewoman from Maryland

(Mrs. HOLT). We have no objection to the amendment.

Mr. Chairman, I am sure that the gentleman from Maryland (Mr. DYSON) will on his own time be happy to explain his participation.

Mr. HOPKINS. Mr. Chairman, will the gentlewoman yield?

Mrs. HOLT. I am happy to yield to the gentleman from Kentucky.

Mr. HOPKINS. Mr. Chairman, I thank the gentlewoman for yielding.

Mr. Chairman, I wish to associate myself with the remarks of the ranking minority member of the Committee on Agriculture and compliment the gentlewoman from Maryland (Mrs. HOLT) for her amendment, because certainly Maryland type tobacco has been of great concern to many of the tobacco farmers in Kentucky. I appreciate the gentlewoman's willingness to bring this amendment to our attention on the floor.

Mr. DYSON. Mr. Chairman, I rise in support of the amendment.

Mr. Chairman, the amendment, offered by my colleague, Mrs. HOLT, which is identical to the one I have before the desk, will strengthen the integrity of the tobacco price support program while clarifying language in section 320 with respect to "nonquota" tobacco types.

The intent is to strengthen the prohibition against the production of Maryland, U.S. type 32 tobacco in the burley and flue-cured regions by producers who have elected to participate in the price support program.

The Maryland tobacco industry has been threatened by an overproduction of Maryland, U.S. type 32 tobacco in past years. Expected production for 1981 crop year is expected to reach 30 million pounds in Maryland. If production of Maryland, U.S. type 32 is allowed to increase outside of the traditional producing areas, Marlyand's tobacco industry will be seriously threatened by overproduction.

In hearings before the Subcommittee on Tobacco and Peanuts earlier this year, it was determined that language inserted in section 320 was so broad that it was open to interpretation by the Department of Agriculture in direct contradiction to the original intent of the statute. This fact is clearly documented in reports of the 1973 hearings which addressed this issue. In the hearings this year both the Subcommittee on Tobacco and Peanuts and the Department of Agriculture concurred on the need to clarify section 320 of the Agricultural Adjustment Act of 1938.

At the hearings the Department of Agriculture said:

That we must protect the quotas of our tobacco producers by not permitting the production and sale of non-quota tobacco that might displace Flue-cured, burley or dark types and eventually result in a reduction of the quotas for the traditional producers.

Historically, the tobacco program has survived only through the cooperation of all segments of the tobacco economy from all kinds of tobacco. This amendment is necessary to insure stable production and marketing of both "nonquota" tobacco and tobacco covered under approved marketing programs.

The CHAIRMAN. The question is on the amendment offered by the gentlewoman from Maryland (Mrs. HOLT).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. FINDLEY

Mr. FINDLEY. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. FINDLEY: On page 77, after line 2, add the following new section:

"SEC. 1012. Notwithstanding any other provision of law, the Secretary is directed to announce on or before January 2, 1982, policies, rules and regulations as the result of which the tobacco price support program will function without cost to the American taxpayer. The new policies, rules and regulations shall take effect beginning March 1, 1982, unless disapproved prior to that date by concurrent resolution of the Congress."

Mr. FINDLEY. Mr. Chairman, we have just made a decision on tobacco programs. The program will continue largely as it has been. That was the clear decision of the vote just completed.

Now, this program has on occasion resulted in subsidy and cost to the taxpayers, and the one and only question raised by my amendment is this: Should the taxpayers of the United States subsidize to any degree the program under which tobacco is produced in the United States? That is the only question.

The reason I offer this amendment is that a number of us who did oppose the Shamansky amendment did so feeling that nevertheless there should be a change in the program which would require that from this day forward it be self-financing, and that there be no subsidy whatever.

□ 1500

The Surgeon General has come to the conclusion that cigarette smoking is harmful to health. I think even many of the smokers of cigarettes will agree to that contention.

That raises this very fundamental moral question: Should taxpayers help to finance the programs under which a commodity is produced that the Surgeon General has found harmful to health?

Mr. PERKINS. Mr. Chairman, will the gentleman yield?

Mr. FINDLEY. Of course I yield to my friend from Kentucky.

Mr. PERKINS. In the debate here today it was disclosed that tobacco was costing the Government very little.

Mr. FINDLEY. That is very true.

Mr. PERKINS. Perhaps $80 million over a period of years. But, as I see the gentleman's amendment, the cost estimates which the Secretary would include in the calculation of loan and/or interest differentials, they are not identified and the impact of the amendment, therefore, would be indeterminable in my judgment.

Mr. FINDLEY. If the gentleman will permit me, I am wondering if he has my amendment before him. The only thing that my amendment requires is that the Secretary announce on or before January 2, 1982, policies, rules, and regulations as a result of which the tobacco price support program will function without cost to the taxpayer. That is all it does. It does not tell him how to do it. Whatever recommendation he makes will be subject to the congressional veto and would not take effect until March 1. So there will be ample opportunities for the Congress to examine exactly what the Secretary has come up with.

The gentleman's point is a very sound one. The tobacco program has been almost cost free to the taxpayers. But why not make it totally cost free and thus eliminate completely the emotional argument that is often made against the tobacco program, that the taxpayer should not subsidize the production of a commodity harmful to health.

Mr. PERKINS. It the gentleman will yield further, I agree with what the gentleman is striving to do. But we have certain costs, maybe additional costs added on to the local agricultural stabilization committee's office and other administrative costs that I am fearful, without legislation, that this amendment could absolutely stop the effectiveness of the operation of the tobacco program, just to put it bluntly.

Mr. FINDLEY. I think the gentleman overstates.

Mr. PERKINS. They may construe it in such a manner that the gentleman from Illinois never intended it be construed.

Mr. FINDLEY. I will say to the gentleman that the subsidy involved in the tobacco program has been very small and thus the adjustment in policy required in order to eliminate subsidies from this day forward will be very modest. In any event, should the Secretary of Agriculture go wild, and his bureaucracy go wild and come up with a program that would be against the interests of the American people, the Congress would have the opportunity prior to March 1 to vote it down, and that would be the end of the matter.

I am sure that most of the people whose districts are intimately involved in tobacco production, most of those people would like to see no change whatever. But I think I speak really for the majority of the American

people when I say that we do not want to subsidize the production of tobacco.

The sole effect of this amendment is to cause the Secretary of Agriculture to operate the tobacco program in a manner in which there will not be 10 cents worth of subsidy of tobacco production in the future. Surely those who are interested in the tobacco industry would welcome an amendment that would take out of contention the question of subsidy.

Mr. PETRI. Mr. Chairman, will the gentleman yield?

Mr. FINDLEY. I am happy to yield to the gentleman from Wisconsin.

Mr. PETRI. Mr. Chairman, I would like to commend my respected colleague, the gentleman from Illinois (Mr. FINDLEY), on his amendment. I rise in support of his amendment, and also to make the point briefly that his amendment is somewhat more significant than it appears because there is a substantial amount of tobacco in storage right now which may at some point have to be disposed of at a considerable loss. This would make sure that that cost was borne by the industry rather than by the taxpaying public.

The CHAIRMAN. The time of the gentleman from Illinois has expired.

(By unanimous consent Mr. FINDLEY was allowed to proceed for 3 additional minutes.)

Mr. McCLORY. Mr. Chairman, will the gentleman yield?

Mr. FINDLEY. I yield to the gentleman from Illinois.

Mr. McCLORY. Mr. Chairman, I have heard the argument made by those in support of the tobacco program that it does not cost the American taxpayer any money, and that there is more than sufficient revenue produced by the tobacco industry to defray the costs of the tobacco program. So it seems to me the amendment offered by the gentleman from Illinois (Mr. FINDLEY) is consistent with the arguments that are propounded by those who support the existing tobacco program. So I would think the gentleman's amendment would be consistent with those views and would likewise, as the gentleman says, be consistent with the needs and desires of the American people.

I thank the gentleman for yielding.

Mr. FINDLEY. I want to add also that the amendment I have proposed does not bypass the legislative process in which this body is very closely involved, because the Congress would have ample time between this date and March 1 to work its will on any legislative recommendations the Tobacco Subcommittee might come up with. Of course, that legislation could set aside the effect of this amendment if they have a program that would be superior to what the Secretary of Agriculture would have recommended.

I think this body would be wise to put this in the bill, to have something to go to conference with on tobacco. If it is not accepted, we will not go to conference with anything that will yield any kind of a reform whatever to the tobacco program.

This is a reasonable, modest reform and I hope my friend and the whip of the majority will agree with me.

Mr. FOLEY. Mr. Chairman, will the gentleman yield?

Mr. FINDLEY. I yield to the gentleman.

Mr. FOLEY. I would just say to the gentleman that I will shortly offer a substitute to the gentleman's amendment which I think will serve his purpose and will be one that perhaps we can get some consensus on. I thank the gentleman.

Mr. EDGAR. Mr. Chairman, will the gentleman yield?

Mr. FINDLEY. I yield to the gentleman from Pennsylvania.

Mr. EDGAR. Mr. Chairman, I would like to commend the gentleman in the well. I support the gentleman's amendment. I think it is a good approach. I think it incorporates the kind of thing we were trying to do on a larger scale on the previous amendment. That is to say that the Federal Government should not be involved in subsidizing this particular program, that there are other resources that might be used.

So I commend the gentleman.

Mr. FINDLEY. Would the gentleman agree with me that we ought to make a decision right here today that the subsidy should end?

Mr. EDGAR. Absolutely.

Mr. FINDLEY. And that we should not refer it just for another study by some other committee?

Mr. EDGAR. I agree with the gentleman.

Mrs. FENWICK. Mr. Chairman, will the gentleman yield?

Mr. FINDLEY. I yield to the gentlewoman from New Jersey.

Mrs. FENWICK. I cannot understand what we are doing. We have been listening and spent 3 hours this morning being told that there was not a single dime of taxpayer's money that was going into this. How can anybody who has supported the whole tax program now be objecting to this kind of an amendment? We were all told there was not any expense to the public. I tried to find that out when I asked for a clear answer.

Mr. FINDLEY. I assure the gentlewoman that in contrast with most commodity programs, the subsidy here has been modest. But there has been a subsidy and, whatever it is, I think it should not be passed on to the taxpayers. It ought to be borne by the industry itself, and that is the total effect of the amendment now pending.

Mrs. FENWICK. We were told there was no subsidy.

AMENDMENT OFFERED BY MR. FOLEY AS A SUBSTITUTE FOR THE AMENDMENT OFFERED BY MR. FINDLEY

Mr. FOLEY. Mr. Chairman, I offer an amendment as a substitute for the amendment.

The Clerk read as follows:

Amendment offered by Mr. FOLEY as a substitute for the amendment offered by Mr. FINDLEY: On page 77, after line 2, add the following new section:

TOBACCO PROGRAM COST

SEC. 1012. It is the intent of Congress that the tobacco price support and production control program shall be carried out in such a manner as to result in no net cost to the taxpayers other than such administrative expense as is incidental to the implementation of any commodity program.

To accomplish this objective, the Secretary is directed to publish, issue and promulgate such regulations and policies as are currently within his existing authority not later than January 1, 1982.

The Secretary shall recommend to Congress no later than January 1982 any legislative changes he believes to be necessary and proper to achieve such objective.

Mr. FOLEY. Mr. Chairman, I would like to point out the difference between my amendment and the amendment offered by the gentleman from Illinois (Mr. FINDLEY). In effect his amendment directs the Secretary to produce a no-cost tobacco program. It also gives the Secretary a legislative carte blanche to write the law in any way he wishes. Without any disrepect to the distinguished Secretary of Agriculture, the Congress has been reluctant to hand Cabinet officers total authority to rewrite existing law.

What the amendment I offer as a substitute would do is three things. First of all, it would establish the policy by this Congress that the tobacco program alone of all of the commodity programs shall bear its own costs. That is the first thing it will do as a matter of policy.

I will say, just to answer the gentlewoman from New Jersey, nobody has claimed that the tobacco program has not cost any money. We have claimed, and correctly, that it has cost less money than any other commodity program in the history of the United States. It has cost some, but very little.

What this amendment shares with the amendment of the gentleman from Illinois (Mr. FINDLEY) is the commitment of Congress that we shall move toward a policy where except for incidental administrative expenses—the program would have no additional cost to the taxpayer.

Second, what it does is direct the Secretary to use all of the existing law that he has at his disposal under current law to come to this point by issuing new regulations and bringing about administratively as much as he can accomplish. If he feels that he cannot accomplish this goal, without additional legislation, then the Secre-

tary is authorized and directed to refer to the Congress those specific legislative changes that he feels are necessary to achieve this result. The Congress has the obligation then, and I will freely say, the obligation to consider and discuss and resolve those recommendations.

For those who may think all this says is that if legislation has to occur it is up to the Congress to do it, I want to point out that the first part of my substitute clearly puts the Congress on record in support of a policy that the tobacco program shall have no net cost to the taxpayer. The Secretary is authorized to do whatever he can within his administrative authority and statutory law to bring that about, and on the same timetable as the gentleman from Illinois.

Finally, if he has to have additional authority not now vested within the Secretary, he shall report that back and let the Congress have an opportunity under this policy of bringing that about in the appropriate manner.

Mr. FINDLEY. Mr. Chairman, will the gentleman yield?

Mr. FOLEY. I would yield first to the author of the amendment to respond.

Mr. FINDLEY. In reading the gentleman's amendment I see the words that appear first are "It is the intent of Congress that . . ." Would the gentleman accept an amendment to cause that first sentence to begin with the word "The" so that we strike out the words "It is the intent of Congress that . . ." and, instead of that, the sentence would read this way: "The Tobacco Price Support and Production Control Program shall be carried out in such manner . . ." and so on?

Mr. FOLEY. The difference, the gentleman well knows, is not a slight difference. What the gentleman is proposing to do in his amendment is to allow the Secretary a legislative carte blanche to make any changes in the law that he finds are necessary without referring that to Congress, except through the legislative veto process.

May I just answer the gentleman, because this is a critical question. If we say the Secretary may do anything he wishes in order to carry out this policy, subject only to a veto, we have handed him the legislative authority and we have taken the executive veto on our side. That is the reverse of the constitutional arrangement.

□ 1515

We should have the responsibility of making legislative changes subject to an executive veto. I think it would be a very bad precedent for us to say the Secretary shall develop agricultural programs that provide adequate food and fiber and suit the needs of farmers, and then we will veto what he does.

With respect for the gentleman—I know he has over the years been concerned about excessive administrative power, as well as having an interest in good manageable programs. I do not think most Members of Congress want to give any Secretary quite that much leeway.

Mr. FINDLEY. If the gentleman will yield further, I obviously misstated my request. I am not suggesting that one word of the gentleman's amendment be changed. I am suggesting it be accepted in its entirety as a substitute to my amendment, with one change, and that is in the first sentence, to make it very clear that the gentleman intends that the price support program be carried out in such a manner as to result in no net cost. Take off the words "It is the intent of Congress that." Those are somewhat rubbery words that can mean a lot of things to different people. Strike those words and make the statement of policy very clear and unequivocal. Why would the gentleman object to that?

The CHAIRMAN. The time of the gentleman from Washington (Mr. FOLEY) has expired.

(On request of Mr. FINDLEY and by unanimous consent, Mr. FOLEY was allowed to proceed for 5 additional minutes.)

Mr. FOLEY. The only problem I have with it is that the gentleman's amendment, for which this is a substitute, clearly does enable the Secretary to exercise a legislative grant from Congress to rewrite the tobacco law. That is what he is trying to do. And then he says after they rewrite the tobacco law, he can send it up here, and if we do not like it, we can veto.

Now, my amendment on the other hand, states a policy. I do not think it is rubbery.

Mr. FINDLEY. Let us clarify the policy, then. Why would the gentleman object?

Mr. FOLEY. As long as it is in a framework where we are talking about it as a policy:

It is the intent of Congress that the tobacco price support and production control program shall be carried out in such a manner as to result in no net cost to the taxpayers.

I think it is pretty clear.

Mr. FINDLEY. Leave the whole thing in, but strike out the first words, which do create a doubt in my mind and perhaps in other minds as to whether this is a declaration of governmental policy once it is signed into law by the President.

If the gentleman is really supporting the idea of a subsidy-free tobacco program, then he surely would want to say so without tying it to intent of Congress wordage.

Mr. FOLEY. I am sorry, I did not want to try to ask the gentleman to change the wording of his amendment, but I said, very frankly, if this amendment is adopted it is my judgment that Congress has gone on record as supporting a no-cost tobacco policy.

The differences, basically, are the ones that I have enunciated: The Secretary would have to implement that by regulation. If he could not implement it by regulation, he would have to suggest to us legislative changes and we would have to undertake them. Now, I do not have the authority to speak for the distinguished chairman of the committee, the gentleman from Texas (Mr. DE LA GARZA), or the chairman of the subcommittee, the gentleman from North Carolina (Mr. ROSE), but I think I can say—and they will have to gainsay me otherwise—that there will be a responsible addressing of these recommendations by the Secretary. The subcommittee will hold hearings, the committee will consider the matter, and I think clearly that is the appropriate way for legislation to take place.

I would hope, without getting into too much of a legalistic quibbling on words, we could accept the fact that we are talking about moving toward a no-cost program for tobacco. But I very frankly, on the other hand, recognize personally, and I hope the gentleman would recognize, that abrupt changes in this program could be very disrupting and could cause enormous economic hardship. And that is, frankly, what we are trying to avoid. We are not trying to put aside the idea of a no-cost program. It has been the closest thing to a no-cost program we have had. I am perfectly willing to support the idea that we should make it a no-cost program but to do so without disruption.

Mr. FINDLEY. If the gentleman will yield further, I just have two brief additional questions.

First of all, as I understand the gentleman's explanation, if this becomes law, he would consider that the Government of the United States is on record in support of a policy of no subsidy for tobacco; is that correct?

Mr. FOLEY. In my judgment, if this is adopted, the Secretary would in effect be directed to move toward a no-cost program.

Mr. FINDLEY. He would get as close to a no-subsidy tobacco program as existing law would permit; is that correct?

Mr. FOLEY. That is correct.

Mr. FINDLEY. All right.

Second, would the gentleman help me defend this language in the House-Senate conference committee when the time comes?

Mr. FOLEY. I have never offered an amendment on the floor that I can recall for the purpose of killing it in conference, and I will defend this language in conference.

Mr. FINDLEY. I thank the gentleman.

For my part, I feel that the language, while it could be improved, nevertheless accomplishes the objective I had of leading us swiftly to policies and regulations under which there would be no subsidy in the tobacco program. The taxpayers would not pick up one dime of the cost of carrying out the tobacco program. I, therefore, accept and support the gentleman's substitute.

Mrs. FENWICK. Mr. Chairman, will the gentleman yield?

Mr. FOLEY. I yield to the gentlewoman from New Jersey.

Mrs. FENWICK. I do not mean to be picky on this, but the question was raised: Why should tobacco be the only program that carries its own administrative expenses?

I would like to say that this morning we never heard one word, at least I did not hear one word, about the $13 million it costs to administer this program.

But surely that is not an enormous amount that should be, I think, absorbed by those who benefit from it.

And you ask why this tobacco should be the only crop which carries its own administrative expenses.

It is the only poison that we encourage and propagate. It is the only poison. Even humans can eat sunflower seeds. At least that is not poison.

I really think we could well adopt the Findley amendment, which simply says: Yes; we have these allotments, we know that this system exists, we know that there are people who do not farm who are getting the profits, but we also insist that this should be not a cost to the taxpayer.

Mr. FOLEY. I would not want the gentlewoman to misunderstand what I said.

I was suggesting in this amendment that, except for administrative expenses, the program would be a no-cost program. There would be no losses.

Mrs. FENWICK. Why except it?

Mr. FOLEY. What I said in my remarks is that if that policy is adopted—I just parenthetically remarked—if that policy is adopted, it would be the only policy covering any agricultural commodity that I know of in which that is the case.

Mrs. FENWICK. Why not?

Mr. FOLEY. And the gentlewoman says, "Why not?" I certainly will not argue against something that is in my own amendment, so I will forego the pleasure of a further discussion on why not.

Let me just say one thing: For those who have felt for a long time that the tobacco program is a program that encourages smoking and problems of health, this program restricts the production of tobacco. It does not expand it. There was, in my judgment, some inconsistency on the part of the proponents of the amendment offered earlier. On the one hand, it was said to be a health problem and, therefore, should be killed, and on the other hand, if we killed the program, it would lead to vastly more efficient production and export of tobacco.

I do not think the economic arguments and the so-called health arguments can be handled in the same sentence.

Mr. ROSE. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I wish to thank my colleague, the gentleman from the State of Washington, the distinguished majority whip, for his substitute amendment. I support it fully.

I would like to say to my good friend, the gentleman from Illinois, PAUL FINDLEY, that I adopt the language and the colloquy that Mr. FOLEY had with you, and I pledge to you and all Members of this House that I will diligently work in my subcommittee to accomplish the third paragraph of this amendment. I will hold timely hearings. As I told the gentleman earlier today, we will consider and pass whatever legislation is necessary to achieve the result that is spelled out in the first paragraph of this amendment. I will support it and see that it moves through this body.

People within this body and without have said there is no tobacco subsidy, and I endorse that. That is what this language says.

Mr. WAMPLER. Mr. Chairman, will the gentleman yield?

Mr. ROSE. I yield to my colleague, the gentleman from Virginia.

Mr. WAMPLER. I thank the gentleman for yielding.

Mr. Chairman, I rise in support of the substitute that is offered by the gentleman from Washington (Mr. FOLEY) for the amendment offered by the gentleman from Illinois (Mr. FINDLEY).

I want to reiterate what has already been said. To the extent that I can control it, if indeed the Secretary of Agriculture makes recommendations to the Congress, as is directed by this substitute, that is, if he has legislative changes he believes to be necessary and proper to achieve this objective of no cost to the taxpayer, we will have hearings. A lot of our newly discovered colleagues who have this interest now in tobacco will be invited to come, as will others, and we will do our best to carry out the intent of this. I think this substitute makes a great deal more sense than the language of the amendment offered by the gentleman from Illinois.

Mr. ROSE. I thank the gentleman for his remarks.

Mr. Chairman, I urge the adoption of the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Washington (Mr. FOLEY) as a substitute for the amendment offered by the gentleman from Illinois (Mr. FINDLEY).

The amendment offered as a substitute for the amendment was agreed to.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois (Mr. FINDLEY), as amended.

The question was taken; and the Chairman announced that ayes appeared to have it.

RECORDED VOTE

Mr. FINDLEY. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 412, noes 0, not voting 21, as follows:

Mr. McEWEN changed his vote from "no" to "aye."

So the amendment, as amended, was agreed to.

The result of the vote was announced as above recorded.

□ 1545

AMENDMENT OFFERED BY MR. THOMAS

Mr. THOMAS. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. THOMAS: On page 77, immediately after line 2, insert the following new section:

SEC. 1018. The Federal Plant Pest Act (71 Stat. 31; 7 U.S.C. 150aa) is amended by—

(a) in section 105, renumbering subsections (b), (c), and (d) as (c), (d), and (e) and adding a new subsection (b) as follows:

"(b)(1) Whereas, the existence of a plant pest new to or not theretofore known to be widely prevalent or distributed within and throughout the United States on any premises in the United States would constitute a threat to crops, other plant life, and plant products of the nation and thereby seriously burden interstate or foreign commerce, whenever the Secretary determines that an extraordinary emergency exists because of the presence of such plant pest on any premises in the United States, and that the presence of such plant pest anywhere in the United States threatens the crops, other plant life, or plant products of the United States, the Secretary may (A) seize, quarantine, treat, apply other remedial measures to, destroy, or otherwise dispose of, in such manner as the Secretary deems appropriate, any product or article of any character whatsoever, or means of conveyance which the Secretary has reason to believe is infested or infected by or contains any such plant pest; (B) quarantine, treat or apply other remedial measures to, in such manner as the Secretary deems appropriate, any premises, including articles on such premises which the Secretary has reason to believe is infested or infected by any such plant pest: *Provided*, That any action taken under clauses (A) and (B) shall be consistent with the provisions of the Federal Insecticide, and Fungicide, and Rodenticide Act: *Provided further*, That such action may be taken under this section only if the Secretary finds after review of measures taken by the State or other jurisdiction and after consultation with the Governor that the measures being taken are inadequate. Before any action is taken in any State or other jurisdiction under this subsection, the Secretary shall notify the Governor of the State or other jurisdiction, shall issue a public announcement and shall file a statement for publication in the Federal Register of the action the Secretary intends to take together with the findings and reasons therefor: *Provided*, That if it is not possible to make such filing with the Federal Register prior to the taking of action, the filing shall occur on the first business day thereafter. If the Secretary wishes to change any action previously taken under this subsection, the Secretary shall follow the procedure set forth in the preceding sentence of this paragraph. The cost of any action taken by the Secretary under this subsection shall be at the expense of the United States.

"(2) The Secretary may pay compensation to producers and other persons for economic losses incurred by them as a result of the quarantine, destruction, or other action taken under the authority of paragraph (1) of this subsection. The determination by the Secretary of the amount of any compensation to be paid under this subsection shall be final.

"(3) There are hereby authorized to be appropriated such sums as are necessary to carry out the provisions of this subsection.".

(b) in section 107, adding after the second semicolon the following: "to stop and inspect without a warrant any person or means of conveyance moving intrastate upon probable cause to believe that the person or conveyance is carrying any product or article subject to treatment or disposal under the provisions of this Act or the regulations issued thereunder;".

Mr. THOMAS (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. THOMAS. Mr. Chairman, this is an amendment to expedite the legislative process. I introduced a bill similar to this amendment that has been heard in subcommittee, but we want to try to move it on the farm bill so there is no undue delay, and that the unfortunate situation that occurred in California over the Medfly does not occur again.

This is an amendment to the Animal Plant Health Inspection Service of the Department of Agriculture which will provide it with the powers in extraordinary circumstances to take such action as seems appropriate.

I said it was similar to the legislation I introduced. It is not identical, because under the good auspices of my chairman of the Department of Operations Subcommittee of the Agriculture Committee, Mr. BROWN of California, we have made amendments which I believe take care of any objections that may have been offered in the subcommittee.

Mr. BROWN of California. Mr. Chairman, will the gentleman yield?

Mr. THOMAS. I yield to the gentleman from California, who has provided me with able assistance on this amendment.

Mr. BROWN of California. Mr. Chairman, I thank the gentleman for yielding.

First, I would like to compliment the gentleman for the legislation that he introduced and also for the very valuable work that the gentleman does as a member of the Subcommittee on Department Operations, Research and Foreign Agriculture.

In response to the California Medfly situation, which seemed to be plagued by delays in instigating the proper remedial efforts in the State, the gentleman introduced legislation which would modify the powers of the Secretary to act in situations of this sort. It was narrowly limited and defined, and I thought was constructive. We did hold 1 day of hearings on this.

I might also comment that our other distinguished colleague, the gentleman from California (Mr. PANETTA) had another bill which had somewhat similar intent.

What we, I think, have accomplished in the amendment which the gentleman is offering is to combine the best portions of these bills and slightly

modify the language which already exists within the Senate bill.

In the form that the gentleman has presented the amendment, I think it is a constructive addition to the bill. I personally intend to support and congratulate the gentleman for his initiative in doing this.

Mr. PANETTA. Mr. Chairman, will the gentleman yield?

Mr. THOMAS. I yield to my colleague from California.

Mr. PANETTA. Mr. Chairman, I thank the gentleman for yielding.

I, too, commend the gentleman for moving this amendment.

I think for the purposes of the House the important thing about this amendment is that it helps first of all to expedite action by the Secretary of Agriculture where there is a type of infestation like the Medfly infestation.

Second, it tries to provide compensation for those who incur severe losses in areas that are quarantined as a result of those infestations. Both of these steps we think are extremely important in trying to develop a comprehensive strategy. Hopefully it will not be needed, but if necessary to deal with this in the future. I urge support for the amendment.

Mr. THOMAS. I thank my colleague, the gentleman from California, for the constructive portion of this amendment dealing with the compensation aspect.

Mr. MARLENEE. Mr. Chairman, will the gentleman yield?

Mr. THOMAS. I yield to my colleague from Montana.

Mr. MARLENEE. Mr. Chairman, I thank the gentleman for yielding.

May I inquire of the gentleman from California what the administration's position is on this amendment?

Mr. THOMAS. The administration supports this amendment.

Mr. MARLENEE. A second question. On page 2 it reads:

"(2) The Secretary may pay compensation to producers and other persons for economic losses incurred by them as a result of the quarantine, destruction, or other action taken under the authority of paragraph (1) of this subsection. The determination by the Secretary of the amount of any compensation to be paid under this subsection shall be final."

Is there no cap, no limit that the Secretary can determine compensation? Where does the money come from today?

Mr. THOMAS. This provision is principally that portion of the legislation that my colleague from California worked on; but it is totally discretionary on the part of the Secretary.

Mr. PANETTA. Mr. Chairman, will the gentleman yield?

Mr. THOMAS. I yield to my colleague, the gentleman from California.

Mr. PANETTA. Mr. Chairman, I thank the gentleman for yielding.

That is correct, that it is totally discretionary on the part of the Secretary to determine what levels of compensation or if, indeed, any compensation should be paid.

I might also remind the gentleman that this language is very similar to the same language that applies to cattlemen in the event of infestations of disease take place impacting on cattle. The same kind of compensation is provided for those that raise cattle.

This same provision would apply in this area with regard to Medfly infestations.

Mr. THOMAS. To underscore that point, we have tried to duplicate as best we were able under the plant pest section of the powers given to the Animal Plant Health Inspection Service (APHIS), those same powers that they have under the animal disease control area.

I was quite surprised in fact to find out that they did not have those kinds of powers under the plant pests section. That is why we fashioned this legislation to look almost exactly, with the exception of the kinds of pests we are dealing with, like the animal disease section.

The CHAIRMAN. The time of the gentleman from California has expired.

(At the request of Mr. MARLENEE, and by unanimous consent, Mr. THOMAS was allowed to proceed for 3 additional minutes.)

Mr. MARLENEE. Mr. Chairman, will the gentleman yield further?

Mr. THOMAS. I yield to my colleague, the gentleman from Montana.

Mr. MARLENEE. Was there any estimate of the cost impact of this particular piece of legislation, this amendment, with this unlimited authority to pay compensation?

Mr. THOMAS. To my knowledge, there was no cost impact involved.

I think we have to understand that the Secretary, any Secretary, regardless of which administration, would not want to give the taxpayer's money away. It would be a congested situation in which the Secretary would not want to pay the compensation, but in which the producers or the individuals in the case of California, there were many backyard individuals who lost amounts of fruit, who would urge compensation.

Mr. PANETTA Mr. Chairman, will the gentleman yield?

Mr. THOMAS. Certainly, I yield to the gentleman.

Mr. PANETTA. In addition to that, I might say that if the Secretary does decide he wants compensation, he would then have to seek appropriations from the Congress in order to justify the payment under this authority.

Mr. DE LA GARZA. Mr. Chairman, will the gentleman yield to me?

Mr. THOMAS. I yield to my chairman.

Mr. DE LA GARZA. Mr. Chairman, we have examined the amendment and know of the consensus the gentleman has been able to reach.

Also, it is my understanding personally and from counsel, they might want to verify with the gentleman from California, that all this does is to give the Secretary identical authority in the plant pest area that he already has in the animal health area. For some reason, there was an omission in the original law. This will give him the authority to deal either with animal or pests and this is the thrust and intent of the amendment.

Mr. THOMAS. That is the total thrust and intent of the amendment. I could not say if it was identical to the animal disease area but the thrust is identical, it is clearly for extraordinary circumstances.

I think one of the most interesting points in the subcommittee hearing was the fact that the animal disease aspect has been used only once in 20 years by the Department of Agriculture and what we are trying to do is to make sure that those extraordinary and unfortunate circumstances such as occurred in California do not occur again. It was not good for California. It was not good for the Nation. This is an attempted remedy.

Mr. DE LA GARZA. I thank the gentleman for his interest and his work in this area.

Mr. Chairman, we have no objection to the amendment.

Mr. WAMPLER. Mr. Chairman, will the gentleman yield?

Mr. THOMAS. Certainly, I yield to my colleague, the gentleman from Virginia.

Mr. WAMPLER. Mr. Chairman, we, too, have examined the gentleman's amendment. We have no objection to it.

I commend the gentleman for his interest in bringing this amendment to us becaue I think, indeed, it bridges an oversight that was never intentional. As the gentleman pointed out, I believe in only one instance has the authority been used in the case of animal disease. I believe that was an outbreak of Newcastle's disease which is highly contagious.

I am confident it is a good amendment.

Mr. THOMAS. Mr. Chairman, I thank my ranking member.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California (Mr. THOMAS).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. LOEFFLER

Mr. LOEFFLER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. LOEFFLER: Page 77 after line 2, insert the following new section:

PLAN FOR CONTROL OF OAK WILT AND OAK DECLINE DISEASE

SEC. 1019. The Secretary of Agriculture, in cooperation with the States and political subdivisions thereof, shall conduct a study of the incidence of oak wilt and oak decline disease and evaluate methods for controlling the spread of such disease. The Secretary shall prepare and submit a report to both Houses of Congress on or before March 1, 1982, which shall include—

(1) the results of such study;

(2) plans for further research into the control of oak wilt and oak decline disease; and

(3) recommendations for controlling the spread of the disease, including an estimate of the costs involved and the availability of financial assistance.

Mr. LOEFFLER (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. LOEFFLER. Mr. Chairman, during recent years I have personally witnessed the destruction of thousands of acres of oak trees in the hill country area of Texas. These oak trees are extremely valuable for their critical ecological contribution toward maintaining a proper balance of domestic livestock and wildlife populations in the area. The disease causing this destruction—live oak decline—is resulting in heavy losses throughout Texas and may eventually impact more than 3 million acres of trees in nine States from Texas to Virginia, and is associated with oak wilt—the most destructive disease of oaks in the upper Mississippi Valley.

Research into this disease by the Forest Service in cooperation with the Texas Agricultural Extension Service has identified possible means to control the spread of oak wilt. Yet, despite the best efforts of these groups, limited resources exist with which to combat the spread of the disease on a large scale basis.

In an effort to focus the resources of the Department of Agriculture on this critical problem, I have offered the amendment now pending before the House. However, I am informed that the Department does have existing authority to deal with this problem, and, within existing resources, is proceeding to determine the extent of the problem in an effort to provide the assistance necessary to halt the spread of oak wilt.

I would like to clarify this authority with the distinguished chairman of the Agriculture Committee, and at this time I yield to the gentleman from Texas for that purpose.

Mr. DE LA GARZA. I appreciate the gentleman's concerns and join him in his efforts to bring attention to this serious problem. I have received assurances from the Department of Agriculture that the Department does have the authority to deal with oak wilt and is currently evaluating the problem in order to determine what assistance can be provided to those areas critically impacted by the disease. Under section 5 of the Cooperative Forestry Assistance Act of 1978, and other USDA authorities, the Forest Service is initiating technical assistance, in cooperation with the Texas Forest Service, to evaluate the problem and recommend appropriate solutions. I have a letter to this effect from the Deputy Secretary of Agriculture and I include it in the RECORD at this point:

DEPARTMENT OF AGRICULTURE,
Washington, D.C., October 6, 1981.

Hon. E (KIKA) DE LA GARZA,
Chairman, Committee on Agriculture,
House of Representatives,
Washington, D.C.

DEAR MR. CHAIRMAN: We would like to comment on the amendment to H.R. 3603 offered by Mr. Loeffler which appears on page H6725 of the September 30 CONGRESSIONAL RECORD. This amendment, which would appear in the bill as section 1012 of Title X, would direct the Secretary of Agriculture to study oak wilt and oak decline diseases and evaluate methods of control. The results of the study would be transmitted to Congress by March 1, 1982. It is our understanding that this amendment is directed toward the oak wilt problem affecting live oak trees in south Texas.

It is our position that this amendment is not necessary because the Secretary already has authority to deal with the live oak wilt problem under Sec. 5 of the Cooperative Forestry Assistance Act of 1978 (92 Stat. 368) and other USDA authorities. Under this authority, the Forest Service is initiating technical assistance in cooperation with the Texas Forest Service to evaluate the problem and potential control techniques. However, this type of technical assistance would not represent a comprehensive study as appears to be required by the amendment. Such a study could not be accomplished during fiscal year 1982 because of budget constraints. Furthermore, even if the resources were available, such a study could not possibly be completed by March 1, 1982, for biological and other reasons.

The Department will consider the results of the Forest Service evaluation, to be carried out under existing authorities, to determine what further action, if any, would be appropriate to deal with the live oak wilt problem. As you know, any financial assistance by USDA would have to reflect overall budget priorities and the need to hold down the level of the Federal budget.

The Office of Management and Budget advises that there is no objection to the presentation of this report from the standpoint of the Administration's program.

Sincerely,

RICHARD E. LYNG,
Deputy Secretary.

Mr. DE LA GARZA. This activity by USDA tracks the intent of the gentleman's amendment.

The gentleman has my assurances that I will work with him to assure a prompt and thorough review of this problem in order to provide needed assistance at the earliest possible time.

Mr. LOEFFLER. I appreciate the chairman's comments and his very generous assistance. It is my understanding, then, that the Department is initiating a thorough review of oak wilt and live oak decline and following that review will be in a position to determine what financial assistance may be available and appropriate to halt the spread of this disease.

Mr. DE LA GARZA. The gentleman is correct.

Mr. LOEFFLER. Mr. Chairman, with those assurances, I ask unanimous consent to withdraw my amendment.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

AMENDMENT OFFERED BY MR. STANGELAND

Mr. STANGELAND. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. STANGELAND: Page 77, immediately after line 2, insert the following new section:

SEC. 1018. Effective only with respect to the 1982 through 1985 crops of oil sunflower seeds, section 201 of the Agricultural Act of 1949 is amended by adding at the end thereof a new subsection (g) as follows:

"(g) The price of the 1981 through 1985 crops of oil sunflower seeds shall be supported through loans and purchases at such level, not less than $8 per hundredweight, as the Secretary determines appropriate in relation to competing commodities and taking into consideration domestic and foreign supply and demand factors. Loans during any fiscal year shall be made available not earlier than the beginning of the fiscal year and shall mature before the end of such fiscal year.".

Mr. STANGELAND (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

Mr. STANGELAND. Mr. Chairman, this amendment might well be called the Stangeland-Daschle amendment. It is an amendment that would provide a Commodity Credit loan program for sunflowers. There was a program for sunflowers in the farm bill as it left the House Agriculture Committee. It was part of the sugar section, the sugar title, and in the Bedell amendment that deleted that sugar title and wrote a new title, sunflowers were dropped.

The reason for a sunflower loan program, and let me say that this program is virtually identical to the present Commodity Credit loan program for soybeans, there are no deficiency payments. There are no target prices, but just simply an $8 a hundredweight loan program.

This amendment also has been passed by the USDA and the OMB.

In the amendment we have made a proviso that loans during any fiscal year shall be made available not earlier than the beginning of the fiscal year and shall mature before the end of such fiscal year. With that language, OMB and USDA advises that there is no budget exposure. The budget exposure is zero.

This is a crop that is grown primarily in my district in Minnesota, in eastern North Dakota, and in South Dakota, but is expanding.

Also I would like to point out that this is a crop that is heavily exported. About 80 percent of the production of sunflowers are exported. It assists in our balance of payments greatly and is a crop that has found great favor up in our area of the country.

□ 1600

Mr. DASCHLE. Will the gentleman from Minnesota yield?

Mr. STANGELAND. I am happy to yield to the gentleman from South Dakota.

Mr. DASCHLE. Mr. Chairman, I want to commend the gentleman. One of the reasons I voted against the Bedell amendment is because it struck this very important feature in the farm bill. I think for that industry in South Dakota, North Dakota, Minnesota, where we see a growing interest in the development of sunflowers as an alternative crop, we find a need for stability, and that is all this amendment does. It provides some rockbottom stability at no cost to the Government.

Eight cents a pound is a very conservative figure, one we can live with. I think we can be very confident that all it will do is provide the stability without providing budgetary exposure. Because of that, I think this amendment needs and deserves the support of the Congress, and I again commend the gentleman for offering it.

Mr. STANGELAND. I thank my colleague.

Mr. DE LA GARZA. Mr. Chairman, will the gentleman yield?

Mr. STANGELAND. I yield to the gentleman from Texas.

Mr. DE LA GARZA. I appreciate the gentleman yielding.

Mr. Chairman, I would like to remind the House that under the Bedell amendment that was previously adopted, the mandatory part of the sunflower program was deleted, leaving discretionary authority in the Secretary, and at this point I would suggest to the House that the House work its will on the amendment. We would gladly accept the determination by the House at this point if the gentleman should prevail.

Mr. STANGELAND. I thank the chairman.

Mr. BEDELL. Mr. Chairman, will the gentleman yield?

Mr. STANGELAND. I yield to the gentleman from Iowa.

Mr. BEDELL. Mr. Chairman, I would like to assure the gentleman that the purpose of the Bedell amendment was simply to get us down to where we meet the budgetary requirements. I understand from the gentleman that he does have assurance from the Department that there is no budgetary exposure under his amendment, and that it would still meet the budget requirements. Is that correct?

Mr. STANGELAND. We have that assurance from the Department and from OMB as well, with the proviso that the loan is made in 1 year and paid back in that same fiscal year. This, again, is a loan program. It is a marketing tool for the sunflower growers up in our area, because of transportation deficiencies and concerns that we have with the Port of Duluth that is closed 5 months out of the year. Most of our sunflowers are exported out of the Duluth Port.

We do have that assurance.

Mr. BEDELL. Mr. Chairman, it certainly was not the intent of the gentleman from Iowa to single out sunflowers. We were trying to get down to where we meet the budget requirements. If the gentleman has the assurance this does not adversely affect the budget, certainly the gentleman from Iowa has no objection to the amendment.

Mr. STANGELAND. Let me assure the gentleman from Iowa that I am as concerned about that budget exposure as he is. I recognize the need for that Bedell amendment.

Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Minnesota (Mr. STANGELAND).

The amendment was agreed to.

The CHAIRMAN. Are there additional amendments to title X? If not, the Clerk will designate title XI.

Title XI reads as follows:

TITLE XI—NATIONAL AGRICULTURAL COST OF PRODUCTION STANDARDS REVIEW BOARD

ESTABLISHMENT OF BOARD

SEC. 1101. There is hereby established an advisory board to be known as the National Agricultural Cost of Production Standards Review Board (hereinafter referred to as the "Board").

MEMBERSHIP OF BOARD

SEC. 1102. (a) The Board shall be composed of eight members appointed by the Secretary of Agriculture (hereinafter referred to as the "Secretary").

(b)(1) The terms of the members first taking office shall expire (as designated by the Secretary at the time of appointment) as follows: Two at the end of one year, two at the end of two years, two at the end of three years, and two at the end of four years. Thereafter the terms of all members shall be four years, except that the term of any person appointed to fill a vacancy on the Board shall be appointed only for the unexpired term of such person's predecessor.

(2) The Secretary shall appoint persons to the Board who are producers of one or more of the various major agricultural commodities produced in the United States who represent various geographical areas where such commodities are primarily produced and who rely on that activity for their principal source of income. The Secretary shall also appoint one person to the Board who, by virtue of education, experience, and training, has extensive knowledge of matters relating to the cost of producing agricultural commodities with adequate background in the fields of agricultural economics and accounting.

(3) No person may serve as a member of the Board for more than two terms, including an unexpired term.

(4) The Secretary shall designate one member of the Board to serve as Chairman and one member to serve as Vice Chairman, both of whom shall serve until their terms expire.

FUNCTIONS OF THE BOARD

SEC. 1103. (a) It shall be the function of the Board to—

(1) review the adequacy, accuracy and timeliness of the cost-of-production formulas and the implementation of those formulas in determining specific cost-of-production figures, including the information relied upon in arriving at such formulas, developed and utilized by the Department of Agriculture for the purpose of determining the cost of production of various agricultural commodities;

(2) advise the Secretary whether the cost-of-production formulas used by the Department of Agriculture in connection with the administration of its price support programs are fair and accurate and recommend to the Secretary how such formulas might be improved, including, when necessary, the submission of findings of actual costs of production;

(3) advise the Secretary on such other matters relating to the cost of production of agricultural commodities and price support operation as the Secretary may request; and

(4) review the adequacy of the parity formulations and make recommendations for improvements in the formula or other areas that may require improvement.

(b) The Secretary shall report promptly to the Board on the disposition of its recommendations including reasons for not accepting the recommendation or recommendations of the Board.

(c) The Board shall submit annually to the Committee on Agriculture, Nutrition, and Forestry of the Senate and the Committee on Agriculture of the House of Representatives a written report outlining the activities of the Board during the preceding year including any findings or recommendations made to the Secretary with respect to cost-of-production formulas and figures for any commodity. The Board shall include in each such report a list of the recommendations made to the Secretary and the disposition thereof.

(d) The Board shall meet at least annually, or more often if such meetings are necessary to meet the purposes of this Act. The Board shall, to the maximum extent feasible, schedule its meetings so as to permit prepublication review of annual Department of Agriculture cost of production reports as prescribed in section 1441a of title 7, United States Code.

SUPPORT SERVICES

SEC. 1104. The Secretary shall provide the Board with such office space, equipment,

and staff as may be necessary for the Board to perform its functions under this Act.

COMPENSATION

SEC. 1105. No member of the Board shall receive any compensation for such member's services as a Board member but may be paid travel expenses, including per diem in lieu of subsistence, as provided in regulations issued under section 7 of the Federal Advisory Committee Act.

AUTHORIZATION OF APPROPRIATIONS

SEC. 1106. There are authorized to be appropriated such sums as may be necessary to carry out the provisions of this Act.

TRANSFERS OF FUNCTIONS

SEC. 1107. The Secretary shall transfer to the Board any functions duplicating those provided for in this Act which are currently being carried out elsewhere in the Department.

APPLICABLE PERIOD

SEC. 1108. The authority provided in this title shall be applicable for the 1982 through 1985 crop years.

The CHAIRMAN. Are there any amendments to title XI? If not, the Clerk will designate title XII.

Title XII reads as follows:

TITLE XII—EXPORT PROVISIONS

Subtitle A—Public Law 480

REQUIREMENT FOR INVITATIONS FOR BIDS ON TITLE I PURCHASES

SEC. 1201. Section 115(a) of the Agricultural Trade Development and Assistance Act of 1954 is amended by inserting in the first sentence after the words "food commodities" the words "from private stocks".

TITLE II AUTHORIZATION CEILING

SEC. 1202. Section 204 of the Agricultural Trade Development and Assistance Act of 1954 is amended by striking out "$750,000,000" and inserting in lieu thereof "$1,000,000,000".

OVERSEAS MARKET DEVELOPMENT ACTIVITIES

SEC. 1203. Section 402 of the Agricultural Trade Development and Assistance Act of 1954 is amended by striking out in the second sentence "wine or beer" and inserting in lieu thereof "wine, beer, or other alcoholic beverage".

ANNUAL REPORT

SEC. 1204. Section 408(a) of the Agricultural Trade Development and Assistance Act of 1954 is amended by striking out "April 1" and inserting in lieu thereof "February 15".

EXTENSION OF PROGRAM

SEC. 1205. Section 409 of the Agricultural Trade Development and Assistance Act of 1954 is amended by—

(1) striking out in the first sentence "1981" and inserting in lieu thereof "1985"; and

(2) striking out in the second sentence "Food and Agriculture Act of 1977" and inserting in lieu thereof "Food and Agriculture Act of 1981".

Subtitle B—American Agriculture Protection Program

SEC. 1206. Section 1002 of the Food and Agriculture Act of 1977 is amended by—

(1) amending subsections (a) and (b) to read as follows:

"(a) Notwithstanding any other provision of law, whenever the President of the United States or any other member of the executive branch of the Federal Government, either directly or indirectly, suspends or causes to be suspended, the export sales of any commodity as defined in subsection (c) of this section to any country or area to which the United States continues any other commercial export trade if such trade exceeds 50 per centum of the average trade during the past five years, the Secretary of Agriculture shall, on the date the suspension is initiated, set the loan level for such commodity under the Agricultural Act of 1949 for any new loans made beginning on such date, if a loan program is in effect for the commodity, as provided in this subsection. If such suspension is based upon any reason other than, or in addition to, national security, the loan level for such commodity shall promptly be set at 90 per centum of the parity price for the commodity, as such parity price is determined on the date the suspension is initiated. If such suspension is based solely on reasons of national security, the loan level for such commodity shall promptly be set at a level not less than the average market price for such commodity during the fifteen marketing days immediately preceding such suspension. Producers who receive loans based on the level established under this subsection shall not be charged interest with respect thereto and shall be entitled to storage charges for storing any such commodity at such rate as the Secretary determines to be fair and reasonable.

"(b) Any loan level established pursuant to this section shall remain in effect as long as the suspension of commercial export sales described in subsection (a) remains in effect and shall then be adjusted by the Secretary in four approximately equal steps over a period of nine months to the loan level which would be in effect for such commodity if commercial export sales had not been suspended."; and

(2) adding after subsection (c) a new subsection as follows:

"(d) The provisions of this section shall be implemented only for commodities for which it can be reasonably presumed by the Secretary from export data of preceding years that the suspension will reduce the annual tonnage of exports of the commodities by more than 2 per centum.".

Subtitle C—Other Export Provisions

INCREASED USAGE OF PROTEIN BYPRODUCTS DERIVED FROM ALCOHOL FUEL PRODUCTION

SEC. 1207. (a) The Congress finds that the use of the protein byproduct resulting from the production of fuel alcohol from agricultural commodities may make it possible for the United States to make available significantly increased amounts of protein to meet the food needs of developing countries without any increase in handling, storage, and transportation facilities. The Congress believes that serious consideration should be given to the potential of this protein byproduct and that, if found to be feasible, this protein byproduct should be included in the Department of Agriculture's commodity export and donation programs.

(b) Accordingly, the Secretary of Agriculture shall investigate the potential for using the protein byproduct resulting from the production of fuel alcohol from agricultural commodities in meeting the food needs of developing countries through food for peace programs carried out under the Agricultural Trade Development and Assistance Act of 1954 and through the export credit sales program carried out under section 4 of the Food for Peace Act of 1966 and section 5(f) of the Commodity Credit Corporation Charter Act.

(c) The Secretary of Agriculture shall also investigate the potential for using the protein byproduct resulting from the production of fuel alcohol from agricultural commodities in the distribution of food products under the commodity donation program carried out under clause (3) of section 416 of the Agricultural Act of 1949 and under section 210 of the Agricultural Act of 1956.

(d)(1) Not later than six months after the date of enactment of this Act, the Secretary of Agriculture shall report to the Congress on the results of the investigations conducted pursuant to subsections (b) and (c) of this section.

(2) The Secretary of Agriculture shall provide to the Congress each year a description of the efforts being made by the Department of Agriculture to make available, as part of the programs referred to in subsections (b) and (c) of this section, the protein byproduct resulting from the production of fuel alcohol from agricultural commodities. The information for all such programs may be included in the report submitted pursuant to section 408(a) of the Agricultural Trade Development and Assistance Act of 1954, or the information for each such program may be included in the annual report for that program.

SEC. 1208. The Act entitled "An Act authorizing Commodity Credit Corporation to purchase flour and cornmeal and donating same for certain domestic and foreign purposes", approved August 19, 1958 (7 U.S.C. 1431 note), is amended in the proviso by inserting "(except that this limitation does not apply in the case of the protein byproduct resulting from the production of fuel alcohol from agricultural commodities)" immediately after "processed".

EXPORT SALES OF WHEAT AND FEED GRAINS

SEC. 1209. It is the sense of the Congress that any agreement into which the United States enters after the date of enactment of this section for any sales of wheat, corn, soybeans, or feed grains by the United States to any country should stipulate that the price of the commodity in any such sale under such agreement shall be not less than the cost of production of such commodity, as determined by the Secretary of Agriculture.

COMMITTEE AMENDMENT

The CHAIRMAN. The Clerk will report the committee amendment.

The Clerk read as follows:

Committee amendment: Page 82, strike out lines 21 through 24 and insert in lieu thereof the following: "this section to any country or area to which (1) commercial export sales of United States agricultural commodities so restricted exceed 50 percent of the average total United States commercial export sales to such country or area for the previous five years, or (2) the United States otherwise continues commercial trade, the Secretary of Agriculture shall, on the .".

The CHAIRMAN. Does any Member wish to be heard on the committee amendment?

If not, the question is on the committee amendment.

The committee amendment was agreed to.

Mr. BROOKS. Mr. Chairman, I support the rice title of H.R. 3603. I know that it was carefully and consciously developed over a long period of time and with unheard of cooperation between rice producers and the chair-

man of the Cotton, Rice and Sugar Subcommittee. In passing, I might add that I am extremely proud of the rice industry for many reasons but specfically in regard to this legislation. A group representing rice producers in the five principal producing States worked long and hard and in the process made many compromises to develop a rice industry position that is painfully prudent and reasonable even in this time of administration-mandated budget levels. A single rice industry position on legislation encompassing significant program changes is a major accomplishment in itself. This legislation will repeal the authority for acreage allotment and marketing quotas and permit producers to be eligible for the program even though they do not have rice allotment. While I personally have considerable reservations about this particular change, it is what this administration wants; and more importantly, the producer group has agreed to accept it as a part of their compromise recommendations.

As a concomitant part of the industry compromise, there was also the authority for the Secretary of Agriculture to impose a specific set-aside of rice acreage when production adjustment is needed to adjust the supply-demand balance.

The important other aspect of the production adjustment provision is a reasonable level for the target prices and the loan level. Reasonable level—reasonable in relation to the costs and risks of production—are essential if meaningful production is to be obtained when needed. Eligibility for target price payments and loans would be the only inducement for producers to participate in the voluntary production adjustment in the years when it is needed. I should add that the USDA with the conscientious use of the production adjustment authority could virtually eliminate a supply-price circumstance that would require target price payments.

Another, and yet very important, reason for reasonable levels for the target price and loan is to undergird the rice industry. Undergirding the production of this essential food crop and major export crop is of utmost importance. Let me list a few of the reasons for this statement:

First. Rice is a very costly crop to produce. Even USDA statistics show a cost of $444 per acre, excluding land costs, as the average cost of production for the 1981 crop. It is reasonable to assume such costs will be close to $500 per acre for the 1982 crop and this cost does not include an allowance for the cost of land. So, this basically is the out-of-pocket costs and surely there are substantial land costs involved and those while quite variable must be added.

Second. Rice is an export commodity—in recent years over 60 percent of the annual production has been exported. As a major food grain of the world, it is traded into a highly protected world market; and as a result, our actual export movement is subject to unforeseeable whims of international policies. One comment to illustrate—much U.S. rice is sold to Middle Eastern countries and we all realize that with the unsettled conditions in this area of the world these markets could be closed to us without justification or notice. Iran was a major customer and overnight they were no customer.

Third. The many uncertainties of rice production and marketing coupled with the high cost of rice production requires an effective rice program so that producers can finance their production operation. Without reasonable program guarantees, producers, especially small producers, would find it difficult or perhaps impossible to obtain the credit to produce a crop.

Fourth. Rice is not storable for extended periods like wheat or corn. Hence, a farmer-held reserve as an adjunct to the regular price support program is not feasible.

The point of all this is that an effective and adequate price support and production adjustment program for rice is a necessity. The provisions of H.R. 3603 is the best compromise that we can devise under the severe restrictions imposed by this administration.

I wish I could tell the rice producers of my district to forget rice and produce an alternative crop for a greater and more stable return. Unfortunately, because of a combination of soil and climate, we do not have a feasible alternative crop. The agriculture of my district is limited to rice and cattle and the current outlook for both is anything but good. The proposed program for rice is the least I can accept for my rice producers.

AMENDMENT OFFERED BY MR. HUCKABY

Mr. HUCKABY. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. HUCKABY: On page 86, after line 25, insert the following new section:

"SEC. 1210. Any company engaged in the export of wheat or feed grains shall pay no less than the fair market value of the commodity at the time of purchase. Such a fair market value shall be determined by the price of that commodity on the appropriate commodity exchange at the time of purchase by the company."

Mr. HUCKABY. Mr. Chairman, this amendment appears in the sense of Congress section regarding exports. For the past 2 years, Southern wheat farmers have found that once they take their wheat crops to an export port in the Gulf of Mexico that they have been receiving from 30 to 70 cents a bushel less than what the markets around the world say their wheat was valued at.

Mr. FINDLEY. Mr. Chairman, will the gentleman yield?

Mr. HUCKABY. I would be happy to yield to the gentleman from Illinois.

Mr. FINDLEY. Mr. Chairman, it is my understanding that the gentleman's amendment would appear as sense of Congress language in the statute; is that correct?

Mr. HUCKABY. That is correct.

Mr. FINDLEY. I want to express my support for it.

Mr. HUCKABY. I thank the gentleman.

Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Louisiana (Mr. HUCKABY).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. DORGAN OF NORTH DAKOTA

Mr. DORGAN of North Dakota. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. DORGAN of North Dakota: Page 86, after line 25, insert the following new section:

STUDY OF ALTERNATIVE EXPORT MARKETING OF GRAIN

SEC. 1211. (a) The Secretary of Agriculture shall conduct a study to develop proposals for legislation that would provide alternative marketing and pricing programs to assure that the price paid by foreign purchasers for grain produced in the United States results in producers of such grain receiving an average amount for such grain that is not less than the average estimated domestic cost of production of such grain. For purposes of this subsection the term "grain" means wheat, soybeans, and corn and other feed grains.

(b) For purposes of developing proposals under subsection (a), the domestic cost of production shall be determined on the basis of official statistics maintained by the Department of Agriculture, and shall include the average acquisition value of land as the cost of land.

(c) The Secretary shall transmit the proposals developed under subsection (a) to the Congress not later than January 1, 1983.

Mr. DORGAN of North Dakota (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from North Dakota?

There was no objection.

Mr. DORGAN of North Dakota. Mr. Chairman, I am offering this afternoon an amendment which I believe will signal the beginning of a serious attempt on the part of our Government to recognize the pricing potential which we have with regard to our grain exports. It is an attempt to utilize that pricing potential in a manner which will guarantee that, when our farmers produce grain for export, they receive a price for that grain that is at least equal to their costs of production.

In recent years our grain and oilseed exports have grown to the point where we now provide such a large percentage of the grain that is sold in the international market that we virtually set the world market price. Our exports account for approximately 50 percent of the wheat, 70 percent of the coarse grain, and 80 percent of the soybeans that move in international trade. This is more than twice the percentage of the international oil trade accounted for by Saudi Arabia, the acknowledged price leader with regard to crude oil.

Unfortunately, the growth in our markets has not, by itself, been able to assure our farmers a profit on the grain that leaves this country. Although our exports of wheat, for example, have tripled in the last 10 years, farmers are losing more money today on wheat that is exported than they were in 1971.

At the current price of about $3.50 per bushel, our farmers are receiving about two-thirds of the $5.20 per bushel that it costs them to produce wheat. At this rate, American wheat farmers are going to lose about $3 billion during 1981—just on the wheat that we are going to export.

And which countries are the big beneficiaries of this bargain basement price policy for U.S. wheat? None other than some of the richest nations in the world. Together, the Soviet Union, its satellites, Japan, China, and the OPEC countries buy nearly half of our grain exports. In effect, our farmers are funding a food stamp program for the Soviets, for the OPEC countries, and for other prosperous nations.

Selling wheat and other grains at below what it costs us to produce them might make sense if other countries could produce them cheaper. But they cannot. We have the most efficient agricultural system in the world.

In fact, our grain is so cheap that, even after paying over $1 per bushel for shipping, many countries find that they can import it at much less than what it costs to produce alternatives locally. In order to protect their local farmers, governments of a number of nations, including Japan and the members of the European Community, add a substantial amount to the price of our grain as it enters their countries.

In Japan, a state trading agency purchases wheat on the international market and then resells it to local outlets for about $2.50 per bushel more than the landed price to the government. In western Europe, governments charge a variable levy on imported grain. Currently that levy stands at $2.90 per bushel for wheat and at $1.78 per bushel for corn. In both cases the add-on, goes directly into the treasuries of the grain importing nations.

When we sell grain to these countries at less than our own farmers cost of production, we are asking those farmers to help pay the cost of any number of government programs in those countries. It is time we realize that with our degree of dominance in the international grain market, we no longer have to put up with that.

In order to initiate some serious study of our pricing potential, I am offering the following amendment which instructs the Secretary of Agriculture to undertake an in-depth investigation into what might be the best approach to follow in order to secure a price for our grain exports that is sufficient to allow our farmers to at least cover their costs of production on that grain.

The CHAIRMAN. The question is on the amendment offered by the gentleman from North Dakota (Mr. DORGAN).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. GUNDERSON

Mr. GUNDERSON. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. GUNDERSON: Page 81, after line 21, insert the following new section (and redesignate succeeding sections accordingly):

VALUATION OF COMMODITIES

SEC. 1204. Section 403(b) of the Agricultural Trade Development and Assistance Act of 1954 is amended by inserting "a price not greater than" after "valued at".

□ 1610

Mr. GUNDERSON. Mr. Chairman, there is little doubt that one of the most worthwhile programs Congress has established is the Public Law 480, food-for-peace program. It is through this program that the United States can share its abundant production of agricultural commodities with the less developed countries of the world.

Clearly, one good source of commodities for the Public Law 480 program is the Commodity Credit Corporation. Under current law, commodities acquired by the Commodity Credit Corporation under a domestic price support program must be valued at the export market price for the commodity for purposes of reimbursing the CCC when the commodity is removed from inventory and moved through the Public Law 480 program.

The export market price is not the world price; rather, it is a price that is set by an administrative formula and used exclusively to determine the reimbursement for using CCC acquired commodities in the Public Law 480 program.

Since the various commodities acquired by the CCC are not all purchased at the same price, their export market prices will vary. Thus, commodities with larger export market prices do not move as readily through the Public Law 480 program as commodities with cheaper export market prices even though they may be in greater quantity. The reason for this phenomenon is, of course, the mandatory price that is placed on the commodity if it is to be moved through the Public Law 480 program.

As an example of this problem, we all know that the CCC presently has greater quantities of surplus dairy commodities than any other commodity. The export market price for nonfat dry milk is 19 cents per pound.

At the same time the export market price for flour is 12 cents per pound, for wheat is 9 cents per pound, and for corn is 7 cents per pound.

It is, therefore, uneconomical for a Public Law 480 country to purchase nonfat dry milk even though it is presently in the greatest quantity since it can get half again as much flour, twice as much wheat, and almost three times as much corn for the same price. Yet, nonfat dry milk is just as nutritious as, if not more nutritious than, the other commodities.

The Commodity Credit Corporation presently has over 750 million pounds of nonfat dry milk in storage. The cost of storing this quantity of milk is approximately 7½ cents per hundredweight per month or a little over $6 million per year. Thus, it is not only in the best interests of the Public Law 480 country that receives CCC milk to use these surplus stocks, but in the best interests of the American taxpayer as well.

My amendment would establish the export market price as a ceiling for reimbursement of the CCC for commodities purchased under a domestic price support program if they are used in the Public Law 480 program. The Secretary of Agriculture would have the discretion to set the price of a particular commodity below the export market price. In this way, the Secretary can make commodities with high export market prices more competitive with commodities with lower export market prices if the CCC has large surpluses of the former commodities.

Again, in the case of the present surplus of nonfat dry milk, for every 110 million tons of milk that is moved through the Public Law 480 program, the American taxpayer saves approximately $1 million a year in storage costs. If the amendment becomes a part of the farm bill, the USDA estimates that it will be helpful in not only moving nonfat dry milk through the Public Law 480 program, but rice as well.

I should note in closing that the USDA has worked closely with my office in bringing this amendment to the floor and I am confident of their support of it. Similarly, the amendment was adopted by the Senate in September as part of their version of the farm bill.

I, therefore, urge my colleagues to support this well-reasoned amendment that benefits both the less privileged in developing countries by allowing them greater access to surplus CCC commodities with high export market prices and the American taxpayer by saving him the costs of storage of these surplus commodities.

Mr. JEFFORDS. Mr. Chairman, will the gentleman yield?

Mr. GUNDERSON. I yield to the gentleman from Vermont.

Mr. JEFFORDS. Mr. Chairman, I want to commend the gentleman for his amendment. This is not anything that is novel in that sense. We did have a temporary provision which allowed that previously. It is an important one, and one that can be of great assistance to us. I appreciate the gentleman offering the amendment and I support it wholeheartedly.

Mr. GUNDERSON. I appreciate the comments of the gentleman from Vermont.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Wisconsin (Mr. GUNDERSON).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. DASCHLE

Mr. DASCHLE. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. DASCHLE: Page 81, insert the following after line 5 and redesignate the succeeding sections accordingly:

HUNGER AND GLOBAL SECURITY

SELF-HELP MEASURES TO INCREASE AGRICULTURAL PRODUCTION; VERIFICATION OF SELF-HELP PROVISIONS

SEC. 1201. (a) Section 109(a) of the Agricultural Trade Development and Assistance Act of 1954 is amended—

(1) in paragraph (3) by inserting immediately before the semicolon ", and reducing illiteracy among farmers";

(2) by striking out the period at the end of paragraph (10) and inserting in lieu thereof "; and "; and

(3) by inserting the following new paragraph immediately after paragraph (10):

"(11) carrying out programs to improve the health of farmers and their families.".

(b) Section 109 of the Agricultural Trade Development and Assistance Act of 1954 is amended by adding at the end thereof the following new subsection:

"(d)(1) In each agreement entered into under this title and in each amendment to such an agreement, the economic development and self-help measures which the recipient country agrees to undertake shall be described (A) to the maximum feasible extent, in quantitative and measurable terms, and (B) in a manner which ensures that the needy people in the recipient country will be the major beneficiaries of the self-help measures pursuant to each agreement.

"(2) The President shall, to the maximum feasible extent, take appropriate steps to satisfy himself that, in each agreement entered into under this title and in each amendment to such an agreement, the economic development and self-help measures which the recipient country agrees to undertake are additional to the measures which the recipient country otherwise would have undertaken irrespective of that agreement or amendment.

"(3) The President shall take all appropriate steps to determine whether the economic development and self-help provisions of each agreement entered into under this title, and of each amendment to such an agreement, are being fully carried out.".

Mr. DASCHLE (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from South Dakota?

There was no objection.

Mr. DASCHLE. Mr. Chairman, there is growing concern, in the Congress and elsewhere, that the assistance we provide through the food-for-peace programs a developmental purpose; that there is no point in selling or giving away food on concessional terms which then undercut local markets in recipient countries, or which do not reach the needy population. When the food-for-peace program began we had agricultural surpluses and it was designed to solve at least three purposes:

First, getting rid of agricultural surpluses for which we had no storage space; second, it served to depress market prices and third, it would help alleviate world hunger. But we have come to the realization that we do not live in a time of world food surplus and we may never do so. Our problem may be one of choosing which countries among the world to whom we now must export. We must, therefore, recognize that changes in the program must now be made.

We should use the food-for-peace program to more aggressively encourage agricultural development in recipient countries—a recognition which has come to us in recent years. Currently 70 percent of the food under the program is in the form of concessional sales. The recipient governments in turn sell the food, sometimes at prices which undercut local markets, and therefore, harm their own farmers and discourage incentive to increase agricultural output.

Often, as in the case recently in Bangladesh, the food does not reach the most needy, but is sold by the Government to select urban groups such as civil servants, police, and the army.

In 1977, Congress first made an attempt to deal with this issue and strengthen the self-help or developmental aspect of the food-for-peace program by establishing title III, which basically turns title I loans into grants for those countries willing to institute a complete agricultural development project. There have been proposals that the self-help measures in title I be strengthened by requiring contracts to be more specific and verifiable regarding agricultural development, and that the projects be of benefit to the most needy segment of the population. Those suggestions were proposed in numerous hearings held throughout this year, both before the House Agricultural Committee and the House Foreign Affairs Committee.

My amendment addresses the recommendations made in that testimony by first requiring that title I sales and agreements be far more verifiable and specific with respect to self-help measures that this legislation will incorporate.

Second, the amendment addresses the current problem we have found in that the great majority of self-help provisions—over two-thirds in a recent study of 192 such provisions—do not require that the poor be the primary beneficiaries.

This legislation requires that needy people in recipient countries be the major beneficiaries of the self-help measures pursuant to each one of the agreements.

It also makes these agreements more meaningful. There is a danger, many times, that these self-help measures set out in the sales agreements will merely be steps that the recipient government had been planning to take all along whether it had or had not received this assistance. This legislation calls for the agreements to represent actions which the recipient government would not have taken otherwise.

Finally, this legislation requires that all appropriate steps be made to determine whether the self-help provisions of each one of the agreements and be fully carried out.

Mrs. FENWICK. Mr. Chairman, will the gentleman yield?

Mr. DASCHLE. I yield to the gentlewoman from New Jersey.

Mrs. FENWICK. Mr. Chairman, I am grateful to my colleague for yielding. I would like to support this amendment. I think it is essential. We must encourage the self-help aspect.

It has passed the Foreign Affairs Committee in May. We passed a similar amendment to the Foreign Trade Act.

I would like to say something to this House as indeed I did to the committee, that we must inspect the question as to whether or not we must continue to insist that one-half of all shipments go in American cargo ships. This is causing an extra expense, and in one section of the bill alone of $79 million last year. It does discourage the export of our grain. It also limits the amount of food we can get to those countries which are full of starvation.

I thank my colleague.

Mr. DASCHLE. I thank the gentlewoman for her support.

Mr. ZABLOCKI. Mr. Chairman, will the gentleman yield?

Mr. DASCHLE. I yield to the chairman of the Foreign Affairs Committee.

Mr. ZABLOCKI. Mr. Chairman, I thank the gentleman from South Dakota for yielding. I desire to ask the gentleman just a few questions.

Is my understanding correct that the gentleman's amendment is word for word the provisions that are contained in H.R. 3566, the foreign aid bill?

Mr. DASCHLE. The Chairman is correct. It is identical to the language passed in the Foreign Affairs Committee.

Mr. ZABLOCKI. But the gentleman's amendment is only part of the provisions in the House Foreign Affairs Committee bill, H.R. 3566. An overall, larger package of food and Public Law 480 provisions is contained in that bill.

Mr. DASCHLE. That is correct. There are other reforms that must be made, and will be the subject of legislation in the foreign affairs bill when it comes onto the floor later on next month. This simply deals with the self-help measures under title I that both the Senate Agriculture Committee and, as I understand it, the Senate Foreign Affairs Committee have taken up in the last couple of weeks.

Mr. ZABLOCKI. Will the gentleman yield further?

Mr. DASCHLE. I will be happy to yield.

Mr. ZABLOCKI. I certainly appreciate the good intentions of the gentleman from South Dakota, but I must ask him why this amendment is necessary to be acted upon at this time, since it is just a part of the whole package. Would not it be better and more orderly to wait until we consider the whole foreign aid bill?

The CHAIRMAN. The time of the gentleman from South Dakota has expired.

(By unanimous consent Mr. DASCHLE was allowed to proceed for 3 additional minutes.)

Mr. DASCHLE. Mr. Chairman, I think that there is merit to bringing up the specific items on which we can all agree. I do not think the gentleman will find unanimous agreement for some of the other provisions that the chairman will be dealing with in the foreign aid bill, so I think the expeditious manner with which this particular part will be handled will certainly lend itself well to our objectives.

□ 1620

I would also add that the Senate Agriculture Committee and then, of course, the Senate, in passing the farm bill on the floor of the Senate just recently, included these very provisions. It had bipartisan approval. Many of the Senators on both sides of the aisle endorsed and supported this legislation.

So this is an effort to move ahead with those reforms in title I which we recognize are necessary, so that an expeditious implementation can be realized.

Mr. ZABLOCKI. Mr. Chairman, will the gentleman yield further?

Mr. DASCHLE. I yield to the chairman of the committee.

Mr. ZABLOCKI. Mr. Chairman, I want to take this opportunity to thank the chairman of the Committee on Agriculture, the gentleman from Texas (Mr. DE LA GARZA), for the agreement we had reached on the handling of the various Public Law 480 provisions in our respective bills. I do not oppose the amendment of the gentleman from South Dakota, but I realize he is breaking an agreement.

Mr. DASCHLE. Mr. Chairman, I certainly do not speak for the committee chairman. The chairman may have had some agreements, but I feel very strongly about the self-help provision and recognize that my right to offer the amendment is protected.

Mr. DE LA GARZA. Mr. Chairman, will the gentleman yield?

Mr. DASCHLE. Yes; I am happy to yield to the chairman of the Committee on Agriculture.

Mr. DE LA GARZA. Mr. Chairman, I would like to inform the distinguished gentleman from Wisconsin (Mr. ZABLOCKI), who is my dear friend, that the chairman has broken no agreement.

Mr. ZABLOCKI. No; if the gentleman will yield further, I did not say or intend to say that the chairman had broken an agreement.

Mr. DE LA GARZA. The agreement had been and will continue to be that in any area in which it appears in this bill that we have joint or similar jurisdiction we would be very happy to have our colleagues from the Committee on Foreign Affairs participate as conferees to the extent that we have joint jurisdiction.

Mr. DASCHLE. Mr. Chairman, it is my understanding—and perhaps the committee chairman can clarify this—that some members of the Committee on Foreign Affairs will be invited to participate in the conference on food-for-peace matters throughout the entire conference with the Senate; is that not correct?

Mr. ZABLOCKI. Mr. Chairman, will the gentleman yield?

Mr. DASCHLE. I yield to the chairman of the committee.

Mr. ZABLOCKI. Mr. Chairman, the gentleman is correct, with regard to food for peace and certain other matters also.

If I may proceed, just for the purpose of clarification, the gentleman from Wisconsin did not imply nor intend to imply, and he certainly did not state, that the chairman of the committee had broken an agreement. The gentleman from Texas is a valued member of the Foreign Affairs Committee. For years we have been great friends, and we keep our agreements. If another Member wants to offer an amendment at this point, for whatever reason, I do not blame the chairman of the committee.

Mr. DE LA GARZA. Mr. Chairman, if the gentleman will yield further, I appreciate the gentleman's clarification. Our agreement continues to the extent that we have personal control.

Mr. ZABLOCKI. That is correct.

Mr. DASCHLE. Mr. Chairman, with that, I yield back the balance of my time.

The CHAIRMAN. The question is on the amendment offered by the gentleman from South Dakota (Mr. DASCHLE).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. PANETTA

Mr. PANETTA. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. PANETTA: On page 86, after line 25, insert the following:

EXPANSION OF INTERNATIONAL MARKETS FOR UNITED STATES AGRICULTURAL COMMODITIES AND PRODUCTS THEREOF

SEC. 1210. (a) It is the sense of the Congress that, in order to further assist in the development, maintenance, and expansion of international markets for United States agricultural commodities and the products thereof, the Secretary of Agriculture should, and is hereby urged and requested to—

(1) use the intermediate credit program authorized under section 4 of the Food for Peace Act of 1966 (7 U.S.C. 1707a) to improve the capability of importing nations to purchase and use United States agricultural commodities and the products thereof on a long-term basis;

(2) ask the Congress, at the earliest practicable date, for funds for the agricultural export credit revolving fund in an amount sufficient to meet the demand for short-term credit authorized to be made available under section 4 of the Food for Peace Act of 1966;

(3) establish, insofar as practicable, the maximum number of United States Agricultural Trade Offices in other nations authorized by section 605A of the Act of August 28, 1954 (7 U.S.C. 1765a);

(4) use, to the maximum extent practicable, existing authority to ensure full utilization of the levy-free quota, established during the Tokyo round of the multilateral trade negotiations, for the export sale of United States high quality beef to the European Economic Community;

(5) expand, to the fullest extent possible, the market development activities of the Foreign Agricultural Service of the Department of Agriculture in developed, developing, market, and nonmarket foreign countries with particular emphasis on (A) continuation of the cooperator programs at the same funding level (adjusted for inflation) provided to carry out the Agricultural Trade Development and Assistance Act of 1954 (7 U.S.C. 1691 et seq.) during fiscal year 1970; (B) a more active export market development program for value added farm products and processed foods; and (C) the implementation of a full scale program for

forestry products, including commodity information, trade policy, and market development for such products;

(6) insure that the European Economic Community observes its commitments under the General Agreement on Tariffs and Trade (GATT) regarding the tariff-free binding on imports of soybeans and corn gluten feed;

(7) consult with the appropriate officials of the Government of Japan with the objective of increasing the export sales of citrus fruits and high quality beef to Japan and to develop mutually acceptable standards for the certification of lettuce and other speciality crops for export to Japan; and

(8) use the authority under section 32 of the Act of August 24, 1935 (49 Stat. 774; 7 U.S.C. 612c) to establish a special standby export subsidy program for United States agricultural commodities and the products thereof, the export of which has been restricted by foreign government subsidies.

(b) It is further declared to be the sense of the Congress that any special standby export subsidy program established by the Secretary of Agriculture pursuant to subsection (a)(8) should (1) be consistant with United States international obligations, and (2) be designed to neutralize the effects of those for agricultural commodity subsidy programs which—

(A) the President has determined, pursuant to section 301 of the Trade Act of 1974 (19 U.S.C. 2411), are acts, policies, or practices described in section 301(a) of such Act that should be eliminated by appropriate action of the United States:

(B) have, as the result of the appropriate dispute settlement procedures, been found to be in violation of the General Agreement on Tariffs and Trade (GATT) or the Agreement on Interpretation and Application of Articles VI, XVI and XXIII of the General Agreement on Tariffs and Trade (relating to subsidies and countervailing measures), if applicable.

Mr. PANETTA (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from California.

There was no objection.

Mr. PANETTA. Mr. Chairman, the amendment I am offering was also offered in part and adopted by the Senate during its consideration of the farm bill. It is in the nature of a declaration of the sense of Congress that the Secretary should undertake certain steps to develop, maintain, and expand our Nation's export trade.

The Secretary has been authorized to established international trade offices, interim credit revolving funds, market development programs for value-added and processed food, and cooperator programs for foreign exporters. The Senate amendment would encourage him to take full advantage of these authorities. While I agree with many of the recommendations included in the Senate amendment, I am particularly interested in the recommendation that the Secretary engage in consultation with officials of the Government of Japan with the objective of increasing the export sales of citrus fruits and high-quality beef to Japan.

My amendment would expand upon the recommendation to the Secretary to include in these discussions the development of mutually acceptable standards for the certification of lettuce and other speciality crops for export to Japan. While lettuce is classified as "enterable" for Japan's market, the lack of assurance on the part of growers and shippers that their product will not be turned away at the last minute has effectively halted its export.

The potential of lettuce exports to Japan is exceedingly great. There is a tremendous demand for our product that for the most part goes unmet because of the lack of mutually acceptable standards between our two countries. One importer estimates that Japan could consume 250,000 to 500,000 cartons of lettuce per week. This works out to a potential market for 25 million cartons in new trade with the Japanese which at $5 per unit would represent $125 million in new trade.

Lettuce is the leading crop of the Salinas Valley and accounts for 42 percent of all the acreage committed to lettuce in the entire State of California. Our State provides over 72 percent of all the lettuce grown in the United States. The annual field value of this single crop in the Salinas Valley alone exceeds $200 million.

While there is tremendous demand in Japan for California lettuce, our growers and shippers are quite reluctant to export it because of uncertainty as to whether it will be accepted by Japanese officials as suitable for their market. Japan's pest tolerance levels do not comport with the U.S. Department of Agriculture's standards for the issuance of phytosanitary certificates. These certificates certify that the particular product does not exceed acceptable levels of plant pests. It is necessary for the Secretary to consult with the Japanese and to develop mutually acceptable standards for phytosanitary certification so that exporters may be assured of entrance to Japan's market. My amendment urges the Secretary to undertake such consultations with regard to lettuce and other speciality crops.

I would like to submit for the RECORD a brief description for my colleagues of the other recommendations which have been adopted by the Senate. These recommendations if fully implemented will assist our national effort to expand our agricultural export market.

ADDITIONAL INFORMATION

INTERMEDIATE CREDIT

Congress called for enactment of the Intermediate Credit Program in 1978. It was briefly in operation; however, no funding was allocated in 1981. Intermediate credit provides a valuable link between the short-term credit guarantee program for sales with 1 to 3-year credit repayment terms and concessional sales for market development under P.L. 480, Title I, with repayment terms of 20 to 40 years. The need for intermediate credit terms providing three to ten year credit for breeding animals and foreign market development facilities is not met by the guarantee program. Particularly in developing countries where potential for increased livestock exports is greastest, and where facilities to handle agricultural imports are most needed, longer repayment terms become critical in managing these types of investments with slower rates of return.

One mechanism for providing intermediate credit while expanding our short-term credit options is an export credit revolving fund, as proposed by the Senate Agriculture Committee Farm Bill. It would be advantageous to revive the direct credit program in order to complete our mix of export credit marketing tools. USDA says there may be some instances where direct government-to-government credit is a better selling tool than private guaranteed credit. The original Senate proposal called for funding not to exceed $300 million in FY 82, $500 million in FY 85, and $700 in FY 85.

AGRICULTURAL TRADE OFFICES

In the Agricultural Trade Act of 1978, Congress authorized the establishment of a minimum of six and a maximum of 25 Agricultural Trade Offices to be located in the major market areas with potential for expansion, i.e., OPEC countries, planned economies, and developing countries. The goal of the Trade Offices is to provide one-stop marketing service for U.S. exporters and foreign buyers.

At present, eight trade offices are fully operational and three trade officers are at posts in Nigeria, China and Tunisia with trade offices in development. In the fall of 1981, evaluation teams will begin a study of trade offices in Hamburg, London, Warsaw, Manama, Singapore, and Seoul to determine their effectiveness and the feasibility of creating additional trade offices.

EC IMPORTS OF HIGH-QUALITY BEEF

The European community's Beef and Veal Management Committee allocates the U.S. a 10,000 MT quota of a 21,000 MT quota for high quality beef as ageed to in the Tokyo Round of the Multilateral Trade Negotiations. This was seen as a major breakthrough in U.S. efforts to gain access to the European market. However, U.S. exporters filled only 941 MT of the quota in 1980 and 1,215 MT to date in 1981. Obstacles to increased use of the quota center around pricing by U.S. producers and European wholesalers and complex licensing procedures for European importers. In June, 1981, Secretary Block won a commitment from EC ministers to keep the quota in place while these problems are addressed. Foreign Agricultural Service officials met with EC officials and U.S. industry representatives in July and August 1981. Further progress is expected with a strong, concerted effort.

MARKET DEVELOPMENT ACTIVITIES

(A) Cooperator Programs.—The dramatic expansion in agricultural exports in the past decade has put increasing pressure on the resources available for the market development cooperator program. Since 1970, the number of participants has doubled from 25 to 50 associations and a new component, the Export Incentive Program with 36

participants has been added. Funding has not kept pace with this growth. While authorization ceilings for the program have doubled from $13.1 million in 1970 to $26.6 million in 1981, inflation and currency fluctuations have kept the real purchasing power at $13.6 million—only $1.3 million above 1970 purchasing power. Instead of providing more service to agricultural exporters, FAS is providing less to an increased number of participants.

(B) Value-added Products.—With increasing emphasis on the relationship of exports to domestic employment, greater attention must be given to the importance of value-added products and processed food exports. The Foreign Agricultural Service has recently completed a draft study with recommendations for development of a program to target export market potential for these products.

(C) Forestry Products.—In 1979, the Foreign Agricultural Service began consultation with the National Forest Products Association (NFPA) in an effort to develop a cooperator program. Wood export in 1980 totalled almost $4.0 million nearly as much as the nation's coal exports. With aggressive marketing, NFPA projects a doubling of these exports in the next 20 years. FAS specialists and Agricultural Attaches are currently initiating plans to assist the wood industry in export marketing.

ZERO BINDING ON SOYBEANS AND CORN GLUTEN

During the Dillion Round of Trade Negotiations in 1961-62, the European Community (EC) agreed to a zero tariff binding on soybeans and soybean meal. Since then, U.S. exports of these products to the EC have grown to $3.6 billion annually. The EC Council of Ministers, concerned over the entrance of Spain into the EC in 1985, has again raised the possibility of a special tax on soybeans and soybean products. (Under the current system, Spanish olive oil will require heavy subsidization to compete with soybean oil.) As in the past, the U.S. strongly opposes such a tax as a violation of the agreement to the zero binding.

Similarly, the last five years have seen a large increase in U.S. exports of feed substitutes to the EC from 15 percent in 1975 to over 30 percent in 1980. Most of the $600-$700 million of such products is corn gluten feed. EC officials, fearing further increases in imports, are discussing schemes for raising duties on feed grain substitutes. These duties are bound at zero to six percent by the General Agreement on Trade and Tariff (GATT). Our competitiveness in the EC is based on more competitive pricing. Currently, corn gluten feed in the U.S. is priced roughly 25 percent above U.S. domestic corn prices, while still registering 20 percent below EC corn prices. Secretary Block and U.S. Trade Representative Brock have taken every opportunity to state U.S. opposition to such changes in EC policy, which would represent further protectionism.

The U.S is presently involved in repealing the GATT decision allowing Spain to tax and restrict domestic use of soybean oil derived from imported soybeans. If the GATT decision is upheld, it will allow the EC to establish a secondary tax as described above. The U.S. will appeal the decision at the GATT council meeting in Fall 1981.

JAPANESE CITRUS AND BEEF IMPORTS

Although Japan has become our leading agricultural export market, quantitative restrictions on imports of certain agricultural products still severely limit our access to those markets. The apparent potential for a much larger market in Japan for U.S. citrus and beef has made the quantitative restrictions on these commodities particularly frustrating. In the Multilateral Trade Negotiations, a good beginning was made toward loosening the restraints. As a result of Japanese concessions during these talks, quotas on beef will increase annually from 16,800 tons in JFY 1978 to 30,800 tons in JFY 1983 and quotas on oranges will increase from 68,000 tons in JFY 1980 to 82,000 tons in JFY 1983. Quotas on orange and grapefruit juice will also gradually increase.

The process of loosening controls, however, has just begun. Agreement was reached with Japan to reinstitute talks on citrus and beef in JFY 1982. The U.S. objective during those talks will be to further expand the permissible levels of exports to Japan. During the U.S.-Japan Agricultural Consultations in December, Secretary Block's visit with Ambassador Okawara in March, Director General Matsuura's visit in May, Deputy Secretary Lyng's visit to Japan in July, and on numerous other occasions involving USTR, State and working level USDA and MAFF officials, the Japanese have been informed of our expectations concerning the planned talks.

EXPORT SUBSIDY UNDER SECTION 32

Sections 32 of Public Law 320 and the CCC Charter Act provides for a separate fund to be established under the discretion of the Secretary of Agriculture to be used to divert surplus agricultural commodities from the domestic market. Specifically, the fund is "to encourage the exportation of agricultural commodities and products thereof by the payment of benefits in connection with the exportation thereof or of indemnities for losses incurred in connection with such exportation . . . ". Other provisions include distribution of surplus to low-income groups and through donation programs. Thus, the law would give the Secretary broad authority to subsidize export sales, as long as no one commodity received more than 25 percent of the funds. Recent trade policy objectives and trade practices have been such that this authority is not in use. Section 32 is primarily used for donation of commodities to low-income groups and school lunch programs. However, escalating use of export subsidization by foreign competitions as noted above increases demand for this type of export marketing tool.

The CHAIRMAN. The question is on the amendment offered by the gentleman for California (Mr. PANETTA).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. OBERSTAR

Mr. OBERSTAR. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. OBERSTAR: Page 86, after line 25, insert the following new section:

CONGRESSIONAL REVIEW OF CERTAIN EXPORT SALES OF COMMODITY CREDIT CORPORATION STOCKS

SEC. 1210. (a) Notwithstanding any other provision of law, no agreement providing for the sale, barter, or exchange of a quantity of commodities owned or controlled by the Commodity Credit Corporation which has a value of more than $5,000,000, which is to be exported, and for which the value to be received is less that 85 percent of the value of such quantity shall be valid—

(1) until the Secretary of Agriculture submits a report to the Speaker of the House of Representatives and the President of the Senate specifying in detail the terms of such agreement; and

(2) unless the Congress does not adopt a concurrent resolution disapproving such agreement before the expiration of 30 days of continuous session of the Congress beginning on the day such report is submitted.

(b) For purposes of subsection (a)(2)—

(1) continuity of session is broken only by an adjournment of the Congress sine die; and

(2) days on which either House is not in session because of an adjournment of more than 3 days to a day certain shall be excluded in computing the 30-day period described in such subsection.

(c) For purposes of subsection (a), the term "value" means the fair market value on the world market.

(d) Subsection (a) shall not apply to any agreement entered into before the date of the enactment of this Act.

Mr. OBERSTAR (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

Mr. OBERSTAR. Mr. Chairman, on August 5, the U.S. Department of Agriculture sold 220 million pounds of Commodity Credit Corporation butter to the New Zealand Dairy Board for $155 million, or about 70 cents a pound. The price on the open market then was $1.05 a pound. The aggregate difference is $77 million on that sale.

The New Zealand agreement is a classic example of a selective trade embargo causing more damage to U.S. farmers than to our adversaries.

My amendment to title XII of H.R. 3603 will give Congress the power to review future agreements of this nature, and, if necessary, veto them.

The amendment would require the Secretary of Agriculture to submit to Congress, for its review, any agreement providing for the sale, barter, or exchange for export of commodities owned or controlled by the CCC which have: First, a value of more than $5 million; and second, for which the value to be received is less than 85 percent of the world market price. Congress would have 30 legislative days to adopt a concurrent resolution disapproving the agreement.

This amendment represents the very essence of the balance of powers concept of our Constitution—and that is the point I am arguing—that Congress should play a role in the international marketing of commodities, because the national interest is at stake.

The New Zealand butter agreement has raised serious concerns among American Dairy farmers and many Members of this House.

Mrs. FENWICK. Mr. Chairman, will the gentleman yield?

Mr. OBERSTAR. I yield to the gentlewoman from New Jersey.

Mrs. FENWICK. Mr. Chairman, I think the amendment sounds extremely sensible.

I wondered about this: What were the reasons by which the CCC decided to sell at 70 cents when the world price was $1.09?

Mr. OBERSTAR. That was the best deal they could work out with the New Zealand Dairy Board. The Russians, United States private exporters, and the Governments of Romania, Ireland, and Poland had made inquiries or put out feelers with the Commodity Credit Corporation to buy that butter at prices significantly higher than 70 cents a pound, but for foreign policy considerations it was decided not to sell to the Russians or other interested parties, but to deal with the New Zealand Dairy Board.

Mrs. FENWICK. Could we have gotten $1.09 from the Russians?

Mr. OBERSTAR. They were prepared to pay the world market price, which was $1.05 at that time.

Mrs. FENWICK. So we took a loss of how many millions of dollars, did the gentlenman say?

Mr. OBERSTAR. It was a loss of some $77 million.

Mrs. FENWICK. Mr. Chairman, I thank the gentleman.

Mr. OBERSTAR. Not only that, but there is a provision in the agreement with the New Zealand Dairy Board that grants the board veto power over any further U.S. butter export sales until July 1982. As if the selective butter embargo against the Soviets wasn't enough, we now have until July, a complete embargo against all butter exports. The gravity of this provision is demonstrated by the fact that three such proposals have already been turned down by the New Zealand Dairy Board.

Now, had this amendment been in effect prior to that agreement, Congress would have had the opportunity to review the sale, to raise questions about the agreement, and then, armed with the facts, make an informed judgment.

Now, before that sale, the Commodity Credit Corporation rejected an offer by a U.S. exporting firm of 87 cents a pound, which would have meant a $37 million loss on our agreement. Other dairy exporting nations expressed interest in purchasing the butter, and for reasons not yet entirely clear, the Department of Agriculture and the CCC chose to negotiate seriously only with New Zealand, they say, because New Zealand has had long experience in marketing these commodities on the world scene.

In arguing for the sale to NZDB, USDA has claimed that selling to New Zealand will assure that U.S. stocks will not disrupt orderly world market trade in butter and cause world prices to fall. But would not a sale to the Soviets provide an even butter assurance of this goal? Mr. Frank Gill, New Zealand Ambassador to the United States has said a direct sale to the Soviets would have been the least disruptive option to the international dairy market.

Secretary of State Alexander Haig rejected a proposal to sell the butter directly to the Soviet Union, saying that would somehow be "sending the wrong signs." What signal did we send the Soviets last Friday when we agreed to sell them up to 15 million tons of grain?

Why is it acceptable for the United States to sell the Soviets grain, industrial and high technology equipment, yet it is unacceptable to sell them butter particularly old, surplus butter?

I am not arguing for or against sales to the Soviets nor does the amendment address that particular sale. This amendment deals with the principle of how such sales may be conducted in the future. The sale of butter to New Zealand sends mixed signals to American farms who now depend on export markets for 40 cents out of every dollar of gross income they receive.

I am not opposed to selling butter from U.S. stocks for export. In fact, I have encouraged USDA's efforts to make such sales since discussion of this issue began.

The sole purpose of my amendment is to give Congress a partnership role in the international trading of CCC stocks—a role which directly affects the livelihood and well-being of American farmers. We must explore every opportunity to reduce our surplus dairy products, including expanded aid programs for milk products, additional credit for sales to selected foreign government agencies, and distribution of the products for humanitarian and social welfare purposes, but in doing so, we must avoid causing financial harm to American farmers.

I believe the administration made a serious mistake in the August 5 sale. The butter should have been sold directly to any customer willing and able to pay the fair market price.

I urge you to support my amendment.

The CHAIRMAN. The time of the gentleman from Minnesota (Mr. OBERSTAR) has expired.

(By unanimous consent, Mr. OBERSTAR was allowed to proceed for 3 additional minutes.)

Mr. DE LA GARZA. Mr. Chairman, will the gentleman yield?

Mr. OBERSTAR. I yield to the gentleman from Texas.

□ 1630

Mr. DE LA GARZA. This issue has been informally discussed in the committee. We have had oversight hearings on the agreement with New Zealand, but the committee has not really devoted, because of the time frame when we were preparing to come to the floor, the time necessary to really evaluate the implications of an amendment such as the gentleman has offered, although it certainly would appear to reflect the intent of many members of the committee.

So in order to expedite proceedings I would tell the gentleman that we would accept the amendment on this side at this time with the understanding that it may be dropped in conference if further study is needed with the assurance that we would come back in the committee, the appropriate subcommittee, for further study, and eventually arrive at something similar to this. But I do not feel that we could commit ourselves at this time in an irreversible manner.

If that would help the gentleman with what he is trying to do, we would be agreeable to that extent.

Mr. OBERSTAR. I think the gentleman has made a very fair proposal. It will establish the principle of congressional review of such commodity agreements in the future, and I am very pleased to have the gentleman's statement.

Mr. CHAIRMAN. The question is on the amendment offered by the gentleman from Minnesota (Mr. OBERSTAR).

The amendment was agreed to.

Mr. DE LA GARZA. Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker pro tempore (Mr. MURTHA) having assumed the Chair, Mr. MCHUGH, Chairman of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 3603) to provide price and income protection for farmers, assure consumers an abundance of food and fiber at reasonable prices, continue food assistance to low-income households, and for other purposes, had come to no resolution thereon.

PROGRESS OF FARM BILL

(Mr. DE LA GARZA asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DE LA GARZA. Mr. Speaker, I would like to mention to my colleagues in the House that we have been on this legislation now for some period of days during October, October 2, October 7, October 14, October 15, October 20, and today.

I would like the cooperation of my colleagues. We do not want to make this legislation the work of the House and of the Committee of the Whole for the rest of this session. I am sure that there are other very important bills that need to be considered.

This is my first venture as chairman with a farm bill, but I do not want to break the existing record for longevity

in time of discussion on legislation. So it would be my hope that at some point when we return to the Committee of the Whole we could assess all of the amendments that are posted in the RECORD and evaluate the time frame, and set a limit on debate in order that we might not invite other amendments that are not posted.

The discussion has been beneficial, but it may be it is sometimes repetitious and only adds to the length of time in which we discuss this legislation. So I would implore Members that when we do arrive at that time that we would consider the fact that we have worked for 6 days on this legislation and that we must proceed with other important legislation. I would hope the Members would be amenable and cooperative to the Chairman when we do ask for some restraint in time.

I do not think that we have cut anyone off. I think everyone has had ample opportunity to discuss all of the issues. Certainly today I think was a good example. I think the debate has been helpful and fruitful.

For one moment we deviated somewhat from the norm and there was some mention of personalities. But from that point, with that exception, we have discused the issues in a bipartisan way. The members of the committee have in no way attempted to limit amendments offered or time for discussion.

But there is a point in time when we must discipline ourselves. I do hope that later today or tomorrow, at what might be the appropriate time, I may ask for the consideration and assistance of the Members when we do make that request.

REAGAN ECONOMIC PROSPERITY EQUALS RECESSION

(Mr. O'NEILL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. O'NEILL. Last week, Mr. Speaker, the President very nonchalantly made reference to the fact that we were in a recession. Today the Government made it official. We are in a recession and it is a real recession.

For months we have been told just the opposite. We have been told that everything was going to be all right, that we were headed for prosperity, for an economic renaissance. The President on August 5 said he had everything that he wanted. He had his rich man's tax cut. He had his budget cuts.

Yes, indeed, now we are facing economic reality. We are in a recession.

For months we have been told we would have huge tax cuts for the rich, huge new defense systems, brutal cuts in social programs, and cruel interest rates, and that we could have all of these things and still reach a balanced budget. We could still have economic prosperity.

Today we have the Reagan nonsense, economic nonsense, which you people voted on, and we have seen what that really is here in America.

It is a shame that it takes the human tragedy of unemployment to show the Reagan economic nonsense for what it is. It is a shame that it takes a period of fewer homes and less housing being built than at any time since 1945 to show the Reagan nonsense for what it is.

Last summer during the heat of this debate, we Democrats presented an alternative program. It called for a fairer tax cut, for a lower deficit. Yes, it would have meant lower interest rates. That Democratic program would have been good for investment and good for the American people. It would have created a lot more jobs and a lot more opportunities than we see today.

Unfortunately, people only really believe what they discover for themselves, and the latest I understand is that the leadership has been talking about more cuts and more hurts.

□ 1640

Does it mean more planned unemployment? Does it mean the same inflation? And does it mean the same huge interest rates?

I think the policies of Mr. Reagan and those at the Whtie House have been wrong. I urge you on the Republican side to do some rethinking and reconstructing, because you are the people in power in the Capital of the United States.

YOU REAP WHAT YOU SOW

(Mr. MICHEL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MICHEL. Mr. Speaker, I have to respond to that, because if a program has been in effect for 21 days, how can you then charge that the country is plunged into a recession when a program has only been in effect 21 days?

I think it is total nonsense on your part to even suggest that. Do you want to spend the next 4 years pointing fingers about the ills of the last 20 years? Or do you want to do something about correcting it? You cannot have increased expenditures, 12 percent, 15 percent, 16 percent, year after year, as we did during the Carter years, and not have that juggernaut of government come up to the point where we are now and expect it to have it all remedied within 21 days. Of course not. What we are reaping today are those seeds we have sown over those disastrous 4 years that we have just concluded.

FOOD AND AGRICULTURE ACT OF 1981

Mr. DE LA GARZA. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill (H.R. 3603) to provide price and income protection for farmers, assure consumers an abundance of food and fiber at reasonable prices, continue food assistance to low-income households, and for other purposes.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Texas (Mr. DE LA GARZA).

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill, H.R. 3603, with Mr. MCHUGH in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. When the committee rose earlier this afternoon, title XII was open to amendment at any point.

Are there any further amendments to title XII?

Mr. BEDELL. Mr. Chairman, I move to strike the last word.

Mr. Chairman, it has come to my attention that in the Senate bill there is a provision at the end of the bill which says, in effect, that it will move the date at which the part that says there will not be State inspection back.

The net result is that it qualifies States to institute State inspection for export grain which have not previously been qualified. And the reason that they were not qualified is that, as we had a great scandal in regard to our grain inspection, there was one State which had been having State inspection and they could not be qualified because all of the people had been under indictment. Under those circumstances, that particular State was not, therefore, certified to conduct State inspections. This was something which did not come up in the consideration of the House bill. The purpose of my taking the floor is to point out to the Members on the floor who might be conferees that this is a section in the bill which at least this gentleman feels would be a terrible disservice for our exports of grain if it were to be left in the bill.

Mr. SMITH of Iowa. Mr. Chairman, will the gentleman yield?

Mr. BEDELL. I yield to my fellow Iowan.

Mr. SMITH of Iowa. Mr. Chairman, I commend the gentleman for bringing this up, because I thought it ought to come up sometime before we conclude the bill.

We are talking about the State of Louisiana, where they had to close

down the State inspection service about 1976 or 1975 because so many of their people who worked there were under indictment or imprisoned that they could not operate the service. It is just unbelievable that the other body would put in an amendment that would propose to let them now establish a new inspection service in that State. At the time they had these indictments that involved short-weighing and misgrading at Baton Rouge. I have been to that plant. I have been all through the plant. It is a fine plant. But this is no time to discourage other people from thinking that we have decent grain in this country.

We just saw just last week the Secretary of Agriculture is over in China, and China is complaining about foreign material in the grain that they are getting now.

We need to have more confidence in our grain and not less, and it would just be unconscionable to come back from conference with this provision that is in the Senate bill.

Mr. BEDELL. I would just urge the chairman and the minority leader on the committee, when this comes up in conference, to be certain that they look at the importance of our having adequate grain inspection. It was a great scandal, as I am sure many of the Members on the floor will recall, and I would hope that we would not let this slip through without proper consideration in the conference committee.

Mr. ASHBROOK. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I will not take 5 minutes. In the spirit of what our chairman said a few moments ago, I think we will try to expedite this bill. But I merely want to point out to my colleagues from that side of the aisle that when this Committee rises for the sole purpose of the Speaker to make what I would happen to think is a very political statement which could have opened up a debate which could have gone on and on, it ill-behooves my friends on the other side of the aisle to say we are going to expedite this bill. I merely state that as what one Member thinks. If we are going to play that kind of a game, many of us can do it.

The CHAIRMAN. Are there additional amendments to title XII? If not, the Clerk will designate title XIII.

Title XIII reads as follows:

TITLE XIII—FOOD STAMP AND COMMODITY DISTRIBUTION AMENDMENTS OF 1981

SEC. 1301. This subtitle may be cited as the "Food Stamp and Commodity Distribution Amendments of 1981".

HOUSEHOLD DEFINITION

SEC. 1302. Section 3(i) of the Food Stamp Act of 1977 is amended by—

(1) inserting before the period at the end of the first sentence "; except that parents and children who live together shall be treated as a group of individuals who customarily purchase and prepare meals together for home consumption even if they do not do so, unless one of the parents is 60 years of age or older";

(2) striking out "live together" in paragraph (2) and inserting in lieu thereof "live as one economic unit"; and

(3) striking out "neither" in the second sentence and inserting "no" in lieu thereof.

BOARDERS

SEC. 1303. Section 3(i) of the Food Stamp Act of 1977 is amended by—

(1) striking out in clause (1) of the first sentence "or else pays compensation to the others for such meals,";

(2) striking out everything in the first sentence after "consumption" in clause (2) and inserting a period in lieu thereof; and

(3) adding before the period at the end of the second sentence ", or else live with others and pay compensation to the others for meals".

RETAIL FOOD STORES

SEC. 1304. (a) Section 3(k) of the Food Stamp Act of 1977 is amended by—

(1) revising clause (1) to read as follows: "(1) an establishment or house-to-house trade route whose gross sales volume consists of more than 50 per centum eligible food items and in which over 50 per centum of eligible food sales volume consists of staple food items, such as meat, poultry, fish, bread, cereals, vegetables, fruits, dairy products, and the like, but not including accessory food items, such as coffee, tea, cocoa, carbonated and uncarbonated drinks, candy, condiments, spices, snack foods such as potato chips, pretzels, and popcorn, and dessert items such as cakes, pies, cookies, and pastries";

(2) redesignating clauses (2), (3), and (4) as clauses (4), (5), and (6) respectively; and

(3) inserting after clause (1) new clauses (2) and (3) to read as follows: "(2) an establishment which contains a clearly identifiable grocery department with a full line of grocery items and in which over 50 per centum of eligible food sales volume consists of staple food items, (3) an establishment which sells staple food items and is the only source for households to obtain such staple food items in an immediate area, and which meets such other criteria as the Secretary may prescribe,";

(b) Section 9(a) of the Food Stamp Act of 1977 is amended by—

(1) striking out "(1) the nature and extent of the food business conducted by the applicant;" and inserting in lieu thereof "(1) whether the applicant meets the definition in section 3(k) of this Act of a retail food store; and";

(2) striking out clause (2); and

(3) redesignating clause (3) as (2).

ALASKA'S THRIFTY FOOD PLAN

SEC. 1305. Section 3(o) of the Food Stamp Act of 1977 is amended by revising clause (2) to read as follows: "(2) make cost adjustments in the thrifty food plan for Hawaii and the urban and rural parts of Alaska to reflect the cost of food in Hawaii and urban and rural Alaska,".

ADJUSTMENT OF THE THRIFTY FOOD PLAN

SEC. 1306. Section 3(o) of the Food Stamp Act of 1977 is amended by—

(1) striking out "through January 1, 1980,", "and July 1", "and March 31, respectively" in clause (4);

(2) striking out "six" and inserting in lieu thereof "twelve" in clause (4); and

(3) striking out clauses (5) and (6), and inserting a period in lieu of the colon at the end of clause (4).

GROSS INCOME ELIGIBILITY STANDARD

SEC. 1307. (a) Section 5 of the Food Stamp Act of 1977 is amended by—

(1) striking out "subsections (c) and (e)" from subsection (b) and inserting in lieu thereof "subsection (c)";

(2) inserting in subsection (c) "130 percent of" after "standards of eligibility shall be"; and

(3) striking out from the first sentence of subsection (e) "In" and inserting in lieu thereof "Further, in", and inserting "for purposes of determining the household's benefit level only" after "household income".

(b) Section 8(a) of the Food Stamp Act of 1977 is amended by inserting "(d) and (e)" after "Section 5" in the first sentence.

(c) Section 17 of the Food Stamp Act of 1977 is amended by striking out subsections (d) and (e).

REDUCTION IN DEDUCTION ADJUSTMENT

SEC. 1308. Section 5(e) of the Food Stamp Act of 1977 is amended by—

(1) in the second sentence, striking out everything after "January 1, 1982" and inserting in lieu thereof: "and every January 1 thereafter, shall be adjusted to the nearest $5 to reflect changes in the Consumer Price Index for all urban consumers of the Bureau of Labor Statistics for items other than food (exclusive of the home ownership portion of the shelter component of housing costs), for the twelve months ending the preceding September 30."; and

(2) in the fourth sentence, striking out everything after "January 1, 1982" through the end of clause (2), and inserting in lieu thereof: "and every January 1 thereafter, adjusted to the nearest $5 to reflect changes in the shelter (exclusive of the home ownership portion), fuel, and utilities components of housing costs in the Consumer Price Index for all urban consumers of the Bureau of Labor Statistics for the twelve months ending the preceding September 30, or".

DISALLOWANCE OF DEDUCTIONS FOR EXPENSES PAID BY VENDOR PAYMENTS; ATTRIBUTION OF INCOME AND RESOURCES TO SPONSORED ALIENS

SEC. 1309. (a) Section 5(e) of the Food Stamp Act of 1977 is amended by adding in the fourth and fifth sentences after "entitled" the following: ", with respect to expenses other than expenses paid on behalf of the household by a third party,".

(b) Section 5 of the Food Stamp Act of 1977 is amended by adding a new subsection 5(i) to read:

"(i)(1) For purposes of determining eligibility for and the amount of benefits under this Act for an individual who is an alien as described in subsection 6(f)(2)(B) of this Act, the income and resources of any person who as a sponsor of such individual's entry into the United States executed an affidavit of support or similar agreement with respect to such individual, and the income and resources of the sponsor's spouse if such spouse is living with the sponsor, shall be deemed to be the income and resources of such individual for a period of three years after the individual's entry into the United States. Any such income deemed to be income of such individual shall be treated as unearned income of such individual.

"(2)(A) The amount of income of a sponsor, and the sponsor's spouse if living with the sponsor, which shall be deemed to be the unearned income of an alien for any year shall be determined as follows:

"(i) the total yearly rate of earned and unearned income of such sponsor, and such sponsor's spouse if such spouse is living with the sponsor, shall be determined for such year under rules prescribed by the Secretary;

"(ii) the amount determined under subparagraph (i) shall be reduced by an amount equal to the income eligibility standard as determined under subsection 5(c) of this Act for a household equal in size to the sponsor, the sponsor's spouse if living with the sponsor, and any persons dependent upon or receiving support from the sponsor or the sponsor's spouse if the spouse is living with the sponsor;

"(iii) the monthly income attributed to such alien shall be one-twelfth of the amount calculated under subparagraph (ii).

"(B) The amount of resources of a sponsor, and the sponsor's spouse if living with the sponsor, which shall be deemed to be the resources of an alien for any year shall be determined as follows:

"(i) the total amount of the resources of such sponsor and such sponsor's spouse if such spouse is living with the sponsor shall be determined under rules prescribed by the Secretary:

"(ii) the amount determined under subparagraph (i) shall be reduced by $1,500;

"(iii) the resources determined under subparagraph (ii) shall be deemed to be resources of such alien in addition to any resources of such alien.

"(C)(i) Any individual who is an alien shall, during the period of three years after entry into the United States, in order to be an eligible individual or eligible spouse for purposes of the Act, be required to provide to the State agency such information and documentation with respect to his sponsor's spouse as may be necessary in order for the State agency to make any determination required under this section, and to obtain any cooperation from such sponsor necessary for any such determination. Such alien shall also be required to provide such information and documentation which such alien or the sponsor provided in support of such alien's immigration application as the State agency may request.

"(ii) The Secretary shall enter into agreements with the Secretary of State and the Attorney General whereby any information available to such persons and required in order to make any determination under this section will be provided by such persons to the Secretary, and whereby such persons shall inform any sponsor of an alien, at the time such sponsor executes an affidavit of support or similar agreement, of the requirements imposed by this section.

"(D) Any sponsor of an alien, and such alien, shall be jointly and severably liable for an amount equal to any overpayment made to such alien during the period of three years after such alien's entry into the United States, on account of such sponsor's failure to prove correct information under the provisions of this section, except where such sponsor was without fault, or where good cause for such failure existed. Any such overpayment which is not repaid shall be recovered in accordance with the provisions of subsection 13(a)(2) of this Act.

"(E) The provisions of this subsection shall not apply with respect to any alien who is a member of the sponsor's household, as defined in subsection 3(i) of this Act.".

REPEAL OF INCREASES IN DEPENDENT CARE DEDUCTIONS FOR WORKING ADULTS AND MEDICAL DEDUCTIONS FOR THE ELDERLY AND DISABLED

SEC. 1310. Sections 104 and 105 of Public Law 96-249 are repealed.

RETROSPECTIVE ACCOUNTING

SEC. 1311. (a) Section 5(f) of the Food Stamp Act of 1977 is amended to read:

"(f)(1)(A) Household income for those households that, by contract for other than an hourly or piecework basis or by self-employment, derive their annual income in a period of time shorter than one year, shall be calculated by averaging such income over a twelve-month period.

"(B) Household income for those households that receive nonexcluded income of the type described in subsection (d)(3) of this section, shall be calculated by averaging such income over the period for which it is received.

"(2)(A) Household income for migrant farmworker households shall be calculated on a prospective basis, as provided in paragraph (3)(A).

"(B) Household income for all other households shall be calculated either on a prospective basis as provided in paragraph (3)(A) or on a retrospective basis as provided in paragraph (3)(B), as elected by the State agency under regulations prescribed by the Secretary.

"(3)(A) Calculation of household income on a prospective basis is the calculation of income on the basis of the income reasonably anticipated to be received by the household during the period for which eligibility or benefits are being determined. Such calculation shall be made in accordance with regulations prescribed by the Secretary which shall provide for taking into account both the income reasonably anticipated to be received by the household during the period for which eligibility or benefits are being determined and the income received by the household during the preceding thirty days.

"(B) Calculation of household income on a retrospective basis is the calculation of income for the period for which eligibility or benefits are being determined on the basis of income received in a previous period. Such calculation shall be made in accordance with regulations prescribed by the Secretary which shall provide for the determination of eligibility on a prospective basis for the month of application and subsequent months as specified by the Secretary for newly applying households (other than households reapplying within thirty days after the end of a prior certification period) and other classes of households for which this method of income calculation either serves no useful purpose or could result in the provision of unnecessary benefits and for providing supplemental benefits to households which experience a significant change in household circumstances, including a loss of income of $50 per month or the addition of a new member.

"(4) In promulgating regulations under this subsection, the Secretary shall consult with the Secretary of Health and Human Services in order to assure that, to the extent feasible and consistent with the purposes of this Act and the Social Security Act, the income of households receiving benefits under this Act and title IV-A of the Social Security Act, is calculated on a comparable basis under the two Acts. The Secretary is authorized, upon the request of a State agency, to waive any of the provisions of this subsection with respect to applicants for or recipients of aid to families with dependent children under part A of title IV of the Social Security Act to the extent necessary to permit the State agency to calculate income for purposes of this Act on the same basis that income is calculated under that Act in that State.".

(b) Effective October 1, 1983, paragraph (2)(B) of section 5(f) of the Food Stamp Act of 1977, as amended by subsection (a), is amended to read:

"(B) Household income for all other households shall be calculated on a retrospective basis as provided in paragraph (3)(B).".

PERIODIC REPORTING

SEC. 1312. (a) Section 3(c) of the Food Stamp Act of 1977 is amended by inserting before the period at the end of the second sentence "except that the limit of twelve months may be waived by the Secretary to improve the administration of the program".

(b) Section 6(c) of the Food Stamp Act of 1977 is amended by—

(1) inserting after "households" in the first sentence of paragraph (1) ", including all households with earned income, except migrant farmworker households; all households including individuals receiving unemployment compensation benefits and individuals required by section 6(d) of this Act to register for work, and all households required to file a similar report under title IV-A of the Social Security Act, but excluding households in which all members are either elderly or are disabled or blind recipients of supplemental security income benefits or disability insurance benefits under title II or XVI of the Social Security Act,";

(2) striking out "5(f)(2)" in paragraph (1) and inserting "5(f)" in lieu thereof;

(3) inserting after paragraph (3) the following new paragraph:

"(4) Any household which fails to submit periodic reports required by paragraph (1) shall not receive an allotment for the payment period to which the unsubmitted report applies until such report is submitted."; and

(4) inserting after "State agencies" in the first sentence of paragraph (1) "other than those qualifying for an increased share of administrative costs pursuant to section 16(c)(2) of this Act".

(c) Effective October 1, 1983, section 6(c)(1) of the Food Stamp Act of 1977 is further amended by—

(1) striking out in the first sentence "elect to"; and

(2) striking out the second sentence.

RESOURCES

SEC. 1313. Section 5(g) of the Food Stamp Act of 1977 is amended by inserting "(other than those relating to licensed vehicles)" after "June 1, 1977" in the second sentence.

ELIGIBILITY DISQUALIFICATIONS AND CLAIMS COLLECTIONS

SEC. 1314. (a) Section 6(b) of the Food Stamp Act of 1977 is amended to read as follows:

"(b) No individual who is a member of a household which is otherwise eligible to participate in the food stamp program shall be eligible to participate in the program for (1) a period of three months after the date on which such individual has been found by a State agency, after notice and opportunity for hearing at the State level, or after failure to appeal a local hearing to the State level, to have intentionally made a false or misleading statement or misrepresented, concealed, or withheld facts for the purpose

of using, presenting, transferring, acquiring, receiving, or possessing coupons or authorizations cards in violation of this Act or the regulations issued thereunder, or to have fraudulently used, presented, transferred, acquired, received, possessed, or altered coupons or authorization cards; or (2) a period of not less than six and not more than twenty-four months, as determined by the court, after such individual has been found by a court of appropriate jurisdiction, with a State or a political subdivision thereof or the United States as prosecutor or plaintiff, to have committed criminal or civil fraud in the use, presentation, transfer, acquisition, receipt, possession, or alteration of coupons or authorization cards; or (3) both of the periods specified in clauses (1) and (2) of this subsection. Each State agency shall proceed against an individual alleged to have engaged in such activity either by way of administrative hearings in accordance with clause (1) of this subsection, or by referring such matters to appropriate legal authorities for civil or criminal action in accordance with clause (2) of this subsection, or both. Each period of ineligibility shall take effect immediately upon the relevant administrative or judicial finding and shall remain in effect, without possibility of administrative stay, unless and until the finding on which the ineligibility is based is subsequently reversed by a court of appropriate jurisdiction, but in no event shall the period of ineligibility be subject to judicial review."

(b)(1) Section 13 of the Food Stamp Act of 1977 is amended by redesignating current section 13 as subsection (b) and inserting before it the following new subsection:

"SEC. 13. (a)(1) In the case of any ineligibility determination under section 6(b), the household of which such ineligibility individual is a member shall elect to (A) accept a reduction in the allotment of the household of which such individual is a member, or (B) pay in cash, in accordance with a schedule determined by the Secretary, an amount that will be sufficient to reimburse the Federal Government for any over-issuance of coupons resulting from the conduct that was the basis of the finding of ineligibility. If a household refuses to make an election, or elects to make a payment in cash under the provisions of the preceding sentence and fails to do so, the household shall be subject to an allotment reduction.

"(2) Any claim against a household arising from the over-issuance of coupons, other than claims the collection of which is provided for in paragraph (1) and claims arising from an error of the State agency, may be collected by reducing the monthly allotments of the household, but only in such cases and in such amounts as reasonable considering the income and resources of the household, as determined under regulations prescribed by the Secretary.".

(b)(2) The heading of section 13 of that Act is amended to read "COLLECTION AND DISPOSITION OF CLAIMS".

(c) Section 16(a) of the Food Stamp Act of 1977 is amended by—

(1) striking out everything in the first sentence after "recovered or collected" and inserting in lieu thereof "pursuant to section 13(a)(1).''; and

(2) inserting in the second sentence after "determinations of" the word "ineligibility" in lieu of "fraud".

WORK REQUIREMENTS

SEC. 1315. Section 6(d) of the Food Stamp Act of 1977 is amended by—

(1) striking out ", unless the household was certified for benefits under this Act immediately prior to such unemployment" in clause (iii) of paragraph (1); and

(2) inserting "(including the lack of adequate child care for children above the age of six and under the age of twelve)" after "good cause" in clause (iv) of paragraph (1); and

(3) inserting before the semicolon at the end of clause (A) of paragraph (2) ", in which case, failure by such person to comply with any work requirement to which such person is subject that is comparable to a requirement of paragraph (1) shall be the same as failure to comply with that requirement of paragraph (1)"; and

(4) striking out "twelve" and inserting in lieu thereof "six" in paragraph (2)(B).

ANNUALIZATION OF WORK REGISTRATION

SEC. 1316. Section 6(D)(4) of the Food Stamp Act of 1977 is amended by striking out "six" and inserting in lieu thereof "twelve".

STRIKERS

SEC. 1317. (a) Section 6(d)(4) of the Food Stamp Act of 1977 is amended—

(1) in the first proviso by inserting ", but in no case shall a household receive increased benefits under this Act as a result of a member's going on strike" before the colon, and

(2) by striking out the last proviso.

(b) Section 6 of the Food Stamp Act of 1977 is amended by striking out subsection (i).

STATE ISSUANCE LIABILITY

SEC. 1318. Section 7(f) of the Food Stamp Act of 1977 is amended to read as follows:

"(f) Notwithstanding any other provision of this Act, the State agency shall be strictly liable to the Secretary for any financial losses involved in the acceptance, storage and issuance of coupons, except that in the case of losses resulting from the issuance and replacement of authorizations for coupons and allotments which are sent through the mail, the State agency shall be liable to the Secretary to the extent prescribed in the regulations promulgated by the Secretary.".

PRORATING ALLOTMENTS

SEC. 1319. Section 8 of the Food Stamp Act of 1977 is amended by adding at the end thereof the following new subsection:

"(c) The value of the allotment issued to any eligible household for the initial month or other period for which an allotment is issued to such household shall, rounded to the nearest $1, be a value which bears the same ratio to the value of the allotment for a full month or other period for which the allotment is issued as the number of days (from the date of the application) remaining in the month or other period for which the allotment is issued bears to the total number of days in the month or other period for which the allotment is issued. As used in this subsection, the term 'initial month' means (1) the first month for which an allotment is issued to a household, and (2) the first month for which an allotment is issued to a household following any period of more than thirty days during which such household was not participating in the food stamp program under this Act after a previous participation in such program.".

SIXTY-DAY TRANSFER OF CERTIFICATION

SEC. 1320. Section 11 of the Food Stamp Act or 1977 is amended by striking out subsection (b) and redesignating subsections (c) through (l) as subsections (b) through (k), respectively.

OUTREACH

SEC. 1321. Section 11(d) of the Food Stamp Act of 1977 is amended by—

(1) revising clause (1)(A) to read as follows: "(A) inform applicants and participants of their rights and responsibilities under this Act and program regulations;"; and

(2) striking out clause (B), striking out "and (C)", and inserting "and (B)" in lieu thereof.

RECERTIFICATION NOTICE

SEC. 1322. Section 11(d)(4) of the Food Stamp Act of 1977 is amended by—

(1) striking out "immediately prior to or at" and inserting in lieu thereof "prior to";

(2) inserting after "new certification period" the first time that it appears, ": *Provided*, That such notice shall be provided no earlier than thirty days prior to the start of the last month of the certification period if the certification period is six months or longer;"; and

(3) striking out "it" after "advising" and inserting in lieu thereof "the household".

EXPEDITED SERVICE

SEC. 1323. Section 11(d)(9) of the Food Stamp Act of 1977 is amended by striking "in immediate need because of no income as defined in sections 5 (d) and (e) of this Act" and inserting in lieu thereof "(A) whose income as defined in section 5(d) of this Act does not exceed $150 per month or that are destitute since they have not received income for the month of application in the political subdivision in which such application is filed other than from a new source not in excess of $25 a month until at least 10 days after the date of application as defined in paragraph (2) of this subsection and (B) whose liquid assets as defined pursuant to section 5(g) of this Act do not exceed $100".

RESTORATION OF LOST BENEFITS

SEC. 1324. (a) Section 11(d)(11) of the Food Stamp Act of 1977 is amended to read as follows:

"(11) upon receipt of a request from a household, for the prompt restoration in the form of coupons to a household of any allotment or portion thereof which has been wrongfully denied or terminated, except that allotments shall not be restored for any period of time more than one year prior to the date the State agency receives a request for such restoration from a household or the State agency discovers in the normal course of business that a loss to a specific household has occurred and notifies the household of its lost benefits;".

(b) Section 14 of the Food Stamp Act of 1977 is redesignated as section 14(a), and a new section 14(b) is added to read as follows:

"(b) In any judicial action arising under this Act any food stamp allotments found to have been wrongfully withheld shall be restored only for periods of not more than one year prior to the date of the commencement of such action, or in the case of an action seeking review of a final State agency determination, not more than one year prior to the date specified under section 11(d)(11) of this Act, or, if that section does not apply, of the filing of a request with the State for the restoration of such allotments.".

INFORMATION

SEC. 1325. (a) Section 11(d) of the Food Stamp Act of 1977 is amended by—

(1) in paragraph (19) striking out the period at the end thereof and inserting in lieu thereof "; and"; and

(2) adding at the end thereof the following new paragraph:

"(20) that information available from the Social Security Administration under the provisions of section 6103(i)(7) of the Internal Revenue Code of 1954, and information available from agencies administering State unemployment compensation laws under the provisions of section 303(d) of the Social Security Act, shall be requested and utilized by the State agency (described in section 3(n)(1) of this Act) to the extent permitted under the provisions of such sections, except that the State agency shall not be required to request such information from the Social Security Administration if such information is available from the agency administering the State unemployment compensation laws.".

NUTRITION EDUCATION PROGRAM

SEC. 1326. Section 11(e) of the Food Stamp Act of 1977 is amended to read as follows:

"(e) To encourage the purchase of nutritious foods, the Secretary is authorized to extend food and nutrition education to reach food stamp program participants, using the methods and techniques developed in the expanded food and nutrition education and other programs.".

ALASKAN FEE AGENTS

SEC. 1327. Section 11 of the Food Stamp Act of 1977 is amended by adding thereto the following new subsection:

"(o) The Secretary shall provide for the use of fee agents in rural Alaska. As used in this subsection 'fee agent' means a paid agent who, although not a State employee, is authorized by the State to make applications available to low-income households, assist in the completion of applications, conduct required interviews, secure required verification, forward completed applications and supporting documentation to the State agency, and provide outreach and other services as required by the State agency. Such services shall not include making final decisions on household eligibility or benefit levels.".

USE OF CERTIFIED MAIL

SEC. 1328. Section 11 of the Food Stamp Act of 1977 is amended by adding thereto the following new subsection:

"(m) The Secretary shall permit a State agency to issue coupons by means of certified mail with the Secretary paying each State agency that issues coupons by certified mail 75 per centum of the costs of such mail.".

DISPOSITION OF CLAIMS

SEC. 1329. Section 13(b) of the Food Stamp Act of 1977 is amended by—

(1) inserting before the period at the end of the first sentence ", including the power to waive claims if the Secretary determines that to do so would serve the purposes of this Act"; and

(2) adding the following new sentence at the end thereof: "The Secretary shall have the power to reduce amounts otherwise due to a State agency under section 16 of this Act to collect unpaid claims assessed against the State agency if the State agency has declined or exhausted its appeal rights under section 14.".

STAFFING

SEC. 1330. Section 16(b)(1) of the Food Stamp Act of 1977 is amended by striking out ", including, but not limited to, staffing standards such as caseload per certification worker limitations,".

INCENTIVES FOR ERROR REDUCTION EFFORTS AND CORRECTIVE ACTION PLANS

SEC. 1331. Section 16 of the Food Stamp Act of 1977 is amended by—

(1) inserting before the period at the end of the first sentence of subsection (c) the following: ", and, effective October 1, 1981, which also meets the standard contained in paragraph (1)(B) of this subsection"; and

(2) in subsection (d), striking out "October 1, 1978" and inserting in lieu thereof "October 1, 1981", and by inserting "(2)" after "subsection (c)".

SOCIAL SECURITY ACCOUNT NUMBERS

SEC. 1332. The first sentence of section 16(f) of the Food Stamp Act of 1977 is amended by striking out "may" and inserting in lieu thereof "shall".

EXTENDING AND AMENDING CASH-OUT PILOT PROJECTS

SEC. 1333. Section 17(b)(1) of the Food Stamp Act of 1977 is amended by—

(1) inserting "or the average value of allotments by household size" after "allotments" in the first sentence;

(2) striking out "either";

(3) inserting "any of whose members are" after "over or";

(4) inserting "or to aid to families with dependent children under part A of title IV of the Social Security Act" after "Social Security Act";

(5) inserting ", other than any project involving the payment of the average value of allotments by household size in the form of cash to eligible households," after "no project"; and

(6) striking out "1981" and inserting "1985" in lieu thereof.

NUTRITIONAL MONITORING

SEC. 1334. Section 17(c) of the Food Stamp Act of 1977 is amended by adding at the end thereof the following: "The Secretary shall, by way of making contracts with or grants to public or private organizations or agencies, implement pilot programs and in locations selected to provide a representative geographic and demographic cross-section of political subdivisions reflecting natural usage patterns of health and nutritional services which contain high proportions of low income people that will test various means of measuring on a continuing basis the nutritional status of low income people in such subdivisions, with special emphasis on people who are eligible for food stamps, in order to develop minimum common criteria and methods for systematic nutrition monitoring that could be applied on a nationwide basis. The Secretary shall report on the progress of these projects on an annual basis commencing on July 1, 1982, to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate, together with such recommendations as the Secretary deems appropriate.".

STUDY OF RETROSPECTIVE ACCOUNTING AND PERIODIC REPORTING

SEC. 1335. Section 17 of the Food Stamp Act of 1977 is amended by adding at the end thereof the following new subsection:

"(d) The Secretary shall study the effects of retrospective accounting and periodic income reporting in the food stamp program, including the impact on benefit and administrative costs and on error rates, and the degree to which eligible households are denied food stamp benefits for failure to file periodic reports. The Secretary shall also conduct pilot projects in which periodic income reporting is conducted in conjunction with prospective income accounting. The Secretary shall issue an interim report to the Congress on the results of these studies by March 1, 1983, and a final report on March 1, 1985.".

FOOD STAMP FUNDING AND PROGRAM EXTENSION

SEC. 1336. Section 18(a) of the Food Stamp Act of 1977 is amended in the first sentence thereof by—

(1) striking out "and" after "September 30, 1980";

(2) striking out $9,739,276,000" and inserting in lieu thereof $11,480,000,000"; and

(3) inserting before the period at the end thereof the following: "; not in excess of $10,010,000,000 for the fiscal year ending September 30, 1982; not in excess of $10,345,000,000 for the fiscal year ending September 30, 1983; not in excess of $10,290,000,000 for the fiscal year ending September 30, 1984; and not in excess of $10,480,000,000 for the fiscal year ending September 30, 1985".

INCENTIVES, SANCTIONS, AND CLAIMS

SEC. 1337. Section 18 of the Food Stamp Act of 1977 is amended by adding a new subsection (e) to read as follows:

"(e) Funds collected from claims against households or State agencies, including claims collected pursuant to sections 7(f), 11(g), and 16(g) of this Act, claims resulting from resolution of audit findings, and claims collected from households receiving overissuances, shall be credited to the food stamp program appropriation account for the fiscal year in which the collection occurs. Funds provided to State agencies under section 16(c) of this Act shall be paid from the appropriation account for the fiscal year in which the funds are provided.".

WORKFARE

SEC. 1338. The Food Stamp Act of 1977 is amended by adding at the end thereof the following new section:

"WORKFARE

"SEC. 19. The Secretary shall permit any political subdivision in any State that applies and submits a plan to the Secretary in compliance with guidelines promulgated by the Secretary to operate and administer a workfare program pursuant to which every person who is a member of a household participating in the food stamp program who is not exempt by virtue of the provisions of this subsection shall accept an offer from such subdivision to perform work on its behalf, or may seek an offer to perform work, in return for compensation consisting of the allotment to which the household is entitled pursuant to section 8(a) of this Act, with each hour of such work entitling the household to which the person belongs to a portion of its allotment equal in value to 100 per centum of the higher of the applicable State minimum wage or the Federal minimum hourly rate under the Fair Labor Standards Act of 1938, as amended (29 U.S.C 206(a)(1)). Such work shall not be required to the extent that it exceeds in value the allotment to which the household is otherwise entitled or that it either exceeds twenty hours a week or would, together with any other hours worked in any other compensated capacity by such person on a regular or predictable part-time basis, exceed thirty hours a week. A political subdivision operating a workfare program may allow a job search period, prior to making workfare assignments, of up to thirty days following a determination of eligibility. Such work shall not include any that has the effect of replacing or preventing the em-

ployment of an individual not participating in the workfare program or that does not provide the same benefits and working conditions that are provided by the political subdivision to employees performing comparable work for comparable hours. In the event that any person fails to comply with the requirements of this section, neither that person nor the household to which that person belongs shall be eligible to participate in the food stamp program for two months, unless that person or another person in the household satisfies all outstanding workfare obligations prior to the end of the two month disqualification period. The Secretary shall pay each political subdivision operating a workfare program 50 per centum of all administrative costs including reimbursements to participants for work-related expenses involved in such operation. The Secretary may suspend or cancel some or all of these payments, or may withdraw approval from a political subdivision to operate a workfare program, upon a finding that the subdivision has failed to comply with the workfare requirements. The persons who shall be exempt from workfare requirements are persons who are either (A) mentally or physically unfit; (B) under eighteen years of age; (C) sixty years of age or over; (D) subject to and currently involved for at least twenty hours a week in a work training program under a work registration requirement pursuant to title IV of the Social Security Act, as amended (32 U.S.C. 602); (E) a parent or other member of a household with responsibility for the care of a child under age six or of an incapacitated person; (F) a parent or other caretaker of a child in a household where there is another person who is subject to the requirements of this subsection or is employed full-time; (G) a regular participant in a drug addiction or alcoholic treatment and rehabilitation program, or (H) an individual described in sections 6(d)(2)(D) or (F) of this Act. Political subdivisions operating workfare programs shall reimburse participants for actual costs of transportation, and other actual costs reasonably necessary and directly related to participation in the program not to exceed $25 in the aggregate per month.

EXTENSION OF AUTHORITIES, PENALTIES FOR FRAUD, AND MISCELLANEOUS PROVISIONS

SEC. 1339. (a) Effective October 1, 1981, section 4 of the Agriculture Consumer and Protection Act of 1973 is amended by—

(1) striking out "1978, 1979, 1980, and 1981", in the first sentence of subsection (a) and inserting in lieu thereof: "1982, 1983, 1984, and 1985"; and

(2) adding a new subsection (c) to read as follows:

"(c) Whoever embezzles, willfully misapplies, steals or obtains by fraud any agricultural commodity or its products (or any funds, assets, or property deriving from donation of such commodities) provided under this section, or under section 416 of the Agricultural Act of 1949 (7 U.S.C. 1431), section 32 of the Act of August 24, 1935 (7 U.S.C. 612c), or section 709 of the Food and Agriculture Act of 1965 (7 U.S.C. 1446a-1), whether received directly or indirectly from the United States Department of Agriculture, or whoever receives, conceals or retains such commodities, products, funds, assets, or property for personal use or gain, knowing such commodities, products, funds, assets, or property have been embezzled, willfully misapplied, stolen, or obtained by fraud shall, if such commodities, products, funds, assets, or property are of a value of $100 or more, be fined not more than $10,000 or imprisoned not more than five years, or both, or if such commodities, products, funds, assets, or property are of value of less than $100, shall be fined not more than $1,000 or imprisoned for not more than one year, or both."

COMMODITY SUPPLEMENTAL FOOD PROGRAM—PILOT PROJECTS FOR THE ELDERLY AND ADMINISTRATIVE COSTS

SEC. 1340. Effective October 1, 1981, section 5(a) of the Agriculture and Consumer Protection Act of 1973 is amended to read as follows:

"(a) In carrying out the supplemental feeding program (hereinafter referred to as the 'commodity supplemental food program') under section 4 of this Act, the Secretary shall (1) institute two pilot projects directed at low-income elderly persons, including, where feasible, distribution of commodities to such persons in their homes, and (2) provide to the State agencies administering such program, for each of the fiscal years 1982 through 1985, funds appropriated from the general fund of the Treasury in amounts equal to the administrative costs of State and local agencies in operating the program, except that the funds provided to State agencies each fiscal year may not exceed 15 per centum of the amount appropriated for the provision of commodities to State agencies.".

EFFECTIVE DATE

SEC. 1341. Except as otherwise specifically provided, these amendments shall be effective upon such dates as the Secretary may prescribe, taking into account the need for orderly implementation of these provisions.

FOOD STAMP CASH-OUT OF SSI RECIPIENTS

SEC. 1342. Effective July 1, 1981, section 8(d) of Public Law 93-233 is amended to read as follows:

"(d) Upon the request of a State, the Secretary shall find for purposes of the provisions specified in subsection (c), that the level of such State's supplementary payments of the type described in 1616(a) of the Social Security Act has been specifically increased for any month after June 1976 so as to include the bonus value of food stamps if: (1) the Secretary has found that such State's supplementary payments in June 1976 were increased to include the bonus value of food stamps; and (2) recipients of supplementary payments in such State were ineligible for food stamps for the month of December 1980; and (3) such State continues to meet the requirements of section 1618 of such Act for each month after June 1977 and up to and including the month for which the Secretary is making the determination.".

The CHAIRMAN. Are there amendments to title XIII?

AMENDMENT OFFERED BY MR. COLEMAN

Mr. COLEMAN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. COLEMAN: Page 89, after line 23, insert the following new section (and redesignate succeeding sections accordingly):

ADJUSTMENT OF THE THRIFTY FOOD PLAN

SEC. 1306. Section 3(o) of the Food Stamp Act of 1977 is amended by striking out clause (6) and all that follows through the end of clause (9), and inserting in lieu thereof the following: "(6) on October 1, 1982, adjust the cost of such diet to the nearest dollar increment to reflect changes in the cost of the thrifty food plan for the twenty-one months ending the preceding June 30, 1982, and (7) on October 1, 1983, and each October 1 thereafter, adjust the cost of such diet to the nearest dollar increment to reflect changes in the cost of the thrifty food plan for the twelve months ending the preceding June 30".

(Food stamp funding and program extension.)

Page 114, line 7, insert "and" at the end thereof.

Page 114, strike out line 8 and all that follows through line 17, and insert in lieu thereof the following:

(2) inserting before the period at the end thereof the following: "; not in excess of $11,300,000,000 for the fiscal year ending September 30, 1982; not in excess of $11,170,000,000 for the fiscal year ending September 30, 1983; not in excess of $11,115,000,000 for the fiscal year ending September 30, 1984; and not in excess of $11,305,000,000 for the fiscal year ending September 30, 1985".

Page 120, after line 22, insert the following new section.

AUTHORITY OF OFFICE OF INSPECTOR GENERAL

SEC. 1343. Any person who is employed in the Office of the Inspector General, Department of Agriculture, who conducts investigations of alleged or suspected criminal violations of statutes, including but not limited to the food stamp program, administered by the Secretary of Agriculture or any agency of the Department of Agriculture, and who is designated by the Inspector General of the Department of Agriculture may—

(1) make an arrest without a warrant for any such criminal violation if such violation is committed, or if such employee has probable cause to believe that such violation is being committed, in the presence of such employee,

(2) incident to making an arrest under paragraph (1), search the premises and seize evidence, without a warrant,

(3) execute a warrant for an arrest, for the search of premises, or the seizure of evidence of such warrant in issued upon probable cause to believe that such violation has been committed, and

(4) carry a fireman,

in accordance with rules issued by the Secretary of Agriculture, while such employee is engaged in the performance of official duties under the authority provided in section 6, or described in section 9, of the Inspector General Act of 1978. (5 U.S.C. app. 6, 9)

Page 104, line 23, insert after "of coupons" the following: "including any losses involving failure of a coupon issuer to comply with the requirements specified in section 11 (d)(21).".

Page 108, line 21, strike our "paragraph:" and insert in lieu thereof "paragraphs:".

Page 109, after line 9 insert the following:

"21. that, project areas or parts thereof where authorization cards are used, and eligible households are required to present photographic identification cards in order to receive their coupons, the state agency shall include, in any agreement or contract with a coupon issuer, a provision that (1) the issuer shall (A) require the presenter to furnish a photographic identification card at the time the authorization card is presented, and (B) record on the authorization card the identification number shown on the photographic identification card; and (2) if the State agency determines that the authorization card has been stolen or other-

wise was not received by a household certified as eligible, the issuer shall be liable to the State agency for the face value of any coupons issued in the transaction in which such card is used and the issuer fails to comply with the requirements of clause (1).".

Mr. COLEMAN (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Missouri?

There was no objection.

(By unanimous consent, Mr. COLEMAN was allowed to proceed for 1 additional minute.)

Mr. COLEMAN. Mr. Chairman, today I am offering an amendment along with the chairman of the subcommittee responsible for the food stamp program. This is a bipartisan amendment.

Mr. Chairman, this amendment will do four things. First, the adjustment of the thrifty food plan will be delayed until October 1982. The thrifty food plan is the basis for the benefits that are paid to participants in the program. It is normally updated once each year. During the reconciliation process, this adjustment was delayed and my amendment will delay it further.

This portion of the amendment will save $600 million in 1982. Even with all of the reforms that were contained in the Reconciliation Act, the food stamp program will cost over $11.3 billion in fiscal year 1982. Some additional savings measures were needed because of the rising cost of this program.

I feel that this measure—to delay the increase in benefits—is the method to accomplish additional savings. The amendment does not deny benefits to anyone; it does not reduce benefits. It does postpone the increase in benefits in an attempt to place a measure of fiscal integrity into the food stamp program.

The second part of the amendment reauthorizes the food stamp program for the next 4 years and sets a ceiling on the authorization for these years. The authorization for 1982 is set at $11.3 million. The administration tells me that with the first portion of the amendment that I mentioned, the food stamp program can operate with this authorization for the year.

I share the concern of many of you about the cost of this program. I, too, wish to see the cost of the food stamp program reduced. I believe that if you review the Coleman amendments in the Reconciliation Act, you will agree that some of this has been accomplished.

However, I also believe that as responsible Members of Congress we should design a program that will both help those truly in need and fit the level of funding available. We cannot continue to have the money authorized for the food stamp program go to persons who are not eligible.

The third part of the amendment addresses this issue. I am sure that many of you saw the national television program earlier this year in which food stamps were shown as being used as a second currency—just like money. They were used to buy guns, drugs, cars, and other items for which food stamps were never intended. The Department of Agriculture's Office of the Inspector General is the organization charged with the responsibility to investigate criminal activity in the food stamp program.

This portion of the amendment gives certain limited law enforcement authority to the USDA Office of the Inspector General. Subject to carefully prescribed rules to be issued by the Secretary of Agriculture, these criminal investigators would have the authority to make arrests without warrants for criminal violations committed in their presence; to conduct a search of the immediate premises and seize evidence involved in the arrests; to execute warrants for the arrest, the search of the premises, or the seizure of evidence upon probable cause to believe that a criminal violation of the law has taken place; and, to carry a firearm.

There are now 260 criminal investigators at the Department of Agriculture Office of the Inspector General. Of those investigators, 80 to 100 at any one time are assigned to investigate food stamp trafficking cases. All OIG investigators are required to complete basic criminal investigator training at the Federal Law Enforcement Center at Glynco, Ga. The only exceptions are those criminal investigators who have completed successful training at a comparable center, such as the FBI basic agent's course or one with the military.

The training at Glynco, Ga., includes firearm training, and criminal investigators are required to complete such a course and other related courses.

The New York City inspector general's office and his agents now have this authority—the Federal agents do not.

The fourth and last portion of the amendment provides for a first endorser liability for persons or organizations who issue food stamps. This provision is similar to the one that exists for U.S. currency—whoever accepts the counterfeit money must bear the loss. In the first endorser liability provision, those States, counties, or cities where authorization to participate (ATP) cards are used and photo ID cards are used, the organization issuing the food stamps will be required to view the photo ID card when the ATP card is presented.

The issuer must record on the ATP card the ID number that is shown on the photo ID card. If that State later determines that the ATP card was stolen or not received by the household entitled to the food stamps, the issuer will be liable for the value of the stamps issued if they failed to comply with the above requirement.

This section of the amendment will require that coupon issuers be more alert when they are issuing stamps. These issuers are primarily banks—check-cashing concerns who are paid, sometimes up to $2 per transaction—for issuing the food stamps. It is only proper that they should exercise a measure to control when stamps are issued; and if they fail to properly screen the person presenting the ATP card and the photo ID card, they should be responsible for the loss to the Federal Government.

I believe that these four provisions contained in the amendment should be adopted, and I urge that you support the amendment.

□ 1650

Mr. WAMPLER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in support of the amendment offered by the ranking member of the subcommittee responsible for the food stamp program and the chairman of that subcommittee. This is a bipartisan amendment and one that is accepted by the administration as well. This amendment contains four parts. First, the adjustment of the thrifty food plan will be delayed until October 1982. Second, the food stamp program will be reauthorized for the next 4 years and spending ceilings will be placed on this program. Third, certain limited law enforcement authorities will be given to the Department of Agriculture's Office of the Inspector General. Fourth, there will be established a first endorser liability for those organizations which issue food stamps, which will make the issuer responsible for food stamps issued in error.

I would like to discuss briefly the reason for the last two sections of this amendment, since I am sure the ranking member and the chairman of the subcommittee will discuss this matter in greater detail.

There are two areas in which most Members of this body agree. First, that the food stamp program is necessary and does provide assistance to the poor, the elderly, and the disabled; and second, there are problems with fraud and mismanagement in this program. Over the past years Congress has acted to provide administrators with the tools necessary to combat fraud and abuse and incentives to improve the management of the food stamp program. The last two sections

of this amendment provide additional measures to address this issue.

I am confident that this administration will continue and will increase the emphasis on reducing the amount of money that is spent due to fraud and mismanagement. I urge them to take whatever steps are necessary to do so and to insure that States and local jurisdictions do so as well.

I urge support of this amendment.

Mr. HORTON. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in opposition to the amendment.

As the ranking minority member of the Committee on Government Operations, which originated the Inspector General Act, I want to take this opportunity to inform the Members of the purpose of that act and why this amendment is contrary to that act.

Section 2 of the Inspector General Act of 1978 clearly states the purpose of the act. It is, and I quote:

To create independent and objective units (1) to conduct and supervise audits and investigations relating to programs and operations of the various agencies; (2) to provide leadership and cooperation and recommend policies for activities designed (a) to promote economy, efficiency and effectiveness in the administration of and, (b) to prevent and detect fraud and abuse in such programs and operations, and, (3) to provide a means for keeping the head of the establishment and the Congress fully and currently informed of our problems and deficiencies relating to the administration of such programs and operations and the necessity for and progress of corrective action.

That is the end of section 2 of the Inspector General Act setting forth the purpose. In essence Inspectors General are independent and objective auditors and management advisers. They are by no means supposed to be cops on the beat. Yet this amendment would give them powers far greater than those enjoyed by any policeman I know of, at least any policeman in a democracy.

Paragraph 1, for example, would permit a designated employee of the IG office, at the Agriculture Department, to make an arrest without a warrant for any criminal violation of a statute administered by the Department, if the employee has probable cause to believe that violation is being committed in his presence.

The employee does not have to see the violation being committed, he merely needs probable cause to believe that it is being committed.

This is a power far and beyond that of any police officer I know of. A policeman to make an arrest without a warrant must see the crime actually being perpetrated.

Paragraph 2 would permit IG employees while making this sort of arrest to search the premises and seize evidence without a warrant.

If policemen have only probable cause to make an arrest they must get a warrant from a judicial officer before making any such a seizure.

Paragraph 3, on the other hand, gives the IG employee himself the judicial power to execute warrants.

This authority seems somewhat superfluous for an individual who has vast power to act without a warrant.

Paragraph 4 would permit any IG staff members to carry firearms. Why an auditor and adviser would need one of these is beyond me.

Mr. COLEMAN. Mr. Chairman, will the gentleman yield on that point?

Mr. HORTON. I yield to the gentleman from Missouri.

Mr. COLEMAN. I thank the gentleman for yielding.

The reason that they need it is that these people are in an undercover situation. These people are dealing with hardened criminals who are trafficking food stamps illegally. Even the underworld is involved. They put their lives in danger in order to enforce the law that the gentleman and I have asked them to enforce.

Mr. HORTON. If that is the situation then I think they need protection. I think it needs to be turned over to another department of the Federal Government, those who are responsible for that.

What I am saying is that the Inspector Generals were not authorized for the purpose of being cops on the beat and for them to be authorized to carry firearms is far and beyond anything that was envisioned in the act that originally was set up in Inspector Generals.

Mr. COLEMAN. Mr. Chairman, will the gentleman yield on that point?

Mr. HORTON. I yield to the gentleman from Missouri.

I understand that this amendment has been prompted by concern that some employees of the Agriculture Department Inspectors General have been placed in physical danger in the performance of their duties. If these individuals have indeed been subject to threats of death or serious injury, I suggest that the proper response is, first, to determine whether they should have engaged in the activities which put them in such a position, and then if those actions are appropriate, to protect those individuals when they perform these types of duties.

The proper solution is not to give these employees massive new law enforcement powers.

Mr. Chairman, this amendment so badly carries out the purpose of the IG Act that if it were adopted the entire act and all the Inspectors General offices it creates, in my judgment, would be held up to ridicule and would be subject to a great deal of criticism.

As a strong defender of the Inspectors General as they are presently constituted, I urge the Members to resist this attempt to pervert their mission.

Mr. KINDNESS. Mr. Chairman, will the gentleman yield?

Mr. HORTON. I yield to the gentleman from Ohio.

Mr. KINDNESS. I thank the gentleman for yielding.

I would like to concur in principle with the gentleman's remarks and associate myself with the gentleman's remarks with regard to the mixing up of the functions of law enforcement officials and Inspector General employees.

The CHAIRMAN. The time of the gentleman from New York (Mr. HORTON) has expired.

(At the request of Mr. KINDNESS and by unanimous consent, Mr. HORTON was allowed to proceed for 2 additional minutes.)

Mr. KINDNESS. If the gentleman will continue to yield, when the IG Act was passed, in 1978, it did move the Office of the Inspectors in the Department of Agriculture into the IG office, but there was no identified need at that time that I know of or can find out about for this protective set of powers that are under discussion here.

It is only since that time, apparently, that the need has been brought to anybody's attention to have arrest powers and the right to bear firearms on the part of IG personnel.

So we are not talking about something that has really been placed as a burden upon the Inspector Generals, as I understand it.

We look at the IG Act and it speaks in general terms about the management or programs, that is, overseeing and investigating the management of programs, but not the detailed law enforcement functions that are contemplated by this amendment.

If this amendment is adopted with respect to the IG personnel of the Department of Agriculture, then other departments are going to be in here and we are going to have all the IG personnel in all the departments running around with shoulder holsters instead of, as the gentleman from New York might feel, green eyeshades might be more appropriate.

I just want to join in urging a note of extreme caution with respect to this amendment. It was turned down by the House Subcommittee on Criminal Justice of the Committee on the Judiciary last year when an attempt was made to get the same sort of provision in the Criminal Code.

□ 1700

I still think the same way, that it ought not to be made a function of the Inspector General personnel to be law enforcement officers carrying a gun and executing warrants and making arrests.

We have problems of interrelating the activities of different departments

and personnel in different departments and other places in the Federal Government. It can be done just as well here as it is between the FBI and other departments and agencies that also have an obligation to see that the laws of the United States are properly enforced.

The CHAIRMAN. The time of the gentleman from New York has expired.

(By unanimous consent, Mr. HORTON was allowed to proceed for 1 additional minute.)

Mr. HORTON. Mr. Chairman, I would like to just add also that I think this is a serious step to provide this type of enforcement authority for the Inspector General of the Agriculture Department. So far as I know, there were no hearings held on this specific provision.

I think that if it is necessary, that there ought to be full and complete hearings. There ought to be an opportunity for the agencies, such as the Justice Department and the FBI and other law enforcement agencies, to have an opportunity to have their input into this type of provision.

So accordingly, I would urge my colleagues to turn down this amendment and vote against it.

Mr. BROOKS. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I have very serious reservations about the scope and the effect of this amendment which would add a new section 1343 to expand the authorities of the Department of Agriculture's Inspector General. The new section would permit employees of the Department of Agriculture's Inspector General's Office to make warrantless arrests for criminal violations committed in their presence, make warrantless searches and seizures incident to such arrests, execute arrests and search warrants on probable cause of violation and to carry firearms.

Now, I have been a long supporter of the Inspector General legislation. I have offered it. I have worked with the gentleman from New York (Mr. HORTON) on it and with others.

We feel it is a good proposal, but I understand the intent behind this amendment and I share the deep concern that members of the Agriculture Committee and other Members of Congress have expressed about fraud and criminal violations in the food stamp programs and other programs of the Department of Agriculture.

There might be good reason in very narrow and carefully drawn circumstances to extend such authority to Inspectors General; however, I can say as one of the original sponsors of the original Inspector General Act, it was never intended—it was never intended by us or by this Congress, it was never mentioned, nobody ever said it, nobody thought it, nobody inferred it, nobody intended for the IG's to become armed law enforcement officers. They were supposed to ferret out fraud and waste. They were not hired guns going around without search warrants searching people, seizing people, and arresting people. That was not comtemplated as part of their job. They were and are intended to function as a specialized audit and investigation tool for the agencies in which they operate.

Now, one of my concerns about this amendment is that it could have the effect of spreading the Agriculture Department's IG resources too thin, preventing them from carrying out their basic function of audit and investigation as effectively as possible. For instance, to carry out its new law enforcement duties responsibly, the Agriculture Inspector General would have to commit substantial resources to the training of his personnel in law enforcement areas, including weapons training, breaking and entering, I guess a whole lot of them. If you are going to do it without a warrant, you might as well kick in the door.

I also have grave reservations about the proliferation of Federal employees charged with law enforcement responsibilities. The power to enforce Federal laws is the most serious the Federal Government can confer on one of its employees. We should not grant this authority to a new group of employees without more study than this amendment apparently has received.

In conclusion, Mr. Chairman, while I agree that criminal violations and fraud in USDA programs must be attacked vigorously, I feel we should move very cautiously before extending law enforcement powers to the Agriculture Inspector General's Office. This is a serious issue that needs much more study than it has received to date.

I am anxious to work with the Department of Justice, the Judiciary Committee, the Agriculture Committee, and other interested Members in seeking ways to make the Agriculture IG a more effective tool in combating fraud and criminal violations in USDA programs; but we should not give the Agriculture Inspector General law enforcement powers at this time.

Mr. WEISS. Mr. Chairman, will the gentleman yield?

Mr. BROOKS. I yield to my friend from New York.

Mr. WEISS. Mr. Chairman, I thank the gentleman for yielding.

I want to associate myself fully with the gentleman's remarks.

As I understand what the distinguished chairman of the Government Operations Committee was saying, his objection is to that portion of the the amendment which is the new section 1343; is that correct?

Mr. BROOKS. The gentleman is absolutely correct. That is the only portion to which I object. I have talked to the author of the amendment, asked him if he would accept an amendment to strike that. He said that he would not, that that was the main thrust of his amendment. I agreed then that I would be opposed to the whole thing. If he does not want to change it, I am against it.

Mr. WEISS. Mr. Chairman, if the gentleman will yield further, at the time the votes comes up, I am going to ask for a division so that in fact we will get a separate vote on just the portion that the gentleman objects to.

Mr. BROOKS. Can we get a vote on just one section?

Mr. WEISS. Yes, just by asking for a division.

Mr. RICHMOND. Mr. Chairman, I move to strike the requisite number of words.

Title XIII of the 1981 farm bill, H.R. 3603, will enable us to have a sound, efficient, and meaningful food stamp program for the next 48 months. Title XIII taken together with the bloc of amendments to be offered jointly by the gentleman from Missouri (Mr. COLEMAN), who is the ranking minority member of my Subcommittee on Domestic Marketing, Consumer Relations, and Nutrition, and me will streamline the food stamp program by reducing expenditures even beyond the level of cuts sustained in the Omnibus Budget Reconciliation Act of 1981 and by providing further legislative safeguards against fraud and error. At the same time, our amendments allow this vital program to continue to fulfill its mission of feeding millions of needy Americans through fiscal year 1985.

This House may not yet realize what it has done to alter the food stamp program in the last year and one-half and what it is likely to do in the next day. The food stamp program has, through a series of substantial changes wrought in May 1980 and August 1981, have been retrenched and revised more than any other major social program in an effort to make sure that it operates effectively to provide benefits directly to impoverished individuals and households. Before now, it was possible for critics of the program to assert that the program was defective because it fed strikers or college students or persons with incomes substantially above the poverty level or raised benefits in a way that overcompensated for changes in the cost of living. Today, any such contentions are factually false. After the 1980 amendments, the 1981 reconciliation provisions, and what we hope to accomplish today:

No strikers remain eligible for the program because of the loss of income brought about by their strike;

The only students that remain are either elderly, disabled, have dependents to support, or work almost full-time;

The absolute income eligibility cutoff for a family of four is below $11,000 or 130 percent of poverty, while three-quarters of all participant households have gross incomes below $4,800 a year or $13 a day, which is hardly enough to sustain life in these inflationary times; and

There will be no cost-of-living benefit increases for 21 months from January 1, 1981 until October 1, 1982; the increases that will occur will be at least 3 to 15 months out-of-date; there will not be any of the deduction increases this Congress awarded in 1980; all deductions will be frozen from January 1, 1981 through July 1, 1983, at which point any cost-of-living adjustments will no longer take account of the unusually high and, for food stamp recipients' purposes, irrelevant increases in homeownership costs based upon mortgage interest rates and the price of new homes; and the earned income deduction to which every worker is entitled to compensate for social security taxes, Federal and State taxes, transportation and other work-related expenses, has been dropped from 20 to 18 percent of gross earnings.

The old standby criticisms of this program that have been repeated for years by all of those who like to take aim at the food stamp program because only the weak and the politically powerless enjoy its meager benefits of less than 50 cents per person per meal are no longer valid. They should not be repeated any more. The strikers, the students, and the greedy are gone forever so long as this administration properly polices the program. No one is going to get fat on the food stamp rolls.

By virtue of these and other changes in the shape of the program, the food stamp portion of the budget has been significantly diminished. The food stamp program has been one of the primary targets of both the Office of Management and Budget and our budget process. The Agriculture Committee has responded swiftly and in the best of faith to meet the budgetary challenge by trimming expenditures beyond what the Congress mandated. The first concurrent budget resolution called for slicing $1.458 billion from the program for fiscal year 1982. We replied with program changes worth $1.657 billion or $199 million more than what was required. Similarly, for fiscal years 1983 and 1984 this committee, through the reconciliation act of August that it helped shape, has curtailed the program by another $2.046 ($75 million on top of the resolution) and $2.334 billion ($7 million more), respectively, for an overall total of $6.037 billion in program retrenchment for the 3 forthcoming fiscal years.

To that record we add today an additional $700 million through the Coleman-Richmond amendment that would delay the April 1, 1982, benefit adjustment to reflect increases in food prices until October 1, 1982, at a cost of approximately $138 per household on the program. As a result of these massive contractions we have ordered for the food stamp program, approximately 1 million persons have been or shortly will be dropped from the program rolls, while nearly all of the 22 million persons remaining on the program, well over 90 percent of them from families below the poverty line, will receive lower benefits than they expected under the law as it was in effect in July. The only households that will not be adversely affected by what we have done will be those, primarily elderly, that are eligible to receive the statutory minimum benefit of $10 per month or 11 cents a meal.

That is a record of program reductions that I am not particularly proud of. But I have labored to do what had to be done to assure that the food stamp program would survive. The program is critical to all of those we have determined deserve its benefits. There is no questions in my mind that the food stamp program, with all of the shortcomings that this bill seeks and the reconciliation act that preceded it sought to address and redress, is still the most effective social program in aid of the poor in operation today. Witness after witness in our hearings this spring reported evidence confirming this. In 1967, when a team of doctors funded by the Field Foundation went across the country to examine the status of hunger and malnutrition among poor Americans, they returned to report that they had found hungry children suffering diseases caused by malnutrition that were well-known in Africa and Central and South America, but not the United States. In 1979, after they had conducted a similar study, they were able to report that:

> Now in those same areas, there is nowhere the same evidence of gross malnutrition we saw then. In the Mississippi delta, in the coal fields of Appalachia and in coastal South Carolina—where visitors 10 years ago could quickly see large numbers of stunted, apathetic children with swollen stomachs and the dull eyes and poorly healing wounds characteristic of malnutrition—such children are not to be seen in such numbers today.

The primary reason for the dramatic difference for the 33-percent decline in infant mortality and the greater than 50-percent reduction in infant deaths from diarrhea, influenza, pneumonia, and immaturity—all directly related to poverty and malnutrition—was, from their perspective, the existence and intervention of the food stamp program. They stated categorically that "the food stamp program does more to lengthen and strengthen the lives of disadvantaged Americans than any other noncategorical social program," and "is the most valuable health dollar spent by the Federal Government." I concur wholeheartedly.

For the program to continue to perform in the fashion we would like two things are essential:

First, sufficient funds to enable it to meet the needs of eligible persons without artificial shortfalls requiring across-the-board reductions in benefits or other restrictions that undermine its nutritional efficacy and,

Second, appropriate techniques for controlling and limiting the possibilities for fraud and error.

This bill goes part of the way to achieve the first objective of full funding and all of the way to furnish the management tools necessary to deal with fraud and error.

With respect to the cap or ceiling on program funding, we had to compromise, seeking to achieve the goal of adequate funding for the present fiscal year 1982, but postponing questions relating to funding more than 1 year from now to a later time.

In the current fiscal year, the administration and we have agreed to fully fund a cap set at $11.3 billion. We believe that, after the nearly $2.4 billion in program cuts brought about by the Omnibus Budget Reconciliation Act and this bill, $11.3 billion should be enough to run the program through September 30, 1982, with reducing allotment values at any time during this fiscal year to compensate for the limitations of this cap.

Of course, we cannot be certain at this stage, nearly 12 months in advance, that $11.3 billion will meet full funding needs. We confront the unforeseeable nature of changes in the economy, especially food price inflation and unemployment; the uncertain pace at which the August 1981 program changes will be implemented throughout the country, although much of the projected $2.4 billion in savings depends upon an October 1, 1981, effective date (some States may delay enforcing some of them for several months because of administrative difficulties); and the food stamp program-related reactions of households that lose all or part of their welfare benefits, public service job wages, or unemployment compensation.

If $11.3 billion should prove, late next spring or early next summer, to be somewhat short of the mark, this committee and the Congress will address that issue in a timely fashion, and, hopefully, as we have consistently done in fiscal years 1979, 1980, and 1981, raise the cap sufficiently to account for the shortfall and furnish the requisite supplemental appropriations.

Certainly, at this stage, and for at least the next 8 months, if not beyond,

the Secretary has no basis whatever for determining under section 18(b) of the Food Stamp Act to reduce benefits because the requirements of participating States will exceed the limitation of the cap contained in section 18(a)(1) or for reporting in his section 18(a)(1) required monthly report to the Agriculture Committees that he has any reason to believe that reductions in the value of allotments issued to households certified to participate in the food stamp program will be necessary under subsection (b) of this section.

If there should come a time in June 1982 or thereafter when the Secretary has to exercise his discretion in making a finding that benefit reductions are necessary in accordance with sections 18 (a) and (b) of the law, he should do so in light of the realities of congressional intent and action. We expect that the Secretary will not proceed to decide to commence benefit reduction until there is a clear indication from the Congress itself that it will not provide sufficient funding. Thus, the Secretary should closely scrutinize expressions of congressional intent on the matter of benefit reduction and the likelihood of congressional action to authorize and appropriate the necessary moneys as revealed in authorization committee hearings and markups with a view to drafting legislation to raise the cap, Appropriations Committee or Budget Committee reports, and debates on the relevant appropriations bills and budget resolutions. Then, the Secretary should make his best judgment about the prospects for congressional action. Unless he finds that there is a clear and convincing evidence that Congress will not act, he should continue to operate on the assumption that funding will be adequate, continue benefits at the congressionally mandated levels, and apportion program funding accordingly. If a major cut in benefits to needy households is to be made, the Congress wants a full opportunity to review the appropriateness of that cut before, not after or while, it is made.

With respect to fiscal years 1983, 1984, and 1985, the caps we have selected are necessarily arbitrary. We cannot predict with any degree of certainty today that we will spend no more than $11.170 billion or $11.115 billion or $11.305 billion, respectively, then. More than likely we can predict that the program will be amended in some fashion between now and then and that a myriad of other cost-significant factors will change. Any meaningful discussion of the adequacy of those caps will have to wait until the end of 1982 or 1983 when we can better ascertain:

(1) What impact these previous amendments have had on the size and scope of the program,

(2) What effect the administration's changes and cutbacks in other income transfer programs such as Aid to Families with Dependent Children, CETA/Public Service Employment and Unemployment Compensation have on food stamp participation and benefits (since a dollar lost in other income transfer programs is usually partially offset by a 30-cent increase in food stamp allotments), and

(3) How our economy is faring, since every full percentage point increase in food price inflation triggers $150 million in program costs (the administration has based the cap for fiscal years 1982 through 1985 on projectons of food price inflation of 9.1, 6.5, 5.7, and 4.8 percent, respectively) and every full percentage point rise in unemployment over the administration's predicted level (7.4, 6.8, 6.4, and 6.1 percent, respectively, for the 4 fiscal years in question) will cost an extra $680 million in any fiscal year.

Although this bill may not finally resolve the question of the cap, it is intended to be the final solution, insofar as one is legislatively obtainable, to the problem of fraud. It may well be true that, as Deputy Assistant Secretary of Agriculture John Bode informed my subcommittee last month, "no matter how much we work to design a tight, fraud-proof system, no matter how good our audit and investigation efforts are, there will always be the smart person out there who prefers to make money dishonestly rather than honestly." But this committee intends to keep on trying to outwit the dishonest by placing legislative roadblocks in their path and giving the Department of Agriculture the fullest possible arsenal of legislated tools to improve all aspects of program integrity.

We know that however generously motivated Americans may be to furnish resources to the poor to enable them to survive, particularly in the face of significant inflation and slowed economic growth, they understandably object if they believe that those resources are being abused or wasted. We agree wholeheartedly with that concern:

We want to be certain that the food stamp program is run as efficiently and as error-free as possible.

We want applicants and recipients alike constantly to be aware that the Congress does not and will not tolerate any refusal to disclose earnings accurately, and underreporting of welfare or other assistance program benefits, any efforts to evade the work requirement or any other attempts to take advantage of the program and dollars intended only for those who completely satisfy the stringent eligibility requirements set forth in sections 5 and 6 of the Food Stamp Act of 1977 and further tightened this year and in this bill.

We want the Federal and State personnel in charge to have all the necessary and proper authority to detect and prevent fraud and limit the incidence of errors that are inevitable when nearly 22 million persons obtain benefits monthly from a complex Federal-State network of administrators.

We want the American public to come to realize that those who are charged with allocating the taxpayers' money to alleviate the serious evils of hunger and malnutrition and permit low-income households to obtain a more nutritious diet will do so sympathetically, yet responsibly, effectively, yet carefully, so that the program's universally approved objectives are achieved at the lowest cost necessary to do the job.

My subcommittee has been striving for the past several years to rid the food stamp program of any hint of waste, fraud, and error. It is an insult to the American people to misuse a single penny of their hard-earned money. It is damaging for the American people to confuse the 22 million needy Americans, who depend on food stamps for their very survival, with criminals and irresponsible public officials, whose behavior undermines the integrity of the food stamp program.

Let us be very clear about one thing: There are many, many people in this country—and some of them are Members of this Congress—who believe that food stamps are bad, in principle. When these people see the outright fraud and administrative neglect that allows millions upon millions of dollars to be literally stolen from the American people, as recently portrayed on national television, they harden their attitudes. They use the facts of fraud and abuse as leverage to attack the entire food stamp program.

Those who take a sober moment or two to think about the problem, know that cutting the funds of the food stamp program will not reduce waste, fraud, and error. They will only be reduced if we remove the opportunity for abuse, and rid ourselves of administrators who condone mismanagement of this vital program.

I think we can proudly state that the Congress record in seeking to control fraud and error has been excellent. In 1979, we provided for the collection of social security numbers from applicants, gave the States the right to retain 50 percent of the funds recovered as a result of their fraud investigations and prosecutions, and required persons disqualified from the program for fraud to repay the amounts they fraudulently obtained as a condition of future program eligibility. In 1980, we crafted sanctions to be imposed against States with high-quality control error rates, authorized 75-percent Federal cost-sharing for computerizing the handling of pro-

gram data, encouraged computer wage and benefit matching, allowed States to tighten verification rules by relying upon error-prone profiles, permitted the use of photo identification cards in urban areas where the Secretary thought that would enhance program integrity, and gave the Secretary power to confiscate cash or goods used in food stamp trafficking.

The 1981 Omnibus Budget Reconciliation Act required the use of retrospective accounting and periodic reporting for all but entering and migrant households as of October 1, 1983, increased the penalties for fraud disqualifications, and encouraged the collection of nonfraud overissues by permitting States to retain 25 percent of the amounts recovered.

The bill before you would add to these more antifraud and anti-error provisions. Among other things it would:

First, require the Secretary to permit any political subdivision that wishes to do so in return for a 50 percent share of workfare administrative costs and that agrees to comply with the Secretary's guidelines, to administer a workfare program in which nonexempt food stamp recipients must work for the subdivision at the Federal minimum hourly wage rate (or State rate, if higher), payable in the form of food stamps;

Second, eliminate establishments that do only a marginal staple food business, such as bars, gas stations, party stores, and carryout shops, from the program unless they are the only food store in the immediate area;

Third, deny deductions for any expenses paid on a household's behalf by a third party and require the income and resources—over a floor—of sponsors of certain aliens to be deemed available to those aliens in order to determine the aliens' eligibility and benefits;

Fourth, give the Secretary flexibility to alter the complex accounting standards for ascertaining the value of licensed vehicles;

Fifth, extend program disqualification for voluntarily quitting a job to current program participants; extend sanctions for noncompliance with the food stamp work registration requirement to food stamp participants who fail to satisfy an AFDC-WIN or unemployment compensation work requirement; and make work registration an annual requirement;

Sixth, make States strictly liable for issuance losses and provide liability for on the basis of negligence failures in certain other areas of State agency administrative responsibility;

Seventh, end the 60-day transfer provision permitting benefits to follow a household moving from one political subdivision to another in an uninterrupted fashion;

Eighth, allow States flexibility to provide households with a notice of expiration of their certification periods up to 30 days before the start of the last month of a 6-month or longer certification period;

Ninth, limit provision for expedited food stamp benefits within 3 working days of application to applicant households with $150 or less in gross income a month and liquid assets of $100 or less and to applicant households whose only income for 10 days after filing an application is $25 or less from a new source of income and who also meet the $100 liquid assets test;

Tenth, end the department's liability to restore food stamps to households that have wrongfully been denied them or terminated from the program if the benefits were lost more than 1 year prior to a household's request for restoration;

Eleventh, require the State agency to request and utilize for certification purposes household members' wage and benefit information available from the Social Security Administration and State unemployment compensation agencies;

Twelfth, require the Secretary to allow political subdivisions to use certified mail in issuing food stamps to reduce mail theft and loss;

Thirteenth, end the imposition of staffing standards upon the States;

Fourteenth, require States to meet the Secretary's standard for improper denials and terminations in order to receive 55-percent Federal funding of administrative costs and further require all States with error rates over 5 percent to develop corrective action plans; and

Fifteenth, mandate obtaining a household's social security number as a prerequisite to participation.

On top of these measures, Mr. COLEMAN and I will offer a package that, among other things, expands the authority of the criminal investigator employees of the Department's Office of Inspector General, who are on the frontline of the department's effort to combat food stamp and other agriculture-program fraud by organized crime, to make warrantless arrests, search premises incident to an arrest, execute arrest warrants, and carry firearms. In addition, our package makes first endorser-issuers liable for coupons received by ineligible households in those locations in which an authorization-to-participate (ATP) card issuance system coincides with mandatory photo identification cards. The check-cashing office or bank that initially handles the ATP card would be held responsible for any losses flowing from misuse of that authorization so long as the endorser could, through demand for the cardholder's photo identification card, readily identify the cardholder and prevent abuse.

These two measures, which are part of the combination amendment to raise the cap for fiscal years 1982 through 1985, are crucial to halting fraud. With them, the amendments contained in title XIII as reported by the House Agriculture Committee and our prior actions in 1979 and 1980 we have provided the food stamp program with the most powerful collection of antifraud measures available to any existing social welfare program.

So I urge, let us accept the Coleman amendment. It is a good amendment. We need it for the very continuation of this program.

I thank the Chairman.

Mr. DE LA GARZA. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, just to remind the Members that this is a consensus amendment which has been worked out by both sides in the subcommittee, a tremendous amount of work has been done, both by Mr. COLEMAN and by Mr. RICHMOND.

We, of course, agreed to the consensus and to the package which they brought to us. Unfortunately one section of that amendment seems to have some opposition to it and some legislative concerns have been expressed here.

It would be my hope, although I intend to support the package, that rather than object to the whole package, because we have the cap and other needed areas, that we accept the recommendation of the gentleman from New York (Mr. WEISS) who is going to ask for a division of the question in order that we might approve the areas that have no controversy and then address the issue to which objection has been raised.

Mr. BROOKS. Mr. Chairman, will the gentleman yield?

Mr. DE LA GARZA. I yield to the gentleman from Texas.

Mr. BROOKS. To the distinguished chairman of the committee who has done an outstanding job on this piece of legislation, I want to say that that is my understanding, that Mr. WEISS will make the demand for a division and a separate vote on so much of the amendment as creates a new section 1343. I would support that division and would be opposed to that section, though the remainder of the amendment offered by Mr. COLEMAN I would certainly have no objection to and would support as you and your committee desire.

Mr. DE LA GARZA. I thank the gentleman. I think that would be a wise and prudent action to take, as the recommendations from the distinguished gentleman from New York always are. And I would hope that we would proceed in that fashion.

PARLIAMENTARY INQUIRY

Mr. COLEMAN. Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN. The gentleman will state his parliamentary inquiry.

Mr. COLEMAN. Mr. Chairman, at what point would a motion to divide be in order?

The CHAIRMAN. The Chair will advise that a demand for division of the question is a proper request and can be made at the time that the question is put on the amendment, but not after the question is put.

Mr. COLEMAN. Mr. Chairman, will the gentleman yield?

Mr. DE LA GARZA. I would be happy to yield to the gentleman from Missouri.

Mr. COLEMAN. I appreciate my chairman yielding.

As I indicated this was a delicate balanced amendment that we put together. Obviously we are not surprised at some of the opposition that was generated here on the floor.

We put together a package in which one tries to reform the food stamp program, tightening up that fraud and abuse that we have seen on national television in New York City where up to $29 million worth of fraud was allegedly made because they did not have the photo ID and did not have the ATP card lined up and did not have this first endorsement liability. We have raised the cap up, a compromise position, from the administration, what the cost of this program was going to be.

We talked about trying to put off the thrifty food plan for another 6 months to save $600 million.

Now, the thrust of the opposition to the law enforcement powers is spurious. The reason that it is, we have told—and I might point out most of them are members of the Government Operations Committee who would like to see some of these things change—where have they been?

We have people who are out endangering their lives right now as undercover agents because you and I have asked them to. We have given them the powers to go out and force them "Here, guys, go out and do it." But we have not given them anything to protect their lives with.

They do not have the power to make arrests. They do not have the power to confiscate anything that they find in the possession, as undercover agents.

These people deal with the underworld, they deal with hardened criminals.

And what have we done for them? We sit around here and debate the issue in committee. That is what we have done.

We have not given these people the power to go out on the street and stop somebody from jay-walking.

People say, "Well, we didn't mean this to happen to the Office of the Inspector General." Maybe they did not mean it. But that is exactly what they have to do in order to go out and make these cases. And the reason they are making these cases is that we did away with the purchase requirement of the stamps so they are just like money. It is just like cash in hand. That is why you have a lawyer in my hometown of Kansas City convicted of going out and making and selling $9,000 worth of food stamps at half price because he knew that he could make a buck off of it. And where do we find this man who has been convicted in the Federal courts, a lawyer in the State of Missouri? Two days ago he was arrested for arson and torching a tavern with a hotel above with 95 senior citizens that would have gone up in flames. This is the type of individual we are talking about.

We are not talking about the welfare cheater. We are not talking about anybody else. We are talking about hardened criminals.

If my colleagues in this House want to tell these people to go out and make these cases but do not give them any law enforcement powers, we are saying forget about food stamp fraud, go out and do it, it is a rip-off system.

Go back and look at the ABC television series and see how many millions it is estimated, hundreds of millions of dollars being ripped off from your taxpayers and mine.

We are just going to say go ahead and do it.

Mr. WALKER. Mr. Chairman, I move to strike the requisite number of words.

I take this time primarily to ask some questions of the gentleman from Missouri, because I, too, am a member of the Government Operations Committee, an enthusiastic backer of the Inspector General concept. But I have to feel that the gentleman from Missouri has raised some valid points in the amendment that he brings before us today.

If my understanding is correct, what we did when we created the Inspector General for the Department of Agriculture was we put an Office of Inspections that had previously existed within that Department under the Inspectors General. Is that correct?

Mr. COLEMAN. I would yield to your expertise, serving on the committee. It is my understanding that the Department of Agriculture is unique in this fashion, that we are not talking about all Inspector General. We are talking about one—the Department of Agriculture.

Mr. WALKER. And that would have been the office, if it was still in existence, that would have had the authority to go out and take a look into fraud, waste and abuse in the food stamp program, is that correct?

Mr. COLEMAN. Not to take a look. We have mandated they go out there. I think your constituents, mine, and everybody in the country wants to make sure the money we are ready to authorize, $11 billion, is going to people that need it for food, not for criminals that buy drugs, like down in southeast Virginia, where they uncovered drug paraphernalia, purchasing drugs, cars, all these other stolen goods with the money to go to the people's food stamps.

Mr. WALKER. In other words, though, if I am correct in this, the Office of Inspections would have been the one who would have followed up and enforced the law with regard to food stamps and fraud, waste and abuse that has been in existence. And what happened was it was put under the Inspector General in the Department of Agriculture.

Now, it seems to me that the gentleman's point of a few minutes ago is absolutely correct. What we have created in the food stamp program at the present time is a new money system. So it seems to me we have something akin to going over to the Department of Treasury and putting the Secret Service under the Inspector General and then taking away all their enforcement powers, their weapons and everything else, and telling them to go out and act against counterfeiters without any authority to act.

So what you are saying is that what we need to do is reinstate the authority of the Department of Agriculture to do something about the massive fraud, waste, and abuse.

Some people I think estimate it may be as high as 30 percent in this program.

I think the gentleman is absolutely right. We had better get some teeth into the program.

Mr. COLEMAN. There are protections in this legislation. Not anybody is going to be out on the street from the Inspector General's Office. It has to be those who were involved in conducting investigations of criminal violations. This is not somebody going out to determine whether or not a welfare mother is trying to get more food stamps than she is eligible for. We are talking about specifically to make an arrest if they see the violation in their presence. If it is not done in their presence, they are not going to be able to make the arrest.

But the way it is now, the Inspector General has had to serve and work with local law enforcement officials who actually go in and make the arrest. They have to go to a Federal judge, they have to send the U.S. marshal. They have to call the marshal and say, "Can you go down and give them a warrant because we have an undercover case here." If the U.S. marshal is busy doing something or tells him where to go, there cannot be an arrest warrant obtained. We are

trying to give that request that the Inspector General of Personnel can go to the U.S. judge and ask for a warrant for the arrest. That is what we call executing a warrant.

Somebody down there said they could swear out a warrant, produce the warrant themselves. He knows better than that. A judge has to do that; he has to do it for the FBI and the Inspector.

□ 1720

Mr. WALKER. I thank the gentleman for his statement. I just want to pursue one other point. If I am correct, then, when the gentleman from New York seeks to divide the question, what he is really seeking to do is to pull the whole fraud, waste and abuse component out of the gentleman's amendment and leave us with 30 percent waste in the program with no tools to get at it. Is that correct?

Mr. COLEMAN. Plus raising the cap up to a point higher than the budget. Now, if we want to go into this amendment and talk about the budget a little bit, I will be glad to talk about the budget. I came up on the budget. I got David Stockman to move up on the budget so that we could get this amendment passed. Let us not open all of this up. I think we are going to open up a Pandora's box.

Mr. HIGHTOWER. Will the gentleman yield?

Mr. WALKER. I will be glad to yield to the gentleman from Texas.

Mr. HIGHTOWER. Does the gentleman propose that every Inspector General and employee of the Agriculture Department have the authority to make arrests?

Mr. COLEMAN. Absolutely not. These are people who are designated GS-1811, who are the law enforcement component of the Department of Agriculture's Inspector General's Office. The amendment specifically says those who conduct investigations of criminal violations of the statutes, so we are talking about a small number of people who have the responsibility today to make these cases.

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired.

(At the request of Mr. HIGHTOWER and by unanimous consent, Mr. WALKER was allowed to proceed for 3 additional minutes.)

Mr. HIGHTOWER. Is the gentleman creating a special class of law enforcement officer that does not now exist in the statutes?

Mr. COLEMAN. No, they already are required to do this, but we have not given them the authority.

Mr. HIGHTOWER. So they are not law enforcement officers, so this would be a special class of law enforcement officer who would have the authority to make arrests, have the authority to issue and swear out a warrant, is that right, but he would not have now?

Mr. COLEMAN. These people, in order to enforce the food stamp law, would have to make arrests if they see a violation occur in their presence. Right now we tell them to go out and tighten up on fraud, but they cannot make an arrest, they cannot go to a Federal judge and ask for a warrant. They have to get a U.S. marshal to do it, and if they see the evidence in front of them they cannot proceed.

Mr. HIGHTOWER. Suppose he saw some other Federal statute being violated, would he have authority to make an arrest then?

Mr. COLEMAN. No, he would not.

Mr. HIGHTOWER. So he would be a special class of law enforcement officer?

Mr. COLEMAN. He would be just for those criminal statutes which are administered by the Department of Agriculture.

Mr. HIGHTOWER. But he would still have to have some training as a law enforcement officer.

Mr. COLEMAN. If the gentleman did not listen to my opening statement, these people are trained now in Glen Cove, Ga., where they have law enforcement training; plus, they would be under prescribed rules of the Secretary maintaining that ability, and of course they are going to be well trained. Nobody is going to allow people to go out not well trained to do this. They already have proposed regulations that are going to be sent to the Congress for OK.

Mr. HIGHTOWER. Did the Inspector General ask for this authority?

Mr. COLEMAN. Yes, he did, and the Secretary of Agriculture has supported him, and there is evidence that somebody mentioned the FBI, whatever, if they want to get involved, why do we not turn this over to the FBI? I think the FBI just as soon have the Department of Agriculture do it. There is an internal memo being circulated somewhere that so says that. It will limit the authority of these officers—clearly spelled out.

The CHAIRMAN. The Chair points out that the gentleman from Pennsylvania controls the time, and the gentleman may yield to whomever he wishes.

Mr. WALKER. Mr. Chairman, I yield to the gentleman from Georgia (Mr. LEVITAS).

Mr. LEVITAS. Mr. Chairman, I thank my friend from Pennsylvania for yielding.

I do not think the issue in this amendment is over whether Members of this House want to see food stamp fraud eliminated. I think we take that as given, and we can each express the passion with which we wish to see that occur as we may. I do not think that is the issue.

I am concerned that the administration is proposing a 12-percent reduction in the budget which may reduce the number of inspectors general to do this job, but that is a different issue.

I would like, if I may, through my friend from Pennsyvania, to ask the gentleman from Missouri about the provision here, because it seems to me that this amendment as it is written gives an inspector general of the Department of Agriculture more authority to make an arrest than an agent of the FBI, a Secret Service agent, a drug enforcement agent, an Immigration and Naturalization Service agent. For example, the right to make an arrest without a warrant by a law enforcement officer is invariably restricted to felonies which are committed in his presence.

The CHAIRMAN. The time of the gentleman from Pennsylvania has again expired.

(At the request of Mr. LEVITAS and by unanimous consent, Mr. WALKER was allowed to proceed for 2 additional minutes.)

Mr. LEVITAS. Under the language of this amendment we would be giving, as I understand it, an inspector general of the Department of Agriculture the right to make arrests for criminal violations, which would include misdemeanors, of any statutes of the Department of Agriculture. That would include beef grading and things of that sort, and without a warrant. I really do not believe that the gentleman wants to go that far. We all want to eliminate this massive fraud and abuse in the food stamp program, but we do not want to create a police state giving the inspectors general powers that even the FBI does not have.

Mr. WALKER. I would be glad to yield to the gentleman from Missouri.

Mr. COLEMAN. I do not think we can compare what we are trying to do here with what the FBI has, and it would not serve any purpose to go into all that. This is more narrowly drawn. I think the gentleman's issue about felonies or misdemeanors may be correct. The fact of the matter is we have asked them to enforce laws that may be misdemeanors as well as felonies.

I just point out to the gentleman that obviously I am sensitive—I think we are all sensitive—to the argument that we are going to have everybody running around with a gun, and so forth. This I believe, I truly believe, is limited strictly enough. They are going to have regulations issued. These people are going to have, and do have now, law enforcement training at the same academies many of these other agencies the gentleman mentioned have received their training at.

I have just out of the blue received a letter from a constituent today—I do not even know who she is—who wrote to me and told me that her husband

happens to be in the Inspector General's Office, and telling me of the type or people she is fearful her husband will be done in by because he does not have authority to carry a gun. She heard about my amendment, and that is why she wrote me about it. He has to walk into a room of underworld characters, of drug smugglers, international in some cases, because they are also dealing in food stamps, without anything to protect him at all, nothing whatsoever.

We are talking about a very few people designated GS-1811, which is a significant designation for criminal law enforcement in the OID office.

Mr. WALKER. I thank the gentleman for his statement. In closing here, I just want to make a statement. It seems to me the gentleman has offered a carefully drawn, bipartisan amendment that is supported by the Secretary of Agriculture, the Inspector General of the Department of Agriculture, which goes to the heart of the problem of the food stamp program right now; that is, waste, fraud and abuse. If we strike this section from the gentleman's amendment we will strike out our ability to deal with waste, fraud and abuse on an immediate basis. I think this would be tragic. I thank the gentleman for offering his amendment.

Mr. ENGLISH. Mr. Chairman, I move to strike the requisite number of words.

Perhaps, Mr. Chairman, I have a vantage point that some of the other speakers have not had in that I serve on both the Agriculture Committee and the Government Operations Committee. I was part of the Government Operations Committee when we set up the Inspector General's Office in the Department of Agriculture. I can understand and appreciate what the gentleman from Missouri is attempting to do. Certainly we have been frustrated on the Agriculture Committee time and time again in dealing with this problem of abuse of food stamps. Certainly, we have people who are needy who are not receiving benefits while we have those who certainly should not be receiving those benefits who are receiving them, and I know what he is attempting to get at.

On the other hand, in looking at it from the standpoint of the Government Operations Committee and the original intent behind the Inspector General's Office, it was one that was designed, as has been said, to allow the green eyeshade, the accountant, to identify fraud and abuse as well as waste. I can recognize and understand how easy it would be to make a law enforcement office out of the Inspector General's Office.

□ 1730

But I think we are going to have to give a great deal of consideration to the way the food stamp program is set up.

First of all, it is my understanding that the food stamp program is primarily the responsibility of the States. The States have the primary responsibility for carrying out that program. They have the primary responsibility for making certain that all the rules and regulations are obeyed.

So I think that we should involve the States in this particular discussion. How good a job have they done? Have they been able to ferret out this type of fraud, and how much cooperation has the Inspector General's Office received from local and State law enforcement agencies?

Of course, the question also then gets to the point as to whether or not the Inspector General's Office and his deputies are able to carry out their responsibilities to the Congress and to the Government of the United States through the States themselves, as opposed to in fact creating Federal law-enforcement officers.

Then perhaps, finally, we should consider whether or not we can hire enough Federal officials to police the entire food stamp program nationwide, but I do not think that is the intent of the gentleman from Missouri.

Mr. COLEMAN. Mr. Chairman, will the gentleman yield?

Mr. ENGLISH. Certainly; I am happy to yield to the gentleman from Missouri.

Mr. COLEMAN. Mr. Chairman, the gentleman is absolutely right. That is not our intent, and we could not hire enough people to ferret out all the waste, fraud, and abuse. But at least we can do something for these people who are hired to perform their duty, and that is to protect themselves and to be able to make an arrest when they see a violation of law in their presence.

The gentleman knows that the Inspector General has been very aggressive in making arrests and bringing indictments, yes; but they do not have the powers obviously or we would not be here talking about it. The Inspector General, with the cooperation of local police officials and agents, has made 800 arrests this year, and the conviction rate is way over 80 percent.

But the point is that they can do even better, and we are not going to open this up to have them run it alone. We are going to be able to do it with local police officers and local law enforcement officials. But when they walk in there with a local policeman or law enforcement official and everybody goes through the front door and there is a shotgun waiting on the other end, those people have their guns drawn to defend themselves. When one of the Inspector General's guys walks in, I hope he has a bullet-proof vest on because that is all he can have if he wants to have an opportunity to defend himself.

Mr. ENGLISH. Mr. Chairman, I appreciate and understand what the gentleman is saying.

I suppose the real issue in question is whether or not the Congress and the U.S. Government want to in fact place that type of officer in that type of situation or whether or not he should, as I think the Government Operations Committee envisioned—and of course, we certainly have plenty of members here from the committee—be more of an accountant to identify problem areas.

If he uncovers fraud, that would be an area where there would be some possible danger, and if he does uncover fraud, then he can exercise his responsibility by reporting that fraud to law enforcement officials and let them carry out their duties.

Mr. COLEMAN. Mr. Chairman, if the gentleman will yield further, that is fine, but I must ask the question, "When are you guys going to get your act together to do this?" That is the point.

I agree with the gentleman, and if he wants to write a new law and bring it to the floor next week, that is fine. You can write a law and supersede the law that is on the books. We can write a new law, but we have not had any action along that line before now. We have not had any understanding or feeling of compassion that I now see springing up on the floor here.

The people in the Inspector General's office have been batting their heads around trying to get something like this, and the problem is becoming more and more acute. We wait until we have a crisis; we wait until somebody is killed; we wait until we see somebody who is trying to serve his country get killed, just like an FBI agent or somebody in the military who is trying to serve his country.

What kind of things do they get to help them? What kind of tools do we give them? Nothing.

If we do not act on it today, we will not have the opportunity and we will not have the vehicle, and it is going to be locked up in the Judiciary Committee. Notwithstanding all these fine remarks that have been made this afternoon, it is just going to be locked up, and we are not going to be able to do anything.

The CHAIRMAN. The time of the gentleman from Oklahoma (Mr. ENGLISH) has expired.

(By unanimous consent, Mr. ENGLISH was allowed to proceed for 1 additional minute.)

Mr. ENGLISH. Mr. Chairman, the point I am trying to make, if I could have the attention of the gentleman from Missouri (Mr. COLEMAN), is that perhaps the failure is the failure of Congress. Perhaps Congress did not

identify carefully enough exactly what the responsibilities were and what the duties of the Inspector General were, and I think the gentleman is supplying a valuable service in bringing that to the attention of the Congress.

However, I think that is something that deserves very careful consideration as to which avenue we choose to proceed down. I agree with the gentleman; I certainly do not want to see the Inspector General and his deputies placed in that kind of a life-jeopardizing situation, because they deserve to be protected, but at the same time I want to see them do a vigorous job, just as the gentleman does.

Mr. COLEMAN. Mr. Chairman, if the gentleman will yield further, if the gentleman from Oklahoma (Mr. ENGLISH) would bring a bill to the floor, I will be able to support him in such an effort if we get to that point in time.

Mr. KINDNESS. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I am sorry to see that we are dealing with so much confusion this afternoon.

The gentleman from Missouri (Mr. COLEMAN) has stated on more than one occasion that he is waiting for this to be straightened out by the Government Operations Committee or the Judiciary Committee or somebody else. Let us make it perfectly clear that the reason we are here is because there was included in the food stamp law several years back a criminal provision, and it was put into the hands of the Department of Agriculture to administer this criminal law. That came out of the Committee on Agriculture, and our problems started there. We are trying to build on that and enlarge the problem today. I hope we do not do that.

I think it is entirely useless to say that some other committee ought to straighten out the mess that the Agriculture Committee started in the first place. What we ought to do is not deepen the mistake.

I realize that there is a need for law enforcement activity in this field. Let us place it where it belongs. But there are those of us who are not going to stand idly by while these steps are taken in succession to dissemble the fourth amendment, one of the very important parts of the Bill of Rights, and to disperse through these various departments and agencies the law enforcement powers and create a number of law enforcement agencies. That is wrong.

The Inspector General Act did not create this problem. It did perpetuate it by allowing the Office of Inspections in the Department of Agriculture to continue in existence with the function of enforcing criminal laws. But the first mistake was putting criminal law enforcement in the Department of Agriculture. Let us correct that problem.

I am sorry that the gentlemen who made these assertions are not listening at the present time, but perhaps they will work out something to withdraw this amendment or something of the sort. At any rate, it is not just a matter of what committee jurisdiction is involved. This is a matter of much deeper moment than that.

Mr. WEISS. Mr. Chairman, will the gentleman yield?

Mr. KINDNESS. I yield to the gentleman from New York.

Mr. WEISS. Mr. Chairman, I thank the gentleman for yielding, and I want to commend him for his statement.

I think it is a very profound constitutional issue that we are discussing at this time. In 1977 a bill emerged on the floor of the House which sought to give the personnel of the National Park Service the right to search and seize without warrant people who are driving through the national parks if, in the opinion of those National Park Service people, a crime was probably being committed. This House, with the backing of conservationists and civil liberties people—people who adhere to the Constitution—defeated that effort.

Every once in awhile one of the committees that does not have full jurisdiction, such as the Judiciary Committee, gets a bright idea. The motivation is perfectly sound, but they sometimes tend to forget that we are a constitutional government.

The gentleman from Missouri has kept on saying that all this amendment which he has offered does is to allow someone to make an arrest when he sees a crime being committed in his presence. That happens not to be so. I read section 1, which would authorize these people to make an arrest without a warrant for any such criminal violation if such violation is committed or if such employee had probable cause to believe that such violation is being committed in his presence. Now, that is what I have read.

Mr. KINDNESS. Mr. Chairman, if the gentleman will allow me to reclaim my time, on that point I did talk today at length with the gentleman from Missouri, and that is intended to be a narrower scope of function because of the documentary nature of the problem with which they are dealing. It is meant to provide by that that the agent might not be sure that the felony was being committed in his presence until he could get hold of the documentary evidence.

Mr. WEISS. Mr. Chairman, if the gentleman will yield further, I know what the gentleman intends. I am saying this is what he is likely to accomplish outside of what he intends.

The final point I would like to make is that the Department of Justice has spent this year trying to gather unto itself the various law enforcement activities that are going on under Federal auspices. Indeed, there has been a public statement by the Attorney General that he wants the drug enforcement agencies to come within the jurisdiction of the FBI.

For this body now to start spreading out that jurisdiction flies in the face of what the administration is asking for.

The CHAIRMAN. The time of the gentleman from Ohio (Mr. KINDNESS) has expired.

(On request of Mr. COLEMAN, and by unanimous consent, Mr. KINDNESS was allowed to proceed for 1 additional minute.)

Mr. COLEMAN. Mr. Chairman, will the gentleman yield?

Mr. KINDNESS. I yield to the gentleman from Missouri.

Mr. COLEMAN. Mr. Chairman, I would like to point out to my friend, the gentleman from New York (Mr. WEISS)—and he is a friend of mine, and I hope that he would listen——

Mr. WEISS. I will listen.

Mr. COLEMAN. I would point out that in the gentleman's own city, the city of New York, the scene where we have seen so much fraud and abuse in the food stamp program, the Inspector General's office there has the authority that I am trying to give the USDA officials. The gentleman has that in his own city. They have got those powers in his city to clean up the act of New York City, and I say it is necessary to have this on a nationwide basis.

□ 1740

Mr. KINDNESS. If the gentleman would note one thing, we do have a division under our constitutional government between the powers of States and the powers of the Federal Government. I do not care who recommends this amendment, I do not care if the administration likes it, the Department of Agriculture likes it, or who likes it. We are not going to disassemble the fourth amendment without something being said about it.

Mr. ROUSSELOT. Mr. Chairman, will the gentleman yield?

Mr. KINDNESS. I yield to the gentleman from California.

Mr. ROUSSELOT. Did I understand my colleague correctly, the inspector general of the city of New York has this authority to do this? That is incredible. And you are objecting to it for this program that is ladened with fraud and abuse?

PARLIAMENTARY INQUIRY

Mr. DE LA GARZA. Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN. The gentleman will state his parliamentary inquiry.

Mr. DE LA GARZA. Mr. Chairman, we have an amendment composed of four sections of which three sections are unobjectionable, and then there is a question about the fourth one. Is it possible to vote on the unobjectiona-

ble sections without curtailing or limiting further debate on the fourth section?

The CHAIRMAN. The Chair will advise the gentleman that if before the Chair first puts the question on the Coleman amendment there is a request for a division of the question, the remainder of the amendment will be voted on first and the portion on which the division is demanded will be voted on last, and following the adoption or rejection of the portion first voted on, which the gentleman refers to as the objectionable portion, the portion on which a division is demanded will remain open to further debate and amendment.

Mr. DE LA GARZA. I thank the Chairman.

I rise to strike the requisite number of words.

Mr. Chairman, I understand there is a possibility of some agreement on this amendment if we lay over overnight and we have overstayed our welcome in this Chamber for this afternoon. I would hope, if it is possible, knowing that at this point three sections have no objection, that we might reach an agreement at this time that we would rise and come back in the morning with this matter pending. Having had the discussion that we have had here this afternoon from both chairman and the ranking members of the committee, the distinguished members of the Government Operations Subcommittee who have made a very forceful presentation and have presented their viewpoints, perhaps we might agree upon 1 hour tomorrow on the fourth section as sufficient time to conclude the debate on this amendment and any amendment thereto, and then continue with the balance of the bill.

Mr. WALKER. Mr. Chairman, will the gentleman yield?

Mr. DE LA GARZA. I yield to the gentleman from Pennsylvania.

Mr. WALKER. I thank the gentleman for yielding because the gentleman knows it has been my intention to object to time limits on the bill, principally because my feeling was that if we have time to leave the committee's business and go and make partisan remarks on the House floor that we have time to fully debate all of the issues that are before us. So that was to be my intention.

The gentleman has explained now to me what he is trying to do in the hour is accommodate all of the Members, and so in this particular instance I would be restrained and would be very glad to allow him to get his 1 hour of debate. However, I would inform the gentleman that other time limits are certainly subject to objection from this side, because I think the House probably should work its full will on the bill.

Mr. DE LA GARZA. The gentleman from Texas understands the concern of the gentleman and appreciates his cooperation in this effort at this time.

Mr. ASHBROOK. Will the gentleman yield?

Mr. DE LA GARZA. I yield to the gentleman from Ohio.

Mr. ASHBROOK. Further reserving the right to object——

Mr. DE LA GARZA. I would tell the gentleman that it was not a request at this time. But I yield to the gentleman.

Mr. ASHBROOK. Further reserving the right to a future objection, I would say to my colleague that I agree 100 percent with what my friend from Pennsylvania has said. Our friend from Texas, the chairman of the committee, is truly one of the fine Members of this body. I would have to say I think what happened at 4:30 was something that we should be very careful about in the future.

If we want a spirit of trying to solve our problems, if we are going to have a spirit of cooperation of limiting debate, it is a two-way street. I want to simply say that if it were not for my friendship and admiration for the gentleman from Texas I would be constrained to object also. I will not, but I think the point ought to be made.

Mr. DE LA GARZA. I appreciate the gentleman's cooperation and certainly his concern is duly noted.

Mr. ROUSSELOT. Mr. Chairman, will the gentleman yield?

Mr. DE LA GARZA. I yield to the gentleman from California.

Mr. ROUSSELOT. I have some problems with the out-year funding on this, and so if we agree to some kind of limitation here—the dollar amounts have not really been talked about too much. It gets a little expensive, as the gentleman knows.

Mr. DE LA GARZA. The gentleman would not be precluded from addressing that issue at a later point in the debate.

Mr. ROUSSELOT. I would be if the amendment knocks out my ability to change it.

Mr. RICHMOND. Mr. Chairman, will the gentleman yield?

Mr. DE LA GARZA. I yield to the gentleman from New York.

Mr. RICHMOND. The debate on section 1343 of the Coleman amendment, which apparently is limited to 1 hour tomorrow morning, will then close that section but certainly leave the other three sections open for further debate.

Mr. ROUSSELOT. I thank the gentleman.

Mr. COLEMAN. Will the gentleman yield?

Mr. DE LA GARZA. If I still have the time, I yield to the gentleman from Missouri.

Mr. COLEMAN. I am somewhat confused now. Is it the gentleman's intention to move that we limit time on one aspect of this amendment, one section of this amendment tomorrow? Is that the gentleman's intention?

Mr. DE LA GARZA. No; that on that amendment and any amendments thereto, since only one section would require more time to discuss.

PARLIAMENTARY INQUIRY

Mr. COLEMAN. If the gentleman would yield, I would like to make a parlimentary inquiry.

Mr. DE LA GARZA. I yield to the gentleman for that purpose.

Mr. COLEMAN. Mr. Chairman, there seems to be a fiction perpetrated here that there is only one part of this amendment which is controversial, 1340. My question is at what point and in what order do we vote if we were to separate, as has been the indication, separate one out? I would like to know, and I think others would like to point out that there are some extreme difficulties with some of the other sections of this amendment. If we are going to start couching in a one or the other situation, then we are going to have a division on every one of these things if we have a division on one.

The CHAIRMAN. The Chair will advise the gentleman that if a division is requested with respect to section 1343, the enforcement provisions, that a vote would first be taken on the balance of the Coleman amendment, the section upon which a division was demanded would be open for debate and amendment. But the part, of course, that had been voted upon, the balance of the Coleman amendment would be foreclosed from further debate and amendment.

Mr. COLEMAN. If I might inquire of the Chair, what if an objection was made or a division were to be requested or a division were to be made on 1306, would that be voted on first?

The CHAIRMAN. With respect to a demand for a division, assuming the question is divisible, there would be a vote on the part not subject to the demand for a division first.

Mr. COLEMAN. But if there was a demand for a division on 1306, would that precede the vote on 1343?

The CHAIRMAN. If a division were demanded on both, that is correct.

Mr. COLEMAN. I thank the chairman.

Mr. ROUSSELOT. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. The time of the gentleman from Texas has expired.

(By unanimous consent Mr. DE LA GARZA was allowed to proceed for 4 additional minutes.)

Mr. ROUSSELOT. Will the gentleman yield?

Mr. DE LA GARZA. I yield to the gentleman from California.

Mr. ROUSSELOT. I appreciate my colleague yielding. That was my concern that the division vote would first

occur on section 1306, and then I would be prevented, or anybody else, from offering alterations to the funding levels of this thing because that is in section 1306. I do not wish to be preempted, and if that is what the attempt is now I wish to know because the Chair has stated that the vote would first come on the division of 1306.

Mr. DE LA GARZA. But let me inform the gentleman that the whole amendment will be before us as we return, and the gentleman would not be precluded from trying to offer an amendment or getting another separate vote or trying to. All we are trying to do is say we feel one hour should accommodate the remaining contribution tomorrow, and that is as simple as that.

□ 1750

No one would be precluded, to the extent that one hour would handle the balance of the debate on this issue.

Mr. LEVITAS. Mr. Chairman, will the gentleman yield?

Mr. DE LA GARZA. I yield to the gentleman from Georgia.

Mr. LEVITAS. I thank my colleague, the gentleman from Texas, for yielding, and I want to compliment him for his patience in the way he is handling this very difficult and important piece of legislation.

My concern is that if there is a limitation of 1 hour on section 1343, it is altogether possible that overnight there may be some proposals made for compromise. There may even be some additional amendments offered to that section. I wonder, until we have an opportunity to find out what the situation is tomorrow, is it appropriate to ask for the limitation of debate tonight rather than at the beginning of the session in the morning?

Mr. DE LA GARZA. Well, I would tell the gentleman that one of the reasons for trying to do that is that I think we can ascertain the concern of some of the Members. Having sat through this bill now on its sixth sitting, I assure you that it has never been my intention to limit debate. But I have found out, in the last few days, that one discourse would invite another one, and then we get to repetition. With all due respect to the Members—I know that each Member makes a valuable contribution—there is a point in time when we have to finish this legislation. Judging from the contributions already made by the chairman of the committee and by the ranking minority member of the committee, who ostensibly should speak for all of the members of the committee, I cannot see where any contribution of more value than the two distinguished leaders could be made.

So hoping that overnight we might arrive at some form of compromise, we would allow an hour tomorrow to conclude.

Mr. WALKER. Mr. Chairman, will the gentleman yield?

Mr. DE LA GARZA. I yield to the gentleman from Pennsylvania.

Mr. WALKER. I thank the gentleman for yielding.

Mr. Chairman, I think the one thing that needs to be made clear from this side is, if one section of this amendment, of the Coleman amendment, is controversial, all sections of the amendment become controversial.

Mr. DE LA GARZA. The gentleman is correct. I have no quarrel with that.

Mr. WALKER. The point is, then, that the parliamentary situation then becomes extremely important because we would not want to be put in a position on this side to have the waste, fraud and abuse section eliminated and not have an opportunity to act on cutting back on the cap, then, because every section of this amendment ties in with another section, and so there is no way we can describe one section as the controversial section and another section as benign. All sections of this amendment become controversial as soon as you begin to tamper with any one. That is the key question from this side. How can we assure that we are going to be protected that all sections of the amendment have an opportunity to be amended and also be acted upon in a manner timely that will assure all Members have a chance to act on those things that they regard as controversial?

Mr. DE LA GARZA. The gentleman from Texas can give no assurance in that respect, as the gentleman well knows. All that the gentleman from Texas is trying to do is trying to arrive at an agreement. Apparently, we will arrive at no agreement.

So Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker pro tempore (Mr. MURTHA) having assumed the chair, Mr. MCHUGH, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 3603) to provide price and income protection for farmers, assure consumers an abundance of food and fiber at reasonable prices, continue food assistance to low-income households, and for other purposes, had come to no resolution thereon.

PERSONAL EXPLANATION

(Mrs. ROUKEMA asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. ROUKEMA. Mr. Speaker, I was unavoidably detained yesterday and unable to cast my vote against the Weaver amendment. I would like the record to show that, had I been here, I would have voted against the Weaver amendment.

□ 1015

CONGRESS SHOULD NOT BE ALLOWED TO GRANT ITSELF INCREASED PAY AND BENEFITS

(Mr. LEE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LEE. Mr. Speaker, Congress should not be allowed to grant itself increased pay and benefits. That, Mr. Speaker, is a statement of commonsense.

I am today seeking your support for that statement, and for a bold approach to maintaining the perceived integrity of both this House of Congress and the Senate.

This is not a new concept. I am, however, frankly chagrined to admit that an idea with so much value was drafted by the framers of our Constitution in 1789 and has yet to become law.

In 1789, this Nation's Founding Fathers offered 12 amendments to the new Constitution. Ten of those were ratified and became known as the Bill of Rights. Please let me read to you the original, unsuccessful article II of the bill:

> No law varying the compensation for the services of the Senators and Representatives shall take effect until an election of Representatives shall have intervened.

To put that statement in simple terms: No Congress may approve pay or benefit increases for itself. Any change in compensation made by this Congress, for instance, would not take effect until the opening day of the next Congress.

As recently as 1977, the concept of congressional pay deferral was seriously considered in this House and apparently had plently of support. Undue complexity and a handful of additions to the bill containing that concept apparently led to its progression only to the committee level. It is valuable to note, however, that at that time the legislation's pay deferral aspect for Members of Congress received overwhelming support.

I propose to offer this concept anew, in two forms: The first, a return to the Founding Fathers' constitutional amendment to set the course for Congresses to come; the second, a bill to determine the course of this Congress. With proper attention, the change can be affected right here in this Congress where benefits in increased integrity will accrue. Yet even with that done—in an issue so personal and so controversial—I feel that duplication in constitutional amendment, which cannot be changed by congressional caveat, is also in order.

Let me briefly explain that this revolutionary tactic to alleviate apparent conflict of interest in Congress is not new in the member States. Today, only 10 States allowed unrestricted compensation of their own legislators. A vast majority require the kind of waiting period I am proposing now and many require an actual referendum to change constitutions.

What apparently prevented congressional pay deferral approval in past years was disagreement over how widespread the enacting legislation should be. Some Members felt that by incorporating only Members of Congress, the bill singled out legislators in discriminatory fashion. Their concerns were shortsighted.

The simple fact is that we are uniquely capable of making laws in this Nation, and as such we are unique in application of those laws. Today we can find dozens of places where Congress has ordered an entire nation to abide by laws from which it has exempted itself. I find it shallow indeed that cries of discrimination surface only when such an exemption from the practices of others is not to our advantage.

Mr. Speaker, in the last hour of the last day of the Federal fiscal year 1981, this Congress literally sat its way to a better compensation package. Only 32 Members of this House stood to request a recorded vote on the increased compensation package. By their very inaction, the remaining 403 Members gave themselves a raise. I say that this tactic is a hideous abuse of the congressional process.

Raises may be needed for Members of Congress. The job itself is expensive, difficult, and draining on all of us. But I would wager that today, virtually every working man and woman in America feels the same way about his or her job in light of the compensation they receive. We, however, are unique in being able to immediately grant ourselves gratification. I do not need to remind you of how we do that—with the taxpayers' money.

Throughout the business and industrial world, there is a common procedure for getting a raise. Since many of us have been away from the real world for a while, let me remind you of how it is done.

First, the employee does what he or she feels is a good job. They faithfully discharge the duties assigned to them in the best way they know to do. Then they feel that they deserve a raise.

They go to the employer, the boss, the board of directors, or whomever is responsible for balancing the books and they present their justifications for a raise.

Based on the boss' image of that presentation and the work that has been done, the issue of raise is decided.

Our board of directors, the American electorate, is given no opportunity to decide our compensation. Their only choice is to decide, first, if Congress is performing to the standards which voters desire; and second, whether these employees should be left on the job or new ones brought in.

I am currently serving in only my second term in Congress. Yet I have now twice watched as this House used legislative sleight of hand to reward itself without ever having to stand up and be counted. Two terms, two tricks. I consider it only a stroke of the good fortune of each silent Member that his or her constituents continue to allow this to happen.

Mr. Speaker, I just do not think any of us should have to hide our heads or back up to the pay window.

By the same token I do not believe that we should take advantage of our unique ability to compensate ourselves any time we feel the urge. I am pleased to say that I know of none of my colleagues who sought this office purely to gain personal wealth. Yet our actions on pay and benefits packages would leave that perception with many voters.

I am today urging you to join with me in speeding these two integrity-enhancing measures through our congressional processes.

I am extemely pleased today to have my distinguished colleague from California (Mr. GRISHAM) join with me in introduction of this legislation and the recycling of a commonsense amendment to the Constitution. In the days to come, we will seek the personal support of each Member whose district lies between ours—mine in New York and Mr. GRISHAM'S district in California.

We have the opportunity to do much for the image of Congress itself, to begin counteracting the popular perception of those who serve in this body as—in the words of Mark Twain—the only "distinctly native American criminal class."

We have the unusual opportunity to directly inject today, in modern context, the wisdom of those who drafted our Constitution.

This is an ultimately reasonable request. It will allow us to avoid the individual agony of future decisions, and it can return clear conscience to those Members who have long and bitterly felt the need for both increased compensation and integrity of process.

After 192 years of ignoring commonsense, let us not squander this chance.

Thank you.

CONGRESSIONAL COMPENSATION INCREASE DEFERRAL

(Mr. GRISHAM asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GRISHAM. Mr. Speaker, I am pleased to join with my distinguished colleague from New York (Mr. LEE) in offering two pieces of legislation to defer any increase in the compensation of Members of Congress until the people decide if Members deserve a raise. The gentleman from New York is to be commended for his efforts in this area, and I want to associate myself with his remarks.

Mr. Speaker, the idea that congressional pay increases should not take effect until the next Congress convenes is as old as our Constitution itself. One hundred and ninety-two years ago, the framers of the Constitution proposed an amendment designed to prevent any Congress from increasing its own pay. The contitutional amendment that Mr. LEE and I are offering today is identical to that original second amendment.

Additionally, several other legislative institutions have acted on this issue. Today, 24 States have laws on their books that defer pay raises for State legislators. I am proud to say that my own State of California is one of them. Further, 16 States restrict legislative compensation in some other fashion; only 10 have no restrictions.

Mr. Speaker, I want to emphasize the purpose my friend from New York and I share in offering these measures. There is really only one and it is very simple—to let the people decide who among us deserves a pay raise. By requiring that an election of the House of Representatives follow the enactment of any adjustment and deferring that adjustment until the next Congress convenes, the people will have that opportunity—in the voting booth.

Let there be no mistake, Mr. Speaker: In offering these measures, it is not our intention to question the merit of any increase that has been provided to Members in the past. Further, the wisdom of providing Members with increases in the future is not the issue here. Finally, these measures do not seek to address the methods by which Congress deals with specific pay increase proposals.

Denying any Congress the ability to increase its own pay is the one and only goal of these measures. Only the self-employed, who answer to themselves for their performance on the job, should have that right. We are not self-employed, Mr. Speaker, the people are our bosses. They pay our salaries and it is their tax dollars that provide the money for the increases in compensation that we allow. It simply follows that they should have the right to determine if Members deserve a raise before it is reflected in our paychecks.

WORLD POPULATION AND BIRTH CONTROL

The SPEAKER pro tempore (Mr. SMITH of Pennsylvania). Under a previous order of the House, the gentleman from Connecticut (Mr. GEJDENSON) is recognized for 15 minutes.

Mr. GEJDENSON. Mr. Speaker, today I have introduced a bill, with 72 of my colleagues, asking for continued effort in world population control and birth control throughout the world. This is especially appropriate, with President Reagan today in Cancun, at the North-South Conference, taking a look at the disparities in the world as far as wealth and the industrial nations, compared to the underdeveloped nations.

The dangers of continued growth in world population become very evident as we take a look at some of the startling statistics. World population, which is expected to stabilize in the year 2110 at 10.5 billion, will have 90 percent of the world's population in the developing countries. Today we have some 450 million people, about 10 percent of the world's population, living in malnutrition.

Currently some of the countries that have the greatest political turmoil also have the greatest growth in population, and that is no accident; for as population increases at a greater and greater percentage, it takes a greater amount of the country's natural resources to maintain the level of economic growth and the level to which the individuals have a standard of living. If we just take a look at what will occur in countries like Bangladesh, with a 2 million increase yearly, it increases the need for 400,000 tons of grain, 700,000 more jobs, 300,000 more dwelling units, and 11,000 more schools.

As we take a look at what is happening in Latin America, in Africa, and other parts of the world, we can see time and time again that these economic pressures created by overpopulation put tremendous political pressure and create tremendous political upheaval.

To those of us in the industrialized West who are looking for stabilization and a continued growth in democracy throughout the world, it is vitally important that we assist these countries in stabilizing their population.

□ 1800

I might further add that for those of us in this country who might feel secure as a result of our own ability to grow foodstuffs and the strength of our own economy, we only need to look at some of the strategic minerals and other minerals that we import. Of 91 nonfuel minerals and commodities that the United States uses, a net total of 66 are imported. Of 29 strategic minerals, a full 19 are imported from other countries.

So as the pressures for food and other foodstuffs increase the trade in these minerals could even hamper us in this country.

I commend my 72 colleagues who joined with me in this action and would hope that it would pass the House with all deliberate speed.

FREEDOM OF INFORMATION IMPROVEMENTS ACT OF 1981

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Oklahoma (Mr. ENGLISH) is recognized for 5 minutes.

● Mr. ENGLISH. Mr. Speaker, at the request of the Department of Justice, I am today introducing the Freedom of Information Improvements Act of 1981. This bill contains the administration's proposals for amending the Freedom of Information Act. TOM KINDNESS, ranking minority member of the Subcommittee on Government Information and Individual Rights, joins with me in sponsoring this legislation.

I want to emphasize that I am introducing this bill in my capacity as chairman of the Subcommittee on Government Information and Individual Rights and at the request of the Department of Justice. I do not support most of the provisions of the bill, and I strongly disagree with the premises on which the bill is based.

I particularly disagree with some of the statements made by Assistant Attorney General Jonathan Rose when the FOIA package was unveiled last week. Rose called the FOIA a "highly overrated instrument" and said that he did not believe that any important evidence of Government wrongdoing has been made public as a result of FOIA.

The record compiled by my subcommittee at oversight hearings last July demonstrates that the FOIA is an important tool for exposing wrongdoing both within and without the Federal Government. Just to pick one well-known example, the FBI's counterintelligence program—known as COINTELPRO—first came to light as a result of a FOIA request. The hearing record contains other instances too numerous to include here. Many of these disclosures have led to significant savings in Government programs.

If anything, the FOIA has been highly underrated. The subcommittee has received evidence suggesting that for every FOIA request formally filed, as many as twenty other requests are not formally recorded. Bureacrats who know that documents will ultimately have to be disclosed will frequently give up the documents without forcing the requester to make a formal request.

During the subcommittee's oversight hearings, I indicated that those seeking amendments to the law bear the burden of providing adequate justification for their proposals. Based on the scope of the changes being sought by the administration in this bill, this will be a very heavy burden to meet. While it will take time to absorb fully the details of these recommendations, it is apparent that sweeping new restrictions on the availability of information are included in the package.

I am pleased, however, that the administration decided not to ask for a general moratorium on records maintained by the Federal Bureau of Investigation. Such a proposal would have been unnecessarily divisive and would have made consideration of FOIA amendments more difficult. I also note the absence of any provision dealing with access to intelligence information. I agree with the administration that this issue is best left for a separate bill.

I hope that all of those with an interest in the Freedom of Information Act will carefully study the administration's bill. I understand that Senator Hatch has recently introduced his own bill, and I anticipate that other proposals may be introduced in the future. The Subcommittee on Government Information and Individual Rights will hold additional hearings on the freedom of information later this Congress.●

RESPONSE TO EVANS AND NOVAK ON EL SALVADOR

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Michigan (Mr. CROCKETT) is recognized for 5 minutes.

● Mr. CROCKETT. Mr. Speaker, on October 19, the Washington Post and other newspapers across the country carried a column by Rowland Evans and Robert Novak, entitled "Bridge Over the River Lempa," which alleges that 500–600 Cuban troops have been shipped into Nicaragua for the purpose of "occupying" eastern El Salvador. I believe that this column, and its call for further U.S. involvement in El Salvador in response to these alleged occurrences, are based on faulty information and unwarranted assumptions.

I would like to share with my colleagues the text which I have sent to the Washington Post in response to this column. I have also included, for the record, the text of the original column and the response printed in this morning's Washington Post from the Nicaraguan ambassador, His Excellency Arturo J. Cruz:

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
October 21, 1981.

EDITOR,
Washington Post, Washington, D.C.

DEAR SIR: I write in response to the October 19 column of Rowland Evans and Robert Novak, entitled "Bridge Over the River Lempa," which puts forth the asser-

tion tnat Cuban troops were "surreptitiously" shipped to Nicaragua in September "aimed at setting up a revolutionary Marxist government in eastern El Salvador."

Relying upon its own "unimpeachable Latin American sources" as authority for its assertion that four Cuban transport planes left "Havana's Jose Marti airport on September 16, 17, 18 and 19" carrying "between 500 and 600 troops of Cuba's 'quick strike' special forces. . . surreptitiously to Nicaragua," the columnists then extrapolate from these "facts" that the destruction of the Lempa River Bridge in El Salvador, "exactly 26 days later," was accomplished by these Cuban troops.

Most dangerously of all, the column concludes that, "If a subterranean Cuban invasion of El Salvador is in the offing—or perhaps started with destruction of the bridge—U.S. counter-measures far beyond dispatch of a mere 50 Army advisers confined to San Salvador are essential."

This is the same kind of speculative reporting, based on suspect information, that produced our Vietnam debacle. Have we learned nothing from that experience?

If the reporters had but checked the dates given by their "unimpeachable sources" for the claimed massive movement from Havana's airport of 500-600 troops dressed as "everyday tourists," they would have learned that these were the very same dates when delegates from about ninety countries—including the United States—were passing through that airport for assembly in Havana for the 68th Inter-parliamentary Union Conference. These delegates—representatives of their governments' federal legislatures and other seasoned observers—would be rather embarrassing witnesses to such a large troop movement, had it taken place.

I attended that conference in Havana, as an official delegate of the United States. I arrived at Jose Marti airport, as did most of the delegates, on intermittent and unscheduled flights from around the world.

The Jose Marti airport was practically deserted except for the arrival and departure of delegates to the Conference. There were no large groups of persons, dressed as tourists or in any other manner.

Indeed, at the same time these troops were supposedly preparing to be shipped out, President Castro was opening the IPU Conference with a vitriolic attack upon the United States for its own "fascist" foreign policy of intervention in the area.

It is inconceivable to me that your reporters did not check further into their "unimpeachable sources", but reported such an antagonistic story in order to gain support for further U.S. involvement in the internal struggle now taking place in El Salvador.

I can only hope that those who would be moved by such inflammatory rhetoric and alleged facts will also read the comprehensive response of His Excellency Arturo J. Cruz, the Nicaraguan ambassador to the United States, in the October 21 Post (Letters to the Editor), wherein his government completely and categorically denies the allegations of Evans and Novak.

We don't need U.S. troops in El Salvador, and we don't need a campaign of fear and Cold War mentality to stampede us into unwarranted actions there. What we do need, and what is continually lost on this Administration and apparently on Mr. Evans and Mr. Novak, is a commitment to support a negotiated and just settlement of the El Salvador situation.

Sincerely,

GEO. W. CROCKETT, JR.,
Member of Congress.

BRIDGE OVER THE RIVER LEMPA

Between 500 and 600 troops of Cuba's "quick strike" special forces flew surreptitiously to Nicaragua last month—with Cuba's ambassador to Nicaragua aboard the last flight—in a move that may be aimed at setting up a revolutionary Marxist government in eastern El Salvador.

Fidel Castro's gall and self-confidence in transporting a concealed strike force, under the control of Cuba's minister of the interior, for combat in beleaguered El Salvador has shocked the highest officials in the Reagan administration.

But beyond shock, the movement of these forces from Havana's José Marti airport on Sept. 16, 17, 18, and 19 to Managua's Sandino airport poses a critical choice for the Reagan administration: to tell the world the truth about the advanced stage of Castro's Soviet-backed plan to seize control of El Salvador and meet it head-on; or to continue fudging the issue in hope that some miracle will make it go away.

The bare facts of what amounts to another Cuban foreign intervention, made available to us from unimpeachable Latin American sources, are as follows: the four Cuban transport planes, known as 1462s, were ostensibly filled with everyday tourists; their arms, loaded by special cargo handlers, were concealed in what looked like tourist trunks and other commonplace luggage.

When the Sept. 19 flight arrived at Managua's Sandino airfield, the "quick strike" troops, trained for special operations, were whisked into waiting helicopters, which disappeared over the Nicaraguan jungles. Julian Lopez, Cuba's ambassador to Nicaragua, was aboard.

Exactly 26 days later, in the pre-dawn morning of Oct. 15, the most important bridge over the Lempa River that cuts El Salvador in two was blown up. That supposedly well-defended bridge connects the lightly populated eastern third of El Salvador, facing Nicaragua, from the rest of the embattled country and its capital, San Salvador.

Castro's scheme may have classic simplicity; use the 500- to 600-man special force now in Nicaragua to occupy, without possibility of military resistance, the eastern third of El Salvador, establish a Soviet-backed communist government and use it to rally world support for the so-called Democratic Revolutionary Front.

Destruction of the *Puente del Oro*, one of only two spans over the milewide Lempa, betrayed a made-in-Cuba professionalism. If the second bridge is also blown, the eastern third of El Salvador will be beyond rescue by the Salvadoran army, creating ideal conditions for infiltrating Cubans to consolidate control by the insurgents.

Given this ominous event, President Reagan faces not some vague future crisis in the deteriorating Caribbean, he confronts an acute emergency demanding quick decision by an administration that has not shown much sophistication in handling more than one crisis at a time.

Last spring and summer the White House ignored the threatening Mideast crisis while it tackled the budget and tax cuts. It paid heavily when the AWACS crisis, escalating almost out of control, sponged up all the president's attention and that of his chief national secuirty advisers the past month.

If a subterranean Cuban invasion of El Salvador is in the offing—or perhaps started with destruction of the bridge—U.S. countermeasures far beyond the dispatch of a mere 50 Army advisers confined to San Salvador are essential. But despite tough talk ever since Reagan took office, the administration is far short of agreement on what those countermeasures should be.

Last spring a top national security official returned from a trip to El Salvador with this somber report: a Cuban force composed of one tank company—comprising 20 to 30 tanks—and one infantry company in trucks or armored personnel carriers could race unimpeded from Nicaragua up the Pan American Highway through a corner of Honduras and secure eastern El Salvador "in 36 hours."

No predictions are being heard here of any such overt, blatant Cuban invasion, but under the heavy cloud cover of the current rainy season it is not ruled out. More likely is slow, steady infiltration, sabotage and the isolation of the eastern third of El Salvador, an intervention that makes a mockery of the mere 50 U.S. military advisers Reagan sent to San Salvador despite angry reproaches from the U.S. Congress to keeps hands off.

THE AMBASSADOR OF NICARAGUA RESPONDS

On behalf of the government of Nicaragua, I wish to totally, categorically deny the report in the Rowland Evans and Robert Novak column of Oct. 19, published in The Post under the title of "Bridge Over the River Lempa" (op-ed). That column alleges—based on unidentified sources—Nicaragua has been used by Cuba and Fidel Castro, as a staging area to mount an attack on El Salvador.

The government of Nicaragua is indignant at the allegation and is very concerned about the repercussions such a melicious accusation could have on the development of a positive and harmonious relationship between the government of Nicaragua and the United States, which my government seeks.

My government wished to make it clear to the American people that Nicaragua has not and will not permit its sovereign territory to be uses as a staging point by anyone for any direct or indirect military intervention in the affairs of El Salvador, or of any other country.

Nicaragua maintains full diplomatic relations with the government of El Salvador and is completely and totally committed to a peaceful solution to the tragic internal conflict in that country. In this regard, the government of Nicaragua has fully endorsed the joint French-Mexican proposal, supported by other friendly governments, for a peaceful and negotiated solution in El Salvador.

Indeed, the government of Nicaragua has striven to achieve a negotiated settlement in El Salvador. On Oct. 7, the chief of state of my government, Comandante Daniel Ortega Saavedra, presented to the United Nations a specific proposal for peace in El Salvador through negotiations without any preconditions.

My government is therefore greatly encouraged by the announcement of Sen. Christopher Dodd of Connecticut, on Oct. 16, that President José Napoleon Duarte's Christian Democratic Party has informally agreed to negotiate with the opposition forces in a sincere effort to achieve peace.

My government applauds this decision by President Duarte and his party, as well as Sen. Dodd for his noble efforts to encourage negotiations.

Immediately upon communicating the substance of the Evans and Novak article to my government, it instructed me to inform the U.S. Department of State of the complete untruth of the allegation. During my discussions with the Department of State, I took the occasion to reiterate the desire of the government of Nicaragua for a positive and harmonious relationship with the United States and for peaceful relations with all of our neighbors.

The government of Nicaragua was very pleased by the recent visit by Assistant Secretary of State Thomas Enders to our country and felt that it helped pave the way for closer and more friendly relations between our two governments. Mr. Enders has provided a number of constructive suggestions following up on that meeting, to which the government of Nicaragua will be shortly responding.

Whatever the purpose and motive behind the Evans and Novak article, its unfounded allegations can only complicate the efforts of our government to move toward the closer and friendlier relationship we desire with the United States. Nevertheless, we will remain undeterred in our efforts, and we will continue to pursue such a relationship to the utmost of our abilities.

I greatly appreciate this opportunity to rebut the irresponsible contention in the Evans and Novak article.

ARTURO J. CRUZ,
Ambassador of Nicaragua.

WASHINGTON.

BANKING COMMITTEE HEARS 71 WITNESSES IN DAY-LONG GRASSROOTS HEARING ON THE ECONOMY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Rhode Island (Mr. ST GERMAIN) is recognized for 5 minutes.

Mr. ST GERMAIN. Mr. Speaker, on Monday, the Banking, Finance and Urban Affairs Committee was in St. Paul, Minn., to hear testimony on the impact of current economic conditions and policies on the economy of that area.

This is the first in a series of six hearings which our committee will conduct across the Nation in an attempt to obtain a grassroots readings on the economic problems that most concern Americans today.

On Monday, the committee sat from shortly after 9:30 a.m. to just before 7 p.m.—about 9½ hours of non stop testimony—everyone from unemployed workers, to the independent supermarket operator, to the high school principal who could not find mortgage money, to the 85-year-old senior citizen who was not sure how she was going to pay her gas bills this winter.

Mr. Speaker, I do not want to put words in the mouths of my colleagues, but I do not think anyone came away from that hearing without being impressed by the stories of these hard-working citizens—people impacted by high-interest rates, lack of employment opportunities, rising utility costs, and without being concerned about the ability of local governments to pick up the slack left by Federal budget cuts.

Mr. Speaker, the turnout was so great that the committee decided to forego a lunch break. We ate right there and continued to hear the witnesses throughout the day and long after the sun had set—by about 7 p.m.—we had heard 71 people from various parts of Minnesota, of various backgrounds, of various interests.

All of us, Mr. Speaker, will long remember the sight of that intense, blond-headed young auto worker who had been laid off * * * a family to raise, two children, a $600-a-month mortgage and unemployment compensation that runs out 1 week from this coming Saturday.

In response to comments from some of the members, this young worker told the committee:

I don't want your charity, your welfare, all I want is a job . . . all I am asking is a chance to work and support my family . . . that's all I'm asking . . . I can't feed my family on hope.

And Mr. Speaker, at the other end of this witness table was a black worker, perhaps in his forties, who leaned forward and told the committee that he had a master's degree, had taught school, only to lose that job as enrollment declined, finally deciding to work with his hands in an automobile plant. Now, he was seeing that job fade away while he attempted, as a single parent, to raise his children. He told us he had wanted to remarry, but had decided against it because of unsettled economic conditions and after seeing two jobs literally disappear from under him—through events over which he had no control.

And it will be awhile, Mr. Speaker, before the story is forgotten of the gentlemen who appeared before the committee in a three-piece suit to tell us of the problems of a family-run independent supermarket. His family, for three generations, he told us, had run several supermarkets in the Rochester, Minn., area, and now he wondered whether the business would survive for a fourth generation in the face of high interest rates.

And there was the young Hispanic in St. Paul who had struggled to set up his own plumbing and heating business, working long hours to make his small firm a success. His opportunities were being wiped out as high interest rates crushed the homebuilding industry.

Mr. Speaker, these are just a handful of the stories that were related during the long day. We heard dozens of stories of people trying to hold neighborhoods together, to keep small businesses afloat, to borrow money to pay utility bills, to find rental housing, to find jobs.

Mr. Speaker, we will be holding another hearing in Seattle on November 6. We will be in Tucson on November 7, Chicago on November 9, Atlanta on November 13 and Providence on November 23.

AIRPORT AND AIRWAY REVENUE ACT OF 1981

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. ROSTENKOWSKI) is recognized for 5 minutes.

● Mr. ROSTENKOWSKI. Mr. Speaker, today I am introducing legislation which will be used as the vehicle for the Ways and Means Committee markup of the Airport and Airway Revenue Act of 1981. I am joined in this effort by the Honorable BARBER B. CONABLE, JR., ranking minority member of the Committee on Ways and Means. This act will become the financing title to accompany H.R. 2643, the Airport and Airway Improvment Act of 1981, as reported by the House Public Works Committee.

This proposal does justice, I believe, to all the parties affected by the aviation excise taxes imposed to fund our airport development and safety programs. It charts a middle course between the levels of tax proposed by the administration and the lower levels urged by those who appeared at the Committee on Ways and Means hearing on this matter. It will provide adequate funding for the airport and airway programs proposed by the Public Works Committee while moderating the existing high trust fund balances. As such, this legislation attempts to find an acceptable balance between the competing views on these matters; however, neither Mr. CONABLE nor I are inflexibly committed to the tax levels proposed in this bill if members of the Committee on Ways and Means can be persuaded that the higher tax rates supported by the administration are warranted.

BACKGROUND

On October 1, 1980, many of the aviation excise taxes expired or were reduced and the deposit of aviation tax revenues into the airport and airway trust fund was terminated. Although the Ways and Means Committee had acted on legislation in the second session of the 96th Congress to extend the trust fund and its taxes—(title II of H.R. 6721, the Airport and Airway Revenue Act of 1980)—final congressional action was not taken prior to adjournment of the 96th Congress.

As a result, the passenger ticket tax was automatically reduced from 8 percent to its present rate of 5 percent, the fuel tax on gasoline was reduced from 7 cents to 4 cents per gallon, and a number of taxes expired, including the 7-cents-per-gallon fuel tax on jet

fuel, the $3-per-person international departure tax, the 5-percent air freight waybill tax, and the aircraft use taxes. The revenues that are currently being collected are deposited in the general fund. In addition, the revenues from the aircraft tires and tubes taxes, imposed at the general rates for nonhighway use, have remained in the highway trust fund instead of being transferred to the airport and airway trust fund.

Earlier this year, the administration submitted its proposals relating to aviation excise taxes and trust fund provisions. In their current form, these proposals would increase the ticket tax to 6.5 percent and the fuel taxes would be increased over a period of years as follows: the 4-cents-per-gallon tax on gasoline would be increased to 12 cents in fiscal year 1982, phasing up to 36 cents after fiscal year 1985; the jet fuel tax would be imposed at 20 cents per gallon in fiscal year 1982, phasing up to 65 cents after fiscal year 1985. The air freight waybill tax and the international departure tax would be restored at prior tax levels. The aircraft use taxes would not be reinstated. In addition, the trust fund's spending purposes would be amended to generally permit expenditures for operation, safety and regualtory activities by the Federal Aviation Administration. There would not be any expiration dates for aviation taxes or transfers to the trust fund. The administration's commitment to the increased user taxes or general aviation was reaffirmed by the President in his September 24, 1981, speech to the Nation describing his fall budget program.

At the Ways and Means Committee hearing on October 14, 1981, on this matter, most witnesses urged tax levels below those proposed by the administration and a number of technical modifications to the taxes on air passengers were suggested.

PROPOSAL

The Airport and Airway Revenue Act of 1981 would extend the airport and airway trust fund and its taxes through the end of 1983, consistent with the 2-year spending program proposed by the House Public Works Committee. In addition, the bill simplifies the statutory trust fund language and more closely coordinates the trust fund with the excise taxes which fund it. Changes proposed to the aviation excise taxes would be effective January 1, 1982, and on that date all revenues from the aviation taxes would be transferred into the airport and airway trust fund. Trust fund revenues would be available for the purposes specified in H.R. 2643 as reported.

Under this proposal, the passenger ticket tax would continue at its present 5-percent rate and the freight waybill tax would be reinstated at its prior rate of 5 percent. The international departure tax would be reinstated at a rate of $5 per person. The fuel tax would be imposed at 12 cents per gallon for both gasoline and jet fuel and the tire and tube taxes would continue as under present law. The prior-law use taxes would not be reinstated for either commercial or general aviation. In addition, a number of technical modifications would be made to simplify the taxes as they apply to travel between the United States and Alaska or Hawaii, to eliminate the requirement that the ticket fare and tax be shown in trip segments, to extend the 6-hour layover rule for international travel to 12 hours, to reinstate the charge to the airlines for overtime costs of customs personnel for Sunday and holiday service, and to permit the Secretary of the Treasury to waive the 225-mile-zone rule for travel to Canada and Mexico under certain conditions. Several of these changes were included in the 1980 Committee on Ways and Means amendment.

At this point in the RECORD I would like to insert a copy of the bill, H.R. 4800:

H.R. 4800

A bill to reinstate certain taxes imposed on aviation, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

TITLE II—AIRPORT AND AIRWAY REVENUE ACT OF 1981

SEC. 201. SHORT TITLE; AMENDMENT OF 1954 CODE.

(a) SHORT TITLE.—This title may be cited as the "Airport and Airway Revenue Act of 1981".

(b) AMENDMENT OF 1954 CODE.—Except as otherwise expressly provided, whenever in this title an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Internal Revenue Code of 1954.

SEC. 202. TAX ON FUEL USED IN NONCOMMERCIAL AVIATION.

(a) INCREASE IN TAX.—

(1) Paragraph (1) of section 4041(c) (relating to imposition of tax on fuel for noncommercial aviation) is amended by striking out "7 cents" and inserting in lieu thereof "12 cents".

(2) Paragraph (3) of section 4041(c) (relating to rate of tax on gasoline for noncommercial aviation) is amended by striking out "3 cents" and inserting in lieu thereof "8 cents".

(b) REINSTATEMENT.—Paragraph (5) of section 4041(c) (relating to termination of tax on fuel for noncommercial aviation) is amended to read as follows:

"(5) PERIOD DURING WHICH TAXES APPLY.—The taxes imposed by paragraphs (1) and (2) shall apply on and after January 1, 1982, and before January 1, 1984."

(c) EFFECTIVE DATE.—The amendments made by this section shall take effect on January 1, 1982.

SEC. 203. TAX ON TRANSPORTATION BY AIR.

(a) TRANSPORTATION OF PERSONS.—Subsections (a) and (b) of section 4261 (relating to tax on transportation of persons by air) is amended by striking out "8 percent" and inserting in lieu thereof "5 percent".

(b) USE OF INTERNATIONAL TRAVEL FACILITIES.—

(1) INCREASE IN AMOUNT OF TAX.—Subsection (c) of section 4261 (relating to use of international travel facilities) is amended by striking out "$3" and inserting in lieu thereof "$5".

(2) REINSTATEMENT.—Subsection (e) of section 4261 (relating to reduction, etc., of rates) is amended to read as follows:

"(e) PERIOD DURING WHICH TAX IMPOSED BY SUBSECTION (c) APPLIES.—The tax imposed by subsection (c) shall apply with respect to transportation beginning after December 31, 1981, and before January 1, 1984."

(c) REINSTATEMENT OF TAX ON TRANSPORTATION OF PROPERTY BY AIR.—Subsection (d) of section 4271 (relating to termination) is amended to read as follows:

"(d) PERIOD DURING WHICH TAX APPLIES.—The tax imposed by subsection (a) shall apply with respect to transportation beginning after December 31, 1981, and before January 1, 1984."

(d) TECHNICAL MODIFICATIONS.—

(1) ELIMINATION OF EXCLUSION FOR CERTAIN TRAVEL.—

(A) IN GENERAL.—Subsection (b) of section 4262 (relating to exclusion of certain travel) is hereby repealed.

(B) RETENTION OF EXCLUSION FOR TAX ON TRANSPORTATION OF PROPERTY.—Paragraph (1) of section 4272(b) (relating to exceptions) is amended by striking out "section 4262(b)" and inserting in lieu thereof "section 4262(b) (as in effect on the day before the date of the enactment of the Airport and Airway Revenue Act of 1981)".

(C) CONFORMING AMENDMENTS.—

(i) Subsection (c) of section 4262 is amended by striking out paragraph (1) and redesignating paragraphs (2) and (3) as paragraphs (1) and (2), respectively.

(ii) Paragraph (2) of section 4262(a) is amended by striking out "subsection (c)(3)" and inserting in lieu thereof "subsection (c)(2)".

(2) LONGER LAYOVER PERMITTED TO QUALIFY AS UNINTERRUPTED INTERNATIONAL AIR TRANSPORTATION.—Paragraph (3) of section 4262(c) (defining uninterrupted international air transportation) is amended by striking out "6 hours" each place it appears and inserting in lieu thereof "12 hours".

(3) AUTHORITY TO WAIVE 225-MILE ZONE PROVISIONS.—Section 4262 (defining taxable transportation) is amended by adding at the end thereof the following new subsection:

"(e) AUTHORITY TO WAIVE 225-MILE ZONE PROVISIONS.—

"(1) IN GENERAL.—If the Secretary of the Treasury determines that Canada or Mexico has entered into a qualified agreement—

"(A) the Secretary shall publish a notice of such determination in the Federal Register, and

"(B) effective with respect to transportation beginning after the date specified in such notice, to the extent provided in the agreement the term '225-mile zone' shall not include part or all of the country with respect to which such determination is made.

"(2) TERMINATION OF WAIVER.—If a determination was made under paragraph (1) with respect to any country and the Secretary of the Treasury subsequently determines that the agreement is no longer in effect or that the agreement is no longer a qualified agreement—

"(A) the Secretary shall publish a notice of such determination in the Federal Register, and

"(B) subparagraph (B) of paragraph (1) shall cease to apply with respect to transportation beginning after the date specified in such notice.

"(3) QUALIFIED AGREEMENT.—For purposes of this subsection, the term 'qualified agreement' means an agreement between the United States and Canada or Mexico (as the case may be)—

"(A) setting forth that portion of the country which is not to be treated as within the 225-mile zone, and

"(B) providing that the tax imposed by such country on transportation described in subparagraph (A) will be at a level which the Secretary of the Treasury determines to be appropriate.

"(4) REQUIREMENT THAT AGREEMENT BE SUBMITTED TO CONGRESS.—No notice may be published under paragraph (1)(A) with respect to any qualified agreement before the date 90 days after the date on which a copy of such agreement was furnished to the Committee on Ways and Means of the House of Representatives and the Committee on Finance of the Senate."

(4) REPEAL OF CERTAIN TERMINATED TAXES.—

(A) IN GENERAL.—Subchapter E of chapter 36 is hereby repealed.

(B) TECHNICAL AND CONFORMING AMENDMENTS.—

(i) The table of subchapters for chapter 36 is amended by striking out the item relating to subchapter E.

(ii) Section 4281 (relating to small aircraft on nonestablished lines) is amended—

(I) by striking out "(as defined in section 4492(b))", and

(II) by adding at the end thereof the following new sentence: "For purposes of the preceding sentence, the term 'maximum certificated takeoff weight' means the maximum such weight contained in the type certificate or airworthiness certificate."

(iii)(I) Subsection (a) of section 6156 is amended by striking out "or 4491".

(II) Paragraph (2) of section 6156(e) is amended by striking out "in the case of the tax imposed by section 4481".

(III) The section heading for section 6156 is amended by striking out "AND CIVIL AIRCRAFT".

(IV) The table of sections for subchapter A of chapter 62 is amended by striking out "and civil aircraft" in the item relating to section 6156.

(iv)(I) Section 6426 is hereby repealed.

(II) The table of sections for subchapter B of chapter 65 is amended by striking out the item relating to section 6426.

(e) EFFECTIVE DATE.—The amendments made by this section shall apply with respect to transportation beginning after December 31, 1981.

SEC. 204. MANNER IN WHICH TAX ON TRANSPORTATION BY AIR IS REQUIRED TO BE SHOWN ON AIRLINE TICKETS.

(a) GENERAL RULE.—Subsection (a) of section 7275 (relating to penalty for offenses relating to certain airline tickets and advertising) is amended to read as follows:

"(a) TICKETS.—In the case of transportation by air all of which is taxable transportation (as defined in section 4262), the ticket for such transportation shall show the total of—

"(1) the amount paid for such transportation, and

"(2) the taxes imposed by subsections (a) and (b) of section 4261."

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall apply with respect to transportation beginning after the date of the enactment of this Act.

SEC. 205. EXTENSION OF AIRPORT AND AIRWAY TRUST FUND.

(a) GENERAL RULE.—The Internal Revenue Code of 1954 is amended by adding at the end thereof the following new subtitle:

"Subtitle I—Trust Fund Code

"SEC. 9500. SHORT TITLE.

"This subtitle may be cited as the "Trust Fund Code of 1981".

"Chapter 98—TRUST FUND CODE

"Subchapter A. Establishment of Trust Funds.

"Subchapter B. General provisions.

"Subchapter A—Establishment of Trust Funds

"SEC. 9501. Establishment of airport and airway trust fund.

"SEC. 9501. ESTABLISHMENT OF AIRPORT AND AIRWAY TRUST FUND.

"(a) CREATION OF TRUST FUND.—There is established in the Treasury of the United States a trust fund to be known as the 'Airport and Airway Trust Fund', consisting of such amounts as may be appropriated or credited to the Airport and Airway Trust Fund as provided in this section or section 9602(b).

"(b) TRANSFER TO AIRPORT AND AIRWAY TRUST FUND OF AMOUNTS EQUIVALENT TO CERTAIN TAXES.—There is hereby appropriated to the Airport and Airway Trust Fund—

"(1) amounts equivalent to the taxes received in the Treasury after December 31, 1981, and before January 1, 1984, under subsections (c) and (d) of section 4041 (taxes on aviation fuel) and under sections 4261 and 4271 (taxes on transportation by air);

"(2) amounts determined by the Secretary of the Treasury to be equivalent to the taxes received in the Treasury after December 31, 1981, and before January 1, 1984, under section 4081, with respect to gasoline used in aircraft; and

"(3) amounts determined by the Secretary of the Treasury to be equivalent to the taxes received in the Treasury after December 31, 1981, and before January 1, 1984, under paragraphs (2) and (3) of section 4071(a), with respect to tires and tubes used on aircraft.

"(c) APPROPRIATION OF ADDITIONAL SUMS.—There are hereby authorized to be appropriated to the Airport and Airway Trust Fund such additional sums as may be required to make the expenditures referred to in subsection (d) of this section.

"(d) EXPENDITURES FROM AIRPORT AND AIRWAY TRUST FUND.—

"(1) AIRPORT AND AIRWAY PROGRAM.—Amounts in the Airport and Airway Trust Fund shall be available, as provided by appropriation Acts, for making expenditures before October 1, 1983, to meet those obligations of the United States—

"(A) incurred under title I of the Airport and Airway Development Act of 1970 or of the Airport and Airway Development Act Amendments of 1976 or of the Aviation Safety and Noise Abatement Act of 1979 or under the Fiscal Year 1981 Airport Development Authorization Act (as such Acts were in effect on the date of enactment of the Fiscal Year 1981 Airport Development Authorization Act) or incurred under the provisions of the Airport and Airway Improvement Act of 1981 (as such provisions were contained in such legislation as reported by the House Committee on Public Works);

"(B) heretofore or hereafter incurred under the Federal Aviation Act of 1958, as amended (49 U.S.C., sec. 1301 et seq.), which are attributable to planning, research and development, construction, or operation and maintenance of—

"(i) air traffic control,

"(ii) air navigation,

"(iii) communications, or

"(iv) supporting services,

for the airway system; or

"(C) for those portions of the administrative expenses of the Department of Transportation which are attributable to activities described in subparagraph (A) or (B).

"(2) TRANSFERS FROM AIRPORT AND AIRWAY TRUST FUND ON ACCOUNT OF CERTAIN REFUNDS.—The Secretary of the Treasury shall pay from time to time from the Airport and Airway Trust Fund into the general fund of the Treasury amounts equivalent to the amounts paid after December 31, 1981, and before January 1, 1984, in respect of fuel used in aircraft, under section 6420 (relating to amounts paid in respect of gasoline used on farms), 6421 (relating to amounts paid in respect of gasoline used for certain nonhighway purposes), or 6427 (relating to fuels not used for taxable purposes).

"(3) TRANSFERS FROM AIRWAY TRUST FUND ON ACCOUNT OF CERTAIN SECTION 39 CREDITS.—The Secretary of the Treasury shall pay from time to time from the Airport and Airway Trust Fund into the general fund of the Treasury amounts equivalent to the credits allowed under section 39 with respect to fuel used after December 31, 1981, and before January 1, 1984. Such amounts shall be transferred on the basis of estimates by the Secretary of the Treasury, and proper adjustments shall be made in amounts subsequently transferred to the extent prior estimates were in excess of or less than the credits allowed.

"Subchapter B—General Provisions

"Sec. 9601. Transfer of amounts.

"Sec. 9602. Management of Trust Fund.

"SEC. 9601. TRANSFER OF AMOUNTS.

"The amounts appropriated by any section of subchapter A to any Trust Fund established by such subchapter shall be transferred at least quarterly from the general fund of the Treasury to such Trust Fund on the basis of estimates made by the Secretary of the Treasury of the amounts referred to in such section. Proper adjustments shall be made in the amounts subsequently transferred to the extent prior estimates were in excess of or less than the amounts required to be transferred.

"SEC. 9602. MANAGEMENT OF TRUST FUND.

"(a) REPORT.—It shall be the duty of the Secretary of the Treasury to hold each Trust Fund established by subchapter A, and to report to the Congress each year on the financial condition and the results of the operations of such Trust Fund during the preceding fiscal year and on its expected condition and operations during the next five fiscal years. Such report shall be printed as a House document of the session of the Congress to which the report is made.

"(b) INVESTMENT.—

"(1) IN GENERAL.—It shall be the duty of the Secretary of the Treasury to invest such portion of any Trust Fund established by subchapter A as is not, in his judgment, required to meet current withdrawals. Such investments may be made only in interest-bearing obligations of the United States. For such purpose, such obligations may be acquired—

"(A) on original issue at the issue price, or

"(B) by purchase of outstanding obligations at the market price.

"(2) SALE OF OBLIGATIONS.—Any obligation acquired by a Trust Fund established by subchapter A may be sold by the Secretary of the Treasury at the market price.

"(3) INTEREST ON CERTAIN PROCEEDS.—The interest on, and the proceeds from the sale or redemption of, any obligations held in a Trust Fund established by subchapter A shall be credited to and form a part of the Trust Fund."

(b) REPEAL OF SECTION 208 OF THE AIRPORT AND AIRWAY REVENUE ACT OF 1970.—Section 208 of the Airport and Airway Revenue Act of 1970 is hereby repealed.

(c) CLERICAL AMENDMENT.—The table of subtitles for such Code is amended by adding at the end thereof the following new item:

"Subtitle I. Trust Fund Code."

(d) EFFECTIVE DATE.—

(1) IN GENERAL.—The amendments made by this section shall take effect on January 1, 1982.

(2) SAVINGS PROVISIONS.—The Airport and Airway Trust Fund established by the amendments made by this section shall be treated for all purposes of law as the continuation of the Airport and Airway Trust Fund established by section 208 of the Airport and Airway Revenue Act of 1970. Any reference in any law to the Airport and Airway Trust Fund established by such section 208 shall be deemed to include a reference to the Airport and Airway Trust Fund established by the amendments made by this section.

SEC. 206. CERTAIN REIMBURSEMENTS MADE TO CUSTOMS SERVICE.

Effective on and after January 1, 1982, the first sentence of subsection (e) of section 53 of the Airport and Airway Development Act of 1970 shall not apply with respect to the compensation and expenses of customs officers and employees.●

EXPLANATION AS TO VOTE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. DANIELSON) is recognized for 5 minutes.

● Mr. DANIELSON. Mr. Speaker, I was presiding over the House as Speaker pro tempore on October 20, 1981, when the House voted on rollcall No. 268, and agreed to resolve itself into the Committee of the Whole for the consideration of H.R. 3603, the Food and Agriculture Act. The vote was 384 yeas to 3 nays, 1 Member voting "present."

Inasmuch as I was sitting as Speaker pro tempore, I favored myself with enjoying the privilege usually exercised by the Speaker himself and refrained from voting. If I had chosen to vote, I would have voted "yea."●

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. RATCHFORD) to revise and extend their remarks and include extraneous material:)

Mr. GEJDENSON, for 15 minutes, today.
Mr. GONZALEZ, for 15 minutes, today.
Mr. ANNUNZIO, for 5 minutes, today.
Mr. ENGLISH, for 5 minutes, today.
Mr. CROCKETT, for 5 minutes, today.
Mr. ST GERMAIN, for 5 minutes, today.
Mr. HUGHES, for 5 minutes, today.
Mr. ROSTENKOWSKI, for 5 minutes, today.
Mr. DANIELSON, for 5 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. GOLDWATER, prior to the vote on the Shamansky amendment to H.R. 3603 in the Committee of the Whole today.

Mr. BROOKS, on title VI—rice, of H.R. 3603, Food and Agriculture Act of 1981.

(The following Members (at the request of Mr. DREIER) and to include extraneous matter:)

Mr. KINDNESS.
Mr. WILLIAMS of Ohio.
Mr. LIVINGSTON.
Mr. LEWIS in two instances.
Mr. CORCORAN.
Mr. LAGOMARSINO.
Mr. DANNEMEYER.
Mr. PORTER.
Mr. RITTER in two instances.
Mr. MICHEL.
Mrs. MARTIN of Illinois.
Mr. RAILSBACK in two instances.
Mr. YOUNG of Alaska.
Mr. LENT.
Mr. WOLF.
Mr. HYDE.
Mr. GOODLING.
Mr. COATS in two instances.
Mr. DORNAN of California.
Mr. SCHULZE.
Mr. PETRI.

Mr. FAUNTROY.
Mr. CONYERS.
Mr. SCHUMER.

ENROLLED BILL AND JOINT RESOLUTION SIGNED

Mr. HAWKINS, from the Committee on House Administration, reported that that committee had examined and found truly enrolled a bill and a joint resolution of the House of the following titles, which were thereupon signed by the Speaker:

H.R. 3499. An act to amend title 38, United States Code, to extend the period for Vietnam-era veterans to request counseling under the veterans' readjustment counseling program, to provide medical care eligibility for veterans exposed to herbicides or defoliants (including agent orange), or to nuclear radiation, to establish a minimum total number of operating beds in Veterans' Administration hospital and nursing home facilities, to extend for certain Vietnam-era veterans the period of time in which GI bill educational assistance benefits may be used for the pursuit of certain training, to provide a small business loan program for Vietnam-era disabled veterans, and to extend the authority for veterans readjustment appointments in the civil service; and for other purposes; and

H.J. Res. 268. Joint resolution to designate October 23, 1981, as "Hungarian Freedom Fighters Day."

SENATE ENROLLED BILL AND JOINT RESOLUTION SIGNED

The SPEAKER announced his signature to an enrolled bill and joint resolution of the Senate of the following titles:

S. 1209. An act authorizing appropriations to the Secretary of the Interior for services necessary to the nonperforming arts functions of the John F. Kennedy Center for the Performing Arts, and for other purposes.

S.J. Res. 4. Joint resolution to authorize the President to issue a proclamation designating the week beginning November 22, 1981, as "National Family Week."

ADJOURNMENT

Mr. GEJDENSON. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 6 o'clock and 3 minutes p.m.), the House adjourned until tomorrow, Thursday, October 22, 1981, at 10 a.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

2373. A letter from the Assistant Secretary of the Navy (Shipbuilding and Logistics), transmitting notice of the proposed conversion to contractor performance of the

maintenance function for the 14B49 position trainer complex device at the Naval Air Station, North Island, San Diego, Calif., pursuant to section 502(b) of Public Law 96-342; to the Committee on Armed Services.

2374. A letter from the Assistant Secretary of the Navy (Shipbuilding and Logistics), transmitting notice of the proposed conversion to contractor performance of the keypunch function at the Fleet Accounting and Disbursing Center, U.S. Atlantic Fleet, Norfolk, Va., pursuant to section 502(b) of Public Law 96-342; to the Committee on Armed Services.

2375. A letter from the Assistant Legal Adviser for Treaty Affairs, Department of State, transmitting copies of international agreements, other than treaties, entered into by the United States, pursuant to 1 U.S.C. 112b(a); to the Committee on Foreign Affairs.

2376. A letter from the Acting Comptroller General of the United States, transmitting a list of reports issued or released by the General Accounting Office during the month of September 1981, pursuant to section 234 of the Legislative Reorganization Act of 1970, as amended; to the Committee on Government Operations.

2377. A letter from the Associate Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting copies of orders entered in cases in which the authority contained in section 212(d)(3) of the Immigration and Nationality Act was exercised in behalf of certain aliens, pursuant to section 212(d)(6) of the act; to the Committee on the Judiciary.

2378. A letter from the Commander and Division Engineer, New England Division, Corps of Engineers, Department of the Army, transmitting the final environmental impact statement for the proposed Dickey-Lincoln School Lakes project, Maine; to the Committee on Public Works and Transportation.

2379. A letter from the Chairman, Federal Communications Commission, transmitting various legislative proposals of the Commission; jointly, to the Committees on Energy and Commerce and the Judiciary.

2380. A letter from the Secretary of Energy, transmitting the fourth comprehensive program and plan for Federal energy education, extension and information activities, pursuant to section 508 of Public Law 95-39 and section 404 of Public Law 96-294; jointly, to the Committees on Energy and Commerce and Science and Technology.

2381. A letter from the Secretary of Agriculture, transmitting the fiscal year 1981 food aid needs and availabilities report, pursuant to section 408(b) of the Agricultural Trade Development and Assistance Act, as amended; jointly, to the Committees on Foreign Affairs and Agriculture.

2382. A letter from the Comptroller General of the United States, transmitting a report on budgetary pressures created by the Army's plans for procurement of major new weapons systems (MASAD-82-5, October 20, 1981); jointly, to the Committees on Government Operations and Armed Services.

2383. A letter from the Acting Comptroller General of the United States, transmitting a report on Federal credit assistance programs (PAD-82-22, October 21, 1981); jointly, to the Committees on Government Operations and Banking, Finance and Urban Affairs.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. MONTGOMERY: Committee on Veterans' Affairs. Revised report on allocation of budget totals to subcommittees (Rept. No. 97-282). Referred to the Committee of the Whole House on the State of the Union.

Mr. HUGHES: Committee on the Judiciary. H.R. 3963. A bill to amend the Contract Services for Drug Dependent Federal Offenders Act of 1978 to extend the periods for which funds are authorized to be appropriated; with an amendment (Rept. No. 97-283). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. ROSTENKOWSKI (for himself and Mr. CONABLE):

H.R. 4800. A bill to reinstate certain taxes imposed on aviation, and for other purposes; to the Committee on Ways and Means.

By Mr. WIRTH (for himself, Mr. COLLINS of Texas, MR. BROYHILL, Mr. MARKEY, Mr. TAUZIN, and Mr. MARKS):

H.R. 4801. A bill to amend the Communications Act of 1934 to eliminate certain provisions relating to consolidations or mergers of telegraph and record carriers and to create a fully competitive marketplace in record carriage, and for other purposes; to the Committee on Energy and Commerce.

By Mr. DANNEMEYER:

H.R. 4802. A bill to require annual authorizations for amounts appropriated for the Smithsonian Institution; to the Committee on House Administration.

By Mr. DONNELLY (for himself, Mr. STUDDS, and Mrs. HECKLER):

H.R. 4803. A bill to provide for the transfer to the State of Massachusetts of certain rail lines owned by Conrail; to the Committee on Energy and Commerce.

By Mr. DUNCAN:

H.R. 4804. A bill to strengthen the assignment program for durable medical equipment under title XVII of the Social Security Act and for other purposes; jointly, to the Committee on Ways and Means and Energy and Commerce.

By Mr. ENGLISH (for himself and Mr. KINDNESS) (by request):

H.R. 4805. A bill to amend the Freedom of Information Act, and for other purposes; to the Committee on Government Operations.

By Mr. GEJDENSON:

H.R. 4806. A bill to eliminate the duty on allyl resins; to the Committee on Ways and Means.

By Mr. LEE (for himself and Mr. GRISHAM):

H.R. 4807. A bill to provide that increases in the rate of compensation for Members of the House of Representatives and the Senate shall not take effect until the start of the Congress following the Congress in which such increases are approved; to the Committee on Post Office and Civil Service.

By Mr. PARRIS:

H.R. 4808. A bill to amend title 17 of the United States Code to exempt the private noncommercial recording of copyrighted works on video recorders from copyright infringement; to the Committee on the Judiciary.

By Mr. SHANNON:

H.R. 4809. A bill to provide for changes in the boundary of the Florida Keys Wilderness; jointly to the Committees on Interior and Insular Affairs and Merchant Marine and Fisheries.

By Mr. SMITH of Pennsylvania:

H.R. 4810. A bill to prohibit the imposition of any user fee the proceeds of which are to be used for the dredging or maintenance of any channel in the navigable waters of the United States; to the Committee on Public Works and Transportation.

By Mr. WHITTEN:

H.J. Res. 343. Joint resolution making further continuing appropriations for the fiscal year 1982; to the Committee on Appropriations.

By Mr. LEE (for himself and Mr. GRISHAM):

H.J. Res. 344. Joint resolution proposing an amendment to the Constitution of the United States to deal with compensation for services of Members of the House of Representatives and the Senate; to the Committee on the Judiciary.

By Mr. WOLF (for himself, Mr. CARNEY, Mr. COURTER, Mr. DANNEMEYER, Mr. DERWINSKI, Mr. DAUB, Mr. DUNN, Mr. EMERSON, Mr. FORSYTHE, Mrs. HOLT, Mr. HUTTO, Mr. KEMP, Mr. LAFALCE, Mr. MCCLORY, Mr. NEAL, Mr. NELLIGAN, Mr. ROBERTS of South Dakota, Mr. ROE, Mr. ROGERS, Mr. ROBINSON, Mr. SCHEUER, Mr. SMITH of Pennsylvania, Mr. SUNIA, Mr. WHITEHURST, Mr. CLAUSEN, and Mr. FAZIO):

H.J. Res. 345. Joint resolution to provide for the designation of the week beginning February 28, 1982, as "National Construction Industry Week"; to the Committee on Post Office and Civil Service.

By Mr. GEJDENSON (for himself, Mrs. SCHROEDER, Mr. AUCOIN, Mr. BEILENSON, Mr. BINGHAM, Mr. BROWN of California, Mr. JOHN L. BURTON, Mr. PHILLIP BURTON, Mrs. CHISHOLM, Mr. CLAY, Mrs. COLLINS of Illinois, Mr. COLLINS of Texas, Mr. CONYERS, Mr. COUGHLIN, Mr. CROCKETT, Mr. DELLUMS, Mr. DOWNEY, Mr. DUNN, Mr. EDGAR, Mr. FASCELL, Mr. FAUNTROY, Mr. FAZIO, Ms. FERRARO, Mr. FOGLIETTA, Mr. FORD of Michigan, Mr. FORSYTHE, Mr. FRANK, Mr. FROST, Mr. GARCIA, Mr. GORE, Mr. GRAY, Mr. GREEN, Mr. HOLLAND, Mr. HOLLENBECK, Mr. HOWARD, Mr. JEFFORDS, Mr. LEACH of Iowa, Mr. LELAND, Mr. LOWRY of Washington, Mr. MARKEY, Mr. MATSUI, Mr. MAVROULES, Ms. MIKULSKI, Mr. OBERSTAR, Mr. OTTINGER, Mr. PATTERSON, Mr. PEASE, Mr. PEPPER, Mr. PEYSER, Mr. PRITCHARD, Mr. RANGEL, Mr. RATCHFORD, Mr. RICHMOND, Mr. ROSENTHAL, Mr. SCHEUER, Mrs. SCHNEIDER, Mr. SCHUMER, Mr. SEIBERLING, Mr. SOLARZ, Mr. STARK, Mr. UDALL, Mr. WASHINGTON, Mr. WAXMAN, Mr. WEAVER, Mr. WEISS, Mr. WILLIAMS of Montana, Mr. WILSON, Mr. WIRTH, Mr. WOLPE, Mr. WON PAT, and Mr. WYDEN):

H. Con. Res. 206. Concurrent resolution endorsing certain family planning principles

and urging the President to take certain actions in support of family planning both in the United States and abroad; jointly, to the Committees on Energy and Commerce and Foreign Affairs.

By Mr. BOLLING:

H. Res. 251. Resolution amending the Rules of the House of Representatives to increase the amount of outside earned income which a Member may have in 1981, 1982, and 1983, and to increase the amount of the maximum honorarium which a Member may accept; to the Committee on Rules.

By Mr. VENTO (for himself, Mr. LEWIS, Mr. BEDELL, Mr. BEILENSON, Mr. BROWN of California, Mr. D'AMOURS, Mr. DOWNEY, Mr. EDGAR, Mr. FASCELL, Mr. GARCIA, Mr. HARKIN, Mr. HOLLENBECK, Mr. JEFFORDS, Mr. LOWRY of Washington, Mr. MILLER of California, Mr. MINETA, Mr. MOFFETT, Mr. MOLINARI, Mr. RICHMOND, Mr. SABO, Mrs. SCHNEIDER, Mrs. SCHROEDER, Mr. SCHUMER, Mrs. SNOWE, Mr. STARK, Mr. PRITCHARD, Mrs. FENWICK, Mr. DENARDIS, and Mr. SOLOMON):

H. Res. 252. Resolution expressing the sense of the House of Representatives that clean air is fundamentally important for the health and well-being of the citizens, economy, and environment of the United States and concluding, therefore, that the Nation's existing Clean Air Act should be maintained and strengthened subject only to such changes that will improve its administration and effectiveness; to the Committee on Energy and Commerce.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. PHILLIP BURTON:

H.R. 4811. A bill for the relief of Sylvia Rabanal Gulen; to the Committee on the Judiciary.

H.R. 4812. A bill for the relief of Chen-Chuan Jen; to the Committee on the Judiciary.

H.R. 4813. A bill for the relief of Fung Ping Lee; to the Committee on the Judiciary.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 27: Mr. MILLER of Ohio.

H.R. 713: Mr. TAUKE.

H.R. 1914: Mr. BAILEY of Pennsylvania.

H.R. 2034: Mr. DAUB, Mr. NEAL, and Mrs. SMITH of Nebraska.

H.R. 2372: Mr. SAM B. HALL, JR., Mr. GRAMM, Mr. SYNAR, Mr. GLICKMAN, Mr. DOWNEY, and Mr. SILJANDER.

H.R. 2488: Mr. RAILSBACK and Mr. ATKINSON.

H.R. 2640: Mr. WEBER of Minnesota.

H.R. 3252: Ms. MIKULSKI, Mr. MOAKLEY, Mr. JAMES K. COYNE, Mr. LUNGREN, and Mr. ST GERMAIN.

H.R. 3464: Mr. DYSON.

H.R. 3708: Mr. HUNTER, Mr. MARRIOTT, and Mr. OXLEY.

H.R. 3755: Mr. LEE, Mr. RINALDO, Mr. MOORHEAD, Mr. COATS, Mr. MARKS, Mr. MCEWEN , and Mr. DWYER.

H.R. 3929: Mr. DORNAN of California.

H.R. 3949: Mr. EVANS of Georgia.

H.R. 3955: Mr. HUTTO.

H.R. 4186: Mr. SMITH of Alabama.

H.R. 4351: Mr. BUTLER and Mr. OXLEY.

H.R. 4467: Mr. LEHMAN and Mr. ROSENTHAL.

H.R. 4569: Mr. EDGAR, Mr. HORTON, Mr. CONTE, Mr. OBERSTAR, Mr. MAVROULES, Mr. STANTON of Ohio, Mr. BRODHEAD, Mr. STUDDS, Mr. SHANNON, Mr. SCHEUER, Mr. ASPIN, Mr. SENSENBRENNER, Mr. FRANK, Mr. ALBOSTA, Mr. FORD of Michigan, Mr. REUSS, Mr. KEMP, Mr. ANNUNZIO, Mr. DOWNEY, Mr. LATTA, Mr. LUNDINE, Mr. BINGHAM, Mr. MINISH, Mr. MCCLORY, Mr. DERWINSKI, Mr. NOWAK, Mr. GOODLING, Mr. GUARINI, Mr. SEIBERLING, Mr. RINALDO, Mr. FORSYTHE, Mr. LAFALCE, Mr. MURPHY, Mr. DAVIS, Mr. RODINO, Mrs. FENWICK, Mr. WYLIE, Mr. MITCHELL of New York, Mr. RUSSO, Mr. LEE, Mr. NELLIGAN, Mr. BAILEY of Pennsylvania, Mr. LONG of Maryland, Mr. LEBOUTILLIER, Ms. OAKAR, Mr. WEISS, Mr. BEDELL, Mr. BIAGGI, Mr. DUNN, Mr. HUGHES, Mr. JACOBS, Mr. FISH, Mrs. MARTIN of Illinois, Mr. YATRON, Mr. BARNES, Mr. FRENZEL, AND Mr. BLANCHARD.

H.R. 4619: Mr. SPENCE and Mr. FORSYTHE.

H.R. 4620: Mr. SPENCE and Mr. WON PAT.

H.R. 4621: Mr. SPENCE and Mr. WON PAT.

H.R. 4622: Mr. SPENCE, Mr. WON PAT, and Mr. FORSYTHE.

H.R. 4639: Mr. FRANK, Mr. GREGG, and Mr. BEDELL.

H.R. 4751: Mr. GLICKMAN, Mr. MCEWEN, Mr. COATS, and Mr. NELLIGAN.

H.J. Res. 50: Mr. STATON of West Virginia.

H.J. Res. 225: Mrs. COLLINS of Illinois, Mr. ROTH, Mr. DICKINSON, Mr. FLIPPO, Mr. EDWARDS of Alabama, Mr. DYMALLY, Mr. ADDABBO, Mr. JENKINS, Mr. FISH, Mr. HUBBARD, Mr. CHAPPIE, and Mr. FROST.

H.J. Res. 277: Mr. HUNTER, Mr. MARRIOTT, and Mr. OXLEY.

H.J. Res. 316: Mr. HOLLENBECK, Mr. GILMAN, Mr. DASCHLE, Mr. RODINO, Mr. FOWLER, Mr. WEAVER, Mr. HORTON, Mr. WORTLEY, Mr. FASCELL, Mr. CORCORAN, Mr. DUNCAN, Mr. LOWRY of Washington, Mr. HUTTO, Mr. PEYSER, Mr. PEPPER, Mr. JAMES K. COYNE, Mr. MOORE, Mr. DE LA GARZA, Mr. GORE, Mr. VENTO, Mr. PURCELL, Mr. MONTGOMERY, Mr. WIRTH, Mr. YOUNG of Missouri, and Mr. FORD of Tennessee.

H.J. Res. 326: Mr. NOWAK, Mr. STRATTON, Mr. GREEN, and Mr. NICHOLS.

H.J. Res. 339: Mr. FISH, Mr. GOODLING, Mr. HUBBARD, Mr. BOWEN, Mr. WON PAT, Mr. ROE, Mr. KRAMER, Mr. WYDEN, Mr. SCHEUER, Mr. MITCHELL of Maryland, and Mr. FRENZEL.

H. Con. Res. 77: Mr. BLANCHARD, Ms. FERRARO, Mr. GINGRICH, Mr. BONER of Tennessee, Mr. SMITH of Pennsylvania, Mr. HALL of Ohio, and Mr. PEASE.

H. Con. Res. 121: Mr. FITHIAN.

H. Con. Res. 139: Mr. DANIEL B. CRANE.

H. Con. Res. 178: Mr. ROUSSELOT, Mr. NATCHER, Mr. MURPHY, and Mrs. MARTIN of Illinois.

H. Con. Res. 196: Mr. WINN and Mrs. BOUQUARD.

H. Con. Res. 197: Mr. GILMAN, Mr. BARNES, Mr. STUDDS, Mr. CROCKETT, Mr. BINGHAM, Mr. SOLARZ, Mr. BONKER, Mr. CONTE, Mr. DELLUMS, Mrs. SCHROEDER, Mr. OTTINGER, Mr. FOGLIETTA, Mr. WEISS, Mr. EDGAR, Mr. HARKIN, Ms. OAKAR, Mrs. CHISHOLM, and Mr. FAUNTROY.

H. Res. 101: Mr. WILLIAM J. COYNE.

H. Res. 233: Mr. MINISH, Mr. MOLINARI, Mr. NELLIGAN, Mr. BEDELL, Mr. DWYER, and Mr. SIMON.

H. Res. 243: Mr. CORRADA, Mr. DAVIS, Mr. DE LUGO, Mr. EVANS of Indiana, Mr. FORD of Tennessee, Mr. GINN, Mr. GREEN, Mr. LEBOUTILLIER, Mr. MCCLOSKEY, Mrs. MARTIN of Illinois, Mr. MILLER of Ohio, Mr. SMITH of Pennsylvania, Mr. STANGELAND, Mr. TAUZIN, Mr. UDALL, Mr. YATES, and Mr. ZABLOCKI.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 3603

By Mr. DASCHLE:

—Page 3, immediately before line 1, insert the following new item:

"TITLE XVII—EXAMINATION, INSPECTION, AND LABELING REQUIREMENTS FOR IMPORTED MEAT".

Page 222, after line 25, add the following new title:

TITLE XVII—EXAMINATION, INSPECTION, AND LABELING REQUIREMENTS FOR IMPORTED MEAT

SEC. 1701. Section 20(a) of the Federal Meat Inspection Act (21 U.S.C. 620(a)) is amended by inserting "(1)" after "(a)", and by adding at the end thereof the following:

"(2) Any carcass, part of a carcass, meat, or meat food product described in paragraph (1) (or container or package thereof) which is imported into the United States, and any meat food product (or container or package thereof) made in whole or in part of any such imported meat, shall be labeled 'Imported From ', 'Contains Meat Imported From ', or 'May Contain Meat Imported From ', as the case may be, with the blank space to be filled in with the name of the country of origin. The first sentence of this paragraph shall not apply if the carcass, part of a carcass, meat, or meat food product (or the container or package thereof) is required to be marked or labeled to show the country of origin in accordance with regulations prescribed under paragraph (1).

"(3) If a person cuts any carcass, part of a carcass, meat, or meat food product into pieces (or breaks a container or package containing any of such articles) other than to prepare it for ultimate consumption, and such carcass, part of a carcass, meat, or meat food product (or such container or package) is marked or labeled under paragraph (1), (2), or (4)(C)(ii), such person shall mark or affix a label to each of such pieces (or the container or package containing any of such pieces) to supply the information which was so provided before it was cut (or broken).

"(4)(A)(i) No carcass or part of a carcass described in paragraph (1) may be imported into the United States unless such carcass or part of a carcass, including the internal organs (or samples from such internal organs) of the animal from which such carcass or part came, is examined and inspected at the port of entry to determine that such carcass or part is not adulterated.

"(ii) No meat or meat food product described in paragraph (1) (or container or package thereof) may be imported into the United States unless such meat or meat food product is examined and inspected at the port of entry to determine that such meat or meat food product is not adulterated.

"(B) Any examination or inspection conducted under this paragraph with respect to any carcass, part of a carcass, meat, or meat

food product, shall include the equivalent of at least one core test for every fifty pounds thereof (irrespective of whether the article is fresh, chilled, frozen, or cured), except that, in the case of cans or other sealed containers thereof, such examination or inspection shall be conducted using such methods as the Secretary shall by regulation prescribe.

"(C)(i) Notwithstanding subsection (b), the Secretary shall, in accordance with such regulations as the Secretary shall prescribe, dispose of any article determined under this paragraph to be adulterated by selling such article as tankage or fertilizer.

"(ii) Any article determined under this paragraph not to be adulterated shall be labeled "Prime", "Choice", "Standard", or "Utility", as the case may be, in accordance with such regulations as the Secretary shall prescribe, to indicate the grade of such article.

"(D) Any examination, inspection, or labeling required under this paragraph shall be performed by inspectors appointed for that purpose by the Secretary.

"(E) For purposes of subparagraph (A)(i), the term 'internal organs', as used with respect to an animal, means the liver, heart, kidneys, lungs, and spleen of such animal.

"(5)(A) The Secretary shall prescribe such assessments and fees on imported carcasses, parts of carcasses, meats and meat food products as the Secretary determines necessary to cover the costs of inspection, examination, marking, and labeling, under this section.

"(B) In establishing the level or rate of assessments and fees to be imposed under this paragraph, the Secretary shall take into consideration the volume of imports into the United States of the articles to which this section applies, the value of such imports, and such other factors as the Secretary determines appropriate.

"(C) No carcass, part of a carcass, meat, or meat food product (or container or package containing any of such articles) as to which an assessment or fee is levied under subparagraph (A) shall be released from customs custody unless the foreign plant exporting such carcass, part of a carcass, meat, or meat food product (or container or package containing any of such articles) to the United States pays, in accordance with such regulations as the Secretary shall prescribe, such assessment or fee.".

SEC. 1702. The amendments made by section 1701 shall become effective one hundred and eighty days after the date of the enactment of this Act.

—Page 81, insert the following after line 5 and redesignate the succeeding sections accordingly:

HUNGER AND GLOBAL SECURITY

SELF-HELP MEASURES TO INCREASE AGRICULTURAL PRODUCTION; VERIFICATION OF SELF-HELP PROVISIONS

SEC. 1201. (a) Section 109(a) of the Agricultural Trade Development and Assistance Act of 1954 is amended—

(1) in paragraph (3) by inserting immediately before the semicolon ", and reducing illiteracy among farmers";

(2) by striking out the period at the end of paragraph (10) and inserting in lieu thereof "; and"; and

(3) by inserting the following new paragraph immediately after paragraph (10):

"(11) carrying out programs to improve the health of farmers and their families.".

(b) Section 109 of the Agricultural Trade Development and Assistance Act of 1954 is amended by adding at the end thereof the following new subsection:

"(d)(1) In each agreement entered into under this title and in each amendment to such an agreement, the economic development and self-help measures which the recipient country agrees to undertake shall be described (A) to the maximum feasible extent, in quantitative and measurable terms, and (B) in a manner which ensures that the needy people in the recipient country will be the major beneficiaries of the self-help measures pursuant to each agreement.

"(2) The President shall, to the maximum feasible extent, take appropriate steps to satisfy himself that, in each agreement entered into under this title and in each amendment to such an agreement, the economic development and self-help measures which the recipient country agrees to undertake are additional to the measures which the recipient country otherwise would have undertaken irrespective of that agreement or amendment.

"(3) The President shall take all appropriate steps to determine whether the economic development and self-help provisions of each agreement entered into under this title, and of each amendment to such an agreement, are being fully carried out.".

By Mr. DE LA GARZA:

—Page 179, immediately after line 22 insert the following new section:

AUTHORITY TO AWARD GRANTS TO UPGRADE 1890 LANDGRANT COLLEGE RESEARCH FACILITIES

SEC. 1441. (a) It is hereby declared to be the intent of the Congress to assist the institutions eligible to receive funds under the Act of August 30, 1890 (7 U.S.C. 321-326 and 328), including Tuskegee Institute (hereinafter referred to in this section as "eligible institutions"), in the acquisition and improvement of research facilities and equipment so that eligible institutions may participate fully with the State agricultural experiment stations in a balanced attack on the research needs of the people of their States.

(b) There are hereby authorized to be appropriated to the Secretary of Agriculture for the purpose of carrying out the provisions of this section $10,000,000 for each of the fiscal years 1982 through 1986, such sums to remain available until expended.

(c) 4 per centum of the sums appropriated pursuant to this section shall be available to the Secretary for administration of this grants program. The remaining funds shall be available for grants to the eligible institutions for the purpose of assisting them in the purchase of equipment and land, and the planning, construction, alteration, or renovation of buildings to strengthen their capacity to conduct research in the food and agricultural sciences.

(d) Grants awarded pursuant to this section shall be made in such amounts and under such terms and conditions as the Secretary shall determine necessary for carrying out the purposes of this section.

(e) Federal funds provided under this section may not be utilized for the payment of any overhead costs of the eligible institutions.

(f) The Secretary may promulgate such rules and regulations as the Secretary may deem necessary to carry out the provisions of this section.

EXTENSIONS OF REMARKS

LAW OF THE SEA AND NATIONAL SECURITY

HON. JOHN B. BREAUX

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 21, 1981

● Mr. BREAUX. Mr. Speaker, many Members, especially those who participated in our debate of last year when we enacted the Deep Seabed Hard Mineral Resources Act, will recall my concern with the Draft Convention text which has been emerging from negotiations at the Third United Nations Conference on Law of the Sea (UNCLOS II). In fact, many Members from both sides of the aisle joined me in a letter to then President-elect Reagan last December which requested the incoming administration to put a "hold" on further U.S. participation in the negotiations. We were concerned that several different features of the text were inimical to U.S. domestic economy, foreign policy, and national security interests. We urged the administration to conduct a thorough interagency review of U.S. objectives and make an assessment of the utility of continuing at UNCLOS III.

At that time, we were accused by treaty proponents of using scare tactics to achieve a limited objective—a "better deal" for U.S. seabed mining companies—at the expense of broader national security interests—the right of freedom of navigation. Our response to this charge was based upon an analysis of the existing treaty text that left us concerned as to how good a job the treaty did in protecting our admittedly essential navigation rights. Fortunately, the Reagan administration decided to grant our request for a review. A high level interagency task force has spent the last 6 months reviewing the existing treaty text, comparing the textual provisions with U.S. national interests and objectives and conducting exploratory discussions with other Conference participants regarding the possibility of negotiating the necessary changes. A decision memorandum for the President is in the final stage of preparation.

Recently, Secretary of the Navy, the Honorable John Lehman, gave a speech before the World Affairs Council. In that speech, Secretary Lehman discussed not only his concerns over the navigation provisions of the existing text, but reiterated a point many of us have been making for quite some time—the United States has an equally valid interest in insuring assured, nondiscriminatory access by U.S. citizens to the strategic minerals of the deep seabed. Although assured access is what we in the Congress called upon our negotiators to achieve in title II of our domestic deep seabed mining legislation, the Reagan administration's interagency review has demonstrated how woefully short of that goal we are in the existing Draft Convention text.

Mr. Speaker, Secretary Lehman's analysis is succinct, forthright, and, typical of a man of his integrity, does not hold any punches. I request that his speech be inserted in the RECORD at this point and I urge my colleagues to take a few moments to consider his thoughts on the law of the sea and national security.

STATEMENT OF HON. JOHN LEHMAN

Distinguished members of the World Affairs Council, noted guests, Ladies and Gentlemen:

It is both a pleasure and an honor to be with you here today. As you well know, the U.S. Navy is currently embarked on a major expansion of both forces and capabilities—an expansion that will ultimately lead us back to a position of unquestioned maritime superiority within this decade. It is an ambitious program—and a program which will require the fullest measure of national support—but a program that will without question produce a Navy that will serve as the centerpiece of our national strategy into the future, and as the vital guarantor of U.S. interests around the world. As an "island" nation, traditionally and increasingly dependent on the seas for economic—and thus national—survival, it could scarcely be otherwise.

Our future strength on the seas—and our ability to preserve those vital seabridges to friends and allies, and to maintain lifeblood trade—is also dependent on other factors external to military balance. One of these is the legal environment of the world's oceans—the treaties and agreements, and the codification of maritime and sovereign usage. I am here today to discuss this most important matter with you.

It has always been the Navy's mission to defend our freedom of navigation, to hold open our vital sealanes, and to maintain our transit rights through the ocean's straits and narrows. The United States, as a major maritime power, has long played a leading role in preserving the crucial benefits of free access to the oceans for the community of nations. Indeed, the concepts of openness, of minimized regulation, and of commercial and scientific competition, are all ideals in harmony with traditional American dedication to the improvement of world order and the betterment of all nations.

In recent decades, freedom of the seas has been seriously encroached upon by the unilateral actions of various nations. A number of nations have felt a need for rules to meet unique new problems they encountered, created largely by advancing technology. Examples include the attempt to control pollution, or to prevent damage to fisheries. Such developments strongly influenced a series of international negotiations established to codify a new law of the sea.

Over the last seven years, a third Law of the Sea conference has been periodically in session under United Nations auspices. The result has been a "draft convention," that is, the proposed text of a new treaty. The scope of this most recent effort has been very ambitious—too ambitious, some would argue. The draft convention seeks not only to cover the traditional issues of law of the sea, such as questions of navigation and territorial waters, but also to adopt rules for the mining of the seabed and the protection of fisheries, and to draw up a charter for a new and potentially powerful international organization.

Whether or not one is well-grounded in the compelling treatises of Hugo Grotius or John Locke on those elements of nature belonging to the "universal common," this Law of the Sea Draft Convention must ultimately stand tests of both law and logic. We have, perhaps, entered as nations into these negotiations under the impression that we are all "joint owners" of the world's oceans and that which lies beneath and in them. I would offer another interpretation. When the assertion is made that the deep seas are the "common heritage of all mankind," it does not mean that every nation considered sovereign is somehow a part owner. To the contrary, what it means—and has always meant under international law—is that the seas are unowned. On that basis, no nation has any right to any particular share of anything; no nation has a predetermined voice or vote in what is to be done; and no one has any authority unless and until there is agreement about what is to be done. We forget such simple truths as a nation only at our peril.

Shortly after taking office, the Reagan Administration decided to undertake a thorough review of this draft convention. The review is essentially complete and soon the President will determine the direction of the United States in law of the sea negotiations. The conference, which met for several weeks this past August, will next resume its work in March 1982 in New York.

During the review U.S. interest and objectives of the United States in the Law of the Sea were identified and the Draft Convention was subjected to an intense and comprehensive analysis in light of those objectives. Navigation provisions are being scrutinized with particular care and objectivity, in terms of their adequacy from the standpoint of our naval operations and national security. As the Administration has declared in testimony before the Senate Armed Services Committee, naval power remains the first prerequisite for the continued free existence of this Nation. This central role of the Navy will continue far into the future, and will no doubt increase as Western dependence on the sea as a source of energy and commerce continues to grow. We will need to judge the navigation provisions of the Draft Convention in light of those forceful requirements.

For this reason, it would be a mistake to accept categorical statements by treaty proponents concerning this security issue. Some retired officers of our Armed Forces—

and others—have taken it upon themselves to convey the impression that the interests of the Navy, indeed of our Nation's security, demand that the United States embrace this Draft Convention. Our evaluation does not support this conclusion. In fact, from the point of view of our security interests, we must not only evaluate the navigation provisions of the Convention, but the rules proposed for seabed mining as well. For it is extremely important that we preserve flexibility in obtaining the strategic mineral resources that our future defense efforts may require * * * resources that our future national economy will almost certainly require.

In a recent public statement, Deputy Assistant Secretary of State Kronmiller put it succinctly: "After more than a decade of compromises on access to seabed minerals, this Administration is taking a long hard look at the results. Although our review is not yet complete, it is already clear that elements of the Draft Convention pertaining to seabed mining do not meet our national interests and objectives."

The views of the Navy Department on this subject may appear to represent a departure from previous policy. This is correct, but only in relation to the position that the Carter Administration was willing to accept. Not uncharacteristically, that Administration sought less than had been previously asked for in United Nations negotiations. It was well known, for example, that the regime for the exclusive economic zone set out in the Draft Convention did not reflect the preferred position of earlier administrations. A careful reading of the Draft Convention also reveals that navigation interests are compelled to rely upon a highly complex assortment of treaty provisions. Informed opinion concerning the correct interpretation of those provisions is—to understate—quite varied.

It would be unreasonable to ignore the intense scholarly debate that has taken place over certain critical elements of the proposed navigation regime, including the controversial straits transit provisions. On the other hand it would be just as unreasonable blindly to accept the arguments of treaty critics and to reject the treaty without careful thought. We have chosen the most reasonable tack: To acknowledge that questions may be legitimately raised and carefully considered.

It must be understood that the willingness of this Administration to reassess the navigation provisions of the Draft Convention is not an indication that our naval interests are somehow viewed to be of greater or lesser importance, in relation to what are often seen as "conflicting" seabed mining interests. On the contrary, the Administration has demonstrated a heightened concern for both, and does not view them as competing—much less conflicting. There are extremely important strategic factors involved with each issue, and the Administration's review has taken all factors into account. Our absolute commitment to U.S. naval and maritime security is complemented by our strong determination to achieve reliable access to strategic minerals—including those of the deep seabed. Naval strength and mobility are not sufficient answers to an insecure supply of critical materials, which would likely threaten not only the success of defense-related high technology enterprises, but possibly the viability of our industrialized society as well. Let me give two examples.

Without cobalt, now obtained largely from unreliable land-based sources, but available from the deep seabed, jet engines could not be manufactured. Without manganese, found in abundance on the ocean floor, many important steel products could not be produced. Today we are 95 percent dependent on external sources for manganese; 98 percent for cobalt. For these strategic materials and others, ocean mining holds the promise of reduced national vulnerability.

It is certainly conceivable that a Law of the Sea treaty could protect and promote vital U.S. interests. However, this Draft Convention appears to fall far short in its seabed mining provisions. Moving now to the specific, I will outline some of the Administration's principal areas of concern:

The Draft Convention places the development of all resources of the seabed and subsoil lying beyond the geographic limits of national jurisdiction under burdensome international regulation. This area represents approximately two-thirds of the earth's submerged area. The draft includes mineral deposits found beneath the surface of the seabed. Little is known of these deposits today, but in the future they may well have substantial economic importance.

One proposal would establish a supranational mining company, the Enterprise, which would benefit from significant discriminatory advantages relative to the private firms in developed countries. Arguably, the Enterprise could monopolize production of seabed minerals. Moreover, the Draft Convention would require the United States and other nations to provide the initial capitalization for the Enterprise, in direct proportion to their United Nations contributions. The American taxpayer, therefore, would have to provide the dominant capital share for a supranational mining organization controlled by other nations, and which may well act in ways not beneficial to the U.S. interest. What we have here, with sweeping authority over almost all activities on the seas, is a large, complicated, highly organized, unelected powerful organization. We should think long and hard about the creation of such an entity as "the Enterprise."

Through transfer of technology provisions, the sale of proprietary information and technology now largely in U.S. hands would be virtually compulsory under certain circumstances. With certain restrictions, the Enterprise, through mandatory transfer, if guaranteed access on request to seabed mining technology owned by others. Similar access to privately-owned technology is further guaranteed for any developing country planning to go into seabed mining. It is most important that we carefully consider how such provisions relate to our security-oriented technologies, current and future.

The Draft Convention creates a one-nation, one-vote international organization, governed by an assembly and a 36-member Executive Council. While the Soviet Union and its allies have three guaranteed seats in the Council, the United States would be forced to compete with its allies for representation. The great bulk of votes would be possessed by the Third World nations, the so-called "Group of 77," rather than by those countries contributing the technical expertise and financial resources to the organization. This would result in politicization of the governing process.

After fifteen years of seabed production, the provisions of the treaty will be reviewed to determine whether they have fulfilled appropriate policy considerations, such as protection of land-based producers, promotion of Enterprise operations, and "equitable" distribution of mining rights. If two-thirds of the States party to the treaty wish to amend provisions concerning the system of exploitation, they may do so only after five years' negotiation and following ratification by two-thirds of the assembly members. Thus, if the United States were to disagree with duly ratified changes, it would be bound by them nevertheless—unless it exercised its option to denounce the treaty in its entirety.

Although the assessment is incomplete at this time, we must keep firmly in mind that the important provisions within the Draft Convention governing navigation on the high seas be fully consistent with our national security imperatives. With the strongest interest in preserving maximum freedom of movement at sea for our naval combatants, the U.S. has viewed with great concern the emergence of provisions for 12-mile territorial seas and 200-mile exclusive economic zones. In the U.S. view, areas to seaward of 3 miles remain high seas under existing international law, based upon historical usage. The Draft Convention represents a considerable divergence from our current juridical positions. Under such circumstances, it should not, therefore, be surprising that the Navy and the Administration have given strong voice to concerns for our essential navigation interests.

I trust that these few examples serve to make clear the insufficiencies—even the potential danger—of the proposed treaty when viewed in light of either our national security or economic interests. It should also make obvious the reasons for the Administration's studied and cautious approach to the Draft Convention.

A humorist once gave the following definition of the word "yours." "Yours," he said, "is anything which up to the present others have not been able to get away from you." Like most good writing in the genre, it contains an element of truth. In this case, an important element.

Perhaps the American people have tired of their long years of sacrificing U.S. national goals and interests for the greater supranational interests of the world's community of nations. In the view of many, the return on some of these investments has been woefully insufficient. Too frequently, the practical application of our national compassion and fairness has produced results inimical to U.S. interests—or it has produced nothing at all. The feeling of having been "used" pervades. Little is more rankling than unappreciated—and often unrequited—international cooperative efforts.

It is time to take a new look at the Law of the Sea Treaty draft with a primary focus on U.S. interests—and with important, but comparatively lesser concerns for our ability to assist the rest of the world. This should not sound startling. What I am saying is simply what we all know to be true—characteristic of both humans and nations alike. But it is often important that we state and restate such ideas, if only so we may better behave in accordance with them. As H.G. Wells said, "There is a time when the best thing that wise men can do is to keep repeating the obvious." Now may be such a time.

There is little new in such a focus. We will continue to behave as a great nation should behave, in accordance with an historic perspective of freedom, justice, and reason that has made us unique in history. We will not, as the Soviet propagandists will become more aggressive, expansionary or imperial.

We will remain what we have always been—the primary guarantor of freedom in the world. Our national aim—and the aim of our Navy—is to continue that vital guarantee . . . and to insure that freedom of the seas is a non-negotiable freedom.

As always, we will support international law and the codification of just agreements among nations—these are confluent with our own traditions. But we will be firm in defense of our freedom of the seas. And we will not be a party to agreements in which U.S. national interests, and those of our allies and friends, are not promoted in a reasonable and balanced way.

Certainly there is some risk in any major policy decision made at this time. But the risk, for instance, of losing this particular treaty does not outweigh the future implications of an agreement unfairly constructed in favor of one portion of the international community at the expense of another.

For now, those who seek to offer views on the subject should not assume that national interests, the Defense Department's interests, or the Navy's interests, argue for U.S. acceptance of the Draft Convention, and that it is only a small number of self-serving mining companies that have stirred up opposition. My purpose in speaking with you here today is to say—firmly and clearly—that this is not true. At issue is U.S. national security, our vital national interests, and the global environment in which our U.S. maritime superiority will operate in the decades to come. These are very high stakes * * * Let us not forget that.

Thank you.●

PERSONAL EXPLANATION

HON. TOM CORCORAN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 21, 1981

● Mr. CORCORAN. Mr. Speaker, due to a previous commitment this morning, I was not able to be present when the House voted on a motion to resolve itself into the Committee of the Whole House on the State of the Union for the further consideration of H.R. 3603, the farm bill. Had I been present, I would have voted "yea."●

HOUSE TELECOMMUNICATIONS, CONSUMER PROTECTION, AND FINANCE SUBCOMMITTEE PENALTIES FOR THE PIRACY OF PAY-TELEVISION SIGNALS

HON. TIMOTHY E. WIRTH

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 21, 1981

● Mr. WIRTH. Mr. Speaker, I am very pleased to be cosponsoring, along with the gentleman from California (Mr. WAXMAN), legislation which we introduced last week that amends section 605 of the Communications Act of 1934 by providing for strengthened penalties for the piracy of pay television signals. I want to praise and commend the leadership of Mr. WAXMAN in drafting this legislation which addresses the compelling need to protect against the unauthorized reception of subscription television signals.

One of the more exciting aspects of the emerging telecommunications technologies is the fact that programing can be offered to subscribers directly on a per channel or per program basis, thereby increasing the opportunities for delivering programing that meets the more specialized interests of the viewing public—something advertiser-supported programing aimed at a mass audience is less able to provide. However, this new means of program delivery is being severely threatened. The proliferation of products, such as "black box" decoders and satellite Earth stations, permit many to receive a subscription signal—transmitted via satellite or over a multipoint distribution system or subscription television service even though they have not paid to do so.

If these unauthorized receptions are not checked through the explicit provision of penalties for these recognized violations of section 605 of the Communications Act, then the financial viability of these new services will be jeopardized, and the increasing availability to the public of a diversity of programing, from a diversity of sources will be undermined.

As we enter an age in which direct broadcast satellite (DBS) service to the home will join the many other developing means of transmitting video information to the public, the need to protect against this form of unauthorized reception becomes even clearer.

I am frankly rather concerned about one particular issue this bill raises. There are an increasing number of citizens who are making use of the great opportunities offered by satellite Earth stations, which permit the viewer to receive the growing number of program signals being beamed off of satellites. I believe that these devices play a very important role in expanding the variety of programing available to the viewing public; however, it should be realized that Earth stations do not distinguish between the types of satellite transmissions they receive, and thus can pick up both subscription and nonsubscription television signals.

I am sensitive to the concerns of these citizens who live in areas, particularly rural ones, where they cannot gain access to cable and other telecommunications services, and thus, only through the direct reception of satellite signals can the diversity of programing available to them be increased. However, in their use of Earth stations pay television signals are also being picked up, even though the companies distributing the subscription services have not authorized those individuals to do so. It is my hope that this legislation can serve as a vehicle for reaching an agreement between private Earth station owners who live in areas where only this technology provides them with the promise of a diversity of program services, and program producers and distributors who have a legitimate property right that is worthy of protection. In any event, I agree with the statement of my colleague, Mr. WAXMAN, that prosecution of this class of individuals is not the intent of this legislation. Rather, this bill is aimed instead at those pirates who are engaging in the practice of unauthorized reception for their own commercial advantage or financial gain.

Again, I want to commend the gentleman from California for his efforts. As chairman of the House Telecommunications, Consumer Protection and Finance Subcommittee of which Mr. WAXMAN is a distinguished member, I fully intend for my subcommittee to hold hearings and take further action on this bill as expeditiously as possible.●

THE REAGAN ADMINISTRATION'S PROPOSALS TO AMEND THE FREEDOM OF INFORMATION ACT

HON. THOMAS N. KINDNESS

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 21, 1981

● Mr. KINDNESS. Mr. Speaker, as ranking minority member of the Government Information and Individual Rights Subcommittee, I am today joining with our subcommittee chairman, GLENN ENGLISH, in introducing, by request of the Reagan administration, its proposals to amend the Freedom of Information Act.

We will need to take time to carefully study the potential ramifications of the administration's proposals. Judicial interpretation of the act prior to and since the 1974 amendments show how important it is for the Congress to take care in phrasing both the law itself and the accompanying legislative history. Hearings before our subcommittee have also revealed that proper agency administration of the act is as important as the language of the act itself. Senate action on these proposals is expected in the near future and that will certainly be illuminating to us.

During this time, I expect that we will continue to work with the administration to attempt to refine its proposals; thus, I see our introduction and study of this bill as another step in our subcommittee's general review, begun earlier this year, of the Freedom of Information Act.●

HOUSE RESOLUTION 243

HON. TOM HARKIN

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 21, 1981

● Mr. HARKIN. Mr. Speaker, I recently introduced House Resolution 243 together with Representatives JEFFORDS, WOLPE, SCHNEIDER, FAZIO, GEORGE BROWN, and a majority of the House. This resolution places the House of Representatives on record in opposition to any repeal or reduction in the conservation and renewable energy tax incentives.

These incentives include:

The residential renewable energy credit allowing a 40-percent credit on the first $10,000 invested in active solar, certain passive solar components, wind, photovoltaic, and geothermal equipment;

The residential energy conservation credit allowing a 15-percent credit on up to $2,000 invested in specific energy conserving home improvements such as insulation and weatherstripping;

The business/industrial renewable energy investment credit providing for a 15-percent investment tax credit for solar, wind, and geothermal equipment for industrial purposes;

The hydroelectric and biomass credits which provide an 11-percent and 10-percent credit, respectively, for industrial equipment in those technologies; and

The alcohol fuels production credit which provides for a 40-cent-per-gallon credit for alcohol used to make gasohol.

All of these credits are temporary, most ending at the end of 1985. They are designed to reduce our Nation's dependence on imported oil at a rapid rate. The incentives are also designed to develop solid conservation and renewable energy industries so we can manufacture these materials at a competitive price domestically and overseas.

Our Nation has experienced considerable economic difficulties and disruptions since 1973 because of the rapid increase in the price of oil. In 1972, U.S. petroleum imports cost $5 billion. In 1980 they cost $85 billion. Most experts agree that is the primary reason the United States suffered under a 13-percent rate of inflation in 1979-80.

Now petroleum prices have stabilized and our imports are down. However, we cannot be complacent. I remember the strong resolve people felt in 1973. That resolve later evaporated. We cannot allow that to happen again. America must reduce its dependence on imported oil, especially given the instability of the Mideast, the region from which a major portion of our imported oil comes.

Increased energy conservation, the increased use of renewable energy sources such as solar, wind, geothermal, and the increased use of plant material for alcohol and biomass can increase our energy independence. It can also decrease our costs. And, by using cogeneration, the use of waste heat, we can also save resources and cut costs.

In addition, the cost of producing electricity is skyrocketing. Every new electric plant built—whether it is a nuclear plant or a coal plant—will create higher electricity costs. Through conservation, we reduce our need for new plants and, thus, help keep our costs down.

If conservation and the use of renewable sources of energy are such good ideas, why do we need tax incentives to get people to use them? For several reasons:

In a perfect world of perfect information, people would know the exact costs and savings involved, and would make their energy investments in those areas in which the technology is well established. However, people do not have perfect information. Many people fail to install energy-saving devices or use renewable energy sources even though it would be financially beneficial for them to do so. Our current tax incentives provide the added impetus they need. Second, in many areas, the technology is new or experimental. The industries are just starting to grow and there is some legitimate question about whether the technology will be cost effective; but the stakes are worth the risk. We need to provide incentives so that the United States can maintain the lead it now enjoys in renewable energy technology. Clearly, Europe and Japan are rapidly increasing their assistance to these industries. The United States previously led the world in auto sales. We have lost the majority of the auto market to other nations. We cannot allow that to occur in renewable energy and energy conservation equipment.

The Treasury Department is now reviewing the usefulness of the conservation and renewable energy tax incentives and will shortly make a recommendation to the White House. I hope they will fully consider the huge impact that these technologies can have on the cost of the energy in the United States, on the increased energy independence of our country, on conservation and the use of renewable energy sources, and on our ability to sell our products overseas.

Government funding of research and grants for installation of conservation and renewable energy materials have already been drastically cut. The administration is clearly planning to propose further reductions. To propose repeal of these tax provisions at this time would create severe damage to a large number of projects that are even now under negotiation. Certainly, we must reduce our budget deficits. However, I believe that this would be one of the worst places to reduce our assistance to taxpayers. The fact that a majority of the House, 228 Members, have joined in cosponsoring House Resolution 243 clearly shows that the need to preserve these tax incentives is widely felt by the Members of this body.●

A TRIBUTE TO FRITZ REDER

HON. LYLE WILLIAMS

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 21, 1981

● Mr. WILLIAMS of Ohio. Mr. Speaker, I would like to bring to the attention of the U.S. House of Representatives a man well respected for his efforts on behalf of the Saxon Club of Youngstown, Ohio.

The man is Fritz Reder. Mr. Reder moved to this country in 1956 from Wiesbaden, Germany. He has devoted many hours of his time to the Saxon Club and other ethnic groups. He is a member of the Youngstown Saxon Club Branch 30 where he held various offices. He served on the club's building committee in 1967 and 1974. He also spent countless hours gathering cultural artifacts from the club's culture room. He personally made or donated several items for display in that room.

Mr. Reder was a representative of the Landsmannschaft of the United States. He also promoted the exchange of brass bands between the United States, Austria, and Germany.

To the many friends and admirers he has in the Saxon Club, Mr. Reder will always be thought of as a fine and concerned person always ready to give of himself for the betterment of all. This esteem for Mr. Reder was demonstrated on October 15 of this year when the Youngstown Saxon Club held a testimonial dinner in Mr. Reder's honor. Those attending have said they felt that was the least they could do for a man who has done so much for them and their organization.●

A NICE IDEA THAT HAS NOT WORKED

HON. ROBERT J. LAGOMARSINO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 21, 1981

● Mr. LAGOMARSINO. Mr. Speaker, we recently voted to extend the Voting Rights Act, an action which I supported and voted for, and it will soon be the Senate's turn to act. During the

floor debate, I indicated my concern with one provision of the act, dealing with the requirement for printing ballots in languages other than English. I noted the experience of several counties in my district with the provision, and voted to amend that section of the act to make it more practical; an amendment which unfortunately did not pass.

In that regard, I would like to share with my colleagues an editorial which recently appeared in the Ventura County Star-Free Press, on October 15, 1981, entitled, "A Nice Idea That Hasn't Worked":

A NICE IDEA THAT HASN'T WORKED

Under the heading of nice ideas that haven't worked too well, we would have to include bilingual voting.

That was mandated by the federal Voting Rights Act of 1975, recently extended by Congress, which required election material to be printed in the native languages of minorities constituting more than 5 percent of the population.

The goal was to encourage greater participation by minorities in the American election process. But it really hasn't turned out that way.

In most of California, as in Ventura County, the primary thrust of bilingual voting material has been in Spanish. But experience has shown that very few voters have used the Spanish-language material that was made available.

In the June 1980 primary election, for example, 7,180 Spanish-language ballots were printed in Kings County; two were used. Similar results are found throughout the state.

This experiment in bilingual voting hasn't been cheap. Extra expenses added an estimated $750,000 to the cost of the 1980 general election in California. And the cost per Spanish ballot used, where it has been calculated, has been steep.

In San Bernardino County 1980, $108,000 was spent to provide bilingual election materials. With only 113 ballots used, the cost was $950 a ballot.

In Ventura County, the cost hasn't been so prohibitive, because the county's chief elections officer, Clerk-Recorder Bob Hamm, has taken a different approach. Mr. Hamm makes Spanish voting material—sample ballots and voting instructions—available to those who ask for it. Each polling place has a sample ballot in Spanish, and at precincts with heavy Spanish-speaking voter registration, there is an election worker who is fluent in Spanish, to provide aid to any voter who asks for it.

The cost of printing the Spanish language material was about $40,000 for the two elections of 1980, says Mr. Hamm. There were about 1,700 voters who asked for voting materials in Spanish, putting the added cost at about $24 per voter (if all 1,700 voted).

That beats printing thousands of bilingual ballots, to have only a few of them used.

The irony is, Mr. Hamm was actually threatened with jail by federal elections officials for failure to comply with the Voting Rights Act in 1976. Logic finally prevailed, and the feds accepted his procedure.

Some Taxpayers are impatient with the whole idea of bilingual voting, since English is the language of this country. And there are limits to how far elections officials should go to try to overcome plain apathy by non-voters, no matter what language they speak.

But bilingual voting is a federal requirement, and since it is, Mr. Hamm's approach to compliance seems the best way to handle a well-intentioned idea that simply hasn't produced the hoped-for results.●

HIGH INTEREST RATES AND THE FAMILY FARM

HON. PAUL SIMON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 21, 1981

● Mr. SIMON. Mr. Speaker, the family farmer has been the backbone on which this country's productivity was founded. The men and women who are family farmers have fed this Nation since its earliest days. They are people who understand the economy, because they have provided the basis for its health and growth for years. They have done so while having to adjust to every turn in our Nation's economy, and having to remain productive. The family farmer has to know not only about soil conditions and weather patterns, he or she must also know about the economic climate, and how to adapt to its shifts. The family farm is a critical barometer to our economic health, and the farmer is telling us that things are becoming very sick. A farmer in my district, Lindel Whitelock of Grantsburg, Ill., has taken the time to spell out very simply and clearly what high interest rates are doing to his farm business. His is a small operation, he and his wife run 560 acres on which they grow corn, grain, sorghum, and wheat and raise hogs and cattle. Mr. Whitelock originally offered these comments to be placed in the record of the House Budget Committee. For those who have trouble understanding how dire the high interest situation is, they provide a very apt lesson. Because they explain the interest rate crisis so well, I am inserting a summary of Mr. Whitelock's remarks into the RECORD:

COMMENTS ON INTEREST RATE SITUATION BY LINDEL WHITELOCK, GRANTSBURG, ILL.

I am a family farmer. My background in farming and farm financial management gives me an understanding of the current agricultural situation and the impact high interest rates have had on the family farm. The farm which I operate has been and still is a farm which is suffering due to high interest rates and high costs.

Let me describe the plight my wife and I currently face. I own and operate 420 acres and rent another 140 acres. My land has all been purchased. My interest rate on my real estate mortgage is 12¾ percent. In addition to my real estate loan I have a loan for equipment and operating expenses. The interest on this money is the prime rate plus one percent, offered by a bank in St. Louis, Missouri. This means the interest on my operating money has exceeded 20 percent for over one year. Our operation is of a general nature. We have corn, grain, sorghum, wheat, hogs and cattle. Basically, if there is one good area of farming, we are able to offset losses in another crop by having this type of operation. I would like to explain what impact high interest rates have had on my operation.

The major impact is that through high interest periods my repayment ability is greatly lessened. For example, an increase of one percent reduces my ability to repay $1,600 on my loans. This interest puts a squeeze on next year's funds. If interest continues to climb the squeeze will eventually eliminate me from farming. Higher interest rates increase my cost of operation. Interest is an overhead cost and must be paid first. The items which I purchase for production increase as a result of processors passing the cost onto the purchaser. The same is true when the final processor purchases our grain, hogs and cattle. Due to the loss of net income through higher interest paid, higher cost, and lower sales prices, less money is available for the purchase of farm equipment, consumer items or the items that would increase the efficiency of my operation. This eventually will result in severe production efficiency losses. The higher interest charges have caused the curtailment of many feeder operations which will tighten the supply of meat to the consumer. The bottom line is that a slowdown in the farming sector leads to losses in other areas.

The impact of high interest is also being felt on local businesses. As farmers have less money, or as money becomes tighter, farmers spend less and in turn local and national businesses slump. In addition higher cost money creates cash flow problems for many people other than farmers. For example, most farmers purchase production items in the spring of the year, however they do not have income until fall due to the time required to produce a crop. Agriculture, unlike other areas of production has a 3-6 month time lag in starting an income flow after inputs are made. The only exception is the dairy business. Farmers pick up input items and do not usually pay for these items for 60 days and then he pays generally with borrowed money. The supplier has to replenish his stock and pay for that stock within 30 days. This policy then puts the local merchant in an income expense cost squeeze. Farmer resistance to high interest and higher money costs is creating problems to local businessmen. These are the problems that occur now, but let's take a look at what can be anticipated in the future if higher interest persists.

If high interest rates continue, everything the farmer and consumer alike purchases will increase in price due to the added cost. These production or consumer items, will be higher not only to those who have to borrow money to buy them, but the higher costs will be felt by those who pay cash. Farmers are going to be asked to take a larger risk because elevator operators are less willing to forward price our products because of the interest they must pay on the margin money required when a farmer locks in a contract. At this point farmers are not able to forward price any wheat because elevators will not make a bid. Higher interest rates make it very unattractive for farmers to purchase livestock to go into feed lots. This in turn could possibly lead to a shortage of meat and higher inflation because of higher grocery costs. Higher interest costs simply take money from the family farmer and give it to the wealthy who have the money to loan.

For many farmers who may find themselves in serious financial difficulty, there will be no out. High interest rates coupled

with low prices make it almost impossible for anyone to enter agriculture and more particularly farming. Farm equipment, real estate, durable goods, fertilizers for buildup purposes are not selling simply because no one has the money to purchase these goods. Allis Chalmers, for example has experienced a 35 percent decrease in sales since one year ago. Furthermore this translates to unemployment not only at AC's factories but at local dealerships. High interest is certainly not helping the items the government reports say they are helping.

High interest will not balance the budget, nor will it reduce inflation. To balance the budget income must increase to match spending.●

MR. KANER'S WINNING POEM

HON. PETER A. PEYSER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 21, 1981

● Mr. PEYSER. Mr. Speaker, I am entering in the RECORD a poem written by Paul Kaner, a senior citizen living in the city of Yonkers.

This poem won first prize in a city of Yonkers-sponsored senior citizens poetry contest.

In addition to being a fine poet, Mr. Kaner, who is a graduate of Columbia University, has won numerous awards for his paintings and drawings.

I am pleased to share with my colleagues, Mr. Speaker, Mr. Kaner's winning poem, a moving statement of love.

GONE IS MY LOVE

I speak of one—a love so fair,
With halo formed of golden hair,
And scented garlands rich as wine
Entwined about a form divine.
Of one whose voice compelled the ear,
And all the senses crystal clear,
To greet a welcome to the sound
Her gentle steps made on the ground.

I speak of days and cherished hours
Our heated frames spent 'midst the flowers,
And flaming passions known to young
Soared skyward in enraptured song.
Sweet moments spent in warm embrace,
Of love transcending Time and space,
We languished 'neath the sycamores
And pledged our troth forevermore.

I speak of one with love intense,
Exalted by true innocence,
And shrouded in a virgin shell
Where I alone with her did dwell.
But now no deed can I perform
Which tells of my poor love forlorn,
For we are rent, no more to meet
So blissfully in sweet retreat.

Alas, she's gone to Death's domain,
Forever there will she remain,
Till I can join, in ecstasy,
My true love in eternity—
I speak no more since we're apart,
Nor will again—till I depart.

PAUL KANER.

MESSAGE FROM HOME ON THE ECONOMIC RECOVERY PROGRAM: STICK TO YOUR GUNS

HON. JOHN EDWARD PORTER

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 21, 1981

● Mr. PORTER. Mr. Speaker, not long ago an old friend from college days who has been a very successful building contractor telephoned to tell me his feelings about the Reagan economic recovery program.

Specifically and naturally he was concerned about high interest rates and advised me that his company, which had earned millions in recent years, was now, with the new home market virtually dead, barely existing on money borrowed at interest rates that would soon mean bankruptcy.

I expected his next words would be to urge congressional pressure to loosen the Feds tight reins on money growth. Instead he said:

You tell the President to keep right on doing what he's doing and to stop these throwaway HUD spending programs that pay contractors three times the value for public housing and waste billions of taxpayer dollars.

He demanded continuing efforts to cut Federal spending and waste, to cut taxes, and to end excessive bureaucracy and regulation.

He said:

If my company's going to go broke after so many years of success, it will be the fault of all the stupid economic policies that Washington has pursued in the past. But if it is to happen, I sure don't want to go under without accomplishing something. You people in Washington who have finally seen the light, stick to your guns and at least we'll have an economic future for our country to look forward to.●

PRESENT DAY COAST GUARD

HON. BOB LIVINGSTON

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 21, 1981

● Mr. LIVINGSTON. Mr. Speaker, one of my constituents whose son serves in the Coast Guard recently sent me what I believe to be one of the best, most informative articles I have seen about the Coast Guard. I think all my colleagues will agree after reading this article that serious problems exist in the service, and unless corrected, will cripple the Coast Guard's ability to perform its functions.

[From the Daily Sentry-News, Sept. 23, 1981]

GUARD OVERWORKED, OUTDATED

(By Tom Tiede)

PORTLAND, MAINE (NEA).—Capt. Charles Mincks says it was to have been a routine mission. So last February he ordered the crew of the United States Coast Guard Cutter Duane to prepare the ship for a 21-day patrol; they were going to the nearby Georges Bank to enforce the fishing regulations.

But they never left.

Just before departure the captain stunned his superiors by "recommending" that the cutter be kept in port for extensive repairs. The boat was 44 years old, he explained, and so ridden with deficiencies and deterioration that he decided it was not safe to take it even on an everyday patrol.

The electrical system was rotting, for one thing. And the boiler looked as if it could blow. Then there were the ventilation shafts running throughout the ship; they were laden with years of accumulated grease and a spark could send rolling fire from one end of the vessel to the other.

Thus Capt. Mincks gave tradition the deep six.

He refused to put out to sea.

But if the incident shocked Mincks' superiors, it should not have surprised them. The Duane is just one of many elderly and undependable ships in the U.S. Coast Guard today, and it may in fact personify a service that has quietly become overworked, outdated, ill-equipped and in trouble.

Indeed the venerable service, which has roots in the American Revolution, is awash in the sea of hard times. Its commandant, Adm. John Hayes, says the force is in "desperate straits"; some of its deck sailors, even more candid, feel conditions today are right out of His Majesty's Ship Bounty.

And outside observers are quick to agree. Last year the General Accounting Office studied the Coast Guard from aft to foredeck and reported that it can no longer be expected to carry out all of its duties. One GAO researcher adds privately that the state of the service is scandalous.

The scandal may be most evident in the Coast Guard's fleet. The GAO believes it is too gray and thin to meet its responsibilities. The average age of a ship in the Coast Guard in now 23 years old, and the number of cutters (the fleet workhorses) has declined from 339 to 246 in 10 years.

What's more, some of the cutters that are left are not just old but ancient. Five of them, including the Duane, were built before World War II. Service officers recall with anger that the cutter Cuyahoga, which sank on duty in 1978, taking 11 men to their deaths, was 52 years old at the time.

And if the ships are dated, the equipment on board is likely to be of similar vintage. The life jackets on some of the cutters were designed in the 1940s. The rafts are regularly too worn to pass inspection. Officers say the only up-to-date items on the Duane are this week's news magazines.

Ah, the Duane. The captain says it's so dilapidated he's even had trouble with the whistle. And the ship's assistant engineer, George Self, reports that he has been trying for almost two years to replace a steam-operated laundry component: "'There's no money,' they keep saying, 'no money.'"

That is the root of the dilemma all right. The Coast Guard is unquestionably the poor sister of the service. The budget this year is a scant $2 billion, or about the cost of a single nuclear aircraft carrier, and officers say this is because Congress tends to forget what the Coast Guard is.

What it is is both fish and fowl, actually. And there is where the confusion lies. The service was originated 191 years ago to help collect tax revenue for the new nation. It was called the Revenue Cutter Service then,

and its members were given ranks parallel to those in the Navy.

As it happened, those ranks came in handy. When the War of 1812 broke out the cutter service was used to bulwark the maritime defenses, and it's continued to do so in all subsequent hostilities. This means the Coast Guard has a dual role: saving lives in peace, and taking them in battle.

Despite this military responsibility, though, the service has never been a direct part of the defense bureaucracy. It was originally answerable to the Secretary of the Treasury, Alexander Hamilton, and since then it has become one of the many divisions of the Department of Transportation.

In other words the Coast Guard does not enjoy the influence of a direct alliance with the Army, the Navy and the Air Force. As a result it can be overlooked when the money is passed around. In recent years the slight growth in the Coast Guard's budget has not so much as covered inflation.

What is worse, the duties of the service have in those same recent years expanded almost exponentially. It still is the good Samaritan of the nation's waterways, and it still prepares for combat, but it also has been given whole new responsibilities for law enforcement and border protection.

In the last decade the Coast Guard has been assigned to enforce federal laws regarding boating safety, water pollution and the operation of deepwater ports. It has also inherited the regulatory responsibilities for the 200-mile fishing limit and for illegal immigration and dope smuggling.

Last year the service intercepted drug shipments worth $1 billion. It likewise was called to facilitate and secure the arrival of more than 120,000 Cubans on the shores of Florida. All in all, Coast Guard executives say the agency has become the largest marine police force in world history.

At the same time the service has become something of a disappointment for an alarming number of its members. Men in the rank and file say they joined the Coast Guard to be part of its traditional work, which is search and rescue, but instead they've become cops who chase marijuana boats.

Besides this, they do the chasing in vessels that are not shown on the recruitment posters. That is to say those like the 327-foot, 2,500-ton Duane. At best, the ship is uncomfortable, unsanitary, unredeemable and very dangerous. Operations Officer David Edwards says it's not fit to habitate.

The Duane's mess hall is so small, for instance, that those waiting to eat must stand in a line that stretches to an upper deck. And the enlisted men's shower rooms are even worse; there are six showers in one room to service half of the 143-man crew, that is, if all six of them are working.

The men say the ship is rife with bugs that bite and flies that get into the soup. And the rust pops out of new paint like an incurable rash. The air-conditioning is faulty, the lights are unpredictable and there are layers of asbestos on the ceilings that worry the environmental purists.

Also, there are the sleeping bays, they are medieval. The men grump that the three-tiered bunks are so close together that people with big shoulders can't turn over in the night, and the air is so inherently grimy that the sheets turn brown as boot leather in the seven days between washings.

Lt. Cmdr. Edwards says the sleeping bays constitute permanent living quarters for many of the lower-ranking crewmen. Officers can leave the ship in port, and so can enlisted men who are married, but the rest of the sailors are required to spend every night of their enlistments in the bays.

No wonder many of the men on the Duane can't wait until their enlistments are up. And that is apparently a prevailing sentiment throughout the service. The Coast Guard is currently up to its authorized strength of about 40,000, but the GAO report says its retention rate is only 15 percent.

In other words, morale is such that fewer than two of 10 Coast Guard sailors renew their enlistments. And in some ranks the rate is only one in 10. Rep. Gerry Studds, who handles Coast Guard affairs for the House of Representatives, claims the average 1981 enlistee has less than two years' experience.

And Studds, a Massachusetts Democrat, says that's sobering. He thinks the neglect and underfunding of the service has cut into its heart and soul. And he wonders with a good many other advocates when the Congress and the nation will wake up to the reality that the Coast Guard is listing.

In fact they may be waking up now. At least the Coast Guard command says things are starting to get slightly better. It says Congress is paying more attention, the Reagan administration seems sympathetic, some new ships have been ordered and morale may have struck bottom and turned around.

Further, there is talk of greater things to come. The GAO suggests the Coast Guard's fleet (9,000 vessels) must be completely overhauled, Rep. Studds thinks the number of men in the service should double this decade, and Adm. Hayes says that a "quantum jump" in the budget is not out of the question.

Quantum jumps? Twice the manpower? All of this is still the stuff of dreams on the USCGC Duane, where the tow lines remain inadequate and the fuse boxes continue to be on the critical list. But if the renaissance does come, this ship should be at the center of the servicewide celebration.

For it was here last February that Capt. Charles Mincks took his stand. When he docked the old boat for repairs he said in effect that even in the Coast Guard deterioration has its limits, and that his mission at the moment was not worth endangering the lives of the men under his command.

It was a risky act. He might have been court martialed for it. But it turned out that his superiors understood the decision, and agreed with it, and a lot of Coast Guard people now think that any reversal of service decline should date to the time this courageous captain refused to go to sea.●

IN SUPPORT OF H.R. 4560

HON. LYNN MARTIN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 21, 1981

● Mrs. MARTIN of Illinois. Mr. Speaker, 10 months ago the people of northern Illinois sent me to Washington to abate excessive Government spending. I have been told time and time again that for too long the strangling effect of unquestioned Government spending has taken its toll on working Americans. These are the very same Americans who benefit from many of the programs contained in H.R. 4560—Labor, Health and Human Services, Education appropriations for 1982.

During the discussion of this far-reaching bill, I did not challenge the merit of the many worthwhile domestic programs appropriated in this piece of legislation, but in fact questioned the continued unleashed spending policy of the Federal Government: a policy that threatens the very livelihood of you and I through a sick economy—forcing high inflation, high interest rates, and high taxation by which to finance this debt.

Although it was necessary for me to be off the floor at the time the vote to send this bill back to the Appropriations Committee was taken, I had every intention to lend my support to this unsuccessful effort. An effort that was a necessary response to a bill that exceeded its limit in the budget resolution by $700 million in actual spending for combined discretionary and mandatory programs: $700 million that will have to be made up somewhere else and, if not, added to our Federal deficit. And, a deficit, I remind you, that must be kept to a minimum if we are to achieve our goals and objectives of a balanced budget and a revitalized economy.

As a longstanding supporter of the many programs in H.R. 4560, I do not deny their value, but in fact am supportive of their merit and delicate relationship with the overall economy.●

GARMENT WORKERS SUPPORT VISIBLE U.S. ROLE IN NORTHERN IRELAND CRISIS

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 21, 1981

● Mr. BIAGGI. Mr. Speaker, I would like to bring to the attention of my colleagues copies of letters I received from the senior executives of the Amalgamated Clothing and Textile Workers Union of New York which urge a new initiative in Northern Ireland.

Recognizing the importance of the role of the United States in bringing peace to Northern Ireland, the ACTWU contacted President Reagan urging his attention to this area through contact with the British Government. In addition, the union, which represents 455,000 textilers, also contacted British Prime Minister Thatcher, to urge the withdrawal of troops and fair and equitable treatment of the Catholic minority in the areas of employment, housing, and political representation.

Mr. Speaker, as chairman of the 126-member ad hoc congressional committee for Irish affairs, I am proud that

the leaders of the ACTWU have taken a lead role in this area, in concert with other New York labor groups who have also spoken out on this issue. The contributions which they make can only enhance the work of the ad hoc committee, whose primary role is to elevate this issue in U.S. foreign policy and to expedite a peaceful solution to this tragic situation.

I commend the leaders of the ACTWU for their initiative in this area and look forward to working with them in advancing peace and justice for all people of Northern Ireland.

The letters follow:

AMALGAMATED CLOTHING AND TEXTILE WORKERS UNION,
New York, N.Y., October 5, 1981.

Hon. MARGARET THATCHER,
Prime Minister,
c/o British Consulate,
New York, N.Y.

DEAR MADAM PRIME MINISTER: The Amalgamated Clothing and Textile Workers Union affiliated with the American Federation of Labor and Congress of Industrial Organizations deplores and condemns usurpation of the people of Northern Ireland through the use of British troops and armor.

We deplore the denial of the Catholic population in Northern Ireland and the discrimination of jobs, living standards and political representation. We further condemn the illegal imprisonment of men and women for alleged crimes without trial by jury or due legal process. For some 800 years the people of Northern Ireland have been subjugated, exploited and discriminated against at the hands of the British government.

As an organization founded and devoted to the principles of human rights with equality of justice for all people in all lands, we call upon you to begin the necessary and inevitable task of a phased out withdrawal of British troops of occupation of Northern Ireland as a means of achieving the goal of peace and justice and the unification of the Irish nation 8 centuries overdue.

Sincerely yours,

MURRAY H. FINLEY,
President.
JACOB SHEINKMAN,
Secretary-Treasurer.
SOL STETIN,
Sr. Executive Vice President.
SCOTT HOYMAN,
Executive Vice President.

AMALGAMATED CLOTHING AND TEXTILE WORKERS UNION,
New York, N.Y., October 5, 1981.

The PRESIDENT,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: The Amalgamated Clothing and Textile Workers Union founded in 1914 with a membership of 455,000 in the United States and Canada deplores and condemns the usurpation by the British government of the people in occupied Northern Ireland.

We concur and support whole-heartedly the official policy statement of the AFL-CIO with which we are affiliated condemning the centuries old blatant discrimination of the Catholic population in jobs, living standards and political representation. We deplore further the denial of basic human rights such as imprisonment of Irishmen and women for alleged crimes without trial by jury or due legal process. The Amalgamated Clothing and Textile Workers Union has since its very inception actively supported the cause of human rights and equality for all people in all lands.

As President of the United States of America founded on the principles of justice and equality and human rights, we respectfully call upon you to use your immense influence with the British government to take the necessary and inevitable steps of a phased out withdrawal of British troops from Northern Ireland as a prelude to achieve the peace and unification of that ill-fated nation 8 centuries overdue.

Sincerely yours,

MURRAY H. FINLEY,
President.
JACOB SHEINKMAN,
Secretary-Treasurer.
SOL STETIN,
Sr. Executive Vice President.
SCOTT HOYMAN,
Executive Vice President.

CUTS IN SOCIAL SPENDING

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 21, 1981

● Mr. HAMILTON. Mr. Speaker, I would like to insert my Washington report for Wednesday, October 21, 1981, into the CONGRESSIONAL RECORD:

CUTS IN SOCIAL SPENDING

The spending cuts in social programs are beginning to pinch. Such is the message I get as I travel around the 21 counties of the Ninth Congressional District.

The cuts in spending which have already been made will have far-reaching effects. Across the nation, 700,000 families will lose all or part of their welfare benefits. About 1.1 million persons will no longer receive food stamps. For thousands of children, school lunch prices will go higher and meals will be smaller. Some 1.5 million unemployed workers will not have 13 extra weeks of benefits. Approximately 900,000 people will not get the public service jobs they had been counting on. Fewer federally subsidized housing units will be available, and rents will rise to between 25 percent and 30 percent of the occupant's income. Scores of other changes will be made in these programs. About 70 percent of all cuts made so far are in programs which help the poor.

Low-income Hoosiers will also suffer. In Indiana, as Governor Robert Orr has said, "the cuts will bring pain and more pain." Aid to families with dependent children, the biggest welfare program, will be cut from 10 percent to 20 percent. About 20,000 of the 400,000 households in Indiana which receive food stamps will become ineligible, and 12,000 other households will have their allotments trimmed. The size of school lunches will be reduced and their cost will increase. Two-thirds of the 60,000 people who draw trade readjustment assistance will lose it. Ten thousand public service workers will be dropped. In 57 categorical programs for social services, funding will fall from $204 million to $180 million overall. There will be other effects as well. Towns, cities, and counties will see their revenue sharing trimmed from $87.6 million to $83.2 million. Although it is too early to judge with certainty, Hoosier college students will probably find it harder to get loans for their education.

Whether nationwide or in our state alone, the ultimate impact of the spending cuts on people's lives can only be estimated. Thousands of families will be deprived of income and assistance they need to make ends meet. The cuts may carry high social costs, including increased crime or urban unrest. Most experts believe that under the changes approved by the President and Congress, the very poor who are totally dependent on welfare will be spared major losses, but the poor who have low-paying jobs may have to quit work altogether. The experts also believe that the cuts are coming at a time when poverty in the United States is growing. However, predictions about the overall condition of the poor are difficult to make because social programs are run by state and local governments, many of which have not yet decided what to do.

The cuts in spending raise profoundly complex questions for policymakers. It is clear that the nation is changing course after years of extraordinary growth in entitlement programs such as welfare, food stamps, school lunches, and unemployment compensation. Most of these well-intentioned programs started off rather modestly and then exploded in size and cost. Between 1970 and 1981, the cost of living rose 138 percent, yet during the same period federal spending for entitlement programs more than quadrupled, from $70 billion to $295 billion. Entitlements now account for almost half of all federal spending, up from 22 percent in 1956. With increased size and cost have come waste and bureaucracy. If the present trend were to continue unchanged, entitlement programs would continue to grow and would threaten any chance to balance the federal budget. I do not find in Congress any dissent from the proposition that the growth of entitlement programs must be slowed, but the effort to cut them back is bound to provoke a strong public reaction. Congress realizes that the necessary curtailment in federal spending will never be achieved by attacking fraud, waste, and abuse. We must do our best to eliminate such excesses wherever they exist, but we should recognize that the cuts in social programs now on the books will cause hardship for many citizens.

The cuts in spending should prompt Congress to think carefully about the role of government in a democratic society. All of us want ours to be a compassionate society. I do not find any real opposition to the general idea that government should protect the genuinely needy against the reverses of life. At the same time, no one wants to bestow unwarranted benefits on persons who do not need them. To do so places an unfair burden on taxpayers. While all of us subscribe to the view that government should undertake to do only the things which people cannot do for themselves, there are many different interpretations of that principle. A more serious problem is that our economy is no longer growing rapidly.

After a generation of improvement in our standard of living, the nation has entered a period of slower growth. Economic growth, however, has been an indispensable factor in achieving a wide range of social goals. We must, of course, take the necessary measures to increase our rate of growth, but until we succeed there will be increased tension over the distribution of income. We simply cannot address all the needs of all who require, or think they require, a help-

ing hand. Controlling government expenditures, a task which is difficult enough in periods of rapid growth, becomes more difficult still in periods of slow growth.

There is general agreement that the costs of our social programs have increased while our ability to pay for them has not. Almost all of us agree that cuts in spending must be made, but if these cuts are to be made then extraordinary efforts must also be made to guarantee social justice and equity for those people at the lower end of the economic spectrum. If government is going to encourage economic growth with tax reductions of many kinds, then it must do everything in its power to ensure that available resources are distributed fairly. If Americans do not perceive the tax and spending cuts as fair, then it is a safe bet that the policies which set them will, in time, be repudiated.●

INVESTING IN PEOPLE

HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 21, 1981

● Mr. OTTINGER. Mr. Speaker, I want to bring to the attention of my colleagues a recent article by Howard J. Samuels which was printed in the New York Times. Mr. Samuels' comments describe the devastating impact of President Reagan's cuts in funding for education, job training, day care, and other social services. As he clearly points out, these are false economies. Spending in these areas are investments in the future of the Nation, not just debits on the budget.

The text of Mr. Samuels' article follows:

INVESTING IN PEOPLE

(By Howard J. Samuels)

The Reagan Administration's drastic reduction in funds for education, job training, day care, student loans and a host of seemingly expendable social services are the worst sorts of false economies.

What we are slashing is financing for the development of what economists call "human capital." In doing so, we have somehow lost sight of an essential fact, described by Adam Smith. "The skill, dexterity and knowledge of a nation's people is the most powerful engine of its economic growth." Or, as stated by Nobel Laureate economist Theodore Schultz, "The rate of return on education has tended over time to exceed the rates of return on physical capital."

In short, while there is a consensus on the need to invest more in machinery and research, we have forgotten the value of investing in people's health, education and earning capacities. The need to upgrade America's human capacities is ever more evident as our economy shifts toward service professions and higher technology.

We are approaching a critical shortage of highly skilled people. More and more of the graduates of our nation's school system cannot read and write. Young people who cannot fill out a job application or read a page of classified ads have literally no productive future in our economy.

Not only will they be unproductive, but our increasing cost of welfare and crime is becoming a national scandal. However much we deplore it, there is no sense at all in denying that lack of education and training is a direct cause of crime, drug addiction and despair. The main response to rising crime seems to be a willingness to spend lavishly on new prisons, not on programs that might stop crime.

Russia, our political competitor, and Japan, our economic competitor, are spending billions to capitalize on their youth's potential. Both are engaged in hugely ambitious educational and technical development programs. Ninety-eight percent of all Soviet children now complete the mandatory 10-year primary and secondary school program. Only 75 percent of American children make it through high school.

More importantly, virtually every student receives 10 years of mathematics, five years of physics, four years of chemistry, five and a half years of biology, five years of geography, three years of mechanical drawing and 10 years of workshop training for both boys and girls.

Meanwhile, the Japanese are pursuing a similarly intensive scientific training program and achieving astounding results. Japan now graduates as many engineers every year as the United States, and Japanese students score the highest in the non-Communist world in math and science.

The economic implications for the future productivity of America's work force are glaring enough, but the "skills gap" may be a greater threat to our national security than shortages of sophisticated weapons. Buttons and video screens do not wage wars—people do. A recent survey of 23,000 recruits at the San Diego Naval Base showed that 37 percent of them could not read at the 10th-grade level.

It is easy to understand why Americans have become disillusioned about spending on human services. Education, child care and health are investments paid from the pockets of today's taxpayers, with a return that may not show up for 20 years.

Obviously, money alone is not enough. We must reform our ways of delivering human services to make them more cost-effective. Our inner-city schools are highly bureaucratized and ineffective. Our health-care programs are laden with waste. It will take leaders with courage and foresight to explain to the American people that there will be no easy fix by simply slashing funds.

Most of all, we need to realize that spending on programs that improve health, literacy and skills of our people are investments in the future of the nation, not just debits on the budget.

This is a bipartisan issue, for the common good of the country. I am a Democrat, but let me quote A. W. Clausen, a no-nonsense Republican and former president of the Bank of America and now president of the World Bank: "The United States can't neglect its resources of brain power any more than it can neglect energy, capital, or other factors of production. Employment, productivity, and, ultimately, our humanity hangs in the balance." I could not agree with him more.●

THE DURABLE MEDICAL EQUIPMENT DISCLOSURE AMENDMENTS OF 1981

HON. JOHN J. DUNCAN

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 21, 1981

● Mr. DUNCAN. Mr. Speaker, I am today introducing the Durable Medical Equipment Disclosure Amendments of 1981. This bill would amend title XVIII of the Social Security Act to require that medicare beneficiaries who are considering the purchase or rental of durable medical equipment (DME) covered by medicare be given certain specific information about the equipment they are considering. This disclosure requirement is placed on the durable medical equipment supplier. The bill provides that, if such disclosure is made, the supplier may accept an assignment of medicare benefits and charge the beneficiary the disclosed price rather than medicare's determination of the reasonable and customary charge.

The purpose of this bill is to focus attention on the problems in the DME program under medicare and to stimulate discussion by proposing a solution. Simply stated, the problem is that the assignment program for durable medical equipment is not working as Congress has intended—to help medicare beneficiaries obtain needed supplies and equipment. Excluding the sale or rental of oxygen equipment and items costing less than $50, it is believed that a small percentage of DME purchases and rentals are subject to assigned claims.

The reasons for this are not hard to find. First of all, there are very few standard items in the DME area. There are many variations and added features for DME products designed for different types of patients and for different periods of use. Also, current medicare law and policy effectively discourages a medicare beneficiary who needs and desires a special feature from obtaining that feature and still assigning his claim for medicare payment to the supplier.

As a consequence of all this, many dealers simply refuse to accept assignments for most DME purchases.

This proposal is one way to help solve this dilemma. It would allow beneficiaries to choose—and to pay for themselves—those added features of DME covered by an assignment which they feel are necessary and desirable for their condition. And, most significantly from the point of view of the beneficiary and the medicare program, to complement this change in assignment policy, the full disclosure requirement would provide a vigorous incentive for cost constraint and price competition among DME suppliers. It

would also have the very desirable effect of equipping medicare beneficiaries and their families with information necessary to be prudent buyers at the time the item of DME equipment is being considered for purchase or rental.

The DME program has been the subject of considerable interest to the Department of Health and Human Services and Congress over the years. I am well aware that there are several issues which may be raised about any proposal to change the assignment policy with respect to DME. Therefore, I would like briefly to discuss some of these matters. First and foremost is the question of possible additional cost to the medicare beneficiary. Nothing in this proposal would reduce the amount of money medicare will reimburse as the reasonable charge for an item. Moreover, this proposal would introduce real competition and thus restrain beneficiary costs by requiring full disclosure of price information and allowing the beneficiary time to "shop" for a lower price. For standard items of DME—those that do not involve additional features—it can reasonably be expected that in many cases that price will not exceed the medicare reasonable charge—at least in instances where that charge has been fairly and accurately determined.

A second concern will be the cost to the medicare program. This is a particularly compelling question because of the need to keep costs down in all parts of the Federal budget. Here again, the requirements of full disclosure will assure that suppliers are fully competitive with one another and that beneficiaries are fully informed, prudent buyers. In effect, this proposal would tend to create competition where none exists now and constrain program costs without the added administrative costs of price surveillance and controls.

Third, some may fear that an unfortunate precedent would be created by modifying the assignment policy with respect to only one aspect of the medicare program. First of all, no other part of the medicare part B program is so much beyond the control of the provider; the DME supplier is at the mercy of the manufacturer product design and pricing decisions. Although equipment servicing provided by the DME supplier can be a significant contribution to the well-being of the medicare beneficiary, it is only rarely a significant component of the cost of an item. By contrast, the price of most other medicare part B services is significantly within the control of the provider itself and not determined significantly by outside forces. Moreover, the principles of making an informed, prudent buyer of the medicare beneficiary may well be a principle which is worth watching and considering for other areas of the medicare program.

Last, some may be concerned that modifying the assignment policy is a more fundamental change than is necessary to deal with DME problems. Proponents of this view would argue that updating the medicare charge screens more frequently should be enough. In response to this, it should be pointed out that updating the screens simply would not go far enough. That would benefit only the DME supplier with added medicare costs at a time when we can least afford them. That would interject no additional element of price competition among suppliers and provide no further information to medicare beneficiaries to enable them to become prudent buyers. The mandatory disclosure requirement does both. It is indeed a departure in medicare program policy, but it is a reasonable quid pro quo for modifying the assignment policy with respect to DME.

These and other questions, I am sure, will be fully debated in the months to come. The purpose in proposing the Durable Medical Equipment Disclosure Amendments of 1981 is to stimulate this discussion, to focus on the failure of the DME assignment policy, and to stimulate the search for solutions to the problem. I believe that this bill provides one workable solution. There may be others. If so, I urge that they be brought forth and discussed fully by medicare beneficiaries, DME suppliers, medicare program officials, and the Congress.●

A SILVER ANNIVERSARY SALUTE TO IOTA CHAPTER OF TAU GAMMA DELTA SORORITY, INC.

HON. LOUIS STOKES

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 21, 1981

● Mr. STOKES. Mr. Speaker, the Iota Chapter of the Tau Gamma Delta Sorority, Inc., in Cleveland will celebrate its silver anniversary on Saturday, October 31, 1981. Mr. Speaker, as this group of distinguished and dedicated business and professional women in the Cleveland metropolitan area mark another milestone in their rich history of service to the community, I feel that it is appropriate to pay tribute to them.

Mr. Speaker, the Iota Chapter of the Tau Gamma Delta Sorority, epitomizes and successfully implements every goal and program of the national organization. To best understand the outstanding job the chapter in Cleveland is doing, we must first review the program goals set forth by the national organization.

Mr. Speaker, the national organization was founded in 1942 by eight talented business and professional women in Detroit, Mich. The sorority adopted as its purpose the cultivation and encouragement of high scholastic standards, the promotion of high individual conduct, and the enhancement of harmony, discipline, and general welfare of the womanhood. There are over 800 active members in the Tau Gamma Delta Sorority nationally.

Mr. Speaker, the key words that characterize the work of the Tau Gamma Delta Sorority are service and support. Both words provide the strong foundation for them activity promoted by the national organization as well as the local chapter in Cleveland, Ohio.

Under the dynamic leadership of national president Noma O. Scott, the organization has implemented and expanded service projects which have provided valuable encouragement and exposure for many young people in the various chapter areas across the Nation.

Mr. Speaker, one of those programs is called "Taugadetta" which is designed to give young and aspiring artists needed exposure in their pursuit of successful careers in the art field. Another national project is called "Tauettes". This is a group organized by the sorority for the purpose of encouraging teenage girls to develop interests in social, cultural, and educational activities.

Mr. Speaker, the exhaustive list of other service projects include a national charity award given each year at the organization's convention in recognition of organizations rendering outstanding service in the community where the meeting is held. Local and national scholarship awards are given also to outstanding and needy students in the Cleveland metropolitan area and across the Nation.

Mr. Speaker, as I noted at the beginning of this tribute, the members of the Iota Chapter of Tau Gamma Delta Sorority in Cleveland are, in my estimation, probably the finest examples of the dedication of the women in the national organization. They have taken the charge and purpose of the sorority close to their hearts and consciences.

By doing so, they have embarked on new approaches to enhance and expand the national projects and priorities. This has meant unflinching service, financial support, and donation of valuable time and talents for worthy projects. However, this is nothing new for these active women.

Since their founding in 1956 by Alma Alsup, Ann L. Allen, Vera Lewis, Evelyn Thompson, Zella Higgins, and Madelyne Blunt, the city has been impacted in a positive manner by the notable business expertise and social consciousness of the organization.

These dynamic women set the tone in 1956 for the aggressive and progres-

sive programs of the Iota Chapter of the Tau Gamma Delta Sorority through the years. Holding true to and carrying forth the ideals of the national and local founders, the Cleveland chapter has increased its membership to 50 members and swelled its power in order to fulfill its project commitments throughout the Cleveland metropolitan area.

Mr. Speaker, in addition to conducting local projects in accordance with the national priorities, the sorority members, under the leadership of President Mary Hills, have developed their own unique programs. This chapter has embarked on such needed and worthwhile programs as an ongoing service project at the Rose Park Convalescent Home for the elderly and other such facilities in the area. These women have taken the time to give birthday parties, holiday celebrations, and visitations to the patients at the convalescent centers and veterans hospital. They also have donated money and put on Christmas parties for the children at the Howard Metzenbaum Receiving Home for Children.

The members of Iota Chapter, Tau Gamma Delta Sorority have worked as hostesses for various art benefit shows.

Mr. Speaker, in addition to serving as hostesses, the chapter members have worked diligently within their own neighborhoods in encouraging others to become more socially responsible. Chapter members are closely associated with the March of Dimes project and Cancer Fund in Cleveland.

Mr. Speaker, it is evident to me and to the community through the deeds of the women of the Iota Chapter of the Tau Gamma Delta Sorority that the key words "service" and "support" have been taken seriously and enthusiastically incorporated into the sorority's projects. By referring to these words for inspiration and guidance, the women have made an indelible mark on the community in Cleveland.

Historically, we assess the impact of an organization based 10 and 25 year intervals. Accordingly, the silver anniversary is an appropriate time to review the work and activities of the Tau Gamma Delta Sorority in Cleveland. In reviewing their work, it is evident to me that the Iota Chapter of Tau Gamma Delta Sorority has been an active force in the community during the past 25 years.

On this significant occasion, the motto of the national organization seems to be the most appropriate tribute to these women. That motto is "Illuminating the Pathway."

Mr. Speaker, the women of the Iota Chapter, Tau Gamma Delta Sorority in Cleveland have been the ray of light which brought hope to the elderly, the neglected, and the needy in Cleveland. They also have been the light in forging new ideas to meet the problems of those groups. Finally, they have been the torch of knowledge always illuminating the path to a better future for the young people in Cleveland. Looking toward the next 25 years, I know that their light, their vitality, and their enthusiasm will reach new heights.

At this time, Mr. Speaker, I ask my colleagues to join me in a salute to the members of the Iota Chapter of the Tau Gamma Delta Sorority, Inc. on their silver anniversary on October 31, 1981.●

JOHN J. CURLEY, EDUCATOR AND ADMINISTRATOR: A DEDICATED PUBLIC SERVANT

HON. DON RITTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 21, 1981

● Mr. RITTER. Mr. Speaker, this summer my district lost an outstanding individual when Mr. John J. Curley, teacher, principal, and school administrator for over 40 years, passed away at the age of 74 years.

I knew John Curley for only a couple of years but I had a great respect for his reputation as an educator and was aware of his major contributions to the well-being of the Easton Area School District since 1941 through his educational leadership in Lehigh County. Mr. Curley not only taught and served as a principal and administrator in the Easton school system, but he also held key posts on educational advisory boards and was a past president of the Easton Teachers' Association. He remained an active and vital citizen until shortly before his death, and touched all who worked with him in a special way through his consideration and warmth.

I am pleased to be able to bring his distinguished public service record to the attention of my colleagues, and I extend my condolences to his wife, Emily of Palmer Township, and his sons, John J. and Thomas.●

AN ACKNOWLEDGEMENT OF THE SIERRA CLUB PETITION TO CONGRESS

HON. ROBERT T. MATSUI

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 21, 1981

● Mr. MATSUI. Mr. Speaker, the conservation movement, initiated by a group of concerned Americans such as John Muir and Gifford Pinchot during the administration of Theodore Roosevelt, has grown in both strength and stature since these early beginnings. Over the past 80 years, Americans have grown increasingly more concerned about the environmental quality of the world they inhabit and with the preservation of sensitive ecosystems and public lands that their descendants will inherit. In response to these considerations, organizations such as the Sierra Club, the Wilderness Society, and the National Wildlife Federation have been formed and serve as a valuable link between citizens interested in environmental questions and elected officials who formulate public policy on these issues. The enactment of much needed conservation legislation over the last two decades, including the Alaska National Interest Lands Conservation Act of 1980, the Surface Mining Act of 1977, and the Land and Water Conservation Fund Act of 1965, attest to the public's, and the Congress, continuous support for the preservation of our Nation's natural resources.

During these past 9 months, the Department of the Interior has advocated a number of specific actions and proposals which would alter profoundly this strong Federal commitment to environmentally sound governmental policies. The adverse actions undertaken by the Department center on the reduction and elimination of Federal funds for enforcement, planning, and resources inventories so necessary for safeguarding the continued environmental health of America's national parks and recreation areas, public lands and wildlife sanctuaries.

Although many of these new Federal policies affect the Nation as a whole, I am particularly concerned about the ramifications of these actions on California. During the past year, the Interior Department recommended that four ecologically sensitive northern California coastal areas be opened for oil and gas leasing exploration. Moreover, in refusing to proceed on regulations to protect marine mammals, the Interior Department has jeopardized the unique sea life along the California coast. In recommending to allow airboats in Sequoia National Park, the Department has violated the historic tranquility found alone among these giant trees. In revoking the executive order on off-road vehicles, the Department has subjected the ecologically fragile terrain of the California deserts to permanent damage.

Instead of allowing the significant environmental gains achieved during the past 80 years to erode, we must work aggressively to retain existing ecological protections. America must pursue consistent environmental policies which adhere to the principles of multiple use and conservation, in order to insure that future generations can enjoy the irreplaceable beauty of our forests, wild lands, and waters. Both elected and appointed officials must realize the importance of this effort and the depth of Ameri-

cans' support for the preservation of our national resources.

By petitioning Congress in support of environmentally protective policies, these petitioners are continuing in the tradition of the first conservationists who actively lobbied the Congress for the establishment of such natural monuments as Yosemite and Yellowstone National Parks. It is hoped that the long-term environmental needs of our land will be as well served by these petitioners today as by the personal commitment of John Muir so many years ago.●

DEMOCRATIC STUDY GROUP

HON. WILLIAM M. BRODHEAD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 21, 1981

● Mr. BRODHEAD. Mr. Speaker, yesterday, Mr. WENDELL BAILEY, Republican of Missouri, in a floor statement, press release, "Dear Colleague," and a letter to Chairman HAWKINS of the House Administration Committee, made some allegations of improper activities against the Democratic Study Group. The charges made by Mr. BAILEY are totally unfounded and inaccurate in virtually every detail.

Today I sent to Chairman HAWKINS of the House Administration Committee the following response to Mr. BAILEY's charges. I believe that this letter clearly and unequivocally deals with each and every allegation Mr. BAILEY has made and shows that his case is totally without merit. DSG executive director Dick Conlon and I will be happy to respond to the inquiries of Members.

The letter follows:

DEMOCRATIC STUDY GROUP,
U.S. HOUSE OF REPRESENTATIVES,
Washington, D.C., October 21, 1981.

Hon. AUGUSTUS F. HAWKINS,
Chairman, Committee on House Administration, U.S. House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: I am writing in behalf of the Executive Committee of the Democratic Study Group with respect to the letter you received yesterday from Mr. Bailey of Missouri making a number of allegations regarding the operations of the Democratic Study Group.

Mr. Bailey alleges that DSG has operated illegally by using funds paid from Members' official expenses allowance to pay staff salaries.

This is untrue. DSG does not violate any rule or regulation of the House in payment of its staff. For more than 22 years, the salaries of DSG staff have been paid partly via clerk-hire—to the extent it was available—and the remainder from a separate payroll account using funds received from payment of Members' dues and—in earlier years—outside contributions.

This account is registered with the Internal Revenue Service, the same as a private business, and DSG has withheld Federal income taxes and social security taxes from employees' salary payments, the same as a private business. The leaders of DSG checked the propriety of this method of paying staff 22 years ago and on occasion since then and have been assured that it is a proper procedure. In fact, Paragraph 5 of the proposed regulation is a direct model of the DSG system.

Specifically, DSG has checked out the propriety of using funds which are received from Members via vouchered payments from their official expense allowance to pay DSG staff salaries, and we have been assured by officials of the House Administration Committee and the Committee on Standards of Official Conduct that the restrictions which apply to Members' use of such funds do not apply to their use by entities which receive such funds in payments for services, etc. This fact is specifically recognized now by Paragraph 5 of the proposed regulation.

In addition, Mr. Bailey alleges that DSG violates House rules by paying its Executive Director more than would be allowed were he being paid totally through clerk-hire funds. Again, this is inaccurate since that portion of the Director's salary which exceeds the clerk-hire limit is paid with unofficial funds from DSG's separate payroll account.

Mr. Bailey also makes a series of allegations regarding the relationship between the Democratic Study Group and its political affiliate, the DSG Campaign Fund, which is located in private office space at 419 New Jersey Avenue, SE.

With respect to involvement of DSG staff in activities of the DSG Campaign Fund, DSG adheres to a more rigid standard than that required of Members' staff involvement in their campaign related activities. The House policy regarding campaign work by congressional employees, as set forth by the Committee on Standards of Official Conduct, is as follows:

"Employees are expected to fulfill the clerical work the Member requires during the hours he requires and generally are free at other periods," during which time they may "voluntarily engage in campaign activities."

To avoid any possible misperception and misleading allegations such as those made by Mr. Bailey, DSG policy goes beyond this House standard by paying DSG staff from campaign funds for any work they do for the DSG Campaign Fund. In short, when DSG staff do any work for the DSG Campaign Fund it is treated the same as having a second or outside job totally separated from their duties at the Democratic Study Group with the exception that if campaign work in any way cuts into the employee's regular DSG duties, then the employee's DSG salary is reduced accordingly.

I might note, that Mr. Bailey's attachment listing DSG staff who have received payment from the DSG Campaign Fund over the years is inaccurate in several respects, to wit: Mr. Conlon is not the treasurer of the DSG Campaign Fund and has not been for at least two years, Mr. Anderson, Mr. Jones and Mr. Stricklet are not pollsters or bookkeepers as Mr. Bailey indicates but are part-time printers, and Ms. Higgins and Ms. Reamy are secretaries rather than pollsters as Mr. Bailey indicates.

Mr. Bailey also alleges that DSG and the DSG Campaign Fund "both have used the same computer equipment at the same time." This is accurate only insofar as the fact that the Democratic Study Group and the DSG Campaign Fund used the same piece of equipment (a typewriter terminal) at different times. However, the equipment involved was neither owned by nor leased through the House of Representatives but rather was leased from a private business. In addition, during the very minimal (2 percent) amount of time when the machine was used for campaign activities, it was located in the DSG Campaign Fund office and the charges were allocated accordingly between the two organizations.

Mr. Bailey also alleges that "official telephones" were used by the DSG Campaign Fund. That too is inaccurate. DSG Campaign Fund does not now and never has used official telephones. The Democratic Study Group has one private (unofficial) telephone line and in 1979, during a careful reexamination of DSG's accounts, we discovered that a pollster employed by DSG Campaign Fund in 1976 and 1978 had been charging long distance telephone calls to this private line rather than to the DSG Campaign Fund telephone lines when he was in other parts of the country. As a result, the DSG Campaign Fund made a $1,240 reimbursement payment to the Democratic Study Group so that there would be no question of DSG funds or resources being used for DSG Campaign Fund activities.

Lastly, Mr. Bailey alleges that the DSG Campaign Fund "has used an official envelope" to mail a report to the Federal Election Commission. Like most Members, the DSG Campaign Fund always files its FEC reports through the Office of Records and Registration rather than mailing them to the FEC. But on one occasion in 1979, a "Record-size" House envelope was used to mail some material to the FEC. I want to emphasize, however, that the Congressional frank was not used; postage was paid—a fact that Mr. Bailey neglects to mention. In addition, the postage label appears to have been blanked out on the Xerox copy of the envelope which Mr. Bailey includes in this letter to you. Attached is another Xerox copy of the same envelope obtained from FEC records which clearly shows a postage label in the upper right hand corner.

Finally, Mr. Chairman, I would like to note what the Better Government Association noted in its report on Legislative Service Organizations; namely, that DSG has been in the forefront of the effort to assure accountability in the operation of LSO's. DSG has operated responsibly and in strict adherence to all House Rules and ethical standards over the years, and you may be assured that we will continue to do so.

Thank you for your consideration.

Sincerely,

WILLIAM M. BRODHEAD,
Chairman.●

NEW AMERICANS

HON. CLARENCE D. LONG

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 21, 1981

● Mr. LONG of Maryland. Mr. Speaker, it is with particular pleasure that I congratulate 61 residents of Maryland's Second Congressional District who have chosen to become American citizens, accepting all of the responsibilities that freedom and citizenship entail. I hope that my colleagues will

join me in welcoming these new Americans.

Carol Palatucci, Young Ja Cho, Bong Hee Cho, Abdul Malik, Vasiliki Gregorakos, Maria Kerr, Tazina Samaroo, In Soo Jun, Rosaleen Calvert, Naji Haroun, Yun Sik Chong, Mr. and Mrs. Richard Pfunder in behalf of Beth Doh-Hee Pfunder, Pothuvayalil Kurian, Hyun Kim, Thin Le, Cham Le, Diana Weiss, Marjorie Leon, Lai-Wang Chen, Chyang Chen, Cesar Gamboa, Aldo Paz-Guevara, Farideh Sadjadi, Hatem Abdo, Sang Kim, Norma Beddows, Antonio Inocencio, Rebecca Kitt, Ramzi Abid, Myong Suk Hwang, Song Yol Hwang, Joseph Orlai, Fung Lee, Shu Lee, Sa Han, Lalitha Gowda, Hugo Gonzalez-Sarratos, Roberto Arguero, Jr., Eun Chong, Chen-Yi Lee, Mr. and Mrs. Harry Hochman in behalf of Joshua Evan Hochman.

Myong Kim, Cheong Kim, Sang Kim, Son Nguyen, Rosa Sebree, Eduardo Perez, Swaran Anand, Feige-Zipora Abzug, Jacqueline Deming, Kyung Isaac, Chong Yi, Young Yi, Kwang Kwon, Bernardino Esguerra, Concepcion Esguerra, Millicent McLeod, Hector McLeod, Homa Rostami-Rabet, Dae Lee, and Pohlean K. Evans.●

COMMITMENT TO THE CLEAN AIR ACT RESOLUTION OF THE 97TH CONGRESS

HON. JERRY LEWIS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 21, 1981

● Mr. LEWIS. Mr. Speaker, the ravages of air pollution can be seen in California by anyone who is willing to look. It is critical that the Federal and State Governments continue in their partnership to attempt to decrease the impact of air pollutants in our environment. Because of the Clean Air Act, great strides have been made to clean up the Nation's air. The Clean Air Act is an enforceable strategy for cleaning up the air and keeping it clean. Though the job is not yet finished, this legislation has proven to be effective in reducing pollution in many parts of the country.

Probably the most far-reaching environmental issue the 97th Congress will consider will be amendment and extension of this act. It is perhaps the most important environmental law ever passed by Congress and has served as the cornerstone of our national effort to control and reduce air pollution during the past decade. As Congress begins work on the reauthorization of the Clean Air Act, many questions will be raised.

Today Congressman BRUCE VENTO, Democrat of Minnesota, and I, introduced a congressional resolution reaffirming the importance of this measure. According to a recent Louis Harris poll, by 80 to 17 percent, a sizable majority of the public nationwide do not want to see any relaxation in existing Federal regulation of air pollution. The Nation's existing Clean Air Act should be maintained and strengthened subject only to such changes that will improve its administration and effectiveness.

The importance of air quality cannot be overemphasized. My feelings on this subject go back to my days in the California Legislature. While in the California Assembly, I served as chairman of the subcommittee on air quality and successfully authored legislation establishing the South Coast Air Quality Management District in southern California. We cannot allow the impressive gains we have made in our fight against air pollution to be wiped out.

The commitment to the Clean Air Act is one way to express the feeling of the House of Representatives that we are strongly committed to the goals and structure of the Clean Air Act as amended in 1977. It recognized that this act has achieved documented improvement in air quality, to the betterment of public health, welfare, and environmental quality and, furthermore, suggests that modification of either the goals or the structure would negatively impair the effectiveness of this landmark statute.●

AWACS SALE, TAX CUT

HON. CARROLL HUBBARD, JR.

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 21, 1981

● Mr. HUBBARD. Mr. Speaker, my recent decision to vote for the sale of AWACS radar aircraft to Saudi Arabia was based on the encouragement from many of my constituents, including Timothy A. Cantrell, an instructor at Madisonville Community College in my district. Mr. Cantrell has written me on that issue and the tax cut bill, which I also supported. Mr. Speaker, I submit Mr. Cantrell's letter:

Dear CONGRESSMAN HUBBARD: Your vote on the tax-cut bill was a wise one. Hopefully, the President's policies will solve some of our problems. I applaud your cooperating with the President rather than trying to be a negative force like so many other Democrats. The people have elected a leader (I didn't vote for him), so I think we should at least give him a chance to succeed. To do less would be unfair.

I would also like to encourage you to vote for the AWACS sale to Saudi Arabia. I see this as the best way of assuring stable oil prices at least through 1990 since we will not deliver them until 1985 and we will have a part in running them through 1990. I realize it is bad politics to vote against Israel's interest, but I don't see this as an anti-Israel vote. It is a vote for US interests in the Middle East and stable oil prices for the next decade.

Your friend,

TIMOTHY A. CANTRELL.●

NO NEED FOR FAST-TRACK NUCLEAR LICENSES

HON. EDWARD J. MARKEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 21, 1981

● Mr. MARKEY. Mr. Speaker, when the House considers the NRC authorization bill, I intend to offer together with the gentleman from Connecticut (Mr. MOFFETT) an amendment to strike section 12 of the bill, the provision allowing interim operation of nuclear plants while safety hearings are still incomplete.

Many Members of the House are already familiar with the national debate which has led to the inclusion of that interim operating authority in the NRC authorization bill. As you know, the nuclear power industry has contended since the beginning of this year that a large number of completed new nuclear powerplants are standing idle and being kept from operation because of the pendency of these safety hearings. The industry has emphasized to the public and to many Members the potential economic cost of that purported delay.

What we have to say to you is simple: The industry's claims of delay are factually unfounded. Plants are not being kept out of operation by safety hearings. The Subcommittee on Environment, Energy and Natural Resources began an exhaustive investigation of those claims last spring. That inquiry culminated in a major report approved by voice vote on October 7 by the full Committee on Government Operations.

The committee report, entitled "Licensing Speedup, Safety Delay: NRC Oversight" makes three critical findings:

1. The industry has "grossly exaggerated" the delay caused by NRC proceedings in getting new plants on line. In fact, the Committee found that only one plant in the country even arguably can be said to have been completed and to have experienced actual delay because of NRC licensing proceedings. That plant is Diablo Canyon. For reasons which are in the report and in the current headlines, that plant is a poor case for the industry to rely on while arguing that the NRC has impeded operations at new nuclear plants. The utility made the critical initial siting error of placing the reactor near a major earthquake fault. And as revelations in the last few days have demonstrated, the utility also has made errors in construction which at this moment are keeping the plant out of operation—despite the fact that the plant now has NRC authorization for fuel loading and low power operations.

2. Many of the NRC actions to respond to the purported problem of licensing delay

have been misguided and detrimental to both nuclear safety and public confidence in the nuclear industry. In particular, the report finds that the interim licensing authority idea, first proposed to the Congress by the NRC last March, is a "remedy without a reason" which may prove detrimental to long-term safety.

3. Most important of all, the Government Operations Committee oversight report concludes that significant nuclear safety programs are behind schedule and are not receiving the attention they require if the public health and safety are to be properly safeguarded. The report concludes that the verified problem of safety delay has gone untended while the false problem of licensing delay has received the attention and energy of NRC officials.

Based on those conclusions, I urge you to conclude that this interim operating authority is not necessary and would be an inappropriate power to grant to the NRC. If the Congress endorses this idea, it will be because it is acceding to an industry request which is not founded in fact. It will be because the Congress is too willing to accept the claims of the nuclear industry without the kind of careful scrutiny they deserve.

Together with my colleague from Connecticut, I urge you to support our amendment to this bill.●

BUSINESS LEADERS WANT FOREIGN LANGUAGE ACTION

HON. PAUL SIMON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 21, 1981

● Mr. SIMON. Mr. Speaker, recently I wrote to a few business leaders whom I learned were interested in the relationship of our foreign language deficiencies and U.S. sales overseas.

I am taking the liberty of inserting four of these replies in the CONGRESSIONAL RECORD.

One is from Richard M. Morrow, president of Standard Oil Co. of Indiana. A second is from Robert H. Levenson, vice chairman, Doyle Dane Bernbach, Inc., a major advertising firm. The third is from Mark Stroock, senior vice president and director of corporate relations, Young & Rubicam, Inc., another major advertising firm. And the fourth is from Harold W. McGraw, Jr., chairman and chief executive officer of McGraw-Hill, Inc., one of the Nation's leading publishers.

All mention both the quality and quantity problem.

Mr. McGraw, for example, says:

> We face a frequent problem in finding competent executives and journalists who command the foreign language we need to use. This is a problem encountered, I believe, by substantially all American companies with large overseas operations.

While the letters are not in complete agreement with each other, they convey a sense of concern about a national problem to which I hope we will pay more attention.

STANDARD OIL COMPANY (INDIANA),
Chicago, Ill., September 21, 1981.

Hon. PAUL SIMON,
Chairman, Subcommittee on Postsecondary Education, House Committee on Education and Labor, Cannon House Office Building, Washington, D.C.

DEAR MR. CHAIRMAN: Thank you for writing in connection with H.R. 3231, the National Security and Economic Growth Through Foreign Language Improvement Act.

Standard Oil Company (Indiana) shares your concern about the quality of foreign language education in this country. Our company is involved worldwide in well over forty countries and depends greatly on the goodwill of those countries. Much of that goodwill derives from our ability to communicate effectively with the host governments and nationals of these countries. Needless to say, language plays a major role in that process.

In talking with our people I find that they feel most strongly about part 3 of your bill (on page 2) which states that foreign language is a key tool in understanding the "history and culture which influence the perspectives, values, and attitudes of the people of other countries." We find this to be particularly true in the Arab world where expectations run high and sensitivities are deep. While we have no illusions that many of our employees will actually learn Arabic, we do think that exposure to the language goes a long way toward familiarizing them with the Islamic heritage and civilization. That counts for a great deal and is very important to our business. The same holds true for other non-Western parts of the world.

Closer to home and of particular relevance, Latin America and its generally Spanish heritage need concentrated attention. Very special efforts should be made in this area, not only for our relations with Central and South America, but for the obvious domestic reason that Hispanics will become an increasingly important force here at home.

For all of these reasons, the United States can no longer afford to remain a monolinguistic nation, expecting the rest of the world's peoples to adjust to our ways. Thus the need for Americans to learn foreign languages is more urgent than ever. Toward this end, you will be interested to know that some of our people are working with the Illinois Foreign Language Teachers Association in furtherance of mutual goals, and that one of our foreign affairs specialists is the keynote speaker at the association's October 2 meeting here in Chicago.

We appreciate your efforts in behalf of a renewed dedication to foreign language studies at the elementary and secondary school levels.

Sincerely,

RICHARD M. MORROW,
President.

DOYLE DANE BERNBACH, INC.,
September 22, 1981.

Hon. PAUL SIMON,
House of Representatives, Committee on Education and Labor, Subcommittee on Postsecondary Education, Cannon House Office Building, Washington, D.C.

DEAR MR. SIMON: Mr. Bernbach has asked me, as International Creative Director of Doyle Dane Bernbach, to respond to your letter.

I agree completely that Americans doing business abroad are significantly disadvantaged by poor and insufficient training in foreign languages. There is always a subtle, but distinct, loss of the "upper hand" when one cannot make oneself understood.

My personal feeling is that the quality of foreign language instruction is even more important than the quantity. While your bill is extremely worthwhile in its purpose. I feel that it could be enhanced dramatically by building in a number of quality guarantees.

For example, the bill could require:

(1) Native instructors in the foreign language.

(2) Classes conducted strictly in the foreign language.

(3) Some required period of time in the foreign country.

(4) A comprehensive final examination leading to a special degree (Bachelor of Language, Master of Language).

(5) An exchange program with leading universities in other countries.

(6) Grants to major professional organizations (American Bar Association, American Medical Association, The Association of American Advertising Agencies, etc.) to provide special, professional foreign language training.

(7) Similar inducements to Diplomatic and military personnel, if they do not already exist.

(8) Foreign language programs that model themselves after the most successful commercial programs.

(9) Cable TV channels to provide foreign language instruction.

Finally, I think we have to understand that the reason most Americans have not mastered a foreign language is that it has not been necessary or even useful for us to do so. Worse, we consider it a flaw if others don't speak our language. ("What's the matter with you? Don't you speak English?")

A laudable bill such as yours must, I feel, try to make mastery of foreign languages both economically and socially desirable from the perspective of the students themselves or it cannot succeed.

We are grateful to have had this opportunity to comment on this important legislation, and wish you great success with it.

Cordially,

ROBERT H. LEVENSON.

YOUNG & RUBICAM, INC.,
New York, N.Y. September 22, 1981.

Congressman PAUL SIMON,
House of Representatives, Committee on Education and Labor, Cannon House Office Building, Washington, D.C.

DEAR CONGRESSMAN SIMON: This is in response to your letter to Mr. Ney dated September 4 concerning H.R. 3231. We certainly support this bill and its purposes. In our International operation we have often come across the shortcoming that your bill is attempting to correct: the inability of citizens of the United States to speak foreign languages.

The only addition to your excellent bill that we would suggest is for continuing education. We do believe in the purpose of your bill which, as we understand it, is to increase the teaching of foreign languages in secondary schools and colleges.

However, there are a vast number of Americans who have graduated from college

and cannot speak foreign languages. Many of them are in business. Many of them would benefit from language training, even though they have completed their formal education. We realize this would change your bill somewhat but we do think it's important not to write off that large number of U.S. citizens now in business who have completed their formal education and who would benefit from such a program. We think obviously that the country itself would be the ultimate beneficiary.

We thank you for asking our judgments and wish you great good luck with the bill.

Sincerely,

MARK STROOCK.

MCGRAW-HILL, INC.,
New York, N.Y., September 17, 1981.

Hon. PAUL SIMON,
House of Representatives, Committee on Education and Labor, Subcommittee on Postsecondary Education, Cannon House Office Building, Washington, D.C.

DEAR CONGRESSMAN SIMON: Thank you for giving me an opportunity to comment on your proposed Bill, H.R. 3231, relating to foreign language study. I certainly agree with you that it is unfortunate there has been such a marked decline in enrollments in modern foreign languages both at high school and college level. I think it is important to us as a nation that our citizens in general should have a better appreciation of the characteristics and cultures of other countries. Surely foreign language study is one means of acquiring that. I am sensitive, however, to the difficulties that are encountered in trying to change this situation, especially at a time when federal funding for education is being cut and categorical grants are in disfavor. Even with better federal support the problem is a stubborn one because of the lack of opportunities for practical use of languages other than English in the daily lives of most Americans—a lack which reduces their incentives to learn them.

You asked specifically about the problems we encounter in competitive international markets because of the limited number of Americans with foreign language capacity. Our overseas operations are substantial, but we staff most of them with the nationals of the countries concerned who also speak English. It is true, however, that we face a frequent problem in finding competent executives and journalists who command the foreign language we need to use. This is a problem encountered. I believe, by substantially all American companies with large overseas operations.

This specific problem, however, is not effectively addressed by having most or a large percentage of American students receiving a two- or three-year introduction to a language in high school or college, an introduction which too often soon becomes too rusty to be useful. What we and other companies need is not so much a large number of people with a slight knowledge of a foreign language, as a few people with a real mastery requiring intensive study. The government attempts to meet this problem for its own staff through a such specialized language schools as those operated by the State Department and the Armed Services.

To help in a similar attack on the problems of American businesses, perhaps you would want to consider including in your Bill a section providing for some government initiative and assistance in aiding university schools of business in offering programs to prepare young people specifically for international business careers. These should, of course, include intensive and thorough foreign language study intended to prepare students to discuss business matters fluently, but would also include courses in international trade and overseas marketing practices, foreign cultural considerations of which businessmen should be aware, etc. Since the government will be dealing with only a relatively few institutions and only several hundred or, at the most, a few thousand students, the cost would be relatively small. And I suspect that most of the cost would be paid by businesses who send employees to such schools along with; the individual students who enroll for their own career objectives. This sort of precisely targeted program could perhaps be very helpful to American businesses seeking to strengthen their international competitive position and could achieve results rather quickly and with very modest government expense.

If it were thought of as an export promotion and productivity measure, perhaps it might also have somewhat greater chance of legislative success at the present time than if it were thought of as solely an educational measure.

Sincerely,

HAROLD W. MCGRAW, JR.●

LARRY HOLMES DAY

HON. DON RITTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 21, 1981

● Mr. RITTER. Mr. Speaker, today I would like to recognize an important event which recently took place in Pennsylvania, and pay tribute to the outstanding individual honored by that event.

September 29, 1981, was declared Larry Holmes Day in Pennsylvania, and the highlight of the day was activities I was happy to be a part of which took place in the heavyweight champ's hometown of Easton, Pa.

It was a bright, sunny day as we gathered in Center Square. Spirits were high in anticipation of the Governor's and Larry's arrival. It was a very special day for the city of Easton.

On hand to honor Larry were Gov. Dick Thornburgh, and his wife Ginny, Easton Mayor Philip Mitman, State representatives Ed Sieminski and Len Gruppo, representatives of the Easton Area Chamber of Commerce, and over 2,000 of Larry's friends and fans of Easton. Later on, sportscaster Howard Cosell joined in paying tribute to Larry. Larry's mother Flossie and his wife Diane were also present. While Larry is known nationally for his abilities in the ring, an important theme of Larry Holmes Day was the many and varied contributions he made to our community.

Gov. Dick Thornburgh described the champ as a "man who has kept his roots in Pennsylvania and who honors those roots. He has kept his feet firmly planted in the community where he grew up." Indeed that is true. While another champion might have moved to a larger city seeking more publicity, Larry and his family have remained in Easton where he has become a community leader. In his own words,

I don't want to be a star. I want to help people help people.

Remembering the help and guidance he received as a youngster in Easton, Larry is a leading supporter of the Boys Club of Easton, St. Anthony's Youth Center, the local NAACP, and other charities. His contributions have included a new boxing gym and other sports equipment, as well as his time working with Easton's youth.

Recently, Larry has become a leader in bringing new business to Easton, and has opened his own restaurant, nightclub, and sportswear store. He is also finishing plans for a sports complex where a variety of recreational activities will be available. The Easton Assassin in the ring is Easton's leading citizen outside of it.

In short, Larry Holmes is more than the best in his profession, although he certainly is that. Larry Holmes is a man who cares deeply about his community and its residents, and tries every way he can to contribute to their quality of life. His quiet words of wisdom gained through experience—always coming from the heart—pack even more punch than the ferocious left hook.

I am proud to represent Larry Holmes in the U.S. Congress and I am doubly proud to call him my friend. And I am proud to join the citizens in Pennsylvania and especially the city of Easton in saying, "Thanks Champs, you're the greatest."●

A SALUTE TO FRED JOHNSON AND THE BLACK SHIELD POLICE ASSOCIATION

HON. LOUIS STOKES

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 21, 1981

● Mr. STOKES. Mr. Speaker, exceptional public servants and the catalysts for positive change and justice in the city of Cleveland are the phrases which best describe the Black Shield Police Association and its president, Fred Johnson. On Saturday, October 24, 1981, this active and worthwhile organization will hold its 12th Annual Awards Dinner Dance.

Mr. Speaker, as that occasion approaches, I believe that it is appropriate to salute the Black Shield Police Association for the beneficial work and monumental achievements in the community. The ideals they have promoted in the Cleveland Police Department and in the minority community

have contributed immensely to the improved rapport and communication between the two groups.

The best way I know of saluting this great organization is by detailing for my colleagues the goals of both the organization and its leader—Mr. Fred Johnson. Mr. Speaker, no salute to the Black Shield Police Association would be complete without a tribute to Mr. Johnson. His life, his motivation, his career experiences, and the sacrifices he made are deeply intertwined with the actions and successes the organization has amassed over the years.

Mr. Speaker, the primary focus of the organization is the elimination of barriers between the Cleveland Police Department and minorities in the city. This is an awesome task.

But, the Black Shield Police Association has tackled this job enthusiastically. The unique and unrelenting approach to the task has covered the following areas: increased minority hiring, community outreach programs, and educating nonminority officers about the needs of the minority community.

Challenging as it may seem, the Black Shield Police Association has gone forward in pursuing these goals using tools such as community involvement and court actions effectively. Many sacrifices were made along the way. However, the just principles and strong leadership by Fred Johnson have stimulated victories for both the Black Shield Police Association and the minority community.

Mr. Speaker, the vitality and perseverance of Fred Johnson, a police force veteran of 24 years, are an integral part of the maturation to a viable entity and success of the Black Shield Police Association in the city of Cleveland. The organization was formed in 1964 basically as a social club for the few black police officers in Cleveland. In 1970, the group was reorganized and the goals were revamped. In 1972, Mr. Johnson, then assigned to the prestigious detective division, became the president of the Black Shield Police Association.

Fred Johnson's unswerving dedication to fellow minority colleagues and to the community were infectious. At that juncture, the organization became noticeably more aggressive and committed to pursuing the needs of the minority community through the employment of more minority policemen and other programs.

Mr. Speaker, it came as no surprise to the community and those of us who know Fred Johnson that in the same year he assumed the presidency, the association pursued its goals with new vigor and a lawsuit against the city of Cleveland for discrimination in hiring and promotion by the Cleveland Police Department was filed. That lawsuit was the beginning of a long and hard struggle in the police force by the organization and unconscionable and unfair actions against Fred Johnson.

In a manner of speaking, Mr. Speaker, there was a cold yet important war going on between the department and the minority police officers as a result of the lawsuit.

The friction seemingly came to a climax in 1975 when Fred Johnson charged the department with not properly investigating the death of a black man by a white police officer. That action, in the best interest of justice and the community, resulted in Fred Johnson being cast into a pseudo yet unofficial 20th century exile in a police outreach post from his assignment in the detective division. Assigned there for 7 months, Fred Johnson was required to sign in and out and to ask permission from his sergeant before leaving his post.

Not succumbing to any punishment or harassment for his activism, success and justice came for Fred Johnson and the Black Shield Police Association in 1977. That year, the court ruled in favor of the association's lawsuit.

The court instructed the city to institute a percentage hiring program which would insure that 43 percent of the officers hired would be minorities. The long-term numerical goals set by the court were that the force should be at least 35.8 percent minority by 1984.

Since the lawsuit was initiated, the number of minority police force members has grown from 170 to 405.

The court decision also required the city of Cleveland to promote a certain percentage of minorities within the police force. One out of four candidates for sergeant must be minorities and one out of seven persons promoted to lieutenant must be a minority until 1984 as a result of the court decision.

Additionally, largely because of the efforts of the Black Shield Police Association, the background investigations and promotional exams were changed to become job relevant.

The members of the Black Shield Police Association under the leadership of Fred Johnson started a vigorous campaign to encourage minorities to seek jobs in the police force. This has included public service announcements and other methods.

Further denoting the members' commitment to increasing minority representation on the force, Black Shield Police Association members have offered assistance to those preparing to take the academy entrance exam and carefully monitor their progress to combat high attrition rates.

Mr. Speaker, the next important step of the association under the guidance of Fred Johnson was their request of the Justice Department to encourage the city of Cleveland to protect the equitable administration of justice. What resulted from this request was that all Cleveland police officers are required to attend a 1-day seminar at the police academy where they are given information on when to shoot and when not to shoot a suspect. The officers are also informed of their civil liability in those kind of deadly force situations. This program is designed to hold down friction between the black community and the police force by preventing officers from acting hastily and without fear of repercussion when it involves action against minorities in the city of Cleveland.

Finally, Mr. Speaker, the association, again under the unswerving guidance of Fred Johnson, has embarked on numerous community outreach programs. They are designed to bridge the gap between the minority community and the police force. Those programs have included the distribution of pertinent information on drug programs and crime prevention programs.

Mr. Speaker, I am sure that his colleagues will agree that the majority of the endeavors of the Black Shield Police Association were either conceived or pushed for implementation by Fred Johnson. He has been an excellent administrator in his two terms as president of the association.

In many respects, he has been the catalyst for positive change in the community and in the Cleveland Police Department. He has given a new vitality and sense of purpose to the Black Shield Police Association. I respect Fred Johnson as a man of great vision, courage, and an outstanding public servant. He is truly one of Cleveland's finest.

Mr. Speaker, as the Black Shield Police Association prepares for the 12th Annual Awards Dinner Dance, I ask my colleagues to pause and salute them. The association and Fred Johnson have brought a new day and hope for a brighter tomorrow to relations between the Cleveland Police Department and the minority community.●

DON'T BE FOOLED BY THE SIERRA CLUB

HON. DON YOUNG

OF ALASKA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 21, 1981

● Mr. YOUNG of Alaska. Mr. Speaker, this week, in a well-orchestrated media event designed to discredit the balanced Federal land policies of the Reagan administration and specifically, Secretary of the Interior Watt, the Sierra Club will be visiting our colleagues in the Congress. The message, designed by the leadership of the Sierra Club, is that the people of the United States reject Secretary Watt and his programs. This is blatantly

untrue. The following results of a recent poll indicate that, regardless of their rhetoric, the Sierra Club is not attuned to the man in the street—the man who has to work hard to feed his family and make ends meet in an era when we must import the basic resources for an industrialized economy. This same man likes to take his family to the national parks when he has some vacation time; unlike many in the Sierra Club, he cannot afford private aircraft and month-long wilderness journeys into areas inaccessible to the many. Asked reasonable questions, the following represents the real public view:

The June 29, 1981, edition of Newsweek magazine contained a recent Gallup poll that showed more than 70 percent of the American people endorsed Secretary Watt's basic policies and general philosophies.

More than 75 percent of the American people believe it is possible to maintain strong economic growth in the United States and still maintain high environmental standards—as does Secretary Watt.

More than 76 percent of the American people favor increasing oil exploration and other commercial uses of Federal lands—as does Secretary Watt.

More than 73 percent of the American people favor spending money to improve the condition of the national parks rather than expanding the national park system—as does Secretary Watt.

And, more than 70 percent of the American people favor enlarging the area of offshore oil drilling on the east and west coasts—as does Secretary Watt.

This poll, and numerous other indications of American public opinion, show that Secretary Watt is enacting the regulatory mandates damaged of the Federal Government by the American people last November 5, 1980. Without question, the often too silent majority of the American public supports the Secretary, his policies, and management objectives, which are in the mainstream of American consciousness.●

AD HOC CONGRESSIONAL COMMITTEE FOR IRISH AFFAIRS: 4 YEARS OF ADVOCACY ON BEHALF OF PEACE AND JUSTICE FOR NORTHERN IRELAND

HON. DAVID W. EVANS

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 21, 1981

● Mr. EVANS of Indiana. Mr. Speaker, on Sunday, September 27, the ad hoc Congressional Committee for Irish Affairs observed its fourth anniversary. I wish to take this occasion to review the past, analyze the present, and discuss our future activities.

Since 1977, the membership of the committee has grown. It has always been bipartisan in makeup and activity.

At the time the committee was established, we announced that our goals were threefold in nature:

First, we sought congressional hearings on Northern Ireland;

Second, we sought to change the State Department visa policy which served to exclude legitimate segments of Irish political thought from entering our Nation; and

Third, we sought to give the President a broader perspective on the Irish question.

Now 4 years later, we have made strides in achieving our objectives. In the most general sense, the ad hoc committee has raised the Irish issue from a position of obscurity to one which now regularly commands national and international attention. We have seen Northern Ireland emerge both as a valid foreign policy and polictical issue in the United States. Our primary role, as a nonofficial and nonlegislative committee, in this matter is to maintain a highly visible profile for the United States as we have a legitimate interest in seeking a just resolution of the situation in this part of the world.

WHAT HAVE WE ACCOMPLISHED TO DATE?

Our bipartisan activities have produced several major initiatives since our formation in 1977. These activities have underscored our successes in filling the vacuum created by previous lack of leadership on this issue prior to the formation of the ad hoc committee.

The year 1978 was an active year for the committee in the legislative arena. For the first time ever, a special order was conducted on human rights abuses in Northern Ireland in June of that year which focused on the reports of Amnesty International and other international watchdog groups which cited the Royal Ulster Constabulary for numerous violations of human rights of prisoners and prison suspects in Ulster's Maze Prison. As a result of these charges and in response to negative world opinion, the British appointed their own commission to investigate these charges. This Bennett Commission as it was called, confirmed the reports of amnesty and others and legitimized the claims of the ad hoc committee.

The year 1979 saw continued advocacy on behalf of peace and justice in Northern Ireland. In February, the executive committee of the ad hoc committee met and unanimously endorsed a proposal to sponsor a peace forum where all parties and organizations in Ulster would be invited to present and discuss peace proposals. It has been the contention of the committee from its inception that no peace would come to Northern Ireland unless all parties involved in the conflict were a part of the solution. Nobel Prize laureate Sean McBride and Irish and European Parliament Deputy Neil Blaney both addressed the committee and endorsed this proposal and the work of the committee.

In May, House Concurrent Resolution 122 was introduced, a resolution prompted by the continued inability of the British Government to effect a peaceful solution calling upon them to embark on a new initiative to promote peace and self-determination there. This resolution received strong support from the committee and from the Irish-American community resulting in 120 cosponsors.

The highlight of our accomplishments, which remains the centerpiece of our accomplishments to date, is the August 1979 suspension of arms sales to Great Britian for use in Northern Ireland. This action was generated by the discovery that the United States had regularly made such sales to the RUC—sales which directly violated both the spirit and the intent of our Foreign Assistance Act which prohibits such action to violators of human rights. Thanks to the work of the committee members in highlighting, this problem during consideration of the State Department's 1980 appropriations bill, hearings were held in the Foreign Affairs Committee for the first time since 1972.

This suspension remains in effect, and was most recently reaffirmed by the administration in a reply to our inquiry early this year. The ad hoc committee considers it essential that this suspension remain in effect and will continue to work to insure its retention until peace comes to Northern Ireland.

The ad hoc committee continued to promote the U.S. role in helping to resolve the Ulster situation throughout 1980. After consulting with former President Carter on several occasions on this matter, Northern Ireland became for the first time a part of the 1980 Democratic Party platform, in part due to the ad hoc committee's effectiveness in making this a visible issue for the Presidential campaign.

WHERE ARE WE TODAY?

This year, our bipartisan efforts have produced several important initiatives. As noted above, one of the committee's first actions of the 97th Congress was to contact President Reagan to reaffirm the gun ban suspension.

Our efforts this year were also centered around the hunger strike in Ulster's Maze Prison conducted by inmates seeking basic prison reforms. In March of this year, 20 of my colleagues sent a letter to President Reagan urging that he speak directly with Prime Minister Thatcher and urge her government to abandon their

inflexible policy in this matter. We also appealed to Margaret Thatcher personally in a telegram signed by 50 Members urging her to commence negotiations on the hunger strike before any feasible solution was permanently out of reach.

In order to demonstrate congressional concern for a resolution of the hunger strike in a tangible fashion, House Resolution 158 was introduced, which urged the British Government to embark upon a humanitarian resolution of the hunger strike. This resolution, which has over 80 cosponsors, also restated the ad hoc committee's total opposition to all forms of violence which currently exist in the North—both official and civilian.

The committee was honored to receive testimony from two witnesses on July 11 who provided first-hand accounts of the current situation in Ulster. Father Brian Brady, religion department head at St Joseph's College of Education in Belfast and a leader in the human rights movement, presented testimony on economic discrimination in Northern Ireland by American manufacturing firms. We also heard from Mickey Brennan with the AFL-CIO who visited with labor leaders in Ireland and presented his impressions on the current situation to committee members.

Both these witnesses underscored what we of the ad hoc committee have sought to dramatize: The current situation in Northeren Ireland is in need of an immediate humanitarian and equitable solution in lieu of the current intransigence of British policy. The ad hoc committee will continue to work to effect such a solution in both the hunger strike as well as an overall solution to the Irish question before any permanent solution exceeds our grasp.

WHERE ARE WE GOING?

The future efforts of the ad hoc committee will be directed toward working to develop an economic assistance package for Northern Ireland in keeping with the historical role of the United States in providing such foreign aid to promote economic and political stability. Such aid might also attract additional U.S. investment in this area, and follow the lead of several major firms who have business interests there.

In retrospect, the ad hoc congressional committee for Irish affairs can justifiably be proud of the progress we have made in this issue since our beginning in 1977. The issue of Northern Ireland is now a component of our foreign policy and we will continue to work to keep it a viable component of U.S. actions in the international arena. The issues of human rights, economic justice, and humanitarian resolve will continue to highlight our work in helping to promote a peaceful solution for Northern Ireland. Now more than ever, the United States can contribute to a solution to this problem for never has there been greater instability, bloodshed, and strife. Progress has been made, but it is infinitesimal to the work which is yet to be done. We stand ready to work with all parties and individuals in seeking an end to the crisis which faces Northern Ireland.●

STUDENTS FROM PENN STATE

HON. WILLIAM F. GOODLING

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 21, 1981

● Mr. GOODLING. Mr. Speaker, I would like to call to the attention of my fellow colleagues in the House the visit to Washington of a class of continuing adult education students—many of whom are retirees—scheduled for this Friday. They will be attending meetings and lectures on international security issues. Their class is entitled "International Security Decisions—An Inside Look." Thus in the pursuit of their studies they will visit the Pentagon, the State Department, the White House, and late in the day, the Hill. I would greatly appreciate any courtesy extended to these students from the Pennsylvania State University.●

MONEYS FOR THE SMITHSONIAN NEED TO BE AUTHORIZED AS WELL AS APPROPRIATED

HON. WILLIAM E. DANNEMEYER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 21, 1981

● Mr. DANNEMEYER. Mr. Speaker, William Shakespeare once said "what is past is prolog." If that be true, and I believe it is, then the importance of institutions, such as the Smithsonian, which chronicle our accomplishments as a nation in a wide variety of scientific, social, philosophical, and cultural fields cannot be underestimated. In particular, the Smithsonian, which was created by an act of Congress in 1846 "for the increase and diffusion of knowledge among men" and which has been partially funded by the taxpayers since 1858, has played a unique role in recording our progress as a people and mankind's progress generally. Indeed, the Smithsonian has attained a position of preeminence not only as a national but as a world famous international museum.

What makes the Smithsonian even more unique, however, has been its arms length relationship with the institution that provides much of its financial support—the Congress of the United States. With the exception of authorizations for changes in, or additions to, its physical plant, the Smithsonian has not been obliged in recent years to go through the annual congressional authorization process. Instead, its Director simply makes a presentation to the Interior Subcommittee of the House Appropriations Committee, each year as to its operations and programs, indicating in the process the amount of money that will be needed to implement same during the next fiscal year. Then, the subcommittee, followed by the full Appropriations Committee marks up this request as part of the Interior appropriations bill and it is reported to the House floor. There, amendments to change the dollar figures are in order but, if a Member or Members feels some policy change is in order, to protect the taxpayers investment, an amendment to reflect that change cannot be offered. In short, the ability of this institution to exercise effective oversight over another institution for which it has responsibility is effectively limited.

One is tempted to say, given the prestige of the Smithsonian, why tamper with success? However, to make such a statement is to say there is no room for improvement and, good as the Smithsonian's program generally is, I can think of specific instances in which it could be made better. One, in particular, comes to mind, involving the National Museum of Natural History. In that museum, currently, there is an exhibit entitled "The Dynamics of Evolution," which presents the theory of evolution in such a way as to give millions of viewers each year the impression that said theory is the only explanation of life's origins.

By the way of background, evolutionists have been claiming for years that their theory has been based purely on scientific data and thus has scientific validity. Conversely, they have argued that the Biblical theory of creation has no scientific support. Yet scientists are far from agreed on such a formulation. For example, philosopher of science, Prof. Karl Popper states:

> There can never be a law of evolution. The search for the law of "unvarying order" in evolution cannot possibly fall within the scope of scientific method, whether in biology or sociology. Simply because if the evolution of life did occur, it was a unique historical process which cannot be tested because it is unrepeatable. We cannot hope to test a universal hypothesis nor find a natural law acceptable to science if we are forever confined to the observation of one unique process.

Biochemist Duane Gish is another who questions the evolutionary case. Speaking of the probability of life having begun as the combination of chemicals in a primordial sea, he says:

> If you take a simple protein, one that is made up of about a hundred amino acids in a chain, and given the fact that amino acids come in 20 different kinds what is the probability of them coming together in one spe-

cial sequence? You find if you calculate the probabilities that there are so many different sequences possible, such an enormous number, that no chance process in five billion years, or even 50 billion years could ever give a sufficent quantity of any special arrangement.

As indicated above, the idea of gradual evolution in now being challenged by researchers in many fields. One such researcher is paleontologist Niles Eldrige who explains that there is no fossil evidence to document such gradual change, hypothesizing that mutation produced more abrupt change. Yet the current "Dynamics of Evolution" exhibit in the Museum of Natural History displays physical changes in animal life which serve to reinforce evolutionary theory. The creation theory is not included.

At this point let me suggest that legislation subjecting the operations of the Smithsonian, not past changes in physical plant, to the authorization process in one way of dealing with this problem—one way of insuring that Federal dollars are not being used to promote one religious theory exclusively. Which brings me to a key point; in Tarcaso against Watkins (1961), the U.S. Supreme Court ruled that secular humanism, of which the theory of evolution is a part—in fact it is the sixth doctrine of secular humanism—is, in fact, a religion. This ruling was the result of the Court's decision to characterize religion as belief. In Tarcaso against Watkins the Court considered theistic faiths as "those religions based on a belief in the existence of God," yet it recognized nontheistic faiths as a type of belief entitled to the term "religion." From there, the Court said that a belief which is in a "parallel position" to that of the traditional theistic concept of God is protected by the first amendment of the Constitution. Secular humanism, as documented in the "Humanist Mainfesto," fits that description because of its reliance upon "belief" in the primacy of the individual and the rationalization of man's mind.

If the theory of evolution is just that—a theory—and if that theory can be considered a religion—as the Supreme Court says it can—then it occurs to this Member that other Members might prefer it not be given exclusive or top billing in our Nation's most famous museum but equal billing or perhaps no billing at all. But, for these choices to be possible, the funding for all the operations of the Smithsonian must be subject to the annual authorization process. The bill I am introducing today would bring about such a change starting in fiscal year 1983. On procedural as well as substantive grounds, I believe it is deserving of consideration. I urge each of my colleagues to give it his or her support.

The text of the bill follows:

H.R. 4802

A bill to require annual authorizations for amounts appropriated for the Smithsonian Institution

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That notwithstanding any other provision of law, no amount shall be appropriated for the Smithsonian Institution for a fiscal year unless such amount has been specifically authorized by law to be appropriated for such fiscal year.

SEC. 2. The limitation imposed by the first section shall apply to fiscal years beginning after September 30, 1982.●

PAY CAP IS CAUSING U.S. MAGISTRATES TO LEAVE GOVERNMENT

HON. FRANK R. WOLF

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 21, 1981

● Mr. WOLF. Mr. Speaker, a telephone survey of the full-time U.S. magistrates conducted by the National Council of U.S. Magistrates last month disclosed that a significant number of these full-time U.S. magistrates will resign and enter private practice if there is no significant increase in their salaries between now and December 1982. When combined with those who would be inclined to leave, the number tops 50 percent of the U.S. magistrates.

Lifting the pay cap would avoid the loss of these outstanding individuals who have gained substantial judicial expertise and who are contributing greatly to the Federal courts in coping with their ever-increasing civil caseloads.

An even greater number of magistrates indicated that they would seriously consider leaving the system since they are in midlife, with children about to enter or in college and have other expenses. A significant number of older magistrates without the obligations for minor children, or children in college, out of a sense of commitment to public service, stated that they were inclined to remain with the U.S. magistrate system because of its intellectual challenge, their sense of commitment to public service, and the nature of the judicial responsibility they are now beginning to shoulder within the Federal judiciary. Yet even these magistrates feel a strong sense of frustration and deprivation of just compensation for their endeavors, quite frequently involving 60 to 70 or more hours per week, and the impact that keeping their salaries down will have on the amount of their retirement annuities some 5 or 10 years from now.●

HOFSTRA UNIVERSITY, A LEADER IN MAKING ITS PROGRAMS AND ACTIVITIES ACCESSIBLE TO DISABLED STUDENTS

HON. NORMAN F. LENT

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 21, 1981

● Mr. LENT. Mr. Speaker, I have just learned that my alma mater, Hofstra University, has completed a two-decade-long effort to remove architectural barriers so that its programs and activities will be fully accessible to the physically disabled.

That is a rare accomplishment. Only two other institutions of higher learning in the Nation have reached such a goal—the University of Illinois at Champaign-Urbana and the University of California at Berkeley. Hofstra is the first privately supported university to do so and has the only campus in the eastern part of the Nation that is fully accessible.

There are a number of details in Hofstra's achievement that I would like to call to the attention of my colleagues in the House. The project was financed by both the private and the public sectors. Over the years, more than $1 million was raised from philanthropic foundations, corporations, and individual benefactors. Nassau County and the Federal Government recently matched this with an additional $500,000. Here is an example of public and private initiative working together to bring about a worthy goal.

Those funds paid for ramps, elevators, electronically controlled doors, lowered drinking fountains and telephones, restroom renovation, curb cuts, special parking facilities, redesigned dormitory rooms and shower facilities, and many other improvements.

In human terms, perhaps the most important achievement is the fact that since Hofstra began its program, more than 1,200 disabled students have earned their degrees there. It is significant that all were as qualified as nondisabled students, both for admissions and graduation requirements.

A year ago, a wheelchair-bound student was vice president of the student senate. Another disabled student was recently admitted to medical school upon graduation from Hofstra. Still another, recently received his Ph. D. in clinical psychology at the university and is in the process of opening a private practice. And, the coordinator of Nassau County's Office of Services for the Physically Handicapped, holds both a bachelor's and a master's degree from Hofstra.

In short, the disabled students who come to Hofstra get an opportunity for a very good higher education and a

chance at a more meaningful life. They go on to become productive citizens and whatever assistance they receive is more than repaid in terms of employment and income taxes yielded to all levels of government. Just imagine what it might be like if these same people had no access to college or graduate school. They might have been unable to obtain jobs and they might have become statistics on the welfare rolls. That obviously, would be a tremendous waste of talent for our Nation and an unnecessary fiscal burden for taxpayers.

Hofstra University, as you may know, is located in Hempstead, on Long Island in New York State. It has an enrollment of more than 11,500 students, who attend classes and extracurricular activities in 55 buildings on a campus containing 238 acres.

Hofstra's current enrollment of disabled students is at about 100. About half live on campus. Many commute in specially equipped automobiles. A little more than half are in wheelchairs. The university has a highly rated wheelchair basketball team and a karate program for disabled students.

Mr. Speaker, I am very proud that my alma mater has pioneered in making its campus accessible. I am also proud that now Hofstra stands as a model or prototype for other colleges and universities in the Nation.

Hofstra's accomplishment in removing architectural barriers to accessibility merits the attention and commendation of the Nation.

Thank you very much.●

SOVIET DISINFORMATION

HON. ROBERT H. MICHEL

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 21, 1981

● Mr. MICHEL. Mr. Speaker, the extent to which the Soviet Union uses disinformation to serve its purposes is little-known except among experts in the field. The Christian Science Monitor recently published an article which outlines the wide scope of Soviet activity. I want to bring this excellent article to your attention because the Soviet Union is spending hundreds of millions—perhaps much more—on lies, while we, comparatively speaking, are barely funding our own information agencies and international broadcasting stations such as Radio Free Europe, Radio Liberty, and the United States Information Agency's "Voice of America." It is time we started taking this war of words seriously. I am glad to know that President Reagan realizes the importance of telling America's story to the world through our information agencies.

At this point I wish to insert in the RECORD, "U.S. Details Soviets' Propaganda Methods" from the Christian Science Monitor, Tuesday, October 20, 1981.

[From the Christian Science Monitor, Oct. 20, 1981]

UNITED STATES DETAILS SOVIETS' PROPAGANDA METHODS

(By Stephen Webbe)

In its attempts to discredit and weaken the United States and other countries, the Soviet Union engages in activities which are frequently secret, sometimes violate the law, and "often involve threats, blackmail, bribes, and exploitation," according to a newly published State Department report.

The report claims that in efforts to influence the policies of other nations—as distinct from espionage and counterintelligence—the Kremlin employs a variety of methods, euphemistically known as "active measures," which include:

Written or spoken disinformation.

Attempts to control media in foreign countries.

The use of communist parties and front organizations.

Clandestine radio broadcasting.

Political influence operations.

By way of example, the report maintains that in late 1979 the Soviet Union spread a false rumor that the US was responsible for the seizure of the Grand Mosque in Mecca. "In August 1981, the Soviet news agency Tass alleged that the United States was behind the death of Panamanian leader Omar Torrijos," it adds, calling this assertion a "particularly egregious example" of Soviet disinformation.

Declaring these actions to be "a major, if little understood, element of Soviet foreign policy," the State Department asserts that those who practice such skulduggery are not adverse to the partial and outright forgery of documents and the exploitation of a nation's academic, political, economic, and media figures.

"Active measures" are authorized by the Politburo, the highest authority in the Soviet Union; devised largely by the KGB and the international department of the party's Central Committee, and executed by "official and quasi-official Soviet representatives," the State Department report asserts.

Among those carrying out operations abroad, it observes, are scholars, students and journalists "whose official Soviet links are not always apparent."

As part of its efforts to manipulate the foreign press, the Soviet Union has used the Indian news weekly "Blitz" to publish "forgeries, falsely accuse Americans of being CIA personnel or agents, and disseminate Soviet-inspired documents," according to the State Department. "In another country, the Soviets used local journalists to exercise substantial control over the contents of two major daily newspapers," it maintains.

Recent Soviet forgeries are better and more prolific, observes the State Department report, maintaining that among the documents fabricated by agents are war plans "designed to create tensions between the United States and other countries."

Rumor, insinuation, and distortion of facts are used by Soviet agents to discredit foreign governments and leaders, the State Department alleges. It claims that Soviet officials "warned" officials of an unnamed West European country that the CIA had increased its activities there and that a coup was being planned. The State Department does not say when the warning was issued.

Noting that front organizations are more effective than openly pro-Soviet groups "because they can attract members from a broad political spectrum," the report labels the World Peace Council and the World Federation of Trade Unions—among others—as Soviet-controlled fronts.

According to the State Department, the Soviet Union operates two radio stations, the National Voice of Iran (NVOI) and Radio Ba Yi, which broadcast to China. Both pass themselves off as the voices of "progressive" elements in each country. Throughout the Iran hostage crisis, the NVOI consistently urged that the imprisoned US Embassy personnel not be released. At the same time, official Soviet statements supported the hostages' claim to diplomatic immunity, the report alleges.

The most important but least understood aspect of Soviet "active measures," the State Department asserts, are political influence operations which seek to exploit contacts with political, economic, and media figures to secure their active collaboration with Moscow. In this respect it notes that last year French journalist Pierre-Charles Pathé was convicted for acting as a Soviet agent of influence since 1959.

The State Department maintains that the Soviet campaign to prevent the deployment of 572 Pershing II and cruise missiles in Europe, known as theater nuclear force (TNF) modernization, serves as a classic example of "active measures" at work.

While conceding that not all opposition is inspired by the Soviet Union, it nevertheless states that "Moscow has spurred many front groups to oppose the TNF decision" and that they have then lobbied antinuclear groups, pacifists and environmentalists in an attempt to broaden the opposition to TNF modernization.

The State Department adds that the Soviet Union waged a similar campaign against neutron or enhanced radiation weapons (ERW) throughout 1977 and 1978 involving "peace councils" and intensive propaganda in an attempt to block ERW deployment and direct attention from its growing military buildup. Notes the report: "With the recent U.S. decision to proceed with ERW production, the Soviets have begun a new barrage of propaganda and related 'active measures.' "

The State Department also maintains that Soviet "active measures" have been directed against U.S. policy in El Salvador and the Middle East. It claims that on Dec. 30, 1980, Pravda falsely reported that U.S. military advisers in El Salvador had used napalm and herbicides against noncombatants. It brands a report earlier this year in the Soviet weekly Literaturnaya Gazeta that the U.S. was preparing the "elimination" of thousands of Salvadorans, "another particularly outrageous distortion."

"Active measures" directed against the Camp David peace process and the close relationship between Egypt and the U.S. have been typified by the use of forgeries, the State Department claims.

One forgery surfaced in the Oct. 1, 1979, issue of the Syrian newspaper Al-ba'th, it maintains. This purported to be a letter from the U.S. ambassador to Egypt, Hermann F. Eilts, declaring that because President Sadat has not prepared to serve U.S. interests "we must repudiate him and get rid of him without hesitation."●

PRESIDENTIAL COMMISSION TO COMBAT DRUNK DRIVING EPIDEMIC

HON. MICHAEL D. BARNES

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 21, 1981

● Mr. BARNES. Mr. Speaker, on October 6 I was joined by our two distinguished colleagues, GLENN ANDERSON of California and JIM HANSEN of Utah, in launching a new initiative to combat what is perhaps America's greatest tragedy, and the most often committed violent crime in the Nation today, drunk driving.

We are sending a letter to President Reagan next week asking him to take a firm public leadership role against the drinking driver problem, one which claimed the lives of 26,000 Americans, seriously injured another 750,000 citizens, and created economic costs soaring above $5 billion last year alone.

We are calling on the President to take two responsible and reasonable steps which we believe can significantly reduce death and injury caused by drinking drivers in each community nationwide. First, we are asking Mr. Reagan to appoint a national commission, bringing together the most qualified persons, to map out a master plan confronting the problem nationally. Second, we are encouraging the President to urge each State Governor to form his own solution-oriented volunteer task force on drunk driving to uncover existing deficiencies within the State and to directly address those problems with realistic solutions. Over the past year, statewide task forces in the States of Maryland, California and New York have led to important changes both administratively and legislatively resulting in tougher laws and increased enforcement within those States.

Currently, our letter to President Reagan is circulating among our colleagues seeking their signatures. To date, we have collected an impressive list of nearly 100 Members of both Houses and parties.

Mr. Speaker, none of us is immune to the daily threat of death and destruction posed by drinking drivers. I note that our colleague, Mr. HANSEN, learned this fact first hand. Over the past 5 months, Mr. HANSEN has been struck twice by drinking drivers, the latest collision seriously injuring his wife and daughter.

I commend our colleague, Mr. ANDERSON, who chairs the key House subcommittee having direct jurisdiction over the drunk driving problem, for joining in the effort to bring this critical health and safety issue to the attention of the President, the States, and the public generally. His support is extremely important.

Mr. Speaker, I submit for the RECORD a copy of the letter to President Reagan, along with my statement from the October 6 news conference announcing this initiative, and subsequent news articles from the Washington Post and Christian Science Monitor:

CONGRESS OF THE UNITED STATES,
Washington, D.C.

Hon. RONALD REAGAN,
President of the United States,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: We, the undersigned members of Congress, wish to bring to your attention the need for you to take a firm public leadership role to help resolve what is perhaps "America's Greatest Tragedy"—the alcohol crash problem in our country.

Drinking driving and the gruesome toll it takes everyday is the most often committed violent crime in our country and has been allowed to become a national disgrace. In the past ten years alone, an estimated one quarter of a million Americans have been killed in alcohol-related crashes. Millions more have been seriously injured—many crippled or maimed for life. This year another 26,000 people are expected to be killed in our country by drinking drivers—hundreds of thousands more seriously injured. The problem is projected to get worse—much worse.

We are convinced that much of the pain and suffering inflicted on innocent American families by drinking drivers is needless and preventable. In a country as great as ours, with our wealth of resources and talent, there is no sane reason to let this carnage continue. Drinking drivers can be removed from the highways. Death and destruction can be substantially reduced. But for this to happen your involvement is needed.

Therefore, we ask that you appoint a blue ribbon Presidential Commission which will bring together the most qualified persons in the nation to develop a realistic national master plan to curtail the tragic suffering caused by the drinking driver epidemic. We ask that you call on the American people to help in this effort.

And, finally, we ask that you encourage every Governor to establish a solution-oriented state task force to deal with drinking drivers at the state and local levels.

We believe society does not want the tragic problem of the drinking driver to continue. We believe the American public will get firmly behind your efforts to reduce death and injury caused by drinking drivers.

Thank you.

Sincerely,

———.

A NATIONWIDE PLAN TO CURTAIL THE DRUNK DRIVING EPIDEMIC

Drunk driving is one of the most serious health and safety problems facing the citizens of our nation. None of us is immune to this daily threat to life and limb. Our families can be destroyed in a matter of seconds by a drinking driver at any time. The fact is, American streets are not safe. This insanity is totally unacceptable.

The experts all seem to agree that we are losing the war against drunk drivers. Unfortunately, until now we have not known how to effectively curtail the senseless human suffering inflicted on innocent citizens. But, that is no longer true.

Today, I am pleased to bring to the attention of the American public an important step in the struggle against the drinking driving epidemic.

As many of you know, I have been interested in this problem for some time. It was over one year ago that the severity of this problem was first brought to my attention. I learned just how serious a threat drunk drivers pose to the health and safety of citizens in every community across the nation. Today we will urge an important new strategy that can help the nation lead itself out of the drunk driving nightmare.

Now we know what needs to happen nationwide in every state and community to finally stem the tide against what I have said is nothing less than a holocaust on our highways. According to the president of a major auto insurance company, we are attempting to address this problem with solutions that have a better chance of succeeding than has obviously been true of any attempts we have made in the past.

At the federal level, we need President Reagan to establish a blue ribbon commission which will bring together the most qualified persons to develop a master plan designed to address the drinking driver crisis. To that end, I am helping to lead a bipartisan effort encouraging all members of Congress to make the resolution of the drinking driver tragedy a national priority. Today, we are asking each member of Congress to join with us in this effort to urge the President to take immediate action.

At the state and local levels, we must encourage every governor to establish a solution-oriented task force to thoroughly investigate the adequacy of the laws in each state and the system that deals with the drinking driver in each community.

In my community, Montgomery County, Maryland, a task force to investigate the drinking driver problem was recently appointed by the county executive. The purpose of that task force, which I am a member of, is to do everything possible to reduce death and injury caused by drinking drivers.

We need that kind of local initiative in every community, in every state in the nation. I think it is long past time that citizens in this country ought to be demanding action. Local citizens should call their state legislators, and members of their county or city councils asking them what they are going to do about this problem. When 70 of our neighbors in this country are killed every day by drunk drivers, 26,000 deaths this year alone, it is time that we all demand that our government do something about it.

Not very many years ago, hundreds of thousands of people marched here on the United States Capitol because 50,000 people had been killed in Vietnam. We have killed more people than that by drinking drivers in the past two years alone. Yet, we do not have hundreds of thousands of people marching on the Capitol, but this problem deserves that kind of national outrage.

[From the Washington Post, Oct. 9, 1981]

DRUNKS

(By Judy Mann)

Representative James V. Hansen (R-Utah) has been involved in two automobile accidents in the last five months. The first occurred last May when a driver went through a stop sign. Hansen suffered cuts and sprains and his car was totaled. He says the police officer told him the driver who hit him had been drinking, but that he was just going to give him a citation.

Two months later, Hansen, his wife and five children were in Utah, going about 50 miles an hour in the right lane, when another driver came along in the left lane at what Hansen describes as "a pretty good clip." The driver lost control, bounced off the interstate barrier and hit the Hansens broadside, rolling their car down a hill and totaling it. Hansen's wife and two of his children suffered fractures. Hansen says the driver admitted drinking beer, but despite Utah laws requiring blood tests to determine alcohol content, the officer only made him walk a straight line before deciding not to charge him.

"That kind of irritated me," says Hansen, a former speaker of the Utah legislature. "What good are all the laws we legislators put in if we can't get the judiciary and the enforcement areas to back us up?"

This week, Hansen and a number of other Congressmen, including Michael D. Barnes (D-Md.) and Glenn M. Anderson (D-Calif.), chairman of the House surface transportation subcommittee, urged President Reagan to appoint a presidential commission to develop a comprehensive, national plan for getting drunk drivers off the roads. They also urged him to involve the nation's governors and mayors in a cooperative effort to close the legal and enforcement loopholes that result in nearly 26,000 Americans being killed in alcohol-related collisions each year.

Some 750,000 more Americans are maimed or seriously injured each year in accidents involving alcohol. According to federal data, one out of 10 drivers on the roads on week nights is drunk, yet only one in 2,000 is ever arrested for drunk driving and the chances of the arrested person's being severely punished are insignificant. The General Accounting Office estimates the toll at $5 billion a year in lost wages, medical costs, insurance costs and property damage.

The commission being proposed could be underwritten by the insurance industry, which clearly has a stake in reducing the loss. This is a project that would enable the Reagan White House—which has been criticized for frivolity and extravagance in its use of private funds for public projects—to engage industry in preventing the unnecessary loss of American lives.

"It's a national tragedy," says Hansen, "but we just ignore it. It should not be something we just shrug our shoulders about and say, 'That's life.'" Nor should it be something we treat as a routine traffic offense. Maine, he points out, has recently passed a mandatory two-day jail term for a person convicted of drunk driving, and a bar in Bangor that has installed a Breathalyzer has found its patrons more than willing to use it to find out if they are sober enough to drive.

Some 50 members from both parties are currently sponsoring legislation that would allow the federal government to withhold federal highway safety funds from states that don't take a tough stand on drunk drivers. Bills in the House and Senate would require states to set a uniform blood-level standard of intoxication, mandatory sentencing of first offenders to 10 days' service in something like a shock-trauma unit, mandatory suspension of license for up to a year. Repeat offenders would face mandatory sentence of 10 days in jail, loss of license for at least a year and fines. States would need to establish ways of screening drunken drivers for treatment and each state would need to establish a statewide tracking system to identify repeat offenders.

Tom and Dot Sexton are a Bowie couple whose 15-year-old son, Tommy, was killed 14 months ago. The driver received a $200 fine, a year's probation and was sent to an alcohol treatment program. They were among those who joined the congressmen this week to urge the president to make drunk drivers a national priority and to urge citizens to write their mayors, governors, congressmen and the White House to show that American drivers are tired of playing roulette on the road.

The carnage on the highways is not something that defies solution as long as a drunk driver can kill someone and get off with a $200 fine, or as long as a 19-year-old with a record of 17 driving offenses, including driving while intoxicated and reckless driving, is loose to kill four people in an auto crash, as happened in Annandale last November.

"Nobody wants to take on the drunk driver because they're taking on themselves," says Hansen. But there are signs in Congress and in states such as Maine and Maryland, which saw a 130 percent increase in one month's drunk-driving arrests after it toughened its laws, that we are finally ready to do just that.

[From the Christian Science Monitor, Wednesday, Oct. 14, 1981]

CONGRESS TO TAKE UP FIGHT AGAINST DRUNKEN DRIVING

(By Brad Knickerbocker)

Uncle Sam is preparing to take the lead in the effort to combat drunken driving.

A bipartisan group of more than 50 congressmen is sponsoring legislation that would mandate stiffer punishment, especially for repeat offenders, and a similar effort is gaining momentum in the Senate.

President Reagan last week was urged by a group of lawmakers to take a firm leadership role in finding solutions to a problem the administration acknowledges is becoming more serious. The President is being petitioned by members of Congress to name a special commission that would develop a "national master plan to curtail the tragic suffering caused by the drinking driver epidemic."

There has been no official administration response, but White House drug policy adviser Daniel Leonard says, "Personally, I think it's a great idea."

"I would think there has to be an interest," says Mr. Leonard, a former New York City narcotics officer. "I've seen the damage drunk drivers can do, and it's horrendous."

According to information gathered by the National Highway Traffic Safety Administration and the National Safety Council, accidents caused by drunk drivers result in the most common type of violent death in the United States.

Intoxicated drivers account for some 26,000 deaths and 750,000 injuries annually, more than half the yearly total, at an estimated cost of $5 billion. On a typical weekend night, one in 10 drivers is drunk, but only about one out of 2,000 is arrested.

Many states (Maryland, New York, and California among them) have taken helpful steps to curb the problem, but it continues to get worse. Part of the problem, experts say, is the lack of uniformity between states. In many instances, a driver who has lost his license in one jurisdiction has little trouble obtaining one in another. Because of poor record keeping, judges and law enforcement officials may not know of an arrested driver's past problems with driving while intoxicated.

Rep. Michael D. Barnes (D) of Maryland and Sen. Claiborne Pell (D) of Rhode Island have drafted a bill that seeks to fill these gaps. In order to continue receiving federal highway traffic safety funds (which total some $200 million a year), states would have to sentence first-time drunk drivers to a minimum of 10 days of community service and require their participation in a traffic safety program. Those convicted of drunk driving more than once within a five-year period would be jailed for at least 10 days and lose their license for at least one year, without exception.

Separate legislation would upgrade and computerize the US Department of Transportation's National Driver Register so that states could more easily share information on persons with drunk-driving records.

Supporters point out that none of this would require increased federal spending, but simply tries to encourage states to follow the led of those in the forefront of combating drunk driving. Maryland has nearly doubled its arrest rate by having more police on duty late at night and early in the morning. Washington state now sends most of its first-time drunk drivers to jail for at least 24 hours.

"From my own experience as a graduate student studying in Switzerland, tough laws, stringent enforcement, and effective public information campaigns work," says Congressman Barnes. "We understood that you just did not drink and drive. Our legislation seeks to create that same atmosphere in the United States."

In a letter to Rep. Glenn M. Anderson (D) of California, chairman of the House surface transportation subcommittee, Department of Transportation officials expressed disapproval of the Barnes-Pell legislation. Federally mandated jail sentences, they said, infringe upon states' rights and judicial discretion.

But the administration says it wants to work with Congress on what Senator Pell calls "America's No. 1 highway safety problem."

"We have the highest rate of alcohol-related traffic fatalities in the world," says Pell, two of whose aides were killed in accidents involving drunk drivers. "I believe the federal government can encourage state and local governments to expand enforcement against drunk drivers, and at the same time establish a strong national deterrent. . . ."●

A TIME TO RECALL THEIR SERVICE

HON. RICHARD T. SCHULZE

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 21, 1981

● Mr. SCHULZE. Mr. Speaker, today I would like to share with my colleagues the contents of a proclamation which was unanimously passed by the Delaware County Council, Pa., recently. The proclamation was introduced by an inventive and patriotic constituent, Mr. Carl E. Mau.

Mr. Mau's proposal urged that all Delaware County residents fly the American flag from Veterans Day, November 11, through Pearl Harbor Day, December 7. These 27 days of remembrance will serve to spark the flame of patriotism in the hearts and minds of the residents of Delaware County.

I can think of no better way for all citizens to honor the men and women who served their Nation, and particularly those who died in the service of their country, than to follow Delaware County's lead.

I therefore would like to take this opportunity to urge all Americans to fly the American flag for the 27 consecutive days from November 11 through December 7, and to ever retain that spark of patriotism which lives within us all.●

OMB MAY ELIMINATE CRUCIAL ENERGY INFORMATION

HON. TOM RAILSBACK

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 21, 1981

● Mr. RAILSBACK. Mr. Speaker, I rise today to address a topic which has concerned me for several years—public access to a Federal, central energy data bank. The Energy Information Administration's (EIA) ability to gather oil and oil product price and supply information may be sharply curtailed by two recent actions:

The Office of Management and Budget's (OMB) hesitation to approve five EIA petroleum price and marketing forms which authority expired on September 30, 1981. Three of these forms gather State-level data on home heating and diesel fuel.

The American Petroleum Institute's (API) September draft entitled a "Design for a National Petroleum Reporting and Information System." The proposal recommends that five of nine petroleum price and marketing forms be eliminated.

My concern, both as a member of the Northeast-Midwest Congressional Coalition and as a national legislator, stems from my feeling that a central, unbiased source of energy data is essential. Also, Federal and State governments must have access to State and regional-level data on petroleum prices and supplies. I have worked closely with the coalition to publicize the importance of certain energy information programs, and on September 8, I held a press conference to release the API draft.

I would like to emphasize that I support OMB's efforts to reduce Federal spending and paperwork. However, Federal energy information that is more acceptable to constituents than industry data must remain available. And, both the National Governors' Association and the National Conference on State Legislatures have indicated to OMB , EIA and the coalition the importance of State-level data that aids States in budgeting, planning, and forecasting emergencies.

Since my press conference, I understand API representatives met with people from the National Governors' Association. API now indicates that it would not recommend elimination of one form requiring State-level price and supply information. Although a big step in the right direction, I am concerned about data collected on the other forms.

Another aspect of OMB's reluctance to approve forms and the API's draft proposal is the loss of data on small- and medium-sized wholesalers and dealers. If the forms are not approved by EIA, oil, and oil product data collection activities would concentrate on major refiner-marketers and importers who provide only 19.2 percent of our motor gasoline and 58.7 percent of our No. 2 middle distillates, diesel and home heating fuel, to consumers. Price and market share information is needed for policymakers to assess the impact of price and supply changes on States and regions and to plan wisely to alleviate future problems.

The EIA must maintain its role as the central energy data bank. During past shortages, constituents displayed a pervasive and deep skepticism about the true state of our energy situation. They questioned the integrity of oil companies and energy data supplied by those companies. Having a central source of relatively unbiased information became essential, and Congress passed the Department of Energy Organization Act of 1977 which specifically created the semi-independent agency as the central, comprehensive, and unified energy data and information program.

The EIA has improved to the point where programs are in place, the personnel know what they are doing, and the information is reputable. It continues to make strong efforts at reducing the paperwork burden for respondents, eliminating 23 forms in April and working to consolidate several more. We are not now facing a shortage so a sense of crisis does not exist. However, we must not terminate or sharply curtail programs that would prove essential during an emergency, in predicting another shortage and in monitoring prices and supplies by State and region.

I appreciate this opportunity to share this matter with you, and I hope you will seriously consider any comments.●

JOSEPH STILE TO BE HONORED

HON. CHARLES E. SCHUMER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 21, 1981

● Mr. SCHUMER. Mr. Speaker, this Friday, October 23, 1981, I will join my constituents in commemorating the silver anniversary of the Brooklyn Hemophilia Guild. I can think of no better way to celebrate the occasion than by honoring its president and most outstanding member, Joseph Stile.

As a founding father of the Brooklyn Hemophilia Guild, Joseph has dedicated himself to the betterment of the disabled, the aged, and the handicapped. He has continually displayed this dedication as a member of the New York State's Governor's Advisory Council on the Disabled, the President's Committee for Hiring the Handicapped, the board of trustees of the Kings Highway Community Hospital, and the board of directors of the Multiple Sclerosis Organization.

I am not the first and will surely not be the last to pay tribute to Joe. As a volunteer at the Kings Highway Hospital, Joseph has received its highest honor, the David Menkin Award. He has been honored by two Brooklyn borough presidents including our current president, Howard Golden, Governor Carey and former President Jimmy Carter. Joe is by all means a true champion.

Joe has been active in other areas of community work as well. The Marine Park Civic Association, the Brooklyn Democratic Club, the Flatlands Chamber of Commerce and the Flatbush Gardens Civic Association are all thankful for the dedication he has shown to them.

In spite of all of the time he has spent working in the community, Joe has been a model family man, dedicated to his wife, Mary, and to his children, Joseph and Loretta. I would like to take this opportunity to wish Joe and Mary only the best as they celebrate two very special anniversaries on October 23, the silver anniversary of the Brooklyn Hemophilia Guild and their 40th wedding anniversary. Joe Stile is a man of great quality; we in Brooklyn are proud to call him one of our own.●

EXPANDING AGRICULTURAL EXPORTS

HON. DAN COATS

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 21, 1981

● Mr. COATS. Mr. Speaker, I would like to take this opportunity to rise in support of H.R. 4510, a bill to amend the Export-Import Bank Act of 1945 to provide for the extension of credit for agricultural commodities.

Agricultural exports are vital to the U.S. economy. Agricultural trade last year tallied up an enormous surplus of more than $23 billion, offsetting nearly half of our nonagricultural trade deficit. In 1980, farm exports amounted to $40.5 billion, an increase of 29 percent above the previous year.

Ten States accounted for about 60 percent of this $40.5 billion total. I am proud that Indiana is one of these 10 States. In 1980, Hoosier farmers exported almost $800 million in feed grains and over $600 million in soybean products. All together, Indiana farmers exported almost $1.75 billion in agricultural commodities.

The Department of Agriculture anticipates a 7-percent increase in corn production this year, amounting to almost 8 billion bushels. If this corn forecast is realized, it will be the second largest corn crop in history. Wheat production is expected to rise 20 percent, amounting to a record harvest of 2.75 billion bushels. USDA also forecasts a 15-percent increase in oats and a 33-percent rise in barley.

These bumper crops could mean disaster for many farmers, primarily because markets for these surpluses may not be available. Ironically, as the need for strong farm exports has increased, our willingness to support such a policy has diminished.

Under the Carter administration, for example, the Export-Import Bank financing for agricultural commodities was terminated. As a result, we have a situation where an importer of U.S. produced industrial items, such as computers or airplanes, can obtain financing through the Bank at 10¾ percent interest while at the same time, an importer of U.S. agricultural commodities can obtain nothing.

Today nearly $1 out of every $3 earned by the American farmer comes from export sales. This phenomenal growth rate is impressive, but the need for increasing exports has never been greater. I hope that this legislation will repair existing inequities so that the American farmer can enjoy and expand his prominence in the world market.●

ANIMAL RIGHTS ADVOCACY

HON. JAMES J. HOWARD

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 21, 1981

● Mr. HOWARD. Mr. Speaker, recent hearings sponsored by the House of Representatives Subcommittee on Science Research and Technology were devoted to examining the scientific and ethical responsibility of public and private industry in the use of animals in research. While the goals of research are often practical and admirable, it is certain that many abuses of animals have occurred in the past. It is my hope that these hearings will be the foundation of a campaign to end all unnecessary suffering by animals in research laboratories.

I am submitting the following article by Constance Holden on animal rights which appeared in July 1978, of Science. The issues raised in this article concerning research methods reemphasize the need for action by Congress on the humane treatment of animals in research.

The article follows:

[From Science magazine, July 7, 1978]

ANIMAL RIGHTS ADVOCATE URGES NEW DEAL

(By Constance Holden)

The animal rights movement, which for long had as its major champions the proverbial "little old ladies in tennis shoes," has in recent years achieved a new level of intellectual sophistication and political effectiveness.

The movement has its own philosophers and theorists. One is an English-born veterinarian, psychologist, and author named Michael Fox, who for the past 18 months has been director of the Humane Society's new Institute for the Study of Animal Problems in Washington, D.C.

The institute is the research arm of the society. "My being here is a symptom of a new direction in the humane movement," says Fox. "Sentiment is not enough" as an argument for humane treatment of animals. "We can't use the argument that animal suffering is reason to be humane," for that after all is our own subjective judgment. It also implies that there is a cutoff point somewhere—that baby seals, for example, deserve more respect than lizards. That is a form of "speciesism" which Fox deplores. "We have to be ethically responsible because they exist—not because they are sentient."

The institute, which has four research associates, is engaged in gathering good hard Western-minded scientific evidence to undergird the ethic it embraces, which is more in tune with the spiritual doctrines of the East.

A major concern is the use of animals in laboratories and schools. Although the Animal Welfare Act of 1970 promulgates standards for the care of lab animals, it says nothing about their behavioral and social well-being. Yet, Fox says, humane treatment is better science because you cannot get good results with emotionally deprived animals. For example, he says, the LD_{50} (dose at which half a population dies) for rats kept in separate cages is different from that for animals kept in their own social group. Although Fox is mainly concerned with primates, dogs, cats, and rodents, he says that even with fish there are data showing that social deprivation limits growth of nerve cell dendrites.

Fox's group also contends that a great deal of unnecessary research is being done on animals—testing cosmetics on rabbits' eyes, for example, or shaving cats' faces to test skin lotion. In many of these instances the animal testing is irrelevant to humans, and there are alternatives—testing substances on tissue cultures or using human volunteers—that are both more reliable and more humane. "The research establishment is beginning to face up to the issue quite squarely," says Fox, "provided we don't scream abolitionist or antivivisectionist nonsense." The institute will be doing more work on alternatives to animal subjects when its newest staff member, Andrew Rowan, arrives from England. Rowan, an Oxford graduate and former Rhodes scholar, has been working in London for the Fund for the Replacement of Animals in Medical Experiments.

Another area where people are behaving very badly, says Fox, involves high school science fairs. Children are doing stupid and ill-supervised experiments, such as dosing rats with lead or scalding them, or putting saltwater fish in fresh water. One child's project consisted of evaluating the effects of his mother's Valium and Thorazine on a hamster. "They are still giving dogs strychnine at some schools to see how it works," adds Fox. Science fairs have been a longstanding source of outrage among the animal rights types, but according to Fox only one state—California—effectively regulates these practices.

But the most large-scale outrage—and Fox is glad he is almost through with this project because it takes its toll emotionally—has to do with the treatment of animals raised for food. Animals are beginning to get some legal rights, namely through the Animal Welfare Act and the Endangered Species Act, but farm animals "are a totally neglected area."

Fox has traveled the country inspecting animals on "factory farms" and is now completing a book, tentatively entitled "Animal Farm Revisited." His basic case is that massive animal rearing operations are not only inhumane, but by no means as efficient as their advanced technology and economies of scale might indicate. Half the country's antibiotics are fed to farm animals, he says, and much of this is unnecessary as they are administered to counter diseases that would not occur if the animals were not subjected to overcrowding and stress. Special diets and genetic selection to enhance meat quality or augment production also serve to weaken animals' natural coping mechanisms. Calves raised for veal, for example, suffer anemia and weakness from their low-iron diet; also, because they are fed no roughage, they resort to licking off their own hair.

Behavioral problems are legion as a result of overcrowding and lack of normal opportunities for socialization. Pigs chew each other's tails off. Chicks have their beaks cut off so they will not peck each other. Pigs and chickens even resort to cannibalism. Animals kept tethered in solitary pens become unbalanced from boredom, chew on themselves, molt excessively, and develop nervous tics and stereotyped behaviors; hogs and bulls, which are used for artificial insemination, often become sterile because of lack of social contact; this is treated by more hormones.

Fox says the mortality rate is as high as 20 percent on some farms, and many more deaths occur in the course of transporting animals for fattening and slaughtering. He says that the ventilation and temperature control on the trucks are haphazard, and losses in transportation alone amount to $1 billion a year—equivalent to a 4-mile-long freight train filled with carcasses.

Fox says many of the inhumanities could be altered by simple means—supplying places for nesting and roosting for hens, for example, or changing the concrete flooring that causes pigs to develop arthritis, or supplying shaded areas in beef feedlots.

Fox talks much of the need for "empathy" with animals. By this he does not mean anthropomorphism, but rather a replacement of "macho dominionism"—with its assumption that humans have a right to control and dominate the rest of nature—with the recognition that all life is valuable.●

SAN PEDRO SPORTS WALK HALL OF FRAME INDUCTS THREE

HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 21, 1981

● Mr. ANDERSON. Mr. Speaker, three plaques will be placed in the San Pedro Sports Walk Hall of Fame, this Tuesday, to honor three outstanding athletes. They are Manuel Laraneta, former University of Southern California great; Tom Mack, the ex-Los Angeles Rams star; and Parnelli Jones widely respected automobile racing champion.

Manuel Laraneta, a San Pedro native, was one of the University of Southern California's all time athleles. On October 6, 1923, Laraneta was the first man to score a touchdown in the then New Los Angeles Coliseum. Three years later, in 1926, Laraneta gained 1,165 yards for the Trojans as a senior fullback. That year, Laraneta lost a coin toss to fellow Trojan Morton Kaer that determined whom would be on the All-American team. Laraneta starred defensively as well. His 13 pass interceptions remained a USC record until 1973. Laraneta never forgot his South Bay roots and returned to coach San Pedro High School's football team. He died in 1969.

Parnelli Jones, the first racing car driver to exceed 150 miles-per-hour, was raised in Torrance. Jones won the pole position in the 1962 and 1963 Indianapolis 500. In the latter year, he not only won the most famous of auto races, but also broke the 150 miles per hour barrier with his record breaking time of 151.153 miles-per-hour during a qualifying lap. Jones still participates in four-wheel drive, off-the-road races and presently holds most of the principle Baja titles, including the exhausting Baja 1,000. When not setting records, this great champion runs his own highly successful Firestone tire dealership.

Tom Mack, an All-American tackle with Michigan, was the Los Angeles Rams No. 1 draft choice in 1966. During his 13-year professional career with the Rams, Mack was named to the probowl team 11 times. One of football's premier offensive linemen, Mack played in 184 consecutive contests. In recognition of his outstanding leadership skills, Mack was chosen as team captain in 1976.

My wife, Lee, and I would like to join the San Pedro Sports Walk Hall of Fame in honoring these three great athletes, Manuel Laraneta, Parnelli Jones, and Tom Mack, for their outstanding contributions to sports, both nationally and in the South Bay.●

FATHER HESBURGH ON EL SALVADOR

HON. HENRY J. HYDE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday October 21, 1981

● Mr. HYDE. Mr. Speaker, columnist Georgie Anne Geyer's interview with Father Theodore Hesburgh was published in the Cleveland Plain Dealer on September 24, 1981.

The substance of this interview is of the utmost interest and importance—particularly because so many well meaning church affiliated persons seem to denigrate the Government's efforts in El Salvador to end the insurgencies of both the right and left. I commend it to my colleagues.

HESBURGH'S PLAN: SCRAP EASY ANSWERS

(By Georgie Anne Geyer)

NOTRE DAME, IND.—Coming back to work after an all-too-short vacation, Columnist Geyer (that's me) thinks about all the sober topics facing us: surrogate warfare all over the world, the Middle East mess, that big, growling Russian bear.

But those problems are not everything in the world. The "other" world that is just as real and just as reachable is perhaps found here: on the exquisite campus of Notre Dame University and in the uncommonly good mind of its retiring president, Father Theodore Hesburgh.

He will leave at the end of this year, this Renaissance man who has moved through all the social and political problems of our times with such grace. He sits in his handsome office exuding a rare inner peace. His mind roves from area to area, but he comes down over and over to two basic, typically Hesburghian, central thoughts.

First of all, "Everybody today has easy answers," he says, leaning back behind his big desk. "I am getting damned tired of easy answers, especially those which blame people thousands of miles away."

Secondly, "Somehow we've got to find an answer to systemic injustice," he says. "When you ask me what is the long-range answer, I go back to the church's aphorism, 'Opus Justitiae Pax,' or 'Peace is the work of justice.' "

"If you ask me what is the biggest misperception in the U.S. today," he goes on, speaking of the Reagan administration, "it is that national security equals piling up armaments. We can't spend so little on foreign assistance and think we are talking about security.

"When the social fabric exploded, all of those arms were useless for the shah. To not see that real national security involves creating a more just world means we are just asking for disaster."

What is impressive about Hesburgh, who describes himself as "conservative as far as human values are concerned and a pragmatic liberal on other things," is the fact that he simply refuses to take the simple or the modish ideological stance. He will not be easily labeled.

"The old-style liberalism—it got worn out and dog-eared," he says. "When I hear friends giving speeches rehashing FDR values and when you have a third generation on welfare, you're in trouble.

"I told my liberal friends, 'Watergate gave you four more years.' Now we are at the point where we are forced to take a look at the liberal position and redo it—and already there are all sorts of groups stirring."

On the other hand, looking at social issues in the international realm, he also cannot take the position of the radical priests in the Latin America he has known and loved so well.

"The impact of the missionaries is greater than ever," he says. "I understand their anguish and that they cry out for quick answers. But the answers to a country like El Salvador are long-range and terribly nuanced, and tied up with global realities of the East-West, North-South conflicts.

"What I'd like to see instead of simplistic answers is how to get at the systemic problems of society."

He is suspicious—deeply so—of the priests and nuns who believe, in places like El Salvador, that they can work with the Marxists.

"There are three points I gag on," he says. "First, we're talking about a way of life. We believe in eternal life and temporal life, but always in the context of the eternal. We can't give away people's rights in that area.

"Second, I live for freedom, and fundamentally Marxist society has no freedom. People who deeply believe in freedom should not sell out to a system without freedom.

"Third, Christian humanism is fundamentally a spiritual thing. With them the total answer is economic. To bargain away liberty, and eternity, for that? I just don't buy it."

So, as Father Hesburgh, 30 years the president of this great university, faces his last year, he faces it as a unique and rational man who has compromised neither his humanity nor his simple common sense.

People find him hard to pigeonhole. They find him difficult to place ideologically. A priest who oversees the program of birth control development for the Rockefeller Foundation? A priest who loves humanity and yet believes fervently that we need immigration restraints?

What they are seeing, in a time when we swing back and forth like dead men in hangman's nooses between the absurdities of ideological extremes, is one solid man of the rational and questioning center. Perhaps we should be wondering today why this type of man should suddenly seem so rare.●

MONTHLY LIST OF GAO REPORTS

HON. JACK BROOKS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 21, 1981

● Mr. BROOKS. Mr. Speaker, the monthly lists of GAO reports include summaries of reports which were prepared by the staff of the General Accounting Office. The August 1981 list includes:

NATIONAL DEFENSE

DOD Loses Many Competitive Procurement Opportunities. Acc. No. 116095, PLRD-81-45, July 29.

The Air Force Has Incurred Numerous Overobligations in its Industrial Fund. Acc. No. 116124, AFMD-81-53, August 14.

Countervailing Strategy Demands Revision of Strategic Force Acquisition Plans. Acc. No. 116056, MASAD-81-35, August 5.

Logistics Managers Need to Consider Operational Readiness in Setting Safety Level Stocks. Acc. No. 116055, PLRD-81-52, August 10.

DOD Can Save Millions By Using Less Expensive Packaging for Small Arms Training Ammunition. PLRD-81-53, August 18.

Letter reports

DOD's fiscal year 1980 use of its authority to exceed its civilian personnel ceiling was consistent with the intent of the DOD Authorization Act. FPCD-81-66, August 18.

Inconsistencies exist among the Military Services in handling exchange rate fluctuations for some programs and activities. ID-81-54, August 21.

Navy can reduce the cost of ship construction if it enforces provisions of the contract escalation clause. PLRD-81-57, August 24.

Most DOD conversions to contract performance awarded under OMB Circular A-76 did not result in price increases or performance shortfalls. PLRD-81-58, August 26.

INTERNATIONAL AFFAIRS

Changes Needed in Administering Relief to Industries Hurt By Overseas Competition. Acc. No. 116008, ID-81-42, August 5.

The Growing Role of Trade as a Development Assistance Mechanism. Acc. No. 116122, ID-81-46, August 11.

U.S. Strategy Needed for Water Supply Assistance to Developing Countries. ID-81-51, August 25.

Management of the Department of State Office of Passport Services Needs to be Improved. Acc. No. 116036, ID-81-39, August 6.

ENERGY

Greater Commitment Needed to Solve Continuing Problems at Three Mile Island. EMD-81-106, August 26.

DOE's Alcohol Fuels Awards Process Resulted in Questionable Award Selections and Limited Small Business Success. EMD-81-125, August 21.

TVA's Coal Procurement Practices—More Effective Management Needed. Acc. No. 116125, EMD-81-65, August 14.

Letter reports

Interim status report on implementation of "National Materials and Minerals Policy, Research, and Development Act of 1980." Acc. No. 116053, EMD-81-124, July 27.

The Department of Energy has no practical way to ensure that a State will not award funds to an ineligible local agency. EMD-81-114, August 4.

The United States Synthetic Fuels Corporation's project selection guidelines need clarification. Acc. No. 116045, EMD-81-129, August 5.

NATURAL RESOURCES AND ENVIRONMENT

Continuation of the Resource Conservation and Development Program Raises Questions. Acc. No. 116098, CED-81-120, August 11.

Simplifying the Federal Coal Management Program. EMD-81-109, August 20.

How Interior Should Handle Congressionally Authorized Federal Coal Lease Exchanges. Acc. No. 116035, EMD-81-87, August 6.

Changes in Federal Water Project Repayment Policies Can Reduce Federal Costs. Acc. No. 116126, CED-81-77, August 7.

National Direction Required for Effective Management of America's Fish and Wildlife. CED-81-107, August 24.

Letter reports

Allegations that a political appointee at EPA was exercising control over the Office of the Inspector General. Acc. No. 115982, AFMD-81-77, June 25.

The Office of Surface Mining Reclamation and Enforcement needs to consider several issues while revising its regulations. Acc. No. 116052, CED-81-145, August 5.

AGRICULTURE

Cooperative Extension Service's Mission and Federal Role Need Congressional Clarification. CED-81-119, August 21.

Limited-Resource Farmer Loans: More Can Be Done to Achieve Program Goals and Reduce Costs. CED-81-144, August 31.

Emerging Issues from New Product Development in Food Manufacturing Industries. CED-81-138, August 19.

Analysis of Certain Operations of the Federal Crop Insurance Corporation. Acc. No. 116022, CED-81-148, July 30.

Long-Range Planning Can Improve the Efficiency of Agricultural Research and Development. Acc. No. 116007, CED-81-141, July 24.

Letter reports

Any reorganization of nutrition in the Department of Agriculture can be expected to disrupt operations in the short run. CED-81-150, August 17.

COMMERCE AND HOUSING CREDIT

Policy Needed at Eximbank for Financing Aircraft Spare Parts and Other Suppport Items. Acc. No. 116096, ID-81-55, July 31.

Federal Reserve Could Improve the Efficiency of Bank Holding Company Inspections. GGD-81-79, August 18.

Letter reports

Corrective action is being taken in Montana to alleviate its mail service problems. GGD-81-86, July 23.

TRANSPORTATION

Better Targeting of Federal Funds Needed to Eliminate Unsafe Bridges. CED-81-126, August 11.

SOCIAL SERVICES

Insights Gained in Workfare Demonstration Projects. Acc. No. 116097, CED-81-117, July 31.

HEALTH

Better Oversight Needed for Safety and Health Activities at DOE's Nuclear Facilities. Acc. No. 115979, EMD-81-108, August 4.

Letter reports

The National Institute on Alcohol Abuse and Alcoholism should make greater efforts to support treatment demonstration projects. Acc. No. 116054, HRD-81-131, July 31.

INCOME SECURITY

Perspective on Income Security and Social Services and An Agenda for Analysis. Acc. No. 116120, HRD-81-104, August 13.

Limits on Receipt of Multiple Disability Benefits Could Save Billions. Acc. No. 115980, HRD-81-127, July 28.

GENERAL GOVERNMENT

Evaluations Called for to Monitor and Assess Executive Appraisal Systems. Acc. No. 115981, FPCD-81-55, August 3.

GSA's Cleaning Costs are Needlessly Higher than in the Private Sector. AFMD-81-78, August 24.

Improving the Credibility and Management of the Federal Work Force Through Better Planning and Budgetary Controls. FPCD-81-54, July 17.

Federal Life Insurance Changes Would Improve Benefits and Decrease Costs. FPCD-81-47, August 21.

Review of Financial Statements of Commodity Credit Corporation. CED-81-137, August 13.

Audit of the Senate Barber Shops Revolving Fund for Calendar Year 1980. Acc. No. 116050, AFMD-81-81, August 6.

Audit of the House Minority Printing Clerk Fiscal Year Ended September 30, 1980. AFMD-81-80, August 24.

Audit of the House Majority Printing Clerk Fiscal Year Ended August 31, 1980. AFMD-81-75, August 24.

Audit of the Senate Building Beauty Shop for the Fiscal Year Ended February 28, 1981. Acc. No. 116051, AFMD-81-79, August 6.

Letter reports

Proposed rescissions totalling $321.0 million, 13 new deferrals totalling $220.1 million, and revisions to five previously reported deferrals totalling $78.1 million. Acc. No. 115942, OGC-81-14, July 30.

The Panama Canal Commission is close to a violation of the Anti-Deficiency Act with respect to entertainment expenditures. Acc. No. 116116, ID-81-57, August 5.

The use of software in medical devices is emerging as a troublesome area. Acc. No. 116037, AFMD-81-95, August 5.

A policy of encouraging Federal agencies to assist local economies in meeting Federal space needs can be applied without increasing costs. PLRD-81-62, August 21.

Staffing levels in the Department of Education. Acc. No. 116006, FPCD-81-63, August 5.

Adoption of preplanned product improvement techniques can reduce cost of improving effectiveness of systems during their lifetime. Acc. No. 116137, MASAD-81-39, August 13.

Impoundment of funds for several Federal agencies. OGC-81-15, August 17.

Financial control system problems at the Community Services Administration will not be fully solved by the current system redesign project. AFMD-81-96, August 19.

OMB is unable to cite evidence as to how the Immigration and Naturalization Service could more effectively use its personnel resources. FPCD-81-67, August 20.

The monthly list of GAO reports and/or copies of the full texts are available from the U.S. General Accounting Office, Distribution Section, Room 1518, 441 G Street NW., Washington, D.C. 20548. Phone 202-275-6241.●

CONGRATULATIONS TO WOBURN TIMES ON 80TH ANNIVERSARY

HON. EDWARD J. MARKEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 21, 1981

● Mr. MARKEY. Mr. Speaker, it is my sincere pleasure to extend my congratulations to the Woburn Daily Times of Woburn, Mass., on the occasion of its 80th anniversary.

The Daily Times has grown since its beginning as a small penny journal in 1901, yet under the guidance of the

Haggerty family, it has retained its original spirit of dedication to the community and its loyal corps of readers.

For the past 80 years the Daily Times has remained a vital part of the city of Woburn, as well as the surrounding communities of Winchester and Burlington. More than just a newspaper, the Daily Times has been an illustrated diary of the milestones, the tragedies, and the triumphs of the people of suburban Boston.

I would like to pay special tribute to the paper's founder, James Haggerty, and to other members of the Haggerty family who have maintained its proud tradition over the past eight decades.

The Daily Times can be proud of the important role it has played in Woburn's history. I wish the Daily Times the best of luck in its next 80 years of continuing its tradition of excellence and service.●

IN COMMEMORATION OF THE BIRTHDAY OF TWO JAZZ GREATS

HON. JOHN CONYERS

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 21, 1981

● Mr. CONYERS. Mr. Speaker, today marks the birthdates of two of the world's most accomplished and celebrated musicians: Dizzy Gillespie and "Don" Byas. Both of these distinguished gentlemen, made their marks on the world of jazz. Unfortunately, only one of them remains with us today.

Born in 1913, Don Byas, was one of the most brilliant saxophone players of his time. An outstanding virtuoso of his instrument, the purity of his smooth, round tone was admirable.

Byas was uniquely, and unusually gifted, in both melody and harmony. It has been said that his rich musicianship is reminiscent of the great Benny Carter's. Byas, had an extraordinary knack for swinging it, while lightly paraphrasing his music with real artistry. Byas, who died of cancer in 1971, recorded with such greats as: Count Basie, Coleman Hawkins, Lucky Millender, Art Blakey, Duke Ellington, and Quincy Jones.

Dizzy Gillespie, born in 1917, has been called the "Abraham Lincoln of jazz", and credited with coining the word "bebop"—a unique harmonic form with rythmic nuances which influenced the entire field of jazz.

John Birks Gilliespie, the last of nine children born to John and Lottie Gillespie, was given early instrumental training by his father. His genius enabled him to learn to play the trumpet, piano, drums, and trombone, at a very early age.

The young musician organized his own band when he was 14 and acquired a reputation for his prowess on the trumpet. Winning a scholarship to the Larinburg Institute, a Negro industrial school in South Carolina, was the start of his training in theory and harmony.

Gillespie recalls arriving in Philadelphia in 1935 carrying his trumpet in a paper sack. He got a job playing in the band of Frank Fairfax. His nickname "Dizzy" originated while playing with the Fairfax band, because of his eccentric mannerisms.

In 1939, Dizzy Gillespie joined the band of Cab Calloway. Impressed with Dizzy's imaginative arrangements, Calloway had him make several records. Gillespie went on to play with several all time great artists: Benny Carter, Earl Hines, Coleman Hawkins, and Duke Ellington.

Early in 1945 he formed his own band and toured the Nation. The New York Herald Tribune commented: "Gillespie is gifted technically but his style is one of the most facile and transparent showmanship, fantastic rather than musical".

Gillespie has received many of the highest acclaimed awards a musician can receive, including; The Esquire New Star Award in 1945, Metronome chose Dizzy's group as "Band of the Year" for 1948, chosen best trumpeter of 1956 in the Down Beat poll.

In March 1956 Gillespie headed a large band organized by the American National Theatre and Academy (ANTA) which toured abroad under the auspices of the international exchange program of the U.S. Department of State; this was the first time a jazz band had been sponsored. The band played at 64 concerts in 15 cities; in Pakistan, Iran, Egypt, Turkey, Greece, Lebanon, Syria, and Yugoslovia. Everywhere they went, the musicians were received with enthusiasm.

Dizzy Gillespie, the musician who sent chills up the listeners' spines, influenced the entire field of jazz like no other musician has ever done. His "bebop" presented a new word into the musical vocabulary. At the age of 64, he continues to be, regarded as the foremost, most respected genius of jazz.●

CONGRESS COMMITMENT TO CLEAN AIR

HON. BRUCE F. VENTO

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 21, 1981

● Mr. VENTO. Mr. Speaker, I am certain that my colleagues are aware that during this Congress the reauthorization of the most effective environmental legislation, the Clean Air Act, is at hand. It is most appropriate at this time that the House of Representatives reafirm its determination to maintain a strong Clean Air Act. Today Congressman LEWIS and I and 27 of our colleagues are introducing a "Commitment to the Clean Air Act Resolution of the 97th Congress" which will reiterate the firm commitment of Congress to uphold the present standards of the Clean Air Act.

The Clean Air Act was enacted expressly to establish programs to clean up polluted air and to preserve air quality in those regions that still enjoy the luxury of a pollution-free environment.

The air pollution problems evident in the United States, Canada, and other countries include sulfur and nitrogen oxides from automobiles, other transportation vehicles, and power plants, and toxic hazardous pollutants from chemical plants, refineries, and synthetic fuel plants. These pollutants have threatened human health, have damaged our environmental resources, have affected agriculture and forest growth, and have led to the deterioration of buildings constructed of materials such as marble and metals.

We have witnessed significant improvement in the cleansing of our Nation's air, and the prevention of further degradation of our environment through the Clean Air Act. Let us not turn the clock back by reducing the effectiveness and importance of this law or by undoing the obvious improvements which have resulted from the act.

A report from the Council on Environmental Quality (CEQ) stated that between 1973 and 1978, despite increases in population, the national concentrations of CO and SO_2 and total suspended particulates had gone down in urban and rural areas. CO levels were down 33 percent and SO_2 levels dropped 20 percent.

In 1978 the air quality in New York City was unhealthy 174 out of 365 days and Los Angeles had undesirable air quality readings on 206 days. Although these abnormal levels for so many days are substantially high, they are a vast improvement over previous years for these two areas. Some of these reductions were largely a result of the reduction in automobile pollution. The technology exists now to even further reduce auto emissions. Virtually all new cars, domestic and foreign, are equipped with the proper equipment to meet the present emission standards in the Clean Air Act.

The Clean Air Act has also helped in promoting the protection of our scenic areas such as Federal and State park lands and wilderness areas which now total well over a hundred million acres.

Sacrificing the right to breathe clean and healthy air for the sake of cost effectiveness is not the proper solution. It is impossible to put a price

tag on human health and a pollution-free environment.

Although our attention should be focused on the benefits we have deduced from the enforcement of this act, we must also focus on the problems and challenges that still remain. The United States continues to emit 30 million tons of sulfur dioxide and 22 million tons of nitrogen oxides annually. These pollutants are contributed mainly by automobiles and power plants.

Congress has a commitment to the people of this Nation to maintain clean and healthy air quality. We can certainly refine the Clean Air Act, but we must not settle for maintaining present air quality conditions. We must push for continued reduction of harmful pollutants invading our environment so that we may further reduce our pollution levels.

Congress must also acknowledge the public support of the Clean Air Act. The American people recognize the importance of a strong Clean Air Act. This is evidenced in the most recent Harris survey which reported that 80 percent of Americans oppose any weakening of the provisions of the Clean Air Act. Clearly, this percentage indicates that sentiment of the American people with regard to the Clean Air Act. Congress must recognize the support of Americans as well as of our Canadian neighbors who are also suffering from air pollution damage.

The most prominent type of air pollution shared by the United States and Canada is acid rain. This mixture of sulfur and nitrogen oxides which rises high into the atmosphere can travel thousands of miles from its source depending upon the direction of the prevailing winds. It then falls back to the Earth in the form of wet and dry deposition. This primarily manmade problem is increasing quantitatively and geographically. A virtually invisible source of pollution, acid rain is silently killing off lakes and other bodies of water dramatically changing the aquatic life and environment, and significantly damaging agricultural productivity and forest growth. Vegetation damage due to air pollution has been estimated to be as high as $2.8 billion annually. It is especially important that acid rain pollution be adequately addressed in the present Clean Air Act. Substantial research and evidence has definitely given us more than enough information to know that this problem exists and is worsening as time goes on.

The Clean Air Act must also further address toxic air pollutants which range from airborne chemicals to radioactive particulates. Through the Clean Air Act, the Environmental Protection Agency was given the power to list and regulate toxic air pollutants some of which are suspected to cause cancer, genetic damage, neurotoxicity, reproductive effects, and other serious health problems. So far only seven have been listed and the industrial sources of only four have been regulated. The seven listed toxic pollutants are asbestos, beryllium, mercury, vinyl chloride, benzene, radionuclides, and arsenic. Sources have been regulated for asbestos, beryllium, mercury, and vinyl chloride. There are many additional toxic airborne substances which include potentially dangerous carcinogens. Through the Clean Air Act we must insure that EPA will continue to list toxic substances and put regulations and restrictions on the sources of these materials.

As I mentioned before, the present standards of the Clean Air Act have led to significant improvements in the quality of our air. It is now up to the House of Representatives to maintain a commitment to continue these efforts in support of a strong Clean Air Act. In order to reaffirm this commitment, Congressman LEWIS and I are introducing this resolution to further confirm the support of the House of Representratives to maintain the goals and standards of the Clean Air Act. Our "Commitment to the Clean Air Act Resolution of the 97th Congress" seeks to achieve the goals of protecting the right of the American people to breathe clean air. We reaffirm the House of Representatives support for those standards in the Clean Air Act which will keep the air we breathe free from harmful or potentially harmful pollutants. The resolution urges that the necessary standards be in place to protect agricultural productivity from further setbacks due to pollution. We call on Congress to adequately address the proper control and elimination of acid rain in the Clean Air Act through controlling the sources of the emissions. We also recognize that we have made significant progress in reducing the emission levels of automobiles through emission standards already mandated by the Clean Act. We must continue to maintain this progress. The resolution reaffirms the commitment of the House of Representatives to maintain the requirements to protect our existing clean air areas such as national parks and wilderness areas from air pollution and seeks to insure that those toxic hazardous pollutants—some of which are carcinogens—that are serious public health threats will be adequately regulated by the EPA. The resolution also recognizes that by building on the existing record of success and the proven technology, we can attain the goals and intentions of the Clean Air Act.

Congress must continue to support the importance of protecting our air quality as a national priority before it is too late.

At this time I would like to bring to the attention of my colleagues, a copy of the most recent Harris survey on the Clean Air Act as it appeared in the St. Paul Pioneer Press.

[From the St. Paul Sunday Pioneer Press, Oct. 18, 1981]

PUBLIC SHOWS RESISTANCE TO FLEXIBLE POLLUTION STANDARDS

(By Louis Harris)

Prospective amendments to the Clean Air Act, designed to make current air pollution standards more flexible and, in some cases, more relaxed, are meeting stiff public resistance.

As Congress prepares to discuss the extension of the 10-year-old Clean Air Act, an overwhelming 80–17 percent majority of Americans is continuing to oppose changes that will make the anti-pollution law less strict.

Earlier this year, members of the Reagan administration in charge of environmental regulation drew up plans for a measure that would relax many tough anti-pollution laws.

When the Harris Survey and other polls uncovered strong opposition among Americans to making air standards less strict, the administration pulled back from its plan. But in spite of clear public resistance, the administration again is pushing for selective relaxation of the Clean Air Act that was passed in 1970. The law is up for renewal this year.

One of the key changes being advocated by opponents of the current law concerns a consideration of the costs incurred as a result of standards which are set to protect human health. The Reagan administration is considering asking Congress to give EPA officials the option of relaxing these health standards when the costs of implementing them are considered excessive.

By 65–32 percent, a better than 2-to-1 majority of Americans is opposed to relaxing environmental health standards, no matter what the resulting costs may be. Most adamant on this score are residents of the West (opposed by 72–26 percent), people younger than 30 (72–27 percent opposed), women (70–26 percent opposed), those in the $15,000 to $25,000 income bracket (70–28 percent opposed), Catholics (72–26 percent opposed) and liberals (76–22 percent opposed).

Significantly, no major segment of the public is willing to yield on the cost question. It is even opposed by Republicans (by 56–42 percent), conservatives (by 56–41 percent), business executives (by 55–43 percent) and those who voted for Reagan in 1980 (by 56–41 percent).

Six other prospective changes designed to ease air pollution regulations, which were tested in the latest Harris Survey of 1,249 adults nationwide taken between Sept. 19 and Sept. 24, also are rejected:

By 66–29 percent, a majority opposes relaxing "pollution standards to allow power plants to burn higher sulfur content oil and coal."

A 61–34 percent majority rejects the notion of relaxing "national air quality standards."

By 61–36 percent, a majority opposes relaxing "regulations that protect national park and wilderness areas from air pollution."

A 57–37 percent majority is opposed to the federal government postponing "current deadlines for electric companies meeting power plant pollution standards."

By 58–38 percent, a majority rejects the proposal to relax "current auto pollution

standards." The automotive industry, hard hit by competition from Japan and West Germany, has pressed for delays in meeting new auto pollution standards on the grounds that such added costs would hurt the competitive position of American cars.

By 54-42 percent, a majority opposes postponing "the current deadlines for auto companies meeting auto pollution standards." Although Americans show some sympathy for the plight of the auto industry, the desire for clean air runs deeper.

When Americans were asked what ought to be done about renewing the Clean Air Act, 29 percent said the law should be made stricter, 51 percent wanted to keep it as it is and only 17 percent wanted to make it less strict. So, by 80-17 percent, the American people want no part of any effort to ease up on air pollution standards. While this is down marginally from 86-12 percent in May and 82-12 percent in February, public opinion is clear: Air pollution standards should not be relaxed.●

CALL TO CONSCIENCE VIGIL: THE FELDMAN BROTHERS AND THE ABRAHAM STOLAR FAMILY

HON. TOM RAILSBACK

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 21, 1981

● Mr. RAILSBACK. Mr. Speaker, I want to draw attention to the plight of the Feldman brothers, Vladimir and Efim, and the Abe Stolar family who have repeatedly been denied permission to emigrate from the Soviet Union.

Vladimir and Efim Feldman are twin sons of Riva Feldman, now living in New York. Mrs. Feldman first requested permission for her family to leave the Soviet Union in 1970, but was detained until 1980. Soviet authorities did not allow her sons to leave on the ground of "army service," even though I understand that both successfully completed their terms of service.

I am also concerned about Abraham Stolar and his family, especially since he and his son, Michael, are U.S. citizens. In fact, Mr. Stolar was born in my home State of Illinois. Mr. Stolar applied to emigrate with his family to Israel in 1974, received permission to leave in 1975, and then was detained at the last minute because his wife was allegedly engaged in secret work. I have been told that Mrs. Stolar, although working in a chemical factory, was not actually engaged in secret work and that after 7 years her knowledge is obsolete.

Because of Soviet Union signed the Helsinki Accord, it seems to me that allowing the Feldmans and Stolars to leave Russia should not be in question. Detaining these people and many other Soviet Jews is not constructive to Soviet society or to relations between the United States and the Soviet Union.

Efforts to draw attention to the problems of Soviet Jews by Representative MIKE BARNES and organizations like the Chicago Action for Soviet Jewry are commendable. People like Pamela Cohen in Chicago and the Feldmans who live in my district have increased my awareness of the problem, and as a result, I wrote to both President Leonid Brezhnev and Ambassador Anatoly F. Dobrynin regarding the Feldman brothers and the Stolar family. I sincerely hope the efforts of such dedicated people will have an impact on an unnecessarily restrictive Soviet policy.●

MIDDLE EAST STABILITY

HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 21, 1981

● Mr. DORNAN of California. Mr. Speaker, during the recent debate concerning the sale of AWACS to Saudi Arabia, my comments were underscored by the succinct arguments made by Mr. George Will; I commend this penetrating evaluation of the explosive Middle East to my colleagues:

[From Newsweek, Oct. 26, 1981]

WHO IS OUR MIDEAST PILLAR?

(By George F. Will)

As a bass fisherman casting with light line and a high wind, I have produced some dreadful snarls. But I have rarely seen anything as snarled as the AWACS argument. The argument is less about hardware than about the suspicion that there is afoot a radical reorientation of U.S. policy. It is about how much weight the Saudi regime can bear. And it is about adopting the Saudi approach to peace, which means accommodating the group the Saudis sponsor, the PLO.

Regarding AWACS, the Administration has entangled a sensible question (how can we protect Saudi Arabia?) with a nutty question (how can we make Saudi Arabia the center of American policy in the Middle East?). The Administration downgraded Sadat by elevating the Saudis to a "pillar" of U.S. policy. the Shah was a pillar. So was Sadat. Now Saudi Arabia is called a pillar. That reminds me of Lincoln's lesson: if you call a tail a leg, how many legs has a dog got? Five? No, four, because calling a tail a leg does not make it a leg. In any debate about which nation can be counted as a pillar, it cannot hurt to notice the obvious: Israel is the only nation in the region where we know we can land a plane tomorrow.

A Partner? Grasping for ground for praising the Saudis, the Administration cites the Saudi role in the most recent "settlement" in southern Lebanon. But that was a defeat for Israel. The Syrian missiles which precipitated the crisis remain.

The Administration says Saudi Arabia's moderation makes it a plausible partner in a "strategic consensus." But the Administration says Saudi friendship is so tenuous it must be bought with AWACS. Perhaps Saudi Arabia's policy is ambiguous, and it is so because Saudi Arabia's position is ambiguous: for cultural reasons it cannot be pro-Soviet, but for political reasons it dare not be pro-American. However, the premise of the AWACS sale is that the Saudis want to be helpful. The sale needs a new premise unless the Saudis endorse the Camp David process and especially the multinational force for the Sinai.

As Carter did with SALT II, Reagan chose to get into a game of "chicken" with Congress, thereby risking paralysis in government, discord in the country and disrespect in the world. He assumed that Congress, afraid of being blamed for that, would flinch. Reagan's men must not have noted that, regarding SALT II, Congress did not flinch and was not blamed for the damage Carter caused.

The Administration has chosen to poison our politics by impugning the motives of opponents, implying that they are craven about "the Israeli lobby." This libel comes from people inexhaustibly obsequious toward a Saudi regime that molests U.S. interests while refusing even slight compromise to help the President out of the AWACS crisis his men have caused.

At first, a reason for gritting one's teeth and supporting the sale was to prevent the President's Middle East policy from becoming a shambles. But a policy of treating Saudi Arabia as a pillar is inherently a shambles. A remaining reason for approving the sale is that if it is disapproved the Administration may spend three years offering abject apologies to the Saudis.

Speaking of abjection, consider the musings of ex-presidents Ford and Carter in favor of accommodating a terrorist organization, the PLO. The musings are a reminder of why Ford's Presidency made Carter's Presidency possible, and why the country refused to renew either. In their airborne press conference, Carter was in character, laying down the law about abstract "rights" and sermonizing about how Israel is violating "the heritage of the Jews." But Carter is consistent. The logic of his Administration's initial policy of pushing for a "comprehensive" settlement, which would have maximized the leverage of the most extreme party at the table, pointed to an embrace of the PLO. Indeed, Sadat went to Jerusalem to derail Carter's policy. But now Carter and Ford have retreated from solemn commitments. As presidents, Ford and Carter pledged that the United States would not deal with the PLO until the PLO acknowledges Israel's right to exist. But now they have prepared the ground for the burial of those pledges. They have done so while they and the Reagan Administration (which should ponder the fates of Ford and Carter) urge Israel to trust U.S. reliability while the United States arms Israel's enemy.

Keystone: Sadat's death suggested that being America's friend can be fatal. The Administration's solicitousness toward Saudi Arabia suggest that a nation need not be friendly to garner the benefits of U.S. friendship. But if the Administration is determined to treat Saudi Arabia as the keystone of U.S. policy, it must try to sanitize the PLO, which Saudi Arabia finances. Candidate Reagan said: "Unlike President Carter, I have no hesitation branding the PLO as a terrorist organization." President-elect Reagan said: "I think the PLO has proven that it is a terrorist organization." Yet President Reagan allows the PLO to maintain an office in Washington.

Regarding the PLO, Ford and Carter spoke the language of inevitability. An approach to the PLO "has to happen," it "has to take place" (Ford), the dealings "have to be done" (Carter). But if accommodation of

the PLO is, as Ford and Carter say, inevitable, the PLO has no need to abandon the terrorism and intransigence that have won it the status of an inevitability. Heaven preserve us from small minds bandying large notions of what history says "has to take place," and playing fast and loose with the nation's honor. Leaving honor aside, where if frequently has been left, let this be said: our ex-presidents are pushing Egypt toward radicalism and Israel toward South Vietnam's fate.

Bruno Kreisky, Austria's Chancellor, holds the Olympic record for fawning over the PLO, but even he was momentarily sobered by the PLO statement about shaking the hand that pulled the trigger to kill Sadat. When Ford and Carter urged appeasing the PLO, they were flying home from the funeral of a man who opposed the PLO and paid with his life. They could have found a more tasteful time to advocate rewarding those who execrated Sadat while he lived and rejoiced at his death.●

HEARINGS NEEDED TO EVALUATE TOBACCO PROGRAM

HON. FRANK WOLF

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 21, 1981

● Mr. WOLF. Mr. Speaker, I do not smoke and do not condone the habit. I do not have any tobacco farms in my district of northern Virginia. However, I have listened carefully to the debate and have been particularly impressed with the arguments presented by my colleagues, including Mr. CHARLES ROSE of North Carolina and others.

Clearly, this is not a health issue and it is not a smoking issue. It is a referendum on the tobacco allotment or loan program and the system it represents. Once this distinction has been made, I want to express my opposition to the amendment based on my concern over the economic impact of this legislation to Virginia and the rest of the country. When the ripple effect is considered, the impact on store owners, equipment manufacturers, bankers, and scores of others who do business with farmers could be staggering.

For example, Mason Carbaugh, the Virginia Commissioner of Agriculture, informed me that this legislation could result in a total loss to the economy of $1.9 billion per year. The Virginia Farm Bureau Federation agrees with these figures.

Gov. John Dalton announced in April the results of a study conducted by the University of Pennsylvania's Wharton Applied Research Center which further supports these figures. The study shows that tobacco is responsible for more than 1 out of 20 jobs in the Commonwealth and generates compensation totaling over a billion dollars annually.

Although I value all the information supplied to me by organizations both for and against the legislation, I must point out that it would be preferable for Congress to conduct its own investigation in the form of hearings to determine the economic impact. Until this has been done, I have no choice but to use the overwhelming evidence available to support the economy of my State.

In these times of tight budgets for Federal, State, and local governments, it is especially important to consider carefully the economic impact of this type of legislation. I understand, for example, that the allotment or loan program can add between $6,000 and $10,000 per acre to the value of farm land. If this is suddenly reduced, land values will plummet along with property tax revenues. At a time when local governments need funds to support programs that are being rightfully restored to them, they would have less to spend for such things as schools, assistance to the elderly, police, and fire protection.

The intense debate surrounding this matter has also pointed out the need for changes in the loan program, particularly in regard to escalating support prices. Because of my concern over the possible economic impact of such legislation and my desire to have the program evaluated and made more efficient, I have today sent a letter to the chairman of the House Agriculture Committee requesting that hearings be held to address these areas. Until such time as those hearings are held and more information is available, I refuse to gamble my vote on an amendment that could jeopardize the economic health of Virginia and the rest of the country and hurt countless small farmers in the process.●

ANWAR SADAT: A GIANT AMONG MEN

HON. DAN COATS

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 21, 1981

● Mr. COATS. Mr. Speaker, Anwar Sadat was a giant among men and we are all lesser today for his death.

His assassination is a grave blow to Egypt, places the fragile Israeli-Egyptian peace treaty in jeopardy and plunges the entire Middle East into a dangerous new crisis.

These awesome consequences are, in themselves, the measure of Sadat's greatness. As a human being and as a statesman, he made inspired contributions to lifting Egypt out of poverty and toward securing and consolidating peace in the volatile Middle East.

Sadat was a courageous apostle of peace. Where others carried only hatred in their hearts, he carried compassion and offered compromises. Where others approached negotiations with suspicion and the animosity of the past, he brought patience and forbearance.

When most Arab leaders called for the eradication of the State of Israel, Sadat extended the hand of peace. Sadat was among the first to recognize the importance of including all sides of the Middle East dispute in the peace talks.

No man possessed greater courage than Anwar Sadat. He was a good friend to the American people and we shall miss him deeply.

Sadat rose from poverty, moved into the ranks of the revolutionaries, emerged from the shadow of his friend and leader, President Gamal Abdel Nasser, and went on to become not only a world leader but the most powerful figure the Arab World had seen in generations.

When Nasser died of a heart attack on September 28, 1970, few believed anyone could fill his shoes—much less the little-known politician named Anwar el-Sadat, the vice president.

But in less than 3 years in office, Sadat showed his determination to achieve a position of leadership among his people by accomplishing what his predecessor could not. While Nasser had led the Arabs in battles in the 1967 war against Israel which ended in humiliation for Egypt, Sadat was able to lead Egypt to restore a sense of pride in the Egyptian people through his bold initiatives against Israel. The Egyptian successes, though limited, prompted Sadat to trumpet: "This was a glorious Arab victory."

The true measure of Anwar Sadat was in his determination not to be memorialized as a military leader, but as a statesman for peace.

He saw himself as a statesman and after the war, he vowed to go to the ends of the Earth—"even to the Israeli (parliament)" to discuss peace, if it saved even one Egyptian soldier's life.

By then, Sadat had committed another bold act—against the Soviet Union. He gave the boot to the Soviet ambassador, six other diplomats, and 700 advisers, although the U.S.S.R. had invested billions of dollars in a dam and other projects vital to economic upgrading in the land of the Nile.

At the same time, Sadat began an unprecedented era of friendship with the United States. He invited European and American firms to do business in Egypt under his new economic liberalization policy.

Then came Sadat's trip to Israel that shattered Arab precedent and horrified other Arab leaders. It was followed by Prime Minister Menachin Begin's own precedent-shattering journey to Egypt and led to the 1978 U.S.-mediated Camp David accords. Sadat, who shared the 1978 Nobel Peace Prize with Begin, will long be remembered for his November 1977 trip to

Israel, which helped make possible the September 1978 Camp David peace agreement.

It is true that it takes two to make a peace pact, and Sadat's cosigner on the Camp David accords, Begin, also took a brave gamble as well. But Sadat had to summon that special courage needed to walk away from longtime friends and allies when they are wrong, such as those in the Arab and Communist worlds who had stood with Egypt through the Yom Kippur War, and to pursue peace alone. This is why President Sadat was so widely loved and admired. It is also why he was so feared and, ultimately, why he was struck down.

Sadat became a hero of the West in the true sense of the word. He endeared himself to Americans even more last year during the Iranian hostage crisis and incurred the futher enmity of Arab nations.

It was Sadat who launched the huge task of transforming Egypt from a peasant economy toward its present modernization. It was Sadat who retrieved control of his country from Moscow's long grasp and directed Egypt into a firm relationship with the United States. It was Sadat who recognized the pointlessness of recurring wars with Israel and—on his own initiative—made the historic journey to Jerusalem just under 4 years ago to make his separate peace.

It can truly be said that President Sadat was a man that walked alone. And behind him he leaves a void. Sadat lived as a hero whose bold actions courted a fate that he must have known would end in violent death. Yet, for the cause of peace, this is the path he chose. Such a path is seldom chosen, and when someone of the stature of Anwar Sadat no longer travels this road, the world becomes a much more dangerous place.●

TOUCHDOWN CLUB TRIBUTE TO DARRYL STINGLEY

HON. WALTER E. FAUNTROY

OF THE DISTRICT OF COLUMBIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 21, 1981

● Mr. FAUNTROY. Mr. Speaker, I am privileged today to bring to the attention of my colleagues that on Friday, October 23, 1981, The Touchdown Club of Washington will present its Gene Brito Achievement Award to former National Football League player Darryl Stingley.

The award is given to an individual who has demonstrated "great faith, perseverance, and fortitude." Darryl Stingley is the epitome of this standard.

In 1973 Stingley was the 19th player selected in the NFL college draft by the New England Patriots. He had 5 outstanding playing years, from 1974 through 1977, compiling stunning statistics during 60 games: 110 pass receptions netting 1,883 yards; an average of 19.1 yards per catch (longest gain of 68 yards); and 14 touchdowns.

During a 1978 preseason football game with the Oakland, Raiders, Stingley suffered a crippling spinal cord injury that ended his football carreer and has left him unable to walk.

Darryl Stingley, though, has risen above his injury and overcome his handicap. With the support and encouragement of family, friends and former teammates, plus an unyielding faith, determination, and courage, Darryl has rehabilitated himself to resume his football career in another direction—as executive director of player personnel for the Patriots.

I believe Darryl Stingley exemplifies the spirit of hope, self-confidence, and undaunted will which abounds in our country and gives me assurance that we as a nation can, if we have the heart of a Darryl Stingley, overcome anything.

In this the International Year of the Handicapped, I invite you to join me in saluting the inspirational accomplishments of Darryl Stingley.●

BUFFALO, N.Y., BUSINESSMAN CITED FOR SERVICE

HON. HENRY J. NOWAK

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 21, 1981

● Mr. NOWAK. Mr. Speaker, next week, the board of trustees of the Theodore Roosevelt Inaugural Site Foundation will present their annual Exemplary Citizenship and Service Award to Mr. Frank D. Leavers, a Buffalo, N.Y., businessman who has been active for many years in a broad range of community affairs.

The foundation administers the operation of the Theodore Roosevelt Inaugural National Historic Site in my hometown of Buffalo, under a cooperative agreement with the National Parks Service. The site is the former Wilcox Mansion on Delaware Avenue, where Theodore Roosevelt took the oath of office as the 26th President of the United States after the assassination of President William McKinley in 1901.

A distinguished citizen, Mr. Leavers served as president of the foundation for many years and was in the forefront of community leaders who worked to preserve the inaugural site as an important part of the heritage of our city, State, and Nation.

Having known Frank Leavers for many years, I can attest to the fact that this Exemplary Citizenship and Service Award is truly richly deserved. He certainly meets the criteria the board of trustees set for the award recipients, namely:

I. The recipient must be an individual who has or is presently devoting an unselfish share of his or her time to the betterment of the community in such a manner that is in accord with the highest principles of honor and justice.

II. The recipient must be a citizen of the United States whose public and private pursuits are noteworthy for daring and unselfish leadership, unafraid of carping critics and not self-seeking in purpose.

III. The recipient must be a person whose contributions could never be described as commonplace or pedestrian. On the contrary, they must be exemplary and inspirational to any and every American citizen.

IV. The recipient must be a person whose life and work is manifestly in the spirit of that greatest of American Presidents, Theodore Roosevelt, thereby deserving of the Foundation's acclaim.

The following article from the Buffalo Evening News traces some of Frank Leavers' community activities, which have included service on a wide range of civic, nonprofit and community-based organizations and projects.

[From the Buffalo Evening News, Sept. 29, 1981]

ROOSEVELT-SITE GROUP WILL HONOR LEAVERS

Frank D. Leavers will receive the annual Exemplary Citizenship and Service Award next month from the board of trustees of the Theodore Roosevelt Inaugural Site Foundation.

The presentation will be made at the Theodore Roosevelt birthday dinner Oct. 27 in the Plaza Suite to mark the 123rd anniversary of the birth of the 26th President.

Mr. Leavers played a leading role in developing the Theodore Roosevelt Inaugural National Historic Site, formerly the Wilcox Mansion, 641 Delaware Ave., where Theodore Roosevelt was inaugurated in 1901 after the assassination of President William McKinley.

The award was voted at a recent trustees' meeting and was announced Monday by Barbara B. Brandt, curator of the site.

Mr. Leavers is a former president and director of the Inaugural Site Foundation and is a trustee of the foundation.

Chairman of the board of Leavers & Frank Inc. and Professional Janitorial Supply Inc., 1445 Military Road, Town of Tonawanda, Mr. Leavers has been active in community affairs, serving as a member of the Buffalo area Chamber of Commerce, Buffalo Beautiful Committee and chairman of its Paint-Up Fix-Up Committee.

He was on the Buffalo Transportation Board and the Landmarks Society. In 1964, he received The Buffalo Evening News Outstanding Citizen award.

Mr. Speaker, Frank Leavers' determination and dedication in working to preserve the historically significant Wilcox Mansion—a community treasure—and his continuing efforts to sustain it are a textbook example of good citizenship in action.

Appropriately, this award will be presented next Tuesday, October 27, 1981, at a dinner in Buffalo marking

the 128th anniversary of the birth of Theodore Roosevelt.

T. R. would have been proud of Frank Leavers' doggedness and proud to join in saluting him for this merited honor.●

MONTHLY LIST OF GAO REPORTS

HON. JACK BROOKS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 21, 1981

● Mr. BROOKS. Mr. Speaker, the monthly list of GAO reports includes summaries of reports which were prepared by the staff of the General Accounting Office. The July 1981 list includes:

NATIONAL DEFENSE

Millions Written Off In Former Service Members' Debts—Future Losses Can Be Cut. AFMD-81-64, July 28.

Recruiting Malpractice: Extent, Causes, and Potentials for Improvement. Acc. No. 115872, FPCD-81-34, July 20.

Logistics Planning for the M1 Tank: Implications for Reduced Readiness and Increased Support Costs. Acc. No. 115700, PLRD-81-33, July 1.

Military Contractor-Operated Stores' Contracts are Unmanageable and Vulnerable to Abuse. Acc. No. 115723, MASAD-81-27, July 8.

Manpower Effectiveness of the All-Volunteer Force. Acc. No. 115825, FPCD-81-38, July 15.

Logistics Concerns Over Navy's Guided Missile Frigate FFG-7 Class. Acc. No. 115714, PLRD-81-34, July 7.

Greater Coordination Required in Defense Planning for Intratheater Airlift Needs. Acc. No. 115768, PLRD-81-42, July 9.

Employment Trends and Grade Controls in the DOD General Schedule Work Force. FPCD-81-52, July 28.

Letter Reports

No evidence was found that unauthorized research was being conducted at Army's Laboratories and Research Activities in San Francisco. HRD-81-98, May 29.

The Navy is taking action to improve initial skill training. Acc. No. 115705, FPCD-81-56, June 29.

Initial actions taken by the Office of the Secretary of Defense and the services to inprove coordination and utilization of human resources research have been sound and timely. FPCD-81-62, July 23.

Defense can save time and money by exploring alternatives to construction of new cargo ships for the Rapid Deployment Force. PLRD-81-55, July 27.

The Navy must improve its accountability for conventional ammunition. PLRD-81-54, July 29.

Some training issues affect the quality of the Air Force's initial skill training program and deserve prompt attention. FPCD-81-61, July 29.

ENERGY

Consumer Products Advertised to Save Energy—Let the Buyer Beware. HRD-81-85, July 24.

Improvements Needed in the Nuclear Regulatory Commission's Office of Inspector and Auditor. Acc. No. 115874, EMD-81-72, July 9.

Department of Energy Can Improve Management of the Acquisition of Major Projects. Acc. No. 115816, MASAD-81-33, June 22.

Elimination of Federal Funds for the Heber Project Will Impede Full Development and Use of Hydrothermal Resources. Acc. No. 115707, EMD-81-110, June 25.

Analysis of Trends in Residential Energy Consumption. Acc. No. 115765, EMD-81-74, July 9.

Further Evaluation of the Proposed Interim Consolidation of the Nuclear Regulatory Commission. Acc. No. 115873, EMD-81-76, June 24.

Is Spent Fuel or Waste from Reprocessed Spent Fuel Simpler to Dispose Of? Acc. No. 115813, EMD-81-78, July 12.

NRC Should Specify User Needs and Improve Cost Control for Its Document Control System. Acc. No. 115826, EMD-81-90, June 3.

FERC Should Improve the Natural Gas Well Determination Process. EMD-81-88, July 30.

Letter Reports

Status of strategic petroleum reserve activities. EMD-81-107, June 12.

No Federal agency collects data in a form that can be used to project demand for minerals to various energy technologies. Acc. No. 115818, EMD-81-104, June 25.

Update of cost information on specific aspects of the Clinch River Breeder Reactor Project. EMD-81-112, June 26.

Designation criteria for the Energy Impacted Area Development Assistance Program. Acc. No. 115696, EMD-81-103, June 26.

Department of the Interior needs to reevaluate funding strategically secure and economic research projects for alumina. Acc. No. 115706, EMD-81-96, June 29.

Department of Energy's assignment of operating and testing responsibilities for OTEC-1. EMD-81-92, June 30.

Options for establishing an Energy Conservation Grant Program. EMD-81-115, July 8.

Status of strategic petroleum reserve activities-July 1981 EMD-81-118, July 17.

NATURAL RESOURCES AND ENVIRONMENT

Solid Waste Disposal Practices: Open Dumps Not Identified-States Face Funding Problems. CED-81-131, July 23.

Wyoming Wastewater Treatment Facility Proves Unsuccessful. Acc. No. 115815, CED-81-94, June 15.

Health and Safety Deficiencies Found at Water Recreation Areas. Acc. No. 115814, CED-81-88, June 15.

EPA's New Research Controls: Problems Remain. Acc. No. 114788, CED-81-124, July 14.

AGRICULTURE

Lessons to be learned from Offsetting the Impact of the Soviet Grain Sales Suspension. CED-81-110, July 27.

More Can Be Done to Improve Department of Agriculture's Commodity Donation Program. Acc. No. 115741, CED-81-83, July 9.

Improving Sanitation and Federal Inspection at Slaughter Plants: How to get better results for the Inspection Dollar. CED-81-118, July 30.

Department of Agriculture Needs Leadership in Managing its Information Resources. Acc. No. 115857, CED-81-116, June 19.

Analysis of Certain Aspects of the California-Arizona Navel Orange Marketing Order. Acc. No. 115786, CED-81-129, July 2.

COMMERCE AND HOUSING CREDIT

New Mortgages for Financing Homes Need Uniform and Comprehensive Consumer Safeguards. CED-81-53, July 2.

HUD Should Strengthen Mortgagee Monitoring to Reduce Losses. CED-81-108, June 9.

Consistent Criteria are Needed to Assess Small-Business Innovation Initiatives. Acc. No. 115708, PAD-81-15, July 7.

Better Management of Collateral Can Reduce Losses in SBA's Major Loan Program. Acc. No. 115846, CED-81-123, July 17.

Some Restructuring Needed in District's Contracting Program to Serve Minority Businesses. Acc. No. 115766, GGD-81-68, June 24.

TRANSPORTATION

Transportation Contingency Plans for Future Gas Shortages will not meet Commuter Needs. Acc. No. 115703, CED-81-79, July 1.

Controller Staffing and Training at Four FAA Air Traffic Control Facilities. CED-81-217, July 9.

Management Improvements Needed in Coast Guard Supply System. Acc. No. 115698, PLRD-81-37, July 2.

Letter Reports

FAA has not effectively managed it en route computerized air traffic control system. Acc. No. 115812, AFMD-81-66, June 1.

GAO Found no basis to conclude that the purchase decision of the M/V Cowslip vessel was improper. CED-81-128, June 25.

The Federal Aviation Administration should discontinue research and development on its voice switching and control system (VSCS) and cancel its planned purchase. MASAD-81-37, July 29.

COMMUNITY AND REGIONAL DEVELOPMENT

The Urban and Community Impact Analysis Program, if Retained, Will Need Major Improvements. GGD-81-85, July 23.

SOCIAL SERVICES

Internal Control Weaknesses Contributed to the Mismanagement and Misuse of Federal Funds at Selected Community Action Agencies. Acc. No. 115770, AFMD-81-54, July 10.

Head Start: An Effective Program but the Fund Distribution Formula Needs Revision and Management Controls Need Improvement. HRD-81-83, July 23.

HHS Moves to Improve Accuracy of AFDC Administrative Cost Allocation: Increased Oversight Needed. Acc. No. 115782, HRD-81-51, May 18.

More Can Be Done to Measure HUD's Success in Using Millions of Dollars for Rehabilitating Housing. CED-81-98, July 14.

FEDERAL TMI COMMITMENT: A GAME OF SMOKE AND MIRRORS

HON. ALLEN E. ERTEL

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 21, 1981

● Mr. ERTEL. Mr. Speaker, yesterday the administration finally provided details on its position on assisting in the funding of the cleanup at Three Mile Island unit 2. To most Pennsylvanians' disappointment, it is little more than a smoke and mirrors trick which gives the false impression that a new Federal commitment had been made to assist in the cleanup funding.

Despite Energy Secretary Edwards' rhetoric, the administration has rejected all present plans for the cleanup, including Governor Thornburgh's proposal. In a letter to Pennsylvania Congressmen, Secretary Edwards stated: "It would not be appropriate for the Federal Government to enter into an open-ended commitment to finance a fixed percentage of cleanup costs or to commit funds without regard to whether those funds were to be used for one of the two legitimate Federal responsibilities identified above." These responsibilities were research and development of broad national benefit and isolation and disposal of high level radioactive wastes at TMI. To make matters worse, in addition to rejecting all current plans for funding the cleanup, Secretary Edwards' conflicting statements may well slow down the process of arriving at a meaningful TMI-2 funding solution.

Despite appearances, Secretary Edwards merely restated the previous administration commitment of $123 million over the next few years for TMI-2. The impression conveyed was that there is significant cleanup assistance in the Federal efforts, that yesterday's statement represents new TMI money, and that this is a new Federal TMI initiative. On all counts this is completely inaccurate.

The $123 million is composed of two programs already underway at DOE: $75 million for research and development in fiscal years 1982 through 1984, and $48 million for data acquisition at TMI-2. These are not new initiatives, these are not new funding levels—in fact, some of this money has already been spent, and the whole $123 million has very little value in reducing the costs of the cleanup—DOE and GAO have estimated the cleanup value of this $123 million as only $25 million.

What is this money for specifically? The $75 million, announced last spring, is a 3-year R. & D. program on the damaged reactor core and on high level waste immobilization. Last spring, the administration requested $37 million for its TMI program; of this $27 million was a part of the 3-year $75 million effort. The Congress has already authorized $31 million of the $37 million fiscal year 1982 request. This is certainly not new money.

The $48 million data acquisition part of the $123 million is a commitment entered into by the Carter administration to work with EPRI to collect useful data during the TMI-2 cleanup; $12 million of this was spent in fiscal years 1980 and 1981. The administration last spring requested another $10 million of this for fiscal year 1982 and announced its intention to request $10 million more for each year of the cleanup. DOE acknowledges that this money will not assist or offset the cleanup at all. None of this is new money.

This overall $123 million plan, begun under the Carter administration, has been openly discussed and described for the last 6 months. GAO looked at this plan as a part of their report released last August, entitled "Greater Commitment Needed to Solve Continuing Problems at Three Mile Island," and concluded that DOE was correct in its estimate that the $75 million R. & D. plan would offset the

TMI-2 cleanup costs by about $25 million. Particularly instructive in the debate on whether yesterday's commitment represents anything new is DOE's response to the GAO report, dated August 7, 1981, in which this $75 million R. & D. program is described, as well as the $10 million per year data collection program. DOE Assistant Secretary Heffelfinger's letter states:

> The Department is moving forward with a Three Mile Island research and development program to provide valuable data related to nuclear safety and cleanup technology. This program will also provide technical support to the General Public Utilities Company for prompt, safe and efficient fuel removal and waste handling operations. The Department current projects expenditures of about $75 million over 3 years (beginning this October) for research and development in the fuel and waste processing area, and about $10 million per year to acquire data on radioactivity distribution, electrical equipment performance, and other areas related to nuclear safety.

It is obvious that the administration has rejected Governor Thornburgh's TMI funding plan, as well as all other proposals on the table. In Edwin Meese's letter to the Governor, the administration's view is made clear: The responsibility for the financial burdens created by the TMI accident must rest primarily with those who produced and used the electric power from the facility, not the Federal Government.

Governor Thornburgh's plan required the Federal Government to make a contribution to the cleanup of $190 million. The administration's position offers $25 million for the cleanup, and leaves the Governor $165 million short. The administration has also expressed opposition to a Government program to provide property damage insurance which could also be made available for the TMI cleanup.

By trying to give the opposite impression—that the administration supports the principles of the Governor's plan—the administration has injected new uncertainties into the complex debate on the TMI-2 cleanup funding and made it more difficult for other cost-sharing plans, which do not rely on Federal contributions, to attract the necessary legislative attention. As such, the administration has actually worked against a solution, and thus, increased the risks that a public health and safety hazard will develop, that GPU will go bankrupt, and, ironically, that the Federal Government may be required to pay for the entire cost of the cleanup.

Not only is the Federal commitment not new and provides only $25 million toward the cleanup, it is also not open ended, as some have reported. Secretary Edwards made several unclear statements yesterday which confused the issue. Later, however, DOE Assistant Secretary Shelby Brewer clarified the nature of the commitment and made it clear that it was not open ended. While it was stated that the level of Federal R. & D. expenditures might be increased if it is discovered that the cost of the identified tasks is greater than is now believed, it is also clear that such an eventuality would elevate the overall total cost of the cleanup. The signficance of this is that even if this occurs, the shortfall in the required Federal involvement under the Governor's plan will, at best, remain unchanged, and may well increase if the cost of decontaminating TMI-2 has been underestimated.

We now know what the administration is against—everything that has been proposed to date. We do not know, however, what the administration supports. An answer to this question is critical for any serious progress on the problem. Inaction serves only to make everything worse. As the TV commercial says, you can pay now or you can pay a whole lot more later. Everyone, particularly the Federal Government, pays a far more dear price if the administration does not offer constructive and realistic alternatives to the proposals that it has rejected.●

A SALUTE TO THE PORT AUTHORITY OF NEW YORK AND NEW JERSEY'S GEORGE WASHINGTON BRIDGE AND BAYONNE BRIDGE ON THEIR GOLDEN JUBILEE

HON. FRANK J. GUARINI

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 21, 1981

● Mr. GUARINI. Mr. Speaker, within the next few weeks two golden anniversaries will be celebrated spotlighting the George Washington Bridge and the Bayonne Bridge, built and administered by the Port Authority of New York and New Jersey.

The Port Authority of New York and New Jersey came into existence in 1921 by a compact between New York and New Jersey to advance projects in fields of transportation and world trade and to develop and operate terminals and other facilities of transportation and commerce.

Over the years the port authority has financed, constructed, and currently operates 26 major facilities representing an investment of over $3.7 billion. The Governor of each State appoints one-half of the 12 commissioners to the port authority while reserving the power to veto actions from the commissioners from his State.

There are 7,700 individuals working with the port authority whose compact envisions the operation as financially self-sustaining.

Specifically, I would like to spotlight two anniversaries being celebrated. On October 25, the two-level George Washington Bridge will celebrate its 50th anniversary.

The only 14 lane suspension bridge span in the world it is the longest structure. From tower to tower, the bridge leaps in uninterrupted splendor for 3,500 feet across the Hudson River which flows 250 feet below the span. It is tall and proud and mighty towers stand 600 feet high.

The George Washington Bridge's second level has been known affectionately as "Martha" and is the gateway to the major traffic arteries between New York and New Jersey. It is 119 feet wide and its cables contain 105,000 miles of wire. The annual traffic volume is more than 83 million vehicles, as a contrast on its opening day, October 25, 1931, 55,523 vehicles made the crossing. The busiest single day, November 21, 1978, when 140,290 cars, busses, and trucks were carried eastbound across the Hudson.

Of deep social significance is the strong economic development of Bergen County and its 70 communities because of the George Washington Bridge. Business, industry, population, tax ratables all benefit because of this structure.

Last year, during the water shortage, New York and New Jersey officials sought and obtained permission from the port authority to install 36 inch water pipelines across the bridge to carry water from the Delaware River via upstate New York back across to New Jersey.

The annals of history will show that the bridge was dedicated as a memorial to friendly cooperation between the States of New York Governor Franklin D. Roosevelt and Governor Morgan F. Larsen of New Jersey.

The other anniversary I am spotlighting is the 50th anniversary of the Bayonne Bridge which links Staten Island, N.Y. with Bayonne, N.J. It is the longest steel arch bridge in the world and is considered one of the most spectacular bridges, as its midspan clearance permits ocean going vessels to use this entrance to Port Newark without interference.

The bridge has a 1,675-arch span and is 8,460 feet long with an annual traffic volume of 3,800,000 vehicles. The height of its beautiful arch above water is 327 feet at the crown. From opening day, November 15, 1931, to the end of 1981, the four-lane span has carried 116 million vehicles, and not only helped serve the bistate region and its great ports and modern terminals, it serves the Army and Navy at the Bayonne Military Base and Government facilities on Staten Island. The bridge was authorized by legislation passed in New Jersey and New York in 1925, and represents a port authority investment of $18.4 million.

Appropriate ceremonies have been planned with Federal, State, and local officials to commemorate these anniversaries. I am pleased to have been invited to participate by Port Authority Chairman Alan Sagner to both ceremonies on Saturday, October 24, 1981, at 11 a.m. at the George Washington Bridge plaza, when I will join Gov. Brendan T. Byrne, New York Governor Hugh Carey, Port Lee Mayor Nicholas Corbiscello and New York City Mayor Edward I. Koch, who are scheduled to officiate.

On November 15, 1981, ceremonies spotlighting the Bayonne Bridge anniversary will be held. I shall be pleased to participate with Bayonne Mayor Dennis Collins, and Anthony Gacta, borough president of Staten Island.

A bit of nostalgia was brought to my attention by my administrative aide Neil J. Carroll. Over the weekend he showed me a medal which his father received on the first day of trafffic in 1931. As a motorcycle policeman, Cornelius Carroll led the procession across the great span. Needless to say, this commemorative medal is highly cherished by the Carroll family. Cornelius Carroll rose in ranks to be Bayonne's police chief, and his widow, Susan, a resident of Bayonne, intends to join Neil at the ceremonies.

Webster defines a bridge as a structure spanning and providing transportation over a waterway, railroad, or other obstacle. In my opinion, however, these structures can be described as helping to provide opportunity, challenge, hope, happiness, friendship, courage, patriotism, and brotherhood.

Both structures stand as symbols of inspiration and progress. They are a part of a panorama at sunrise and sunset each day, with their seemingly effortless beauty and charm, with their myriad of lights shining like a giant necklace in celestial beauty. They bathe in symmetry with harmonious balance. Truly they project scenes that no artist can capture.

If it were possible to deliver a message to these works of grandeur, I believe these four lines from Edwin Markham's poem "Advice" would be appropriate:

Stand straight;
Step firmly, throw your weight;
The heaven is high above your head
And the good gray road is faithful to your tread.

I am certain that all my colleagues will join with me in recognizing the outstanding achievements of the Port Authority of New York and New Jersey, and add their voices in praise for current Board Chairman Alan Sagner, and all its Commissioners, officials, and employees, past and present, for a job well done.●

SUPPLY-SIDE ECONOMICS—PART II

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 21, 1981

● Mr. McDONALD. Mr. Speaker, yesterday I offered part I, for my colleagues and any others who might be interested in the full implications of supply-side economics, an in-depth analysis by noted Austrian school economist, Percy Greaves.

We ended yesterday's dissertation by Mr. Greaves, as he introduced the more popular writers on the matter of supply-side economics. As we continue, Percy Greaves gets into the heart of George Gilder's "Wealth and Poverty."

In concluding with part II, Mr. Greaves clearly demonstrates that supply-side economics is nothing more, as he suggests, than a "halfway house" with no "firm foundation." This Nation cannot continue with such philosophy or practice. For that reason I urge all to pay heed to the age-old adage that "he who will not read has no advantage over he who cannot read." The conclusion of Mr. Greaves remarks follows:

Gilder has read widely, but not wisely. While he is not particularly familiar with Mises or any other of the better books, he has read a lot of the leftist books. He disagrees with some of them—the Heilbronners and the Galbraiths. He pokes fun at them constantly, because he does have this faith in capitalism. He considers investment a form of "giving." The investor gives this money to society without any knowledge that he is going to get anything back. He looks down on self interest. He claims "the essence of productive work under capitalism is that it is altruistic." He considers Adam Smith all wrong in his emphasis on self interest. He has faith that capitalism works.

He thinks most investors have that same faith, although on some pages he does admit that some businessmen have self interest in mind. He does not know or understand the role of savings, and he considers government as productive as private industry. He believes government's role includes education, health, environment, public works, hospitals, research and a number of other intangibles. As he has no understanding of monetary theory, he believes that hoarding is a cause of depressions.

One of his solutions is government child allowances as "are currently in effect in most Western industrial nations." He believes that if our government paid child allowances to all families, poor families would have an inducement to get off of welfare because they would still get the family allowances. He approves of anti-discrimination laws and the Department of Energy which he thinks attempts "to disperse" the effects of shortages. He approves of rent control, as he believes it diffuses the effects of housing shortages. He claims that many government jobs are worth subsidizing.

Gilder's solutions are always government payments. We should not let inflation interfere with what he considers essential government projects. Inflation is for him, as it is for too many people, "higher prices," rather than an increase in the quantity of money. He does not consider inflation to be necessarily bad. He tells us it can be a forerunner to a healthy adaptation to new conditions. He holds a theory that inflation precedes all the major steps forward in world history. He claims that inflation is not the prime economic problem because it may be necessary to sustain certain government spending programs. As he phrases it, "To say that the Federal Reserve should not accommodate government spending is, in practice, to say that business should pay." Our inflation began, according to Gilder, with the government's "necessary spending to accommodate the baby boom as it moved into schools and colleges. But then the surge acquired a momentum of its own, impelled as much by political enterprise as by social needs." He opposes the political enterprise but not the so-called social needs.

Like other supply-siders, Gilder considers inflation a tax. He prefers it to high tax rates on business and the rich. He thus considers inflation an acceptable substitute for the high taxes he opposes. When inflation supports government programs, he approves. He prefers inflation to high taxes. "Any attempt to fight inflation by monetary contraction alone," he says, "will cause more destructive, and more permanent inflation." You need inflation, he claims, as a supply-side stimulus. If the "money supply," as he calls it, or the "quantity of money" as I prefer, is constant, then there would be less investment, less production and prices would go up to reflect higher government costs. So for Gilder an expanding quantity of money, that is inflation, makes possible more business activity, more supply and is, therefore, good.

Government, in Gilder's view, is a factor of production which needs to be made more productive. He faults our government for not being as productive as it should be. So, he seeks to make government more productive. The fundamental problem, as he sees it, is not inflation, but collapsing production. What matters is the supply side and he feels our government has fallen short in maintaining as much "supply" as it should.

Gilder maintains there is a free lunch under capitalism. This free lunch is the emotions, the visions, the faith in the ideas that can expand production. He considers both labor and resources "enormously elastic" and the solution is to expand them. Their expansion is, for him, a free lunch. He believes there are limitless returns from the metaphysical capital that he talks about and that tax cuts are the only way to balance the budget. Business, he says, doesn't have to worry about inflation. "It can deal with inflation by raising its prices." Government regulations are needed. They should be adopted whenever the benefits exceed costs. Then, he admits that many costs are impossible to measure.

Glider has one rather startling opinion, but maybe you will like it, Congressman. He says, "Our politicians are our aristocrats." One of our problems is that we do not pay them enough. Senators, governors, mayors and Congressmen should be paid at least four or five times their current salaries. If they were, he believes they wouldn't be so envious of the rich and they would be more in tune with the situation.

Glider has a strong faith or religious belief in capitalism. He believes that capitalism is both altruistic and irrational. He has no understanding of its rationale. On the other hand, he thinks that socialism and

government planning are rational, while he considers planning by individuals irrational. He seems to believe profits are a matter of luck. He does not know the difference between gambling and speculation and he's completely confused on planning, rationality and leadership.

The other book on supply-side economics that I have recently read is Reagonomics. It is getting a lot of favorable publicity. In fact, I would suggest to its author, Mr. Bartlett, or Bruce as I know him, that he ought to be worried that he has gotten so much favorable publicity from publications that do not usually endorse "conservative" causes. However, like the books of Galbraith, it may push the author up into the higher income tax brackets.

Bruce Bartlett came to me about 15 or 16 years ago when he was a junior at Rutgers. He was then writing a paper on Pearl Harbor and he had somehow learned that I knew something about Pearl Harbor. So he came to me for some help. He wrote a reasonably good paper on Pearl Harbor. A few years later he wrote a book on the same subject with many good points. However, he was not entirely happy with my review of it. During his senior year, he became interested in Austrian economics. He again visited me and we discussed economics at some length. I have thought he had read my "Understanding the Dollar Crisis," but his Reagonomics shows little evidence of it. So while Gilder has been coming up from a leftish background to the half-way house of supply-side economics, Bartlett, a prolific writer for conservative publications, has, in my judgment, fallen from some of the sound economics to which he has been exposed.

Bartlett does have a better familiarity with economics than Gilder. Among the good things he tells us is that the production lost due to government interference is part of our tax burden. He also discusses at length the growth of the subterranean economy as a result of present high income tax rates. He wants the government to stop waste, manipulating energy and giving money to the poverty lobby to perpetuate dependency. He opposes many regulations as well as the vast housing subsidies which he says demoralize honest workers. He claims income tax rates over 50 percent are unproductive and that the "wedge" between welfare payments and the pay of working people is too small. He finds that in many cases welfare benefits exceed the net income of the workers. Accordingly, like Gilder, he wants to cut the benefits. None of the supply-siders wants to do away with welfare programs—they just want to reduce the amounts paid. The government is forced, he believes, to help poor people, but it should also, he believes, help capitalist investments. He seeks to cut the highest income tax rates, so that we can have more productivity. He writes about how Kennedy reduced income tax rates from a spread of 20 percent to 91 percent to one of 14 percent to 61 percent. For him, the great proof that this was beneficial is that it increased government revenues. That made it good!

When Bartlett left Rutgers, he became a graduate student in history at one of the Washington universities, Georgetown, I believe. He first got a job with Congressman Ron Paul. When Ron Paul was defeated, he went over to Kemp and become a student of Kemp's. Kemp sold him on his tax-cutting ideas and he helped draft the first of Kemp's tax-cutting bills. He later moved over to Senator Jepsen and is now the Deputy Director of the Joint Economic Committee of the Congress, of which Senator Jepsen is currently the Vice Chairman. In the next session of Congress Jepsen will assume the Chairmanship and Bartlett is slated to become the Director of this important committee. He has gone far, and he has done it to a large extent by accepting and promoting the Kemp premises.

Bartlett tells us that Carter kept one of his promises, the promise to make our income taxes more progressive. He also realizes that Carter sought the so-called "excess profits taxes" on oil companies as a vote-buying fund, somewhat as years ago I witnessed Roosevelt create the social security trust fund as a "kitty" he could spend to keep himself popular. Roosevelt is not worrying about present day social security payments. Neither is Carter such concerned about those of us who have to pay higher prices for gasoline to provide our government with more spending money.

Bartlett scores some good points against Sweden's welfare state. One interesting thing I learned, and I assume it is true, is that in 1978 in Sweden a family of four with an income of $4,600 was given benefits that brought their income up to $14,000. At the same time, a similar family with an income of $23,000 was brought down by taxes to $14,000. So families with earned incomes between $4,600 and $23,000 were allocated the same incomes. That is socialism with a vengeance.

Bartlett does say that some government spending must be cut. He hopes that the tax cuts will persuade people to switch from leisure to work and from consumption to savings. Like Gilder, he looks on inflation as a tax. He believes it is primarily a tax on cash balances and bond holders. He feels it is better to tax them than to tax the producers of wealth. He apparently has little idea of how inflation disorganizes the entire economy.

Bartlett is mixed up on Keynes. Keynes' cure for inflation, he says, was a recession. Keynes' cure for inflation was more inflation. Too little, too late, was his idea. Actually, a recession is the necessary free market correction of the problems created by inflation. You cannot correct or stop inflation without those people first receiving the inflated quantities of money losing that source of funds and those who have been selling to them losing them as customers. The beneficiaries of inflation then have to readjust to reality. A recession, thus, is a necessary readjustment if you are ever going to end inflation. But the supply-siders do not seem to know this, or realize it, or care about it.

Although all of the supply-side arguments are against the marginal tax rates on the upper brackets and particularly the tax on capital gains, they endorse progressive taxation. They do not know what inflation is. They talk about inflation as higher prices, whereas the only meaningful definition is an increase in the quantity of money. They are also confused about the econometric models they now have which, of course, cannot spill out anything but what is put into them.

Bartlett has a whole chapter on the Mellon tax reductions of the 1920s, without mentioning the inflation that accompanied them or the fact that Mellon started with a balanced budget. He does show that Treasury revenues rose each time Mellon cut tax rates—the high rates of World War I. He has more to say about Kennedy's tax reductions, which I have already covered.

Bartlett does not seem to realize that the chief benefits of reducing capital gains taxes are primarily that it unlocks capital and permits investments to be transferred to where they can better satisfy customers. He thinks of such a tax reduction merely as a means of increasing income for the government. More revenue for the government is the prime drive of all supply-siders.

Bartlett says nothing about the labor unions or the double taxes on dividends. He prefers inflation to a balanced budget or high taxes. Although all of his arguments in favor of tax reductions concern the higher tax rates and capital gains, he and the other supply-siders reach the illogical conclusion that the tax reductions must be across the board. He also wants to index income tax rates. He says it is "unlikely" that we shall stop inflation. So, in his words, "indexation will eliminate the pain of inflation."

Let me show you what some of our young people are thinking of the late President Franklin D. Roosevelt by reading a paragraph from Bartlett's book. Remember he belongs to a generation born long after the New Deal. Such generations have no personal knowledge or memory of the New Deal as do those of us who have reached my ripe old age. This is what he has to say about Roosevelt:

"In the 1932 election, when the Socialist Party received almost a million votes, or more than 6% of Herbert Hoover's total, the specter of socialism as a threat to the established order was driven home forcefully. Roosevelt, it can now be seen, was at heart a conservative, in the sense that he opposed socialism and radical change. (Anyone who does not believe this should read some of the 1932 campaign speeches or the 1932 platform of the Democratic Party.) But he understood, perhaps more clearly than is possible today, that socialism represented a threat to the system. His response was to move away from laissez-faire toward a more activist role for government in the economy. Roosevelt understood that, unless government was able to deal with the Depression (or at least give the appearance of doing so), socialism might triumph. Although his policies were unsuccessful in ending the Depression—the economy was worse off in 1937 than it was in 1932—Roosevelt was totally successful in conveying the view that government could deal with the situation within the context of capitalist democracy."

There you have another one of their popular errors. They all think democracy is wonderful. They do not know our Founding Fathers opposed democracy, so they created a republic. They have no understanding that democracy would eliminate the Bill of Rights.

Going back to the quote. Note this last sentence:

"The socialists were destroyed."

Now that is news to me, and I think it is to many of you. Socialism destroyed and by Franklin D. Roosevelt!

This paragraph reflects no realization that Roosevelt scrapped his Party's 1932 platform and gave us a radical avalanche of regulatory agencies starting with the triple "A" and winding through the entire alphabet by the unconstitutional NRA to the WPA, and is executive-created Youth Administration.

To sum up, we have let the jinni out of bottle as far as this off-the-books economy is concerned. More and more income producing activities go unreported. It is going to be very difficult for people to drop that habit. The supply-siders seek income tax

cuts across the board as a panacea. They believe such cuts will increase government revenues, which they consider more important than balancing the budget. They oppose some Keynesian subsidies for "demand" while endorsing government assistance for "supply." For them, inflation, which is ruining our economy, is not necessarily bad, particularly when the politically created dollars are used to support welfare state programs and permit tax reductions which they hope will encourage business and the rich to increase "supply." They have no program for solving our mass unemployment. They want to reduce, but not eliminate, regulation, food stamps, unemployment subsidies, government welfare, and the progressive income tax. Their half-way house has no firm foundation. They have little understanding of basic economics or the essential elements of a free society. They are all for "democracy." They have no thoughts of returning our country to the pre-New Deal concepts of a limited constitutional government. They just want to cut taxes across the board so that government can have more revenues!

Thank you!●

LOCKS, DAMS, RIVER TAX MAY SINK NO. 1 INLAND PORT

HON. JOSEPH M. GAYDOS

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 21, 1981

● Mr. GAYDOS. Mr. Speaker, this past August the U.S. Army Corps of Engineers officially credited the Port of Pittsburgh, Pa., as the Nation's No. 1 inland port.

The corps reported that in 1979, the last year for which figures are available, the port handled nearly 41 million tons of freight. That is 19 million tons more than its closest competitor and the tonnage was exceeded by only 12 seaports in the Nation. Furthermore, the total tonnage for the entire Port of Pittsburgh region, which includes West Virginia's northern panhandle and Ohio sections, was a record 72.5 million tons, a figure topped by only five of the seaports.

Products accounting for this overall total included: Coal, 51.6 million tons; oil/gasoline, 5.9 million tons; sand/gravel/crushed rock, 5.5 million tons; iron/steel, 4.1 million tons; chemicals, 2.5 million tons; coke, 369,973 tons; and other commodities, 2.4 million tons.

Those figures make very clear the importance of the Port of Pittsburgh to the Nation's inland waterways system and they should emphasize how vital it is to the national interest that we maintain a highly efficient and smoothly operating network of inland ports. The rivers are much more than merely a major economic generator.

They provide energy efficient transportation, commercially as well as recreationally. They are a key element in national defense, a source of water for industrial plants and communities located along their banks and the economic base upon which thousands of cities and towns are built.

The Port of Pittsburgh, as recognized by the Corps of Engineers, now stands as a titan among the Nation's inland ports. It would be tragic, therefore, were it permitted to become an industrial *Titanic*, frantically sending out SOS's while sinking slowly beneath the waters of neglect, delay, and inaction.

But, that is precisely what could happen, Mr. Speaker, if the Federal Government continues its policy of benign neglect toward the locks and dams so critical to the shipment of goods along the river. It is precisely what could happen if the Federal Government, in its desperate search to find new revenue to offset huge tax cuts, should take it upon itself to levy unfair, unwarranted, and unbearable new taxes upon the users of these rivers.

The fact is the locks and dams along the network of rivers, particularly in the upper Ohio River region, are deteriorating rapidly and despite continued pleas for assistance the Government has ignored the situation. Instead, in recent years it has concentrated on creating a new source of revenue from the rivers, departing from a century-old policy in the process.

On April 7, 1981, I inserted into the RECORD a detailed summary of the serious condition of some 30 locks and dams along the Ohio, Allegheny, Monongahela, and Kanawha Rivers. In that summary, it was pointed out the projected lifespan of these structures, when they were built, was 50 years ago. Yet, the average age of the structures mentioned already exceeded 50 years and one was pushing 75.

These aging and crumbling locks and dams are hardpressed to handle the volume of traffic which passes through them today. Experts agree they will, in their present condition, be incapable of meeting the challenges they will face tomorrow as the Nation moves forward in its campaign to increase productivity in the face of growing foreign competition.

Minor disruptions in the moving of products shipped by river cause mammoth problems and monstrous cost increases. For example, this summer new gates had to be installed on one of the locks. The construction lasted just 2 weeks but shippers were delayed 30 hours or more per trip. Translated into direct and indirect costs, these delays cost the companies shipping by river more than $50 million.

The solution, of course, would be to replace most, if not all, of the existing locks and dams. The cost of such a program, however, has not been seriously contemplated nor calculated to my knowledge. But, it has been estimated that replacement of just three of the locks would cost between $2 and $3 billion. But, as critical as those funds are to the national interest, there seems to be little enthusiasm to provide them.

Mr. R. Barry Palmer, executive director of DINAMO, a four-State regional association of business, labor, and government representatives formed to focus attention on the disintegration of the locks and dams, explained the seriousness of the situation.

Mr. Palmer observes:

> The economic future of the entire region is at stake. If we have any hope for the development of Eastern coal as a valuable export commodity, if we have any hope of developing a significant alternate fuel industry, if we want to maintain any kind of competitive position for steel and other heavy industries here, we have to improve the (river) facilities needed to get our goods to market.

In the past, Mr. Speaker, the improvement of these facilities has been far easier said than done. The Corps of Engineers repeatedly has submitted plans for major repairs to the locks and dams but, except for emergencies, funding has not been forthcoming. In fact, no waterway modernization project has been approved for construction in the region since 1964, according to DINAMO.

It was for that reason I introduced H.R. 3619 last spring. This legislation authorized critically needed navigation improvement projects along the Monongahela and upper Ohio Rivers. On June 3, the legislation was referred to the Office of Management and Budget for comment.

Frankly, I am reluctant to hazard a guess as to what OMB's comments might be in view of that agency's burning desire to slash budgetary funds in all areas except the military. This feeling is reinforced by reports the administration will renew its request to Congress, submitted earlier this year, to establish a new schedule of user charges for commercial vessels on the rivers. The proposal seeks to recover from the users a substantial portion of the costs for dredging, construction, and maintenance of river channels, locks, dams, and ports.

Despite my misgivings, however, I hold out hope that OMB will recognize that by clamping too tight a lid on the spending of Federal money to replace the crumbling system of locks and dams it might well be pulling the plug on the waterway industry's ability to help build a new beginning for America.●

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint com-

mittees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of the meetings, when scheduled, and any cancellations or changes in the meetings as they occur.

As an additional procedure along with the computerization of this information, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Any changes in committee scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Thursday, October 22, 1981, may be found in the Daily Digest of today's RECORD.

MEETINGS SCHEDULED

OCTOBER 23

9:30 a.m.
Finance
Energy and Agricultural Taxation Subcommittee
To hold hearings on miscellaneous tax proposals.
2221 Dirksen Building

10:00 a.m.
Energy and Natural Resources
To continue hearings on S.J. Res. 115, approving the President's recommended waiver of law to expedite the construction and initial operation of the Alaska Natural Gas Transportation System.
3110 Dirksen Building

Judiciary
Criminal Law Subcommittee
To hold hearings to discuss the final report of the U.S. Attorney General's task force on violent crime.
2228 Dirksen Building

Labor and Human Resources
Education Subcommittee
To hold hearings on the proposed Pell Grant Family Contribution Schedule, providing assistance to college students from low-income families.
4232 Dirksen Building

11:00 a.m.
Foreign Relations
To hold hearings on the nominations of John D. Negroponte, of New York, to be Ambassador to Honduras, and Robert C. McEwen, of New York, to be a U.S. Commissioner on the International Joint Commission, United States and Canada.
4221 Dirksen Building

OCTOBER 26

9:30 a.m.
Banking, Housing, and Urban Affairs
To hold hearings on the use of Defense Production Act authorities to stimulate domestic production of cobalt.
5302 Dirksen Building

*Environment and Public Works
Nuclear Regulation Subcommittee
To hold hearings on S. 1662, establishing a Federal program for the interim storage and permanent disposal of high level nuclear waste from civilian powerplants.
4200 Dirksen Building

10:00 a.m.
Energy and Natural Resources
To resume hearings on S.J. Res. 115, approving the President's recommended waiver of law to expedite the construction and initial operation of the Alaska Natural Gas Transportation System.
3110 Dirksen Building

*Judiciary
Juvenile Justice Subcommittee
To hold hearings on S. 1688, proposed Career Criminal Life Sentence Act.
2228 Dirksen Building

1:00 p.m.
Finance
Estate and Gift Taxation Subcommittee
To hold hearings on S. 1695, repealing the generation skipping transfer tax, S. 649, amending current estate tax laws to ease the burden of inheritance taxes for the heirs of artists, and reversing the decline in donations of art to nonprofit institutions, S. 851 and S. 852, bills increasing the amount artists may deduct in taxes for their charitable contributions, and S. 1733, providing a procedure for determining the fair market value of certain assets for estate tax purposes, and providing for declaratory judgments relating to installment payment of estate tax.
2221 Dirksen Building

OCTOBER 27

9:00 a.m.
Governmental Affairs
To resume hearings to examine the acquisition process of the Department of Defense.
3302 Dirksen Building

*Labor and Human Resources
To hold hearings on S. 1483, proposed Radiation Exposure Compensation Act.
4232 Dirksen Building

9:30 a.m.
Banking, Housing, and Urban Affairs
To resume hearings on S. 1686, S. 1703, S. 1720, and S. 1721, bills promoting competition among certain financial institutions, expanding their range of services, and protecting the depositors and creditors of such institutions.
5302 Dirksen Building

Small Business
To hold oversight hearings on implementation of the Small Business Administration's direct loan program.
424 Russell Building

10:00 a.m.
Energy and Natural Resources
Energy and Mineral Resources Subcommittee
To hold hearings on S. 1516, to expedite exploration and development of geothermal resources.
3110 Dirksen Building

Environment and Public Works
To hold hearings on the nominations of Robert A. Jantzen, of Arizona, to be Director of the U.S. Fish and Wildlife Service, Department of the Interior, and Carlos C. Campbell, of Virginia, to be Assistant Secretary of Commerce for Economic Development.
4200 Dirksen Building

Judiciary
Business meeting, to consider pending calendar business.
2228 Dirksen Building

10:30 a.m.
Commerce, Science, and Transportation
To hold hearings on the nominations of Sonia Landau, of New York, and R. Kenneth Towery, of Texas, each to be a member of the Corporation for Public Broadcasting.
235 Russell Building

1:00 p.m.
Foreign Relations
To hold hearings on the proposed Convention on the Conservation of Antarctic Marine Living Resources (Ex. X, 96th Cong., 2d sess.).
4221 Dirksen Building

2:00 p.m.
Foreign Relations
To hold hearings on the nominations of Jean B. S. Gerard, of New York, for the rank of Ambassador during tenure of her service as Permanent Representative to the United Nations Educational, Scientific, and Cultural Organization (UNESCO), Geoffrey Swaebe, of California, to be U.S. Representative to the European Office of the United Nations, with the rank of Ambassador, Frank Shakespeare, of Connecticut, to be a member of the Board for International Broadcasting, and Mark Goode, of California, to be a member of the Board for International Broadcasting.
4221 Dirksen Building

Judiciary
To hold oversight hearings on merger policy in the private sector.
2228 Dirksen Building

OCTOBER 28

9:30 a.m.
Banking, Housing, and Urban Affairs
To continue hearings on S. 1686, S. 1703, S. 1720, and S. 1721, bills promoting competition among certain financial institutions, expanding their range of services, and protecting the depositors and creditors of such institutions.
5302 Dirksen Building

Foreign Relations
International Economic Policy Subcommittee
To hold hearings on international investment policy.
4221 Dirksen Building

Governmental Affairs
Permanent Subcommittee on Investigations
To resume hearings on alleged corruption in the International Longshoreman's Association's influence and control over the waterfront industry along the east and gulf coasts.
3302 Dirksen Building

Labor and Human Resources
Business meeting, to consider the nominations of John R. Van de Water, of California, to be a member of the National Labor Relations Board, and C. Everett Koop, of Pennsylvania, to be Medical Director in the Regular Corps of the Public Health Service, and to be Surgeon General of the Public Health Service.
4232 Dirksen Building

10:00 a.m.
Agriculture, Nutrition, and Forestry
To receive a briefing from Secretary of Agriculture John R. Block on the administration's soil conservation policy.
324 Russell Building

Commerce, Science, and Transportation
Consumer Subcommittee
To hold hearings on Senate Concurrent Resolution 33, disapproving the Federal Trade Commission Trade Regulation Rule relating to the sale of used motor vehicles.
235 Russell Building
Energy and Natural Resources
Business meeting to consider pending calendar business.
3110 Dirksen Building
Governmental Affairs
To hold hearings on S. 864, to require each executive agency to submit an annual report to the President on the adequacy of its internal accounting and administrative control systems.
Room to be announced
Judiciary
Juvenile Justice Subcommittee
To hold oversight hearings on activities of the Office of Justice Assistance, Research, and Statistics, Department of Justice, focusing on Federal assistance to State and local law enforcement.
5110 Dirksen Building
*Labor and Human Resources
Labor Subcommittee
Business meeting, to consider S. 1182, improving the administration of the Longshoremen's and Harbor Workers' Compensation Act by removing certain inequities, reducing incentives for fraud and abuse, and assuring immediate compensation benefits and competent medical treatment for injured employees.
4232 Dirksen Building

11:00 a.m.
Agriculture, Nutrition, and Forestry
To hold hearings on administration recommendations for a comprehensive soil and water resources conservation program to increase America's food production capability.
324 Russell Building

2:00 p.m.
Select on Ethics
To hold a closed business meeting on pending committee business.
6228 Dirksen Building

OCTOBER 29

9:30 a.m.
Banking, Housing, and Urban Affairs
To continue hearings on S. 1686, S. 1703, S. 1720, and S. 1721, bills promoting competition among certain financial institutions, expanding their range of services, and protecting the depositors and creditors of such institutions.
5302 Dirksen Building
Commerce, Science, and Transportation
Business, Trade and Tourism Subcommittee
To hold hearings on S. 1256, to regulate interstate commerce by protecting the rights of consumers, dealers, and end users.
235 Russell Building
Governmental Affairs
Permanent Subcommittee on Investigations
To continue hearings on alleged corruption in the International Longshoremen's Association's influence and control over the waterfront industry along the east and gulf coasts.
224 Russell Building
Judiciary
Courts Subcommittee
To hold hearings on the future income of individuals claiming bankruptcy.
5110 Dirksen Building
Labor and Human Resources
Education Subcommittee
To hold oversight hearings on title III of the Higher Education Act (Public Law 96-374), relating to developing institutions.
4232 Dirksen Building
Special on Aging
To hold hearings on the Federal role in promoting greater opportunities for older workers.
6226 Dirksen Building

10:00 a.m.
Energy and Natural Resources
Public Lands and Reserved Water Subcommittee
To hold hearings on S. 625, revising the boundary of Voyageurs National Park in the State of Minnesota.
3110 Dirksen Building
Environment and Public Works
To hold hearings on S. 1706, S. 1709, and S. 1718, bills strengthening environmental protection laws.
4200 Dirksen Building
Foreign Relations
To hold hearings on the foreign policy and arms control implications of the President's strategic weapons proposals.
4221 Dirksen Building
Governmental Affairs
To resume oversight hearings on the congressional budget process.
3302 Dirksen Building
Judiciary
*Immigration and Refugee Policy Subcommittee
To hold hearings on granting amnesty to certain illegal aliens.
2228 Dirksen Building

2:00 p.m.
Energy and Natural Resources
*Energy Regulation Subcommittee and Water and Power Subcommittee
To resume joint oversight hearings on hydroelectric development and related licensing procedures.
3110 Dirksen Building

OCTOBER 30

9:30 a.m.
Banking, Housing, and Urban Affairs
To continue hearings on S. 1686, S. 1703, S. 1720, and S. 1721, bills promoting competition among certain financial institutions, expanding their range of services, and protecting the depositors and creditors of such institutions.
5302 Dirksen Building

10:30 a.m.
Foreign Relations
To hold hearings on the nomination of L. Ebersole Gaines, of Idaho, to be Executive Vice President of the Overseas Private Investment Corporation (OPIC).
4221 Dirksen Building

NOVEMBER 3

9:30 a.m.
Labor and Human Resources
Investigations and General Oversight Subcommittee
To hold oversight hearings on the activities of the National Cancer Institute.
4232 Dirksen Building

10:00 a.m.
Environment and Public Works
Business meeting, to consider pending calendar business.
4200 Dirksen Building

NOVEMBER 4

9:00 a.m.
Governmental Affairs
Intergovernmental Affairs Subcommittee
To resume oversight hearings on fiscal disparities within the Federal budget system.
357 Russell Building
Labor and Human Resources
*Labor Subcommittee
To hold hearings on S. 1541, proposed Retirement Income Incentives and Administrative Simplification Act.
4232 Dirksen Building

9:30 a.m.
Judiciary
Constitution Subcommittee
To resume hearings on Senate Joint Resolution 110, Senate Joint Resolution 17, Senate Joint Resolution 18, and Senate Joint Resolution 19, measures amending the Constitution to establish legislative authority in the Congress and the States with respect to abortion.
2228 Dirksen Building

10:00 a.m.
Energy and Natural Resources
Business meeting to consider pending calendar business.
3110 Dirksen Building
Small Business
Advocacy and the Future of Small Business Subcommittee
To resume hearings to examine effects of government competition on small business.
424 Russell Building

NOVEMBER 5

9:00 a.m.
Commerce, Science, and Transportation
To hold hearings on S. 709, requiring a refund value for certain beverage containers, and prohibiting the sale of metal beverage containers with detachable openings.
235 Russell Building
Governmental Affairs
To resume hearings to examine the acquisition process of the Department of Defense.
3302 Dirksen Building

9:30 a.m.
Veterans' Affairs
To hold oversight hearings on the VA's Department of Medicine and Surgery's implementation of the Office of Management and Budget's circular A-76, providing for the contracting out of certain government services.
412 Russell Building

10:00 a.m.
*Energy and Natural Resources
To hold oversight hearings on the implementation of title I, establishing wellhead prices for natural gas, of the Natural Gas Policy Act (Public Law 95-621).
3110 Dirksen Building
Judiciary
Juvenile Justice Subcommittee
To hold hearings to examine the impact of media on juveniles.
6226 Dirksen Building

NOVEMBER 6

9:30 a.m.
Judiciary
Constitution Subcommittee
To resume hearings on Senate Joint Resolution 110, Senate Joint Resolu-

tion 17, Senate Joint Resolution 18, and Senate Joint Resolution 19, measures amending the Constitution to establish legislative authority in the Congress and the States with respect to abortion.
2228 Dirksen Building

10:00 a.m.
*Energy and Natural Resources
To continue oversight hearings on the implementation of title I, establishing wellhead prices for natural gas, of the Natural Gas Policy Act (Public Law 95-621).
3110 Dirksen Building

Labor and Human Resources
Investigations and General Oversight Subcommittee
To resume oversight hearings on the activities of the National Cancer Institute.
4232 Dirksen Building

NOVEMBER 9

9:30 a.m.
Banking, Housing, and Urban Affairs
To hold hearings on the use of Defense Production Act authorities to stimulate domestic production of titanium.
5302 Dirksen Building

Labor and Human Resources
Labor Subcommittee
To resume hearings on S. 1541, proposed Retirement Income Incentives and Administrative Simplification Act.
4232 Dirksen Building

NOVEMBER 10

8:30 a.m.
Energy and Natural Resources
Energy and Mineral Resources Subcommittee
To hold oversight hearings on America's role in the world coal export market.
3110 Dirksen Building

9:30 a.m.
Commerce, Science, and Transportation
Surface Transportation Subcommittee
To hold oversight hearings on the implementation and effects of the Staggers Rail Act of 1980 (Public Law 96-448), reducing ICC regulations of the railroad industries and providing opportunities for railroads to improve their financial viability.
1318 Dirksen Building

Labor and Human Resources
To resume hearings on S. 234, to encourage the establishment of home health care programs and to provide expanded coverage of home health services under the medicare and medicaid programs.
4232 Dirksen Building

10:00 a.m.
Environment and Public Works
Business meeting, to consider pending calendar business.
4200 Dirksen Building

*Governmental Affairs
Energy, Nuclear Proliferation, and Government Processes Subcommittee
To hold hearings on S. 1226, establishing the National Nuclear Property Insurance Corporation, and providing supplemental insurance coverage for certain cleanup costs following damage to nuclear powerplants.
Room to be announced

NOVEMBER 11

10:00 a.m.
Energy and Natural Resources
Business meeting, to consider pending calendar business.
3110 Dirksen Building

NOVEMBER 12

9:30 a.m.
Judiciary
Constitution Subcommittee
To resume hearings on Senate Joint Resolution 110, Senate Joint Resolution 17, Senate Joint Resolution 18, and Senate Joint Resolution 19, measures amending the Constitution to establish legislative authority in the Congress and the States with respect to abortion.
2228 Dirksen Building

Labor and Human Resources
Labor Subcommittee
To resume hearings on S. 1541, proposed Retirement Income Incentives and Administrative Simplification Act.
4232 Dirksen Building

10:00 a.m.
Judiciary
Criminal Law Subcommittee
To resume hearings on S. 101 and S. 751, bills to eliminate or establish an alternative to the exclusionary rule in Federal criminal proceedings.
5110 Dirksen Building

2:00 p.m.
Judiciary
Criminal Law Subcommittee
To continue hearings on S. 101 and S. 751, bills to eliminate or establish an alternative to the exclusionary rule in Federal criminal proceedings.
5110 Dirksen Building

NOVEMBER 13

10:00 a.m.
Energy and Natural Resources
*Energy and Mineral Resources Subcommittee
To resume oversight hearings on America's role in the world coal export market.
3110 Dirksen Building

NOVEMBER 16

1:30 p.m.
Judiciary
Constitution Subcommittee
To resume hearings on Senate Joint Resolution 110, Senate Joint Resolution 17, Senate Joint Resolution 18, and Senate Joint Resolution 19, measures amending the Constitution to establish legislative authority in the Congress and the States with respect to abortion.
2228 Dirksen Building

NOVEMBER 17

9:30 a.m.
Agriculture, Nutrition, and Forestry
To hold joint hearings with the Committee on Labor and Human Resources on S. 1442, revising and updating American food safety laws.
4232 Dirksen Building

Labor and Human Resources
To hold joint hearings with the Committee on Agriculture, Nutrition, and Forestry on S. 1442, revising and updating American food safety laws.
4232 Dirksen Building

10:00 a.m.
Environment and Public Works
Business meeting, to consider pending calendar business.
4200 Dirksen Building

NOVEMBER 18

9:30 a.m.
Agriculture, Nutrition, and Forestry
To continue joint hearings with the Committee on Labor and Human Resources on S. 1442, revising and updating American food safety laws.
4232 Dirksen Building

Labor and Human Resources
To continue joint hearings with the Committee on Agriculture, Nutrition, and Forestry on S. 1442, revising and updating American food safety laws.
4232 Dirksen Building

*Veterans' Affairs
To hold oversight hearings on the effects of the use of Agent Orange.
412 Russell Building

10:00 a.m.
Energy and Natural Resources
Business meeting, to consider pending calendar business.
3110 Dirksen Building

NOVEMBER 19

9:30 a.m.
Agriculture, Nutrition, and Forestry
To continue joint hearings with the Committee on Labor and Human Resources on S. 1442, revising and updating American food safety laws.
4232 Dirksen Building

Labor and Human Resources
To continue joint hearings with the Committee on Agriculture, Nutrition, and Forestry on S. 1442, revising and updating American food safety laws.
4232 Dirksen Building

NOVEMBER 24

9:00 a.m.
Governmental Affairs
Intergovernmental Relations Subcommittee
To hold hearings on State implementation of Federal regulations, focusing on standards of the Resource, Conservation and Recovery Act.
3302 Dirksen Building

DECEMBER 1

9:30 a.m.
Labor and Human Resources
To resume oversight hearings to examine affirmative action regulations of the Office of Federal Contract Compliance Programs, Department of Labor.
4232 Dirksen Building

DECEMBER 2

9:30 a.m.
Labor and Human Resources
To continue oversight hearings to examine affirmative action regulations of the Office of Federal Contract Compliance Programs, Department of Labor.
4232 Dirksen Building

JANUARY 13, 1982

9:30 a.m.
Judiciary
Constitution Subcommittee
To hold hearings to discuss the implementation of the Voting Rights Act of 1965, and on proposed legislation to extend for an additional 10 years the automatic application of the preclearance provision, and to extend certain other provisions for an additional 7 years.
2228 Dirksen Building

JANUARY 14, 1982

9:30 a.m.
Judiciary
Constitution Subcommittee
To continue hearings to discuss the implementation of the Voting Rights Act of 1965, and on proposed legislation to extend for an additional 10 years the automatic application of the preclearance provision, and to extend certain other provisions for an additional 7 years.
2228 Dirksen Building

JANUARY 20, 1982

9:30 a.m.
Judiciary
Constitution Subcommittee
To resume hearings to discuss the implementation of the Voting Rights Act of 1965, and on proposed legislation to extend for an additional 10 years the automatic application of the preclearance provision, and to extend certain other provisions for an additional 7 years.
2228 Dirksen Building

JANUARY 28, 1982

9:30 a.m.
Judiciary
Constitution Subcommittee
To resume hearings to discuss the implementation of the Voting Rights Act of 1965, and on proposed legislation to extend for an additional 10 years the automatic application of the preclearance provision, and to extend certain other provisions for an additional 7 years.
2228 Dirksen Building

FEBRUARY 4, 1982

9:30 a.m.
Judiciary
Constitution Subcommittee
To resume hearings to discuss the implementation of the Voting Rights Act of 1965, and on proposed legislation to extend for an additional 10 years the automatic application of the preclearance provision, and to extend certain other provisions for an additional 7 years.
2228 Dirksen Building

FEBRUARY 11, 1982

9:30 a.m.
Judiciary
Constitution Subcommittee
To resume hearings to discuss the implementation of the Voting Rights Act of 1965, and on proposed legislation to extend for an additional 10 years the automatic application of the preclearance provision, and to extend certain other provisions for an additional 7 years.
2228 Dirksen Building

FEBRUARY 18, 1982

9:30 a.m.
Judiciary
Constitution Subcommittee
To resume hearings to discuss the implementation of the Voting Rights Act of 1965, and on proposed legislation to extend for an additional 10 years the automatic application of the preclearance provision, and to extend certain other provisions for an additional 7 years.
2228 Dirksen Building

FEBRUARY 25, 1982

9:30 a.m.
Judiciary
Constitution Subcommittee
To resume hearings to discuss the implementation of the Voting Rights Act of 1965, and on proposed legislation to extend for an additional 10 years the automatic application of the preclearance provision, and to extend certain other provisions for an additional 7 years.
2228 Dirksen Building

CANCELLATIONS

OCTOBER 22

9:30 a.m.
Judiciary
Constitution Subcommittee
To resume hearings on S. 1554, S. 1253, S. 482, and S. 440, bills to amend the Federal Criminal Code with respect to the circumstances under which a person charged with or convicted of a crime may be released on bail or personal recognizance.
Room to be announced

10:00 a.m.
Governmental Affairs
To resume oversight hearings on the congressional budget process.
3302 Dirksen Building

OCTOBER 23

10:00 am.
Judiciary
Separation of Powers Subcommittee
Business meeting, to mark up S. 1647, restricting the power of Federal courts in matters of court-ordered school busing.

HOUSE OF REPRESENTATIVES—*Thursday, October 22, 1981*

The House met at 10 a.m.

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

The heavens declare the glory of God; and the firmament sheweth His handiwork.—Psalm 19: 1.

O God, help to lift our eyes to see the beauty of Your creation and the marvel of Your handiwork. With all our involvement with the actions and reactions of the events of the day may we still open our souls to the grandeur of Your spirit and the power of Your presence. May we never be content to see only the rush of events that fill the hours, but enable us to behold Your glory, which transcends and gives meaning to all we do. In Your name, we pray. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate agrees to the amendments of the House to bills of the Senate of the following titles:

S. 1000. An act to amend the Independent Safety Board Act of 1974 to provide authorizations for appropriations, and for other purposes.

The message also announced that the Senate had passed bills of the following titles, in which the concurrence of the House is requested:

S. 146. An act to authorize the Secretary of the Interior to assist in the preservation of historic Camden in the State of South Carolina, and for other purposes;

S. 188. An act to authorize the Secretary of Agriculture to convey certain lands in the Gallatin National Forest, and for other purposes; and

S. 1119. An act to correct the boundary of Crater Lake National Park in the State of Oregon, and for other purposes.

PUNK ECONOMICS

(Mr. ALEXANDER asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. ALEXANDER. Mr. Speaker, during the last dozen months or so, our Nation has adopted a new economic policy and learned new economic terms.

Last year we heard of Kemp-Roth; later, monetarism, then supply side economics—all summed up as Reaganomics—the administration's economic policy.

Now Dr. Herbert Stein, who was the chief economist for Presidents Nixon and Ford, has characterized President Reagan's economic policy as "punk supply sideism" (New York Times, Oct. 20, 1981, p. A31). Dr. Stein, in describing punk economics, uses "punk," he said, in the rock-music sense of "extreme to the point of being bizarre."

No matter how you describe it, it means a recession. The headlines read: "GNP Falls at 0.6 Percent Rate, Confirms Recession." Productivity is down, unemployment is up, and interest rates remain at an alltime high.

For all Americans who are not concerned about economic terms, it means hard times ahead.

THE RECESSION

(Mr. DANIELSON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DANIELSON. Mr. Speaker, I learned with dismay last evening that some of the members of our administration have said that it is good to have a recession at about this time, it is good to have a recession once in a while, under the theory that it purifies the economy.

You know, you might as well say that it is good to have pneumonia once in a while because it purifies the blood.

Now, that simply will not fly in my district in California. When you have lost four rubber tire factories, one automobile assembly plant, and another one working at half speed, when you have lost two steel mills, when bankruptcies are increasing, and the construction trade has come to a standstill, a recession has no appeal for the people in my district.

I want to say this: If this is good for the economy, the people in my district have not yet gotten that message from the messiah of the millionaires. And I want to warn the messiah of the millionaires that if this does not turn around, and turn around soon, he is going to get the message, the messiah is going to get the message next year.

HOUSE CONCURRENT RESOLUTION 197 URGES NEGOTIATED SETTLEMENT TO ONGOING WAR IN EL SALVADOR

(Mr. YATRON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. YATRON. Mr. Speaker, on October 1, I introduced House Concurrent Resolution 197, urging the President to press for a negotiated settlement among the major political factions in El Salvador, in order to guarantee a safe and stable environment for open democratic elections.

Mr. Speaker, my reason for offering this resolution is simple. The war in El Salvador has dragged on for too long with no end in sight. The indiscriminate acts of violence perpetrated by the rightwing extremists and the Marxist guerrillas have consumed the lives of thousands of innocent people.

The administration, realizing the shortcomings of its present policy toward El Salvador, is now opting for a political solution, through elections scheduled for March of 1982.

However, it would be unrealistic to assume that the people of El Salvador could safely participate in elections in a climate of violence and fear.

Mr. Speaker, it is my belief that unless the Reagan administration urges the Duarte government to establish a meaningful dialog, with its political opposition, the conflict will intensify, impeding progress toward holding free and open democratic elections.

I urge my colleagues to cosponsor House Concurrent Resolution 197, endorsing a negotiated settlement to the ongoing war in El Salvador.

SECRETARY OF COMMERCE MARY POPPINS

(Mr. ECKART asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ECKART. Mr. Speaker, a visitor to my office this week provided a grim example of the crushing effect of high interest rates.

My visitor was a young businessman from Cleveland, who runs an established, profitable meat-processing company.

His 45-year-old firm, founded by his father, has been providing ground meat to the Cleveland public schools and the U.S. military. He had a successful year last year, and won new contracts this year. But to meet them,

he needed new equipment. Until the payments arrive, he has taken out bank loans, and laid off workers.

Now he is paying 23-percent-interest rates, Mr. Speaker, on a quarter of a million dollars in loans. He has cut his payroll from 25 to 12. At the rates he is paying, interest costs him $60,000 per year.

Mr. Speaker, it would be cheaper and healthier for our Nation to keep interest rates under control. Twenty-three-percent rates will put workers everywhere in the unemployment and food stamp lines, and put their dependents on welfare.

Bankruptcies are already at the highest levels small business can experience. Make no mistake about it, the Reagan recession is here.

I am appalled at the comments of Secretary of Commerce Malcolm Baldrige who believes a recession is useful, "almost necessary right now," according to the Secretary.

Unemployment and high interest policies of this administration, cannot be the cure for our country's economic problems. I do not believe the working men and women of this country should pay the price for these ill-conceived administration actions.

A Secretary of Commerce who says a recession is necessary to solve our economic problems is a lot like Mary Poppins; who wants us to swallow some recessionary sugar to help make their high interest rates and unemployment medicine go down.

PRODUCTIVITY

(Mrs. SCHROEDER asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. SCHROEDER. Mr. Speaker, I think the casualness with which the administration dealt with the fact that we are in a recession is really cruel. They ignore the human terms and the fact that many people are suffering. To have administration officials say that people are supposed to feel good about this suffering, I find amazing.

But one of the things we must do is act. We cannot stand around here and the administration cannot stand around here giving everybody advice. We have got a lot to do, too. We have been going around and the administration been going around pointing their finger and saying to people in the private sector, you have to become more productive. We all know they have to become more productive. But we should do all we can to see the public sector becomes more productive, also.

I was shocked that this administration did away with the productivity section of the Office of Personnel Management. That is the whole area that deals with productivity for the entire Federal bureaucracy.

So they deal with the recession so casually in the human terms and in productivity in their area they ignore. At a time when we should have the Federal Government be more productive, they cancel the productivity section. I have a bill on productivity in the public sector. I think we have to set an example, not just give others advice. It is very important that we show the American people we are not dealing with the recession as casually as the administration is.

BILL INTRODUCED PROVIDING FOR RELIEF FOR INDIVIDUALS THREATENED WITH RIF PROGRAM

(Mr. FAUNTROY asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. FAUNTROY. Mr. Speaker, when President Reagan stated that $1.3 billion would be saved as a result of reductions in Federal personnel, I and thousands of Federal employees wondered how and where the meat ax would fall.

To date, thousands of Federal employees have already felt the blow of the President's reduction in force program, and many more can expect a similar fate.

In recent weeks, my office has been inundated with complaints from Federal employees who have lost their jobs or expect to lose their jobs due to the RIF. Many are long-term employees.

Lives are being disrupted, unemployment is increasing, and still, the White House has been unclear as to how far and how deep these cuts will go.

Just yesterday, three employees of the Department of Health and Human Services came to my office, uncertain of their future. Two of them have been employed with the Federal Government for 26 years each, and the other has been employed for 15 years. They have received a general RIF notice, effective October 31, and may be forced to compete for jobs in the private market after a career of Government service.

I am today introducing a bill to provide some relief to individuals whose lives, livelihoods and families are threatened by this RIF program.

My bill has three major provisions:

First, it requires that OMB establish and maintain a national register of RIF'ed employees.

Second, it allows a RIF'ed employee to have the right of first refusal for job openings in the Federal Government by disallowing Federal agencies from appointing anyone to a position as long as a qualified RIF'ed individual is available for the job.

Third, it provides for appeal to the courts in the event a RIF'ed individual is not satisfied that a Federal agency has complied with this law.

I am considering other legislative measures to augment this bill. Hopefully this measure will help to reduce the doubt, remove the uncertainty, and ease the pain of a seemingly out of control personnel reduction program. Thank you.

□ 1015

A FLAWED ECONOMIC PROGRAM

(Mr. DORGAN of North Dakota asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DORGAN of North Dakota. Mr. Speaker, yesterday I noticed that a Cabinet officer in our Government said that we probably need a recession in this country. Some of us who are in Congress for the first time came here expecting to hear a few higher truths from folks in those positions of responsibility and we find instead that these higher truths are not forthcoming.

We find folks in those positions welcoming a recession with open arms and I think that is more a product of bankrupt economic thought than a higher truth.

The American people are starting to understand that we cannot, through a process of mere emotional arithmetic, have the largest tax cut in American history and the largest military build-up in American history and come out with a balanced budget. That does not make sense. This is an economic program that is flawed.

The American people are starting to understand that.

To be specific, let me talk about taxes for a half a minute. We just passed a tax cut which is the largest in the history of America.

In 1960, corporations in this country paid 23 percent of America's income taxes. After this new tax cut washes through the American economy in 5 years, American corporations will pay 7 percent of the American income tax. Guess who pays the rest? The American folks out there who are working for a living. There is a big tax increase in America's future for the working people. I think this is the kind of economic philosophy which says the rich get richer and the poor get poorer.

The American economy is floundering. The policies we are running do not represent the best of what we have to offer this country and its future.

THE ADMINISTRATION'S NEO-NEW FEDERALISM MEANS HIGHER PROPERTY TAXES

(Mr. LEVITAS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LEVITAS. Mr. Speaker, the subject of federalism is much discussed these days and the concept of new federalism or what I describe as neo-new federalism, as put forth by this administration, has come under scrutiny by the House Government Operations Committee in order to find out what this administration really means by new federalism. Secretary James Watt was sent over as the spokesman for the administration in these hearings and I think we now have learned that this administration believes that federalism or their brand of neo-new federalism means increasing local property taxes.

In the course of the testimony given by Secretary Watt, I asked Secretary Watt:

What do we do about efficiently operated, necessary programs that are going to be affected by some of the budgetary proposals this administration has made? If they are to be maintained—

I asked—

will it result in an increase in local property taxes as a result of your concept of new federalism?

Secretary Watt said:

I think that is right; an increase in local taxes.

To which I said:

An increase in local taxes? The fellow who pays Federal tax is the same fellow who pays property taxes. You should not lose sight of that fact.

New federalism should mean more than raising local property taxes and I think the American people ought to be forewarned that the brand of neo-new federalism which is now being espoused does not recognize States prerogatives and States rights but is simply raising local property taxes in the name of neo-new federalism.

I believe in true new federalism and I hope the administration's neo-new federalism will come to mean something more than higher property taxes across America. If not, next year when the voters ask themselves "Am I better off today than I was 2 years ago?" they will say "No" if they see their property taxes going up and up because of the administration's neo-new federalism.

BIPARTISAN EFFORT NEEDED TO STRAIGHTEN OUT ECONOMIC MESS

(Mr. JONES of Oklahoma asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. JONES of Oklahoma. Mr. Speaker, all the news about recessions and high interest rates and sluggish investments and unprecedented Federal deficits is really not news at all. If we would refer back to the debates on the first budget resolution earlier in this spring, we will find that all of the things over which we are wringing our hands this fall were predicted precisely by those of us on the Budget Committee who tried to warn against these conditions last spring.

An administration policy that coupled a large Federal deficit, unprecedented borrowing by the Federal Government, taking out nearly 40 percent of the available credit this year, coupled with a stimulative fiscal policy that creates higher demand for private credit, coupled with a monetary policy that shrinks the available credit that is there to borrow, that policy simply is going to lead to one of two things: Very high interest rates and high inflation or very high interest rates and high inflation that will lead to a very high recession.

Clearly the tenets that we set out in the first budget resolution in the Budget Committee look sounder and make more sense now than they did even in the spring. I would hope that this body and this administration would recognize the need to change course and would do what is right for America and put together a truly bipartisan, not a bogus bipartisan effort to straighten out the economic mess we find ourselves in.

ADMINISTRATION SEEMS ONLY CONCERNED WITH RICH

(Ms. OAKAR asked and was given permission to address the House for 1 minute and revise and extend her remarks.)

Ms. OAKAR. Mr. Speaker, I, too, am amazed at how casually the administration acknowledges a recession. Apparently they agree with having one.

Mr. Speaker, production and sales in certain industries, such as housing and automobiles, are almost at a standstill. New home sales have dropped 15 percent more in the last 6 months. The high interest rates are killing our small businesses. In my area alone, the bankruptcy rate is one-third more this year than last year for small businesses.

Mr. Speaker, if we do not produce and people cannot afford to buy, unemployment and frustration increases. Government ought to produce the greatest good for the greatest number of people. A recession has a negative catastrophic impact on the majority of Americans, but apparently the administration does not seem to be concerned about the majority of Americans, only the selected few who are rich.

HIGH INTEREST RATES

(Mr. DICKS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DICKS. Mr. Speaker, I, too, am concerned, first of all that it has taken the administration this long to recognize that the economy is in a serious recession, and secondly, I am stunned by the fact that Secretary Baldrige yesterday said that a recession is good for the country. A recession means unemployment and misery for millions of Americans; it is not good for our country.

Out in the Pacific Northwest, we have a very weak economy in which the housing industry and forest product industries are not just in a recession, but nearly a depression. That depression is caused by the complicity of this administration in a high interest rate policy that is choking off America's economy.

If there was a chance for the administration's program to work, it has been strangled by the Federal Reserve Board's tight money policies that cause high interest rates. So, the policies of the Fed which this administration continues to support has caused this problem.

We need housing in this country. Ninety-five percent of Americans today cannot afford housing because of high interest rates and the size of monthly payments required to purchase a home.

The homebuilders of this country, the realtors, the automakers, have launched a campaign to unlock the economy, sending keys to Congress and the Fed in protest of these high interest rates. National unemployment is nearing 8 percent. In Washington State unemployment is at 10 percent.

I say it is time for this administration to make it clear to the Federal Reserve Board that we can no longer tolerate the high interest policy and the resulting damage it is doing to small business, homebuilders, realtors, savings and loans, and the forest products industry of this country.

HOUSING INDUSTRY SUFFERS FROM HIGH INTEREST RATES

(Mr. GEPHARDT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GEPHARDT. Mr. Speaker, while yesterday's report of a further decline in the GNP came as no surprise and will be viewed as confirmation that a recession is underway, the administration's attitude of "wait and see until it gets bad" is somewhat disconcerting.

With total housing starts this year not expected to exceed 1.1 million units and auto sales limping along at the same rate as last year of 9 million units, I suggest it is time the administration take a look at the disastrous effect high interest rates are having on these two key industries.

The housing industry is suffering as much from lowered expectations as well as high interest rates. I am told

by many homebuilders that so few people believe financing is available at reasonable rates that new homes can be on the market for months before people come looking. Much has been said about importance of predictability in the economy and the need for a 3-year tax cut to encourage spending and investments. When the tax bill was signed, perhaps the news failed to make it beyond the rosy predictions of the Rose Garden.

What is needed now is less dogma and more pragmatism. If fiscal restraint is to produce lower interest rates it will take a new budget approach which is even and fair handed in reality as well as perception.

LOOK ALIKE DRUGS

(Mr. HUGHES asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HUGHES. Mr. Speaker, last week the Subcommittee on Crime, which I chair, held the first congressional hearings on look alike drugs. Look alike drugs are drug products that have been manufactured to imitate controlled substances. Originally they were a swindle against persons buying illegal drugs. Now this fraud is mass marketed by means of direct mail, handbills, and mail order.

The targets are school children who are told that they can get high on legal stimulants. They are legal only if they are properly labeled. But look alikes are sold by the rules of the drug world: No labels, no warnings, just caveat emptor.

The over-the-counter drugs used in the look alike capsules are themselves dangerous. We heard of children being killed by these drugs. The FDA told us that they are reviewing the safety of those ingredients which are stimulants. The medical literature of the adverse effects such as strokes and paralysis from these drugs is growing.

There is a serious law enforcement problem here too. Narcotics agents can be confused by the look alike drugs. They risk being sued for false arrest which can destroy a police department's effectiveness. The only bright spot is that the U.S. postal inspectors, with limited resources and jurisdiction, have put several look alike distributors out of business.

A representative of State government and a drug abuse educator were both convinced that the States cannot do the job alone, and that an effective Federal response is needed.

The Subcommittee on Crime will hold further hearings to develop the best way to fight those who encourage children that drug use is normal or acceptable. We must stop those who spread look alike drugs and thereby encourage our children into the drug using cult we are trying to destroy.

CARNIVAL ECONOMICS

(Mr. SOLOMON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SOLOMON. Mr. Speaker, a very curious event took place on the floor yesterday during the consideration of the farm bill. In the middle of the consideration of that important piece of legislation the Committee of the Whole rose. Then, even though we were supposedly pressed for time the Speaker took the well to make a partisan political speech announcing the so-called recession we are now entering.

But what was even more curious is that the Speaker sought to blame the 22-day-old Reagan economic program for the recession. As the Speaker is becoming so fond of saying "its all the fault of Reagan's voodoo economics." What the Speaker did not mention is the pre-Reagan, O'Neill-Carter inflation rate of 13 percent. What the Speaker did not mention is the pre-Reagan, O'Neill-Carter interest rates of 20 percent or more. And finally what the Speaker did not mention is 20 years of what I would term "carnival economics." What is Speaker O'NEILL's carnival economics? Carnival economics proposes that the liberal democratic leadership have a merry time of taxing and spending a sound economy into oblivian, while the American people take a roller coaster ride of high inflation, low productivity, high interest rates, and declining real income.

Mr. Speaker, 20 years of carnival economics cannot be reversed by 22 days of sanity. If voodoo economics means reducing inflation to single digits, falling interest rates, and lower taxes I will take it over carnival economics any day.

PRESIDENT REAGAN'S FOREIGN POLICY

(Mr. HENDON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HENDON. Mr. Speaker, in recent months some of our colleagues have complained that President Reagan does not have a foreign policy.

The Washington Post yesterday published the results of a nationwide poll that will put an end to that sort of misinformation.

Let me read to you what the Post said:

> Three in every four Americans believe that President Reagan's hard-line approach to foreign affairs is creating new respect for the United States overseas.

The Post goes on to report that,

> Overall, the public gives the President high marks for his conduct of foreign affairs and continues to support him strongly on his plans for a military buildup.

I bring this to your attention only to point out what has been obvious since November of 1980: The American people want the kind of leadership President Reagan has been giving them. They clearly do not want the discredited, failed, dangerous foreign policy leadership—if you can call it that—this country endured from 1977 to January 1981.

It is ironic: From 1977 to January 1981, the United States had a foreign policy but the vast majority of Americans disliked it. Since President Reagan took over, we are now told we have no foreign policy—but a vast majority like it very much.

□ 1030

SOME POSITIVE SIGNS

(Mr. MORRISON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MORRISON. Mr. Speaker, the media interlude we were treated to yesterday made me fondly recall the days of the last administration when economic policies changed direction almost as often as the breeze.

Now that we have entered the 22d day of the Reagan economic program your calls to abandon this carefully coordinated policy are clear testimony to your support of the rudderless drift followed by the previous administration.

But the rhetoric betrays a lack of alternative policies. The call for a change 3 weeks into the new regimen betrays a shocking lack of ideas.

No; the problems created by 15 years of the Great Society have not been totally reversed in 22 days. However, there are some positive signs—interest rates have dropped 10 percent in these last 3 weeks, inflation has receded to single digit, and with the tax cuts real income to workers has begun to increase.

No one pretends that we have completely turned around the disaster left us by the veto-proof Democratic legacy of the last 4 years, but a policy exists. A policy that is beginning to show some positive movement.

To the dismay of all those who lack any ideas, lick the finger and test the wind economics is banished and a program that can work has just begun.

THE ECONOMIC HANGOVER

(Mr. WALKER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WALKER. Mr. Speaker, yesterday the Chair interrupted the legislative business of the House in order to launch a partisan attack on the economic program of the present administration. I think while most of us in

this House, including most of my colleagues on the Republican side, share the Speaker's concern about the recession, I think we also know where that recession came from. It is an economic hangover from the days of the Carter administration that literally destroyed the economics of this country. We were headed for a Carter collapse and what we are seeing is the result of those disastrous policies.

What we would also contend is that the idea put forth that somehow the Democratic alternative economic program offered on this floor earlier this year would have prevented this is, in my opinion, nonsense.

We know one thing about that alternative. Had that alternative been adopted, taxes would have been going up. The trend would have been upward, not downward.

We also know one other thing. Faced with the dire economic straits of this country, social security recipients next year could have expected their cost of living increases to be cut, to be eliminated for 3 months, as the result of the adoption of that alternative. I do not think that is what the American people want. I think they want the kind of economic programs this administration and this Congress has adopted.

WORLD HUNGER

(Mr. COATS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. COATS. Mr. Speaker, in the past several months I have become increasingly aware of a strong feeling among many of my constituents on the subject of world hunger. These individuals are especially interested in the form and substance of President Reagan's participation in the Cancun summit.

The President will be telling other world leaders that massive amounts of dollars being doled out to needy nations will not necessarily solve the problem of world hunger. It is clear that this aid in many instances does not reach those who need it the most. There is also evidence that massive aid can become a disincentive to self-sufficiency.

I agree with the President that the free market is the most effective solution to the root cause of world hunger; namely, self-sufficiency in the production of food. Yet, we cannot assume that Third World nations can establish free-market economies for themselves. This Nation can, and should, provide developmental assistance and unfettered trade for those nations to assist them in their development.

At this moment, no nation has given top priority to alleviating world hunger; but now more than ever a comprehensive food assistance and development program is necessary. The cause of human freedom and economic growth can best be achieved when a nation achieves the ability to provide for the basic needs of its people.

ACID RAIN

(Mr. GREGG asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GREGG. Mr. Speaker, in order to curb the serious effects that acid rain is having on New Hampshire, the Northeast, and Canada, I today, along with a number of other colleagues, have introduced in the House two bills calling for regulatory control, coupled with an increased research and development program.

The first bill, called the Acid Deposition Control Act, is designed to reduce sulfur dioxide emissions at the source. It primarily concentrates on controlling the greatest sulfur dioxide emitters, which are the coal-burning powerplants of the Midwest.

The second bill of what I am calling the two-pronged approach, is designed to significantly increase the research on acid rain and to present a thoroughly laid-out procedure through which long-term control strategies can be implemented.

The effects of acid rain, which is causing destruction of many of the lakes in New Hampshire and throughout the Northeast and Canada, the increased occurrence of respiratory and nervous system disorders, adversely impacting the tourist industry and damaging buildings, are becoming alarmingly more evident. For these reasons, I cannot emphasize enough the need to take action now to stop acid rain.

RISK COMPARISON

(Mr. RITTER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RITTER. Mr. Speaker, 2 days ago we passed a Hazardous Materials Transportation Act amendment which called for a "comparative risk analysis" of transporting hazardous substances. I am pleased that this method is receiving legislative acceptance. I have been communicating the value of comparative risk analysis—putting hazards in perspective—in the Congress for 3 years now. My bill, H.R. 3441, the Risk Analysis Research and Demonstration Act of 1981, is now pending markup in the Science and Technology Committee. I would have been here on the House floor to actively support the comparative risk analysis amendment had I not been at Health and Environment Subcommittee hearings regarding the role of risk analysis in the standard setting process in the Clean Air Act. The transportation of hazardous substances is indeed an ideal topic for comparative risk analysis or in plain English, putting hazard in perspective whether for regulators or the public. In my own district, the Lehigh Valley in Pennsylvania, a group of engineers and scientists produced a study which spelled out the facts about the transportation of nuclear materials as compared to the road transportation of other hazardous materials like chlorine, gasoline, propane, and so forth. This report has been extremely helpful for the average citizen to put this specific issue in perspective. The study helped to defuse unnecessary alarm by providing some basic factual information. I submit that risk analysis will make it easier for us to do the right thing regarding complex technical issues to minimize real risks to society. With scarce regulatory dollars we simply must improve regulatory efficiency. Risk analysis will help greatly through a better description of hazard.

PERMISSION FOR COMMITTEE ON ARMED SERVICES TO SIT TODAY DURING 5-MINUTE RULE

Mrs. SCHROEDER. Mr. Speaker, I ask unanimous consent that the Committee on Armed Services may be permitted to sit today during any proceedings under the 5-minute rule.

The SPEAKER pro tempore (Mr. PEASE). Is there objection to the request of the gentlewoman from Colorado?

Mr. WALKER. Mr. Speaker, reserving the right to object, is this something which is entered into as an understanding with the minority?

Mrs. SCHROEDER. Mr. Speaker, if the gentleman will yield, my understanding is that this was cleared with the minority. The meeting is to consider subcommittee reports on legislation that is noncontroversial.

Mr. WALKER. Is a markup of any bill contemplated in this hearing?

Mrs. SCHROEDER. Well, the understanding I have is that the subcommittee reports on legislation will be voted on.

I assume that the markup of the bills will probably take place, but I do not think any of them are controversial. I could give the gentleman a list of the bills if he would like, but my understanding is they were cleared with the minority. They looked at them and felt they were noncontroversial and it would take just a short time.

Mr. WALKER. Well, further reserving the right to object, we are going to be considering some very important matters here on the floor today. We have the food stamp program. We have got a lot of very important mat-

ters that are going to come before the House. It seems to me that if a markup is going to take place, even on noncontroverisal matters, you will have people that will have to be there in order to maintain a quorum. That would cause some Members a problem that might have to be on the floor for the very important business that we are going to be conducting.

Mrs. SCHROEDER. If the gentleman wishes to object, it is perfectly all right with me. I think I am basically the real minority on the Armed Services Committee; the minority on the gentleman's side of the aisle, as I understand it, agreed with this. They felt the bills would move expeditiously because they are noncontroversial.

Mr. WALKER. Mr. Speaker, I object.

The SPEAKER pro tempore. Are there other objectors?

An insufficient number has objected.

The request is agreed to.

USELESS VOTES

(Mr. OTTINGER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. OTTINGER. Mr. Speaker, I take this time to object to the increase in the number of very wasteful votes that are being called on the approval of the Journal and going into the Committee of the Whole House for the State of the Union.

Yesterday I was holding hearings. We had the Assistant Secretary of State there. We had the former Secretary of Defense and president of the World Bank, Mr. Robert McNamara. There must have been a dozen members of the State Department there. To keep people like this waiting for a meaningless vote is rude and an unwarranted imposition.

I calculated that for each one of these foolish votes it cost the taxpayers somewhere in the neighborhood of $50,000. We have 435 Members. They have to spend a half an hour coming over here. There is an average of maybe 10 committees in session at the time of any such vote and each has witnesses, many of whom come long distances and at considerable sacrifice to testify.

Furthermore, it demeans the significance of our votes, because these are perfectly meaningless votes, yet they count the same on a Member's voting record as do votes on substantive issues.

I would strongly urge upon the leadership that we defer votes on approving the Journal to the end of the legislative day which would probably obviate these altogether, and that we have the Rules Committee provide that we automatically go into the Committee of the Whole, so we would not have to have a vote on that, and we could get to the very serious business this House has to consider.

TOBACCO SUPPORTS THE GOVERNMENT

(Mr. FOUNTAIN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FOUNTAIN. Mr. Speaker, yesterday a considerable amount of time was spent in trying to perfect an amendment which would indicate that in the future the tobacco program would be of no cost to the Federal Government.

I just want to make the observation that the cost of the program to the Government has been very low in the past, and far below all other commodities, and it is not costing the Government today any consequential amount, on the contrary Government is costing tobacco billions of dollars in taxes. In fact, tobacco is supporting all governments in both direct and indirect taxes annually to the tune of $22 billion. Tobacco has been supporting all levels of government for years.

Let me briefly tell you what tobacco has meant to this country, according to figures from the 1939 study conducted by the Wharton Applied Research Center, a very reputable institution.

In employment, direct and indirect, tobacco has been providing over 2 million jobs annually.

In direct and indirect compensation, it has has provided $29,900 million for jobs.

In taxes to the 50 States, local units of government not included, over $4,317 million.

In Federal taxes, $4,442.5 million.

So the result is that almost $10 billion in direct taxes is going to the 50 State and Federal governments. Add local government taxes—figures I do not now have—and the indirect State and Federal Government taxes to the direct tax figures I've broken down, and we get the annual direct and indirect tax figures showing that the tobacco industry is supporting all levels of government by approximately $22 billion annually.

So unquestionably tobacco is supporting the Government.

FOOD AND AGRICULTURE ACT OF 1981

Mr. DE LA GARZA. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill (H.R. 3603) to provide price and income protection for farmers, assure consumers an abundance of food and fiber at reasonable prices, continue food assistance to low-income households, and for other purposes.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Texas (Mr. DE LA GARZA).

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. LEVITAS. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 378, nays 1, answered "present" 1, not voting 53, as follows:

So the motion was agreed to.

The result of the vote was announced as above recorded.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill, H.R. 3603, with Mr. MCHUGH in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. When the Committee of the Whole rose on Wednesday, October 21, 1981, title XIII was open to amendment at any point, and pending was an amendment offered by the gentleman from Missouri (Mr. COLEMAN).

Does the gentleman from Missouri seek recognition?

Mr. COLEMAN. Yes, Mr. Chairman, I do.

MODIFICATION OF AMENDMENT OFFERED BY MR. COLEMAN

Mr. COLEMAN. Mr. Chairman, I ask unanimous consent to modify the pending amendment.

The CHAIRMAN. The Clerk will report the modifications.

The Clerk read as follows:

Modifications of amendment offered by Mr. COLEMAN: In line 4, section 1343, insert after the word "suspect" the word "felony".

In paragraph (1) of section 1343, after the word "criminal" on line 2, insert the word "felony".

Strike out paragraph 2 and renumber the succeeding paragraphs accordingly.

In paragraph 2, line 3, strike the word "in" and insert the words "is under the authority of the United States".

The CHAIRMAN. Is there objection to the request of the gentleman from Missouri?

There was no objection.

Mr. COLEMAN. Mr. Chairman, I move to strike the last word.

The CHAIRMAN. Without objection, the gentleman from Missouri (Mr. COLEMAN) is recognized for 5 minutes.

There was no objection.

Mr. COLEMAN. Mr. Chairman, I would want to make clear that it is my understanding that in part of the legislative history that is being made on this bill, that changing of the language which I have just done relative to searches incident to arrest in section 1343 in no way should be interpreted as diminishing the authority to conduct searches incident to an arrest provided for in such section which is implicit in the authority to arrest as contained in the decisions of the U.S. Federal courts, including the U.S. Supreme Court.

Furthermore, the changing of the language contained in section 1343 relating to searches incident to arrests is in no way intended to limit the general authority of those given arrest authority provided for in this section that exists for other Federal investigators who have arrest authority.

Mr. Chairman, in everyday terms, that is to indicate that we feel that it is implicit in the authority given in subsection (1) therefore is unnecessary to provide this further authority.

Mr. Chairman, these amendments and changes to my amendment in this section have been arrived at in a spirit of compromise, and it is my understanding that the gentleman from New York will offer an amendment in just a moment to provide for codesignation by the Inspector General of the U.S. Department of Agriculture and the Attorney General, and we will dicuss that amendment following, but I thought it was more appropriate for him to offer that in just a moment.

Mr. Chairman, I do this in a spirit of compromise, trying to keep together the package that has been delicately formed and reformed.

Mr. Chairman, I would yield to the gentleman from Texas (Mr. DE LA GARZA).

Mr. DE LA GARZA. Mr. Chairman, I appreciate the gentleman yielding to me.

This is to agree with the gentleman and reemphasize the fact that any activity which is pertinent to arrest under the law that any of the stricken language, if it is implied, does not diminish whatever the present law is and whatever part of it is encompassed within the present law. To that extent, I think that should be the legislative history.

Further, I state to the Members that I appreciate the gentleman's spirit of compromise in this effort, and I think that with this change we would have satisfied the major concerns of most of the Members who have expressed concern.

There is still some general concern, and perhaps later we might be able to more fully address this issue, but for the present time as part of the compromise I think that we should go along and accept it in the spirit of compromise in order to protect all of the other sections that encompass the consensus compromise.

I thank the gentleman from Missouri.

Mr. HORTON. Mr. Chairman, will the gentleman yield?

Mr. COLEMAN. I yield to the gentleman from New York.

Mr. HORTON. Mr. Chairman, I thank the gentleman for yielding, and I would like to say at the outset that I understand that this amendment was included with other amendments, and that there was an agreement on both sides of the aisle in the Agriculture Committee which affected not only section 1343, but caps and other matters that were very important to both sides of the aisle of the Agriculture Committee.

I, however, as I expressed yesterday on the floor, was very concerned about the fact that this is a unique situation that we did not envision when we established the Inspectors General, that

there would be any sort of authority for law enforcement. It was primarily an audit function, so this is a unique departure from the initial authority that was contained in the legislation which established the Inspectors General in the various departments, and particularly in the Agriculture Department. Now, I think this is unique in the sense that we do have a situation in which these individuals in the Inspectors General are in essence doing more than what the Inspector General Act envisions.

In the spirit of compromise I am willing to accept the compromise that has been proposed. The staff people on the Government Operations Committee have been working with the staff of the Agriculture Committee to put together this language the gentleman has just included. I also think it is important that the amendment to be offered by the gentleman from New York (Mr. WEISS) be accepted because that does provide that, in addition to the Inspector General of the Department of Agriculture, that the Attorney General of the United States would have to designate those persons who would be responsible for carrying out this law enforcement function.

The CHAIRMAN. The time of the gentleman from Missouri has expired.

(At the request of Mr. HORTON and by unanimous consent, Mr. COLEMAN was allowed to proceed for 3 additional minutes.)

Mr. HORTON. So, in a spirit of compromise and also because of the special situation that exists with regard to the food stamp program, I personally would be willing to accept the language that has been proposed here by way of a compromise, but I want to make perfectly clear that this is not to be a precedent with respect to Inspectors General in other departments, and I would hope that somewhere along the line hearings could be held so that this could be even better limited with regard to what these individuals will be permitted to do under this law enforcement provision.

Mr. COLEMAN. I appreciate the gentleman's comment, and I want to point out that we need to protect these people, allow them to do their duties now. If the gentleman's committee or any other committee wants to work on this, I would be more than happy to have them do that, but in the meantime the enforcement requirements are with this agency and we need to be able to give them the tools to do it. If anybody wants to make those changes, fine, let us make them, but let us not send these fellows out without having the capability to perform them.

Mr. LEVITAS. Mr. Chairman, will the gentleman yield?

Mr. COLEMAN. I yield to the gentleman from Georgia.

Mr. LEVITAS. Mr. Chairman, I thank my colleague for yielding.

I would like to say, as one who yesterday voiced some concerns about the original text of the language, that the changes which the gentleman has made in the spirit of compromise satisfy the major objections that I had and which I discussed with the gentleman yesterday. I thank him for making those changes, and in that sense I can certainly support the amendment as changed. I commend him for it.

I would like to say further that it is extremely important that we take effective action against the food stamp fraud, which has gotten involved in the underworld and criminal activities, and I think this is an absolutely essential activity. The Inspectors General of the U.S. Department of Agriculture are already working with Justice Department crime force groups in order to deal with this matter, and this type of legislative action is needed. I think at a later time, perhaps some changes and improvements can be made.

There is one other point I would like to address to the gentleman. I am concerned that if we are really going to fight food stamp fraud, we have got to do it with people who are out there investigating these activities. I have heard that there will be an effort made to reduce the number of Inspectors General in the Department of Agriculture who are doing this very thing.

□ 1115

Mr. Chairman, I do not believe we can fight fraud with fewer fraud fighters. I think we have got to have at least the number on board that are presently there to get this job done if we are really serious about doing it.

The CHAIRMAN. The time of the gentleman from Missouri (Mr. COLEMAN) has expired.

(On request of Mr. WALKER, and by unanimous consent, Mr. COLEMAN was allowed to proceed for 2 additional minutes.)

Mr. COLEMAN. Mr. Chairman, I agree with the gentleman from Georgia (Mr. LEVITAS), and I understand that obviously there will be cuts along the way in personnel. But it is my understanding there will not be any cuts made in the USDA on persons investigating this criminal trafficking in food stamps and the waste, fraud, and abuse in the system. I agree with the gentleman in what he said.

Mr. WALKER. Mr. Chairman, will the gentleman yield?

Mr. COLEMAN. I yield to the gentleman from Pennsylvania.

Mr. WALKER. Mr. Chairman, I thank the gentleman for yielding.

As the gentleman knows, a number of us who were debating this topic yesterday felt strongly that what the gentleman was doing in getting at this waste, fraud, and abuse was an important contribution.

Is the gentleman convinced that the compromise that has been reached will still afford the kind of enforceable action that will be needed to get at the waste, fraud, and abuse in the program?

Mr. COLEMAN. Absolutely. But I think at the same time it recognizes the sensitivity of the issue and the concerns some Members had which were legitimate, and I believe we have allayed those fears. We have an amendment which still has a lot of teeth in it, and it is one by which the people who are out on the line and who are actually in an undercover situation, working in many cases with organized crime, are going to be able to protect themselves as they perform their public duties.

Mr. WALKER. Mr. Chairman, if the gentleman will yield further, I think that what he has done is an excellent way to resolve what appeared to be an impasse.

Mr. COLEMAN. Mr. Chairman, I thank the gentleman from Pennsylvania (Mr. WALKER).

Mr. KINDNESS. Mr. Chairman, will the gentleman yield?

Mr. COLEMAN. I yield to the gentleman from Ohio.

Mr. KINDNESS. Mr. Chairman, I thank the gentleman for yielding.

I would point out that, while I am not a party to any discussions on compromises with regard to the wording of this amendment, as revised, I understand the atmosphere and the climate that exists here, which is that of compromise. I just want to point out that some of our worst law arises out of compromise. I think we are still heading in the wrong direction with this amendment.

I realize that the amendment is going to be approved. I just want to voice the warning that we have gotten into this situation because the Department of Agriculture has moved ahead into a law enforcement area. The Inspector General's Office has not been given the charge, as the gentleman from Missouri had indicated yesterday, to enforce the law or to serve as law-enforcement officials.

The CHAIRMAN. The time of the gentleman from Missouri has expired.

(On request of Mr. KINDNESS, and by unanimous consent, Mr. COLEMAN was allowed to proceed for 2 additional minutes.)

Mr. KINDNESS. Mr. Chairman, if the gentleman will yield further and if I may continue, that was not a part of the authority of the Office of Inspections previously either. So the reason we have gotten into this situation is that the established Federal law enforcement officials, the FBI in particular, have not devoted the resources to this program that are needed. I think

it is in that area where we really should be getting the emphasis rather than in this area.

I would just mention that I still feel we are heading in the wrong direction, but I understand the effort that is underway here to get on with this legislation.

Mr. Chairman, I thank the gentleman for yielding.

Mr. HUGHES. Mr. Chairman, will the gentleman yield?

Mr. COLEMAN. I yield to the gentleman from New Jersey.

Mr. HUGHES. Mr. Chairman, I want to say to the gentleman that I think the gentleman's language is an improvement, but it still has some problems, as I see it.

In the first place, the language is much more restrictive than is the case with felony violations generally. So we are creating a new class of instances where an arrest and search can be made.

The second point is that we are putting the officer, it seems to me, in a position where he is going to have to determine whether the court has in fact issued a warrant upon probable cause, because under the gentleman's language under (3) it would cite that he can execute a warrant for an arrest, for the search of premises or the seizure of evidence if such a warrant is issued upon probable cause.

So the officer is being put in a position of having to determine whether or not the warrant was issued upon probable cause.

Mr. COLEMAN. Well, the gentleman has raised a question, and I think I can explain it by saying that it is not the agent who is producing the warrant; it is going to be a magistrate, and he will not do it unless there is probable cause shown by the agent.

Mr. HUGHES. That is not the point I am making.

If the gentleman will yield further, Mr. Chairman, the gentleman's language is "* * * if such warrant is issued upon probable cause to believe that such violation has been committed."

That is putting the officer in the position of having to determine whether or not a court had probable cause.

The CHAIRMAN. The time of the gentleman from Missouri (Mr. COLEMAN) has again expired.

(On request of Mr. HUGHES, and by unanimous consent, Mr. COLEMAN was allowed to proceed for 2 additional minutes.)

Mr. COLEMAN. Mr. Chairman, the reason that language is in there is that right now when an agent makes a case and he needs a warrant, he has to ask for the U.S. Marshal to go to the court to get a warrant for the arrest or for the search. That is all there is to it. The difference is that we are substituting the requirement that he go to the judge instead of the U.S. Marshal to ask for it. That is the only thrust of that language, and I think that is all it does.

Mr. HUGHES. Mr. Chairman, if the gentleman will yield further, I know what the gentleman wants to do but what the language and what the gentleman wants to do, are two different things.

I would suggest to the gentleman that a very preferable way to deal with the problem is to make it specific, as we do with any other law enforcement agency, and grant the authority to carry a firearm and make arrests.

Mr. COLEMAN. Well, Mr. Chairman, if I may reclaim my time, obviously the gentleman is opposed to the amendment, and that is fine; he can exercise that opposition. But the gentleman can offer an amendment or take whatever action he wishes.

Mr. DUNN. Mr. Chairman, will the gentleman yield for one question?

Mr. COLEMAN. I yield to the gentleman from Michigan.

Mr. DUNN. Mr. Chairman, I have just one quick question.

Does the amendment that has been worked out by the gentleman in the compromise address the issue of protection for the agent who is actually going out into the field?

Mr. COLEMAN. Yes; it does. I certainly feel that it does or I would not have agreed to the compromise.

Mr. DE LA GARZA. Mr. Chairman, will the gentleman yield?

Mr. COLEMAN. I yield to the chairman of the committee.

Mr. DE LA GARZA. Mr. Chairman, I rise only to make the fact known that, for example, under the powers of postal inspectors the law reads that they can make arrests without warrant for felonies recognizable under the laws of the United States if they have reasonable grounds to believe that the person to be arrested has committed or is committing such a felony.

That is the present law for postal inspectors, and we are dealing here with something that could be as serious or perhaps more serious under much more limiting circumstances.

Mr. COLEMAN. Mr. Chairman, I thank the gentleman for pointing that out, and that is about right. I appreciate the gentleman's comments.

Mr. RODINO. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in opposition to the amendment.

This amendment is an extremely unwise attempt to convert the carefully crafted Inspector General's office into a police force which has arrest and search and seizure powers in excess of those granted to any Federal law enforcement agency. When we established the Inspectors General, we did so with the intention that they should ferret out fraud, waste, and abuse of Government programs with the primary tool being the use of the audit function. We in no way intended that they should become a national police force. We have Federal agencies that are equipped to handle the police functions of arrest and search and seizure should the investigations of the Inspector General show such a need.

The requirement that an independent judicial officer approve a warrant for arrest or search and seizure has been a part of our constitutionally guaranteed rights since the adoption of the fourth amendment to the Constitution. There is no reason today to yield to the expediency of the moment to minimize the protections which the amendment affords.

Mr. Chairman, we have no record upon which to base such an extraordinary action. Any modification in matters of criminal law and procedure should be carefully scrutinized by the Committee on the Judiciary. The profound effects of such action should be examined in great detail by the committee which has the expertise and experience in this highly complex area.

This amendment would set a dangerous precedent in law enforcement. Should we grant such power to the Inspector General of the Department of Agriculture, certainly every other Inspector General would be seeking such authority for his or her department.

I strongly believe that this amendment is ill-conceived. It could have drastic and far-reaching ramifications which have not been adequately examined.

While it has been stated that the Secretary of Agriculture is in favor of this proposal, the Assistant Attorney General for the Office of Legislative Affairs, Robert M. McConnell, informed the general counsel of our committee yesterday that the White House, the Department of Justice, and OMB oppose this amendment.

It also appears to me to be symptomatic of faults within our own institutions in how we approach the important business of legislating in this day and year. Rather than utilize our existing committee systems and have the committees with the expertise and experience review and fashion legislation within their spheres of jurisdictions, we attempt, for whatever reasons, to do these things on the floor and usually in the wrong vehicle. If we are to establish or grant these far reaching police powers to the Inspector General for the Department of Agriculture, or any Inspector General, let us do it after careful thought and sensible scrutiny by the proper committees of our body.

Mr. Chairman, I urge my colleagues to oppose this amendment.

Mr. KINDNESS. Mr. Chairman, will the gentleman yield?

Mr. RODINO. I yield to the gentleman from Ohio.

Mr. KINDNESS. Mr. Chairman, I thank the gentleman for yielding.

The distinguished chairman of the Committee on the Judiciary, as usual, has come forward to protect the deliberative process with regard to our Constitution and its Bill of Rights, and I commend the gentleman for that.

But I was wondering whether the gentleman from New Jersey (Mr. RODINO) might have commented concerning the existing incentive for States to enforce the law with regard to the food stamp programs within States. There is an incentive by way of 75 percent of the cost of that being reimbursed by the Federal Government, plus the fact that they can keep 50 percent of whatever proceeds happen to be recovered out of such activities.

The CHAIRMAN. The time of the gentleman from New Jersey (Mr. RODINO) has expired.

(On request of Mr. KINDNESS, and by unanimous consent, Mr. RODINO was allowed to proceed for 2 additional minutes.)

Mr. KINDNESS. Mr. Chairman, if the gentleman will yield further, part of the constitutional arrangement that we seek to protect and preserve against being nicked away at the edges is that there is a role of the States in so many areas of government in our country. Here is one which apparently we are not trying to make known, and that is a constitutional question I have.

Mr. RODINO. Mr. Chairman, this is a matter which I think needs to be addressed.

Mr. ROUSSELOT. Mr. Chairman, will the gentleman yield?

Mr. RODINO. I yield to the gentleman from California.

Mr. ROUSSELOT. Mr. Chairman, I appreciate the gentleman's yielding.

The gentleman mentions the fact that he is concerned that appropriate action be taken to eliminate the fraud and abuse. My chairman is well aware that the Committee on Agriculture has had all kinds of hearings on the subject of fraud and abuse, and the General Accounting Office has produced all kinds of reports.

Why does the gentleman wait until this moment to suddenly come forward? I hope that we do not have to wait for the gentleman's committee as long as we did on the bottle bill, because I remember that very well.

The chairman of the subcommittee has said that he basically thinks the committee produced a worthwhile product in trying to give some authority to the Agriculture Department in the appropriate area, the Inspectors General and the office which was set up by roughly 80 people in the Department to handle the problem of dealing with fraud and abuse.

Now, I cannot understand why the gentleman waits until this late hour, because the committee dealt with this for well over 6 months on the whole issue and now they come along to cope with the issue.

Mr. RODINO. Mr. Chairman, my understanding is that this is an amendment that just developed over a short period of time. The Committee on Agriculture, while it addressed fully the problems of fraud and waste in the program, did not, as far as I am aware, take testimony or deliberate on the question of granting these extraordinary police powers to the Inspector General.

At this time it has come to my attention, and I believe it is my responsibility as the chairman of the committee having jurisdiction over criminal matters to address the subject.

The CHAIRMAN. The time of the gentleman from New Jersey (Mr. RODINO) has again expired.

(On request of Mr. ROUSSELOT, and by unanimous consent, Mr. RODINO was allowed to proceed for 3 additional minutes.)

Mr. ROUSSELOT. Mr. Chairman, will the gentleman yield further just briefly?

Mr. RODINO. I yield to the gentleman from California.

Mr. ROUSSELOT. Mr. Chairman, I know the gentleman was supportive of the idea of the Inspector General operations being strengthened in the various departments, and that is one of their functions, to prevent criminal activity.

I understand that New York City has given and granted to Inspectors General similar authorities and powers. I cannot understand why there is this great concern that somehow the Inspector General operation in the Agriculture Department is going to be any less careful about people's civil rights than any of the others.

□ 1130

Mr. RODINO. I would want to say to the gentleman from California that while he cites certain examples of authority existing in other areas of Government, I am not prepared to say I endorse that. I think that the fundamental argument I make is that when we are considering granting police powers, we had better be careful. I believe that Inspectors General, should have the limited function of auditing and doing investigative work, they should not be given authority to do police functions.

Mr. HORTON. Mr. Chairman, will the gentleman yield?

Mr. RODINO. I yield to the gentleman from New York.

Mr. HORTON. I would like to call the attention of the gentleman from California to the fact that I think he has misstated the responsibilities of the Inspectors General under the acts that we have passed. They have the responsibility to audit. They have the responsibility to ferret out wrongdoing and abuse and so forth.

But they do not have the authority of law enforcement. As a matter of fact, in the act it is stated, and I quote:

> In carrying out the duties and responsibilities established under this Act, each Inspector General shall report expeditiously to the Attorney General whenever the Inspector General has reasonable grounds to believe there has been a violation of Federal criminal law.

So that is what I was saying earlier, that there is an extension being proposed here in this compromise that was not in the acts that govern the setting up of these Inspectors General. That is why I feel it is important that we follow up quickly on this.

I would urge the chairman of the Judiciary Committee, and I will certainly urge the chairman of the Government Operations Committee, the gentleman from Texas (Mr. BROOKS), who is not able to be here this morning because he had to return to his district, but I will certainly urge him to hold expeditious hearings.

I appreciate the cooperation of the gentleman from Missouri (Mr. COLEMAN), and also the cooperation of the chairman of the committee, the gentleman from Texas (Mr. DE LA GARZA), in following up to make certain that we are going to permit the type of law enforcement activities that are necessary to carry out the problems of resolving that abuse in the food stamps in line with the constitutional mandates that we find ourselves in when we give these law enforcement powers.

The CHAIRMAN. The time of the gentleman from New Jersey (Mr. RODINO) has expired.

(At the request of Mr. COLEMAN and by unanimous consent, Mr. RODINO was allowed to speak for 2 additional minutes.)

Mr. COLEMAN. Mr. Chairman, will the gentleman yield?

Mr. RODINO. I yield to the gentleman from Missouri.

Mr. COLEMAN. I think the gentleman from New York (Mr. HORTON) made a very good point that I would like to follow up. He quoted the language in the Inspectors General legislation in 1978 that passed, and that is exactly what the Inspector General of the Department of Agriculture is doing, is reporting to the Attorney General through the U.S. attorney system exactly where the criminal acts are occurring. The only way they can get the information to pass on to the Attorney General and to his agents, the U.S attorneys, is to provide undercover work.

I think the gentleman made a very good contribution, and I hope that this becomes law, and if we want to go further with it and refine it in the

gentleman's committee or in the Government Operations Committee, I certainly will cooperate and work on that. But I think the point of it is there is an understanding between the Department of Justice and the Secretary of Agriculture's Office. There is a relationship between the FBI now and the OIG, and basically the FBI has turned this over to the Office of Inspector General. That is the understanding, and that is how things have been working.

If that should change or there are necessary changes in that with other protections, then we can proceed from there. But that is the practical, realistic, what-is-happening-today attitude.

I thank the gentleman for yielding.

Mr. KINDNESS. Mr. Chairman, will the gentleman yield?

Mr. RODINO. I yield to the gentleman from Ohio.

Mr. KINDNESS. Mr. Chairman, I think the discussion here has very well pointed out that there is no need for any legislation in this area, not any legislation is needed out of any committee. The problem is that we are trying to make a silk purse out of a sow's ear. We are trying to put into the Department of Agriculture Inspector General's Office a law enforcement function that does not belong there.

We have at this point in time the opportunity to leave the law as it is, and I think that is exactly what we should do. All that is needed is for the resources of the FBI, the Justice Department, to be devoted to this problem that needs to be addressed. We have 260 personnel involved in this function in the IG's Office. They really ought to be law enforcement personnel in the FBI.

Mr. RODINO. I want to thank the gentleman. I think the gentleman has made a very fine point. Let us leave the police functions where they really ought to be. While I know that this amendment is well intentioned, nonetheless, I would rather not proceed with the granting of such extraordinary police power to the Inspectors General without the committee of proper jurisdiction having had the opportunity to carefully scrutinize all of the ramifications of such an action.

Mr. WEISS. Mr. Chairman, upon consultation with the gentleman from Missouri (Mr. COLEMAN) I ask unanimous consent that this amendment be amended so that it will incorporate the following:

In the first paragraph, in the last phrase before the word "designated" add the word "jointly," and after the word "designated" add the words "by the Attorney General of the United States and."

The CHAIRMAN. The Clerk will report the requested modification.

The Clerk read as follows:

Amendment offered by Mr. WEISS, to the amendment offered by Mr. COLEMAN: Section 1343, first paragraph of the Coleman-Richmond amendment at page 120 of H.R. 3603, insert before "designated" the word "jointly", and insert after "designated" the following "by the Attorney General of the United States and".

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

PARLIAMENTARY INQUIRY

Mr. HUGHES. Reserving the right to object, Mr. Chairman, if in fact the unanimous-consent request is granted, would this section be subject to further amendments, or would this foreclose it?

The CHAIRMAN. Is the gentleman asking a parliamentary inquiry?

Mr. HUGHES. That is a parliamentary inquiry, yes.

The CHAIRMAN. The answer to the gentleman is that it would be open for further amendment.

Mr. HUGHES. It would be open for further amendment?

The CHAIRMAN. The gentleman is correct.

Mr. HUGHES. I thank the Chair, and I withdraw my reservation of objection.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. WEISS. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, the amendment that was just accepted by unanimous consent I think is self-explanatory. I only want to add a few brief words of explanation.

What my amendment does is to require joint designation by the Attorney General of the United States and Inspector General of the Department of Agriculture in order for any of the powers mentioned in the amendment to be able to be exercised by any Agriculture Department personnel. This, I believe, removes the concern that many of us had that we would have proliferation of law enforcement activities, by agencies and individuals who were not originally authorized to do that, or perhaps even trained to do that.

Now with the Attorney General being required to be a joint designor, I think that problem has been resolved. I appreciate the cooperation of the gentleman from Missouri (Mr. COLEMAN), the gentleman from New York (Mr. RICHMOND), and the chairman of the full committee, the gentleman from Texas (Mr. DE LA GARZA) in achieving this in a spirit of compromise.

I want to add a few words of correction, if I may, just for the sake of the record. It has been said that the Department of Agriculture Offices of Investigation and Audit had, prior to being incorporated in the Inspector General's office, some powers along the lines being given to them by this amendment. That is not so. They never had such powers.

It has also been said that the city of New York inspector general's office has such powers. They have no such powers at all. I just want the record to be absolutely clear on that.

Mr. COLEMAN. Mr. Chairman, will the gentleman yield?

Mr. WEISS. I yield to the gentleman from Missouri.
